INTRODUCTION

THE present volume covers the period extending from the public reading to the Patriot troops in New York of the Declaration of Independence, on July 9th, 1776, to the celebration, in September-October, 1909, of the 300th anniversary of the arrival of Henry Hudson, and completes the Chronology, and the Iconography, with the exception of the Index volume, which will also contain the Bibliography and the Addenda, the latter including reproductions of the more important views, etc., which have come to light since the publication of the earlier volumes, and the completed Landmark Map, showing the original grants above Wall Street and their later sub-division. It is expected that this final volume will be issued early in the Autumn of 1927.

The author is keenly conscious of the many short-comings of his work, of which perhaps the most regrettable is its voluminousness. He realises, alas too late, that, without very serious loss, the material which now fills six almost unwieldy volumes might have been condensed into four volumes of only moderate thickness. The wide extent of the field covered, and his own inexperience, especially in the early stages of the work, explain, although they do not excuse, this prolixity. A modicum of consolation, to both author and reader, is to be found in the fact that this very prolixity may sometimes save the student the labour of consulting a quoted authority, or supply some helpful side-light or some hint which would have been lacking if further condensation or the more drastic elimination of seemingly unimportant details had been insisted upon.

Although many regrettable errors in the earlier volumes have been corrected, and some serious omissions supplied, the author realises that errors still exist, and fears that it will not prove possible to discover and to correct all of them in the final volume. For these, and for all other short-comings, he asks the indulgence of the reader. Doubtless many of the remaining errors could have been corrected by further and more searching proof-reading, but
this would have entailed still further delay in the completion of a work that has already been extended to a point which must sorely have taxed the patience of the subscribers.

One further specific apology is due the reader:—The capitalization throughout the Chronology is ragged and often illogical. It is the result of an attempted compromise between conflicting theories, and, like most compromises, has proved unsatisfactory to all concerned.

Before accepting as final statements made in the Chronology, the reader should consult the Addenda, under corresponding dates, for possible corrections.

Perhaps the most important contribution to the present volume is the extensive series of extracts from the William Smith Papers acquired by the New York Public Library in 1915, and comprehensively considered for the first time in connection with this work. These papers contain much new information, and throw many interesting side lights on events in New York, especially during the Revolutionary Period.

The long hoped-for publication, in 1924, of the Van Rappard Documents, under the able editorship of Mr. van Laer, although an event of considerable importance, historically, has not added as much to our knowledge of the early years, just before and just after the settlement, as the titles of those documents gave reason to expect. Nevertheless, their careful examination, in connection with the sequence of events recorded in the Chronology during the years immediately preceding and following 1626, and in that year itself, should convince any open-minded student that houses had been built and farms established on Manhattan Island before the Summer of 1626. Furthermore, the "Instructions for Willem Verhulst" (Document C) show conclusively that a fort was in existence on Noten (Governor's) Island in 1624.¹

A note added at the end of the "Provisional Regulations" (Document A), which note is lacking in the copy of the "Regulations" in the Rijksarchief, discovered by Dr. Wieder in 1912, clearly establishes the fact that these articles, which were adopted by the Assembly of the Nineteen on March 28, 1624, were intended for the expedition sailing a few days later on the "Nieu Nederlandt."² This note reads as follows:—"The foregoing articles having been read

¹ This fort, as will be shown later, presumably had been established in 1623, by the leaders of the "Mackerel" expedition, although references are found in the early records to a fort on the North River, "Even before the year 1614."

² Mr. van Laer is evidently right in thus interpreting the Dutch text, which at first sight seems to read "Nieu Verdriet," which reading, adopted by Dr. Wieder in his catalogue description of the Van Rappard Documents, led the author into confusing complications in treating this period in Vol. IV.
INTRODUCTION

to the Colonists going over in the ship ‘Nieu Nederlandt,’ they took the oath of allegiance this 30th day of March, anno 1624. Underneath was written: Before Dr Claes Petersz and Gharrard Schaep. Was signed: D. Mostaert.’ These ‘Provisional Regulations’ also establish the fact that the colonists sailing on the ‘Nieu Nederlandt’ were ‘bound to remain at the place of their destination with their families for the space of six consecutive years’—or until May, 1630. This fact, taken in connection with Killiaen van Rensselaer’s letter presented to the directors of the West India Company on April 27, 1634, in which he speaks of the six farms on Manhattan Island as having been leased (re-leased) for the term of six years, beginning the first day of May, 1630, is in itself almost conclusive proof that these farms were originally assigned in 1624, and the inference seems clear that work upon them began shortly thereafter. Indeed, we know from Wassenaer (see Chronology under 1624) that ‘as soon as our people arrived there [New Netherland] they proceeded to clear and plant. Before this vessel [the “Nieu Nederlandt”] had left, the Winter harvest was far advanced.’

It will be recalled that de Rasière, in his letter to Samuel Blommaert, probably written in the Autumn of 1628, refers to these farms as having at that time been ploughed ‘at the most eight times’—if we accept Jameson’s translation in the Narratives of New Netherland. As two crops were sown each year, this, as pointed out in Vol. IV, would carry the first ploughing back to the Autumn of 1624, a few months after the arrival of the ‘Nieu Nederlandt.’ However, it is only fair to state that this translation has been questioned. The original text reads: ‘dat ’t meeste 8 mal geploucht sal zijn.’ If ‘t’meeste’ is taken to be an abbreviation of ten meeste, the translation ‘at the most,” given in the Narratives, is correct. Such a contraction, however, as Mr. van Laer points out, is very unusual. If het meeste is meant, the meaning would be that most of the 60 morgens had been ploughed eight times, not necessarily twice a year for four years, but perhaps more frequently over a shorter period—to improve the condition of the soil.

In addition to these specific arguments, the whole tenor of Documents A, C, and D indicates that these documents constitute the first official regulations and instructions issued under the charter of the West India Company to colonists going to the Hudson River, and de Rasière’s letter of September 23, 1626, (Document F), while tantalizingly deficient in important details, unquestionably depicts a settlement which had been established more than four months. Although little can be added to the theories regarding the settlement advanced in Vol. IV, the author feels more strongly than ever that serious
consideration must be given to the second, more detailed, and evidently carefully revised, statement of Catelina Trico, which statement he still believes can be reconciled more easily with the recorded facts than any theory yet advanced on the subject by historians. The fact that in this second statement the date of the expedition is given as 1623, whereas in the first 1623 or 1624 is given, is not really significant; evidently, the salient fact in Catelina Trico's recollection was that the expedition started during the Winter season of 1623-24. It would not be strange if, in the long interval, she had forgotten whether it sailed before or after January first.

In the light of the new information supplied by the Van Rappard Documents, the outstanding facts and events leading up to the settlement, so far as we now know them, may be restated briefly as follows:—

1609. Hudson explores the neighbourhood of Manhattan Island.

1614. The New Netherland Company is formed, granting to certain merchants of Amsterdam and Hoorn an exclusive charter to make four trading voyages during a period of three years, beginning January 1, 1615, to the region in this document for the first time designated as New Netherland.

1618, January 1. The charter of the New Netherland Company expires. The trading expeditions, however, continued while negotiations were in progress to establish a general West India Company, on the basis of plans which had been advocated by Willem Usselinx since 1592.

1621, June 3. The West India Company charter is granted, for a period of twenty-four years, giving the subscribers a monopoly of trade between Dutch ports and the coasts of North and South America, as well as the West coast of Africa. The main purpose of the Company, however, was to weaken the power of Spain, by capturing her ships and attacking her colonies.

1621, June 9. The States General forbids all private trading within the limits covered by the Company's charter, except to those who shall send out ships before the first of July, to return with their cargoes within one year from that date. In September, however, special permits were issued to a number of traders, on the same condition—that they should return before the 1st of July, 1622. Although this condition was not strictly complied with, private traders gradually withdrew their ships from the territory of the Company.

1623, June 21. The organization of the West India Company is completed; by the Autumn of this year the capital stock amounted to over seven million guilders, of which nearly one half had been furnished by the Amsterdam Chamber.
INTRODUCTION

Toward the end of June, "The Directors of the West India Company, finding that the inhabitants of these lands [the Netherlands], by order of the Lords States, have left the coasts of the West Indies [New Netherland], in order to maintain the continuity of trade, send three ships out of the country, the 'Oranje Boom,' the 'Grypende Arent,' and the 'Liefde,' in the hope of securing the first advantages for the Company, [the organization of] which is not yet consummated." This doubtless means that the subscriptions had not yet been completed.

In marginal notes, Wassenaer states that these were, respectively, the first, second, and third, ships sent out by the West India Company. From the context it seems clear that this expedition did not visit New Netherland.

Other ships followed, and we know from Wassenaer that by November, 1623, fifteen in all had been sent out, of which, so far as we can tell, only one visited New Netherland—the "Mackerel," a yacht of 60 tons.

1623, July 16. The "Mackerel," bound for New Netherland, sails from the Texel, in company with the "Pigeon," which carries Jesse de Forest and his band of Walloons, destined for the Amazon. On September 14 they parted company, near the Madeira Islands. The "Mackerel," setting her course toward New Netherland, reached there on December 12, and was still in the Hudson River when the "Nieu Nederlandt" arrived, in May, 1624. She returned shortly thereafter, reaching Holland probably in August.

Although we have no definite information that colonists were sent on the "Mackerel," from numerous references in the Van Rappard Documents, and elsewhere in the early Dutch records, it seems probable that this yacht was a sort of official scout, and that, in addition to traders, she brought over a few colonists having a semi-official status, perhaps as official observers or prospectors for the West India Company, which would account for a remark in Kiliaen van Rensselaer's "memorial," presented, on Nov. 25, 1634, to the directors of the West India Company, in which he makes the explicit statement that "Sundry Colonists, as early as 1623, had been conveyed thither [to New Netherland] with instructions to dwell there as free persons and to secure all trade" (Van Rensselaer Bowier MSS., page 235), a statement which, as has been recorded in Vol. IV, appears in various forms during the second quarter of the 17th Century.

It seems also a likely supposition that the "Mackerel" on this voyage established the fort at the mouth of the South (Delaware) River, as well as that on Noten (Governor's) Island, both of which, as recorded in Vol. IV, were referred to in numerous documents of the period as having been established in this year.
The "Mackerel" is the only vessel that is known to have visited the neighbour-
hood of Manhattan Island during the year 1623. The next ship referred to in
the surviving Dutch records as having come to these parts was the one on which
Krol is said to have sailed, on January 25, 1624. De Laet, in the 1630 edition
of his "Nieuwe Wereldt," makes the significant remark that "into New Nether-
land, and upon both of these rivers [the North and South Rivers] . . . several
colonies have been sent by the Directors of the Chartered West India Company
from the very commencement of that Company, to wit, from the year 1623,
in order to continue possession of those quarters, and to maintain the trade in
Peltres."

1623, November 3. Adriaen Jorisz. Thienpont appears before a session of
the Assembly of the XIX of the West India Company, and requests "permission
to make ready a yacht to trade their merchandise, and bring home their people" from the Rio de Montagne (Hudson River); whereupon it was resolved that
a ship be sent "to the Virginias, which shall be equipped by the Chamber of
Amsterdam with the necessary cargo to continue the trade, for which purpose
they may also take with them 5 or 6 families of the Colonists, in order to make
a beginning of settlement there, and on that occasion bring here the goods
secured in return for the aforesaid merchandise and people." It seems clear
that, as a direct result of this resolution, the "Nieu Nederlandt" expedition was
despatched, shortly after March 30, 1624, and in all probability Thienpont
accompanied it.

1624, January 25. A note in the "Copie-Boek" of the Church Consistory
of Amsterdam informs us that on this date Bastiaen Jansz. Krol (a "comforter
of the sick" in the employ of the West India Company) "sailed for the West
Indies," from which statement it has been assumed that he went to New
Netherland; it is possible, however, that he sailed with the fleet of Admiral
Willekens, and visited Manhattan Island on his return voyage. The name of
the ship is not given, and no further reference to her has been found, although
de Laet states that in 1624 two ships were sent to New Netherland.

Under February of this year, Wassenaer records: "A ship is being fitted out
under a commission from the West India Company, and freighted with families to
plant a colony among these people." The context shows that New Nether-
land is meant, and this is evidently a reference to the "Nieu Nederlandt" expedition.

1624, March 30, or shortly thereafter. The "Nieu Nederlandt" expedition
sails for New Netherland. We are told by Wassenaer that Cornelis Jacobsz.
May of Hoorn was the skipper, and that the "Nieu Nederlandt" carried "a
Company of 30 families, mostly Walloons, to plant a Colony there."
INTRODUCTION

We know from Van Rappard Document A that this vessel sailed under instructions known as the “Provisional Regulations for Colonists,” which had been adopted by the Assembly of the Nineteen of the West India Company, on March 28.

Although no mention is made of any other ship taking part in this expedition, it seems quite possible that there was a second ship, perhaps the “Eendracht,” or “Unity,” and that Thienpont was its commander, in which case Catelina Trico’s second statement will be seen to coincide very closely with the known facts, and with those which are assumed in this summary, it is believed with reasonable justification. This supposition is strengthened by the fact that the “Nieu Nederlandt,” although a ship of 130 lasts (260 tons), could hardly have accommodated 30 families, in addition to their belongings and the crew.

The “Nieu Nederlandt” expedition probably reached the mouth of the Hudson about the middle of May, and we know that she found there the yacht “Mackerel.” It seems plausible that, as stated by Catelina Trico, 8 men were left “to take possession” of Manhattan Island, or perhaps they joined the garrison on Noten (Governor’s) Island, which, as we have already seen, had been established by 1623.

1624, September 10 and 23. The MS. minutes of the Assembly of the XIX (see Chronology) refer to “the extension of the colonies already established there [New Netherland],” and “the strengthening of the settlements already commenced.” The significance of the plural form is apparent.

1624, October. Some time in this month—probably before the 28th—the “Nieu Nederlandt” reached Holland, on her return from the Hudson River.

1625, January 28. A letter bearing this date (erroneously entered under 1624 in the Chronology, Vol. IV), written by the Privy Council to the mayor of Plymouth, authorises the arrest of a Dutch ship “ryding in the haven at Plymouth called the ‘Orange Tree’ [the “Oranje Boom”] of Amsterdam, being of the burthen of one hundred and fifty tunes, or thereabouts, and bound to a place in America which is comprehended in a grant made by his Majiie upon just consideration to divers of his subjects.” The captain of the ship must exhibit his commission and the “plat which he hath,” and in the meantime a “stay of the ship” is commanded.

Wassenaer, commenting on the storms which raged in Northern Europe during January of this year, states: “the ship with the families lay at Plymouth. Getting a favourable wind, it also wished to go to sea, but was visited by the plague in such a way that already eleven persons had died and twenty more
were still sick belonging to the families of the Walloons who were to be transported thither to the colony [New Netherland]. The assistant super-cargo had also been sick, but was now getting better.”

Buchelius, in his notes on the East and West India Companies, under date of February, says: “It is said that some farmers were [are] to be sent to Virginia to cultivate the land in some region discovered by our countrymen.”

These references are all, doubtless, to the ship on which Krol made his second voyage, which probably did not reach Manhattan Island before April.

It seems clear that Verhulst must have sailed on the “Oranje Boom,” and that the “Instructions” issued to him should therefore be dated shortly before January 28, 1625. These “Instructions” provided that Verhulst should “duly distribute over the places that are already occupied the families now going over.” It is in this document also that the reference to the fort on Noten Island is found.

1625, end of April. At this time, an “extraordinary shipment” was sent to New Netherland, to strengthen the “colony” there. This was the well-known expedition for which Hulft undertook the responsibility. It sailed on the ships “Macreel,” “Paert,” “Koe,” and “Schaep,” and was destined, solely, for the North River, and especially for the immediate neighbourhood of Manhattan Island. This expedition, we now know, was commanded by Gerrit Fongersz., and carried the “Further Instructions” for Wm. Verhulst and the Council in New Netherland, dated April 22, which “Instructions” contained a recommendation that, if the West side of the Hudson, near the mouth, were not found suitable for a settlement, the “hook of the Manattes, north of Noten Island,” should next be considered.

We know further from Wassenaer that the cattle were “on their arrival [probably about the end of June, only a couple of months after the arrival of Verhulst on the “Oranje Boom”] first landed on Nut [Noten] Island, three miles up the river, where they remained a day or two. There being no means of pasturing them there they were shipped in sloops and boats to the Manhates, right opposite the said island. Being put out to pasture there they throve well, but afterward full twenty in all died. The opinion is, that they had eaten something bad from uncultivated soil. But they went in the middle of September to meadow grass as good and as long as could be desired.”

Referring in another place to the same event, Wassenaer states: “The cattle carried thither were removed upwards to a convenient place abounding with grass and pasture.” What could be more natural than to suppose that this refers to the Company’s farms, some parts of which, by this time, must have been
INTRODUCTION

ready to receive them, for between the arrival of Verhulst on the "Oranje Boom," probably in April or May, and the middle of September, when the cattle were "removed upwards," the "common farmers" who accompanied him were doubtless engaged in clearing the farms assigned to the "head-farmers," and the first crop was probably sown before the end of the month.

The "head-farmers" were now evidently in full possession of their farms, the leases for which had probably been made out either before they left Holland or immediately after their arrival in April, and dated back to the preceding first of May (1624), May 1 being, then as now, the usual date for the beginning of such leases.

Between the Summer of 1625 and the Spring of 1626, when Minuit returned from Holland and took command of the settlement, Cryn Fredericksz., who probably came over on the Hulft expedition, had doubtless made considerable progress in laying out and constructing Fort Amsterdam and the streets of the little settlement. It is plain that his "instructions" (Van Rappard Document E) could only be carried out in part, as the south end of Manhattan Island, the site finally selected for the settlement, was too narrow to permit of the dwellings being placed within the confines of a large fort, and the distance between the southern portion of the Wickquasgeak trail (later Broadway) and the two rivers was insufficient to allow of the farms being laid out near the fort.

1626, May 4. Peter Minuit arrives on the "Sea-Mew" ("Meeuwken"—literally "Little Seamew"). Some time between this date and the sailing of the "Arms of Amsterdam," on September 23, he bought Manhattan Island from the Indians.

The following additional facts complete the outline of a theory which is perhaps as reasonable as any which has been advanced. At all events, the author believes that enough evidence has now been presented to convince even the most sceptical that the Fongersz.-Hulft expedition, which sailed shortly after April 22, 1625, with the five "head-farmers" and the cattle, settled permanently on Manhattan Island; that Verhulst's expedition, which arrived a few months earlier, brought over the "hired-farmers," and that some of the colonists on the "Nieu Nederlandt" probably settled on Manhattan Island, or in its immediate vicinity. Furthermore, we have seen that there is good reason to believe that some "free persons," or settlers, came over on the "Mackerel," and established

1 Van Tienhoven, in his answer to the Representation of Van der Donck, written in 1630, says: "The following is the mode pursued by the West India Company in the first planting of Bouweries ... The farmer being conveyed with his family overseas to New Netherland, was granted by the Company for the term of 6 years a Bouwerie, which was fairly cleared, and a good part of which was fit for the plow."
themselves on Governor’s Island.—The arguments are not conclusive, but the author believes that they are convincing.

The reference in the “Instructions for Willem Verhulst” to the possible selection of “a still more suitable place than Nooten Island for the fortification and the dwelling places of the colonists and farmers” seems to show that no farms had been laid out on Manhattan Island, or even locally assigned, up to the time when the “Nieu Nederlandt” left for Holland, bearing news and letters from the infant colony—probably toward the middle of September, 1624, between which date (but after November 21) and January 28, 1625, these “Instructions” were written. Moreover, we have no record of any ship or news arriving from the Hudson River between the return of the “Nieu Nederlandt,” before November first, 1624, and the departure of the so-called “Hulft Expedition,” with the “Further Instructions,” sometime after April 22, 1625.

The argument here advanced in favour of 1624 as the date of settlement requires the assumption either that the assignment of the “six farms” took place in America, after the departure of the “Nieu Nederlandt” and before the arrival of the “Oranje Boom,” or that it took place in Holland, some time after the sailing of the “Nieu Nederlandt,” and after the “head-farmers” had been selected, possibly early in 1625, but more likely at the end of 1624. In either case, we must suppose that the leases, in order to conform with the usual practice of the time, were dated back to the preceding May 1, shortly after which date the clearing of the farms on Manhattan Island was probably begun, under the direction of May. Although at first sight this assumption may appear far-fetched and unlikely, a careful examination of the various pertinent facts and conditions shows that it is at least a reasonable one, and it is the only way in which all of the known facts can be reconciled with the very explicit statements in the records that the farms, from the beginning, were leased for periods of six years, that the first lease period expired, and the new leases were made, in May, 1630, and that therefore, obviously, the original leases were dated May 1, 1624.

The clause in the “Provisional Regulations” providing that the commander and his council should allot to the colonists the “lands to be cultivated by them” evidently does not refer to the large farms or bouweries to be leased to the “head-farmers,” but to the small garden plots to be assigned to the colonists for their individual use.

We know from Baudartius that when “a ship arrived in August,” on her return from New Netherland,¹ the colonists there were daily expecting the

¹ The “Mackerel” returned in August, but the reference is perhaps to the “Nieu Neder-
landt,” which returned late in October.
arrangement of cattle, “by the first ships.” Furthermore, it is evident that those on Noten Island must have realised that this island was not large enough to accommodate a permanent settlement of importance, and that there was not sufficient pasturage for any considerable number of cattle. Moreover, as has already been recorded, we know from van Tienhoven and others that the Company undertook the first general clearing of the land leased to the farmers. What could be more natural than that, without awaiting further orders from the West India Company, May and his council should have determined that Manhattan Island, which lay so near at hand, was the most suitable place for an important fortified settlement at the mouth of the Hudson River, and that, without further delay, they should have begun to clear land there, while awaiting the arrival of the “head-farmers” and the cattle. Apparently the work had not been completed when these arrived in the Spring, but was finished in September, when the cattle were “removed upwards.” Furthermore, it is not an unreasonable assumption that, if the assignment and leases had not already been made in Holland, they were now made, and dated back to May 1, 1624.

Whereas the second expedition, under Verhulst, was destined primarily for the South River, the third seems to have been sent directly to the North River. In connection with this expedition, reference is made for the first time to the “head-farmers,” which the context clearly shows were those intended to assume direction, under lease, of the Company’s farms. The farmers going over with Verhulst were referred to as “common farmers,” or “hired farmers;” evidently they were farm labourers.

The original “Instructions” clearly refer to the “hired-farmers and the cattle to be sent thither in the ship ‘Den Orangenboom,’ and the following ship [ships?—evidently a reference to the “Paert,” “Koe,” “Schaepp,” and “Macreep”].’’ As this reference occurs in a paragraph dealing specifically with the South River, it seems clear that at the time when these “Instructions” were prepared it was the intention to establish the principal settlement there, and not on the Hudson River. Furthermore, this reference, taken in connection with the fact that neither Wassenaer nor the “Provisional Regulations” refers specifically to farmers or cattle, seems to indicate that the “Nieu Nederlandt” colonists, although they may, and probably did, include some independent farmers, were for the most part composed of artisans, traders, and industrial workers.

The publication of the Van Rappard Documents has but whetted our appetite for more information, while it has strengthened the belief that, sooner or later, other similar records will be found. As yet no thorough examination has been made of the archives of the smaller provinces which once formed part.
of the Assembly of the XIX, nor has a systematic search been attempted among
the family papers preserved in countless private muniment chests throughout
the Netherlands. Until these sources have been exhausted, we should not de-
spair of some day drawing aside the veil which has so long obscured the events of
those mysterious years which lie between the completion of the organization
of the West India company in 1623 and Minuit's arrival, as governor, in 1626.

Despite this exasperating hiatus, to the reader of the Iconography one fact
must stand out unchallenged:—The City of New York is to be congratulated
on the fullness of the records which remain of its past. Notwithstanding many
vicissitudes, and some irreparable losses, there still remains, in its public archives,
and in those at Albany and elsewhere, a very considerable part of the original
documents which record its history, almost from the beginning. There is per-
haps no other city of equal antiquity and importance, certainly no other such
American city, whose archives are so complete.

It would indeed be a source of public congratulation, as well as a peculiar
gratification to the author, should his work add to the growing interest in all
that pertains to the history of our city, and thereby stimulate the movement,
already sponsored by many eminent historians and others, to bring about a sci-
entific arrangement of those records in a single archives building, so designed
and built, and so situated, as to render them reasonably safe from fire, theft, dam-
age, and deterioration, and as convenient as possible to serious students.

Now that the Iconography has been virtually completed, the many diffi-
culties and disappointments connected with the work are forgotten, and there
remains to the author only satisfaction in looking back over those long years
of pleasant and intimate association, in a congenial task, with successive little
groups of patient and enthusiastic co-workers and correspondents, who have
borne the brunt of the fray, and have made his part little more than that of coun-
sellor and critic. To them, far more than to him, belongs whatever there is
of value in the work, and he can never adequately express or repay the debt of
gratitude which he owes them.

THE REVOLUTIONARY PERIOD
1763–1776–1783
PART II
1776–1783
CHAPTER III
THE REVOLUTIONARY PERIOD
1763-1776-1783
PART II
1776-1783

A BRIEF summary of the principal events of the Revolutionary Period, from the destruction of the statue of George III on the night of July 9, 1776, to the evacuation of the city by the British on Nov. 25, 1783, is contained in Vol. I, Chap. III.

A British officer writes from Staten Island to a correspondent in London: "Our army consisted of six thousand one hundred and fifty-five effectives, on our embarkation at Halifax; they are now all safe landed here, and our head-quarters are at your late old friend Will Hics’s mansion-house.

"The accounts given of the numbers of the whole army upon the island of New York, very much; some pronounce them 12, 14, and others from 24, to 30,000 men; but we well know their numbers were very much exaggerated when entrenched before Boston.

"Mr. Washington's head-quarters were lately removed to the City Hall, upon the discovery of a design to seize and deliver his person to Governor Tryon; for which a drummer, who had deserted from the Royal Welch Fusileers, was apprehended and hanged. A pardon and rewards were repeatedly offered to this young lad (not exceeding eighteen years of age) if he would impeach his associates in the enterprise; but he, with a glorious disdain, continued inflexibly secret, and died resolute. The Provincial Convention of New-York have tried and sentenced the Mayor of their city to death, for holding a correspondence with Governor Tryon; and who should this prove to be but the facetious David Matthews. . . . Should the sentence he executed, many shocking events of the kind will follow. On our landing we found Colonel De Lancy, Mr. Apthorpe, Major Bayard, Mr. Skinner of Jersey, Mr. Kempe of New York, Mr. Barrow, Paymaster of his Majesty's forces, Mr. Moore, &c. &c. The former of these gentlemen had been employed, at an advanced age, and in infirm state of health, upon the most laborious work in the Provincials entrenchments; he proves from his intimate acquaintance with the disposition of the inhabitants, and his accurate knowledge of the country, a valuable acquisition to our excellent General. . . ."

"We expect orders to land the army beyond King's Bridge, and make our approach to the city on the rear of the island; in which case Mr. Washington must present his front to us in a fair field, or submit to an alternative, which, in its event, will put an end to this hurly burly about Independence."—Kentish Gaz. (Canterbury), Ag 17-21, 1779.

Since June 29 (p. u.), when alarm was created on account of the arrival at Sandy Hook of the fleet from Halifax, having on board the British army under Sir William Howe, "almost all business in town is knocked up." The fleet "now lays verry Quiet at the watering Place [for Robertson's view, see Jl 12], waiting for a Reinforcement from England [which arrived on Aug. 12]. When they say they shall little regard our Bateries. We as little regard them, Our men are in high Spirits and Ready to meet them at any Hour the town swarms with people, I doubt not but our army consists of at least twenty thousand men, & the Country about us verry Willing to lend us there asestence, . . ."—From letter of Peter Elting to Capt. Richard Varick, in N. Y. City during the Am. Rev., 99-100.

Ensign Caleb Clap records in his diary: "Several French Gentlemen have been at the Generals, and have been to the Congress, and are now come back to the General [see Je 20]. It is reported that we may depend on their Assistance by sea. . . ."

"There is now several small ones [vessels], that Cruce round here a Nights to watch the movements of the Enemy and see that the Tories do not go aboard. . . . Scarcely a day but what some desert from the Enemy. . . ."—Hist. Mag. 3d ser., III: 137.

Expressing doubts as to the French alliance with England's rebellious colonies (see F 6, 1778), Smith writes: "I dread France—She will be guided only by motives of Interest—No Promises will bind her—She will perceive it more advantageous to her Ambition to ferment animosities, than hastily to plunge into a War—She will..."
deciude both Parties that her End s may be achieved at our Expenice. 1776
July
Can she wish to see a new Empire erected formible to her Islands? 9
Much less assist Great Britain to regain a union that was in the late
war so injurious to her ambition, & which in a future Day may fill
Europe with Terror."—Wm. York, Vol. 46.

"The same Evening [July 9, not 10 as appears by this authority] the
Equestrian Statue of George III. erected in the year 1779, was
thrown from its Pedestal and broken in Pieces; and we hear the Lead
wherewith this Monument was made, is to be run into Bullets."—
N. Y. Misc., Jl 15, 1776. The date is confirmed by Samuel B. Webb,
Washington's aide de camp, who entered her service on the day of July 9.
"Last night the statue of the Leaden George III. was tumbled
down and beheaded. The troops having long had an inclination so to
do, thought the time of publishing a declaration of independence,
to be a favorable opportunity, for which they received the check in
this day's orders."—N. Y. Herald, Ag 28, 1776. See also Jl 10.

The incident was the subject of satire. A letter dated July 11,
sent from New York to the Penn. Jour. and published July 17, says:
"On Wednesday evening last [error for Tuesday evening] the equestrian
statue of George III which tory pride and folly raised in the
year 1779, was, by the sons of freedom, laid prostrate in the dirt
the just desert of an ungrateful tyrant! The lead wherewith this monu-
ment was made, is to be run into bullets, to assimilate with the brain
of our infatuated adversaries, who, to gain a peppercorn, have lost an
evil example. These dull vixens pervert prius dementit. A gentleman
who was present at this ominous fall of leaden Majesty, looking back
to the original's hopeful beginning pertinent exclam'd, in the
language of the angel to Lucifer, 'if thou be'st he! But ah, how
fallen! How chang'd!'" The editor here explains that "Lord Clare
in the House of Commons declared that a peppercorn in acknow-
eledge to Britain's right to tax America, was of more importance
than millions without it."—Penn. Ev. Post, Jl 13; Penn. Jour., Jl
17, 1776.

Ebenezer Hazard wrote to Gen. Gates on July 12: "The king
of England's arms have been burned in Philadelphia and his statue
here has been pulled down to make musket balls of, so that his
troops will probably have melted majesty fired at them."—From
Gates Papers at N. Y. H. S., cited by Mr. Gibbs in his address, pub.
in the society's Proc. (1844), 171.

Lieut. Isaac Bangs wrote, on July 10: "Last night the Statue
on the Bowling Green representing George Ghevelph alias George
Rex was pulled down by the populace. In it were 4,000 pounds of
lead and a Man undertook to take off 1 oz. of gold from the Super-
sifics, as both Man and Horse were covered with Gold Lead. The
Lead being to be run up into musket balls for the use of the
Yankees, when it is hoped that the emanations of the Leaden
George will make as deep impressions in the Bodies of some of his red coated
and Torie Subjects. . . ."—Jour. of Lieut. Isaac Bangs (1890), 75.

A monument marking the grave of "Captain Oliver Brown,
of the Artillery of the Massachusetts Line," who died at Westphalia,
Va., Nov. 16, and was buried there, bears an inscription that he
"commanded the volunteer party that bore off the leaden statue
of King George from the Battery of New York, and made it into
bullets for the American Army." The story of this exploit, attrib-
uted to Brown, is told, without citation of authorities, by Rev.
Horace Edwin Hayden in A Biographical Sketch of Capt. Oliver
Brown (Willis-Barre, Pa., 1882). The Brown epitaph contains
at least two errors: The statue was not on the "Battery," and
the party of patriots who pulled it down were not the ones who
"made it into bullets." The latter fact appears by the following
records:

In a memorandum of letters written by Du Similie, he says,
under date of Feb. 22, 1779, that he wrote "a letter to Col. B.
Flower's Deputies in this town [Philadelphia], requesting him to
write to his Deputies at Fish Kill, Ridgefield, or Danbury, to inquire
of them about the fragments of the King's Statue which was
removed from New York under the care of a Col. Hugh Hughes, who
resides now at Fish Kill."—From Du Similie's "Memoranda,"

An authentic record of the melting of the lead into bullets of
equestrian statue contained in the state document giving an "account cur-
rent" of the number of cartridges made from the materials of the
statue by the ladies of Litchfield, Conn. This document was (in
1882) preserved among the papers of Gen. (afterwards Gov.) Oliver
Wolcott, of Conn., and is in his handwriting. It was brought to the
attention of the public by the late Geo. Gibbs, librarian of the N. Y.
Hist. Soc., in his address before that society on Oct. 1, 1844, pub-
lished in the society's Proc. of that year, pp. 72-75. The document,
he states, is not dated, nor is mention made by Gen. Wolcott of
the fact that the cartridges were made from the statue, but a memom-
dandum by his son, William Wolcott (MS.), says: "N. B. An equestrian statue of
George the Third of Great Britain, was erected in the City of New York on the Bowling Green, at
the lower end of Broadway; most of the materials were lead, but richly
gilded to resemble gold. At the beginning of the revolution this
statue was overthrown. Lead being then scarce and dear, the
statue was broken by the metal was transported to Litchfield
as a place of safety. The ladies of this village converted the lead
into cartridges, of which the preceding is an account. O. W." Mr.
Gibbs gives interesting particulars connected with this enterprise
of the people of Litchfield.

The following information, regarding certain fragments of the
statue, was published in 1861: "A portion of the statue was taken
in Litchfield, Conn., as a place of safety. On its arrival there, a
shell was erected in an apple orchard, where Gov. Wolcott chopped
a part of it up with a wood axe, and the girls had a frolic in running
the bullets and making them into cartridges. A piece of the statue,
forming the saddle cloth and cérneige, was carried to Norwalk,
about 45 miles up the Sound. When Gov. Tryon was on his maraud-
ing expedition through Conn., it was moved with the military stores
to the back of the colony, and was called Raymond Corner. On the enemy approaching that place, the
inhabitants threw this fragment of the statue together with the
military stores into a swamp in the woods. There the lead lay until
the winter of 1832-33, when it was discovered by a boy named
Comstock, who was crossing the frozen swamp, at other times im-
passable, and recognized by a Mr. Belden, a Revolutionary pen-
sioner, residing in Wilton, and who had himself borne a conspicuous
part in its destruction, as being a portion of the Equestrian statue
of George III., erected in New York. The relic was in the possession
of the uncle of the finder until the year 1844, when it was purchased
by a gentleman of New York, who subsequently disposed of it to the
late Thomas Riley, Esq., then proprietor of the Fifth Ward Hotel
[see Man. Com. Curr., 1864, pp. 599, 624], where it may still be (1861)
be seen. There are still many tracings of the original gilding, and
the fringe of the saddle cloth is distinctly perceptible. A large iron
bullet mould, capable of casting twelve bullets at a time, and which
was used in casting some of the lead of the King's statue into bul-
lets, may be seen among the collections of the New York Historical
Society."—Jour. of Solomon Nath, ed. by Bushnell (1861), 56-58,
citing Woodruff's Hist. of Litchfield, Conn. 42, and N. Y. H. S.
Proc. (1844), 168.

Four pieces of the statue of George III, consisting of the tail of
the horse and trappings, were plowed up on the farm of Peter S.
Colby, at Wilton, Conn., in April, 1871, and were purchased by the
N. Y. Hist. Soc. on June 4, 1876.—See MS. of a lecture, entitled "Modern American Civilization Through a Revolutionary Period: 1765-1783,"
delivered Nov. 1, 1910, by the librarian of the society, Robert H. Kibby;

The head of the statue was otherwise disposed of. Capt. John
Montresor, in an account of his services, made the following note
(without date) in his journal: "My hearing that the Rebels had cut
the King's head off the Equestrian Statue (in the Centre of the
Ellips, near the Fort) at New York, which represented George the
3rd in the figure of Marcus Aurelius, and that they had cut the nose
off, clpt the laurels that were wreathed round his head, and drove
a musket Bullet part of the way through his Head, and otherwise
disfigured it, and that it was carried to Moore's tavern, adjoining Fort
Washington, on New York Island, in order to be fixed on a Spike on
the Truck of that Flagstaff as soon as it could be got ready. I imme-
diately sent Corby through the Rebel Camp in the beginning of
September, 1776, to Cox, who kept the Tavern at King's Bridge, to
steal it from thence, and to bury it, which was effected, and was dug
up on our arrival, and I rewarded the men, and sent the head by
the Lady Gage to Lord Townsend, in order to convince them at
home of the Infamous Business of the English in their Infested
Country."—N. Y. H. S. Collections (1881), 123-24. That
the head reached its destination in England we know from The
Diary and Letters of . . . Thomas Hutchinson, compiled by Peter
O. Hutchinson (1886), II: 167. Hutchinson entered in his diary
under date of Nov. 23, 1777: "Lady Townsend asked me if I had
seen an instance of American loyalty, and going to the
The slab on which the statue stood, on a high pedestal, is now owned by the N. Y. Hist. Soc. It is of Portland marble, 53 feet long, and 4 inches thick. It was brought across the Atlantic from England when the statue was erected. Openings show where two of the horse’s hoofs were fastened. Prior to the British evacuation of New York in 1783, it was appropriated for a tombstone at Paulus Hook (Jersey City), having on one side an inscription:

“In Memory of Major John Smith of the XLIIrd or Royal Highland Reg.

Who died 25 July 1753.”

Maj. Smith was buried on a hill near where St. Matthew’s Church, in Sunnyst St., Jersey City, was afterward erected. The hill was levelled in 1804 by Andrew Dey or by the Jersey Associates.

The stone was next used for a door-step. Regarding this, the following account was published in 1861: “John Van Vorst, grandfather of Alderman Van Vorst, took this stone, and laid its inscription downward, in front of the old family mansion, which was a few rods southwest of the present residence of John Van Vorst.”

“The year 1818, the old Van Vorst mansion was demolished, and the late Cornelius Van Vorst placed it as a stepping stone to the kitchen door of his house on the knoll on the northerly side of Wayne street, near Jersey Street. There it remained until that building was demolished, when it was used for the new house on the southerly side of Wayne street, now occupied by the family. In the year 1826, a pediment from England called upon Mr. Van Vorst, and offered him $500 for this relic, as he wished to take it to England with him, but Mr. Van Vorst declined the offer, and it still [1861] remains in the possession of the family.”—*Journal of Solomon Nath*, ed. by Bushnell (1861), 57–58, citing Woodruff’s *Hist. of Litchfield*, Conn., 44, and N. Y. H. S. Proc. (1844), 168; *Hist. Mag.* (1867), 2d ser., II: 381–82, citing *The Jersey City City Telegraph*. The stone was presented to the N. Y. Hist. Soc. in Oct., 1874, by Cornelius Van Vorst.—See the records of the society, Mr. Kelby’s address, already cited, and N. Y. H. S. *Quart. Bull.*. Jl, 1920, p. 53–54.

The pedestal, in 1876, was observed by Chancellor Livingston as “Far from being ornamental” and “contrasts the appearance of the ground.”—See *N. Y. Exc. Post*, My 29, 1876; Hazelton, *The Declaration of Independence* (1906), 763, citing the *Telegraph*, Je 16, 1883; cf. L. M. K., III: 964. See also *Journal of the New-York Historical Society* (1863), III: 356, where the date is erroneously given as July 10. For Washington’s action on the outbreak of July 9, see *Jl* 10.

The following appears in the orders of the day: “Though the General [Washington] doubts not the persons who pulled down and mutilated the statue in the Broadway last night were actuated by zeal in the public cause, yet it has so much the appearance of riot and want of order in the army, that he disapproves the manner, and directs that in future these things shall be avoided by the soldiers, and left to be executed by proper authority.”—From the address of Mr. Gibbs on Oct. 1, 1844, before the N. Y. H. S., pub. in their *Proc.* of that year, p. 171, and citing a book of general orders issued by Washington, the original of which is in the society’s possession; *Glover Correspondence* (MS.), 166.

Capt. Francis Hutchinson, of the British forces, writing from the “Watering Place,” Staten Island, to Embedwell in England, says: “The New Yorkers who are friends to Government are very apprehensive the New England men will set fire to the town, as soon as they find they can no longer keep possession of it.”—*General Washington has taken up his Summer Quarters at your house [at Mrs. Mortier’s on Richmond Hill]; his tent officer is General Robertson, on the top of which they display the Continental Colours…”—“Battle of Harlem Hts.”, 219, citing the Haldimand MSS., Brit. Museum.

An officer under Gen. Howe writes from Staten Island to a correspondent in London: “According to the latest and best Accounts the Provincial Army is not so numerous as we have been in our former communications, and the whole Army, as they called it, is of about 2,000 men. The Island is fortified with only a Parcel of unwieldy Cannon from Ticonderoga, which are chiefly unfit for Service. Our only Fear is, that the Rebels will not choose to hazard a general Action, and our Suspicion on this Head is stronger, as we are told by Deserters, that they have Intrenchments, Ambuscades, Mines, and Forts, for a considerable Way into the Country. If this is really the Case, and they are determined to act upon the Defensive only, and to fire their Cities and Habitations upon the Sea-Coast, when we are upon the Point of possessing them, our Work will never be done; our Lives, on the contrary, will be in perpetual Danger from the innumerable Snares that are laid for them.”—*St. James’s Chron.* (London), Aug 20–22, 1776.

In Pursuance of the Declaration for Independence, a general Goal Delivery, with respect to Debtors, took place here on Wednesday (July 10)—*N. Y. Jour.*, Jl 15, 1776. “One of the first fruits of Independence, the oppressed are set free.”—*N. Y. Packet*, Jl 11, 1776.

Capt. Robertson and Capt. Montresor go on a “reconnoitering party” in a whole boat, “supported by two Flat Boats with soldiers in each, besides the towers of the 43d.” Robertson writes of this: “We went a little above Kenneth’s or Bedlow’s Island between it & Red Hook where we could discover the Rebel Works pretty distinctly on Govt. Island Paulus & Red Hooks—They fired two cannon at us over our heads one from Govt. & the other from Red Hook also some Musquetery from Bedlow’s Island.”—Robertson’s *Journal* (MS.). Montresor erroneously records this expedition under August.—*Montresor’s Jour.*, 121. See Jl 12.

The publication of the Declaration of Independence in the *N. Y. Packet*, on this day, is its first appearance in a New York newspaper. There is a copy in the N. Y. P. L. For other publications of it, see Jl 4.

The first draft of the “Articles of confederation and perpetual union,” drawn by John Dickinson, is presented to congress for consideration.—*Jour. Cont. Cong.* (Ford ed.), V: 546–54. The articles were adopted in amended form on Nov. 15, 1777 (g. v.).

An officer under Gen. Howe writes from Staten Island: “Such strong intrenchments as the rebels have thrown up at New York were never before seen in an enemy’s country; according to the best information, they extend miles together, are a considerable height, and have near 30,000 men to defend them.”—*Upcott Coll.*, IV: 375.

The “Phoenix,” the “Rose,” and three tenders leave the Watering Place at Staten Island “to pass New York & go up Hudson River.” As soon as they set sail, 6 or 8 Alarm Guns were fired at N. York.—The Ships proceeded with the greatest order & never returned a Shot until they got between Paulus Hook & the Town—at ½ past four they were pass’d every Battery—near the Town. . . About an hour after We saw the Ships firing at Another Battery about 6 or 8 miles up the River on the E. side.”—Robertson’s *Jour.* (MS.).

Kemble’s record reads: “About half after 3 in the Afternoon His Majesty’s Ship Phenix, Commanded by Capt. Parker, and the Rose, by Capt. Wallace, with the Tryal Schooner and two Tenders, got under sail to pass the Town of New York; in about forty minutes they got a breast of Paulus’s Hook, before which time they did not fire a Shot, tho’ they received the whole of the Rebels fire from Red Hook, Governors Island, the Battery, and from some Guns in the Town. When they opened Paulus’s Hook they then set fire to fire on both sides, on which the Rebels fled from their Works at Paulus’s Hook, but returned at intervals to their Guns and fired them; at half past four the Ships were past all the Batteries, and as far as we could judge received little hurt.”

“At 7 o’Clock Lord Howe came to Anchor at the landing Place; was received by the Admiral at 8 o’Clock. The General went on board to see his Brother. Number of Shot fired by the Rebels, 196.”—Kemble’s *Jour.* in N. Y. H. S. *Collections* (1883), 86.
A newspaper report says that the news having reached New York, that Lord Howe had arrived at Sandy Hook with a large fleet from England, "The army soon took the alarm, and in a few minutes every man was at his station, well provided with all necessaries for a vigorous defence, but as soon as the ships came near Bedloe's Island, they inclined towards the Jersey shore, to avoid our batteries that then began to play upon them from every quarter on both sides of the river, and notwithstanding the ship had received considerable damage, they stood their course up Hudson's river firing several broadsides as they went along. A strong southerly Wind, and the Tide of Flood facilitated the Ships getting above the Batteries near the Town, but we hear they were roughly handled about 12 Miles up the River, from whence they have not yet attempted to return, but we hear lay at Tryar-Town, about 30 Miles up the River, on Saturday Evening.

"Several Shot went thro' different Houses in the Town; two into according to Mr. Black. Were that during the firing Six men were killed, either some or all by ill-managing the cannons; though it is said that a couple were killed by the ship's firing. The six were put this evening into one grave on the Bowling Green. The smoke of the firing drew over like a cloud; and the air was filled with the smell of the powder. This affair caused a great fright in the city. Women, and children, and some with their bundles came from the lower forts, and walked to the Bowery, which was lined with people. Not long after this affair was over, the fleet fired a Salute, Admiral Howe coming in from England.

"A Ball also struck the House of Mr. Daniel Phoenix and from that took its Course to the new Dwelling of Mr. Christopher Smith, in the Opposite Side of the Street."—N. Y. Merc., Jl 15, 1776.

Robertston says that while the men-of-war and the tenders were proceeding towards the Hudson River, "Lord Howe in the Eagle—came up the Bay & cast anchor at 7 o'clock after being saluted by Admiral Shulthman & the rest of the Ships—from this day forward I date the commencement of our Successes."—Robertson's Jour. (MS.), V.

Robertson adds that while the men-of-war and the tenders were proceeding towards the Hudson River, "Lord Howe in the Eagle—came up the Bay & cast anchor at 7 o'clock after being saluted by Admiral Shulthman & the rest of the Ships—from this day forward I date the commencement of our Successes."—Robertson's Jour. (MS.), V.

This date is found on two sepia views (1840 in. x 11 3/4 in.) drawn by Archibald Robertson, an engineer in the 4th Regiment of Foot. One is entitled "Taken from the heights above the watering place on Staten Island"—"View of the Bay & Town of New York wth the Phoenix & Rose comeing up from the River 12th July 1776" and the other, "View of the Narrows between Long Island & Staten Island wth our Fleet at Anchor & Lord Howe coming in—taken from the height above the Water's place Staten Island 12th July 1776"—"View of the opening of our Batteries at Hell Gate upon the Rebel Works at Walton's house on the island of N. York 8th Sept 1776."—"View of Long Island & East River, from my Quarters on N. York Island 18th Sept 1776."—"View of Part of the Rebel works round Walton's house wth the Situation of our Batteries on Long Island—taken from N. York Island 8th Oct 1776."—Also another view of same.

"View of Morisinia Haarlem, Montresor's & Buchanan's Islands wth Part of the sound, taken from our lines near McGowen's house—10 Oct 1777."—"View from Staten Island 24 July 1777."—"New York from Brooklyn Heights, August 6, 1778." (in the author's collection). See Frontispiece I, Vol. V.

"Keep's Bay 17th Augt 1776 where the Troops landed 15th Sept 1776 [written in ink]."—"View of the North River from a Sloop at anchor a little above Daubbs' Ferry & looking towards New York 4th Dec 1778."—"View of New York taken from one of the Redouts in the Lines thrown up by the Rebels behind Mount Pitt. 11th April 1777."—"View of the North River from the Beach near Liepman's Brewhouse 10th Dec 1778."—"View of the North River, looking up, south of Fort Washington? Oct. 16, 1781."—"[View of the North River, looking up, south of Fort Washington? Oct. 16, 1781."

"[View of the North River, looking up, south of Fort Washington? Oct. 16, 1781."

"View across the upper Harlem?"—"View across the lower Harlem?"
1776

Washington advises the secret committee of the convention of July 13 the state of New York that Tory prisoners in the gird of New York should be removed. This committee was appointed expressly with reference to tories, or "disaffected persons." It was now sitting at New York, although the convention was at White Plains.—*Writings of Geo. Washington* (Ford ed.), IV: 245-46; see also p. 274.

"The New York committee of safety resolves that "the members of the several Committees of Safety in this city ought not to be called out on any military duty which the common Militia of this City and County are subject to." The captains of the fire companies are to fill the vacancies of firemen who "are entered in the Continental service, or have removed out of town; and that they pay strict attention to the state of the Engine and publick buildings."—*Am. Arch.,* I: 599.

In his journal, run this day, Solomon Nash refers to being "Employ'd at the Labetary."—*Journ. of Solomon Nash,* ed. by Bushnell (N. Y., 1861), 24. On May 13 he had mentioned "piling up Shot to the Labetary."—Ibid., 14. Again, on Sept. 19, he said: "Being not well Left the Laboratory and Joined our Company."—Ibid., 34. See also his entry of Dec. 4.—Ibid., 42. This place, hitherto unnoticed by historians, is re-introduced to the diary of Jabez Fitch (see O 28) as being near the liberty-pole.

"This day A Flag of truce was sent to N. York containing an act of oblivion—but was not received because it was address'd to George Washington Esq & Ca & Ca & to that only knew Genl Washington—a Copy of the same was sent to Amboy & Received for the Congress."—Robertson's *Jour. (M.S.)* See also Kemble's *Jour.,* II.

Referring to the same event, Washington's aide, Col. Webb, records in his journal: "A Flag of Truce from the fleet appeared, on which Colo Reed and myself, went down to meet it, about half way between Governors and Staten Islands. Lieutenant Brown, of the Eagle, offered a Letter from Lord Howe, directed George Washington, Esq', which no act of its direction, we refused to receive, and Parted with the usual Compliments."—Webb's *Correspondence,* I: 155; *Wm. Smith's Diary (M.S.)* V, under date of July 27.

The newspaper account of this important transaction is as follows:  "... in the Afternoon of the 14th a Barge from the Fleet, appeared in the Bay with a White Flag, which was met by the General's Barge with several Gentlemen of the Army on board. The Flag was sent by Lord Howe, with a Letter to his Excellency General Washington. But as the Letter was improperly directed it was not received though much solicited by the Officer, who, we hear, said it contained nothing of a hostile Nature,—that Lord Howe came over possessed of unlimited Power, and was much concerned he had not arrived a few Days sooner, which would have effected the reconciliation &c &c."—*N. Y. Merc.,* July 22, 1776. See July 16 and 17.

Lord Howe and Gen. Howe issue from Staten Island, a declaration reciting that they have been appointed "his Majesty's Commissioner and Commissioners, for granting his free and general Pardons to all those, who, in the Tumult and Disorder of the Times, may have deviated from their just Allegiance, and who are willing, by a speedy Return to their Duty, to reap the Benefits of the Royal Favor;" that "due Consideration shall be had to the meritorious Services of all Persons, who shall aid and assist in restoring the public Tranquility; and that "Pardons shall be granted, dutiful Representations received, and every suitable Encouragement given, for promoting such Measures as shall be conducive to the Establishement of Law and Good Order in the United States.*—*N. Y. Merc.,* July 22, 1776. Another declaration was issued on Sept. 19 (p. 2).

"A Flag of Truce came from N. York the Contents Unknown—but I believe they will hear of no Accommodation."—Robertson's *Jour. (M.S.)*

Kemble says: "A Flag of Truce this day from the Rebels; one from Essex with Letters from Lord and General Howe, but refused the superscription, not being so honorable as they thought it ought to be. The Guard Sloop lying in the harbour, a fine Vessel, mounting fourteen Carriage Guns. The Rebels have this day brought two Guns, six pounders, and fixed them in the bank directly opposite Braggayle Agnew's Quarters on Staten Island. ..."—*Kemble's Jour.,* VIII.

The Declaration of Independence is published in Gaine's *New York Gazette; and the Weekly Mercury,* of this date.

A second flag of truce comes from the British fleet and is met "as before" (see July 14), but when a letter is offered, it is rejected "for the same Reason as the Former."—*N. Y. Merc.,* July 22, 1776.

The following extract from the minutes of the committee of safety, addressed "To the Inhabitants of the City and Colony of New-York," is published: "Whereas the Convention of the State of New-York did, on the 9th instant, unanimously resolve, that a Declaration of the Independence of the United States of America of the State of New-York, with orders that it should be by them published with all convenient speed in their several districts," it is therefore resolved and ordered "That at twelve o'clock, on Thursday, at the City-Hall, in this city, the aforesaid Declaration be published; when and where it is hoped every true friend to the rights and liberties of the country will not fail to attend."—*Am. Arch.,* I: 374.

Garret Abel, a member of the provincial congress, writes from White Plains to his wife: "I shall try next week to get permission to come and see you, as the consideration of forming a new government is postponed to the first of next month on account of the multiplicity of other necessary business which has come before the house since they have been here. We have only five New York members here at present, which is the exact number required to represent the city and county in Congress."—*Whitemore, The Abel and Allied Families,* 16.

Congress resolves: "That General Washington, in refusing to receive a letter said to be sent from Lord Howe, addressed to George Washington, Esquire [see July 14], acted with a dignity becoming his station, and therefore this Congress do highly approve the same, and do direct that no letter or message, be received from the enemy, by the Commander in Chief, or other the Commanders of the American army, but such as shall be directed to them in the characters they respectively sustain."—*N. Y. Merc.,* July 29, 1776.

Sixteen or seventeen ships, part of the British fleet at Staten Island, "got under way and stood through the Narrows." Their destination was unknown to the patriots at New York.—*Penn. Jour.,* July 24, 1776.

The "Declaration of Independence of the United States of America" is published at the Court-House [the city hall on Wall St.] where a Number of People, true Friends to the Rights and Liberties of this Country, attended, and signified their approbation to it by loud Acclamations. After which the Coat of Arms of his Majesty George III. was tore to Pieces and burnt in the Presence of the Spectators."—*N. Y. Merc.,* July 22, 1776. The American flag was hoisted immediately, and "it was proposed that the Bodies of Church spires, have the Honour of taking down their coat of Arms in their Respective Churches themselves, and if not the People are about to proceed in the like manner as this day herd."—From "The Diary of Ensign Caleb Clap," in *Hist. Mag.,* 3 ser., III: 248.

Rev. Charles Inglis, in his account of the "State of the Anglo-American Church," written on Oct. 31, 1776, states that, not only was the equestrian statue of the king pulled down, but that all the king's arms, even those on the signs of taverns, were destroyed. The committee of safety sent Inglis a message "to have the king's arms taken down in the church (Trinity), or else the mob would do it, and might deface and injure the churches." He compiled. He said, further, that he found his vestry "unanimous for shutting up the Churches," choosing rather to "submit to that temporary inconvenience, than, by omitting the prayers for the king, give that mark of disaffection to their sovereign. To have prayed for him had been rather the last degree—the inevitable consequence had been a demolition of the churches, and the destruction of all who frequented them. The whole rebel force was collected here, and the violent partizans from all parts of the continent. ... Things being thus situated, I shut up the churches. Even this was attended with great hazard; for it was declaring, in the strongest manner, our disaffection of independence and that under the name of Washington and his army."—*Doc. Hist. N. Y.* (4to ed.), III: 642.

"Two guns fired from Cobble Hill on Long Island are to be a signal that the Enemy have landed on that Island."—*Glover Correspond. (M.S.)*, 161.

A Flag of Truce sent this Evening to New York, but nothing material passed worth relating."—*Kemble's Jour.* A news report states it "brought only an open Letter directed to Miss Margaret Moncrieff" (see Sept. 14).—*N. Y. Merc.,* July 22, 1776.

Another account relates that another flag of truce (see July 16) appeared, andCols. Webb and Reed again went down the bay to
1776

July

Camp to General Howe met—us—said, as there appeared an

insumountable obstacle between the two Generals, by way of Cor-

responding, General Howe desired his Adjutant General might be

admitted to an Interview with his Excellency General Washington

—On which Col* Reed, in the name of General Washington, con-

sented; and pledged his honor for his being safely returned.—The Aid
de Camp said the Adj* Gen'l would meet us tomorrow forenoon

(p.v.)—Corresp. and Jour. of S. B. Webb, I: 156.

Washington takes up his headquarters in the Kennedy house, No. 1 Broadway, "Kemble's Jour.," &c.

Washington's aide, Col. Webb, records in his journal: "At 12 o'clock we met the Flagg, took Lieut Col* Paterson, of— regi-

ment into our Barge and escorted him safely to Town to Col* Knox's Quarters; where his Excellency General Washington attended

with his Suit and Life Guards, Received and had an Interview

of about an hour with him. We then escorted him back in

safety to his own Barge—In going & coming, we pass'd in front

of the Grand Battery—but did not mind it—Shall probably

Chatty all the way."—Corresp. and Jour. of S. B. Webb, I: 156.

The newspaper report states: "Saturday Forenoon our People
discovered a fourth Flag of Truce, whereupon the Mechanics
Barge was sent to meet it, and conducted the Officer (said to be
Adjutant General of the Forces under the Command of Lord Howe) to the Dwelling of Colonel Knox, in this City, where his
Excellency General Washington, attended by his Body Guards, waited his Arrival, which was a little past one o'clock: The Inter-

view was short, and the Particulars of it, are as well known:...at parting much Courtesy was seen to pass between

the Gentlemen who bore the Flag, and those of the Continental Forces who had the Honor to be present."—N. Y. Merc., Jl 22,

1776; Penn. Extr. Pott, Jl 25, 1776. See also Kemble's Jour., &c.

which it is stated that Col. Patterson was "received with great

Pomp by a Guard, Conducted to Capt. Kennedy's House, where he

saw a great Court, Gentlemen well dressed, &c."

What transpired in the interview was made public by order of the

Generals. The official report states: "After usual compliments, in

which, as well as through the whole conversation,

Col. Patterson addressed General Washington by the title of

Excellency, Col. Patterson entered upon the business by saying, that

Gen. Howe had much regretted the difficulties which had arisen respecting

the address of the letters to General Washington [see Jl 14, and

16]:...that Lord Howe and Gen. Howe did not mean to
derogate from the respect or rank of General Washington; that they
held his person and character in the highest esteem; that the direc-
tion of Gen. &c. &c. may be inferred from the following.

The declaration of Gen. &c. &c. The General declined the letter, and

said, that a letter directed to a person in a public character,

should have some description or indication of it, otherwise it would
appear a mere private letter; that it was true the &c. &c. &c.

implied every thing, and they also implied any thing:... that he

should absolutely decline any letter directed to him as a private

person, when it related to his public station. Col. Patterson then

said...that he would endeavour as well as he could, to recol-

collect General Howe's sentiments on the letter and resolve of

Congress, sent him a few days before, respecting the treatment

of our prisoners in Canada. 'That the affairs of Canada were in an

other department, not subject to the control of General Howe,

but that he and Lord Howe utterly disapproved of every infringe-

ment on the rights of humanity'... and that he (Gen. Wash-

ington) was sensible that cruelty was not the characteristic of the

British nation... Gen. Washington then mentioned the case of

Col. Allen, and the officers who had been confined in Boston gaol.

As to the first, Col. Patterson answered that Gen. Howe had no
knowledge of it but by information from Gen. Washington, that

to the other prisoners at Boston, when over the state of the

army at Boston admitted it, they were treated with humanity and

even indulgence. Col Patterson then proceeded to say, that the

goodness and benevolence of the King had led him to appoint

Lord Howe and Gen. Howe his Commissioners to accom-

modate this unhappy dispute, that they had great powers, and

would derive the greatest pleasure from effecting an accommoda-

tion and that (Col. Patterson) wished to have this visit consider-

ered as making the first advances to this desirable object. Gen.

July

Washington replied, that he was not vested with any powers on this

subject, by those from whom he derived his authority and power.

But from what had appeared or transpired on this head, Lord Howe,

and Gen. Howe were only to grant pardons; that those who had

committed no fault wanted no pardon, that we were only defending

what we deemed our indisputable right. Col. Patterson said that

would open a very wide field for argument. He then expressed his

apprehension that an adherence to forms was likely to obstruct

business of the greatest importance."

"Col. Patterson behaved with the greatest attention and polite-

ness during the whole business, expressing strong acknowledgements

that the usual ceremony of blinding his eyes had been dispensed with.

..."—N. Y. Packet, Ag 1, 1776. See also Jones, Hist. of N. Y.

60-62. In his Campaign of 1776, etc., 96-99, Johnston supplies the

supposed words of the several interviews.

"Upwards of 6000 troops have arrived here from Boston, Con-
necticut etc and more are daily expected. We have now in & near

this city a body of 50,000 effective men."—Cost. Gaz., Jl 31

1776.

Solomon Nash records in his journal: "a vast maney men upon

fatigue makin Brastwurks round the park."—Jour. of Solomon Nash

(ed. by Bushnell), 25.

The provincial convention being "informed that provisions are

very scarce and dear in the City of New-York," but that they

nevertheless, if they have been shipped for exportation, and fallen into

the hands of the enemy, it is resolved "That no provisions whatever

shall be laden for exportation on board of any ship or vessel at the

port of New-York, or from any other part of this State, unless for

the use of the crew of such ship or vessel, or for the necessary sup-

ply of any of the United States of America, until further order; and

that the city and county of New-York shall be first applied to for

their permission to export any provisions for the purposes afores-

aid." For any breach of this regulation, "the vessel and cargo shall

be liable to be seized in the waters of this State; and the persons guilty of

infringing it, shall be held up as enemies to the United States of

The following extracts from Washington's financial accounts from

April 25 to July 23, 1776, show something of his exerions for the

safety of New York during this period. They were published in the

N. Y. Com. Adv., Ap 5, 1868, having been copied by Dr. Samuel

Mitchill from Washington's original vouchers, then kept in the

office of the register of the treasury:

"April 25. To the expenses of myself and party reconnoitering the

several landing places etc. on Staten Island $16 20"" od

"June 26. To expenses in reconnoitering the channel and landings on both sides the North

river, as high as Tarrytown to fix the defences thereof 10 18 0"

"To a reconnoitre of the East river and along the Sound as far as Mamaroneck 16 9 4"

"July 15. To my own and party's expenses, laying out Fort Lee on the Jersey side of the

North river. 8 15 0"

"July 23. To the expense of reconnoitering the country as far as Perth Amboy 19 10 0"

Wm. Smith writes in his diary: "My Expectations of some con-

ciliatory Messages from Lord Howe[en] now vanish on a Sight of his

Letter to the Governors dated at Sea 20 June informing that he and

his Brother the General are the Commissioners [see Mr. 11] with

Power to grant Pardons on Submission—The Congress publish it to

frustrate the Hopes of those who expected favorable Terms.

"The Inactivity of the Troops at Staten Island may be perhaps

owing to their Hopes that this Letter may create a Rising. He will

certainly be deceived.

"It is misterious to find L* Geo: Germaine's Information of 25

Dec' that the Com* to treat with the Colonies was then sealed

is not true—Perhaps it was impressed on the News of our Irruption

into Canada and the taking of St John's & the non arrival of Com*-

from America before the 4th May when Lord Howe left England.

—Wm. Smith's Diary (MS.), V.

On this day "A regiment of militia, under the command of Col.

996

THE ICONOGRAPHY OF MANHATTAN ISLAND
1776 Holman, arrived from Massachusetts.—Memoirs of Maj.-Gen. Heath (1798), 50.

29 "Col. Sargent's regiment of Continental troops arrived at Horn's Hook, from Boston, and Col. Hutchinson's from the Same place. Several British ships joined and joined the fleet."—Memoirs of Maj.-Gen. Heath (1798), 51. Col. Webb records that these British arrivals numbered "about twenty large ships," and that these with the others which have come in for several days past, have troops on Board and are supposed to be part of Lord Howe's fleet, with the Foreigners."—S. B. Webb's Corresp. and Jour., I: 175. The British did not actually arrive until Aug. 11 (q. v.). The British officer, Capt. Robertson, records that "The Fleet seen yesterday came up the Narrows about 2 OClock, they are the L. Horse from Halifa's & two Transports of Foreigners."—Robertson's Jour. (MS).

Wm. Davidson notifies the public that he has "opened the noted Wind-Mill, near the one Mile Stone in the Bowery-Lane, and will give constant attendance; and will grind Wheat, Corn, Oats, Ginger, & at the lowest Prices."—N. Y. Merc., JI 29, 1776. This was the Bayard windmill which had been erected prior to 1775—L. M. R. K., III: 961. On July 23, 1781 (q. v.), it was offered for sale.

7 Wanted immediately in the General Hospital, a number of women, who can be recommended for their honesty, to act in the capacity of nurses; and a number of faithful men for the same purpose: Any who incline entering the service in this way will meet with good encouragement by making application to the quarter master of the hospital at King's College, New-York.—N. Y. Merc., JI 29, 1776.

05 "An order Blirling, writing from New York to Capt. Richard Varick, says: 'You would be surprised to see what Number of Empty houses [there are in this place, Perry few of the inhabitants Remain in town that are not ingaged in the Service. . . .

'Great preparations are making here With Shiver de freeses and Vessels to stop up the Channel [see JI 25], & sundry fire ships preparing. two Brigs are Readys, something great will Be attempted soon, five or seven Roguilies [raw galleys—see Ag. 7] are already come down from the Eastward two are built here that will carry one 32 Pounder Each, One of them quite and the other Nearly finished, the fleet Remains Verry Quiet, But the men of the two menwar up the River have a small brush Once in a While with our Guards long the River."—N. Y. City during the Am. Rev., 123-4.

Summer This summer, the mansion of James de Lancey, in the Bowery Division of the Out Ward (see L. M. R. K., III: 949), is said to have been occupied as a hospital for the American troops. Subse- quently, during the war, the British troops occupied it for the same purpose.—Jones, Hist. of N. Y. City during the Rev. War, II: 544. No corroborative of this statement has been found.

Aug. While the English fleet lay above the Narrows, north of Staten Island, Captain Blunt sent a letter to the Admiral, attempting to destroy the ships of war by attacking them with a submarine machine, which had been invented and constructed by David Bushnell, a native of Saybrook. Bushnell's device was the first of its kind. The attempts to operate it against hostile ships failed, however, both at that point and later off Bloomingdale in the North River.

Charles Griswold obtained from Lee, some years later, when the latter was a resident of Lyme, Conn., a description of the submarine torpedo and of the attack, and sent it to Prof. Benjamin Silliman, of Yale College, Feb. 21, 1820, under the title "Submarine Navigation." This was published by Silliman in a magazine which he conducted, The Am. Jour. of Science, and Arts (Nov., 1820), II: 94. In view of the interesting nature of the facts on American mechanical ingenuity at this early date, it appears fitting to reprint in full from this source Griswold's detailed description of the Bushnell machine, which was the unsuccessful pioneer in this mode of warfare. The account is as follows:

If the idea of submarine warfare had ever occurred to any one, before the epoch of Bushnell's invention, yet it may be safely stated, that no idea but his own ever came to any practical results. To him, I believe, the whole merit of this invention is unanimously ascribed to belong.

... all the information contained in the following pages, has been received from the only person in existence possessed of that information, and who was the very same that first embarked in this novel and perilous navigation.

"Mr. Ezra Lee, first a sergeant and afterwards an ensign in the revolutionary army, a respectable, worthy, and elderly citizen of this town, is the person to whom I have alluded; to him was commis- sioned the first essay for destroying a hostile ship by submarine explosion, and upon his statements an implicit reliance may be placed.

"Considering Bushnell's machine as the first of its kind, I think it will be pronounced to be remarkably complete throughout in its construction, and that such an invention furnishes evidence of those resources and creative powers which must rank him as a mechanical genius of the first order.

"Bushnell's machine was composed of several pieces of large oak timber, scooped out and fitted together, and its shape my in- former compares to that of a round clam. It was bound around thoroughly with iron bands, the seams were corked, and the whole was smeared with tar, so as to prevent the possibility of the admis- sion of water to the inside.

"It was of a capacity to contain one engineer, who might stand or sit, and enjoy sufficient elbow room for its proper management.

"The top or head was made of a metallic composition, exactly suited to the body, so as to be water-tight; this opened upon hinges, and formed the entrance to the machine. Six small pieces of thick glass were inserted in this head, for the admission of light in a clear day and clear sea-water, says my informer, he could see to read at the depth of three fathoms. To keep it upright and prop- erly balanced, seven hundred pounds of lead were fastened to the bottom, two hundred pounds of which were so contrived as to be discharged at any moment, to increase the buoyancy of the machine.

"But to enable the navigator when under water, to rise or sink at pleasure, there were two forcing pumps, by which water could be pressed out at the bottom; and also a spring, by applying the foot to which, a passage was formed for the admission of water. If the pumps should get deranged, then resort was had to letting off the lead ballast from the bottom.

"The navigator steered by a rudder, the tiller of which passed through the back of the machine at a water joint, and in one side was fixed a small pocket compass, with two pieces of shining wood, (sometimes called foxtire,) crossed upon its north point, and a single piece upon the last point. In the night, when so light entered through the head, this compass thus lighted, was all that served to guide the helmsman in his course.

"The ingenious inventor also provided a method for determining the depth of water at which the machine might at any time be. This was achieved by means of a glass tube, twelve inches in length, and about four in diameter, which was also attached to the side of the machine: this tube enclosed a piece of cork, that rose with the descent of the machine, and fell with its ascent, and one inch rise of the cork denoted a depth of about one fathom. The principle upon which such a result was produced, and also the mechanical con- trivance of this tube, entirely escaped the observation of Mr. Lee, amidst the hurry and constant anxiety attendant upon such perilous navigation.

"But not the least ingenious part of this curious machine, was that by which the horizontal motion was communicated to it. This object was effected by means of two ears or paddles, formed pre- cisely like the arms of a wind-mill, which revolved perpendicularly upon an axletree that projected in front; this axletree passed into the machine at a water joint, and was furnished with a crank, by which it was turned: the navigator being seated inside, with one hand laboured at the crank, and with the other steered with the tiller.

"The effect of paddles so constructed, and turned in the manner stated, by propelling or rather drawing a body after them under water, would readily occur to any one without explanation.

"These paddles were but twelve inches long, and about four wide. Two smaller paddles of the same description, also projected near the head, provided with a crank inside, by which the ascent of the machine could be assisted.

"By vigorous turning of the crank, says my informer, the ma- chine could be propelled at the rate of about three miles an hour in still water. When beyond the reach of danger, or observation of an enemy, the machine was suffered to float with its head just rising from the water's surface, and while in this situation, air was constantly admitted through three small orifices in the head, which were closed when a descent was commenced.

"The efficient part of this machine of devastation, its magazine,
remains to be spoken of. This was separate and distinct from the machine. It was shaped like an egg, and like the machine itself, was composed of solid pieces of oak scooped out, and in the same manner fitted together, and secured by iron bands, &c. One hundred and thirty pounds of powder, a clock and a pin lock, provided with a good flint that would not miss fire, were the apparatus which it enclosed. This machine was attached to the back of the machine, a little above the rudder, by means of a screw, one end of which passed quite into the magazine, and there operated as a stop to the movements of the clock, whilst its other end entered the machine. This screw could be withdrawn from the magazine, by which the latter was immediately detached, and the clock commenced going. The clock was set for running twenty or thirty minutes, at the end of which time, the lock struck, and fired the powder, and in the mean time the adventurer effected his escape.

"But the most difficult point of all to be gained, was to fasten this magazine to the bottom of the ship. Here a difficulty arose, which, and which alone, will appear in the ensuing narrative, defeat the successful operations of this warlike apparatus.

"Mr. Bushnell's contrivance was this—A very sharp iron screw was made to pass out from the top of the machine, communicating inside by a water joint; it was provided with a crank at its lower end, by which the engineer was to force it into the ship's bottom: this screw was next to be disengaged from the machine, and left adhering to the ship's bottom. A line leading from the screw to the magazine, kept the latter in its destined position for blowing up the vessel."

Mr. Griswold then describes "the first attempt that was made to destroy a ship of war, all the facts of which," he repeats, he "received from the bold adventurer himself."

"It was in the month of August, 1776, when Admiral Howe lay with a formidable British fleet in New-York bay, a little above the Narrows, and a numerous British force upon Staten Island, commanded by General Howe, threatened annihilation to the troops under Washington, that Mr. Bushnell requested General Parsons of the American army, to furnish him with two or three men to learn the navigation of his new machine, with a view of destroying some of the enemy's shipping."

"Gen. Parsons immediately sent for Lee, then a sergeant and two others, who had offered their services to go on board of a fire ship; and on Bushnell's request being made known to them, they enlisted themselves under him for this novel piece of service. The party went up into Long Island Sound with the machine, and made various experiments with it in the different harbors along shore, and after having become pretty thoroughly acquainted with the mode of working it, they returned there to the Sound. But on the arrival of the British fleet, after their absence, the enemy had got possession of Long-Island and Governor's-Island. They therefore had the machine conveyed by land across from New-Rochelle to the Hudson river, and afterwards arrived with it at New-York."

"The British fleet now lay to the north of Staten-Island with a large number of war-ships, and transports, and were the objects against which this new mode of warfare was destined to act; the first serene night was fixed upon for the execution of this perilous enterprise, and sergeant Lee was to be the engineer. After the lapse of a few days, a favorable night arrived, and at 11 o'clock, a party embarked in two or three whale boats, with Bushnell's machine in tow. They rowed down as near the fleet as they dared, when sergeant Lee entered the machine, was cast off, and the boats returned."

"Lee now found the ebb tide rather too strong, and before he was aware, had drifted him down past the men of war; he however immediately got the machine about, and by hard labour at the crank for the space of five glasses by the ship's belts, or two and a half hours, he arrived under the stern of one of the ships at about slack water. Day was now dawning, and by the light of the moon he could see the people on board, and heard their conversation. This was the moment for divine: he accordingly closed up head, in water, and descended under the ship's bottom."

"He now applied the screw, and did all in his power to make it enter, but owing probably in part to the ship's copper, and the want of an adequate pressure, to enable the screw to get a hold upon the bottom, his attempts all failed; at each essay the machine rebounded from the ship, not having sufficient force to resist the impulse thus given to it. [Footnote: It yet remains a problem (1820), whether the difficulty here spoken of will ever be fully obliterated. Mr. Fulton's torpedoes were never fairly brought to the test of experiment, though he and his friends entertained perfect confidence that they would not be found defective in any of their operations.]

"He next paddled along to a different part of her bottom, but in this manoeuvre he made a deviation, and instantly arose to the water's surface on the east side of the ship, exposed to the increasing light of the morning, and in imminent hazard of being discovered. He immediately made another descent, with a view of making one more trial, but the fast approach of day, which would expose him to the enemy's boats, and render his escape difficult, if not impossible, deterred him; and he concluded that the best generalship would be to commence an immediate retreat."

"He now had before him a distance of more than four miles to traverse, but the tide was favourable. At Governor's-Island great danger awaited him, for his compass having got out of order, he was under the necessity of looking out from the top of the machine very frequently to ascertain his course, and at best made a very irregular zigzag track."

"The soldiers at Governor's-Island espied the machine, and curiosity drew several hundreds upon the parapet to watch its motions. At last a party came down to the beach, shoved off a barge, and rowed towards it. At that moment sergeant Lee thought he saw his certain destruction, and as a last act of defence, let go the magazine, expecting that they would seize that likewise, and thus all would be blown to atoms together."

"Providence however otherwise directed it: the enemy, after approaching within fifty or sixty yards of the machine, and seeing the magazine detached, began to suspect a yankee trick, took alarm and returned to the island."

"Approaching the city, he soon made a signal, the boats came to him and brought him safe and sound to the shore. The magazine in the mean time had drifted past Governor's-Island into the East river, where it exploded with tremendous violence, throwing large columns of water and pieces of wood that composed it high into the air. Gen. Putnam, with many other officers, stood on the shore spectators of this explosion."

"In a few days the American army evacuated New-York, and the machine was taken up the North river. Another attempt was afterwards made by Lee upon the frigate that lay opposite to New-York; Lee, residing at New-York, was at that time serving in the army. It was the first time, as far as can be ascertained, that this instrument of destruction was used against a British ship, and the explosion at New-York was the first made by the Americans on a British vessel."

"This terminated his experiments. — Am. Jour. of Science, and Arts, conducted by Benjamin Silliman, New Haven, Nov., 1820, II: 94-100."

See also the account of Bushnell's torpedo and the attempt against the "Eagle," given by James Thacher, M.D., under date of Oct., 1776, in A Military Jour. during the Am. Rev. War (1853), 75-76, 146-50. Thacher also describes later attempts with this invention against British shipping off New London; also the use of logs charged with powder, set adrift in the Delaware River in Dec. 1777, above the British shipping anchored there. The latter incident was the famous "Battle of the Kegs."

For a brief reference to Bushnell's career, and observations made concerning the "torpedo" by Henry L. Abbot (in charge of the Engineer School of Application at Willet's Point, L. I., in 1883), and by Lieut. F. M. Barber, see Mag. Am. Hist. (1852), VIII: 764-65. Lieut. Barber's comment was that Bushnell's "submarine torpedo" was "the most perfect thing of its kind that has ever been constructed, either before or since the time of Bushnell." See, further, S. 5.
CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

Account of the present oppressed and bleeding State of our Country,"—N. Y. Jour., Aug. 1, 1776.

The building of Fort Washington is commenced, having been ordered by a council of officers at the earnest solicitation of General Putnam. It was a five-sided earthwork, without casemates or bomb-proofs.—Mag. Am. Hist., XII: 103. Lossing states that Washington assisted in the original survey of it on June 7, 1776.—Pictorial Field Book of the Rev., II: 500. After its capture by the British its name was changed to Fort Knoxhäuser, which it retained during the remainder of the war.—See Pl. 46, Vol. I.

Solomon Drowne, M.D., of the general hospital, states, in a letter from New York, that his pay has been increased, in consequence of a petition to congress, to one dollar per day. "The Pay you'd be no Inducement to stay a moment in this shocking Place, at the Expense of Health. The Air of the whole City seems infected. In almost every street there is a horrid smell."—N. Y. City during the Am. Rev., 104-5.

"A very large boat was carried from Town to be sunk in the North River, the passage of which the Rebels are endeavouring to stop in such a manner as to oblige our Ships to come nearer their Batteries in their Course up. All accounts concur in saying that these Subs are very Sidable in the Town of New York. Late Accounts say there are 3,000 Men on Long Island Heights."—Kemble's Jour., 83.

The First division of Hessian Troops under Genl de Heister arrived at Sandy hook, and landed the 16th on Staten Island.—From "Journal of the Operations of the American Army under General Sir William Howe" (transcript in L. & C., from original in British Museum). See also Kemble's Jour., 82, July 1776. The first division, as the date of the landing of the first division at Staten Island. As explained by Lowell (Edw. J.), this first division, about 8,000 strong, was under command of Lieut. Gen. Philip von Heister. After the arrival of the Hessians, the army collected at this rendezvous, under Gen. Sir William Howe, numbered between 25,000 and 30,000 soldiers, supported by the fleet under Vice Admiral Lord农作物—William Howe, Sir William's brother.—The Hessians (1884), 58.

Lieut. Hinrichs, in a letter of Sept. 18, describes his arrival from Halifax, probably with a later division, thus: "On the 12th of August, we entered the harbor of New York, or Sandy Hook, and cast anchor off Hendrick's Point. All that could be seen in the harbor was a fleet of 40 sail, and also a number of boats which patrolled the enemy's coasts, both to guard against our being fired on and to intercept deserters. Just imagine to yourself one of the finest of harbors, in which 1000 ships can ride, and also fancy the actual number of vessels all crowded with human beings, and surrounded at the same time with a vigilant enemy! Think also of our enjoying the finest of weather; and all of these troops, bound for the mission on which they do not obtain it, he is requested to "cause the said telescope to be taken out of the City Hall" in the presence of himself and some others of the committee, and to deliver it.—Jour. Provint. Cong., I: 559.

There is stolen "out of Christ Church, (occupied by the German Lutheran congregation in this city,) a red silk damask fringed hanging for the pulpit and communion table," etc. A reward for the discovery of the thief, and recovery of the articles, is offered by the vestry of the church or by David Grim, at the sign of the Unicorn, the upper end of William Street.—N. Y. Merc., Aug. 15, 1776.

The provincial convention directs that a letter be sent to John Berrian, chairman of the committee of safety, requesting that he call upon Pres. Moore of "the College of New-York" (King's College), or some governor of the college as may have the care of its telescope, and request its delivery to "his Excellency General Washington," and that, if the college does not obtain it, he is requested to "cause the said telescope to be taken out of the City Hall" in the presence of himself and some others of the committee, and to deliver it.—Jour. Provint. Cong., I: 559.

To Berrian: "Be this known to all, that the Wisconsin Academical Institution has sent us a copy of the "Mathematical and Physical" Journal, and that we are now in possession of all the most recent publications in the field. We are now in possession of all the most recent publications in the field. We are now in possession of all the most recent publications in the field.

The provincial convention directs that a letter be sent to John Berrian, chairman of the committee of safety, requesting that he call upon Pres. Moore of "the College of New-York" (King's College), or some governor of the college as may have the care of its telescope, and request its delivery to "his Excellency General Washington," and that, if the college does not obtain it, he is requested to "cause the said telescope to be taken out of the City Hall" in the presence of himself and some others of the committee, and to deliver it.—Jour. Provint. Cong., I: 559.

A paragraph in a letter of this date from the convention to Washington, drafted by John R. Livingston, states that the telescope would be sent to Washington on a suggestion that it "could be of use in discovering the arrangements and operations of the enemy," and with the "hope that it may in some measure contribute to the furthering your designs."—Ibid., 557-58. The college building having been occupied by the American troops for a hospital, the books, apparatus, etc., had been deposited in the city hall.—See Ap. 4, 6, Jc 4, 1776.

Comfort Sands publishes a notice that he is appointed by the convention, and the books and buildings (occupied by Mr. Sanderson) are "General Auditor of all accounts against the State," and requests that such demands be sent to Gerard Bancroft, "at the House of the Widow M'Gown's in Harlem."—N. Y. Merc., Aug. 12, 1776.

This is the second Thursday in August, which was appointed, by the "Rev. Synod of New-York and Philadelphia, at their Meeting in May last," for a "Day of Humiliation, Fasting and Prayer, to Almighty God, by all the Congregations under their Care, on
176

"General Howe writes that Congress has declared the independence of the united Colonies. It is known also that Congress has formally declared war on Great Britain; and that this declaration is stated in twenty three articles in which the reasons are deduced which have determined them to adopt this course. But the Government has not thought it necessary to take notice of it, and indeed I do not see that this uprising [revue de bouclier] causes any sensation here [London]."—Doniol, Participation de la France à l'Establissement des Etats-Unis d'Amerique, I: 591.

A London news item reads: "The People of New York, we are told, have in vain endeavoured to lay a Chain across the River, to prevent Vessels coming up to that City; for the Tide runs so strong there, that no Buoy could float the Weight of Iron which a proper Chain would require; they have therefore laid aside that Design, and have planted Batteries at the Entrance of both the Rivers to answer that Purpose."—St. James's Chron., Aug. 10-11, 1776.

Tryon, still on the "Dutchess of Gordon," off Staten Island, writes to Lord Germain: "The confederate Colonies have declared themselves independent States: Enclosed is a printed copy of their Declaration of Independence, which was published through the streets of New York the middle of last month, where the King's Statue has been demolished, as well as the King's Arms in the City Hall; the established churches shut up, every Vestige of Royalty, as far as has been in the power of the Rethels, done away. The persons of the Mayors of the Cities of York and Albany, Judges, Counsellors, Magistrates and principal gentlemen of the Country that are not in rebellion seized and secured, and even down to the meanest planters persecuted and tyrannized over.

"The whole armament destined for this part of America, except the division of the Hessians, hitherto assembled here, I expect, by the courage and strength of this noble Army, tyranny will be crushed and legal government restored."—N. T. Col. Doc., VIII: 683-84.

Kemble records: "Lord Dunmore arrived. Lord William Campbell also arrived about the same time, or the day or two before."—Kemble's Jour., 84.

16

From Edward Waring from London to the count of Vergennes (translated): "I have the honor to send you, My Lord, the translation of the act of the 4th of July by which the Colonies declared themselves independent under the title of the United States of America. Others will appreciate more than I the value of the motives upon which this declaration is based. This is the fact in which I think we will take more interest. It is between two armies and in sight of a formidable fleet that the Colonies unanimously declare war on Great Britain; for this act may be called a declaration of war... If the resistance of the Americans is successful, this ever memorable period will reduce England to the point of no longer being a subject of disquietude for France, whose importance on the continent of Europe should be augmented in proportion to the weakening of the English. I hope, Lord Germain, that without being subject to the Spanish ambassador in speaking of the act of independence of the American States, that now the other powers could make treaties of commerce and alliance with them, but that he was constantly waiting for the news that they had changed their tone. Meanwhile, it seems to me it would be well for him to take a different tone himself, for if we should put into effect this innocent jest, England, I think, would not find it a laughing matter."—Doniol, Participation de la France à l'Establissement des Etats-Unis d'Amerique, I: 585-86.

On this day two fire-ships, "commanded by Capt. Fosdyke and Thomas, (Gentlemens Volunteers of Rank in the Army of the United States) proceeded up the North-River with Intent to give a suitable Warning to those piratical Gentry that have infested it since the 12th of July last [p. 83]. The night was dark and favourable to the Design, and the Enemy did not perceive our Vessels till they were near aboard of them.—Capt. Fosdyke grappled the Phoenix, but the Fire not communicating so soon as was expected, she disentangled herself in about 20 Minutes, after sustaining considerable Damage in her Rigging.—Capt. Thomas fell on board one of the Tenders, which was soon consumed; and we are truly sorry to inform your Lordship of the Straitened Condition the Insolent Enterprise struck so great a panic upon the Enemy, that they thought it prudent to quit their Station; and Yesterday, taking Advantage of a fresh Wind at S. E. attended with considerable Rain, they run the Gauntlet, through a great Number of well directed Shot from our Batteries in and near this City, which undoubtedly must have damaged them much. Our Gallies played Aug. 16, smartly, and followed the Ships a considerable Distance into the Bay. The Enemy's Fire seemed to be mostly directed upon the City, as the Tops of the Houses were crowded with Spectators, but very little Damage was done to the Buildings, nor any Lives lost upon the Occasion."—N. T. Merc., Aug 19, 1776. Cf. Wm. Smith's Diary (MS.), V. See also descrip. of Pl. 45-49: I. 352-353 and Ag 3.

Lord Drummond writes to Gen. Washington as follows: 1776.

"Sir,

Being deeply interested in the welfare of America, I think it my duty to communicate a matter of intelligence, which I flatter myself may be rendered conducive to the restoration of a desirable peace. And in this view I request your Excellency's permission to land at New-York, to go directly to Philadelphia, in order to lay the same before the General Congress.

"In the course of a conversation I have had with Lord Howe, I perceive that the powers he is vested with, as well as his disposition for establishing an equitable and permanent peace, are altogether misunderstood by the Colonies.

"For in consequence of a sketch of some propositions being offered for his consideration, he very frankly assured me, he was willing to confer upon these grounds with any gentlemen of the greatest influence in the United States: as the Dutchess of Gordon, off Staten Island, writes to Lord Germain: "The confederate Colonies have declared themselves independent States: Enclosed is a printed copy of their Declaration of Independence, which was published through the streets of New York the middle of last month, where the King's Statue has been demolished, as well as the King's Arms in the City Hall; the established churches shut up, every Vestige of Royalty, as far as has been in the power of the Rethels, done away. The persons of the Mayors of the Cities of York and Albany, Judges, Counsellors, Magistrates and principal gentlemen of the Country that are not in rebellion seized and secured, and even down to the meanest planters persecuted and tyrannized over.

"The whole armament destined for this part of America, except the division of the Hessians, hitherto assembled here, I expect, by the courage and strength of this noble Army, tyranny will be crushed and legal government restored."—N. T. Col. Doc., VIII: 683-84.

Kemble records: "Lord Dunmore arrived. Lord William Campbell also arrived about the same time, or the day or two before."—Kemble's Jour., 84.

The papers enclosed in this letter included, first, a letter of Drummond to Howe dated Aug. 12, which reads: "I take the liberty of sending inclosed the sketch of propositions referred to in my late conversation with your Lordship; which propositions, I have understood the Colonies were disposed, not many months ago, to make the basis of a reconciliation with Great-Britain.

The second paper was the "Sketch of Propositions communicated to Lord Howe, 12th August, 1776." These "Propositions" were six in number, namely:

1. That it shall be ascertained, as far as can be determined by calculation, what supply towards the general exigency of the State, each separate colony can furnish, consistent with its ability.

2. When such supply is thus ascertained, that each colony shall, by acts of its own Assembly, impose such taxes as they shall find expedient for raising of the said supply.

3. In consideration of the fluctuating state of all young countries, that such taxes may not, in their operations, become partially or accidentally burdensome on the one hand, nor on the other hand gradually become deficient in producing the aid intended by the colonial legislature; the following measures are proposed: They shall be chosen, as the objects of imposition, as they shall deem the most likely to keep pace with the growth or decline of the said colonies.

4. That these taxes, so imposed, shall, as in the customs, be levied by officers of the appointment of the King; and that a perpetual grant, of the produce of these taxes, shall be made by the respective Assemblies to the Crown of Great Britain.

5. As the direct means of removing the fatal grounds of this contention, by establishing a security against the apprehended invasion of property by Parliament, formal relinquishment shall be made on the part of Great Britain, of all future claim to taxation over these her colonies.

6. To remove all future suspicions, from the minds of the Colonists, that under the appearance of regulating commerce, duties may be imposed for the further purposes of revenue, an application of the produce of all duties, imposed on articles of trade by the British legislature, shall be made towards defraying the expenses of collection; and the surplus in each colony, to be paid into their separate treasuries, and to be subject to the disposal of the respective Houses of Assembly.

Drummond."

The third paper was Lord Howe's answer, written from the "Eagle", off Staten Island, August 15, 1776," in which he said: "I have received the honour of your Lordship's letter of the 12th, inclosing a sketch of the propositions mentioned in your late conversations, which I return herewith.

"As I think they contain matter, that upon a conference and cool discussion, might be wrought into a plan of permanent union, I
shall with great satisfaction embrace the first opportunity that may be offered upon these grounds, to perform so desirable an event."

Washington, Rutgers and Drummond Denny on the same day (17th) as follows: "I have your Lordship's favour of this day, accompanied by papers on subjects of the greatest moment, and deserving the most deliberate consideration.

"I allow much for your Lordship's well meant zeal on such an occasion, but I fear it has transported you beyond that attention to your marine, which comprehends the character of a man of strict honour. How your Lordship can reconcile your past or present conduct, with your engagement, so as to satisfy your own mind, I must submit to your own feelings; but I find myself under the disagreeable necessity of objecting to the mode of negotiating proposed while your Lordship's line of conduct appears so exceptionable.

"I shall, by express, forward to Congress your Lordship's letter, and the papers which accompanied it. The result will be communicated as soon as possible. I am sorry to have detained your Lordship so long, but the unavoidable necessity must be my apology."—Penn. Packet (Phila.), S 24, 1776.

The correspondence and papers were forwarded by Washington to Congress on the next day (ibid.,) and on the 20th, they were read in Congress and referred to a committee.—Jour. of Cong. (Ford ed.), V: 294, 1776.

Washington met with Howe (see S 11), and reported the result of the conference on Sept. 17, on which day Congress gave orders for the Drummond correspondence to be published.—Ibid., V: 765-67.
The Drummond correspondence is printed in a footnote in The Candid Retrospect (see J: 30, 1761), and Wm. Smith, in comment, says, "It took place, however, that the flag brought proposal for a treaty, not only in the American army, but in the New-York Convention then sitting on the island; and to prevent the effect of the rumour it was thought proper to deny it in public orders, which were first shewn at General Washington's head-quarters in draft to two members of the Congress, then attending him upon a message from Hærelin, one of whom has since acted as a Delegate in the Congress, at Philadelphia,—in conference with Howe; and this member of the Convention, after some time afterwards, that a letter had been written and some other papers received.—Candid Retrospect, 18-19 (footnote).

Washington urges the New York convention to execute some plan for removing women and children from New York to a place of safety.—Writings Geo. Washington (Ford ed.), IV: 347. He writes from headquarters in New York to the provincial congress, describing the situation thus: "When I considered that New York will in all human probability, very soon be the scene of a bloody conflict, I can not but view the great numbers of women, children and infirm persons remaining in it with the most melancholy concern. When the men of war passed up the river, the shrieks and cries of these poor creatures, running every way with their children, was truly distressing; and I fear will have an unhappy effect on the ears of the public and the world, if any method be devised for their removal?"—Corres. Provinc. Cong., II: 277. The convention at once resolved that they be removed.—Jour. Provinc. Cong., I: 578; N. Y. Merc., Aug 19, 1776. Washington, on the same day, issued the following announcement: "Whereas a Bombardment and Attack upon the City of New York, by our cruel, and inveterate Enemy, may be hourly expected: And as there are great Numbers of Women, Children and Infirm Persons, yet remaining in the City, whose Continuance will rather be prejudicial than advantageous to the Army, and their Persons exposed to great danger and Hazard: I do therefore recommend it to all such persons, as they value their own safety and preservation, to remove with all Expedition, out of the said Town, at this critical Period, trusting, that with the Blessing of Heaven, upon the American Arms, they may soon return to it in perfect Security. And I do enjoin and require, all the Officers and Soldiers in the Army, under my command, to forward and assist such persons in their Compliance with this Recommendation."—Broadside, in N. Y. H.S. See Pl. 47-8, Vol. V.

So that the communication between New York and Long Island shall not be obstructed by the enemy's ships, Congress resolves: "That Captains Pinters and Patrick Dennis, be requested and empowered by this Convention, to stop up the channel between the Grand Battery and Governor's Island in case they shall deem the same practicable, and that this Convention will defray all the charges incident to the execution of this design."—Jour. Provinc. Convention, I: 377; Corres. Provinc. Cong., II: 277. See Ag 19.

A "Gentleman who has escaped from the Provincials at New-York, and joined the Army under General Howe," writes from Staten Island to a correspondent in London: "A few days ago I left our devoted City, where every Means of Defence has been concerted to secure it, and the whole Island of New-York, from an Attack of the Royal Army. Should General Howe succeed in that Enterprise, his Antagonist, Mr. Washington, has provided a Magazine of Pitch, Tar, and Combustibles, to burn up the City before he shall retreat from his present Station; the Numbers of his Men are daily diminishing; they desert in large Bodies, are sickly, filthy, divided, and unruly: putrid Disorders, the small-pox in particular, have carried off great Numbers; when I left the City there were six thousand in their Hospitals, to which Use they have converted King's College; they have not now above 25,000 Men in Arms. John Morin Scott is appointed Governor of New-York. . . . The Persecution of the Loyalists continues unremitting: Mr. Lott, Treasurer, is committed for Gaol, having refused to take an Oath of Allegiance to the Congress; in short, every one suspected of an hostile Disposition to that Body, are disarmed, and conducted into a damnable Durance, which was the Case of the venerable Chief Justice Horsmanden, who, at 80, was hurried into the Country by a Party of Ruffians, but he proved so troublesome on the Journey that they chose to leave him on the Road, without performing the Injunction of the Denegogues . . . . "Some People lately arrived here from Philadelphia, tell us, that Mr. John Dickenson is employed by the Congress in digesting a Code of Laws for the United States of America. We are informed that Mr. John Alsop, one of the New York Delegates, has escaped from Congress, and is at New-York with his Family; Mr. Smith Ramage, Mr. Hugh and Alexander Wallace, and Mr. Abraham Lott, the Treasurer, are committed to Gaol, having refused to take an Oath of Allegiance to the Congress; in short, every one suspected of an hostile Disposition to that Body, are disarmed, and conducted into a damnable Durance, which was the Case of the venerable Chief Justice Horsmanden, who, at 80, was hurried into the Country by a Party of Ruffians, but he proved so troublesome on the Journey that they chose to leave him on the Road, without performing the Injunction of the Denegogues . . . . "People just escaped from New York informs us, that their is again a heavy Tax, and a Government, mounted by a huge body of Men, to be put in the Island. . . . Capt. Archibald Kennedy, of the Royal Navy, is confined in Morris Town, and Governor Franklin, accompanied by that merry Heart David Matthews, Mayor of New-York, now under Sentence of Death for eminently Proofs of Loyalty to his King and the old Constitution, are removed into Connecticut Government, for the better Security of their Persons. . . . The Episcopal Church is in New-York; the Parish Books burnt, and the Ministers scattered abroad, in this and the neighbouring Provinces. [See O 31.]

"It is now the Puritans high Holiday Season, and they enjoy it with Rapture all over the Continent: Their Behaviour exactly assimilates the Manners of the King-killing Tribe during the English grand Rebellion; but perhaps they may find an Alteration in their Spirits from the Expected of a Plan for a general Attack of the Island of New-York, &c. for which Preparations are now making. The whole Army is on Shipboard. General Clinton . . . is to land and attack the Enemy’s Posts on Long Island. Lord Cornwallis is on the Point of Departure, with a considerable Detachment of Troops, round Long Island, and to land at New Rochelle, near Westchester; and General Howe, with the main Body of the Army, to proceed up the North River, and make a Descent in Westchester County, as nearly opposite as possible to the Place where Lord Cornwallis may secure a Landing. Should General Howe succeed in this Arrangement, it will be difficult for Mr. Washington to move from the Island of New-York; so that a general Engagement may be expected. . . . "We are told that Mr. Washington’s Magazines are all in Cortlandt’s Manor; to get Possession of them must surely be an Object of Gen. Howe’s serious Attention, and an additional Inducement to attempt a Landing in the Rear of the Provincial Forces."—St. James’s Chron. (London), O 3-5, 1776.

Regarding the report that Washington intended to burn the city, see Ag 22, 1776.
1776 An item in a London paper reads: "The Army under General Washington has been indefatigable in constructing Redoubts, throwing up Entrenchments, and otherwise strengthening Posts already advanced by them at Fort George, near Trinity Church; on the Eminence at Mr. Harrison's Brewhouse, at King's-Bridge; from Crown-Point at Corlaer's Hook, through the Estate of Mr. De Laney of the Bowery, down to the North River; making the most of Mr. Nicholas Bayard's Hill, at Mr. Cruger's Wharf, and several other Places within the City. On Long Island, where they have 5,000 Men, from the Wallabout down to Red-hook; on Governor's Island, and also at Pole's Hook. The Accounts given of the Numbers of the whole Army upon the Island of New-York vary very much; some pronounce them 12, 14, and others from 24 to 30,000 Men."—St. James's Chron. (London), Ag 15-17, 1776.

18 Kemble records: "Early in the morning a smart Cannonade gave us the Idea of the Ships coming down the River, verified by their Appearance shortly after, being obliged by the staking of Rafts and hulks from keeping the mid Channel, they were under a necessity of going near the York Shore, but received no Damage, one Man, only, being Wounded by a Splinter. Every thing else quiet; the Orders of the day indicate a Movement very soon. The Troops, most of them, being to Embark."—Kemble's Jour., 84.

Robertson refers to the day's events thus: "This morning the Phoenix of War was too strong for the English and a Sloop after have pass'd the fire of all their Batteries—in w the Rose had two men wounded—The Night of the 16th [v. 391] They were Attack'd by two fire Ships—The Rose's Tender was burnt & the Phoenix narrowly escaped."—Robertson's Jour. (M.S.).

Pastor Shevkirk, describing the affair, says: "Phil. Sayer's experienced a kind preservation. A nine pounder came through the old German church window, straight into the house they lived in opposite the Lutheran church, and into the room where they slept; but they were up and out of the room. [The course of the cannon-ball through the house is described.] A thirty-two pounder, supposed coming from the Powlis Hook battery, fell into Sr. Barnard's garden, just before her door."

—Johnston, Camp. 1776, part 2, 113.

19 A London news item reads: "In the opinion of the most impartial politicians, the consequence of the American dispute will be a general war throughout Europe. France and Spain will most assuredly conclude a treaty with America. This will occasion a rupture with those powers. England will claim the assistance of Russia, Prussia, and her other allies. Some will explain the meaning of these treaties, and endeavor to preserve themselves from the risk of engaging. Others will feebly lead their aid. The rupture will be consequential, the event important. Let Britain, deprived of her colonies, bereft of her commerce, and of course impoverished in her revenue, look to the probability of success!"—Kentish Gaz. (Canterbury), Ag 17-21, 1776.

"Troops from all Quarters have been daily arriving to our Assistance, and Yesterday Afternoon 14 Sall of Transports, full of hearty Troops, arrived here from the Eastward, so that we can with great Truth assert, that we have now an Army in and about this City, of at least 70,000 Men."

"Every Tide we expect an Attack will be made on this City from the piratical Fleet at Staten Island."—N. T. Merc., Ag 19, 1776.

"An entire regiment is employed "to load a number of vessels with stones, for to sink between the grand battery and Governor's Island" [see Ag 17], which they will effect in a day or two."—New York news in Penn. Jour. (Philadelphia), Ag 21, 1776.

Capt. Nathan Hale writes from New York to his brother: "For about 6 or 8 days the enemy have been expected hourly, whenever the wind and tide in the least favored. We keep a particular look out for them this morning. The place and manner of attack time must determine. The event we leave to Heaven. Thanks to God! we have had time for completing our works and receiving reinforcements. The militia of Connecticut ordered this way are mostly arrived. Col. Ward's Regt has got in. Troops from the Southward are daily coming. We hope, under God, to give a good account of the Enemy whenever they choose to make the last appeal."

"Last Friday night [see Ag 16], two of our fire vessels (a Sloop and a Schooner) made an attempt upon the shipping up the River. The night was too dark, the wind too slack for the attempt. The Schooner which was intended for one of the Ships had got by before she discovered them; but as Providence would have it, she ran at a hurried and catch which she quickly burned. The Sloop by the light of the fire discovered the Phoenix—but rather too late—however, she made shift to grapel her, but the wind not proving sufficient to bring her close along side or drive the flames immediately on board, the Phoenix after much difficulty got her clear by cutting her own rigging."—Stuart, Life of Capt. Nathan Hale, the Martyr-3 of the Am. Rev. (1850), 70-71. (In Johnston's Campaign of 1776, part 2, 131-32, the words "five vessels" should be "fire vessels," in the transcription of this text.)

Smith writes: "The Debit of this colony is immense—We have unsunk old Paper Currency—[£] 70,000,000 Loan Office Bills outstanding— 120, The Prov. Congress have emitted before June 110 Our Proportion of the Continental Paper 300 Now emitting in this Province as M't Livingston informs me 50 or 600,000,000"

"I don't know the condition of other Colonies but the grand congress must soon borrow in their own Dollars and impose Taxes—an hour much to be dreaded for the Common People may be converted by their Burdens when they feel them grow heavy."

A vast Expanse must be incurred to provide Winter Quarters especially if the down tides are divided between N Y Long Island Staten Island & the Jersey shore opposite to the City.

"Both Parties must therefore begin to think of Treating for a Cessation of arms if the Howe have any Powers for that Purpose."

—Wm. Smith's Diary (MS.), V.

Kemble records: "Embarkation of the whole Troops [began] on the 24th, pl. 391. Simplified. Embark about Eleven thousand eight hundred and fifty English Foot, near five hundred Artillery and about 120 Light Horse, with fifteen hundred Foreigners under Col. Donop."—Kemble's Jour., 84.

Washington orders the disposition of the troops of Maj-Gen. Heath, "into the flat grounds of Haerlem, and along "a road out of the Haerlem flat lands that leads up to the hills and continues through the North River by Bloomingdale, Delancy's, &c."—Writings of Geo. Washington (Ford ed.), IV: 350.

The "ministerial troops" (British) "between New-Utrecht and Gravesend on Long Island to the number of 7000 men." It is said "they have since increased to 10000, are encamped and employed in throwing up breast-works." The patriots "are not idle, having taken possession of the adjacent hills, where they are in a situation to prevent the enemy from strafing further into the island." On the following day, the Americans "endeavoured to force their march, but were repulsed with loss."—Const. Gaz., Ag 24, 1776; Writings of Geo. Washington (Ford ed.), IV: 362-63; Lieut. Heinrich's letter in Munford's Hist. Ser. (Albany, 1891), 153; Die Neuzeit Staatsbegebenheiten (1777), 110-16 (translated in Lowell's The Hessians, chap. 6; Winsor, vol. VIII, in his Familiar Letters to his Brother.) Kemble remarks Washington was made "without the smallest opposition," and that total force of 14,000 was "on the Shore by 12 o'Clock." The advance under Clinton and Cornwallis of "the reserve, composed of Grenadiers, 42d and 33d. Regiments with part of the Light Infantry, immediately proceeded to Flat Bush, with 1,500 Hessians under Col. Donop, where they had some Skirmishing with the Rebels from the Heights leading to the Brookland Ferry, and a few men Killed and Wounded, but of no consequence. Part of the Light Infantry and 71st. took post at Flat Lands Church. The rest of our Army, extending from Gravesend to New Utrecht, remained in that position till the 26th."—Kemble's Jour., 85.

On the same day, Jabez Fitch, a lieutenant in the Connecticut forces at "N. York Camp," wrote in his diary: "I this Forenoon, observed several peculiar Smokes, arising at Different places on Long Island, we were also Informed that 10 Regulars had Landed somewhere near Y Narrows and at about Noon 10 Alarm Guns were Fired at Red hook, & at Fort Sterling—About 2 o'Clock our Officers were chiefly together at L Hales tent, had considerable Banter &c."

At About 4 o'Clock we Recall Orders for our Regt to repair Immediately to Long Island; Accordingly we 1000 Cross'd East River. . . Marchd forward about a Mile where we halted, & there Waited for Orders."

"About Sunset we March'd forward, & pass'd 10 Lines or
Chronology: The Revolutionary Period: 1776-1783

1776
Breast Work, soon after which we were Ordered to Load our Pieces, Our Regts & Col. Tylers took Post in a large Wood, where we spent the Night, not a Man Allowed to Sleep a Wink, or put his Pies [gun] out of his hand.—Diary of John Fitch (MS.), 1-2, in N. Y. P. L.

The provincial convention at Harlen approves "A draft of a Letter to his Excellency General Washington, relative to a report that the City of New-York was to be burnt if the Troops left it." The letter is as follows:

Sir: The Convention of this State have received information from one of the Deputies of the City and County of New-York of a report prevailing amongst the Army, 'that if the fortune of war should oblige our troops to abandon that city, it should be immediately burnt by the retreating soldiery, and that any man is authorized to set it on fire.'

The Convention cheerfully submit to the fatal necessity of destroying that valuable city whenever your Excellency shall deem it essential to the safety of this State or the general interest of America, yet the duty which they owe to their constituents obliges them to take every possible precaution that twenty thousand inhabitants may not be reduced to misery by the wanton act of an individual. They therefore esteem your Excellency to take such measures in preventing the evil tendency of such a report as you shall deem most expedient.

... "Ahn Gates, President."

—q Am. Arch., I. 1531. A like rumour was prevalent in the British camp (see S 2). On Aug. 23 (q. v.), Washington replied contradicting the report. Subsequently (see S 2), he asked the advice of congress on such a step, and, on Sept. 5 (q. v.), Gen. Greene wrote to him advising it. Congress however, did not favour it (see S 3).

Washington writes to the provincial convention: "I am favoured with yours of the 23d [q. v.], acquainting me with a report now circulating 'that if the American Army should be obliged to retreat from this city, any individual may set it on fire.' I can assure you, gentlemen, this report is not founded upon the least authority from me; on the other hand, I am so sensible of the value of such a city, and the destruction of it to many worthy citizens and their families, that nothing but the last necessity, and that such as should justify me to the whole world, would induce me to give orders for that purpose.

"The unwillfulness shown by many families to remove, notwithstanding your and my recommendation, may, perhaps, have led some persons to propagate the report with honest and innocent intentions; but as your letter first informed me of it, I cannot pretend to say by whom or for what purpose it has been done. As my views with regard to the removal of the women and children have happily coincided with your sentiments, and a Committee appointed to carry them into execution, I submit it to your judgment whether it would not be proper for the Committee to meet immediately in this city, and give notice of their attendance on this business. There are many who anxiously wish to remove, but have no means."—q Am. Arch., I. 1538.

Jabez Fitch's regiment (see Ag 22) joins "Genl Greens Encampment, at Brookline." Fitch says: "There was ye Report of Cannon heard most of ye 8th Day, from Flat Bush (yf place of ye Enimys Randisvooose) Some wounded there were also Bro't into Camp. We are this Day Inform'd ye Enimy Extended their Force more Eastward than what it was yesterday, & that their Numbers are suppos'd to be about 15000, Several Regts Cross'd ye Ferry over onto ye Island this Day, there was also several Regts sent into ye Woods, in Order to relieve such as had been there the ye Night . . . At about 4 O'clock, our Regt was Ordered into ye Meeting house, & a Barn Standing near it, there was also a Comfortable Room provided for ye Officers. We Took Possession of ye same, which was noway Disagreeable."—Diary of Jabez Fitch (MS.), 6-7, in N. Y. P. L.

A German, Lieut. Col. Zedwitz (see Jl 15, 1775), of Washington's forces in New York, is detected sending a letter to Gov. Tryon, traitorously disclosing Washington's plans and falsely stating that he had seen "four villains at Gen. Washington's house with fourteen hundred dollars as black as ink, which they were to poison the Watering place on Staten Island, and were to receive a remuneration of $5000 each from the General." He promised to give information to the British for $2000. In his defense at court martial on Aug. 26, he confesed writing the letter, but pleaded that it was a trick to reimburse him for previously raising a regiment in Germany for the British. By a "casting vote" he was acquitted.—Aug. N. 7: Merc. S 2; Penn. Eye Post, S 3; Conn. Gen. (New London), Aug. 30, S 4 and 6, 1776.

James Thacker, M. D., commenting on this instance of disloyalty, stated in his journal, under date of Sept. 12, that, while Zedwitz's life was saved "by the casting vote of a militia officer, who pretended some scruples of conscience," he was nevertheless "cashiered, and declared incapable of holding any military office in the service of the United States."—A Military Jour., etc. (1823), 64-65.

The provincial convention resolves that, in case of the invasion of the city and the distressing consequences attending it, "the several committees throughout this State be and they hereby are authorized and required to quarter upon the inhabitants of their respective counties and districts all such unfortunate persons as may, in consequence of the aforesaid invasion, be driven away from their places of abode, paying all possible regard to the conveniences of such inhabitants; and that they do assess moderate prices to be paid to such inhabitants for the persons so quartered on them."—Jour. Provln. Cong., I: 589.

Lord Stirling tells Lieut. Fitch that "he had this Morning view'd five Different Encampments of ye Enimy, on yf Island & ye July 23 Each Encamp'd did not contain much more than 600 Men."—Diary of Jabez Fitch (MS.), 4. There is reason to believe that Washington thought the British movement to Long Island a feint to conceal an attack on Manhattan Island. See letter of Washington to Yates, dated Aug. 25, in Jour. Provln. Cong., II: 277.

"General de Heslet took Post with two Brigades of Hessians at Flatbush, & Lord Cornwallis moved without his Committee in the Kings County to Flatlands."—From transcript, in Library of Congress, of the "Journal of the Operations of the Am. Army under Gen. Sir Wm. Howe" in British Museum (Egerton MSS. 2135 f. 7). On the same day Capt. Robertson writes: "Ordered to attend Genl Clinton, Join'd him at 8 in the Evening at flat lands, at 9 we march'd, w^o All the Grann's L. P. 371 & 171st Regts & 17th Light dragoons in order to turn the left Island of the British army who were in possess^ of the high Grounds of Brooklands, that extend all the way most to Jamaica."—Robertson's Jour. (MS.). The movements of the American forces on this day are described by a New-Englander, one of a body of 100 volunteers under Col. Knowlton that crossed from New Jersey to Long Island to reconnoitre between the British and American lines: We crossed in flat boats, and marched immediately to the Quarter of Green's Town and Putnam. They were riding about with spy-glasses in their hands, observing the enemy, whose tents were in sight. We spent the night in reconnoitering, without any special incident, excepting that while we were on the point of executing a plan for surrounding a British picket guard, we were fired upon by a party of American Militia, who did not understand their duty, and who immediately retreated with their heels. The firing was the picturesque end of this enterprise."—Onderdonk, Battle of Long Isd. (reprint-book & our MS.), 79-80. Cf. L. I. Hist. Soc., Memoirs, III: 58-59. See also Lossing, Pictorial Field-Book of the Rev., II: chap. 23.

The provincial convention being "informed that the Committee, who were appointed for that purpose, cannot proceed in the removal of the Poor from the City of New-York without a supply of cash," it ordered the Treasurer of this State to advance to James Beekman, Esq., one of the members of the committee appointed to remove the indigent women and children and inform persons out of the City of New-York, the sum of $4,000, to enable the said committee to complete the business for which they were appointed."—Jour. Provln. Cong., I: 589.

The British Engineer Robertson gives the following account of the Battle of Long Island: "at day break we pass'd these bricks [see Ag 26] w^o out any opposition, About 5 miles East of Bedford, we stopped our march towards Bedford & Brooklyn, when we came near to Bedford the Rebels began to fire from the Woods on our left w^o continued for some time as we march'd on to Brooklyn—ordered to stop the L. Comp^ of the 24th I joined them & obliged to reconnoitre my Committee w^o the Genl being cut off—About 5 miles the Rebels gave way very fast & in their retreat, across a marsh & mill dam Received a heavy fire from our Grinads tho' dist—the L Hors horse could not act for a swamp that was in front—At the same time Genl C—n went from Flatlands—Genl Grant march'd from Denny's w^o 2 Brigades to turn the Rebels right flank & Count Dunkop [Donop] march'd in the Centre
from Flat Bush—Genl  G— in his march had sev.  smart skirmishes—A Batt. of our Grenad. & the 71st went on towards Genl  G—and about 2 in the afternoon they had a very smart skirmish in the woods where the Rebels were trying to get to the water side to escape—The Hessians likewise fell in with the flying Party’s & they were drove from every Quarter—We lost some Good off’s about 60 men kill’d & about 300 wounded. The Rebels loss was very considerable upwards of 3,000 kill’d Wounded & Prisoners amongst the latter Genl  Sullivan & Lt  Stirling—They had about 12,000 men on the heights—Great Numbers got across the creek into their Works on Brooklyn heights, we were in Posses of very good Ground within 600 yd. of them & by some mistake in orders had very near evacuated this ground in the event we retired a little—The whole of this day Manoevre was well plan’d & Executed, only more of the Rebels might have been cut off had we push’d on from Brooklyn sooner towards Genl Grant.—Robertson’s Jour. (MS.).

A newspaper account of the engagement, published in New York, reads: "The English Troops, in three Divisions, taking three different Roads, and the Advantage of the Night, almost surrounded the whole of our Out Parties, who though encircled with more than treble their number, bravely fought their Way through the Enemy, killing great Numbers of them, and brought off some Prisoners. The account of their Battle being with great Breitbart, Stirling’s brigade suffered the hottest of the Enemy’s Fire: they were all surrounded by the Enemy, and had to fight their Way through the Blaze of their Fire.—They fought and fell like Romans!... The major Part of Colonel Atlas’s and Col. Piper’s Regiments are missing. Doctor Davis and his Mate were both taken Prisoners, as they were dressing a wounded Person in the Woods. The Generals Stirling and Sullivan are thought to be Prisoners. They killed, wounded and missing are imagined to be about 1000; but for our Encouragement the missing are hourly coming in. Gen. Grant, of the British Troops, from good Intelligence, is among the killed; his Hat with his Name on it, was found near the dead Body; the Bullet had gone thro’ the Hat, and came out with his Grey Hairs with which he fell the Hero, who boasted in the British House of Commons, he would carry America with 5000 Men, having only marched five Miles on Long Island with an Army of more than four Times the Number. Our Out-guards have retreated to the main Body of the Army within the Lines. The British Army have two Encampments about a Mile from our Lines, and by their Manoevres, ‘tis plain, they mean to attack us by Surprize and storm our Intrenchments. Our men shew the greatest Bravery, and wish them to come to Action."—N. T. Merc., S. 2, 1776; cf. the account given in South Carolina and Amer. Gen. Gaz. (Charleston), O. 2, 1776, reprinted in L. I. Hist. Soc. Memoirs, III, Part II, 58-60.

Washington, writing on Sept. 19 to Pres. Powell of the Massachusetts assembly, said: "In respect to the attack,... the public would furnish you with three or four reported—the only add, that we lost about eight hundred men; more than three-fourths of which were taken Prisoners. This misfortune happened, in great measure, by two detachments of our people who were posted in two roads leading through a wood, in order to intercept the enemy in their march, suffering a surprise, and making a precipitate retreat, which enabled the enemy to lead a great part of their force against the troops commanded by Lord Stirling, which formed a third detachment, who behaved with great bravery and resolution, charging the enemy and maintaining their posts from about seven or eight o’clock in the morning till two in the afternoon, when they were obliged to attempt a retreat, being surrounded and overpowered by numbers on all sides, and in which many of them were taken. One battalion,... lost two hundred and fifty-nine men, and the general damage fell upon the regiments from Pennsylvania, Delaware, and Maryland, and Colonel Huntington’s, of Connecticut."—5 Am. Arch., II: 399-400.

A Philadelphian, writing to a friend in London on Sept. 8, said: "The defeat of the Provincial Forces at Long Island was in a great measure owing to the bad Conduct of Lord Stirling, who neglected the proper Force for the Defence of the Heights above Flat-Bush, and by that means afforded Howe an Opportunity of shewing his superior Generalship in surrounding their Lines, instead of attacking them in Front, as was expected. Only one Battalion of Rangers, under the Command of Col. Trail, was left to defend the Pass on the Road to Jamaica Plain, where the grand Attack was made. That gallant young Officer for a long Time made a Head against the whole Force of General Clinton’s Body of Infantry; but as no Support was sent him, after losing Two-thirds of his Men, and being dangerously wounded himself he made good his Retreat, and joined General Putnam at Brooklyn. General Sullivan, Col. Smith and Major Guy behaved with great Bravery. The Men were so reduced by the Camp Fever and Flux which had prevailed among them, that it is not to be wondered Long Island proved an easy Conquest. General Washington is at Kingbridge; the Grand Army under his Command consists of about 37,000 effective Men."—St. James’s Chron., (London), O 19-22, 1776.

Col. William Douglas, an American officer, who took part in the battle wrote, on Aug. 31, to his wife: "I take this as the first opportunity to acquaint you that on Tuesday last we get a severe flogging on Long Island. The enemy surrounded a large detachment of our Army, took many, killed some, and the rest got off. Major Genl. Sullivan & Brig' Genl. Lord Sterling, Col. Clark and several other field officers are prisoners. Col. Johnson was killed. By the best act’s we killed more of them than they did of us. But they took the most prisoners."—L. I. Hist. Soc. Memoirs, III, Part II: 69.

Wm. Ediss, writing from Annapolis on Sept. 5, says of the battle of Long Island that it "proved fatal to the arms of America. The loss was considerations, and most several of the young men of the most respectable families, being included in the number of the slain."—Letters from Am. (London, 1772), 327.

Liet. Fitch of the Connecticut forces was captured by the British during the day and taken "to ye 5th Edge of Flat Bush Plain, where," he wrote, "I see a Large Body of Hessian Troops on a Hill at our Left; We then took a turn to ye Right, & was March’d by ye Front of Several Battalions of ye Hessians, where I receiv’d many Insults from those Formidable Europeans."—Diary of John Fitch (MS.), 16-17.

A detailed and scholarly account of the battle by Prof. Johnston is published, together with the supporting documents, in L. I. Hist. Soc. Memoirs, III; cf. C. P. Adams, "The Battle of Long Island" in Am. Hist. Rev., I: 650-70. Adams, always a rather severe critic of Washington’s generalship, says (p. 667): "The campaign of Long Island was not materially Warlike; there was too little of active field fighting, and in which he held chief command. That he profited greatly by it was subsequently apparent. He learned through his mistakes; and the mistakes of that first campaign were numerous and patent." An officer in Washington’s army saw a different reason for the failure when he wrote: "I fear Genl Washington has too heavy a task, assisted mostly by Beardless Boys."—Letter of Col. John Haslet to Gen. Rodney (Aug. 12, 1776) in L. I. Hist. Soc. Memoirs, III: Part II, 52. Prof. Johnston defends Putnam and Sullivan against charges made against them for their conduct in this battle by Bancroft, Dawson, and others.—Ibid., III, part I: 194-95, footnote. See also Literary Diary of Ezra Stiles, II: 69-71, quoting from a spectator’s letter; Earl Percy’s Letters from America (dated Aug. 13, 1776), and Hildesheim, in Letters of Hugh, Earl Percy, ed. by Bolton (1902), 67-72; Lowell, The Hessians, chap. 6, citing a diary, pub. in a magazine at Frankfort-on-the-Main, entitled Die Neuesten Staatsbegebenheiten (1777), 110-16; and other German works, including Schiller’s Briefwechsel, I: 105 et seq., Eckel’s "Hulflustripen," I: 57-45 (in the Preussisches Militär-Heeresblatt, 1834, Nos. 865, 864), and the MS. journals of the Grenadier Battalion von Minnigerode, the Regiment von Lassberg (Hesse-Han.) and the same regiment (Pfie), Winzer, VI: 279, 327, 328.

The operations of the American and British forces in the neighbourhood of New York, beginning with this battle, are shown on A plan of New York Island, with a part of Long Island, Staten Island, and East New Jersey, with a particular Description of the Engagement on the Woody Heights of Long Island, between Flatbush and Brooklyn, on the 27th of Aug. 1776, between His Majesty’s forces commanded by Genl Howe and the Americans under Major Genl Putnam. Showing also the landing of the British army on New York Island, and the taking of the City of New York, &c, on the 17th of September following, with the Subsequent Disposition of the British Armies. This plan," Engraved and published Oct. 19, 1776, by William Faden," is reproduced and described in Vol. I, Pl. 45.

This is the day appointed by the provincial convention on Aug. 2 (q.v.) as a day of fasting, humiliation, and prayer.—Jour. Prov. Cong., I: 554.
1776

The committee of safety resolves "That the records and papers belonging to the Convention of this State, as also the chest belonging to the Receiver-General's office, he immediately conveyed to Genl. Clinton's encampment, at or near King's Bridge." It is also ordered "That the Secretaries do see them safely conveyed to the said encampment, and remain with them till further orders."—Jour. Provins. Cong., I. 594.

28

Col. Moses Little, of Massachusetts, in a letter written to his son, dated Sept. 1, said: "On the morning of the 28th the enemy were encamped on the heights in front of our encampment [Port Putnam]. Firing was kept up on both sides from the right to the left. Weatherford &c."—Letter published in L. I. Hist. Soc. Memoirs, III, Part II: 45. Washington's own description of the day, written on the 29th, was similar: "There was some skirmishing the greatest part of yesterday between parties from the enemy and our people. In the evening it was very smart."—Letter of Washington to Hancock, 5 Am. Arch., I. 1311. Capt. Robertson, on the British side, wrote: "This night w^t a party of 400 men I opened ground opposite their Works & formed a kind of Parobal place of Arms 650 Yds Dist—this day St Wm Ehrkine w^t the 71st Regt & L. Dragons went to Jamaica. They took a Geo! Woodhall [Woodhull] Prisoner."—Robertson's Jour. (MS.). Gen. Nathaniel Woodhull, of Long Island, was captured "on the day after the battle" by "a party of British light horse, under Oliver De Lancey," riding on Conklin's Road. A. M. Ret. 27th, 1872.

29

Kemble records: "Employed in erecting Batteries to Attack and their Works on Brooklnd Heights."—Kemble's Jour., 86. The place where "Gen Howe broke Ground" on this day is shown on a Chart and Plan of the Harbour of New York & the Count Adjacent...pub. in the Political Mag. (London), Nov., 1781, and reproduced in Man. Com. Govn. (1879), pp. 844. See O 7.

Samuel Louchou (see J 4) discontinues The New York Packet and The American Advertiser with the issue of this date. The last issue found is that of Aug. 15 (No. 33). Louchou re-established the paper at Fishkill on Jan. 16, 1777 (q.v.).—Brigham, A. A. S. Proc. (1917), 474. See S 2.

With the issue of The New-York Journal, or General Advertiser, of Aug. 29 (No. 1756), the paper is discontinued because of the expected British occupation of the city. It was revived at Kingston on July 7, 1777 (q.v.).—Early Newspapers, II: 424.

During the day Capt. Robertson reports: "Party 300 employ'd in mak't a Bayou & Parties employ'd in making lassins to raise Batterys."—Robertson's Jour. (MS.). The work of the British engineering staff on this and the preceding day (q.v.) resulted in "a breastwork...60 rods long & 150 rods distant from Fort Putnam."—Letter of Col. Little to his son, L. I. Hist. Soc. Memoirs, III, Part II: 45. Prof. Johnston, discussing the "Origin of the Retreat," declares his belief that this "intention of advancing by trenches" on the part of Gen. Howe impelled Washington finally to call a council of war to consider retreat.—Ibid., part II: 215-16. The council was held "at Mr. Philip Livingston's house" (ibid., part II: 217), and it was decided unanimously "to give up the Island, and not, by dividing our force, be unable to resist the enemy in any one point of attack."—Letter of Washington to Yates, 5 Am. Arch., I: 1230.

Orders were given to commanding officers "to parade their men with their Arm's, Accoutrements, & Knapsacks at 7 o'clock, at the Head of their Encampments & thence to Forts in the Island..."—Order book of Col. Wm. Douglas in L. I. Hist. Soc. Memoirs, III, Part II: 31. Orders were also given "to impress every kind of water craft from Hellsgate on the Sound to Speyden Duyvel Creek, that could be kept aloft, and that had either sails or oars, and have them all in the east harbor of the city by dark."—Memorial of Col. Hugh Hughes in Leicester's Life of John Lam, 361. "At eight o'clock of the evening, such was the edict of the movements of those employed, that everything important to the occasion was in readiness, to be placed in the most favorable locations to secure the retreat."—Ibid., 561-62.

Soon after this, Washington began to withdraw his forces across East River to Manhattan. The British did not discover the movement until the following morning (q.v.).

Prof. Johnston, gathering his information from contemporary accounts, pictures the retreat as follows: "Hutchinson's Rhode Islanders carried their baggage and camp equipage to the boats on their shoulders 'through mud and mire and not a ray of light visible.' The embarkation was made from the ferry—the present Fulton Ferry—where General McDougall superintended the movements. Between seven and eight o'clock the boats were manned by Glover's and Hutchinson's men, and they went to work with sailor-like cheer and dispatch. The military accoutrements were the first to cross, though there was some vexing delay in getting them off. Unluckily, too, about nine o'clock the adverse wind and tide and pouring rain began to make the navigation of the river difficult.... However, at eleven o'clock there was another and a favorable change in the weather. The north-east wind died away, and soon after a gentle breeze set in from the south-west, of which the ships took quick advantage, and the passage was now direct, easy, and expeditious. The troops were pushed across as fast as possible in every variety of craft—row-boats, flat-boats, whale-boats, pettiaugers, draps, and sail-boats—some of which were loaded to within three inches of the water, which was 'as smooth as glass.'"—L. I. Hist. Soc. Memoirs, III, Part I: 221-22. See Ag 30.

30

Tignor, aid-de-camp, left New York, and wrote to his father, on Sept. 3: "Our Retreat before an Enemy much superior in Numbers, over a wide River, and not very well furnished with Boats certainly does Credit to our Generals. The thing was conducted with so much Secrecy that neither subalterns or privates knew that the whole Army was to cross back again to N. York."—L. I. Hist. Soc. Memoirs, III, Part II: 83; 5 Am. Arch., II: 214. A British officer, in a letter to London dated Sept. 6, talks of the event: "The 29th, upon a movement of the Guards and the troops, the Rebels ran away, and left the Island to the conquerors, flying over to New-York in the greatest confusion and dismay."—Ibid., II: 200; Winsor, VI: 281. See, further, Ag 30.

Lieut. Fitch and other Americans captured on Long Island by the British are ordered "into 120 Flat bottom'd Boat," in which they were taken to British ships, and are put on board the "Pacific," a ship of about 900 tons. Fitch says: "our Accommodations were but somewhat Coars, for Officers & Men, being almost 400 in Number, were soon Drove under Deck together without Distinction; Here we kept our Residence three Nights Successively, & my own Lodging was no other than a Great Gua or a Quilt of Rying, yet we Here Re've great Indulgence."—Diary of Jabez Fitch (MS.), 21-22.

American retreat from Long Island to New York (see Ag 29) is completed this morning under cover of a fog. A newspaper account reads: "...by six o'clock in the morning we had everything embarked. There never was a man that behaved better upon the occasion than General Washington; he was on horse back, the whole night, and never left the ferry stairs till he had seen the whole of his troops embarked."—Penn. Gem., S 4, 1776; see also Ibid., S 5 and 14. Gen. Greene, writing to Gov. Cooke on Sept. 17, said it was "the best effected retreat I ever read or heard of, considering the difficulty."—5 Am. Arch., III: 370. The British themselves expressed high praise for this feat of generalship. The Ann. Register (1777), 471, referred to the "wonderful silence and order" of the retreat; adding: "those who are best acquainted with the difficulty, embarrassment, noise and tumult, which attend even by day, and no enemy at hand, a movement of this sort with several thousand men, will be the first to acknowledge that this retreat should hold a high place among military transactions."

Capt. Montresor, of the British forces, states: "I gave the first Information of the Enemy's abandoning the works near Brooklyn; and was the first man in them with one Corporal, and six men, in the front of the Fique..."—Capt. Montresor's Jour., 122.

Capt. Robertson reports that the British conceived by Day Break that the Rebels had evacuated all their Works on Long Island & retreated to N. Y. Island in the Night—we immediately took Possess of them w^t of the Piques—& in the Event were relieved by 1000 Hessians—Gen 1 C—w^t went On towards Newton w^t 2 Batt & 1st Inf & 1 Bat 2nd Grenad—"Robertson's Jour. (MS.).

Kemble gives further evidence that the British were surprised when he says: "In the Morning, to our great Astonishment, found they Had evacuated all their Works on Brooklnd and Red Hook, without a Shot being fired at them, and to the best of our observa-
THE ICONOGRAPHY OF MANHATTAN ISLAND

1776 Aug. 30

tion found a Body of three or four hundred remaining upon Gover-
nors Island, who might have been taken by flat Boats, but for what
reason was not attempted; neither could our shipping get up for
want of Wind, and the whole Escaped the following Night to New-
York."—Kemble's Jour., 86.

Solomon Nash records: "... the Enemy fired soon at Last
Boats, and sailed for 1/2 of the Island our men Left governs Island the Enemy
fired at our Boats when Left govns Island and Cild and wounded
3 or 4 or "—Nash's Jour., 31.

Pastor Shewkirk, viewing the affairs of the day from the
Manhattan side, writes: "In the morning, unexpectedly and to
the surprise of the city, it was found that all that could come back
was come back; and that they had abandoned Long Island when many
had thought to surround the King's troops, and make them prisoners
with little trouble. The language was now otherwise; it was a
surprising change, the merry tunes on drums and fife's had ceased,
and they were hardly heard for a couple of days. It seemed a
general damp had spread; and the sight of the scattered people up
and down the streets was indeed moving. Many looked sickly,
emaciated, cast down, &c., the wet clothes, tents,—as many as they
had brought away,—and other things, were lying about before the
houses and in the streets to-day; in general everything seemed to
be in confusion. Many, as it is reported for certain, went away to
their respective homes. The loss in killed and wounded and taken
has been great, and more so than it ever will be known. Several
were drowned and lost their lives in passing a+ bridge that had
sunk. The Tribes of New York, Pennsylvania, and Maryland people lost
the most; the New England people, &c., it seems are but poor sold-
diers, they soon took to their heels."—L. l. Hist. Soc. Memoirs,
III, Part II: 115.

The committee of safety resolves, in reply to the inquiry of
Ebenzer Hazard, deputy postmaster for the New York depart-
ment, regarding "the most proper place of safety and convenience
to the public to which he should remove his office, as an invasion
of the city of New-York is hourly expected," that he should remove
it "to some convenient place near Dobbs' ferry, till further orders

"All the [British] Army began to move towards Newton but
5,000 H[m] and Gen. D. Helster left at Brooklyn heights—2 Brigades
w Gen. G—at Bed ford—Gen. Clinton was this morn at Hel Gate &
Ld Cornwallis encamp'd on the heights near Newton—at 2
Clock the Gen. with the rest of the Army arrived at Newton when
he was head Qrs—we pass'd through a Pleasant Country—Reported
that the Rebels were firing on one Another & evacuating the Town
—Robertson's Jour. (MS.).

Kemble records: "Marched to Newton, with the Grenadiers
Light Izd., 2d, 3d, 5th, and 6th. Brigades and 21st. & 22st.
Regts., who occupied Flushing and Jamaica. Gen. Sullivan about
this time sent to New York, and from thence went to Philadelphia,
subjected on the Supposition of Negotiation with the Congress."—
Kemble's Jour., 86.

Solomon Nash records in his journal: "To Day ye fleet Came up
Nearer the Town our people went up to Governors Izd and fired at the
Shippin' & time with Cannon that our people Left their
and they returned the fire and fired saval times at our regallows as
they went by the grand Batty to go up ye north river."—Jour. of Solo-
non Nash, 31.

A fortification was erected by American troops on Laurel Hill,
the site on the modern maps being between 1942 and 195th St., on
Auburn Ave, extending midway between Frank and George Sts.

For contemporary plans of the military movements on Long
Island and Manhattan Island in 1776, see Winsor, VI, 336, 342,
343, 344, 345.

Sept.

The college, when finished will be exceedingly hand-
some; it is to be built on three sides of a quadrangle; fronting
Hudson's or North river, and will be the most beautifully situat-
ed of any college, I believe, in the world. At present only one wing
is finished, which is of stone, and consists of twenty-four sets of
apartments; each having a large sitting room, with a study, and
bed-chamber. They are obliged to make use of some of these apartments
for a master's lodge, library, chapel, hall, &c. but as soon as the
whole is completed, there will be proper apartments for each of
these offices.

... There is also ... one of the finest prisons I have
ever seen.—The Court or Stait-house makes no great figure, but is
to be repaired and beautified. There is a quadrangular fort, capable of
mounting sixty cannon, though at present there are, I believe, only
thirty-two. Within this is the governor's palace, and underneath it a
battery capable of mounting ninety-four guns, and barracks for a
company or two of soldiers. Upon one of the islands in the bay is an
hospital for sick and wounded seamen; and, upon another a pest-
house. ..."—Letterry Magazine (London), Sept., 1776 (with
plan of the city, drawn "on the Spot" by Lieut-Col. Walter Nut-
gent). See also St. James's Chron. (London), S 28-O 1, 1776.

Earl Percy, writing from Newtown, Long Island, to his father,
the Duke of Northumberland, describes the engagement of Aug. 27
offices. "... the shore opposite Hell gate where The Rebels have a Work round
with 1200 men, etc, all 47, the town of E. River about 80 Yds across here—Gen
Sullivan sent over to N: Yk about negotia-
tions."—Robertson's Jour. (M.S.).

Washington writes to the president of Congress: "... with
the deepest concern I am obliged to confess my want of confidence
with the generality of the troops. ... I more than once in my
letters took the liberty of mentioning to Congress, that no depend-
ance can be put in a Hill 9 or 10 months than those Militia and
embodied for a longer period than our regulations heretofore have
prescribed. I am persuaded, and as fully convinced as I am of any
one fact that has happened, that our liberties must of necessity
be greatly hazard'd, if not entirely lost, if their defence is left to
any but a permanent standing army. ... Our number of men
at present fit for duty, are under twenty thousand. ... Till
of late, I had no doubt in my own mind of defending this place, nor
should I have yet if the men would do their duty; but this I dispair
of. It is painful and extremely gratifying to me to give such unfavorable
accounts, but it would be criminal to conceal the truth at so
acute a juncture. ...

He asks the advice of congress regarding the advisability of
destroying New York in order to prevent the landing of the head-
quarters of the enemy: "If we should be obliged to abandon the
town, ought it to stand as winter-quarters for the enemy? They
would derive great advantages from it on the one hand; and much
property would be destroyed on the other. It is an important ques-
tion, but will admit of but little time for deliberation. At present,
I dare say the enemy mean to preserve it, if they can. If Congress,
therefore, should resolve upon the destruction of it, the resolution
should be a profound secret, as the knowledge of it will make a
change in their plans."—Writings of Geo. Washington (Ford ed.),
IV: 378-81. Congress replied the next day.—See § 3.

On this day also, an English field-of-fiver writes from the British
camp on Long-Island: "I have just heard there has been a most
dreadful fray in the town of New-York. The New-Englander in-
siders, upon setting the fire at the General Congress, was op-
posed by the New- Yorkers, who were joined by the Pennsylvanias,
and a battle has been the consequence, in which many have lost
their lives. By the steps the General is taking, I imagine he will
effectually cut off their retreat at Kings Bridge, by which the Island
of New-York is joined to the Continent."—5 Am. Archives, II: 123.

Another British officer on Long Island writes at the same time
"... that they are preparing to evacuate the Town [New York]. Whether they will burn it or not is uncertain, as the
Provincials from the Jerseys and the neighborhood strenuously op-
pose that measure."—Shelton, The Jumel Mansion, 43.

Samuel Loudon advertises in Gaine's newspaper that he "Is re-
moving his Printing-Office to Fish-Kills, where the Provincial
Congress now reside, ... and regrets that he is unable to publish the
subscription of the New-York Packet, for several Weeks, occa-
sioned by the Trouble in moving as well as the great Scarcity of
Printing Paper."—N. Y. Merc., 8, 1776. See Ag 29.

SEE ADDENDA, VOL. VI.
The detachment of American patriots having left Governor's Island on Aug. 31, abandoning munitions and provisions, one captain and 100 men of the British forces occupy it, "to keep the rebels within bounds, in the city as well as in their redoubts thrown up on the side of the city." "Blackwell Island" is also occupied by the British.—From Baumbeier's narrative in Mag. Am. Hist., I: 33; cf. Nath's Jour., 31. The British army also held possession of New-town, Bushwick, Hell Gate, and Flushing. They began the erection of two batteries at Remsen's Mill and one near Hell Gate.—Trans- script, in Library of Cong., of "Jour. of the Operations," etc., in British Museum (Egerton MSS., 2135 f. 7). See also descript. of Pl. 47-h, I: 361.

Capt. Archibald Robertson reports Gen. Clinton about "place# mortars to drive the Rebels from their work at Waltons house," but nothing is done. It is reported that Gen. Sullivan has gone to Philadel- phia with Governor's Jour. (MS.)

A British officer in the 42d Regiment writes from Long Island: "I was upon a Party who took above 100 Prisoners, upon whom their Knees begged their lives, and many of them declared that they had been forced into the Service. We could see the Rebels preparing to evacuate New-York, and hear that they are in great Confutation lest a Junction should be effected with General Burgoyne's Army. It is reported also, that many of the Loyalists in New-York have dared to lay down the Arms which they had been compelled to carry against his Majesty's Army; so that I have no Doubt of our being soon in Possession of that City."—St. James's Chron., O 22-24, 1776.

In the night of the 2d of September the frigate Rose of 12 guns sailed out of the fleet the East River, with 50 boats, leaving New York on the left, and without the slightest difficulty anchored in Whall [Wallabout] Bay and Bushwickfeste. All the enemy's [American] cannon were put into a serviceable condition by the British and conveyed to the batteries, which were found in part and also erected on the rising ground to the left of the village ferry [at Brooklyn] as far as to Governors Island.

The Rose's first action in discarding these works upon these batteries, but everywhere without effect, especially at the great fort Bunkers Hill. They had their camp in the great wood between Cron Point and Blumenthal. The strongest position of the enemy [American] was along the Harlem River to guard their rear and communications. Often in the night rebels came over to the English camp in small boats, asked to serve, and enlisted in the newly raised brigade, 2000 men strong, of a Colonel de Lancy, whose ancestors settled on York Island, and who had much to suffer from the present rebels. Some 100 men, from the prisoners of the attack of August 27th., are also enrolled in this brigade."—From Baumbeier's narrative, in Mag. Am. Hist., I: 34.

Capt. Robertson's account of this declares that "This Night the Roman of war came up the E. River on 20 flat Boats the An- chored under us at night, and we received one of Capt. Batt's—A Picquet sent to take Posses# of Blackwell's Island for her Protection."—Robertson's Jour. (MS.). See also descript. of Pl. 47-b, I: 361.

"The forepart of ye 3d Day there was a mighty movement of ye[ British] Transports in ye Harbour, a great number of them mov'd up toward Town."—Diary of Jales Fitch (MS.), 26.

Washington's letter of Sept. 2, p. 3, is read in congress. A resolu- tion is passed immediately that he "be acquainted, that the Congress would have especial care taken, in case he should find it necessary to quit New York, that no damage be done to the said city by his troops, on their leaving it: The Congress having no doubt of being able to recover the same, though the enemy should, for a time, obtain possession of it." It was also ordered that "three more battalions be ordered from Virginia, to reinforce the army at New York;" two, likewise, from North Carolina and one from Rhode Island; and that it "be recommended to the assemblies and conventions of the several states to the northward of Virginia, im- mediately to send all the aid in their power to the army at New York."—Jour. Cont. Cong. (Ford. ed.), VI: 33-34. Washington re- plied on Sept. 6, p. 21.

Col. Rufus Putnam writes from Bloomdale to Gen. Washing- ton: "I have reconnoitered every part about the Island of New- York and the main, as far as Frog's Point, and, on a full view, find the enemy have such a variety of places to choose out of, that it is impossible to prevent their landing when they please. They have such guides and intelligence of our movements that they can always avoid or surprise any parties that are posted to oppose their land- ing in their army is so numerous that they can attack a division of our army with a superior force; and yet, while our army is ex- tended from New-York to King's Bridge, 'tis necessary to have a body of reserve at this place [Bloomdale]. But I cannot think it would be best, nor have we time, to make fortifications; since the moment any quarter is attacked, the whole body of reserve, I con- clude, will be ordered to support it. I should advise the throwing of obstructions in the way of landing. That they have taken some of their provisions always with them, and teams ready to carry their baggage wherever the service requires." He advises that the army "be collected together in some advantageous place," where supplies may be had, and "a camp fortified in such a manner as the enemy dare not attack, or, if they did, must be repulsed. . . . And to defend the passage of the North River, which I take to be the capital obstruction and at the same time open a communication to the Eastern and Southern Colonies, is to press the army from Bundet landing, on the Jersey shore—Mount Washington and the Heights, south as far as Colonel Thompson's house, on Harlem River—the Heights we now possess at King's Bridge, and as far south as the Three Trees. The batteries on the Jersey side to be filled with guns; the battery on the rocks below Mount Washington completed; a new one built below the hill opposite the summit yet to be built filled with guns and ammunition, if the galleys also afforded their assistance, would render it very difficult for ships to pass. . . ."—5 Am. Arch., II: 168.

A letter from Long Island to a gentleman in London, contains the following: "To the night of the 2d instant three persons escaped from the city in a canoe, and informed our General. Washington had ordered three batteries of New York Provincials to leave New-York, and that they should be replaced by an equal number of Connecticut troops; but the former, assured that the Connecticutians would burn and destroy all the houses, peremptorily refused to give up their city."—5 Am. Arch., II: 168.

John Haslet, writing to Brig. Gen. Caesar Rodney from the "Castle at Kings Bridge" on the 1st, says in discouraging terms the losses on Long Island, and the indefensible condition of New-York. "Had Long Island been rendered Useless, to the Enemy, N. York laid in Ashes, when we were Ordered to L. Island, & the Heights between this & Connecticut Properly Occupied, the Enemy must have attacked at Disadvantage. . . . tis true this kind of Devastation may be condemned as Cruel, but Provinces e'r now have been sacrificed with Applause to the Safety of a Kingdom, & what ought not to be done for the Safety of a Continent."—From the original letter, told by Henley, in Phila., Je 13, 1779.

". . . the English left their post on Blackwells Island, the rebels occupied it in force, and so strong, that the outposts on the main shore were exposed to a continuous fire, which even the great battery could not supply."—From Baumbeier's narrative, in Mag. Am. Hist., I: 34.

Capt. Robertson writes: "Capt[.] Moncrief & I were ordered to raise two Batt's at Hell gate against Walton's house one of 3, 24 P's & one 3, 11 P's—a work's party of 300 men we began to work at 3½ past nine & by 5 next mor[ning] they were completed within 2 hours work of 60 men—This Even† a Party was sent to raise a Breast Work on Blackwell's Island—but the Picquets were with- drawn & the Rose went down to Bushwick Point."—Robertson's Jour. (MS.). See also Kemble's Jours., 87.

A letter written by Gen. Mercer, "who commands the flying camp," states: "Gen. Washington has not so far as I have seen 5000 men to be depended on for the service of a campaign, and I have not 1000. Both our armies are composed of raw militia, perpetually fluctuating between the camp and their farms, poorly armed, and still worse disciplined. These are not a match for, were their numbers equal to, veteran troops, well fitted and urged on by able officers. Numbers and discipline must prevail at last."—Gordon, Hist. of the Rite, Progress, and Establishment of the Independence of the U. S. A. (London, 1788), II: 316.

The provincial convention resolves: "That His Excellency General Washington be requested and authorized to cause all the bells in the different churches and public edifices in the city of New-York, to be taken down and removed to New-Ark, in New-Jersey, with all possible despatch, that the fortune of war may not throw the same into the hands of our enemy, and deprive this State
at this crucial period of that necessary, though unfortunate, re-
source for supplying our want of cannon."—Jour. Provint. Cong., I: 610. On Sept. 8, Washington wrote to Mr. Yates, the president of the committee of safety, acknowledging receipt of the resolution of the convention, approving of it, and stating that he would "accord-
in to it carried into execution."—Ibid., I: 616. Pastor Shew-
kirk recorded their removal in his diary, under Sept. 9 (q.v.).

"This mora^ the Two Batt^ Completed all but the Platforms—
The Rebels took pos^ of Blackwell's Island—Orders were again
given for our reta^ it This Ev^ the Boats were ready—but it was
defered."—Robertson's Jour. (M.S.).

Fitch writes: "It is now one Week since ye 9th Day when we came
on Board ye Pacific, & two Weeks since ye 6th Day we left N. York.
What Changing Scences a few Days open to our View! what a mighty
Alteration two Week hath made in ye Appearance of American
Affairs, but more especially in our own particular Circumstances—
"About Sunset ye Officers — belonging to our Regt. were
clean Removed to ye Snow Mentor . . . This Afternoon we heard
a very considerable Canonade up at ye Northward, which con-
tinued some part of ye Night following."—Diary of Jabez Fitch
(M.S.), 30.

Gen. Greene, writing from "New-York Island" to Gen. Wash-
ington, advises burning the city (see S 2). He states, among other
things, that "It has been agreed that the city of New-York would
not be tenable if the enemy got possession of Long-Island and Gen.
Putnam. They are now in possession of both these places.
Notwithstanding, I think we might hold it for some time,
but the annoyance must be so great as to render it an unfit place
to quarter in . . .

"The City and Island of New-York are no objects for us; we are not
to bring them into competition with the general interests of
America. Part of the army already has met with a defeat; the coun-
try is struck with a panic; any capital loss at this time may ruin
the cause. 'Tis our business to study to avoid any considerable mis-
fortune, and to take post where the enemy will be obliged to fight
us, and not we them. The sacrifice of the vast property of New-
York and the suburbs, I hope has no influence upon your Excellency's
measures. Remember the King of France . . .

Two-thirds of the property of the city of New-York and the suburbs belongs to the
Tories. We have no very great reason to run any considerable risk for its
defence . . .

"I give it as my opinion, that a general and speedy retreat is ab-
so lutely necessary, and that the honour and interest of America
require it. I would burn the city and suburbs, and that for the
following reasons: If the enemy gets possession of the city, we
never can recover the possession without a superior naval force to the
Irish, or the enemy of an opposing force. They have their whole army together, which, if they could do, would be a very
great security. It will deprive them of a general market. . . .

5 Am. Arch., II: 182. "John Jay before this also proposed its
destruction. Scott urged abandonment of the place for sound
military reasons, though the move would ruin him."—Campaign
of 1776 around N. T., 229.

Samuel H. Parsons writes to Major Gen. Heath: "As the ma-
chine designed to attempt blowing up the enemies ships is to be
transported from the East to the North River, where a small vessel
will be wanted to receive it, I wish you would order one for that
purpose. As all things are now ready to make the experiment, I wish
it may not be delayed. . . ."—5 Am. Arch., II: 185. The reference here is undoubtedly to Bushnall's submarine torpedo (see Aug.)

An officer, at "Camp near New-Town Long Island," writes:
"Deserters tell us they are in great confusion at New York, one
party wanting to burn the Town, and the other to save it; but in
compassion for their Sick, which it is impossible they can remove,
the number being so great, I think they will hardly set Fire to the
Town."—Sheldon, The Jemal Mansion.

Referring to the conquest of Long Island, and the resistance still
encountered beyond "Jamaika," Baumeister states: "The hap-
iness of the inhabitants, whose ancestors were all Dutch, must have
been great; genuine kindness and real abundance is everywhere,
anything worthless or going to ruin is nowhere to be perceived. The
inhabited regions resemble the Westphalian peasant districts, upon
separate tables; great houses are built, which are planned and
completed in the most elegant fashion. The furniture in them is
in the best taste, nothing like which is to be seen with us, and
besides so clean and neat, that altogether it surpasses every de-
scription."

"The female sex is universally beautiful and delicately reared,
and is finely dressed in the latest European fashion, particularly in
India laces, white cottons and silk gauzes; not one of these women
but would consider driving a double team the easiest of work. They
drive and ride out alone, having only a negro riding behind to ac-
company them. Near every dwelling-house negroes (their slaves)
are settled, who cultivate the most fertile land, pasture the cattle,
and do all the menial work. They are Christians and are bought on
the coasts of Guinea, being sold again here among the inhabitants
for 50 to 150 Pounds a head; 20 York shillings are such a pound and
32 York shillings make the value of a guinea."—From Ba-
umeister's narrative, in Mag. of Am. Hist., I: 34-35.

Washington writes to the president of congress, acknowledging
receipt "last night" of congress' resolution of Sept. 3 (q.v.), and
adds: "Perceiving it to be their opinion and determination that
no damage shall be done to the city in case we are obliged to aban-
don it, I shall take every measure in my power to prevent it."—5 Am.
Arch., III: 197.

Francis Marschall, for many years one of the city surveyors
(see Je 8, 1733), dies "in an advanced Age." Rivington speaks of
him as "one justly entitled to the Character of a peaceful Citizen,
and a useful and worthy Member of Community."—Royal Gac.,
S 5, 1796.

The British batteries at Hell Gate are unmasked by "felle
Trees." They were opened on the 8th, but "The Rebels only fired
three guns."—Robertson's Jour. (M.S.). The date of Sept. 8 is
found on one of Robertson's drawings (No. 35—see Jl 12) entitled
"View of the opening [f] of our Battery at Hell Gate upon .
Walton's house . . . & the . . . Estuary, 8th Sept. 1776."

"Several Sail came in to ye Bay, under Convoy of a Man of War,
one of them we supos'd to be Prizes."—Diary of Jabez Fitch
(M.S.), 32.

Col. Wm. Douglass of Connecticut writes to his wife from a
"Country Seat near Turtle Bay." "Our Army is now in three grand
Divisions. One at the City, which is our right wing, commanded by
Genl Putnam, one at and above Kings Bridge, commanded by Genl
Heath, and one at and above Harlem, commanded by Genl Spencer,
which is the Division that I belong to, and is called the Center
Division . . ."—Campaign of 1776, part 2, 70.

In a council of war, held at the Richmond Hill house, with
Washington presiding, it is voted "to arrange the army under three
divisions; five thousand to remain for the defence of the City; nine
thousand at Kingbridge and its dependencies . . . the remain-
der to occupy the intermediate space, and support either." Some
officers, "in whose opinion the safety of the army is closely con-
cerned, opposed the discontinuance of the present establishment, and
argued it would expose them to the consequences of a separate
command. . . ."—Campaign of 1776, part 2, 70.

The provincial convention, meeting in the Episcopal church at
Fishkill, resolves "That the Committee of Safety and Correspond-
ence at New-York be appointed and authorized to take from
the doors of the houses in the city of New-York all the brass knockers,
and that they cause the same to be sent to some careful person at
New Ark, in New-Jersey, with all possible dispatch; that the said
committee keep as accurate an account as possible of the weight
and value of them, and of the houses from whence taken, in order
that satisfaction may be hereafter made to the respective owners."—Jour. Provint. Cong., I: 616.

"Fairbatter" publishes an open letter to Lord Howe suggesting
that "the fate of America" be decided by a pitched battle between
equal numbers of British and American troops. He would have
the "extensive plains of Long Island" the battlefield, and 10,000
men on each side, the armies to be "provided in all respects equal,
with trains of artillery and all other offensive weapons; then, on a
given signal, begin the attack and leave the issue to the God of
armies."—Moore's Diary, I: 308-9, citing Penn. Enr. Post, S 7, 1776.

"This Day veShips Sailed out of ye Bay, some to Sea & others
up to Town. . . . This is ye Annual of Johnsons Battle at
Lake George in ye Year 1775 [p. 1], a very Memorable Event for
Americans."—Diary of C.P. Kemble, Oct. 29, 1776.

C. P. Kemble records: "Our batteries opened early in the morning
upon the Rebel Redoubt at Horns Hook; had one Sailor and one
Soldier killed during the day. This night and the following day the rebels increased their fire, having brought down some say four, some six mortars. One of our 24 Pounds rendered useless by running at the Muzzle.—Kemble's Jour., 87.

Washington writes to the president of congress from head-quarters at New York a full report of his plans and policies of defense. He is advised, and from experience concludes, that "the war should be defensive (it has been over called a war of posts); that we should, on all occasions, avoid a general action, or put anything to the risk, unless compelled by a necessity into which we ought never to be drawn. . . . The honour of making a brave defense does not seem to be sufficient stimulus when the success is very doubtful, and the falling into the enemy's hands probable.

"We are now in a strong post, but not an impregnable one; say, acknowledged by every man of judgment to be untenable. . . . I am fully of opinion that the establishing strong posts at Mount Washington, on the upper part of this Island, and on the Jersey side opposite to it, with the assistance of the obstructions already made, and which may be improved, in the water, that not only the navigation of Hudson's River, but an easier and better communication, may be more effectually secured between the northern and southern States. . . ."

"The post at King's Bridge is naturally strong, and is well fortified. . . . I have also removed from the city all that store of military ammunition, which is absolutely necessary for its defense, . . . The council of general officers, who met on Sept. 7 (9.), "agreed the town would not be tenable if the enemy resolved to bombard and cannonade it." —5 Am. Arch., II: 216–23; Writings of Gen. Washington (Ford ed.), IV: 392–97. For a list of the works of defense in New York, see Johnston's Campaign of 1776 around New York and Brooklyn, 84–92.

"Sept. 9. Clinton writes from "King's Bridge" to the president of the New York State convention: 'By the enclosed return of my brigade, you will observe that there are wanting to complete, 596 men; that this deficiency principally arises from the different militia regiments not having furnished their quotas, and from desertion; which latter have been so frequent, that unless some effectual method can be devised to prevent it, in future, not only my brigade, but the whole army will be much injured, if not ruined.

"I know it is my duty, as well as the duty of every other officer in the service, to cause deserters to be apprehended; but it is also the duty of every friend to his country, and more particularly so, of members of committees and officers of militia. They can do it without injuring the public service in any degree. I can't. If some friends of peace in New York transmits to headquarters at New York to Lord Howe a letter from Dr. Franklin, and expresses his willingness to forward Lord Howe's answer.—Am. Arch., II: 257. Lord Howe replied on Sept. 10, from the "Eagle, off Bedlow's Island," stating that he would meet Dr. Franklin "and Messrs. Adams and Rutledge [a committee of congress], to-morrow morning [Sept. 11, 9.], at the house on State Island, opposite to Amboy." (the Bilbo house), and he made provision for possible delay. —Ibid., II: 274.

Paster Shewkirk in his diary: " . . . By the measures and proceedings of the Rebel army, it appeared evident, that they intended to leave the city; for as they had begun last week, so all this week, they removed their sick, their stores, and ammunition, and gradually the soldiers marched away. They likewise took the bells out of all the Churches [see S. J. & conveyed them away. —Campaign of 1776, part 2, 116.

"We hear that the Deputy Post-Master of this City, hath received Orders to remove his Office immediately from Dobb's Ferry, to Head-Quarters; so that the Obstruction that Correspondence hath lately met with, will now, in a great measure, be removed.—" N. Y. Merc., S 9, 1776.

The last issue of The New-York Gazette; and the Weekly Mercury is brought out in New York by Hugh Gaine, prior to his retirement to Newark, N. J., in anticipation of the occupation of the city by the British. This was No. 1500 in his series.—Brigham, A. A. S. Proc. (1917), 423. See S. 21.

"This month the light Infant" took Possessio of Banana's & Montressor's Islands [see S. 9] with the loss of one man & one w. The Rebels by our Preparat think a Land- fortified near Walton's House, This day they are Busy throw up Breast works along the shore. The 1st Bridge went over to Banana's Island.—Robertson's Jour. (MIS.).
1776. Having now obtained the particulars, James Thacher, M.D., Sept. 10, records in his journal the incidents of the plot against the American patriots, which was discovered on June 21 (p. 9). "Several of these miscreants," he states, "were tried and convicted, and two or three were executed. . . . We have now ample evidence, that the tories are the most virulent and implacable of our enemies; . . . so numerous and active are the tories in the vicinity of our main army, that it has been found necessary to adopt coercive measures, and to compel them to take the oath of allegiance, as prescribed by our Congress, or to depart from our territories."—A Military Jour. during the Am. Rev. War, 64.

11 According to a letter from Brig.-Gen. James Clinton, who is at Fort Montgomery, to Gen. Washington, four or five sloops have been sent from the upper Hudson "to bring the sick from the Hospital in New-York to Orangetown." Other boats are to be impressed for the same purpose.—5 Am. Arch., II: 376-77.

Kemble records: "Some firing the Night past, thro' mistake, the Highlanders and our Seamen in Flat Boats."—Kemble's Jour., 87.

Franklin, Adams, and Rutledge, commissioners from congress (see S 9), meet in conference with Lord Howe in the old Christopher Billop house at Totteck, Staten Island, in an effort to bring about a reconciliation between England and America.—Roberts' Jour. (M.S.); Kemble's Jour., 87; Mathew, The Refugees of 1776 (1913), 52; Winor, VII: 12.

Howe opened the conference by remarking that, although he could not treat with the Americans as a committee of congress, his powers enabled him to consult with them as "private gentlemen of influence in every part of the land." He proposed that the colonies return to their allegiance to the king, intimating that in that case the offensive acts of parliament would be revised and the instructions to governors reconsidered. The commissioners, however, recited the numerous and continued tyrannies which had impelled the colonies to declare their independence and asserted that "a return to the domination of Great Britain was not now to be expected." They said that the declaration of independence was justified by the rise of the colonies in general; that every colony had approved of it, and all now considered themselves as independent states, and were settling, or had settled, their governments accordingly; so that it was not in the powers of the Congress to agree for them, that they should return to their former dependent state." In conclusion they declared that, although Howe had at present no power to treat with them as independent states, it would be easier for him to obtain fresh powers, if there were in England a real disposition toward peace, "than powers could be obtained by Congress, from the several colonies to consent to a submission." Howe thereupon put an end to the conference, as he said, "no accommodation was like to take place."—Jour. of Cong. (Ford ed.), VI: 765-66; Penn. Packet, S 24, 1776; cf. letter of Rutledge to Washington, 5 Am. Arch., 1776. (1914), also in Jour. of Rev. War, 67-69. The committee's report of the conference is also printed in a footnote in The Candid Retrospect (see Je 30, 1780), 19-24, and Wm. Smith, commenting on the Americans' remarks concerning the colonies' desire for independence, said: "The intelligent American wants no aid to convict this report of the want of truth and good faith. Some of them were so far from the calling for independence as to suspend all authority to hear it, to this hour. And when uttered it shocked, and from that instant divided the Continent, and drove its advocates to violence and distress, that demonstrate the general dislikes, and their own fears."—Candid Retrospect, 20 (footnote). See also S 26.

12 From this day forward it was plainly to be observed, that the heavy cannon of the New York batteries diminished their fire on Governors Island, and that their sick were transported from the city to Pauls Hook. The inhabitants, who had long before taken away their effects, now carried off in the night their last property, even the cattle, out of the city to the main land before New York, and the royalist inhabitants were plundered, maltreated and in part dragged off too. From Fort Bankers Hill the artillery played little upon our works, but sent all authority to hear it, to this hour. And when uttered it shocked, and from that instant divided the Continent, and drove its advocates to violence and distress, that demonstrate the general dislikes, and their own fears."—Candid Retrospect, 20 (footnote). See also S 26.

13 Pastor Shawker records in his diary under Sept. 10 and 11: "Night and day they were busy to bring their tents away; and it appeared plain, that there would be a change soon.

Almost daily there was firing from Long Island to Horn's Hook, and the ship yards here."—Campaign of 1776, p. 2, 116. "That portion of the inhabitants who were opposed to the British rule, and friendly to Congress, took refuge mostly on the other side of the Hudson river, and found among the ancient Dutch families of Bergen, Rockland and Orange, a transient and unquiet home until after the war."—N. Y. Cam. Adv., N 25, 1859, citing the N. Y. Observer.

Peter Elting writes to Capt. Richard Varick that the town Apears . . . to be in a bad state of defense it seems the greatest dependence Is made on the musketry." He is informed, however, "that our army is in a much better Posture of defence at Horazook [later called "Harry's Point"—nearly opposite "H Lucan""] and King’s Bridge, at the latter the grand stand is to be made Many Wagons & Horses about here have been Impres for Carrying the stores, Provisions & out of New York."—N. Y. City during the Am. Rev., 105-6.

14 Two ships of war make their appearance at Hell Gate, having come through the Sound.—N. Y. T. Merc. (Newark ed.), S 21, 1776, Sept. 9, 1776, stated that another conference of general officers was held on the 12th, when it was determined that a removal of the army was not only prudent but absolutely necessary. He expected the immediate attack of the British.—5 Am. Arch., II: 326.

15 Evert Byvanck, a prominent merchant of New York, was among those who fled from the city as soon as the success of the British was apparent. His country-place was on the East River, near the foot of the modern Delancey St. In a letter written at the time, he gives an account of his efforts to get from New York to Horseneck: "On Thursday, the 12th of September, I took my Chais, Horse and Negro Sam to drive, and went down to Corela's Hook to my country seat [on the East River near the foot of Delancey St.]. That night from Corela's Hook I sailed for the Island and two of ours on Corela's Hook, on both sides of the house, was advised not to proceed farther, but being so near my house, about three-quarters of a mile off, I went out of my Chais and ventured to walk through a Lane which led me to the back part of my place, ordering my man to follow me with Horse and Chais. A heavy cannonade still kept up; as we were going there several cannon balls flew past us, and two balls struck a post and a rail of the Lane fence we passed through breast-high just before us; however, we got safe to the back part of my Land . . . That afternoon the Gentleman I took down with me in my Chais, came to me and importuned me to make all the haste I possibly could to get away out of imminent danger, as it was not in the least doubted but the King's Troops were preparing for landing, and by all likehood would land up immediately. . . . I went back and told my man to discharge me, and I would or could not then escape being killed, wounded or taken prisoner, on which I took his advice, and after the firing of the Enemies' Cannon ceased, which was about six o'clock on Friday evening. 13 Sept., I ordered my man Sam to put the horse in the Chais, and I proceeded that evening as far as the hill above Harlem to the place where Mr. Lane [Lawrence] Kortright had retired to, being a house belonging to Mr. Elton of St. Croix, which I was kindly received, who told me he had removed his family to Hackensack that day, and intended in one or two days to follow them; his house and out-houses were filled with officers, attendants and their horses. About ten o'clock we were all preparing to go to bed, when a General who was there received orders to be with his several companies of Soldiers at one o'clock that night opposite Turtle Bay or King's Bay, and to lay on their arms to obstruct the landing of the King's troops then hourly expected."—Whittemore, The Abel and Allied Families, 17-18.

Washington, writing to the president of congress on Sept. 14, states: "Yesterday afternoon [Sept. 13] four ships of war, two of forty and two of twenty-eight guns, went up the East River, passing between the tower and the light on Governor's island, and anchored about a mile above the city, opposite Mr. Stuyvans's, where the Rose man-of- war was lying before."—5 Am. Arch., II: 326. The "Jour. of Operations," etc., in British Museum (Egerina MSS 2153 f. 7), gives the names of the ships as the "Phoenix," "Rebeck," "Orpheus," and "Carryfort," and says they were "under Fire of the Rebel Batteries, above Bushwick" (i.e., on the Manhattan shore
opposite Bushwick). On the following day, the "Flat boats were all sent into Bushwick Creek."—From transcript, in Library of Congress. See also Robertson's Jour. (MS.), under Sept. 14.

Col. Babcock, writing on Sept. 21 from Westerly, R. I., to Gov. Cooke, states that the four ships "kept up an incessant fire, assisted by the cannon at Governor's Island. The batteries from the city returned the ships the like salute. Three men agape, idle spectators, had the misfortune of being killed by one cannon ball. The other mischief suffered on our side was considerable, saving the making a few holes in some of the buildings. One shot struck within six feet of Gen. Putnam, as he was on horseback riding into the Fort."—5 Am. Arch., II: 442.

The four ships anchored at Horse's Hook. The Americans were getting ready to retreat.—Salmon Nath's Jour., 33.

"On this day," runs Baumgarter's narrative, "General Howe wished to land upon the island of New York, because 18 years ago on this day General Wulff had conscripted Quaco, but lost his life. The watchword for this end was 'Quebec' and the counter-sign 'Wulff,' but the frigates were too late for this attack as they only sailed out of the fleet at 5 o'clock on the evening of the 14th; 4 frigates, all of 32 guns, named Phoenix, Rhobock, Orpheus and Caryfort, moved up the East River and anchored beyond Bushwicb. The rebels fired from all sides on this passage, but the vessels under cover of our fire escaped by without damage. The battery on Governors Island had the best effect upon the Point of New York, and on the other hand the wooden watch-house on the said island suffered all the injury which the rebels intended for the battery, and not a man was lost."—Mag. Am. Hist., I: 36.

Gen. Johnson's "Map of Brooklyn at the time of the Revolutionary War" shows the American battery at Brande's Molen Point, north of Stuyvesant's Meadows, and directly opposite Bushwick Creek, Brooklyn, where the "Rose" was anchored. The frigate, to escape destruction, that night took a position between Blackwell's Is. and Long Is.—See reproduction in Man. Com. Couns. (1858), 112.

Robertson writes: "I went on board the Rose at Bushwick Point w Col. Sterriff to reconnoitre the opposite shore of N. Y. Island Kimps Bay w. Appeared very strong ground-made a Sketch of it."—Robertson's Jour. (MS.). This sketch may have served as the ground work of the drawing of "Kipp's Bay 17th Aug. 1778 (p. v.), where the Troops landed 17th Sept. 1776," preserved among the Robertson drawings in N. Y. P. L.

At 8 o'clock this evening I received orders to Attend Genl C — which was to command the division of Troops composed of all the B. Horse & 200 & the L. In & Hess. Chasseurs, to be landed the next morr at Kipp's Bay on N. Y. Island, went off immediately."—Robertson's Jour. (MS.).

Lieu. Col. Lewis Morris, Jr., writes to his father an account of local movements among their friends and among the enemy. "The Enemy have been in Possession of Montroucer's Island for these four days past, and they brought the land Field Pieces, up the North West Point and fired several times at your house. I suppose they will shoot it like a sieve and destroy what little is left upon the place, ... Could we have supposed that a Nation so civilized in their Manners, so Christianized in their Principles, could so far have debased themselves so to extend their Acts of oppression over a People, the Fruits of whose Honest Industry were appropriated to their Advantage, and were the great source of their Riches? The Enemy, from their different Manoeuvres and great Preparations intend soon to strike a decisive Blow—their Plan is to out-flank and hem us in, but I think they will be disappointed, for the Heights above Harlem and King's Bridge are strongly manned and fortified, and all the Points up to Frog's are strongly picketed and the avenues blocked and the Roads cut up to prevent the approaches of their artillery, ... Old Oliver Driscoll is a Colonel, and your poor Friend Woodal is killed, and that fouling, treacherous Courtier Governor Tryon lies at the Point of Death. ... This is the last Letter I shall write you in New York, perhaps it will be the last I shall ever write you for depend upon it there will soon be a Blow struck that in a great measure will determine the Fate of America and liberate us from the Jaws of Tyranny."—From Letters to Gen. Lewis Morris, in N. Y. H. S. Collections (1873), VIII: 445-46. In another letter of Sept. 18, Morris stated that, on the evening of Sept. 16, "six ships passed by our Batteries up the East River and anchored just above Mr. Stuvivison's House five having passed by the night before."—Ibid., VIII: 447. See also Winsor, Sept. VI: 283.

"Pastor Shawirk records in his diary: 'In the afternoon more ships went up the East River, which being fired on again, brought on a greater smart cannonade. Their House was so near the shore it was very unsafe to walk in the streets. The remainder of the Rebel army hasted away, and so did the members of the Committee, and others of the deluded people.'—Campaign of 1776, part 2, 116-17.

Col. Babcock, in a letter of Sept. 21 to Gov. Cooke previously cited, states that, on Sept. 14, "his Excellency came and breakfasted with us at General Putnam's, hard by the fort whereat we lodged last. He further assured us he would attend us towards General Putnam's an hour before dinner. He did so." Various questions were considered at this meeting of officers.—5 Am. Arch., II: 442.

The Kennedy house, No. 1 Broadway, was the headquarters of Gen. Putnam while he held his short command at New York.—Watson's Annu., 341. See also Ap 5, Addenda. Regarding the occupancy of the Kennedy house by Washington as headquarters, see Ap 13, and Jl 20, 1776.

Miss Moncrieffe, daughter of a Royalist, Maj. Moncrieffe, who was with Gen. Gage in Boston, having written to Gen. Putnam, was invited to his house. She relates the incident in her letter memoirs thus (without date): 'On the next day, he sent Colonel Webb, one of his aid de camps, to conduct me to New York. When I arrived there I was shown in the Broad Way (a street so called), where General Putnam resided, I was received with the greatest kindness both by Mrs. Putnam and her daughters, and on the following day, I was introduced by them to General, and Mrs. Washington [who departed on Je 16, 914. ...] but I seldom was allowed to be alone, although sometimes indeed, I found an opportunity to escape to the gallery on the top of the house (Almost every gentleman's house in New York, has a gallery, with a summer house on top), where my chief delight was to view with a telescope, our fleet and army [British] at Staten Island. ..."—Memoirs of Mrs. Coglian, (Daughter of the late Major Moncrieffe.) (London, 1794), 16-17.

Col. Joseph Reed writes that it is expected the headquarters of the army will be removed this evening to Kingsbridge.—5 Am. Arch., II: 332. The removal was made to the Morris house.—See S 16, 1776.

Capt. Francis Hutchenson, ass't-secretary to Sir William Howe, writing on Sept. 24 to a friend in England, says that Washingtion remained at Richmond Hill (see Jl 16) all summer, leaving it the night before the landing of the British (Sept. 15).—Johnston, Battle of Harlem Heights, 219, citing the Haldimand MSS., British Museum, boasting states in The Pictorial Field-book of the Rev., II: 819, that Washington made the residence of Robert Murray on Murray Hill's headquarters on the 14th; but there appears to be no evidence to support this statement, or that he spent the night of the 14th there.—Johnston, Campaign of 1776 around N. Y. and Brooklyn, 250, footnote. See also Winsor, VI: 276.

The Landing on New York Island, was made this Morning in Kipp's Bay, and the Town of New York, was taken Possession of this Evening by Major General Robertson, who was appointed Commandant."—From transcript, in Library of Congress, of "Journal of the Operations," etc., in British Museum (Egerton MSS. 2151 f. 7). See also descrip. of Pl. 45-b, I: 354-55.

The following selected extracts from contemporary sources present the principal facts which constitute our knowledge of the events of the day.

Col. Archibald Robertson writes: "at ½ past four in the morn of the 15th we began our march towards Newton Inlet where we arrived a little past 6—found the Boats ready—at 7 the Embarkat began & at 10 the whole were in their Boats—I went in a Boat attend the Genl who was in Commodore Hotham's Boat, we went down the Creek past'd over the E. River & went on Board the men of War who where [sic] station'd tp Cover our landing—They were well Placed & very Close in shore there were a Number of the Rebels in their Breast Works where we were to land.—After being on board the Ships we returned immediately again to the Creek & the Commodore made the Signal for the Boats to advance, by ½ past 12 o'clock they were all rendezvoused under Bushwick Point; Then the Signal was made by the C—t to advance towards the Shore in their proper Divisions upon which all the Ships began to fire & kept up an incessant Roar & their Guns well directed our Boats were quite covered with smoke the scene all together was
1776 Grand & Noble—while we were proceeding we perceived a large Sept. Column of Rebels on our left march' with their Colours flying
15 seemingly w\^ an intention to throw themselves into the Breast Works where we were to land—at last about one the L 31st landed on the Rocky Hill to the Right of the B. Part of the Grenad^ landed on the Rest of the Grenad^ landed on the left of the Bay—w\^ 40 Y\^ of their Breast Works—Genl Cl—n & I were on the Rock upw^ards of two minutes before any of the Grenad^ landed on our side & then went into the B. Works to my great Joy w\^ out the loss of a man—either side of the Bay. The horror & fright the few inhabitants in the first house we came to were in was astounding—we pushed on in 3 Comp^ front to send the Part of the Enemies in front in going up saw many of the Rebels running off in the greatest disorder. Genl C—n desired me to run on & hold out my white Hankerchief & call to them to come in, but only one man tur\^d about—after the Grenad^ were landed we halted a little & at this time the Hess^ Grenad\^ that were on our left fell in w\^ the Rebel column & soon dispersed them. The Hess^ had 5 killed & 10 wounded the Rebels 17 K & 40 w\^—We then went on to the heights of Inklenberg about one mile in front towards King's Bridge where we halted, the L 1^ on our Right & a little advanced 

About 2 Genl H—e came up & after the 2d Embark\^ arrived about 4 we moved on w\^ some field pieces in front—The Rebels were drawn up before their Encampment about 2 miles in front on the heights of Harlem but about a half mile in the position w\^ the principal part of their tents Bagage & c\—we then occupied the ground they left on to the Plains of Harlem & halted all night only Genl Vaughan wounded of the British this day. A number of the Rebels that were shut in between us & N. York made their Escape on our left, w\^ might have been prevented had we had more men in the 1st Embarkation to push across the Island to Hudson's River.'—Robertson's Jour. (M.S.). For reference to Robertson's drawing of the landing at Kip's Bay, see Sept. 13, 1776.

"The British" army landed 

at the house of Mr.Foxcroft Postmaster General, in Kip's Bay. The troops immediately took possession of the house of Mr. Robert Murray, the Quaker House on Inkle Barrack [Inklenberg], a very strong point. Mr. Washington's men were driven from the posts they possessed as far as the Hill with a Howl on its top & the British left. Mount Morris [161st St.] at which place and near the Blue Bell [see O 12, 1775], which is three miles from King's Bridge, they were strongly posted."—Battle of Harlem Hill, 21st, citing St. James's Chron., N 16, 1776.

"Kip's Bay was the large cove which then set in from the East River at about the foot of Thirty-fourth Street. It took its name from Kip, who owned the adjacent estate. From this point breastworks had been thrown up along the river's bank, wherever a landing could be made, down as far as Corlear's Hook or Grand Street."—Campaign of 1776 around N. Y., 232. Regarding the disposition of the American troops before the British attack, see ibid. See also Winsor, VI, 333.

The first sailing was by 84 boats, with English infantry and Hess\^ Grenadiers under command of Lieut.-General Clinton. Commodore Hotham conducted this landing, under cover of 5 frigates, anchored close before Kaaps [Kip's] Bay, above Crown [Crown] Point, and maintained a 3 hours cannonade on the enemy's advanced posts in the great wood. The signal of the red flag denoted the departure of the boats, the blue on the contrary the stoppage of the passage, and if a retreat should be necessary, a yellow flag would be shown."—From Baumsteir's narrative in Mag. of Am. Hist. (1877), I: 36.

Sir William Howe's report of Sept. 21 to Lord Germain con-
tains the following account of the events of Sept. 15: "On the 17th instant, in the morning, three ships of war passed up the North River as far as Bloomingdale, to draw the enemy's attention to that side and the first division of troops, consisting of the Light Infan-
try, the British Reserve, the Hess\^ Grenadiers, and Chasseurs, under the command of Lieutenant-General Clinton, having with him Lieutenant-General Earl Cornwallis, Major-General Vaughan, Brigadier-General Leslie, and Colonel Donop, embarked at the head of Newtown Creek, and landed about noon upon New-York Island, three miles from the town, at a place called Kip's Bay, under cover of thirty-four gun ships, thirty frigates, as well as the Hotham [Phoenix, Roebuck, Orpheus, Carysfort, Rose], Commodore Hotham having the direction of the ships and boats.

"The Rebels had troops in their works round Kep's Bay, but their attention being engaged in expectation of the King's troops landing at Stuyvesant's Cove, Horen's Hook, and at Harlem, which they had reason to conclude, Kepp's Bay became only a secondary object of their care. The fire of the shipping being so well directed and so incessant, the enemy could not remain in their works, and the descent was made without the least opposition." He here praises the conduct of the officers and men of the Navy.

"The British immediately took post upon the commanding height of Inklenberg, and the Hessians moving towards New-York, fell in with a body of Rebels that were retiring from Stuyvesant's Cove; some firing ensued, by which a Brigadier-General, other officers, and several men of the Rebels were killed and wounded, with the loss of four men killed and eight wounded on the part of the Hessians.

"As soon as the second embarkation was landed, the troops advanced towards a corps of the enemy upon a rising ground three miles from Inklenberg, towards King's Bridge, having McGowan's Pass in their rear, upon which they immediately retired to the main body of their army upon Morris's Height.

"The enemy having evacuated New-York soon after the army landed, a brigade took possession of their works in the evening.

"The prisoners made in the course of this day were about twenty officers and three hundred men. The enclosed return will show the artillery and stores taken [not printed with the report]. In the evening two gun boats took possession of the为之 on the ferry where the evening, was with the right to Horen's Hook, and the left at the North River, opposite to the Blue Bell [see O 12, 1775] where the enemy have their principal work, in which positions both armies still continue."—5 Am. Arch., II: 378-79.

Baumsteir thus describes this phase of the capture: 'This morn-
ing, at 7 o'clock the man-of-war Renome [Renoue] of 40 guns sailed out of the fleet with 2 frigates, the Repulse and Pearl, each of 32 guns, up the North River, and anchored above Blumothal, the rebels fired upon this passage from Pauls Huck, but without any effect. These vessels however in sailing by fired broadside windows on the shore of the city of New York, on account of which the city, together with Fort Bunkers Hill, was deserted by the enemy, and about half past 1 in the afternoon a white flag was displayed, and on its being fired the British ran the point of their pennant. This caused Admiral Howe to send some 100 marines into the city, to take possession of it, and to post guards in all the principal streets, by which all plundering was stopped and no one suffered any injury."—Mag. of Am. Hist., II: 57.

Pastor Sheukirk writes in his diary the following graphic de-
scription of the day's incidents: "Soon in the morning when the tide served, more ships passed up both the North and East river, and though what was yet in town of the Rebel troops got away as fast as they could, yet they fired again on the ships, as they did likewise from Powles Hook; which caused a cannonading which made the houses shake, and the sound of it was terrible. One large ball, supposed to come from Powles Hook, flew against the North side of a house, just opposite the Green Line, and the shock of this caused Admiral Howe to send some 100 marines into the city, to take possession of it, and to post guards in all the principal streets, by which all plundering was stopped and no one suffered any injury."—Mag. of Am. Hist., II: 57.

The ships-of-war which covered the landing of the British army at Kip's Bay were the "Phoenix" (44 guns), "Roebuck" (44 guns), the "Rose" (52 guns), and another,—Private Jas. Martin's ac-
count, printed in Johnston's Campaign of 1776 (1878), part 2, 81.
Gen. Jeremiah Johnston stated they were the "Phoenix," "Rose," and "Dutchess."—See a map of Brooklyn, etc., in

"All accounts agree that it was next to impossible to remain
under the fire of the men-of-war. Major Fish says that "a Cannon-
ade from the ships began, which far exceeded my Ideas, and which
seemed to infuse a Panic thro' the whole of our Troops." Silli-
man speaks of the "incessant fire on our lines" with great alarm as
being "so hot" that the militia were compelled to retreat. Douglas'
description is as quaint as it is expressive: 'They very suddenly
began as heavy a cannonade perhaps as ever was from no more
ships, as they had nothing to molest them.' Lieutenant John Hein-
richs, of the Hessiangyers, writes: "Last Sunday we landed
under the thundering rattle of 5 men-of-war. —Campaign of 1776
around N. T., 234, foot-note; ibid., p. 2; P. Martin, of Col. S. Duggan's regiment, in describing the attack,
noted: "... all of a sudden, there came such a peal of thunder
from the British shipping, that I thought my head would go with
the sound. ..."—Ibid., part 2, 82, citing A Narrative of Some
of the Adventures, Dangers and Sufferings of a Revolutionary Soldier,
etc. (1836). (The author of this work was Joseph P., and not James
S., Martin, as erroneously stated in The Campaign of 1776.)—See

Kemble records in his journal an account of the British opera-
tions: "About 9 in the morning the Reserve, 33d. and 42d. Regi-
ments excluded, Embarked in Flat Boats in Newtown Creek. The
rest of the Army marched to the point of Land opposite to Kipp's
Bay and embarked there; the 1st Brigade & 71st. excepted, who
were ordered to rendezvous on the Sand Bar, at the Mouth of
the Shore, consisting of the Reserve & Donop's Corps, covered
by two 40 Gun Ships and three Frigates, whose fire was both ter-
rible and pleasing, and so terrible to the Rebels that they dare not
come within half a Mile of the Shore instead of defending their Lines
on the Shore. As we were going on Shore we saw a party of about 200
... Rebels ... marching in great haste to take possession of their
Works which was the object of our mission. The succeeding
People that afterwards fell in with the Hessians. The Light In-
fantry Landed upon the Right of the Bay, got up a Rock, the
Grenadiers &c. in it; the Light Infantry took possession of the Post
on their Right; the Grenadiers, 33d. and 42d. Marched thro' to
Indenbarg Hill, and the Hessians to the left, where they met with a
party of the Rebels, of whom they killed 30 or 40 and took about 60
prisoners. The Grenadiers met with a small party and exchanged
a few shot, Maj. Gen. Vaughan the only Person Wounded and that
Slightly. Our loss the whole day about 3 Killed and 16 or 18
wounded. The advance of our Army Marched to the Black Horse,
and across from thence by Athorhp's House to North River, and
had very near cut off Mr. Putnam's Retreat, who brought off the
Rebel Rear Guard from New York, most of whom and their Troops
in general were got by the North River Road."—N. Y. H. S. Collec-
tions (1883), 88-89.

On the morning of Sept. 16, Washington prepared the rough-
draft of a letter to be sent to the president of congress describing
the events of Sept. 14 and 15. It was copied and dispatched imme-
diately by Robert H. Harrison, who explained in a postscript that
Washington intended to sign it, "but having rode out, and his
return or where to find him uncertain," it is sent unsigned. The
letter in full is as follows:

"Sir: On Saturday [Sept. 14], about sunset, six more of the
enemy's ships, one or two of which were men-of-war, passed
between Governor's Island and Red-Hook and went up the East River
to the station taken by those mentioned in my last. In half an hour
I received two expresses, one from Colonel Sargent at Horn's Hook,
(Hull-Gate,) giving an account that the enemy, to the amount of
three or four thousand, had marched to the river, and were emb-
arking for Barne's on Montresor's Island, where numbers of them
were then encamped; the other from General Mifflin, that
uncommon and formidable movements were discovered among the
enemy, which being confirmed by the scouts I had sent out, I pro-
ceeded to Harrison's or to Morris's Island, which was supposed the
site to it—the principal attempt to land would be made. However,
nothing remarkable happened that night; but in the morning they
began their operations. Their ships came up the North River as
high as Bloomingdale, which put a total stop to the removal by
water of any more of our provisions, etc.; and about eleven o'clock
those in the East River began a most severe and heavy cannonade,
to the great confusion and cover of the landing of their troops between
Turtle Bay and the city, where breastworks had been thrown up to
oppose them. As soon as I heard the firing, I rode with all possible
depth towards the place of landing, when, to my great surprise
and mortification, I found the troops that had been posted in the
lines retreating with the utmost precipitation, and those ordered
to support them, (Parson's and Fellow's brigades,) flying in every
direction, and in the greatest confusion, notwithstanding the exer-
citations of their generals to form them. I used every means in my
power to rally and get them in some order; but my attempts were
fruitless and ineffectual; and on the appearance of a small party of
the enemy, not more than sixty or seventy, their disorder increased,
and they ran away in the greatest confusion, without firing a single
shot. Finding that no confidence was to be placed in those brigades,
and apprehending that a part of the enemy had escaped encamping
on the Island, which was supposed to Harlen Plains and cut off the retreat to this place, I sent orders
to secure the heights in the best manner with the troops that were
stationed on and near them; which being done, the retreat was
executed with but little or no loss of men, though of a considerable
part of our baggage, occasioned by this disgraceful and dastardly
conduct. Most of our heavy cannon, and a part of our stores
and provisions which we were about removing, were unavoidably left
in the city, though every means, after it had been determined in
Council to evacuate the post, had been used to prevent it. We are
now [Sept. 16] encamped with the main body of the army on the
head of the harbor, where I hope the enemy will meet with a
defeat in case of an attack, if the generality of our troops would be

In a letter written to John Augustine Washington, on Sept. 22,
Gen. Washington repeats the account of the patriot forces "running away
in the most disgraceful manner," and refers to the "loss of many tents,
bags, and camp equipage, which would have been easily secured, had they
made the least opposition."—5 Am. Arch., III: 446. See also Washington's report on this event
to Abraham Yates, Jun., president of the convention of the state of
New York, dated Sept. 12—ibid., II: 466.

Jos. Montgomery, an officer of the Delaware regiment, writing
to Caesar Rodney from Kingsbridge on Sept. 16, said that when
only a few of the British put in an appearance two or three regi-
ments of Americans ran away, "notwithstanding all the Solicita-
tious, Prayers and I might say Tears of Genl Washington."—From
the original letter, sold at auction, in Phila, April 14, 1890.

"The rebels, under direction of General Putnam, drew back
during this landing from the shore, to the wood between Cron
[Point] and Blumenthal [Bloomingdale], with a broken front,
sometimes the left, sometimes the right wing in advance; when
however the [British] regiments were collected in line on the shore,
and the drums gave the signal for the march, not a rebel awaited
our coming in order. The woods through the wood, notwithstanding
General Putnam made every effort to bring back the fugitives, but
it was in vain, and lucky for him, that he was able to escape on a horse. ..."—Baurmeister's narrative, in Mag. Am. Hist., I: 37.

James Thacher, M. D., records in his journal "When retreat-
ing from New York, Major General Putnam, at the head of three
thousand five hundred continental troops, was in the rear and the
last that left the city. In order to avoid any of the enemy that might
be advancing in the direct road to the city, he made choice of a road
parallel with and contiguous to the North River, till he could arrive
at a certain place, whence another road would conduct him in such
a direction as that he might form a junction with our army. It so
happened that a body of about eight thousand British and Hessians
were at the same moment marching on the road, which I thought
might have brought them in immediate contact with General Putnam,
before he could have reached the turn into the other road. Most for-
tunately, the British generals, seeing no prospect of engaging our
troops, halted their own, and repaired to the house of a Mr. Robert
Murray, a quaker and friend of our cause; Mr. Murray treated
them with cake and wine, and they were induced to tarry two hours
THE ICONOGRAPHY OF MANHATTAN ISLAND

or more, Governor Tryon frequently joked her about her American friends. By this happy incident General Putnam, by continuing his march, escaped a encounter with a greatly superior force, which must have proven fatal to his whole party. One half hour, it is said, would have been sufficient for the enemy to have secured the road at the turn, and entirely cut off General Putnam's retreat. It has since become almost a common saying among our officers, that Mrs. Murray saved this part of the American army.

"... Gen Washington at first consented to his troops marching forward to give them battle; but on a second consideration, counter-ordered, as he could not have any dependence on the militia and the flying camp, which composed half the number then present. When the Americans were withdrawn, and no prospect of action remained, the British generals repaired to the house of Mr. Robert Murray, a gentleman of the name of the American revolution. The house of the family, they entertained them most civilly, with what served for, or was cakes and wine. They were well pleased with the entertainment, and tarried there near upon two hours or more. Gov. Tryon seasoning the repast, at times, by joking Mrs. Murray about her American friends, for she was known to be a steady advocate for the liberties of the country. Meanwhile, the Hessians and the British, except the corps which moved down the road to take possession of the city, remained upon its arms inactive; which gave Gen. Putnam the opportunity of escaping with about 3500 men, including the guards, who had been left to shift for themselves, when Col. Glover had been ordered away from New York. Col. Grayson has repeatedly said, speaking humorously, "Mrs. Murray saved the American army." -William Gordon, Hist. of the Am. Rev. War, 29. Establishment of the U. S. of Am. (1st ed., London, 1788), II: 328-29.

When Washington reached the vicinity of the Robert Murray estate, on the summit of the present Murray Hill, in the vicinity of Fourth Ave. and 36th St., he found the militia retreating in disorder along both the cross and the Post roads, and Fellows' brigade just coming on to the field. The general, with Putnam and others, was then on the rising ground in the vicinity of the present Forty-second Street reservoir. In a very short time Parsons and his regiments arrived by the Bloomingdale Road, and Washington in person directed them to form along the line of the Post Road in front of the enemy, who were rapidly advancing from Kip's Bay. "Take the walls!" "Take the cornfield!" he shouted; and Parsons' men quickly ran to the wall, and the line of New York was confused and disordered under his general did his best to get them into line on the ground, but found it impossible, they were so dispersed, and, moreover, they were now beginning to retreat. ... -Campaign of 1776, 234-40. This account accords with the testimony of a court of inquiry respecting the retreat, which Johnston published in ibid, part 2, 92-99.

James T. Kitzer, M. D., commenting on the panic of the American troops, wrote in his journal, under date of Sept. 20: "His Excellency [Gen. Washington], distressed and enraged, drew his sword and snapped his pistols, to check them; but they continued their flight without firing a gun; and the General, regardless of his own safety, was in so much haste, that one of his attendants seized the reins, and gave his horse a different direction." -Military Jour. during the Am. Rev. War, 70.

Lieut. Tench Tilghman, Washington's aide-de-camp, in a letter of Sept. 16 to his father, stated that "... the General did all in his power to convince them they were in no danger. He had his Cane over many of the officers who showed them the example of running. These were militia, the New England Continental Troops are much better. ..." -Campaign of 1776, part 2, 86.

Dr. Stiles recorded in his diary, under date of Nov. 10, a letter he had received from Gen. Greene, which stated that "The 2 Brigades run away from about 40 or fifty men, and left Gen. Washington standing alone within a hundred yards of the Enemy. This disagreeable circumstance made last the Retreat very disagreeable." Sept. 1776 -From the original MS. in Yale Univ. archives cited in Battle of 15 Harlem H'ts, 161.

I am told by Gen. Washington by Thomas Vaux, that Gen. Washington threw his hat on the ground, and exclaimed, "Are these the men with which I am to defend America?" But several things may have weight here— the wounds received on Long Island were yet bleeding; and the officers, if not the men, knew that the city was not to be defended. Maj. Chapman was killed, and Brig. Maj. Wyllis was taken prisoner. A few others were killed, wounded, and taken prisoners. The Americans retracted up the island; and some few, who could not get out of the city that way, escaped in boats over to Paulus Hook, across the river. The house, in the fort at Horn's Hook, was set on fire by a shell, and burnt down. The fort was afterwards abandoned." -From Gen. Heath's Memoirs, cited in Battle of Harlem H'ts, 170. See also Bancroft's observations, regarding Washington's retreat, in a bibliographical note on the events of this day, in Hist. of the U. S. (first ed., 1866), IX: 122.

A company of artillerymen commanded by Capt. Sebastian Bauman occupied Bayard's Hill fort, and then escaped along the North River as far as the "Glass House," where after occupying a small redoubt they appropriated boats and crossed the river at night with their howitzers. -Battle of Harlem H'ts, 86-88, citing Bauman's manuscript, undated.

In Private Martin's account of the route, he wrote: "... the demons of fear and disorder seemed to take full possession of all and everything on that day. When I came to the spot where the militia were fired upon, the ground was literally covered with arms, knapsacks, stores, coats, hats and old oaks, perhaps some of those from the Madeira town cellars in New York. ..." -Campaign of 1776, 276, par. 8.

Maj. Nicholas Fish, writing on Sept. 19 to John McKesson, secretary of the New York convention, observed that "the Panic seized as well Officers & those of distinction as Men, in so much that it magnified the Number of the Enemy to thrice the Reality & generated substances from their own shadows, which greatly assisted them in their flight to the Heights above Harlem." -Hist. Mag., 14 sect. 57, p. 52 Indepedence of the U. S. of Am. (1st ed., London, 1788), II: 328-29.

Col. Smallwood wrote to the Maryland convention on Oct. 12: "I have often read and heard of instances of cowardice, but hitherto have had but a faint idea of it till now. I never could have thought human nature subject to such baseness. I could wish the transactions of this day blotted out of the annals of America. Nothing appeared but fright, disgrace, and confusion. Let it suffice to say, that sixty Light Infantry, upon the first fire, put to flight two brigades of the Connecticut troops—wretches who, however strange it may appear, from the Brigadier-General down to the private sentinel, were caned and whipped by the Generals Washington, Putnam, and Milifia, but even this indignity had no weight, they could not be brought to stand one shot." -5 Am. Arch., II: 1014. Oct. 12, 1776. "The New York Journal," Nov. 27, that "Mr. Washington, presently after the landing on New York Island, narrowly escaped being made prisoner. He left Mr. Apthorp's house, at Bloomingdale, a few minutes only before the British Light Infantry entered it." -5 Am. Arch., II: 946. Howe made his headquarters at the Apthorp house, which was at the present 9th Ave. between 90th and 91st Sts... -Lamb, Hist. of the City of N. Y., II: 128-39. Cf. 1776.

Lieut. John Heinrichs, writing on Sept. 18 at "Hornhook" [Horn Hook], thus describes the capture of Manhattan Island: "Briefly; in the afternoon this part of the island was ours. ... I had the right wing of the out-post; we marched towards King's Bridge, consequently I came close on the East River, which is lined with the finest houses. I had the pleasure of taking possession of all these houses, together with the hostile battery, where I found 5 cannons; the rebels all fled. All the houses were crammed with furniture, rural riches, and jewels; the people however had all fled, and left their slaves behind. By the next day one proprietor after another came back and joyous tears of gratitude rolled down the faces of these formerly happy people, when they found again their houses, fruits, cattle, and all their furniture, and heard from another, he had merely taken possession and delivered their property back to their hands." -Battle of Harlem H'ts, 272-78, citing Schlager's "Briefwechsel meist historischen und politischen Inhalts," Vol. II, Part vii, p. 99; Jay Pamphlets. For another translation, see Munnell's Hist. Series, No. 18, p. 189.
The enemy, on landing, immediately formed a line across the Island. Most of our people were luckily north of it, and joined the army. The few that were in the city crossed the river, chiefly to Paulus-Hook, so that our loss in men, artillery, or stores, is very inconsiderable; I don't believe it exceeds one hundred men, and I fancy most of them, from the situation of their conduct the evening previous. The enemy landed the main body of their army, took possession of the city, and marched up the Island, and encamped on the heights extending from McGown's and the Black-Horse to the North River. — Five Am. Arch., II: 38.

Gen. Greene, writing on Sept. 17 from the "Camp at Harlem Heights" to Gov. Cooke of Rhode Island, says in regard to the retreat from Long-Island, and the evacuation of New York: "The retreats were both judicious and necessary, our numbers being very insufficient to hold such an extent of ground. His Excellency had proposed to evacuate the city and suburbs of New York some time before the enemy made their last landing, and had the Quarter-master-General been able to furnish the necessary wagons to remove the stores and baggage, the retreat would have been effected in good order. But they delayed their landing twenty-four hours longer. Almost all the old standing regiment was drawn out of the city, in order to oppose the enemy at Hell-Gate, where they made an appearance of a very large body of troops, and movements as if they intended a landing. "We made a miserable, disorderly retreat from New-York, owing to the disorderly conduct of the Militia, who ran at the appearance of the enemy's advance-guard; this was General Fellows' brigade. They struck a panic into the troops in the rear, and Fellows' and Parsons' whole brigade ran away from about fifty yards, and left his Excellency on the ground within eighty yards of the enemy, so vexed at the infamous conduct of the troops, that he sought death rather than life. "The retreat was on the 14th [error for 15th] of this instant, from New-York; most of the troops got off, but we lost a prodigious deal of baggage and stores..." — Five Am. Arch., II: 369-70.

Vice Admiral Lord Viscount Howe, in a letter to Mr. Stevens, written on board the "Eagle, New York River" (East River) on Sept. 18, describes the movements of the Navy during these operations. He states, among other things, that, on the night of the 15th, the enemy directed his fire upon the ships & field pieces while he was burning them, with no other effect than that of obliging the ships to move their stations, the Repulse excepted. The Renown returned on this side the town, but the two frigates remained still in the North river, with the Tryal armed schooner, to strengthen the left flank of the army, extending to the western shore of York-Island. ... — Five Am. Arch., II: 377-80.

The chaplain of an American regiment stationed at "Powell's Hook" records in his journal that "After Long-Island was evacuated, it was judged impossible to hold the city of New York, and that for several days the artillery and stores of every kind had been removing, and last night the sick were ordered to Newark, in the Jerseys; but most of them could be got no farther than this place and Hoebuck, and as there is but one house at each of those places [evidently for the sick], many were obliged to lie in the open air till this morning, whose distress when I walked out at day-break gave me a lively idea of the horrors of war than any thing I ever met with before. ... "About eleven o'clock a furious cannonade was heard a little above New-York, and before night numbers came over from the city and informed that it was evacuated by our troops, and about seven o'clock we saw the tyrant's flag flying on Fort George." — Five Am. Arch., II: 460-61.

"The same day the Enemy ... encamped on York Island across about the Eight Mile Stone & between that & the Four Mile Stone." — From letter of Gen. Geo. Clinton, dated Sept. 21, in N. Y. City during the Am. Rev. (1861), 111. A footnote states that "The eighth mile-stone on the old Boston road, measured from the old City Hall in Wall street, must not be confounded with the eighth mile-stone on the present road running north from the city. The former was, probably, near the present suburban village of Yorkville." — Ibid., 111.

Gen. Howe immediately chose for his headquarters the country seat of Dr. James Beekman, on East River, near the present 52d St.; he remained there seven and a half months. —Misc. Com. Gen. 1854, 554. For a view of the house, see ibid. (1864), opp. p. 496. Cf. reference to Atoptor house, supra; and S 16.

A view of the city from the south-east, in pen and ink, probably drawn between this date and Sept. 21, and showing the English fleet off the northern end of Governor's Island, is reproduced and described in Vol. I, Pl. 47-a. A similar view from the north-east, made during the same period from a point just north of the Rutgers house, which appears in the foreground, is shown on Pl. 47-b, Vol. 1.

"The Asia, and two other ships of war proceeded up the North River, but were roughly handled by our battery at Powells Hook; and the next morning by day light, the Asia came down much faster than she went up, the three ships of war being nearly all destroyed by four of our fire ships that run in among them." — N. Y. Misc. (Newark ed.), S 21, 1776. See also Five Am. Arch., II: 460-61.

British brigades and regiments are landed, and guards are posted "in & about New York." The general orders contain, in part, the following provisions: "M. G. Robinson & Lieut. Go. of British N. Y.; "His Excellency Lt. Gen. H. Hunter will be pleased to remove his Camp from Brook-line to Hell Gate in Long Island & encamp on the Heights, where the Brigade of Guards Where [were] Encamp'd; "Capt. Grant New York Comp. to be posted in the Battery in Brooklyn Height & to report to Maj. Gen. H. Robinson Commandant in New York;" "The Turtle Bay & Bravos Guard to be taken by the Brigade of Guards; & Lieut. Gen. H. Robinson & these Guards to Mount Immediately;" "All Rebel Prisoners to be kept in New York, in the Hosp [or wherever M. G. Robinson shall think proper;] "the Camp Equipage of The Army to be Brought Over As Soon as Possible. Magazines & Stores left in New York, are to be secured For his Majesty. The Barrack Master Gen'ls is Order'd to take Possession of all Empty Houses, he shall judge Necessary For the More Effectually carrying on the Kings Service. "and the Commanding Officer of that Quarter will Aford him any Assistance, he may require For the Above Purpose." — From the British Orderly Book of 1776-1777, preserved in the N. Y. H. S.

"This morn a Batt' of L. I. advanced by Jones's house on our left, but going too far were Attacked by a number of the Rebels, & would have been cut off if they had not been well supported by the guards & some field pieces. The fighting lasted for some hours — Two men of War went up the N. R. & lay opposite our left flank." — Robinson's Jour. (MS.).

Pastor Shewkirk's diary, under this date, states that the English troops this forenoon were "drawn up in two lines in the Broad Way; Governor Tryon and others of the officers were present, and a great concourse of people. Joy and gladness seemed to appear in all countenances, and persons who had been strangers ... were now very sociable together, and friendly. ... The first that was done was, that all the houses of those who have had a part and a share in the Rebellion were marked as forfeited. ..." — Campaign of 1776, part 2, 117-18.

"The Commander in chief was pleased to direct William Butler Esq to take an account of all the derelict property, & make report every evening of his proceedings to Gen Gen'l Robertson then Commander of the City." — From the "Case of William Butler, Esq." in N. Y. City during the Am. Rev., 150. This statement is followed by an account of the methods of military administration during the British occupation, with particular reference to the use of private property for the storage of supplies, for dwelling houses, barracks, etc. See also D 27, 1777.

"A resident of New York, of loyalist sympathies, wrote on Sept. 23, as follows: "The Day after the City was taken I repaired to it, and found it a most dirty, desolate and wretched Place. My House had been plundered by the Rebels of almost everything I had left behind;" — St. James's Chron. (London), N 7-9, 1776. Regarding the condition of the city, see also Winsor, VII: 337.
The general orders, issued from the American headquarters on Harlem Heights, between the 2nd and 17th, provided for the evacuation of the New York harbor by the British under Washington. 

The distance large seems short to was but ters with having killed after of consisting three advanced Lieutenant-Colonel Gov. plain, deserted yet of missing and consequences, and blankets, our People with deserted on our People were overstocked."—5 Am. Arch., II: 351.

Writing on Sept. 17 from headquarters, at Col. Morris's house, to Gov. Cooke of Rhode Island, Washington told the following story of the battle: "I am now encamped on the Heights above mentioned, which are so well calculated for defense, that I should hope that if the enemy make an attack, and our men will behave with tolerable resolution, they must meet with a repulse, if not a total defeat. They advanced in sight yesterday [Sept. 16] in several large bodies, but attempted nothing of a general nature, though in the forenoon there were some smart skirmishes between some of their parties and detachments sent out by me, in which I have the pleasure to inform you our men behaved with bravery and intrepidity, putting them to flight when in open ground, and forcing them from places to pursuit of others captured, two of the wounded men which fell into our hands, the appearance of blood in every place where they made their stand and on the fences as they passed, we have reason to believe they had a good many killed and wounded, though they did not leave many on the ground. In number our loss was very considerable, but in the fall of Lieutenant-Colonel Knowlton, I consider it as great, being a brave and good officer; and it may be increased by the death of Major Leitch, of the Virginia regiment, who unfortunately received three balls through his side."—5 Am. Arch., II: 369. See also Washington's account, dated Sept. 23, written to Abraham Yates, Jr., president of the convention of the state of New York.—Ibid., II: 466-67.

Gen. Geo. Clinton, writing from Kingston on Sept. 18, reported to the committee of the New York convention: "On Monday morning [Sept. 16], about ten o'clock, a party of the enemy, consisting of Highlanders, Hessians, the Light Infantry, Grenadiers, and English troops, (number uncertain) attacked our advanced party, commanded by Colonel Knowlton, at Martje Davey's Fly. They were opposed with spirit, and soon made a retreat to a clear field, south-west of that about two hundred paces, where they loaded their muskets behind a fence covered with bushes. Our people attacked them in front, and caused them to retreat a second time, leaving five dead on the spot. We pursued them to a buckwheat field on the top of a high hill, distant about four hundred paces, where they received a considerable reinforcement, with several field-pieces, and there made a stand. A very brisk action ensued at this place, which continued about two hours. Our people at length were forced by them a third time to retreat, and caused them to fall back into an orchard, from thence across a hollow, and up another hill not far distant from their own lines. A large column of the enemy's army being at this time discovered to be in motion, and the ground we then occupied being rather disadvantageous, a retreat likewise, without bringing on a general action, (which we did not think prudent to risk,) rather insecure, our party was therefore ordered in, and the enemy was well contented to hold the last ground we drove them to.

"We lost, on this occasion, Colonel Knowlton, and sixteen privates, killed. Major Leitch, from Virginia, and about eight or ten subaltern officers and privates wounded. The loss of the enemy is uncertain. They carried their dead and wounded off, in and soon after the action; but we have good evidence of their having upwards of sixty killed, and violent presumption of one hundred. The action, in the whole, lasted about four hours.

"I consider our success in this small affair, at this time, almost equal to a victory. It has animated our troops, gave them new spirits, and erased every bad impression the retreat from Long Island, &c., had left on their minds. They find they are able, with inferior numbers, to drive their enemy, and think of nothing now but conquest."—5 Am. Arch., II: 369.

Gen. Geo. Clinton writing on Sept. 21 to Dr. Peter Tappan, thus described the battle: "Our Army at least one Division of it lay at Colr. Morris's & so southward to near the Hollow Way which runs across from Harlem Plat to the North River at Martje Davie's Fly About half way between which two Places our Lines run across the River which indeed at that Time were only begun but are now Sept. 21. A very defensible stand. On My March Enemy attacked our Advanced Party Commanded [by] Colr. Knowlton (a brave Officer who was killed in the Action) near the Point of Martje Davie's Fly the Fire was very brisk on both sides our People however soon drove them back into a Clear Field about 200 Paces South East of that where they lodged themselves behind our People pursuing them but being obliged to stand exposed in the open Field or take a Fence at a Considerable Distance they preferred the Latter it was indeed advisable for we soon brought a Couple of Field Pieces to bear upon them which fairly put them to Flight with two Discharges only the Second Time our People pursued them closely to the Top of a Hill about 400 paces distant where they received a very Considerable Reinforcement & made their Second Stand Our People also had received a Considerable Reinforcement, and at this Place a very brisk Action commenced which continued for near two Hours in which Time we drove the Enemy into a Neighbouring orchard from that across a Hollow & up another Hill not far Distance from their own Encampment, here we found the Ground rather Disadvantageous & a Retreat insecure we therefore thought it better to retreat farther & retire our Enfield as far as leaving the Enemy on the last Ground we drove them to—that Night I commanded the Right Wing of our advanced Party or Picket on the Ground the Action first began. "..." The American loss in killed and wounded, he states, was about 79; and the British, about 300.—N. Y.: City during the Am. Rev., 111-13.

A report printed in Newark on Sept. 21, stated that the British attack was first "near the Blue Bell."—N. Y.: Misc. (Newark ed.), S 24, 1776.

Col. Reed, who took part in the battle, writing to Mrs. Reed on Sept. 22, gives another account of the engagement, and among other things says: "Our greatest loss is poor Knowlton, whose name and spirit ought to be immortal. I assisted him off, and when gasping in the agonies of death, all his inquiries was if we had driven in the enemy." Referring to the success of the patriots, Col. Reed says: "You can hardly conceive the change it has made in our army. The men have recovered their spirits, and feel a confidence which before they had quite lost. I hope the effects will be quite lasting. ... I suppose many persons will think it was rash and imprudent for officers of our rank to go into such an action. General Putnam, General Greene, many of the Generals family, Mr. D'Estaing, &c., were in it; but it was really to animate the troops, who were quite dispirited, and would not go into danger unless their officers led the way."—5 Am. Arch., II: 444. The same letter, in modified form, is printed by Johnston in The Battle of Harlem Heights, 176-59, citing the Reed Papers, N. Y. H. S.
1776 Another account of the death of Knowlton, by an officer who assisted him from the field, is contained in ibid., 154-55, citing the Conn. Gaz. (New London), S 27, 1776.

A letter written at headquarters on Sept. 17 (by whom does not appear), regarding the battle of Harlem Heights, states that: "Yesterday [Sept. 16] the Regulators came within half a mile of our lines, and made a stand. A few of our scouts, who were out, attacked and drove them off. In two hours after, two thousand of them returned. General Beall sent out three companies of Riflemen, under the command of Major Mantsz, who attacked them. Immediately General Washington reinforced with the remainder of our brigade, together with General Weedon's regiment from Virginia, Major Price's three independent companies, and one regiment of Rhode-Islanders. Never did troops go to the field with more cheerfulness and alacrity; when there began a heavy fire on both sides. It continued about one hour, when our brave Southern troops dislodged them from their posts. The enemy rallied, and our men beat them the second time. They rallied again; our troops drove them the third time, and were rushing on them, but the enemy had got on an eminence, and our troops were ordered to retreat, the General considering there might be a large number of the enemy behind the hill, concealed." Among the wounded were Captain Low and Major Leitch; and "Colonel Knowlton, from Boston, killed in the field, who distinguished himself at Bunker's Hill, as well as in this engagement. He will be interred to-day, with all the honours of war."

17—71

It was stated in a letter from Baltimore that Maj. Leitch was in command of three companies of Colonel Weedon's regiment of Virginians. Col. Knowlton's "Rangers" were composed of volunteers from different New-England regiments.

"By a Sergeant who deserted from the enemy, and came in this morning, we were informed that their party consisted of the Second Battalion of Light Infantry, a battalion of Royal Highlanders, and three companies of the Hessian Riflemen, under the command of Brigadier-General Leslie. The deserter reports that their loss, in killed and wounded, amounted to one hundred and forty, about forty of which we found dead on the field, and buried. [Cf. p. 1017.]

"On the whole, the enemy got completely defeated, which has given great spirits to our army, who are encamped on the heights at Harlem, where they are advantageously posted, and in high spirits, waiting the attack of the enemy.

"By letters received from New-York, we are informed that the enemy were encamped about two miles from Head-Quarters; that they were landing their artillery from Long-Island at Horn's Hook; and that an attack was shortly expected on our lines, which were very formidable."—Ibid., II: 717-72.

[Order recorded in his journal on the day of the battle, that in "the action on Vanwaker's Heights, near Harlaem, on New York Island," he procured two brass 3-pounders, and there being no horses near McGown's, where the cannon were, he had them hauled by hand into position to prevent the Americans getting around the British left, "and 60 rounds from each were fired."

—Monroe's Jour., 121.

Lieut. John Heinrichs, writing on Sept. 18 from a point "two yards from Hornkog," states that he was wounded in this battle and adds: "To whom could I more safely go, and who would receive me in a more friendly manner than they who had but yesterday called me their beneactor, their preserver! As I do not like noise, now still less than ever; I selected for myself, although I could have chosen a better house on the Boulevard, or one of a New York preacher, Ogilby [former rector of St. George's Chapel in Beekman St.] had fled with a numerous family of children and step-children. Not far distant was the house or rather the palace of her old father, who had a storehouse full of porcelain, wine, and brandy, but had lost nothing from it."

"All these people came back last evening; and the emotion I felt on seeing mother and children, grandfather and grandchildren, 80 down to the black children of the slaves, hugging and kissing each other, so affected my wound, that I got a fever. . . . —Battle of Harlem Heights, 228, citing the "Jay Pamphlets."

See also the following accounts of the battle: James S. Martin's (error for Joseph Plumb Martin's) Narrative (1890), cited in Campaign of 1776, part 2, 81-84; Lieut. Tench Tilghman's letter to his father, Sept. 17, 1776. David Humphreys' account, ibid., 90-91; Raumer's narrative in Mag. of Am. Hist., 1: 37; and the additional documents in ibid. (1882), VIII: 39-49; extracts from the journal of the Hessian Gen. von Heister, and the diary of Capt. von Walzburg, pub. in Battle of Harlem Heights, 224-26.

... Some few days after this Happened a New England Captain Was Dressed in Woman's apparel arm'd With a Wooden gun & Sword & Drum out of the army for Cowardice. . . . —From The Journal of William Beatty, of the Maryland Line, 1776 to 1780, in Hist. Mag., 3d ser., I: 79.

"In y^ Afternoon we heard many Reports of y^ Bad Success of our Army, which seem'd to Very much in y^ Telling, so y^ it seems very doubtful whether any of them are worthy of Credit or not."—Diary of Jabez Fitch (MS.), 42.

It is stated in the British orders of the day that: "The Com^ in Chief Entertains the Highest Opinion of the Bravery of the few troops that Yesterday beat back a Very superior Body of the Rebels, and he desires to return Thanks to the Batt^ and to the Officers and Men of the Artillery, that came to their Support, with that Expediti on whi Strongly marks the Prevailing spirit in The Army, and wich Properly temper'd must Always Insure Success to his Majesty's Arm's, but at the same time he finds Himself under a Necessity of Disapproving Want of Attention in the Light Com^ persuing The rebels without that proper Discretion To be Observe'd when their is not troops to Support.—The Gen^ has also much Satisfaction in taking notice, of the steady Behaviour of the troops under the Com^ of Lt Gen^ Clinton, who made good the decent of this Island on the 15^p. Day—Four Days Provision from the 18^p. to the 22^p. and the exclusive will be Journ^ed to them in 2 or 3 Days as last it can be Landed.—The Com^ of Officers of Brigades will press all the Waggon^, and cartis, In Possession of the Corps and Employ them For Bringing up Provisions for the troops Without loss of time.—From Orderly Book, British Army (MS.), in N. Y. H. S. Regarding the campaign around New York, see Winsor, VII: 323, with map p. 494.

Washington thanks the troops in general orders for their conduct the day before, which shows "What may be done where Officers and Soldiers will exert themselves.—From Orderly Book, McDougall's Brigade (MS.), in N. Y. H. S.

"Col. Knowlton . . . will be interred to-day with all the honours of war.—From a letter of this date addressed to a gentleman in Annapolis, in Battle of Harlem Heights, 157. For the exact place of burial, see ibid., 79.

Pater Shewkirk's diary contains this entry: "... (everything was) pretty quiet, though almost daily they brought in prisoners, who were lodged in the Dutch and Presbyterian churches . . ."

—The Campaign of 1776, part 2, 118.

A letter, written by John Oouthout, Jr. (probably about 1855) to Frederic De Peyster, states that early in the Revolution, when the British converted the Middle Dutch church into a riding-school for their dragoons by removing the pulpits, gallery, pews, and floor of, his father obtained from Lord Howe permission to take down the bell, which was the one presented to the church by the will of Abraham De Peyster in 1728 (q.v.). This he stored in a secure and secret place, where it remained some years after the British army evacuated the city, until the church was repaired and re-opened.—De Witt's Discourse (1857), 97-98. This bell remained in the Middle Dutch Church until it was dismantled in 1844, when it was removed to the Dutch Church in 9th St. near Broadway. It remained there until 1855, when it was placed in the Dutch Church in Lafayette Pl.—Ibid. It was later hung in the tower of the Dutch Reformed Church at Fifth Ave. and 48th St.—Brief Account of am Hist. church (1904), 56.

Among the orders of the day, of the American troops on Harlem Heights, is this: "The Brigade Majors are immediately to settle a Court-Martial for the trial of prisoners, to meet at the white house near Head-Quarters."—5 Am. Arch., II: 38.

Lieut. Col. Lewis Morris, Jr., writes to his father: "We . . . are now upon the Heights above Harlem where we shall do or die."

—N. Y. H. S. Collections (1873), VIII: 145. A postman's despatch is published by Rev. Charles Inglis of Trinity opens "one of the churches" and holds service.—Doc. Hist. N. Y. (40 ed.), III: 634. See Ag. 17, and S 22.

Gen. Geo. Clinton, writing from Kingsbridge, reports to the "Committee of New-York Convention" the events of the last few days in and around the city. Since the battle of Harlem Heights, Aero stockade (q.v.) happened. The enemy keep close to their lines. Our advance parties continue at their former station. We are daily throwing up works to prevent the
enemy's advancing. Great attention is paid to Fort Washington, the posts opposite to it on the Jersey shore, and the obstructions in the river, which, I have reason to believe, are already effectual, so as to prevent their shipping passage; however, it is intended still to add to them, as it is of the utmost consequence to keep the enemy below us. . . . —Am. Arch., II: 383-84. The original of this letter is in the N. Y. H. S.—Battle of Harlem Heights, 139-42.

Gen. Glover writes, from "Burnett's Ferry" to Washington: "The Enemy are forming an encampment on the edge of the North River, about one mile below the ground where the battle was fought on Monday last. I have moved the Brigade up the hill about one and a half [miles] from the Ferry.

Colonel Bradley's Regiment is posted between my Brigade & Pillow's Husks. The Asia Man of war passed by that post, nine o'clock this morning. Colonel Darke saluted her with five shot—thirty two pounders, which was not returned."—Gloer Correp., (M.S.), part 2, p. 1.

Lieut. Heinrichs, a Hessian officer wounded in the battle of the 16th (p. 19), in a letter of this date, written at Harlem, near "Horn-Huck" (Horn's Hook), thus describes the city: "The Island of New York is the most beautiful island I have ever seen. No superuous trunk, no useless twig, no unnecessary stalk, can here be found. From the towers surrounded by the gardens, or by the tall-stalked orchards, meadows, and gardens full of fruit-trees, and single ones scattered over the hills, with houses attached, line both sides of the river, and present to the eye a beautiful scene. The houses, which are two stories high and painted white, are encircled by a piazza, and have a weather-vane on top. They are also surrounded by beautiful walkes, and are built and furnished in the best of taste."—From Letters of Hessians and Hessian Officers during the Am. Rev. in Munsefl's Hist. Ser., No. 18, 201-2.

This date is found on one of Archibald Robertson's drawings (No. 367—see July 12), entitled "View of Long Island & East River from my Quarters on N. York Island. 18th Sept. 1776."

Admiral Lord Howe and Gen. Howe, "the King's Commissioners for restoring Peace to His Majesty's Colonies and Plantations in North America," issue at New York the following proclamation or "Declaration:"

"Although Congress, whom the misguided Americans suffer to direct their opposition to a reestablishment of the Constitutional Government of these Provinces, have disavowed every purpose of reconciliation not consonant with their extravagant and inadmissible claim of Independence, the King's Commissioners think fit to declare that the loyal and law-abiding subjects of His Majesty's well-affected subjects, upon the means of restoring the public tranquillity, and establishing a permanent union with every Colony as a part of the British Empire. The King being most graciously pleased to direct a revision of such of his royal instructions to his Governors as may be construed to lay an improper restraint on the freedom of legislation in any of his Colonies, and to concur in the reversal of all the orders which His Majesty's subjects there may think themselves aggrieved; it is recommended to the inhabitants at large to reflect seriously upon their present condition and expectations, and judge for themselves whether it be more inconsistent with their honour and happiness to offer up their lives as a sacrifice to the unjust and precarious cause in which they are engaged, or return to their allegiance, accept the blessings of peace, and to be secured in a free enjoyment of their liberties and properties, upon the true principles of the Constitution."—From one of these original broadsides, in the author's collection; see also 5 Am. Arch., II: 398.

An American "Declaration," answering this, is in the form of a traverse, signed with the names of the Howes and purporting to be an explanation of their "Declaration."—Ibid. For another proclamation by the commissioners, see N. Y.

The Britists of the day professed that: "No Officers are to be taken Possession of Houses in New York but by Application to Maj' Genl Robertson;" "The Commissary Genl of stores & Commissary Genl of Artillery's or their deputy's To attend and take Charge of all stores left by the Rebels in the Island of New York;" "A Guard of an Officer and 20 Men from the Brigade of Guards to do duty at Greenwich to Prevent the boats to and from Staten Island. This Guard to Parade at 4 O'clock This Afternoon, A Guide will attend to Conduct them. The Capt's of Guides and all the Guides of duty to attend at head Quarters daily at Orderly time and there to remain Till Dismiss'd—L. Genl 1st Earl Percy Orders care to be taken by the Regt to not to Burn any straw Near the store houses."—From Orderly Book, British Army (M.S.), in N. Y. H. S. Washington writes from the Morris house to the president of congress, that the British "are bringing many of their heavy cannon towards the heights. . . . They have also eight or nine ships of war in the North River, which, it is said, are to cannonade our right flank, when they open their batteries against our front." He plans "to maintain the post so long as it shall appear practicable and conducive to the general good."—5 Am. Arch., II: 398-99.

The general orders, issued from "Head-Quarters, Harlem Heights," contain praise for the British policy "to refrain every kind of abuse of private property." They also express complaint that "the abandoned and profligate part of our own army, countenanced by a few officers, who are lost to every sense of honour and virtue, as well as their country's good, are by rapine and plunder spreading ruin and terror wherever they go; thereby making themselves, in all probability, to be the common enemy they are come to oppose." . . . The General [Washington] . . . is determined to show no favour to officer or soldier who shall offend herein, but punish without exception every person who shall be found guilty of this most abominable practice, which, if continued, must prove the destruction of any army on earth."—5 Am. Arch., II: 417-14.

Trench Tilghman, Washington's aide, writes to his father: "An Ensign is to be tried for marauding to-day; the Gen'l will execute him if he can get a Court Martial to convict him."—Campaign of 1776, part 2, 87.

In a letter to the Massachusetts assembly, Washington writes "in a cursory, rough way, an account of the most material events from the battle on Long-Island to the present moment."—5 Am. Arch., II: 399-401.

Lord Howe, from the "Eagle off New-York," writes to Lord Germain: "Finding in a conversation with Mr. Sullivan, a Major General in the rebel army, taken prisoner in the action of the 27th of August [p. 20], that the leaders of the disaffected Americans, profest to understand the powers delegated by the King's commission, were restricted to granting pardons and declaring the Colonies at war: under this without authority in this matter, to exercise more matters, I thought proper to inform that gentleman, that the object of his Majesty's paternal desire was to make his American subjects happy, as well as to relieve them from the calamities of war—that the Commissioners were willing to consult and confer with any persons of influence, upon the means of attaining these ends; and that reconciliation, union and redress of grievances, might be the happy consequence. Mr. Sullivan hereupon proposed, and with General Howe's approbation, I consented, that he should go to Philadelphia, and undeceive those who appeared to entertain that confined opinion of the King's most gracious intentions. . . . On the 4th instant he returned, and acquainted me, that he had made known the sentiments I had expressed to him; and that according to the tenor of a resolution of Congress, three Deputies might be expected to be appointed by that province to ensue more particular inquiry into the grounds of the information he had communicated. . . . Although the object of this debputation apparently was to interrogate rather than to confer, General Howe concurred in opinion with me, that I should not, on that account, decline any proposition for a meeting.—We thought it material to controvert the real or affected ideas before mentioned, which had probably been circulated with a view to persuade the ignorant, that the offer of peace and pardon held forth in our Declaration of the 14th of July [p. 58], was merely an artifice to disarm them, and that their liberties and properties were only to be secured by a perseverance in their resolution, to throw off all dependence upon the King and Parliament of Great-Britain. . . ."

In the evening of the same day I received information that Doctor Franklin, Mr. John Adams, and Mr. Rutledge, would meet me, at any appointed place, on the morning of the 17th. General Howe's presence being that day necessary with the army, he could not accompany me to the meeting, which I appointed should be on Staten-Island, opposite to the town of Amboy. [For account of the conference, see S. 111.]

In consequence of the above-mentioned interview, we judged it necessary to publish the declaration [see S. 19] inclosed in our joint letter to your Lordship of this day's date. . . .

"I have only to add, that as the rebel army remains strongly posted at the north part of the island of New-York, and the
inhabitants who had fled, or been compelled to leave the city, before the King's troops took possession of it, are not returned; we have it not yet in our power, even were it expedient in the present moment, to effect the compleat re-establishment of the Civil Government of this district."—Candid Retrospect, 21-22, citing the Partition of Regency for 1794.

"Writing to Gen. Schuyler from the Morris house, Washington briefly reviews events since the retreat from Long Island. Of the battle of Harlem Heights, he says: "This little advantage has inspired our troops prodigiously; they find that it only requires resolution and good officers to make an enemy (that they stood in too much dread of) give way." He adds: "The British army lies encamped about two miles below us; they are busy in bringing over their cannon and stores from Long Island, and we are putting ourselves in the best posture of defence that time and circumstances will admit of."—5 Am. Arch., II: 416-17.

The British orders of the day provide that "the 4th & 5th Brigades will send one Carefull woman—to attend the Genl Hosp't at Hell gate the woman will be paid & Reliev'd weekly any one that Quits her duty will be immediately sent Home,—all the facines & Pickets made for the 4th & 5th Brigades of British & the Brigade of Stern will be Carried in the Waggons belonging to the Corp's to Joneses House near the north River, those Made by the Brigade of G 2nd & 6th Brigades to be sent in the same Manner to Major Musgroves avanc'd Post to the Left of Ave-Gowens House."—From Orders 49, British Army (MS.), in N. Y. H. S.

The many references to it in contemporary publications give a composite picture of the catastrophe which no modern summary of the facts could so graphically present. These are contained in the following excerpts from letters, newspapers, official documents, and other authoritative sources:

Kemble records in his journal: "Everything quiet till 12 at Night of this 20th & 21st in the morning, when the Town of New York took fire. The Wind blowing hard a South East. The fire was first discovered between 12 & 1 0 Clock in that block of Houses fronting Mr. Watt's near the Exchange, in a House facing the Water; from thence it ranged up the Broadway and Broad Street to the City Hall, one way, and near Smith's, the other, at Flatteningberg Hill. The other side of the Broad way was all consumed from Cortlandt House to Hills Tavern and from thence to St. Paul's Church, with all the buildings back of that to the North River.

"Many People taken up and confined on suspicion of setting the Town on fire, and it is not to be doubted; but it was done by design, Combustibles, Matches, &c. having been found in Houses since, hid under stairways, and ready for another Conflagration."—Kemble, in his Diary, Sept. 21 (1776), I: 208-9; The German Allied Troops in the No. American War of Independence, translated from the German of Max von Ebeling by J. C. Rosengarten (1843), 42.

Fitch records in his diary: "About one o'Clock in y' Evening We Observ'd a Considerable Light up toward y' Northward, which we sos'd to be y' burning of some Buildings; this Light continued while Day, & some Time in y' Morning we were Informed y' it was in y' City of N. York, & y' considerable part of y' City was Burnt, but we are yet Scarcely able to believe this Report."—Diary of John Fitch (MS.), 46.

A letter, written by a loyalist in New York on Sept. 23, states: "I flattered myself that the City would soon be peopled again, and that Matters would speedily be restored to their former State; but the threatenings our Calamities remained to determine this expectation. The Destruction of the City was resolved on, and a Number of Villains remained in the City concealed to execute this most diabolical Purpose. Accordingly, on the Thursday following, when every Thing was very dry, and a brisk southerly Wind blew, some of them set Fire to the Houses near Whitehall. The Fire instantly spread and raged with inconceivable Violence. There were few Citizens in Town; the Fire-Engines and Pumps were out of Order, 2 R egim ents of Soldiers were immediately ordered into Town, and many Boats full of Men were sent from the Fleet; to these, under Providence, it is owing that the whole City was not reduced to Ashes. The Destuction was very great; between a third and fourth of the City is burnt. All that is West of the New Exchange, along Bank and Broad streets to the North River, as high as the City Hall, and from thence along the Broad Way and North River to King's College, is in Ruins. St. Paul's Church and the College were saved with the utmost Difficulty. Trinity Church, the Lutheran Church, the Parsonage, and Charity School, are destroyed. Many of the Villains were apprehended, with Matches in their Hinds [sic] to set Fire to the Houses. A Fellow was seized, just about to set Fire to the College, who acknowledged he was employed for the Purpse. A New England Captain was sent, with Matches in his Pockct, who acknowledged the same. Between 1000 and 1500 Houses are burnt; and we are under the most dismal Apprehension that there are some more of those Villains concealed in Town to burn what is yet left. Our Distresses were very great, but this Calamity has increased them tenfold. Thousands are hereby reduced to Beggary. This infernal Scheme was confessedly executed to prevent the King's Troops from having any Benefit by the City, and to distress the Friends of Government. . . . the Continental Congress gave express Orders to burn this City if not tenable against the British Fleet and Army [per contra, see S. 3]. The City was set on Fire in four different Places at the same Time. Poor Trinity Church, a principal Object of Republican Independence, was set on Fire in three Places."—St. James's Chron., N. 7-9, 1776. Mr. Shelton, in The Journal of Samuel, 47 and 64, calls attention to the fact that the portion of this account referring to "A New England Captain" was omitted from the transcription in the 5 Am. Arch., II: 465. He presents other significant records which tend to confirm the opinion that the "Captain" referred to was Nathan Hale.

Ezra Stiles states in his diary, under date of Nov. 25, 1776, that of the many different reports of the fire, the one that was the first and most by far the best was that contained in "Mr. Gainer's N. York Mercury of 28. Sept. printed at Newark."—Literary Diary of Ezra Stiles, II: 83-84. That account states: " . . . That the fire originated at or near Whitehall, soon extended to the Exchange, took its course up the west side of Broadway as far as Varlettenberg Hill, consuming all the blocks from the Whitehall up. The flames extended across the Broadway from the house of Mr. David Johnston to Beaver Lane, or Fitcher's Alley, on the west, and carried all before it, a few buildings excepted, to the house at the corner of Berkeley-street, wherein the late Mr. Adam Vandenbergh lived, sweeping all the cross streets in the way. The buildings left standing on the west-side of the Broadway are supposed to be Captain Thomas Randall's, Capt. Kennedy's, Dr. Mallet's, Mr. John Cortlandt's sugar house and dwelling house, Mr. Jones's, Hall's tavern, St. Paul's, Mr. Axtell's and Mr. Rutherford's. The cause of the fire is not known. We imagine about a 6th part of the whole city is destroyed, and many families have lost their All."—N. Y. Merc. (Newark ed.), S 28, 1776.

Stiles also stated that there is another N York Mercury printed in the City of N. Y. at the printing office Mr. Gaine left which was printed by a Lyon. By a letter dated Dec. 1st. From S. W. Clothon, H. of Mr. Capt. H. (1776), I: 1208-9; The German Allied Troops in the No. American War of Independence, translated from the German of Max von Ebeling by J. C. Rosengarten (1843), 42.

Fitch records in his diary: "About one o'Clock in y' Morning We Observ'd a Considerable Light up toward y' Northward, which we sos'd to be y' burning of some Buildings; this Light continued while Day, & some Time in y' Morning we were Informed y' it was in y' City of N. York, & y' considerable part of y' City was Burnt, but we are yet Scarcely able to believe this Report."—Diary of John Fitch (MS.), 46.

The same paper of two days later (Sept. 30) gives the following full account: "On Saturday the 21st Instant, we had terrible Fire in this City, which extended as far as Oct. 1st. In that of the Oct. This Burning is ascribed to the N Enemy, pple. as of that Rome was to the Christians."—Literary Diary of Ezra Stiles, II: 83-84. The mention of the fire, to which Stiles refers was as follows: "The savage burning of this City by the New-England Incendiaries, will be a lasting Monument of their inveterate Malice against the Trade and Prosperity of this Colony, as well as their rooted Disaffection to British Law and Government. They had long thoughtened the Performance of this villainous Deed; and this is the best Return that the People of Property in this City, who have espoused their Cause, are to expect for their heedless Credulity."—N. Y. Merc., O 7, 1776.

The year 1776 was a year of unparalleled destruction. The fire which started on the morning of September 17, 1776, quickly spread through the city, destroying thousands of buildings and causing widespread panic and fear. The city was left in ruins, and many residents were left homeless. The fire was not only a physical disaster but also a symbol of the conflict between the colonies and Britain. The event would go down in history as the Great Fire of New York City.
other Precaution that was practicable to ward off the impending
Ruins. Lord Howe ordered the Bows of the Fleet to be manned, and
after landing a large Number of Officers and Seamen to assist us,
the Boats were sent with such Speed to the City in the North and
East Rivers; and the Lines near the Royal Arsenals were extended
across the Island, as it manifestly appeared the City was designedly
set on Fire.

"The Fire . . . swept away all the Buildings between Broad
Street and the North-River, almost as high as the City-Hall and
from thence, all the Houses between Broad-Way and the North-
River, as far as King's College, a few only excepted: Long before
the main Fire reached Trinity Church, that large, ancient and venerable
Edifice was in Flames, which baffled every Effort to suppress them.
The Steeple, which was 140 Feet high, the upper Part of Wood, and
placed on an elevated Situation, resembled a vast Pyramidal Fire,
and exhibited a most grand and awful Spectacle. Several Women
and Children perished in the Fire, their shrill cries, joined to the
roaring of the Flames, the Crash of falling Houses, and the wide
spread Ruin which every where appeared, formed a scene of Horror
grand beyond Description, and which was still heightened by the
Darkness of the Night. Besides Trinity Church, the Rector's House,
the Charity School, the old Lutheran Church, and many other fine
Buildings were consumed. St. Paul's Church and King's College
were set on Fire, but saved with very great Difficulty. After raging
about 10 Hours, the Fire was extinguished between 10 and 11 o'Clock, A.M.

". . . several Persons were discovered with large Bundles of
Matches, dipped in melted Rosin and Brimstone, and attempting
to set Fire to the Houses. A New-England man, who had a Cap-
tains Commission under the Continental Congress, and in their
Service, was seized with these dreadful Implements of Ruin—on
being searched, the Sum of goods was found upon him. General
Robertson rescued two of those Incendiaries from the enraged Popu-
lace, who had otherwise consigned them to the Flames, and re-
served them for the Hand of deliberate Justice. One Wright White,
a Carpenter, was observed to cut the Leather Buckets which con-
veyed Water—he was also wounded, with a Cutlass, a Woman who was
very much excited. This provoked the Spectators to such a Degree,
that they instantly hung him up. One of those Villains set Fire to the College, and was seized; many others were
detected in the like Crime, and subdued.

"The Officers of the Army and Navy, the Seamen and Soldiers
greatly exerted themselves, often with the utmost Hazard to them-
selves, and showed all that Alertness and Activity for which they
are justly celebrated on such Occasions. To their vigorous Efforts
in pulling down such Wooden Buildings as would conduct the Fire,
it is owing, under Providence, that the whole City was not con-
sumed; for the Number of Inhabitants was small, the Pumps and
Fire-Engines were very much out of Order. This last Circumstance,
together with the Removal of our Bells, the Time and Place of the
Fire's breaking out, when the Wind was South, the City's being set
on Fire on so many different Places nearly at the same Time, so
many Incendiaries being caught in the Fact of setting Fire to
Houses: these, to mention no other Particulars, clearly evince be-
yond the Possibility of Doubt that this diabolical Affair was the Re-
result of a preconcerted, deliberate Scheme. Thus, the Persons who
called themselves our Friends and Protectors, were the Perpetrators
of this atrocious Deed, which in Guilt and Villainy is not inferior to
the Gun-Powder Plot. Whilst those who were held up as our En-
nemies, were the People who gallantly stept forth, at the Risque of their
Lives, to snatch us from Destruction! Our Distresses were very
great indeed before; but this Disaster has increased them tenfold.
Many Hundreds of Families have lost their all; and are reduced
from a State of Affluence to the lowest Ebb of Want and Wretched-
ess—instead of Shelter, Food or Clothing. . . ."—N. Y. Merch.,
S 30, 1776.

"The London papers attributed the story to 'Major Rook,' for-
merly aide-de-camp to General Gage, and a noted paragraph writer
in the 'Massachusetts Gazette.'"—Wm. H. Shelton in The Jumel
Mansion (1916), 45. (Mr. Shelton, in this work, presents evidence
tending to show that the New England captain mentioned in this
account was Nathaniel Hale.) For some reason this graphic account
of the great fire in New York is omitted from Force's 'American
Archives,' where almost every reference to that event has found a
place."—Ibid., 47 and 64.

There are several other accounts worthy of special notice. The
following was written by David Grim for the N. Y. Hist. Soc.: Sept.
"This fire of 1776 commenced in a small wooden house, on the
wharf near the White Hall Slip, it was then occupied by a number
of men and women of a bad character; . . . There being very
few inhabitants in the city, it spread with fearful facility.
"It burned all the houses on the E side of the White Hall Slip,
and the W side of Broad Street to Beaver street; A providential
and happy circumstance occurred at this time, the wind was then
S westly, about 2 o'clock that morning, the wind then veered to
the S. E. this carried the flames of the fire to the W ward, and
burned both sides of St. Paul's Church, to the E side of Broadway,
then crossed Broadway, to Beaver lane, and burned all the Houses
on both sides of the Broadway with some few houses in New Street to
Rector Street, and to John Harrison, Esq', three story brick house,
which house stopped the fire on the E side of the Broadway; from
these it continued burning all the houses in Lombard Street, and
those in the rear of the houses on the W side of Broadway to St.
Paul's Church there continued burning the houses on both sides
of Partition Street, and all the houses in the rear [again] of the W.
side of the Broadway to the N. River.

"The fire did not stop, until it got into Mortkhill Street, now
Barclay Street. The College yard and the vacant grounds in the
rear of the same, put an end to this awful and tremendous fire.

"Trinity Church, being burned was occasioned by the flakes of
the fire that fell on the Northern Side of the roof. The contrary winds
fanned those flakes of fire, in a short time to an amazing blaze, it
soon became out of the Human power to extinguish the same; The
roof of this noble Edifice was so steep that no person could go on it.

"St. Paul's Church; was in like perilous situation. The roof
being flat, with a handrail on the eaves; a number of the citizens
went on the same, and extinguished the flakes of fire, as they fell
on the roof. Thus happily was this beautiful church saved from
the destruction of this dreadful fire [which] threatened the ruin
thereof, and that of the whole city.

"The Lutheran Church, being contiguous to houses adjoining,
it was impossible, to save it from destruction, this fire was so fur-
ious and violently hot, that no person could go near it. And there
were fire engines to be had, at the corner of Chestnut and Roosevelt
Streets; several of the citizens were sent to the provost guard for ex-
amination, some of them remained there two or three days, until
they could give satisfactory evidence of their Loyalty."—N. Y.
H. S. Collections (1870), 275.

Grim's account is accompanied by a plan of the city ("within the
Palisades which were erected in the year 1745"), showing the
course of this fire and also that of Aug. 3, 1776 (p. 4). It indicates
the sites of the prominent buildings of the period. This plan is
owned by the N. Y. Hist. Soc., and was reproduced in Man. Com.
Coun. (1866), p. 766. No other map of the burned district appears of
record.

To this account, William Dunlap, writing in 1840, adds: "Over
the ruins of this fire I have wandered, when a boy, in every direc-
tion. It will be observed, by Mr. Grim's account, that the houses
on the west side of Broadway, and which were south of Beaver
street, escaped the conflagration; and it was in these, that the
English generals lived—what is now No. 1, being head-quarters.
I must observe, that the houses in Broadway, north of Trinity
court yard, were not burned. The City Tavern was on part of
the square, near the corner of Chestnut and Roosevelt Streets. The
house on which the houses were small and most of them of wood. The
last brick houses in the town were next beyond the church. The
ruins on the south-east side of the town were converted into dwelling
places by using the chimneys and parts of walls which were firm,
at Harlem, states: "Our friends were suspected."—Connn. Gaz. Sept. 11 (New London), O. 11, 1776. The question of the origin of the fire must have been a mooted question from the day of its occurrence until after the war. One early newspaper mention of the subject follows: "Slanderous reports have been made that the late conflagration of N.York was the act of the friends of America. It is fact that many thousands of innocent persons [who] were found by the King's troops were confined in various churches on suspicion. The probable cause is that Lord Howe's seamen going ashore for a frolic carelessly set a house on fire at White Hall Slip and that a high wind easily spread it."—Penn. Jour. (Phila.), N. 20, 1776.

Col. Robertson records in his journal: "About this morrow the Town of N.York was set on fire in many places, by Rebels that had lain concealed from the 16th the wind being high near 3 of the Best houses were burnt down Sev'l of the Rascals were taken in the fact w/ laggards dipp'd in Brimstone."—Robertson's Jour. (MS.). Reporting to Lord Germain on Sept. 24 regarding the fire, Gov. Tryon says, among other things: "Many of the incendiaries are now in confinement, and two or three were killed as they were detected in their hellish design. Many circumstances lead to conjecture that Mr. Washington was privy to this villainous act, as he sent all the bells of the churches out of town, under pretence of casting them into cannon; whereas, it is much more probable to prevent the alarm being given by ringing of the bells before the fire should get ahead beyond the reach of engines and buckets; besides, some sort of design of setting on fire the engraved papers of the town, which had been dispatched by ship, and were now lying at the Custom House, to be used as a convenient material for this devilish purpose. The town was thought to be saved more by a sudden change in the wind (which blew strong) and pulling down intermediate houses, than by water. It is afflicting to view the wretched and miserable inhabitants who have lost their all, and numbers of reputable shopkeepers that are reduced to beggary, and many in want for their families of the necessaries of life."—Col. Reed writing on Oct. 31 to the S. P. G. F. P., gives the following account of the burning of the city: "Several rebels secreted themselves in the houses, to execute the diabolical purpose of destroying the city. On the Saturday following an opportunity presented itself; for the weather being very dry, and the wind blowing fresh, they set fire to the city in several places at the same time, between twelve and one o'clock in the morning. The fire raged with the utmost fury, and, in its destructive progress, consumed about 1000 houses, or a fourth part of the whole city. To the vigorous efforts of the officers of the army and navy, and of the soldiers and seamen it is owing, under Providence, that the whole city was not destroyed. We had three churches, of which Trinity Church was the oldest and largest. It was a venerable edifice, had an excellent organ which cost 800l sterling, and was otherwise well equipped. This church and the charity school, the two latter, large expensive buildings, were burned. St. Paul's Church and King's College had shared the same fate, being directly on the line of fire, had I not been providentially on the spot, and sent a number of people with water on the roof of each. Our houses are all covered with cedar shingles, which makes fire very dangerous. The church corporation had suffered prodigiously, as was evidently intended. Besides the buildings already mentioned, about 200 houses, which stood on the church ground, were consumed; so that the loss cannot be estimated at less than 25,000l sterling. This melancholy accident, and the principal scene of war being here, will occasion the Clergy of the city to be the greatest sufferers of any on the continent by the present rebellion."—Doc. Hist. N. Y. (400 ed.), III: 643. On June 9, 1777 (q.v.), an exact estimate of Trinity's losses was ascertained.

The chaplain of Col. Durkee's regiment at Powles Hook writes in his journal: "... had not the wind as it veered to the west died away, the remainder of that nest of vipers would have been destroyed."—5 Am. Arch., II: 461. See also the graphic description of the fire, recorded by a Loyalist eyewitness, in Pastor Sheekirk's diary, pub. in Campaign of 1776, par. 2, 18-19.

Gen. Robertson's house was one of those burned. Instead of using one of the engines to save it, he used it to save the king's ships and magazines, and thus saved stores worth £20,000, while he lost his house which cost him £2,000. In 1780, he wrote to the commissioners of the treasury asking for reimbursement.—N. Y. Col. Docs., VIII: 798-99.

A letter, written on Sept. 26 from the camp of the Americans
1776
Sept. 21

oldest and largest of the English churches, but in vain; it was destroyed, as also the old Lutheran church, and St. Paul's, at the upper end of Broadway, escaped very narrowly.  

"There is great reason to suspect that some wicked incendiaries had a hand in this dreadful fire, which has consumed the fourth part of the city; several persons have been apprehended; notwithstanding there were few hands of the inhabitants to assist; the bells being carried off, no timely alarm was given; the engines were out of order; the fire company broke; and also no proper order and directions, &c., all which contributed to the spreading of the flames."—Johnston, Campaigns of 1776, part 2, 119.

Bauerman records on Sept. 24: "... nearly 600 of the burned houses and one church were the sacrifice to this rebellious fury. There are many villains caught and under arrest, others were thrown into the flames, and one a sworn rebel, whose wife and 5 children could not induce him to give up this incendiary, stabbing his wife, who was about to extinguish the fire with water was seized by the sailors, at once stabbed and hung up by the feet before his own house until daybreak of the 20th [error, evidently, for 21st]. The English guard was of much assistance in suppressing the fire, hastening to the city at once, but the sailors did the best part of it, taking care to pay themselves well by plundering other houses near by that were not on fire. It is a real horror to look at New York in its desolation."—Mag. of Am. Hist., I: 38.

Regarding the burning of Trinity Church, see the sketch of the ruins, reproduced as Pl. 49, and described on pp. 362-364. Vol. III, 1776, states that the body of the church was 105 ft. long, the chancel 16 ft. long, the steeple 32 ft. square, the whole length 153 ft; the breadth of the church 73 ft, and the spire 180 ft. high. The organ, consisting of 25 stops, and costing $50 guineas, was estimated by the best judges to be "as good a one as any in London of the Price."—N. Y. Merc., O, 7, 1776. The church also contained "several pieces of handsome painting, and some very beautiful marble monuments." The windows were of leaded glass. The edifice was "embosomed" by "lofty trees."—N. Y. Mag, Jan., 1790 (I: 3).

The loss on Trinity Church property amounted to $2,220, and in rentals of ground lots on which the tenants’ buildings burned, $536.—Trin. Min. (M.S.), Je, 9, 1777. See also Dr. Auchmuty’s letter of Nov. 20.

The Lutheran Church, which stood on the south-west corner of Broadway and Rector St., and was consumed in this fire, was never rebuilt. The site was known for many years as the “Burnt Lutheran Church.” For a view and description of this church in 1799, see Pl. 68-4, Vol. I. On Oct. 25, the Rev. Bernard Houseal, minister of the “Lutheran Trinity-Church,” which was destroyed “with its good organ,” in an address of the Minister, that it should stimulate a recovery of any articles that were saved.—N. Y. Merc., O, 28, 1776.

It is said that the house, belonging to a devout German, in Wall Street, in which a small Catholic congregation worshipped just prior to the Revolution, was also burned.—Eccles. Rec., III: 1405.

The block on the west side of Broadway, opposite Bowling Green, escaped destruction, and its pre-Revolution, colonial, appearance was preserved for many years.—Man. Cem. Cens. (1865), 515 passim.

Letters from New York, dated Sept. 25, state “that the Rebel Incendiaries having placed a large Quantity of Combustibles in theCellars of several Houses in that Part of the Town called Whitehall, set Fire to them. ...” The wing of King’s College “is much damaged; but the main Building, with the Library, is saved.” Nearly 1,600 houses were burned by this atrocious Act, which was conducted by one William Smith, an Officer in a New England Regiment, who was taken with a Match in his Hand, and sacrificed on the Spot to the Fury of the Soldiers.” Another letter states “that the first Incendiary who fell into the Hands of the Troops was a Woman, provided with Matches and Combustibles; but that her Sex saved her little, for without Ceremony, she was tossed into the Fire. A few houses were burned by Negroes; but some were destroyed by a Chain of Buckets, in order to prevent their being made Use of in extinguishing the Confusion; ... they were instantly thrown into the Flames after her."—St. James’s Chron., N 9-12, 1776. Edmund Burdus, in a glowing tribute in the house of commons on Nov. 6, 1776, exalted the noble patriotism of this woman, whose sacrifice in opposition to British tyranny.—The Parl. Rec., VI: 60.

Charges of inhuman barbarity, made by both Americans and British against each other, were frequent. A British soldier, writing from New York on Sept. 22, says: “We are at length in Possession of this City, and I suppose upwards of five thousand Inhabitants have remained in it. ... I mean the New- Yorkers, not the New-England Saints, some of whom I find still behind for the Villainous Purpose of setting Fire to the City, which they truly believed, was concerted by the great ones of the Rebels, and that the poor Wretches who did the Business were only their Tools. ... Some of the Incendiaries were found at their hellish Work, and killed by the Soldiers in their Fury on the Spot. The Guards and Hessians in every Engagement in which they have been concerned have fought like Devils. The Report which was circulated in London, that they would desert and go over to the Enemy, it’s supposed has spirited them up to behave so courageously. It is thought that the Army will be at Philadelphia before Christmas, as most of the Provincials are sick of the Business."—St. James’s Chron., N 2-5, 1776.

Another British soldier, one Jamer Drewitt, in a letter written on Sept. 25 on board the frigate “Mercury,” said: “One of the fellows who set fire to this town cut a poor woman’s arm off for attempting to extinguish the fire in her own house, but a party of soldiers coming up ran their bayonets through him, and some of the seamen hoisted him up by the heels to a sign post: there are upward of 600 suspected persons taken up and imprisoned in the town."—Ibid., N 16-19, 1776.

An American officer at Harlem, in a letter of Sept. 23, wrote: “According to the best accounts, we learn, that about a quarter part of the city of New York is burnt, and that it was purposely fired by some private persons. Since this fire, the enemy have practiced some inhuman cruelties on the unfortunate wretches they have in their power, under pretence of their being concerned in the plot. They have hanged numbers by the feet, and then cut their throats. The Hessians are continually plundering, and are countenanced by their General; and General Howe dare and pusillanimously fear for producing a general mutiny.”—Am. Arch., II, 514.

The American committee of secret correspondence, in its long review of events prior to Oct. 1, 1776, stated: “The enemy charged some stragglers of our people that happened to be in New York with having set the city on fire designedly, and took that occasion, as we are told, to exercise some inhuman cruelties on those poor wretches that were in their power. They will no doubt endeavour to throw the odium of such a measure on us; but in this they will fail, for General Washington, previous to the evacuation of that city, whilst it was in his power to do as he pleased with it, desired to know the sense of Congress respecting the destruction of the city, as many officers had given it as their opinion it would be an advisable measure; but Congress resolved that it should not be left in doubt, as they had no doubt of being able to take it back at a future day [see S 2, 3, 4, 5, and 6]. This will convince all the world we had no desire to burn towns or destroy cities, but that we left such meritorious works to grace the history of our enemies.”—Ibid., II: 820-21; see also Marshall, Life of Washington, II, 464.

A letter of Oct. 9, 1776, states: “Only one man was caught setting fire to his own house, was shut up in it, and consigned to ashes with his property; that the shipping in the river, during the confusion, was with much difficulty saved, and (agreeable to former accounts) only about 1000 destroyed.”—Man. Cem. Cens. (1866), 778. For the result of an official investigation by the British, see O 18, 1783.

Lieut. Tench Tilghman, writing on Sept. 25 to his father, says: “Reports concerning the Act of burning fire to New York, if it was done designedly, it was without the knowledge or Approbation of any commanding officer in the army, and indeed so much time had elapsed between our quitting the City and the fire, that it can never be fairly attributed to the Army. Indeed every man belonging to the Army, who remained in or were found near the City were made prisoners. Many Acts of barbarous cruelty were committed upon poor Creatures who were picked up as they were flying from the flames; and Sailors looked upon all who were not in the military line as guilty, and burnt and cut to pieces many. But I am sure was not by Order. Some were executed next day upon good Grounds.”—Memor of Lieut. Col. Tench Tilghman (1786), 140.

Col. Silliman, in a letter to his wife, on Sept. 25, says: “I believe it was not the regulars, but some of our own people in the city that set it on fire, for they executed several of our friends there for it the next day.”—Shelton, Jumel Mansion (1916), 51.
A letter written from Harlem on Sept. 26 states: "Our friends were immediately suspected and according to the report of a refugee who came to our lines soon after, those that were found in or near the spot were pitched into the confederation, some hanged by the heels, others by their necks with their throats cut. Inhuman barbarity! One Hale in New York, on suspicion of being a spy, was taken up and dragged without ceremony to the execution post, and hung up." (See S 22)—"Am. Archt., II: 549.

A printed copy of the same, issued by request and signed by John Hancock, is "found in the pocket of a Provincial Officer, who was detected in setting fire to some of the houses in New York, and put to death by the soldiers." It showed him to be First Lieutenant Richard Brown of the second company of riflemen in the second regiment of foot, commanded by Col. William Thomson.—London Post, Oct. 15, 1776. According to Heitman's Hist. Reg. of the Cont. Army, a Pennsylvania Continental, Richard Brown, was taken prisoner at the battle of Long Island. It is probable that, being a prisoner in New York, he was released by the fire.—Shelton, Jumel Mansion, 45.

John Jos. Henry (later Judge Henry), of Pennsylvania, a prisoner on the frigate "Pearl" in New York harbour, saw the fire from a distance of four miles as "a most beautiful and luminous, but haleful sight." He first saw it "of the size of the flame of a candle," which appeared to be "the burning of an old and noted tavern called the Fighting Cocks," to the east of the battery and near the wharf. The flames increased rapidly because of the wind, and he soon "saw another light at a great distance from the first, up the North River." This seemed to be "an original, distant and necessary part of a celebrated triumph," or "a White Hall." Boats put off from the British fleet, and rowed speedily toward the city. This circumstance repelled the idea that our enemies were the incendiaries, for indeed they went in aid of their own inhabitants. The boat from the "Pearl" returned at daylight, and the officer and crew reported that "the burning of New York was the act of some mad-cap Americans." The sailors said that "they were so incensed they hung a bayonet wound through his breast," and that "he was caught in the act of firing the houses;" also that "they had seen one person who was taken in the act tossed into the fire, and that several who were stealing, and suspected as incendiaries, were bayoneted." In this account of the fire, Judge Henry adds: "The testimony we received from the sailors, my own view of the distinct beginning of the fire, in several spots, remote from each other, and the manner of its spreading, impressed my mind with the belief that the burning of the city was the doings of the most low and vile of persons, for the purpose not only of thieves but of devastation. This seemed to be the general view, not only of the British, but that of the prisoners then aboard the transports. . . . It was not until some years afterwards that a doubt was created; but for the honor of our country and the dignity of American worth it has been able to stand lying out several Nights in the Open Air & exposed to Rain in almost a Miracle to me—Whom at Home the least Wet indeed some Times the Change of Weather almost laid me up."—N. T. City during the Am. Rev. No. 109.

Gen. (afterwards Governor) George Clinton, writing to Doctor Peter Tappan from Kingsbridge, says: "I have been so hurried & Fatigued out of the ordinary way of my Duty by the Removal of our Army from New York & great Part of the public stores to this Place that it has almost worn me out tho' as to Health I am as well as ever. But here has been able to stand lying out several Nights in the Open Air & exposed to Rain in almost a Miracle to me—Whom at Home the least Wet indeed some Times the Change of Weather almost laid me up."—N. T. City during the Am. Rev. No. 109.

Gaine, in Newark, N. J. brings out No. 301 of The New-York Gazette and the Weekly Mercury, continuing the sequence of his numbered issues, his last previous one being that of Sept. 9 (q. v.). He published seven issues in Newark, to No. 1307 (Nov. 2, 1776)—Brigham, A. A. S. Proc. (1917), 423. See S 30.

"This morrow by day break a world's party of 400 men began to make a Chain of Roundouts from the N to the E River across the heights of Harlem—This Event! The Rebels attempted to surprise our Picket in Montrose's Island consisting of 120 men, but were repulsed with considerable loss besides one Major & 13 taken the 71st lost 8 men K3,"—Robertson's Jour. (M.S.). See S 24.

Fitch writes: "About Noon all ye Ships who had Prisoners on board together with ye Experimental & ye Resolution, Men of War, got under way; in Order to go up toward the City, ye Wind being unfair, ye Ships were Obliged to beat up, & at & o clock came too off red between Hoock & Gibbet Island, in midst of a very great Number of Ships, among whom is ye Eagle, ye Admiral, or Lord Howe's Ship, which lay just ahead of us, & ye Rainbow (another large Man of War) is near us on ye other hand & beside those, a number of Frigates & other Ships of War."—Fitch's Diary, 47.

Nathan Hale, a captain in Knowlton's Rangers, is executed as a spy by the British, Aug. 27, 1776. The record of this event is contained in the British general orders of the day: "Head Qrs. New York Island. Sept. 23d 1776, Parole, London, Countersign, Great Britain. . . . A spy from the Enemy (by his own full confession) apprehended last night, was this day Executed at 11 o'clock in front of the Artillery Park."—From Orderly book in archives of the N. Y. Hist. Soc. We find three or four other references to the
event in nearly contemporaneous sources. A letter received in London from James Dreibell, written on board the "Mercury" from Philadelphia, under date of Sept. 15, 1776, stated: "On the 24th, we hung a man who was sent as a spy by General Washington."—5 Am. Arch., II: 521. A letter, written at Harlem on Sept. 26, states: "One Hale in New York, on suspicion of being a spy, was taken up and dragged without ceremony to the execution post, and hung up. General Washington has since sent in a flag, supposed to be on that account."—Ibid., II: 548. Touch Tilghman, of Washington's staff, writing on Oct. 2 from headquarters on Harlem Heights to Egbert Benson, said: "The General is determined if he can bring some of them in his hands under the denomination of spies, to execute them. General Howe hanged a Captain of ours belonging to Knowlton's Rangers, who went into New-York to make discoveries. I don't see why we should not make retaliation."—Ibid., II: 854.

The fact that Hale was "apprehended last night," and that he went into New York," gives clear circumstantial evidence that he was captured on Manhattan Island. A careful study of all the evidence in the place of the capture has been made by Prof. Henry Phelps Johnston, and published in Nathaniel Hale (1914). A summary of his discussion shows (p. 157 et seq.) that Hale was not captured at Huntington, L. I., as previously believed, but at John's Island, near New York, which latter conclusion was confirmed by an inquiry made by A. M. T. Hurd, of the New-York Historical Society, at the place of execution. Prof. John's Island was the place where John's Island, the residence of Captain Montressor, was located, and where its occupants, when the British occupied the island, was located, and where its occupants, when the British occupied the island, used to reside, making of the mark of Captain Montressor, who made many such maps before and during the first years of the war. No camps are marked below the tavern site—none at Turtle Bay. Furthermore, it is probable that Montressor, although an aid to Howe, still occupied his quarters, or marquée, with his own Engineer Corps, which usually accompanied the artillery. He did this at times in the next campaign. This would explain his presence at the Doven Artillery Park when Hale was executed. During the campaign against Philadelphia in 1777, the execution of British deserters and marauders took place, without exception, at the Artillery Park, which was generally near headquarters. Hale thus suffered at the usual site and in the usual way.

For this conclusion, Prof. Johnston gives primary credit to the latest history of the Revolutionary War, by an anonymous authority, and to the historical account of Hale's services, written by John Austin Stevens, and published in the N. Y. Herald of Nov. 29, 1891, following the unveling of the MacMonnies statue of Hale in City Hall Park the day before, a letter from Mr. Kelby was printed, giving the results of his inquiries. Mr. Kelby was the first to bring to light the record in the British ordnary book of Hale's execution, "in front of the Artillery Park." He called attention also to the entry of Oct. 11: "Majors of brigade to attend at the Artillery Park, near the Doven." He cited advertisements in the newspapers which confirmed the location of the camp. One in the Royal Gaz. of Nov. 2, 1779, stated that there was a "horse stolen or strayed from the Royal Artillery pasture at the five-mile stone," and a published order of Jan. 19, 1780, requires that, in case of attack, "all arms fired from beneath the cantonment of the Thirty-seventh regiment, near the five-mile stone, formerly known by the name of the Doven Tavern." The place of Hale's execution was described by Mr. Kelby as "west of the post road, on Third Avenue, between Sixty-sixth and Sixty-seventh streets. The cultivated ground attached to it was afterwards known as the Doven Lots, and contained about four acres."—See Herald, L. M. R.Refreshing, L. M. R. 626-63; N. Y. H. S. Quart. Bulletin, April, 1918; Winzer, VI: 533.

Washington made no mention of Nathaniel Hale in his letters to the president of congress or elsewhere in his correspondence.—Writings of Geo. Washington (Ford ed.), IV: 431, footnote A British officer, writing from New York on Sept. 26, states: "We hung up a rebel spy the other day, and some soldiers got, out of a rebel gentleman's garden, a painted soldier on aboard, and hung it along with the Rebel: and wrote upon it—"General Wash-}

Hale and I saw it yester- day beyond headquarters, by the road- side."—Kentish Gaz. (Canterbury, Eng.), N 6-9, 1776.

Nearly five years after the death of Hale, the statement was published that: "About four years ago, Capt. Hale, an American officer, of a liberal education, younger than André, and equal to him in sense, fortitude, and every accomplishment, tho' without opportunities of being so highly polished, voluntarily went into the city of New-York, with a view to serve his invaded country. He performed his part there with great capacity and address, but was accidentally discovered. In this trying circumstance he exhibited all the firmness of André, without the aid of a single countenance around him that spoke either respect or compassion, and the every thing that was said or done to him was adapted to make him feel that he was considered as a traitor and rebel. . . . Hale, tho' not at all disconcerted, made no plea for himself, and firmly rejected the advantageous offers made him by the enemy upon condition of his entering into their service, . . . but just before he expired, said, aloud, 'I am so satisfied with the cause in which I have engaged, that my only regret is, that I have not more left for one to offer in its service. '”—Ind. Chron. (Boston), My 17, 1781.

A quite full and very gratifying description of Nathaniel Hale, as a young captain in the patriot army in New York, has come to light recently. It was discovered in 1714 by Mr. George Dudley Seymour among the files of the pension bureau in Washington. The sketch was written by Lieut. Elisha Bostwick on the margin of his commis- sion as Second Lieutenant in the Fifteenth Regiment of Foot, in the nineteenth Regiment of foot Commanded by Colonel Charles Weebie." This commission Lieut. Bostwick deposited, with other papers, when he made his claim for a pension. He says he was in the same regiment with Hale, and "always in the habits of friendship and intimacy with him." He describes him as "a little above the common stature in height, his shoulders of a moderate breadth, his limbs regular features—very fair hair—blue eyes—flaxen or very light hair which was always kept short—his eyebrows a shade darker than his hair & his voice rather sharp or piercing—his bodily agility was remarkable I have seen him follow a football & kick it over the tops of the trees in the Bowery at New York, (an exercise which he was fond of)—his mental powers seemed to be above the common sort—his mind of a sedate and sober cast, & he was undoubtedly Pious; for it was remarked that when any of the Soldiers of his company were sick he always visited them & usually Prayed for & with them in their sickness. He further tells of the captain coming upon some of his men "in a bye place Playing Cards." They were told: "This won't do—give me your Cards," whereupon he "chop them to pieces, & it was done in such a manner that the men could not help him, & all occasions is described as wonderful; "he would make a pen the quickest & best of any man."

He concludes with the query: "Why is it that the delicious Capt. Hale should be left and lost in an unknown Grave & forgotten?" From a photolithograph of Elisha Bostwick's commission in N. Y. Hist. Soc. The document in its entirety is printed in A Sacrifice of Seventy-six—Nathaniel Hale (1915), by Frisbie, 26-31.

Gen. Washington, writing to his brother, John Augustine Washington, reviewing the events of the last few days, closes thus: "In short, it is not in the power of words to describe the task I have to perform. Fifty thousand pounds would not induce me again to undergo what I have done. Our numbers, by sickness and desertion, are greatly reduced. I have been trying these four or five days to get a return, but have not yet succeeded. I am sure, however, we have not more than twelve or fourteen thousand men fit for duty, whilst the enemy, who, it is said, are very healthy, cannot have less than twenty-five thousand."—Writings of Geo. Washington (Ford ed.), IV: 425-10.

The general orders from the headquarters at Harlem Heights, inform the soldiers who have been wounded "in their country's cause, that the congress is pleased to make the following regulations: that officers and privates losing a limb in any engagement, or who shall be so disabled in the service of the United States of America as to render them incapable of getting a livelihood, shall receive half of their monthly pay during life or the continuance of their disability, from the time their pay ceases as officers or soldiers.
"Also such officers or soldiers as are wounded in any engagement and rendered incapable of service, though not totally disabled from getting a livelihood, shall receive monthly such sums towards their subsistence as the Assembly or representative body of the State they belong to, or reside in, judge adequate."

A soldier of the American army at Harlem Heights is sentenced by court martial to be shot for "cowardice and misbehaviour before the enemy on Monday last," and for "presenting his firelock at his superior officer when turning him back a second time," the penalty for which is death by article 27 of the Army Rules and Regulations.

Another soldier, an ensign, is ordered to be cashiered for "the infamous crime of plundering the inhabitants of Harlem."—5 Am. Arch., II: 447-48.

Washington takes occasion to recommend to the president of congress that the army regulations be amended to provide against "plundering, marauding and burning of Houses. . . . Such a Spirit has gone forth in our Army that neither public or private Property is secure—Every Hour brings the most distressing complaints of the Ravages of our own Troops who are becoming infinitely more formidable to the poor Farmers and Inhabitants than the common Enemy. Horset are taken out of the Continental Teams; the Baggage of Officers and the Hospital Stores, even the Quarters of General Officers are not exempt from rapine."—Writings of Geo. Washington (Ford ed.), IV: 425.

St. Paul's Chapel is reopened for religious services by order of Gen. Howe. The Chapel was burned by citizens of New York on the 23d. A detachment of British troops was sent on that day from the battery to destroy the burning Chapel and arrest the incendiaries, but the fire was put out, and the Chapel was saved. The next day a number of men were shot by the British for desecrating St. Paul's Chapel, Trinity Parish, New York. Names & Histories that have clustered around it in four generations, 8. See Jl 18. See, further, N. 20.

At four o'clock in the morning of this day, "Colonel or Brigadier General Erskine had a visit from 100 rebels in 5 boats, but many were shot by the British disheartening; 1 Major and 12 men however were captured. This cost the 71st regiment a killed and 8 wounded."—Baurneister's narrative, Mag. of Am. Hist., I: 39.

Col. John Glover, in a letter from Fort Constitution, dated Oct. 7, describes the attack made by a detachment of Americans, commanded by Lieut. Col. Jackson, in six boats of forty men each, who tried to discharge the British from Monmouth's (Ward's) Island on this day. Many of the bravest of the party, including Major Hendly who was carrying off Col. Jackson, fell in this engagement. The disaster was attributed by Col. Glover to the failure of part of the force to land and assist their leaders, but who retreated instead.

"The officers who commanded the other boats, he states, "are all under arrest and will be tried for their lives. In short if some example is not put on such rascals and scoundrels, that have neither Honour nor the Good of their Country at heart, will shun behind and get off clear."—Campaign of 1776, 99, citing the original in the Essex Institute, Salem, Mass.

In the 7th of October, 1776, Regulars were very busy in transporting Troops over to Long Island, where I don't perceive as yet y' they meet with any great opposition; We are also informed y' they have landed a considerable body of Troops from Staten Island, so y' it seems they are going to bend Considerable of their force that way."—Diary of Jabes Fish (MS.), 48.

Sir Wm. Howe, reporting to Lord Germain on Sept. 24, states that on the day before (Sept. 23) a fleet of British ships was enabled the British to capture and move up "the batteries upon Paulus Hook." Troops landed and took possession of the American works there "without the least resistance."—5 Am. Arch., II: 492. Baurneister, in his narrative of Sept. 24, written at "the detached Camp, at Holgate's," states that this expedition occupied "On the night of the 24th (evidently before day break), and that it was led by Gen. Lord Percy."—Mag. of Am. Hist., I: 39. Col. Robertson writes under date of Sept. 23: "This day Ed. Percy took possession of Paulus Hook without the loss of a man."—Robertson's Jour. (MS.). See also Kemble's Jour., 90. Cf. transcript in Lib. of Cong. of the "Jour. of the Operations," etc. in Brit. Museum (Egerton MSS, 2135 f. 7).

Pastor Shewkirk reports on Sept. 23: "The fire has thrown a great dump on the former joys of the Camp, and many of people are carried on salt, on suspicion of having had a hand in the fire, and to have been on the Rebel's side; it is said about 200; however, on examination, the most men were as fast discharged."—Campaign of 1776, part 2, 119.

In a letter to Gov. Trumbull, Washington states: "The enemy have formed a large encampment in the plains, or rather heights, below us, extending across, as it were, from the East to the North River; but they have attempted nothing, as yet, of a general nature."—5 Am. Arch., II: 466-66.

Gen. Howe's Head Quarters are at Lt. Col. James Beeckman's House on the East River near Turtle Bay. His troops are throwing up intrenchments from Jacob Walton's country seat at Horn's Hook at Head Gate across the whole Island to Humphreys Jones House on the North River. From letter of this date in St. James's Chron. (London), N 16, 1776, reprinted in Battle of Harlem Heights, 210.

Gen. Knox, writing to his brother William, says: "The affair of last Monday [Sept. 16] has had some good consequences toward raising the peoples spirits—they find that if they stick to these mighty men they will run as fast as other people. . . . The general is as worthy a man as breathes, but he cannot do everything nor be everywhere. He wants good assistants. There is a radical evil in our army,—the lack of officers. We ought to have men of merit in the most extensive and unlimited sense of the word. Instead of which, the bulk of the officers of the army are a parcel of ignorant, stupid men, who might make tolerable soldiers, but [are] bad officers; . . . We ought to have academies, in which the whole theory of the art of war shall be taught, and every officer courageous and skillful enough to give drawn persons into the army. . . . As the army now stands, it is only a receptacle for rascals."—Life and Correspondence of Henry Knox, 31-32. On the following day, Washington wrote to congress from the Morris house a long and circumstantial account of the need of good officers for the army.—5 Am. Arch., II: 493-98.

Bauernmeister writes in his narrative of this date: "All the houses, which were inhabited and deserted by the rebels in New York, are marked G. R. [George, Rex], and thereby confiscated, the government takes possession of all the papers and effects of the enemy, and the fleet is erecting a magazine in the city. Many subjects are returning to the legitimate authority, and on Long Island the villages of Greenvase, New Utrecht, Flatbush, Brockland and Ferry are filled with the fugitive settlers, most of whom however and their dwellings emptied, furniture smashed, not a window left whole and their cattle gone forever.

"The royalists are obliged to distinguish themselves from the rebels by red ribbons in their hats . . . . The house of Col. Henry Rutgers was one which received the "mark of Confiscation on the south door." As late as 1879, he still preserves this mark on the door. The Museum, by the British government, is at the British Hospital, a Store House, or Barracks, as the circumstances of the times required."—From Battle of Harlem Heights, 184, citing Mag. of the Dutch Reformed Church, II: 412. The Methodist Meeting House was one of the buildings used for a hospital.—Oliver Burnam's statement, Battle of Harlem Heights, 158.

"I of a Gunboat, 3 y' sails long besides a line of near 200 y' finished accord to the Plan proposed."—Robertson's Jour. (MS.). On the next three days men were employed in cutting down trees, and on, Sept. 26, Jones's house was made "musetik proof round the Gallery."—Ibid. See § 28.

The advanced post of the British "is at the Black Horse tavern and the Army is posted from the North to the East Rivers quite to the Country white above Mr. Apthorpe."—From a letter by Capt. Hutcheson, assistant-secretary to Gen. Howe, in camp at Turtle Bay, to a friend in England, now preserved with the Haldimand MSS, British Museum, and pub. in Mag. of Am. Hist. (1882), VIII: 40.

Regarding the results of the fire, Hutcheson states that "all that part of the town where Mr. Watts House stood, with the houses in Broadway & West side of Broad Street and all the North River as far as Vaux Hall is consumed. Kennedy's, Hallett, Col. Reeds & two or three Houses joining are all that escaped as far as St. Pauls Church. What adds to the misfortune, they are chiefly the friends to government who have suffered; several of the Villians have been detected, & have suffered the fate they deserve." He is evidently writing to John Mortier, then owner or lessee of Richmond Hill, for he asks, "I shall have great pleasure in giving you your furniture left at Richmond Hill was not sold. M'r Washington lived in the house all Summer and made use of it; some of the
tables & chairs he had in Gen'l Robertson’s house & was consumed in it, and on the Night before we landed he quitted Richmond hill, left it open, & the Rebels in their retreat, took many things out of it, and broke the glass. I could, I got a safe guard to it, which still remains, and everything left will be safe, a return [inventory] of which I will send you & will dispose of the whole the best for your advantage."—BATTLE OF HARMON H'TS, 221-22, citing the same MSS.

Regarding Colden’s death (see § 31). Gov. Tryon writes to Lord Germain: “This makes a vacancy in the Council. The following is the present state of the remaining eleven: Mr. Chief-Justice Homemann, very old and feeble, Mr. Oliver De Lancey, Mr. Charles Ward Aaphorp, Mr. Astell, and Mr. Henry Cruger, at liberty to attend the summons of Government. Mr. William Smith, withdrawn to his plantation up the North River, and not been of these five months; Mr. Hugh Wallace and Mr. James Jonney, prisoners with the Rebels; Mr. John Watts, Colonel Moran, and Mr. Henry White, in England.

“Mr. Thomas Jones, one of the Judges of the Supreme Court, and Mr. David Matthews, Mayor of the City of New-York, with many other gentlemen of the country, are in the hands of the Rebels.”—N. Y. Col. Doc., VIII: 858-59.

Gov. Tryon writes to Lord Germain: “It is the opinion of his Hon’:y. Majesty’s Council, that restoration to the Colonies that I should postpone any executive Acts of Government, until the Province is more liberated from the control of the Rebels. I therefore have kept the executive powers of Civil Government dormant, leaving everything to the direction of the Military.”—N. Y. Col. Doc., VIII: 868-87. See N 26.

Tryon also informs Lord Germain that Oliver De Lancey “under General Howe’s orders is endeavouring to restore peace to the Colonies that I should postpone any executive Acts of Government, until the Province is more liberated from the control of the Rebels. I therefore have kept the executive powers of Civil Government dormant, leaving everything to the direction of the Military.”—N. Y. Col. Doc., VIII: 867. New York remained throughout the war the chief city of refuge for loyalists. —Winor, VII: 196-97; Van Tyne, The Loyalists (1902), 243 et seq.

The British orders of the day provide that “The working Party of McGown’s Hill Consist of 200 Men only till further orders.” Party at work is to be directed in the after order of the 14th.” On September 25, the number was reduced to 100 — Orderly book, British Army, in N. Y. H. S.

In the general orders for the day, issued at headquarters on Harlem Heights, is the following: “The Quartermaster-General and the Chief Engineer are to mark the ground, to-morrow, on which the barracks and huts are to be built this side King’s Bridge. They are to call upon the General, present in person, to sign the setting up this business, for directions. When the ground is marked out, the Quartermaster-General is to see the materials for building to be laid thereon as quick as possible. . . .”—5 Am. Arch., II: 501.

Mr. Reginald Pelham Bolton is of the opinion that this order led to the selection of the recently discovered camp-site at Prescott and Seaman Avenues, and that this camp, begun by the Americans, afterwards became the great centre for the British and Hessians in residence.—20th Ann. Rep., Am. Scenic & Hist. Rec. Soc., 371. See further, O 24.

“‘This Afternoon ye Eagle moved up further toward ye City, several other ships made movements in Different ways—we were also this afternoon Informed something of ye Circumstances of ye late Fire in the City of N. York, & ye Number of the Perpetrators thereof, were this Day to be Executed.”—Diary of Jabez Fitch (MS.), 50.

“On Wednesday last [Sept. 25], the Eagle Man of War, Vice Admiral Lord Howe, came up from off Bedlow’s Island, and mooed off the Fort in the North River; and, next morning, the Brited, Vice Admiral Lord Shuldmill, and the Preston, Commodore Hotham, came up and placed themselves likewise in the North River just above the Eagle.”—N. Y. Merc., § 30, 1776.

Kemble records: “General Prescott came to Head Quarters, having been exchanged for General Sullivan. . . .”—Kemble’s Jour., 90.

A “Memorandum” in the British orders of the day reads as follows: “all persons who can give any Information of the Incendians who have set fire to the Garrison of ye Gen'l Robertson to Mor'g Morning for that purpose.”—From Orderly book, British Army (MS.), in N. Y. H. S.

The British orders of the day provide for “the Officers G4 at Greenwich to be withdrawn Immediately Leaving a Corp 1 & 5 Men at Mt Bayards House.”—From Orderly book, British Army (MS.), Sept in N. Y. H. S.

A shipwreck on board the British frigate “Emerald” at New York wrote on Sept. 30: “The 27th inst. about Eleven o’Clock, P. M. the Industry, an American Privateer, of 26 Guns, appearing off this Harbour, our Ship slipped her Cables and put to Sea, and about Nine, A. M. came up with her and brought her to Action, and in less than three Glasses she struck to us. We have brought her safe into this Harbour, with the Loss only of three Men, and fourteen wounded.”—St. James’s Chirn., N 28-30, 1776.

Solomon Nash records: “this afternoon their was two 15 inch mortors with iron beds arive here from Boston and was on Loaded By fort worthington.”—Nash’s Jour., 35.

“1 this Day Observ’d ye Fort ye we Built at Red hook, was on 25 Fire, & burnt great part of ye Day.”—Diary of Jabez Fitch (MS.), 52.

The British orders of the day require “A working party of 100 men with off’s in proportion to parade to Mor’g Morning at Day break on the Road to the Right of Jones’s House where an Engineer will Attend to Receive them this Party to work till 12 at noon & be Replaced by the Like number who will work till sun set.”—From Orderly book, British Army (MS.), in N. Y. H. S. This party, in all probability, was engaged in building the fortifications shown on Robertson’s drawing of April 11, 1777.

The British orders of the day require “a working Party of 300 Men & the Brigade of G4 & 6th Brigades to Parade to Mor’g Morning at day break & March to the Battery at new york, where an ordnance of the ordinance will Receive them they are to be Employed in Making Cartridges & will take their formers with them the off’s & Men belonging to the Garrison at Hallifax are to be in Readiness to Embark for that Place at the shortest notice—the following Gentlemen having offer’d their services to Raise a Brigade of Provincialb of 5 Batt’s of 500 Men Each for the service of his Majesty & the Suppression of the Present unnatural Rebellion—the Commander in Chief has made the following Appointments over General B: Gen’n & Col: 2d Batt’s: H:Cruger: Col: C Green Late 45th Regt: Major, 3d Batt: J: Bratton Colo: Stephen De Lancey LColo Jn’ Boden Major, 3d Batt Ludlow Esq Colo: Halsted Esq” —From Orderly book, British Army (MS.), in N. Y. H. S.

The British orders of the day require “30 More Men with off’s in proportion to parade to the W of Jones’s House.”—Capt’ Wm Bumford of the 45th Regt is Appointed Town Major to the Garrison of N’ York: Sergt: Major Thomson 35th Regt: is Appointed Town Adj’t to the Garrison of N’ York: “Lieut: Mich’l Sykes 64th Regt: is Appointed Barrack Master to the Garrison of New-York.”—From Orderly book, British Army (MS.), in N. Y. H. S.

The British, being without a newspaper in New York, and having engaged Ambrose Sherwell to take charge of printing office, he, on the 9th, brings out No. 1901 of The New-York Gazette and the Weekly Mercury, containing Gaine’s former numbering (see Sept. 9), and leaving the imprint “Printed by Hugh Gaine.”—Brigham, A. A. S. Proc. (1917), 425. See O 7.

Jabez Fitch writes: “At 7 and 8 Snow [Moon] & 2d Ships Oct. that had ye Prisoners on board, got under way, & a little before 12 came too in North River opposite to ye Collidge, where we have a very Maligne Host, of the Affects of ye late Fire, which is soop’d to have Destroy’d a fourth part of ye City, & chiefly in this part of ye Town.”—Diary of Jabez Fitch (MS.), 54-55.

“Two new Fleches ordered at McGown’s on our Right—and Guns to be put in all the Riutds, Built only for Musquetery—Began to lay the Flatford on the Rock Riudt for 3d. 1275° occupied the whole Front—One of the Fleches finish’d at McGowans—to hold one Howitzer & a 36—The Abatis of the Line & Two Riutds to the left finish’d.”—Robertson’s Jour. (MS.). On the following day he wrote: “The 2d Fleche at McGowan’s finished.” On Sept. 4. “The Hessians begun a Fleche—advanced from Jones’s on our left & added one Gun to the left of the Rock Riudt—paid a secret correspondence, writing from Philadelphia to Silas Deane a long account of the progress of events, states, among other things, that ‘Our side occupy the Heights of Harlem, King’s Bridge, and Mount Washington, where they have made lines as strong as can be.”—5 Am. Arch., II: 540.

The British orders of the day require “102 fathoms with Picket 2
1776

3 This Afternoon the Phenix and Roebuck, two forty Gun Ships, sailed up the North River, have no Intelligence from them yet.---Kemble's Jour., 91. See O 5.

4 Burgoyne's "Reg' of Light Dragoons" arrives from England.---Robertson's Jour. (MS.), under O 4.

5 R. Eynon, "behind the Royal Exchange," London, publishes an "Accurate Map of Staten Island" which is marked by Robert's New York Light dragoons, which is the Rendezvous of the Two Grand Armies and the supposed present seat of Action." The map was drawn by "a Merc' who resided in America 15 years."---Emmet Coll. (No. 8220) in N. Y. P. L.

6 The British orders of the day require "Gun firing by Capt. Emrick at the North River shore near Little Bloomingdale."---Orderly book, British Army (MS.), in N. Y. H. S.

7 Embellishments: "General Howe and Lord Howe went this day to Long Island, supposed on a Reconsidering Party, and that it is intended to Land on some part of Westchester."---The Roebuck and Phenix [see O 3] lay off Bloomingdale waiting a Wind to proceed up the River. Three Rebel Vessels are seen lying between Forts Washington and Constitution, the first on this Island, the other on Jersey Store; the Vessels not above five Miles asunder.---Kemble's Jour., 92. See O 7 and 9.

8 Archibald Robertson records in his diary: "I began a line...to the Right of my small Red & at the end of that line a Squ' Redout of 40 8 & a side—the front 8 8 & the other 3 sides 6 ft thick—I had 50 men from the mob' to 12 & 50 men from 12 to 18 past four when the whole was finished—the Fusiliers were to carry 600 yards—The officers attended the whole land'd and faced the line & on the w't a single Fusilier & 43 feet high the P—The Hessians were at work continu'd a line from their New Fleche to the Rock Redout—but Stopt by Ld Corinthallis—all this was done w't out Gen' Howe's Opinion about it—The rest of my Party of 150 men were employ'd in carry' on the Abatis at the Red' to the Right."—Robertson's Jour. (MS.). On the next day he wrote: "A line of 112 feet in length was rais'd at the End of the Mill dam to the right two pieces of Cannon put in it." On Oct. 7, he recorded: "All the works finished."—Ibid.

9 In a letter to his mother, Gen. Glover says that the American army is "composed of flying Camp, four months levy men, and one months Militia, who are always uneasy, and cannot go through the fatigue & hardships which soldiers are necessarily called to, like those Troops that have been seasoned to it. We have a few old Regiments, if detached by themselves, I believe would do honor to their country. But we are obliged to intermix them with the raw troops, which is by far the greatest part of the army, consequently confuse the whole. This we saw verified on the 15th ult, the day we evacuated New York; and happy for us we began the retreat so timely as we did; otherwise the whole that were in the City must have been taken by the Enemy had faced the line & on the w't a single Fusilier & 43 feet high the P—The Hessians were at work continu'd a line from their New Fleche to the Rock Redout—but Stopt by Ld Corinthallis—all this was done w't out Gen' Howe's Opinion about it—The rest of my Party of 150 men were employ'd in carry' on the Abatis at the Red' to the Right."—Robertson's Jour. (MS.). On the next day he wrote: "A line of 112 feet in length was rais'd at the End of the Mill dam to the right two pieces of Cannon put in it." On Oct. 7, he recorded: "All the works finished."—Ibid.

10 Published a notice of this date, announcing the hour when the post office is open for the delivery of letters, shows that it is situated in Broad St. "Captains of Ships who have brought from Europe Letters for America, are desired to send them to this Office, that none may be delivered to disaffected Persons."—N. Y. Merc., O 28, 1776. It was still in Broad St. in 1778.---See advertisement of John C. Knapp in Royal Gaz., F 21, 1778.

11 Washington's Majesty's Forces are in Possession of the City of New York with all the Harbour and Sound, of Long and Staten-Islands, and nearly of New-York Island. They are also in Possession of Powel's-Hook, and command the East-River and Connecticut Sound. All this has been obtained with very little Difficulty and Loss on the Part of the Troops; the Rebels, after the Battle of Long Island, or rather Root on the 29th of August, having never at

12 That time to face the Soldiers but fled every Way with the utmost Precipitation. They quitted Works, which they had been laboring upon during the whole Summer without scarce the Conflict of a Day.---"N. Y. Merc., O 7, 1776.

13 The foregoing extract indicates the different tone in which this paper was being conducted by the new printer, Amboise Serbe (see p 50). The Item continues at length to describe conditions in the city and harbour.

14 The Second and Sixth Brigades of British troops cross over to Brooklyn and encamp at Bedford. The next morning they moved to Jamaica, where part of the British army assembled under Lieut. Gen. de Heister.--From transcript, in Library of Congress, of the "Jour. of the Operations," etc., in British Museum (Egerton MSS. 215, 199, etc.)—These troops were on the way to the West Indies.

15 So 'tarn a Fleet was never seen together in this Port, or perhaps in all America before. The Ships are stationed up the East-River or Sound, as far as Turtle Bay; and, near the Town, Some are moored up the North-River; others in the Bay between Red and Yellow-Hook; some, again, off Staten-Island; and several off Powell's-Hook, and towards the Hills. The Men-of-War are moored chiefly up New-York Sound, and, with the other Ships, a very magnificent and formidable Appearance. Five Men-of-War have been detached from the Squadron into the North-River above Greenwich [see O 3] probably to assist the Operations of the Army against the Rebels, who still remain on the Northern Extremity of this Island, and on the Heights about Kingsbridge."—N. Y. Merc., O 7, 1776. See O 9.

16 A new printer and other American officers, having signed a parole, are landed from an English prison ship, "a Ferry Wharf near 56th B'air Market in New Yor';" and are lodged in "a very large House, on ye West Side of Broad Way, & South of Warren Street." Fitch writes: "Having this large House assigned us with a small Yard to Walk in & we suppose we have chang'd our Citation Rather for ye better, both on acc of Noise & Crowd—During ye 39 Days which I was there, I never met a person but was treated after any kind of fresh Meat or fish Except Four Meals of Quaowhogs, while we lay down below ye Narrow's; nor any Butter, or other kind of provision Except a very Scanty allowance of Salt Meat & Bread, with a small matter of Cheese & Chocolet, which we have purchase'd; we have also lived about as Scant on acc of Drink as Victuals."—Diary of Jabez Fitch (MS.), 61-63.

17 The name of the printer (see p 50) is omitted from the imprint of The New York Gazette and the Weekly Mercury.—Early Newspapers, III: 422. See N 11.
The aftermath of the battles of the previous day had left Albany in chaos. The city was cut off from further support, and the colonial forces were vastly outnumbered by the British. General Howe was quick to capitalize on this advantage. In the early morning, a column of the 36th regiment moved against the city, taking it by surprise. The British troops entered the city, and the colonial forces were forced to retreat. King George III, informed of the capture of Albany, hailed it as a victory, stating, "All America is now in my power."

The capture of Albany was significant because it exposed the British to a much more vulnerable position. The city was now in British hands, and the British had a direct line of communication to New York. However, the capture also demonstrated the futility of colonial resistance in the face of a well-organized British army. The colonial forces were forced to retreat and regroup, leaving the future of the war in doubt.

The capture of Albany also had diplomatic implications. The news of the capture reached Europe, and it echoed throughout the world. The British victory was celebrated as an example of their military prowess, while the defeat of the colonials was seen as a sign of the growing strength of the American rebellion. The capture of Albany was, therefore, not just a military victory, but also a propaganda victory for the British.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1776. October 16

two respectable Citizens were appointed to attend at a Public House [probably the tavern of John Simon], adjoining the City-Hall, from 10 o'clock A. M., to 2 o'clock P. M. every Day, to take Subscriptions till all had signed... The address, with signatures, is published in N. Y. City during the Am. Rev. 1776.

"After this, an affectionate Address to His Excellency William Tryon, Esq; our worthy Governor was read—requesting him to present the above Address to the Commissioners, and otherwise to exert himself that the Prayer of it might be granted." This Address was also unanimously approved, and agreed to; and the Honorable Mr. Chief Justice Horsmanden was desired to sign and deliver it to his Excellency, in Behalf of the Inhabitants... —N. Y. Mer., O 24, 1776; Conn. Gaz. (New London), N 22, 1776. This published account of the meeting was reprinted, on Nov. 4, in the Penn. Eclectic Post, with comments by "A Friend to American Freedom," who referred to "the pains which the enemies to the free States of America are taking, in order to re-establish the old Constitution of New-York." He believed the account of this meeting should "be made public, in order that the people at large might determine on what conduct they would show to such as dared to break so important a link in the chain of union." He "cannot but view this breach or attempt of the utmost importance to the peace and well-being of every State." —Penn. Eclectic Post, N 4, 1776.

The Loyalist address to Tryon by the inhabitants of New-York was accompanied in the old style of sententious advice, and, like which preceded it during the colonial period, it was a fervent appeal for protection: "... We... beg leave to congratulate your Excellency on your return to the capital of your Government, and to assure you that we feel the sincerest joy on this happy event, which opens a prospect that we shall once more experience the blessings of peace and security under his Majesty's auspicious government and protected by the blessings that we formerly enjoyed under your Excellency's mild administration, and which we ardently wish to have renewed.

"Preserving in our loyalty and unshaken attachment to our gracious Sovereign, in this time of distress and trial, and anxious to testify our affection for him, we have embraced the earliest opportunity to petition the Kings Commissioners, that they would restore this City and County to his Majesty's peace, although many of the most respectable citizens, and a much greater number of the inferior classes, have been drawn off by the calamities of war, or sent prisoners to New-England and other distant parts; yet we hope that the numbers still remaining, and have voluntarily subscribed, may be deemed sufficient to entitle this district to his Majesty's grace, with the beneficial offerings which our humble address for the royal cause, pleat in their behalf with the Commissioners, from whose well-known humanity, benevolence, and enlarged sentiments, we have the most flattering expectation.

"To your Excellency we naturally look for assistance; we therefore request that you would be pleased to present our petition to the Commissioners, and otherwise exert yourself that the prayer of it may be granted; as it is our fervent desires, and what we esteem the greatest earthly facility, to remain subjects of the British Government, in union with the parent State.

Division orders are issued from Washington's headquarters at Kingsbridge for the disposition of the division of the army under command of Maj.-Gen. Heath. Two regiments of militia, now posted on the Harlem River, are "to pass over the new bridge and join Colonel Stewart's regiment, and form a flank guard." —5 Am. Arch., II: 1096-97.

Gen. Alexander McDougall, writing to the committee of arrangements, from "Camp Harlem," says in part: "... The enemy appear very shy. Our advanced encampment and theirs are within three hundred yards of each other in Harlem Lane. The works they have thrown up are evidently calculated for defense..." —5 Am. Arch., II: 1096.

The Committee to whom was referred the claim of Mr. Nicholas Haskell, for providing an Officer for securing the Records of this State, for a Guard-Room for the Guard appointed to watch the said Records, and for Fire-Wood and Candles supplied the Guard, have taken the same into consideration, and therupon agreed to the following Resolution: Resolved, That there be allowed to Nicholas Bayard, for providing an Officer for securing the publick Records of this State, a Guard-Room and Fire-Wood and Candles supplied the Guard over the said Records, the sum of fifty pounds." —Am. Arch., III: 254.

Washington wrote to the president of congress: "... ten or 18 eleven ships, which have been prevented passing Hell-Gate for two three days for want of wind, are now under way, and proceeding up the Sound. Among them there appears to be two frigates, the rest probably have in stores, &c. ..."—Am. Arch., IV: 1116.

The British forces under Howe take up their position "on the heights of Pelham's Manor our Left to E. Chester Creek & Right to New Rochelle, our F" extended about 2 Miles East North or N E."—Roberts' Jour. (M.S.). See also Kemble's Jour., 92-94.

Solomon Nash records: "all our Rigiment Employ'd in gitting Cannon and morters over to the Jerseys Likewise in giting other things of the Island."—Nash's Jour., 37.

It is reported in the British camp that Gen. Lee is commanding "the Rebel Army" and that it is 20,000 strong.—Roberts' Jour. (M.S.).

"A severe order against Plundering, to no Effect; about this day received accounts of the arrival of the Hessians, long expected." —Kemble's Jour., 94.

The name of Fort Constitution is changed to Fort Lee.—5 Am. Arch., II: 1176.

On this date, the Howe War Plan, engraved by William Faden, was published. It is reproduced and described as Pl. 45-b, Vol. I. See also Aug. 27, 1776; and 1778. Cf. the Chart and Plan of the Harbour of New York & the County Adjacent, pub. in the Political Mag., Nov. 1818, and reprinted in Man. Conn. Gaz. (1870), 844.

On these maps, Ellis Island appears as "Bucking F." It also appears as "Bucking L." on Souther's map, which was engraved and published by Faden, Jan. 1, 1779. For the origin of the name Ellis Island, see Jan. 20, 1785.

A letter from New York expresses "the great satisfaction of the loyal part of its inhabitants, who have for a long time suffered every hardship from a set of tyrants that is possible to be conceived... The Hessens do all that is possible to alleviate the sufferings of a persecuted people, who rather than turn rebels have despaired death and ruin... Almost all the New Yorkers have returned to their allegiance..."—Campaign of 1776, part 2, 174.

An English officer, writing from his "Camp near New York" to a friend in London, says: "... We have run a strong Line strengthened with Redoubts across that End of the Island where they [the Americans] are [his account is too brief to give], and a Body of Men under the Command of Lord Percy (who commands upon this Island and its Dependencies) are left to defend them, and observe the Enemies Motions. General Howe landed some days since upon the Continent about six Miles from King's Bridge and the Day before Yesterday took Possession of a Work of theirs, by which he has entirely cut off their Retreat to the New-England Governments. In the above Attack we had five Men killed and seven wounded;... The Hessens have no Retreat left, but over the North River into the Jerseys, and that will not remain open long, as Yesterday there arrived a Reinforcement of near 9000 Germans, whose Transports going up the North River, leads me to think they are to be landed for that Purpose—if so the case be the Case, the War must be near an End; they desert very fast to our Army, and by the Account of those that come to us, they go off in great Numbers, our own Hessians... "We have a very strong Army here; Gen. Howe has with him 18,000; upon this Island are 5,000, and on board the Transports that arrived Yesterday are near 9000; so that in the Whole we cannot have less than 35,000 effective Men, as good Troops, and in as good Spirits as any ever were..."—St. James' Chron., D 19-21, 1776.

We are Inform'd y' time of this Time a very considerable Reinforcement hath Join'd y' British Army, among whom it is said there are a Regt. of Waldeckers several of Hanoverians & several of Brunswick; we were this Day shewn one of y' Hessian Gen's who had also lately Arriv'd."—Diary of James Pich (MS.), 77.

The following news items are published: "The Subscription for the Emery of the Church of England in America, who have suffered by the Rebellion, amounted to above Six Thousand Pounds Sterling, when the last Accounts came away."
"Many of the Inhabitants are come into Town; and many others who were obliged to fly for their Lives, are coming in daily..."—N.Y. Mer., Oct. 21, 1776.

"The order of march is issued from Washington's headquarters "to be observed by the Division of the Army under the command of Major-General Heath, in their route from this place [Kingsbridge] to White-Plains."—5 Am. Arch., II: 1164-65. For a detailed account of this movement, see ibid., Dec. 10-12, footnote.

British marching orders are also issued.—See Orderly book, British Army (MS.), N.Y. H.S. After this orders of this command were issued from New Rochelle, White Plains, Debbis Ferry, Courtland's Manor, DeCancy's Mill, New Bridge, Aquasunnec, Newark, Amboy, Trenton, and Brunswick (to Jan. 25, 1777).—Ibid; Kembler's Diary, Nov. 94.

The American army is encamped on Valentine's Hill, Westchester Co., to which place Washington has moved his headquarters. He goes early this morning "to visit the posts on the left of our line and the White-Plains." He sends various orders from White Plains, the British having advanced from New Rochelle to "Moraneck."—5 Am. Arch., II: 1165, 1166-67. See also Loring, Field Book of the Am. Rev., II: 625.

The Hessians, Waldeckers, and other British forces disembark from their ships, and pass "up the East River in a Multitude of Flat-bottomed Boats and other Vessels, in the highest Spirits imaginable." It being "a very fine Day, the Scene was rendered extremely beautiful by the Crowds upon the Water, cheering their Military BREthren and other Spectators on Shore, and making the Hills resound with the cries of the French, English, Dutch, and Hessians, accompanied by the Harmony of their Voices. These have added an agreeable Reinforcement to the Army, and are to all appearance as fine Troops as any in the World."—N.Y. Mer., Oct. 24, 1776.

Washington transfers his headquarters from Harlem Heights to White Plains. Congress is informed that this movement is made "to counteract the operations of the enemy declining an attack upon our front. They have drawn the main body of their army to Frog's Point (see Oct. 12), with a design of hemming us in, and drawing a line in our rear."—5 Am. Arch., II: 1014, 1024.

Fitch writes: "we are... Inform'd y2 y Prisoners in Gen'1 grow Remarkably Sick & Die very fast."—Diary of Judge Fitch (MS.), 78.

The Governors of King's College in this City, are requested to meet at Hull's Tavern, on Thursday next (Oct. 24), at 3 o'Clock in the Morning, on Business of Importance. It is hoped as the Messenger is out of Town, that the Gentlemen will attend punctually without further Notice."—N.Y. Mer., Oct 21, 1776.

Writing to Washington from Fort Lee, Gen. Greene says, in part: "General Putnam requested a party of men to reinforce them at White Plains. Washington sent between two and three hundred of Colonel Durkee's regiment. "We shall get a sufficient quantity of provisions over to-day for the garrison at Fort Washington. General Mifflin thinks it not advisable to pull the barracks down yet. He has hopes of our army returning to that ground for winter quarters. I think this would be running too great a risk, to leave them standing in expectation of such an event, there being several strong fortifications in and about King's Bridge. If the enemy should throw in a thousand or fifteen hundred men, they could cut off our communication effectually; and, as the state of the barracks are, they would find exceeding good cover for the men. But if we were to take the barracks down—even if the boards were not removed—it would in a great measure deprive them of that advantage..."—5 Am. Arch., II: 1221.

See, further, O 27.

The anniversary of the King's accession to the throne is celebrated "with every Demonstration of Joy." "The Flag Ships hoisted the Royal Standard; and all the Ships in the Harbour gave a Salute of twenty-one Guns each. So noble an Appearance, and so grand a Salute, were never known in this Fort before. The two Admiral Ships, the Dutch, English, and many loyal Toasts were drunk upon the Occasion."—N.Y. Mer., Oct. 25, 1776. See also Fitch's Diary (MS.), 80.

Kembler records: "Marched in two Columns, the right led by Lieut. Gen. Clinton, left by Lieut. Gen. De Heister; occupied Grounds in East Chester, on the White Plain Road, Wards Head Quarters, a noted Rebel. The Enemy in three separate Camps in our Front, on the opposite of the Branks [Bronx], and advantageously posted on rough and Commanding Height's."—Kembler's Jour., 94- Oct. 95.

Gov. Tryon's answer to the address of the inhabitants of the city (see O 16) is as follows: "Sir: The address you delivered to me, in behalf of the inhabitants of the City and County of New York, cannot fail of being highly agreeable to me, as it was accompanied with a dutiful petition and representation from them to the King's Commissioners for restoring peace to his Majesty's Colonies... I have cheerfully embraced the opportunity of presenting this day the address to Lord Howe, who was pleased to signify to me 'he would take the earliest opportunity of communicating with General Howe on the occasion.' The inhabitants may be assured I shall support their wishes with my best endeavours, although the completion of them must be left to the decision of his Majesty's Commissioners, in whom the highest national confidence is reposed..."—5 Am. Arch., II: 1262.

A Court of inquiry, at White Plains, of which Brig.-Gen. John Morin Scott is president, takes evidence on the charge against Col. Tyler, of cowardice and misbehavior before the enemy on Sept. 15, when the British took the city.—5 Am. Arch., II: 1251-54.

Gen. Greene writes from Fort Lee to Gen. Mifflin: "The people have been employed on the other side in getting the boards together at Fort Washington [see Oct. 24] and the ferry, some have been brought from King's Bridge. To-day I send up to Colonel Lasher to know what assistance he could give towards taking down the barracks, and bringing off the boards; and had for answer that he had orders to burn the barracks, quit the post, and join the army, by the way of the North River, at the White-Plains..."—5 Am. Arch., II: 1262.

Mr. Reginald Pelham Boston, as a result of field-work of an historical study, shows, in a report on the subject of "Militia Camp Life on Upper Manhattan Island and Adjacent Mainland during the American Revolution, Disclosed by Recent Archeological Excavations," that, while Gen. Greene was writing the above letter, "these buildings on King's Bridge Heights were being reduced to ashes." Three days later, the British appeared on the scene to find "everything of value gotten away," and the King's and Farmer's bridges cut down. Mr. Bolton adds: "There is good reason from the foregoing to suppose that the barracks upon Manhattan Island, were not entirely destroyed or removed, as they were in use up to the time of the assault which was made by the combined forces of Howe and von Knyphausen on September the 16th. The possession of such shelters as these barracks afforded, however, they may have had of immense value to the captors of Fort Washington at that period of the year, and it is certain that those near by the fort and probably elsewhere were promptly occupied by the British and Hessian regulars. Thus the structures which had for several months [several days—see S 24] formed the only shelter of the poor patriots who sheltered through the chill autumnal nights during the defence of the heights, and upon which much of their labor and some of their high hopes had been expended, passed into the possession of their opponents..."—20th Ann. Rep., Am. Scm. & Hist. Pres. Soc. (1915), 374. See also 21st Ann. Rep. (1916), 133-40.

In the same letter to Gen. Mifflin, Gen. Greene also says: "We have had a considerable skirmish on York Island to-day. The cannonade began in the morning and held until evening, with very short intermissions. A ship moved up opposite Fort No. 1. Colonel M'Gaw got down an eighteen-pounder and fired sixty shot at her. twenty-six of which went into her. She skipped her cable and left her anchor, and was towed off by four boats. I think we must have killed a considerable number of their men, as the confusion and din exceeded all description. Our Artillery behaved incomparably better than Colonel M'Gaw's. I continued with them on the ship and in the field... We have brought off some of the enemy from the field of battle, and more are still lying on the ground dead..."—5 Am. Arch., II: 1263.

Another letter from Fort Lee states: "This morning, about seven o'clock, two frigates moved up the North River, and came to an anchor near Bourdett's Ferry, apparently with an intention to
THE ICONOGRAPHY OF MANHATTAN ISLAND

THE FERRY
stop the ferry-way, and cut off the communication between this place and Fort Washington. The enemy at the same time appeared on Harlem Plain, and Colonel Magaw, who commands on York-Island, began to play on them with great advantage, and ruled the highest up about twenty times." The action is further described in this letter. Regarding the action on the land, the writer continues: "The enemy by this time had begun a smart fire on the island with field-pieces and mortars. Our men returned the compliment. They were out of their lines great part of the day. There were but few discharges of small-arms. Our men killed about a dozen Hessians, and brought them off."

"This Day we were Inform'd y^e Gen H[owe] had advanc'd with his Army as far as y^e White Plains, & y^e no very Considerable Action had as yet happened in those parts; We also Inform'd y^e y^e two Armies were this Day Engag'd between here and Fort Washington."—Diary of James Fitch (M.S.), 81.

The battle of White Plains occurs. It is Washington's opposition against the attempt to march to Manhattan Island from the north. After two unsuccessful attacks, the British finally force the Americans to retreat.—Winser, VI: 286. For contemporary accounts by both sides, see Kemble's Jour., 95, and L. I. Hist. Soc. Memoirs, III, Part II: 139.

There was published in London, Feb. 25, 1777 (q.v.), a "Plan of the operations of the King's army under the command of General Sir Wm. Howe, R. H. in New-York and New-Jersey, against the American forces commanded by General Washington, from the 12th of October to the 28th of November, 1776. Wherein is particularly distinguished the engagement on the White Plains, the 28th of October. By Claude Joseph Sauthier." The plan is reproduced in Winser, VI: 336. For other contemporary maps showing the military movements of the year in the vicinity of New York, see 249, 249. 22: 27.

"The Liberty Pole at y^e Laboretory was this Morning Taken down. . . ."—Diary of James Fitch (M.S.), No. 81, in N. Y. Pub. Library. On Nov. 26, Gov. Tryon wrote to Lord George Germain: "The Liberty Pole erected some years ago in this City, and which was considered as a monument of insult to the Government, and of licentiousness to the people, was last month by my recommendation to the Inhabitants, very properly and very quietly taken down and removed by them."—N.Y. Col. Docs., VIII: 691.

For a chronological history of the five liberty poles, which stood on two sites, very near together, and of which this was the last, see F 6, 1779. See also "The Liberty Pole on the Common," in N. Y. H. S. Quart. Bull., Jan. 1920.

Col. H[enry] B. Magaw, cited above, appears to effectually remove the erroneous supposition of Dawson that Capt. Wm. Cunningham, who had been appointed provost-marshal of the British forces (see Ag 4, 1774), "revenged himself, for the insult offered to him on the 6th of March, 1773 [q.v., by cutting down the Liberty Pole, which, for more than ten years had grinned 'the Commons']."—See "The Park and Its Vicinity," by Henry B. Dawson, in Man. Com. Coun. (1852), 468-73.

Dawson was probably right, however, in his statement which follows, that "afterwards in his official capacity," Cunningham "added new terror to the 'New Goal' or 'Provost'" (see N 14, 1777).—Ibid.

An editorial asserts that "The Nation is most highly incensed at the Declaration of Independence by the Congress, and at their impudent Abuse of the King. The warmest Advocates of America find it necessary to be silent now, as the Cause of the Colonies, maintained against every Offer of Conciliation and with such avowed Emnity to the Constitution of Great-Britain, is become absolutely unpopular."

"The Parliament was expected to meet by the End of this Month at farthest; and 'ts supposed that the Declaration of the Congress produce the utmost Resentment and Unanimity. If so; has not the Congress proved itself the worst Enemy that America ever had?"—N.Y. Merc., O 28, 1776.

New reports of the day relate that "Several Gentlemen and other Inhabitants of the Town, who had been forced to fly by the Rebels, have returned in the Course of this Week. Among others, Mr. White, one of his Majesty's Council for this Province, and the Rev. Dr. Achnhuty."

"The Town was apt to wear again a cheerful Appearance; and the Markets are increasing daily."

"The Ships of War and other Vessels, make near 500 Sails within the Harbour."—Ibid.

"This Day Genl Kniphausen advanced towards King's Bridge—F^v Independence & taken possns of."—Robertson's Jour. (M.S.).

"A wag among the British in New York advertise: 'Wanted, By a Gentleman, fond of Curiosities, who is shortly going to England, a Parcel of Congress Notes, with which he intends to pay some Rooms. Those, who wish to make something of their Stock in that Commodity, shall, if they are clean and fit for the Purpose, receive at the Rate of One Guinea per Thousand, for all they can bring, before the Expiration of the present Month. Enquirer of the Printer. N. B. It is expected they will soon be much lower.'"—N. Y. Merc., O 28, 1776.

The following notice is published: "If any person into whose hands part of the College apparatus or books, which were deposited in the City-Hall in May last, or any of Dr. Clossey's books, which were deposited in the closet near the organ loft in St. Paul's, will bring them to the Steward's Mattress, the house where they were lately kept, the favour will be very gratefully acknowledged; and whatever trouble or expense such person may have been at in carrying such instruments or books, the doctor will very gratefully pay them for."—N. Y. Merc., O 28, 1776. See also Ja 27, 1777.

Gen. Greene writes from Fort Lee to Washington, whose headquarters are still at White Plains: "The ships have fallen down the River to the South River, and East River; those which advanced up the White Plains, and on the hill where the Monday action was, have drawn within their lines again."—5 Am. Arch., II: 121. This withdrawal of the British is thus explained and described in a letter (dated Oct. 50) to Lord George Germain by Hugh, Earl Percy, lieutenant under Gen. Howe, who was left in charge of Harlem Heights, when Howe's troops marched into Westchester County [see No. 112], in the end gave up the island to Washington's army (see O 10 and 16): "I was left to defend the island with three British brigades and one Hessian [see O 11]. One of them encamped near New York, and the rest defended our redoubts in the north part of the island." He describes the action in which the troops under his command were engaged, and adds: "having now fully answered the Genl's intentions and being indeed unable to remain longer on account of the smallness of our numbers and the consequence of the island of New York which this corp was left to guard, I determined to return to the old position in our lines as soon as the evening favored the retreat." He recounts how the retreat was successfully carried out, "the enemy not finding we were gone till next morning." In conclusion he says: "I do assure you we were almost a little too industrious to give the Field all in agree calling the manoeuvre a masterly one. The rebels were taken in, for whilst they were observing my manoeuvres, Genl Kniphausen took from them their works at King's bridge which they had left weakly guarded, bringing almost all their forces to oppose me."—Letters of Hugh, Earl Percy, ed. by Charles Knowles Bolton (Boston, 1902), 72-75, citing 9th Rep. of the Royal Commission on Hist. MSS. (London), III: 86.

"We are Inform'd y^e a large number of Bostons are gon east up River, & y^e 2 Text Armies near East Chester, continue to Fight almost every Day."—Diary of James Fitch (M.S.), 83.

A British officer "in York-Island" writes to a friend in London regarding the tattered clothing of the "Rebel" soldiers. He states that they are well supplied with provisions. "When they retreated, they left fifteen hundred men in Fort Washington; and next day fifteen hundred more came into it from Fort Constitution; so that they have now a garrison of three thousand men under the command of General Lee, who I find is to be the scape-goat, and I fear will be destined to the cord."

"5 Am. Arch., II: 1293-94.

King George III issues proclamations for a general fast throughout England, Scotland, and Wales on Dec. 12 and 13, and for prayers for deliverance of our loyal subjects within our Colonies and Provinces in North America from the violence, injustice, and tyranny of those daring Rebels who have assumed to themselves the exercise of arbitrary power."—5 Am. Arch., II: 1389-91.

Gen. Greene writes from Fort Lee to Washington, who is still
CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776–1783

1776
Oct. 31
at White Plains, that "The enemy have possession of Fort Independence on the heights above King's Bridge," having made their appearance on the night of Oct. 29. He asks about holding the ground from King's Bridge to the lower lines.—5 Am. Arch., II: 1594.

The Rev. Chas. Inglis, rector of Trinity Church, writes an extended account of the condition of the Anglo-American church in America, and particularly in New York City, addressing it (as appears by the postscript) to "The Rev. Dr. Hind." It is a summary of recent happenings involving the Church of England. Dr. Inglis refers particularly to the difficulties experienced by a loyal clergyman of the Church of England in 1776, prior to the city's capture by the British. The clergy, he says, were "viewed with peculiar vanity and malignity by the disaffected." Although "civil liberty was the ostensible object," he believes "that an abolition of the Church of England was one of the principal springs of the distress of the leaders of that nation."

The clergy of the Church of England preached "without touching on politics," and endeavored to "cherish a spirit of loyalty among their people." This "gave great offence to our flaming patriots, who laid it down as a maxim, 'That those who were not for them were against them.'" Various incidents are mentioned by Mr. Inglis to show brutal treatment of the clergy.

The clergy increased their embarrassments. "To officiate publicly, and not pray for the King and royal family according to the liturgy, was against their duty and oath, as well as dictates of their conscience; and yet to use the prayers for the King and royal family would have drawn inevitable destruction on them. The only course which they could pursue, to avoid both evils, was to suspend the public exercise of their function, and shut up their churches. This was accordingly done."

After the clergy "had ceased to officiate publicly," Inglis writes, "several of the rebel officers sent to me for the keys of the churches, that their chaplains might preach in them; with these requisitions I peremptorily refused to comply, and let them know that 'if they would use the churches, they must break the gates and doors to get in.' . . . Upon this they desisted, and did not occupy any of the clergy. After this, no Army was ever better supplied, nor in better Spirits for engaging. The Inhabitants are coming from New York, and opening shops. We are in great Want here of every Material belonging to Shipping. Tar sold the other Day for three Guineas a Cask, it is much wanted, so is Pitch, Rosin, Sheathing, Nails, Cordage, and Sailcloth, which would yield a good Profit."—St. James's Chron., D 21–24, 1776.

Robertson records that on this day he "Attended the Genl. to King's Bridge to reconnoitre the Rebel's Works."—Robertson's Jour. (MS.).

Thus, Clarke, in his will of this date, leaves his estate to his wife and her heirs. Pelletreau says of this bequest: "Captain Thomas Clarke was the owner of the farm which he named 'Chelmsford' and [which] still retains its name from east of eighth avenue to Hudson river, between 21st and 50th streets. The greater part of this tract actually came in possession of the daughter Charity, who married Rev. Benjamin Moore, Bishop of New York, and the mansion built on this estate, was the home of his son, Clement Clarke Moore . . ."—Abstracts of Wills, in N. Y. H. S. Collections, IX: 36.

Robertson records that on this day he "Attended the Genl. to King's Bridge to reconnoitre the Rebel's Works."—Robertson's Jour. (MS.).

Kemble writes: "8 or 10 of our People taken Marauding; Scandalous behavior for British Troops; and the Hessians Outragedly Licentious, and Cruel to such a degree as to threaten death to all such as dare obstruct them in their depredations. Violence to Officers frequently used, and every Degree of Insolence offered."—Kemble's Jour., 98.

The British have broken camp and gone towards the North River and Kingsbridge. Washington expects that they will invest Fort Washington.—Writings of Geo. Washington (Ford ed.), V: 7–9, 24, 36. For a detailed account of the movements of the British forces since the battle of White Plains, see Kemble's Jour., 96–98.

Gov. Tryon returns to New York.—V. 7: Merc., N. 4, 1776.

We hear'd a Report y' Gen. Burgoyne had taken possession of Ticonderoga & y' our Army had Retreated over Lake George; but we yet hope y' this Report is without Foundation—Our
THE ICONOGRAPHY OF MANHATTAN ISLAND

1736. People who had been confined at Long Island, were this Day bro't into 8th City. — "Diary of James Fitch (MS.), 91.

10. The "Peruse" (Capt. Elphinston) brings in two prizes, valued at $5,000. — N. Y. Merc., N. 11, 1776. See also in ibid. mention of prizes brought in on Nov. 6 by the frigate "Lively." (Capt. Bichop.) For later prizes, see ibid. Nov. 21; Montaguer's Jour., 421; Gaine's Jour., 421, 64, etc.

11. The following news items are published in New York: "A Gentleman lately arrived from Philadelphia, says that it was the prevailing Opinion there, that a French Fleet of great Force would arrive at New-York before Christmas, which would enable the Provincials not only to recover that City and the adjacent Parts, but destroy the British Ships at present in the Harbour, and of Course reduce the British Army to the last Extremity. — Such are the Auknowledges and Falsehoods, with which the Leaders of the present Rebellion endeavor to keep up the Spirits and Opposition of their deluded Followers!"

"A Detachment of the Rebels still continue at Fort Washington, which is constructed with Masonry, &c. and, his said, cost near 70,000 l. They have given out that they will defend it to the last Extremity."

"Several Rebel Privateers, &c. have been lately taken and brought into this Harbour, by some of His Majesty's Ships."

"A Large Fleet of Transports, under Convoy of some Men of War, are preparing to sail Homewards."

Col. Stirling, his Excellency Governor Tryon, has mustered the Militia of Westchester County, and that above 1500 have already joined him, and taken the Oaths of Allegiance to His Majesty. — N. Y. Merc., N. 11, 1776.

Hugh Gaine, having espoused the royalist cause, returns to New York from Newark and brings out his paper The New-York Gazette and the Weekly Mercury, from his former shop in Hanover sq. (see O. 1, 1776), with the former head-dress and his name in the imprint. He continued to print it at least until the date of Nov. 10, 1775, which is the date of the last issue found (Nov. 1671); with this issue it was apparently discontinued. — Brigham, A. A. S. Proc. (1917), 423; Early Newspapers, II: 422.

According to an advertisement of the hospital's "physician and surveyor," who desires certain supplies, the military hospital is situated "in Beekman-street, near the Chapel." (St. George's.)

N. Y. Merc., N. 11, 1776.

One division of the British army encamps 'within 4 miles of N. B.C.,' the other encamps on Valentine's Hill. — Robertson's Jour. (MS.).

A proclamation is issued by the two Howe's, commissioners for "restoring Peace to His Majesty's Colonies and Plantations in North America," commanding all "assembled together in Arms against His Majesty's Government, to disband Themselves and return to their Dwellings, there to remain in a peaceful and quiet Manner." They also command "all such other Persons as are assembled together under the Name of General, or Provincial Congresses, Committee, Conventions, or other Associate Bodies, by whatever Name, or under the Colour of any Authority from any such Congresses, . . . take upon them to issue or execute any Orders for levying Money, raising Troops, fitting out armed Ships and Vessels, imprisoning, or otherwise inundating His Majesty's Subjects, to desist and cease from all such unreasonable Acts and Doings, and to relinquish all such unparaphram Power and Authority, so that Peace may be restored. . . . There, and make known to all men, that 'every Person who within Sixty Days from the Day of the Date hereof shall appear before the Governor . . . shall claim the Benefit of this Proclamation, and at the same Time testify his Obedience to the Laws, by subscribing a Declaration in the words following: 'I, A. B. do promise and declare, that I will remain in a peaceable Obedience to His Majesty, and will not take up Arms, nor encourage Others to take up Arms, in Opposition to His Authority,' shall and may obtain a full and free Pardon. . . . "— N. Y. Merc., J. 6, 1777.

The British army marches "towards De Lancy's Mills" and encamps "at the Bruns in our Front our Right covering the Conn. to Morris's, on the Sound — & our left towards the heights & P't Independence." — Robertson's Jour. See also Kemble's Jour., 99.

14. The British army advances. — The Army under Gen. Grant had been posted at Miles Sq't & the 1'st Batt. 1776, 1777. From Valentines hill fell Back towards Courtlands house taking the left of the Army stretch towards the N. R' about 1 mile in F't of F't Indep., . . . The Nov. 1 & 2d 1st 12 ordered near H4 Q'ts at De Lancy's Mills. — Major Dixon had Raised one or two small Batt's to favor an Attack to take post on the Hill where F't Washington stood. — "Robertson's Jour."

A item of London news states: "The very identical Dr. Frankly, whose Lord Chatham so much cared for, and used to say he was proud in calling him his Friend, is now at the Head of the Rebellion in North America." — St. James's Chron., N. 12-14, 1776.

"This night a strong Working Party was employ'd Rais' Battery—en Barbet—for 20 field Pieces & How's along the side of Harlem River to cover an Attack to be made on V'd Island. — Robertson's Jour."

John Reuber, a Hessian soldier, records in his diary: "15 Novr., came the order from the Headquarters of the English General-field-marshall Clinton, that Fort Washington should be captured by 4 attacks; by the English and one by the Hessians. 1. General Matthews. 2. Col-Lieutenant Stirling. 3. Lord Percy. 4. General Von Kniphausen, near whom Col. Wall with his brigade had the advantage on the North-port, where the ship of war lies and is to protect the flank; another ship of war lay at the South-haven and is to protect the English flank, when the thing comes off." — Battle of Harlem Heights, 229, citing a translation of the original MS. at Cassel, N. Y. H. S. Papers.

About one o'clock, Gen. Howe's adjutant-general made a despatch to the surrender of the garrison at Fort Washington, but is answered by the commanding officer, Col. Robert Magaw, that he would defend it to the last extremity. — Gen. Greene's letter to Col. Knox, written from Fort Lee on Nov. 17, in The Campaign of 1775, part 2, 100. For the text of Magaw's letter, see ibid., part 1, 275.

"The Batteries being finished for the Attack of Fort Washington, the Advanced Works were stormed this Morning, and the Fort surrendered in the afternoon." — From transcript, in Library of Congress, of the "Jour. of the Operations," etc., in Brit. Museum (Egerston MSS. 2135 f. 7). This "Journal" continues the British record of operations under Howe, — including the capture of Fort Lee by Lord Cornwallis on Nov. 19, and of Newbridge on the Hackensack River on Nov. 21.

Journals kept by officers employed with the British forces give detailed particulars of this engagement. Kemble writes, under this date: "In the Orders of the preceding day the 1st and 2d Light Infantry and Guards were ordered to march this morning at four; the Reserve at an hour before day Light; General Kniausens Corps to receive their Orders from him: the whole to Attack the Rebels on the Hills leading to Fort Washington. . . . The first Landings of British Ashore . . . at Fort Xx, the next at 12 at Noon, the tide not permitting it sooner. . . . At the same time the Hessians Advanced upon the right, the Brigade of Guards & Light Infantry landed in the Harlem River were opposed by a small Body of Rebels, who soon fled, but carried off a piece of Cannon they had in a Redoubt, which was meant to prevent our landing here: we received little loss — only 4 or 5 Killed and a 10 or 10 Wounded the next Day."

"The 42d Regt. Attacked at the same time near Morris's House, where they were opposed and lost."

"Lord Percy attacked at the same time and Carried all the Rebel Lines with little loss, taking them in flank as he approached them; by two o'clock were in possession of all their Forts and Redoubts except Washington, and cut them off from Escaping to the Jersey Shore, by his latter done by the Hessians. Our Troops behaved with their usual spirit and have added Laurels to the British Nation."

"The Attack, having commenced at 12, was over about one at 4 in the Afternoon the Rebels Surrandered the Fort, having treated for some time before with our Officers, particularly the Hessians, who Cut off their Retreat to the Water, & desired the honors of War. It is amusing to say that they had not above 12 Men Killed and as many Wounded. The Officers to keep their side Arms, the Men to lay down their Arms, which was done about five. To our shame, tho' they Capitulated for the Safety of their Baggage, they were striped of their Wearing Apparel as they Marched out by Hessians, till a Stop was put to it by making them take a different Route. They were so thronged in the Fort that they could not have subsisted there above 3 Days, had not Grant under Gen. Grant had been posted at Jericho Hills. Of Prisoners, Officers included." — Kemble's Jour., 90-100. See also the map entitled "Attacks of Fort Washington by His Majesty's

An American woman, Margaret Corbin, was wounded in this battle Nov 15, 1776.

The following summons to surrender was sent to the commander of the fort: "The Commander in Chief demands an immediate and categorical Answer to his second Summons of Fort Washington. "The Garrison must immediately surrender Prisoners of War, and give up all their Arms, Ammunition and Stores of every kind, and send all Field Officers to Head-Quarters as Hostages; to so doing, the General is pleased to allow the Garrison to keep possession of their Baggage, and the Officers to have their Swords."

"Agreed to Robert Magaw, Col. 5th Pennsylvania Bat. Commanding at Fort Washington."

—N. Y. Merc., Dec 2, 1776.

Robertston writes: "A Number of Flat Boats having pass'd up the N. River to King's Bridge unperceived the Night Before—Four Diff' Attacks were ordered to be made by day Break on the Lines and Diff' Strong grounds on York Island In order to reduce Fort Washington. "He then gives a vivid description of the attack and the battle that followed with a battle-scene and all. "Tho' the Genl had sum'm'd the Fort the Night before—They [the Americans] were all admitted as Prisoners—and the officers their Baggage & swords about 2960 were taken alive their loss from their situation during the Attacks was but Trifling."

Robertson's Jour. (M.S.).

A graphic description of the capture of Fort Washington was written by John Reuber in his journal under date of "17 Novbr." (error for Nov 16): "... in the morning before day-break, all the regiments and corps were assembled, the Hessians on the right wing at the north-haven; the English troops upon the left wing at the south-haven. When it was new day and the Americans perceived us, but nothing more very plainly, at once, these two ships of war, on both sides, made their master-strokes upon the fort, and we began at the same time on the Lines made several moves, and all regiments marched forward up the hill and were obliged to creep along up the rocks, one falling down alive, another being shot dead. We were obliged to drag ourselves by the heeb-tree bushes up the height where we could not really stand. At last, however, we got about on the top of the hill where there were trees and great stones. We had a hard time of it there together. Because they had now had no idea of yielding, Col. Hall gave the word of command, thus: 'All, that are my grenadiers, march forwards! All the drummers struck up the march, the hautboy-players blew. At once all were mingled together, Americans and Hessians. There was no more firing, but all ran forward pell-mell upon the fortress. Before we came up, the Americans had a trench about the fortress, as soon as we were within which, the order came to halt. Then the Americans had a maneuvre, observed us, but then came the command: 'Hold you all are prisoners of war.' The port was at once demanded by Genl. V. Kniphausen. The rebels were allowed two hours for capitulating; when they were expired, the fort was surrendered to General V. Kniphausen with all the munitions of war and provisions belonging thereto, within and without the fort; all guns and arms were to be laid down, and when this was done the rebels and the old Losberg, being made to form into two lines facing each other, they were required to march out between the two regiments and deposit their guns and other weapons. Then came the English and took them to New York to custody, and when the first transport was off, the second marched out of the citadel and was as strong as the first, and they also were conducted to New York into confinement. And when all this was got through with, it was night. Thus the Hessians took possession of the fort, and the rest marched again round to Kingsbridge into our old camp we had before stopped so long. Then came the order that the fort should be called, Fort Kniphausen."

"Battle of Harlem Heights, 229-3, citing "The Original MSS. at Cassel," the translation being in the N. Y. H. S.

A more circumstantial military account of the capture was written by Joseph Wieland, a native of the Hessian, contempt, pub. in ibid, 231-34, and citing the translation of the original MSS., in the N. Y. H. S.

A British officer thus described the attack on Fort Washington in a letter of Nov 20: "On Saturday last [Nov 16] we attacked Fort Washington, on the island of New York, the strongest port that ever was occupied by an army; the difficulties we had to surmount are almost incredible; hills covered with wood, and almost perpendicular; from the fall of the leaf the freezing weather, in short, there was every thing to favour the Rebels in point of ground. We attacked the south and east sides of the ground; the Hessians, in two columns, made their attack on the north. They behaved with distinguished bravery; ... Lord Percy led on the troops under his command with great spirits, and forced the Rebels works with very little loss; his horse was twice wounded, but fort's ship received no hurt: the Rebels all ran into the fort, where they had 1000 firelocks charged: ... They hung out a flag of truce, and asked leave to surrender with the honours of war; they were sent word, by Lieut. Genl. Kniphausen, that if they did not surrender in thirty minutes, the fort should be stormed, and every man put to death: they instantly complied with the terms, marched out of the fort, and grounded their arms made 250 prisoners, with 2000 clothing for two battalions. At twelve at night they were marched prisoners at New York."—Linden Packet, Ja 6-8, 1777.

"A Gentleman, who saw the Action on the Kingsbridge Side, affirms, that nothing could exceed the Firmness and Intrepidity of the German Troops in making their Attack, nor the Alertness and Vigor of the Highlanders in ascending Rocks and Precipices almost insurmountable."

"An Officer, who was present with Lord Percy's Detachment on the Haerlem Side of the Attack, informs us, that Lord Howe animated the Troops by his Presence, and was near Lord Percy during the principal Part of the Engagement."—N. Y. Merc., N 25, 1776.

On the American side, Gen. Greene, writing from Fort Lee on Nov 17 to Col. Knox, thus descried the surrender of Fort Washington: "General Washington, General Putnam, General Mercer, and myself, went to the island to determine what was best to be done; but just at the instant we stepped on board the boat the enemy made their appearance on the hill where the Monday action was, and began a severe cannonade with several field-pieces. Our guards soon fled, the enemy advancing up to the second line. This was done while we were crossing the river and getting upon the hill. The enemy made several marches to the right and to the left,—I suppose to reconnoitre the fortifications and the lines. There we all stood in a very awkward situation. As the disposition was made, and the enemy advancing, we durst not attempt to make any new disposition; indeed, we saw nothing amiss. We all urged his Excellency to come off. I offered to stay. General Putnam did the same, and so did General Mercer, but his Excellency thought it best for us all to come off together, which we did, about half an hour before the enemy surrounded the fort. The enemy came up Harlem River, and landed a party at head-quarters, which was upon the back of our people in the lines. A disorderly retreat soon took place; without much firing the people retreated into the fort. On the north side of the fort there was a very heavy fire for a long while; and as they had the advantage of the ground, it appeared to be not very good. After the troops retreated in the fort, very few guns were fired. The enemy approached within small-arm fire of the lines, and sent in a flag, and the garrison capitulated in an hour. I was afraid of the fort; the redoubt you and I advised, too, was not done, or little or nothing done to it. Had that been complete, I think the garrison might have defended themselves a long while, or the enemy must have been stopped. This is a most terrible event. ..."—Drake's Life and Correspondence of Henry Knox, Maj. Gen., etc. (1873), 33-34.

Judge Oliver Burnham, one of Knowlton's Rangers, in his "Recollections," states: "Our Rangers were stationed near Harlem to watch the Enemy, and had Several Engagements with small parties of them. We remained until the Sixteenth of November in this situation, when we were warmly engaged on all sides. We were about two miles below the fort and well sustained the attack until the enemy made good their landing across Harlem River, when we had hard fighting to reach the Fort—Just as we had reached the gate the flag went out and Surrendered the fort and ourselves prisoners of war."—Johnston, Battle of Harlem Heights, 1776-80.

Pastor Shewkirk states in his diary that the capture of Fort Washington "was a matter of moment, as now one may hope that the communication with the Jerseys will be open, as also with the places up the East River; so that the Inhabitants may come to the city and provisions be brought in; especially wood, which is not to be had, and is extremely dear; a cord of oak wood, bought
1776 formerly for 20 s. now 4 l. 4s. — "Campaign of 1776, part 2, Nov. 120."

18 "With the capture of Fort Washington the whole island fell into the hands of the British. The Heer van Knyphausen, who had been Elector of Hanover, was called to King George III, were encamped on the heights of Harlem; and General Knyphausen, their commander, occupied the Morris house as his headquarters, and it continued to be so used by the British and Hessians until the evacuation of the island on the 25th of November, 1783."— Mag. of Am. Hist., VII: 100. See also Winsor, VI: 298, 338, 339; Fort Washington with a Hist. of the Defence and Reduction of Mount Wash-ington, by Reginald Pelham Bolton (1902); Relics of the Revolution... in Forts and Camps on Manhattan Island, by Bolton (1916); and L. M. R. K., III: 945.

A London news item stated that "Upon the attack of Fort Washington, the retreat was formed by the General of that name, in so masterly a manner, that all the Hessians publicly declared, that the first soldier in Europe could not have governed himself better; and that General Washington's conduct was of that style to do him great military honour."—London Packet, Ja. 3—6, 1777.

Robt. H. Harrison writes to Maj. Gen. Schuyler from Harlem on Nov. 20: "... The loss Sustained on both Sides is not ascertained. We know the Lines were warmly disputed in some Parts, particularly on the Pass above the Fort, leading to Kingsbridge. In that Quarter the Engagement was of great magnitude and heavy; and by the Information of one of the Train, who escaped on Monday Night, attended with a considerable Slaughter among the Hessians. The Firing there lasted, it is said, and was incessant from 2 & ½ to 3 hours. The Artillerist adds that Lieut. Col. Rawlins, who was posted there, maintained his Ground a long Time, within The Great Battery, and his Position with great Distinction, and, at Last, once more obliged to give Way, on Account of their infinitely Superior Number, and a Constant Succession of Troops. His Major, Otho Williams Esq., a young Gentleman who promised much Good Service to his Country, is reported to have fallen. Our Loss in killed is supposed to be inconceivable."—Hist. Mag., 3d ser., III: 180.

After the capture of Fort Washington, the British gave the name "Fort Stuyvesant" to the site. "For a constant account of this action at this point (where a monument was erected in 1909), see 14th Ann. Rep., Am. Scm. & Hist. Soc. (1909), 59; and for the dedication of this monument, Sept. 29, 1909, see 17th Ann. Rep., of this society (1910), 347-82. See also "Fort Tryon and Vicinity," by Edw. Haggaman Hall, in 22d Ann. Rep. of this society (1917), 735-90.

Soon after this day, Sauther made surveys for the beautiful map of the northern part of Manhattan Island which is reproduced and appears in the N. Y. Hist. Soc. Coll., Vol. I (Pl. 46). In his Map of the North Part of New York Island, Exhibiting the Plan of Fort Washington, now Fort Knyphausen, with the Rebel Lines to the Southward, which were Forced by the Troops under the Command of the R: Hon:ble Earl Percy on the 16th Nov. 1776, and Survey'd immediately after by Order of his Lordship, By Claude Joseph Sauther. To which is added the Attack made to the North of the British, Survey'd by Order of Lieut: Genl: Knyphausen. Published by Permission of the R: Hon:ble the Commissioners of Trade & Plantations. By Wm Faden, 1777." See also reproductions in Col. Hist. MSS. (Rev. Papers), II: 532; Man. Com. Coun. (1859), 120.

In 1806, Reginald Pelham Bolton prepared for the Ann. Scm. and Hist. Pres. Soc. an historical map of the west side of the upper part of Manhattan Island, from 1667 to 1799. This map is reproduced in the N. Y. Hist. Soc. Coll., Vol. I (Pl. 46). The map shows the location of Indian shell heaps, the planting ground of the Weck-quau-keek tribe, military roads during the Revolution, camp of the Seventeenth Foot (Cock Hill Camp), Cock Hill Fort, Fort Tryon 1776, the British Sanitary Camp 1779-1781, the pontoon bridge over Spuyten Duyvil 1779-1782, the North River redoubt 1779-1785, the Dyckman homestead 1789, Bastien Kortright's dwelling 1792, the Horse Taverne 1812, and fishermen's huts on Little Sandy Bay. A printed copy of this map is filed in the real estate bureau of the comptroller's office (map No. 215).

The note unmentioned that Fort George, showing its exact location, design, and dimensions, and one of the buildings which it contained at this period, are shown on Pl. 46-A, Vol. I.

The British assault the American fortifications on Laurel Hill (see 1776, Autumn), and carry them at the point of the bayonet—20th Ann. Rep., Am. Scm. and Hist. Pres. Soc., 446. Later, these works were enlarged and elaborated by the British and became Fort Clinton ( Ibid., 453); and in 1780 the British constructed here "commanding fortifications" and called the works Fort George.— Ibid., 451. See 1776, fall; 1780, and 1781; L. M. R. K., III: 944; Pl. 180; Vol. III.

"We were this day informed 't the Town of Harlem was burnt 17 Night before."—Diary of Jacob Fisher (MS.), 97. The report was not true.

"Some Time in ye Afternoon the Prisoners Taken at Fort Washington were brought into ye City."—Diary of Jacob Fisher (MS.), 97. These numbered about 3,000 men.—N. T. Merc., N 25, 1776.

Most of the churches and sugar-houses of New York were used as barracks for these prisoners. Pastor Shekirk reports that the Moravian Church, after some conflict of authority, was spared, and the. 25th of the month was taken, instead, by the North Dutch Church.—Shekirk's Diary, op. cit., 121-22.

Lieut. Oliver Babcock, of Knowlton's Rangers, writes in his diary (now in the Pension Bureau, Washington), under this date: "Came to York and Lodged in ye [Quaker] Meeting House." See also his entry of Dec. 15.—Johnston, Battle of Harlem Hills, 198."

"Three hundred and fifty prisoners were taken, besides many other prisoners. Graydon, given the following account of his experiences in New York: "Our men," he says, "were confined in churches and sugar-houses and quarters were assigned for us who were officers, in the upper part of the town, in what was called the holy ground. But... I ventured to take boarding at four dollars per week. The person with whom I boarded was a Mrs. Carroll, who, under the protection of General Robertson, consented to board us. For an account of the prisoners confined in these places, see "Memoirs of His Own Time," by Alexander Graydon, ed. by John S. Littell (Phila., 1848), 223-26.

For other accounts of the treatment of prisoners by the British at this time, see S: 16; N: 21, 25, and 28; D: 15, and 17, 1776. Cf. also Banks, Danish Spredt and Naval Prisoners in the War of the Revolution (1909).

The "Laidleians" (followers of the Rev. Archibald Laidle, who was called in 1763 to preach in English in the Middle Dutch Church) had possession until 1776 of the records and revenues of the Dutch Church, as allowed by a judgment of the supreme court in a suit brought against them by the Dutch faction in the church. In 1776, Gen. Howe reversed the judgment of the court, "seized upon the edifice, converted it into a prison for rebels," and put the old Dutch faction in possession of the revenues and records; possession they held until the evacuation of New York by the British army in 1783.—Jones, Hist. of N. Y. during the Rev. War, I: 21-23. See also Eitel, Rev. Hist., VII: 39B, 4105.

The Middle Dutch Church was used as a prison, and afterwards as a riding-school for the British officers and soldiers, and became the scene of habitual ribaldry, profanity, and dissipation. The whole of the interior, galleries and all, was destroyed, leaving the bare walls and roof."—De Witt, Discourse (1837), 40.
The most distinguished prisoner confined there was the Abbé de la Motte of the Augustinian order [see S 16]. He was captured on a French ship and brought to New York. On attempting to say mass, he was kept a close prisoner until his exchange in 1779—*Journal, Private HIS. Soc. (1917-8), IX: 364. The ship in which he was sent to St. John's, and his men and cargo were sent to New York on Oct. 29, 1779 (g.v.) to April, 1780 (g.v.). It was reopened for religious services after the war, on July 4, 1790 (g.v.).

"The North Church was used as a hospital and for storage. The lower part was stripped of the pews, pulpit, etc., and the walls were much defaced, but otherwise the building preserved the general character it originally possessed."—Witt, op. cit., p. 40. See also Lossing, *Field-Book of the Rev., II: 462.

Regarding its reopening as a church, see Dec. 1784.

The Garden St. (Dutch) Church, which did not suffer during the war, reopened on Dec. 11, 1783 (g.v.), just after the British evacuation.

The 1st Brigade, 3rd Batt. Grenadiers; 5th Batt. LI & IV; 3rd Hessian Brigade went to New-York.—The other Troops returned to their Tents—F. Washington Named Fort Nippakhstan [Knyphausen] by Genl Orders."—Robertson's *Jour. (MS.); Kemble's Papers, N. Y. H. S. Collections, XVI: 434. "Fort Washington became Fort Knyphausen, as a special compliment to its captor. The Hessians themselves were not all satisfied with Howe's delays, which cost them a large part of their loss. The wounded were taken to the Captains and the Garrison's hospital; a command; the hessian brigade of Schmidt garrisoned Fort Washington, and the Waldeck regiment Fort Independence."—The German Allied Troops in the North Am. War. of Independence; translated from the German of Max von Eckling, by J. G. Rosengarten (1893), 52.

Kemble records: "At 9 at Night, the Reserves, two Battalions Light Infantry, Chasseurs, and three Batallions Hessians, Embarked under the Command of Lord Cornwallis, and Crossed the North River the next morning early (the 20th) and landed without any opposition nearly opposite Colonel Philip's."—Kemble's *Jour., 101. See N 20.

The "Solebay" arrives in the harbour, "having under Convoy a Number of Merchamen and Transports, with the 6th Regiment on board from St. Vincent's."—N. Y. Merc., N 25, 1776.

At daybreak, the British and Hessians under Cornwallis land on the Jersey shore "almost opposite to Phillips' house." They march on to Fort Lee and find both it and Fort Constitution (of O 19) abandoned, "& the Rebel Tents Stores Guns &c standing."—Robertson's *Jour. (MS.).

Kemble's record reads: "The Troops under Lord Cornwallis's Command amount to about 4,000 Men. Fort Constitution taken by his Lordship the same day: a quantity of Provisions, Ammunition, &c., were found in it, with about 30 pieces of Cannon, among which were two Brass Mortars. They likewise left their Tents standing, to the number of 300 or better, and their Kettles boiling; supposed to have quitted these Posts with between 3 and 4 thousand Men."—Kemble's *Jour., 101.

The news report describes the capture thus: "So great was the Haste of the Rebels to quit their boasted Fort Lee, or Constitution, that they left behind their Meat dressing at the Fire. There were found in the Works, which a Handfull of brave Men might have defended, 1 large Brass and 2 Iron Mortars, about 40 Pieces of Cannon, the astonishing Number of 400,000 Cartridges and a great Quantity of Military Stores. We suppose the Troops came up with their Rear-guard and the Baggage, the Rebels relinquished the whole at the first Fire, and many of them threw down their Arms and surrendered. The Country People behaved extremely well, and rebuilt a Bridge or two which the Rebels had destroyed upon Hackinsack River, even before the Troops could come up to them."—N. Y. Merc., N 25, 1776.

There is in the Emmon Collection (item No. 7215) in the N. Y. P. L. an original water-color drawing entitled "The Landing of the British Forces in the Jerseys on the 20th of November 1776 under the command of the Rt Hon. Lieut Genl Earl Cornwallis." This is supposed to have been made by Lord Rawdon, who served at the time as engineer officer on Cornwallis's staff; it was purchased at the sale of the effects of the Marquis of Hastings, his grandson.

Rev. Dr. Augustin writes to the Society for the Propagation of the Gospel in Foreign Parts that, "upon his arrival at that once delightful but now unhappy city, he found everything in great con-

The Doctor adds, that as soon as public affairs are settled, such measures will be adopted, as shall be recommended by their superiors, for procuring some assistance from this part of the world, in order to rebuild the church, the schools, and parsonage house; and they flatter themselves their applications will be attended with success."—From an "Abstract of the Proceedings" of this society, 1776-7, p. 68, printed in N. Y. H. S. Collections (1870), 274-75.

St. Paul's Chapel had been repaired for services on Sept. 22 (g.v.).

Jabez Fitch visits the Americans "at ye Churches" and finds them "in a very Miserable Situation, especially those at ye Quakers Meeting house which is now Enemo'd for an Hospital."—*Diary of Jabez Fitch (MS.), 100.

Kemble records: "Am told Lord Cornwallis is to pursue his Route thro' Jersey...."—Kemble's *Jour., 101. On Nov. 22, he says: "Cornwallis still about 3 Miles from the Landing; this Evening came to Town. The General [Howe] went to Jersey; returned about 11 at Night."—Ibid. See D 7.

"This Day I went [sic] a Message from the Gt. to N. York—Genl Howe after having visited Fort Lee went to New York to his Qrs there.—some recruits landed from England."—Robertson's *Jour. (MS.).

The following general orders are among those issued on this day from Gen. Howe's headquarters at "De Lancy's Mill."

"A Return will be given to-morrow to the Deputy Adjutant General [Kemble] of the Killed, Wounded, and Missing of each Corps since the 17th. of last September, specifying the different Dates of the several Casualties."

"Lieut-Genl Knyphausen will command upon the Heights of Fordham." The unnecessary Works at Fort Knyphausen to be immediately demolished.

"The 6th Brigade and one Battalion of the 2d. to encamp near the Rebel lines on Haelerm Heights; they are to level the Enemy's Lines and Collect the Frazing and Pallshades to be sent to New York, and detach Parties to Haelerm and McGowan's to prepare Houses for their Winter Quarters."

"The Regiment of Waldeck to take Post at Jones's, and extend away towards De Lancy's."

"Maj-Gen. Stirling's Brigade will march to New York."

"Three Battalions, 2d. Brigade, and the 2d. Battalion 71st. Regiment, to take Post at Fort Lee for the Removal of Stores, etc."

"Two Battalions 71st. to encamp on the Green Hill within King's Bridge, and to furnish a twenty-four Hours' Guard, of a Captain and sixty Men, at Fort Independence, and an Officer and twenty Men at the Bridge. A Flick to be thrown up to receive them."

"Campbell's Company, in the Road to Cortland's and to Fort Independence; Grant's, at or near Gen. Cleveland's Quarters; Rogers's Corps, at the Hay Magazine, with a Detachment of a Captain and sixty Men at the Redoubt of the 2d. Encampment, and to furnish Assistance to the Chief Engineer when applied to for that Purpose. A weekly Guard, of an Officer and twenty Dragoons, from New York to King's Bridge."—Order-book, in N. Y. H. S. Collections (1883), 413-14.

Part of the 2d brigade and 71st regiment of British troops crosses the North River and takes post at Fort Lee.—From transcript, in Lib. of Cong. of the "Jour. of the Operations," etc., in British Museum (Egerton MSS. 2155 L. 7). The movements of the British forces to Newark, Elizabeth Town, Rawa, Brunswick, Amboy, Prince Town, Trenton, Burligton, Bordentown, etc., including Nov.
the capture of the "Rebel" Major Gen. Lee on Dec. 13, and the surrender of the British post at Trenton on Dec. 26, are recorded in this "Journal." See also Robertson's Jour. (MS.), under this and the following dates."

"In ye Morning we are Inform'd there are a Number more of Prisoners bro't into ye City, it is said they were taken at Fort Lee, before Night I see a Woman y^t was Taken among those Prisoners. She Inform'd me y^t there was 85 in number, & y^t our Army had left considerable Baggage & Artillery."—Diary of Jabez Fitch (MS.), 102.

"In ye Morning there appeared a large Body of ye Kings Troops on ye Faidar we understand they were about to Embark for some place unknown."—Diary of Jabez Fitch (MS.), 105.

In the following publications in New York: 'The Ground and Defences about Fort Washington, are so strong and advantageous, that a Corrpondent supposes, a Handful of British Troops would have maintained the Place for six Months against an Army of Thirty Thousand Men.'

'The Flower of the Rebel Army are among the Prisoners taken at Fort Washington. 'The whole Number of Prisoners, now in Town, is near 5,000; many of them half naked.'

"To all their other Enormities, the Congress have added the Barbarity of entirely deserting the poor Wretches, whom they had beguiled into their Service, when taken Prisoners by the King's Troops. They have sent them neither Money, Subistence nor Clothing, or anything that would prevent them from the accumulating Distresses of either them or their Families. It is therefore needless to express the Filthiness of their Appearance and Situation; and if His Majesty's Officers had not shewn more Humanity to these deluded People, than their Masters the Congress, their Situation must have been doubly deplorable. Considering their great Numbers and their necessary Confinement, every possible Attention has been given to alleviate their Distress, arising from the complicated Evils of Guilt, Sickness, and Poverty.

"All Philadelphia is in the utmost Consternation; and the Inhabitants are moving out of it with their Families and Effects as fast as possible."

"Since our last arrived here from London . . . the Mermaid Frigate, . . . with about twenty Sail of Victuallers under her Convoy . . ."

Samuel Kembel, "Naval Officer for this Port," arrived this week.—N. Y. Merc., N 25, 1776.

Another comment is as follows: "When Mr. Cadwallar, a young Officer in the Service of the Rebels, was dismissed the other Day by the General's Order, on Account of his Father's civil Treatment of General Prescott, while a Boy, he said in the Court of Generosity shown him, and discovered such Sensibility on the Occasion, as did him Honor as a Man and a Gentleman. 'Tis to be regretted, that such Men have been seduced into so unexampled a rebellion against his King and the Constitution of his Country.'—Ibid.

A letter from New York contains the following news: "Captain Burton and Cland in the British Queen and Joseph victualers, ran on the Gunflint about 1 days ago in going up the North River. The enemy being then in possession of Fort Washington and its lines on this side, and Fort Constitution, &c. on the other, and the enemy had also sunk chevaux de frise to obstruct the passage, leaving a channel on the side of New York Island; in passing which they were becalmed; the Joseph lay above three hundred yards from the Batteries, and James Downes, at "Scott's Tavern, near the City-Hall," where the signatures of returning inhabitants will be received.—N. Y. Merc., N 25, 1776.

"The Sixth Brigade of British troops encamps to Destroy the Rebel lines near Morris's house on N. Y° Island."—Robertson's Jour. 16 (p.1), has been "lodged in the Hands of Mr. James Downes," at "Scott's Tavern, near the City-Hall," where the signatures of returning inhabitants will be received.—N. Y. Merc., N 25, 1776.

"The division of Hessians has arrived in the city. Henry White, a member of the council, is with them. He became useful to Gov. Tryon, by his influence among the citizens, in establishing such police regulations as the governor, in his now restricted sphere as the civil executive, can command.—N. Y. Col. Docs., VIII: 691.

Gen. Howe orders that a "General Court Martial" be held the following day in the City Hall.—Kemble Papers, in N. Y. H. S. Collections (1881), XVI: 415. Others were ordered on later dates to be held at the same place.—Ibid., 423, 434, 439.

Gov. Tryon writes to Lord Germain: "I am getting proper lists of Officers, as also of Magistrates, that the civil Government may have its full operation as soon as it is judged proper to reestablish it with all its powers."—Ibid., VIII: 691. In such portion of the province as was under British rule, military government continued at least until Nov. 25, 1785 (p. v.).

"On Tuesday [Nov. 26] the Perseus and the Galatea, two Frigates sheathed with Copper and reckoned to out-sail almost any Vessels that can be framed, came into the Harbor from a Cruise. The Galatea alone has taken or retaken 15 or 16 Prizes, and sent them safe into Harbor."—N. Y. Merc., D 2, 1776.

Tryon writes to Lord Germain: "The inclosed Plan of Fort George with the Works on the Lower Battery, and the intermediate buildings, will exhibit a Plot of ground which I esteem upon a settlement of the present war would be extremely advisable to be secured as Crown Land.

"The Fort with proper buildings might contain the King's Arsenal and Armoury and when all the buildings and Barracks now standing are Demolished, a proper establishment might be marked out for the Soldiers, and a handsomé range of barracks constructed for as many men as might be thought proper for a standing Garrison.

"The Inhabitants who claim the property in the houses and lots in Pearl Street and buildings adjoining, might probably be satisfied out of the Rebel Tenements within the City, upon Conferentation.

"By this arrangement . . . the soldier would be kept distinct from the Citizen and the Commercial Interest of the Town not in the least injured, as no Docks or wharfs have ever been built where the line of works border on the East and North River. All the ground within the dotted black line from Whitehall to the North River is proposed to be reserved to the Crown for the purposes above mentioned."—N. Y. Col. Docs., VIII: 691-92.

Jan. 14, 1777, Lord Germain, acknowledging receipt of this, wrote to Tryon that he should avail himself "of the present circumstances to secure, for His Maj'y's use, such part of the destroyed Town, as in the opinion of the Engineers will be most proper for erecting a Citadel, or other works, as well to command the Town as for the defence of the harbour."—Ibid., VIII: 693. (The plan referred to in this conveyance is not known to the author of the present work. Cf. Pl 46-47, Vol. L)

"The "Reoeuck" (Capt. Hammond) comes down from her Station up the North-River."—N. Y. Merc., D 2, 1776.

Jabez Fitch writes: "About Noon I went down to ye Dutch Church to see Sarg'l Tracy, & ye other Prisoners, whom I found in a very Pitiful Situation, both on acc° of Sickness & Accumodation, I then came home by way of ye Fly Market, & found our people Zealously Engaged in Card playing—"Yo Afternoon I went onto ye Burying Gound & see 4 or 5 Prisoners Buried in one Grave."—Diary of Jabez Fitch (MS.), 109-10.

Tryon sends to Germain "Copies of the Addresses of the City and County of New York, and also of King's and Queen's County to the King's Commissioners, testifying their wishes to turn it under the King's peace and Government."—N. Y. Col. Docs., VIII: 693. See O 16.

"The King's Commissioners for restoring Peace" issue a proclamation (for earlier declarations, see JA 44 and S 19), promising pardon to those who will within 60 days subscribe to a declaration that they will desert from "treasonable Accitings and Doings."—Original broadside in N. Y. P. L. See Pl 47-49, Vol. V.

The "Camilla," with "a large Fleet of Victuallers under Convoy," arrives in the harbour.—N. Y. Merc., D 2, 1776.

Near the last of November, Col. Ethan Allen, a prisoner in New York, was admitted to parole. On Jan. 22, 1777, he was quartered temporarily on Long Island, but later brought back to the penal jail. For his account of his experiences and investigations regarding the British treatment of prisoners, see A Narrative of Col. Ethan Allen's Captivity . . written by himself (Wal-

B. Proclamation of the "King's Commissioners for Restoring Peace" Promising Pardon; Dated Nov. 30, 1776. See p. 1038.
pole, N. H., 1807), 97 et seq. See also S 16, and N 18, N 30, 1776.

Dec.

British officers examine the Moravian meeting-house with a view to occupying it, but "Bro. Shoemaker," appealed to Gen. Robertson, who said "he intended to have no such disturbance where service was kept." This house was "the only place where public service was held when there was none in the whole city."—Campaign of 1776, part 2, 122-23.

A loyalist writes to a correspondent in London: "as to our situation at New York, I must inform you that provisions are really cheap, considering the demand; and now the communication is opened, by the taking of Fort Washington, we shall be served much cheaper from the country; at present, most of our provisions are brought by water. As to lodging, you may rest assured, we are in no want of rooms. When the General went from hence, he left us 9000 men, which was on the 15th of October [7-v.], and on the 18th, the remainder of Hessians arrived, who had hardly time to breathe before they were sent on actual service. They have suffered very severely in the several actions, and particularly in that of Washington Fort [see N 16], where they lost three to one more than the English. . . . I am told they behaved like Lyons when they took the out-works of Fort Washington; and had they then entered the Fort, they would most certainly have put every man to the sword that came in their way. General Howe, in compliment for service on that day, called the Fort after their commanding officer [see Nov 18]. . . . This month is the very worst in the whole year, at this place, on account of the strong north-westers, which continually blow during that time, and are so piercing, that there is no standing them. All the troops that could be spared from Boston, have been sent to reinforce General Washington, whose army, we hear, will soon be fewer in number, as the time of many of their officers is expired, and they mean to return home."—London Packet, Ja 1-3, 1777.

Gen. Anthony Wayne writes to Ticonderoga to Richard Peters, secretary of war: "An express just arrived brings advice of Fort Washington being in the Hands of the Enemy [see N 16] and the Whole Garrison Consisting of 2000 men being killed or Prisoners; and that our people are on the Jersey side Retreating from post to post. "Is the Genius of America fled our arms—is she Ashamed to Associate with her Degenerate sons; or does she Esteem them as Aliens, unworthy her protection: are not the Enemy as vulnerable as us—cuts not our Swords as keen—pierces not our Balls as deep as theirs—they do—why then this terror—why shrink as from a Gorgon head, whenever they appear. Oh my Dear Sir I but too well know the Occasion. If you have any regard for the Liberty of your Country—or the Honor of America; Imbodhy the Southern troops by themselves,—give more Attention to Manoeuvring—and less to working—and rest assured of Success."—From original letter in Emett Coll. (No. 5093) in N. Y. P. L.

Frequent fires in chimneys having occurred, Maj. Gen. Robertson appoints six inspectors of chimneys, who shall see all chimneys that require it shall be swept and cleaned.—From recital in proclamation of Feb. 24, 1777 (p. vi.).

2 On last Monday Evening [Dec. 2], David Mathews, Esq; our worthy Mayor, arrived safe in Town, having effected an Escape, with great Danger and Difficulty, from Litchfield in Connecticut, where he had been confined since the 21st of July. . . .—N. Y. Merc., D 2, 1776. See J 22 and 25.

3 "We hear, that Lord Cornwallis with the Detachment of the Army under his Command, is in Possession of Hackensack, Newark, Elizabeth-Town, Woodbridge, and the Parts adjacent."—N. Y. Merc., D 2, 1776.

The Congress have sumonned all Orders of Men to the Defence of Philadelphia by Hand-Bills, which they have distributed through the Counties with all the Precipitancy of Fright and Constaertion."—Ibid.

4 "Many of the Prisoners in this City, possibly as they profess from a Conviction of their Error and of the base Designs of the Congress, have made great Importunities to enter into the King's Service."—Ibid.

5 "While the Continental Paper Currency in Esteem since the late Successes of the King's Troops, that many of the Rebels themselves make every Shift to avoid taking it at any Rate."—Ibid.

6 "The large and elegant corner house opposite to the Coffee House, well known by the name of the Old Coffee House; and also a small house adjoining it in Dock-Street" are offered for lease.—N. Y. Merc., D 2, 1776. The large house, and small dwelling adjoining (well shown on Pl. 66, Vol. 1), were in 1776 conveyed by James Duane to Archibald Kennedy (Liber Died, XVII, 315, Albany); the large house was at that time in the occupancy of the "Widow Brevan," as recited in that instrument. It was sold by John Kennedy (son and heir of Archibald Kennedy) and Robert Kennedy to James A. Stewart in 1801.—Ibid., CXIV: 352 (New York). This was the tavern from which Mrs. Ferrara moved in 1774 (p. 4, Ap 27).

The following report is published in London: "Letters from New-York mention, that Mr. Dickinson, a Member of Congress, and Author of the celebrated Farmers Letters, published in Favour of America about ten Years since, had arrived in that City, in Consequence of a Dispute with Mess. Hancock, Adams, and Franklin, and was preparing, by the Permission of General Howe, to embark for England upon Affairs of the utmost Importance."—St. James's Chron., D 7-5, 1779.

Gov. Tryon writes to Mayor Hicks from the "Duchess of Gordon," in the harbour, enclosing an address to the inhabitants of the colony of New York, notifying them that he has the king's permission to withdraw from his government, and recommending that they return to their allegiance to the British crown.—Col. Hist. Ms. Eng., 52.

A British officer writes from New York: "No doubt you will be extremely sorry to hear, that Mr. Washington had given us the slit at King's-bridge, and got safe to the mountains: his Aid de Camp, Mifflin, covered his retreat. . . . this is the second time they have escaped out of our clutches: . . . Most of the army have all along looked upon the enemy in a very contemptible light; and indeed their behaviour has, on most occasions, justified that opinion:—

"Washington has in many respects behaved like a gentleman and an officer; but his inhuman orders to burn New-York [see O 1, regarding this charge] will be a lasting blot in his escutcheon. The conflagration however did not produce all the bad effects the enemy intended; on the contrary, it served to purify the air, and I believe it was the means of preventing a plague; such was the filthy state of that quarter of the town when the rebels left it! . . .

"We have now got near 4000 prisoners in New-York, and many of them are such ragamuffins, as you never saw in your life: I cannot give you a better idea of them than by putting you in mind of Falstaff's recruits, or poor Tom in King Lear; and yet they had strung every nerve to cover their Nakedness, by dismantling all the windows, beds, and tearing down the tapestry, hangings, and curtains; two deserters came over to us one day, who seemed at a distance to be Heralds; but on a nearer view we found they had got the story of Judith and Holofernes upon their backs, worked in old Dutch tapestry. The baggage which the Yankees left behind at King's-bridge (and which the Waldecker were so eager to deck themselves with) would rival the choicest exhibitions of Rag-fair.

"To do them justice, they are tolerable good hands at fortification: their arms are (like the gravel digger's) a pick axe and a spade: these they handle with great dexterity: never were works better constructed or worse defended: in short, there is no doubt of our prevailing in the field, whatever we may do in the cabinet—there I fear we shall be out-witted."

"I dare say that you (in London) hear many absurd and groundless reports about us; which is not to be wondered at, considering that we on the spot hear a number of lying stories about ourselves, and the enemy. A few days ago Hearsay drowned Gen. Washington in the North River; and Report shot Gen. Lee with a pisto, raised by his own hand, against his own head: however Mr. Lee, so far from being laid low, is now posted in West Chester, on a ridge of black mountains, to which the Yankees (from a spirit of contrac tion, I suppose) have given the name of White Plains. Washington is at Trenton with about 3000 men; and Lord Cornwallis has got to Brunswick, on the high road to Philadelphia, and means to beat up the quarters of the General Congress."—London Packet, Ja 13-15, 1777.

A British officer writes: "a Battle of ye Hessians came into Town, & March'd by with vulgar Ceremony; At about 11 I observ'd a number of Hessian Troops on ye plain above ye Genl Hospital; I Emediately went over to ye Burning ground where I see their
Battal's Am. this. Gen. sentenced Published, Another Collections was common. the 1776 9 46,1: New Holding Barracks are under House, might Prisoners, Barracks are under House, Kembie—ordered sentenced, New College on report 127; Sentence XVI: Fence, situation. 623, of which is crowded 421. of our Regiment. Dec. 1976. the American army, makes a statement concerning the treatment of prisoners by the British.

Between this date and Jan 1, 1777, the Jour. Princol. Cong, shows no record of the proceedings of that body, at its meeting-place in Fishkill. An editorial note says "A portion of the proceedings appears to be missing."

"We are this Day Inform'd y^s Geo HI Howes Army are Retreating back from toward Philadelphia without much Suckess y^ way &c."—Diary of John Fisher (MS.), 126.

Maj. Gen. Robertson orders that "Soldiers are not to pull down House, Fence, or injure the Property of any Person whatever," under severe penalty—Kemble Papers, N. Y. H. S. Collections (1883), XVI: 421. On Dec. 25, a private was under sentence of death and was ordered to be executed for plundering—Ibid., 428; and see 473, 621, 624-25.

In the orders for the day Gen. Howe mentions "the convalescent Barracks near Vauxhall."—Kemble Papers, N. Y. H. S. Collections (1883), XVI: 411.

Timothy Parker and other prisoners, on board the "Whitby Prison-Ship, New York," write to Gen. Troubridge. Parker says: "I make no doubt but your Honour long before this hath been apprized of our being prisoners in New-York. That our present situation is most wretched, your Honour need not doubt, which I likewise hope you will soon be assured of from men of undoubted veracity. There are more than two hundred and fifty prisoners of us on board this ship, (some of which are sick, and without the least attention of a physician, doctor, or apothecary,) dealt on two-thirds allowance of salt provisions, and all crowded promiscuously together, without distinction or respect to person, office, or colour, in the small room of a ship's between-decks; allowed only to walk the main deck from about sunrising till sunset, at which time we are ordered below deck.

These, sir, with so many other miserable circumstances too length and tedious to enumerate, are the just portrait of our present situation. In short, sir, we have no prospect before our eyes but a kind of lingering inevitable death, unless we obtain a timely and seasonable release.

"From your Honour's well-known character of humanity and justice, we humbly hope that your authority will be exercised in procuring us an exchange."—5 Am. Arch., III: 136-39.

The following report is published in New York: "It is said by some Persons, who have lately seen the Rebel-Forces, that they are the most pitiable Collection of ragged, dispirited Mortals, that ever pretended to the Name of an Army; that not 1,000 even of these are to be found between Amboy and Philadelphia; that, in this last Place, the Congress is openly execrated; and that, if the Weather continues as bit more vigorous, there will be no visible Impediment to his Majesties Troops in conquering a March to the Capitol of Pennsylvania."—N. Y. Merc., D 9, 1776.

An advertisement, dated London, Aug. 14, 1776, is published in New York, entitled "Proposals For Printing and Publishing, a Topographical Map of the Province of New-York, On Four Sheets and Hall of grand Eagle Paper; Exhibiting all the Grants of Land made in that Province, With The Proprietors Names inserted on each Grant: Compiled from actual Surveys, By Claude Joseph Sauthier, Esq."—N. Y. Merc., D 9, 1776. See descrip. of Pl. 46, I: 356.

Gen. Lee is captured at "Basken Ridge" by a division of the British army—Robertson's jour. (MS.); Diary of John Fisher (MS.), 127; Winsor, VI: 365, 403. Kembie states that the capture was made "in one White's House," also that Lee was taken "by Colonel Harcourt with about 25 Light Horse; two of his Aid-de-Camps killed, Morris and Bird. He himself requested his Life might be spared, and was brought to Penny Town on the 14th."—Kemble's Jour., 103. For a detailed account of Lee's capture, see that written by Capt. Bradford, and published by Johnston in The Carolina Journal of 1776, part 2, 146-47, from Stiles' MS. Diary, Yale College Library. See, further, Library of Congress.

Three British soldiers, tried by court martial at the city hall, are sentenced to suffer death for "Desertion, bearing Arms, and holding Correspondence with the Rebels." Two of these were pardoned on Dec. 23. Another is sentenced to receive 500 lashes for desertion, but some favourable circumstances secure his pardon also by the commander-in-chief.—Order-book, in N. Y. H. S. Collections (1883), 424, 428.

Dec. 15

This Day is Published, And to be had at James Rivington's, Price One Shilling, The Battle of Brooklyn, A Fair of Two Acts: As it was performed on Long Island, On Tuesday the 27th Day of August, 1776. By the Right Hon. Miss Elizabeth differentiated. (MS. of 4 lines of verse from Hudibras added).—N. Y. Merc., D 16, 1776. A reprint of this play, published in Edinburgh in 1777, a copy of which is in the N. Y. P. L., shows the following Dramatis Personae: The Rebel Chiefs, Washington, Putnam, Sullivan, and Stirling: Colonels Lasher ("a Shoemaker of New-York"), Clark ("a Retailer in Rum in Connecticut"), and Renssen ("a Farmer of Newtown, Long-Island"); Ebenezer
Snuffle, a New-England Parson, Chaplain to General Putnam;

"Joe King, Servant to Stirling;" "Noah, Servant to Sullivan;"

16. Skinner, a Chief, employed by Putnam; "Lady Gates;" "Betsy, her Servant;" "Officers and Soldiers." The scene is "Partly with the Rebels at Brooklyn, and partly at Warsaw. As the play proceeds, these scenes are disclosed to be: "An Apartment at Brooklyn;" "a small house in a field;" "A Room at Brooklyn Ferry;" "Brooklyn Church;" "A Room in a house at Brooklyn;" "A Hill at Warsaw, about two miles from Brooklyn Lines, with an encampment on it;" "A Hill, with troops drawn up, under arms;" and "A Room at Brooklyn Ferry."

"Several Ships and Vessels," it is said, are arrived at Sandy-Hook with Coals, &c. from Louisbourg. —N. Y. Merc., Dec. 16, 1776.

17. Kemble records: "General Howe lay last night on his return to New York from Trenton, after having pushed Mr. Washington over the Delaware." —Kemble's Jour., 103; N. Y. Merc., Dec 23, 1776.

"His Excellency the Governor came to Town on Tuesday [Dec. 17] from Long-Island, where he has been indefatigable in raising Provincial Forces for his Majesty's Service." —N. Y. Merc., Dec 23, 1776.

Fitch records: "I went down to ye Dutch Church to see ye Prisoners but ye Hessian Guard were grown so very Insolent ye wo't suffer me to Talk with them through ye Fence." —Diary of Jabez Fitch (MS.), pg 100. On Dec. 18, he wrote: "I went down to ye Dutch Church again & Assembly'd ye Prisoners, whom I found in a very miserable Condition: I am very sorry to say, several are in ye Yard, & several others Dieing in ye House. . . . Indeed ye whole of em appear Compleat Objects of Pity." —Ibid., page (unnamed), after 150.

"The situation of the taverns called "ye Sign of ye King of Prussia" is shown by a record of this date as "up the Bowery Lane." —Diary of Jabez Fitch (MS.), unnamed page following 150.

20. A London news item reads: "Governor Tryon has assembled the Militia of several Counties in the Province of New-York, consisting of 13,000 Men, who have all cheerfully sworn Allegiance to his Majesty." —St. James's Chron., Dec 19-21, 1776.

23. Franklin, Deane, and La Harpe, in Paris, inform the Count de Vergennes that they have been "empowered by the Congress of the United States of America to propose and negotiate a treaty of amity and commerce between France and the United States." —Wharton, Rev. Diplomat. Corresp. of the U. S., II: 235; Doniol, op. cit., II: 112. The French Alliance was concluded on Feb. 6, 1778 (q.v.).

There is issued at Finchill, and printed there this year by Samuel Lodge, Printer, the General Resolutions of the State of New-York to their Constituents. It is an appeal to patriotism when the outlook is darkest. This edition is found at the N. Y. H. S. in a volume (III), lettered "Select Tracts." It was reprinted by Goddard of Baltimore in 1777.

The news of the day in New York includes the following reports: "The Rebels are everywhere moulderin away like a Rope of Sand. With the most impudent Bravadoes, they have not yet had the Spirit to make any thing like a Stand in a single Encounter. The New-England People have neither Money nor Recruits; and the rest of the Colonies are nearly drained of their Resources. Ruin, therefore, and Destruction must be the Consequence to them of continuing the War any longer." —N. Y. Merc., Dec 23, 1776.

"Several Captures have been sent in by the Men of War in the Course of the last Week." —N. Y. Merc., Dec 25, 1776.

"According to an advertisement of Henry Utick, who lives in "Smith's street," Potthaker's Hill is a place-name still in common use in New York.—N. Y. Merc., Dec 25, 1776.

"All the Men and Women arrived from Halifax belonging to Regiments quartered in Town are to be landed immediately.

"These Belongings to the Troops under Gen. Clinton's Command are to remain on Board till they can be embarked for Rhode Island." —Order-book, in N. Y. H. S. Collections (1885), 429.

Having crossed the Delaware with his troops, Washington surprises the Hessians at Trenton and completely routs them. About 30 are killed and over 900 taken prisoners.—Winsor, VI: 175-76. Some alarm is given in N. Y. P. L. (Emmet 5396); N. Y. Merc., Dec 29, 1776. Gov. Tryon said the American success gave him "more real chagrin, than any other circumstance this war; the moment was critical, and I believe the Rebel chiefs were conscious, if some stroke was not struck that would give life to their sinking cause, they should not raise another army. . . ." —N. Y. Col. Docs., VIII: 694.

Sir Win. Ermale, at Prince's Bay, receives intelligence that the Hessians at Trenton "had been Surprised, attacked, Defeated & taken Prisoners." —Robertson's Jour. (MS.).

Two soldiers are hanged on a gallows "back of ye Barracks, on ye Burying Ground." —Diary of Jabez Fitch (MS.), 143.

Among orders for the day is the following: "Spruce Beer will be issued to the Troops at Mr. Horsfield's Brewery, near Maiden Lane, from 10 in the Morning to 4 in the Afternoon, at the Rate of 4 Shillings per Barrel of 30 Gallons." —Order-book, in N. Y. H. S. Collections (1885), 431-7.

General orders of the day are: "All the Town Guards to report whether the Lamps are regularly lighted, and whether they burn all Night."

"An Officer and 12 Men to be on the King's Wharf, on the North River, at 10 o'Clock to-morrow morning, to escort a Number of Prisoners to Fowles Hook, where they will be delivered over to an Officer of the 57th Regiment." —Order-book, in N. Y. H. S. Collections (1885), 431.

"Many Rebel Colonels, Majors, Captains, &c. have come in and accepted the Benefit of the late Proclamation. Many others, who have been of Trades, and were taken Prisoners, have solicited Employment in this City." —N. Y. Merc., Dec 30, 1776.

"I have just heard a Report, that the French have landed an Army of Sixty thousand Men in ye Jerseys, although it was lately say'd they had all thrown down their Arms. & ye Gen'l Washington had fled to Lancaster, to Escape ye Fury & Rapid Progress of ye Kings Troops." —Diary of Jabez Fitch (MS.), 147.

At the close of the campaign this year, there were about 10,000 prisoners, soldiers and sailors, within the British lines at New York.—Jones, Hist. of N. Y. during the Rev. War, i: 351. See also the British account of the campaign in and around New York, in Ann. Reg. (1776), 167-718.

At the close of this year, Lieut. Col. Stephen Kemble makes the following critical entry in his journal, on the "Conduct of Commanders in Chief of Armies, &c.:

"The delay of our Army under General Howe at New York Island, for some days, unnecessary. The Landing at Frogs Neck [see O 14], from whence no Issue but by a Narrow Causeway, not to be passed but with difficulty, without an Enemy to oppose—why not move to the White Plains immediately, and Attack the Rebels before their Works were completed?"

"After Fort Washington was taken [see N 161], why not send a Detachment of the Army to Brunswick to cut off Mr. Washington's Line of Retreat, &c.? General Clinton's Troops would have answered that purpose Effectively. Why not pursue Washington from Brunswick with more Spirit—his Cannon and Baggage must have fallen into our hands. Provisions might have been sent to Brunswick for all these Services by Water, and no delay in the proceedings of the Troops." —Kemble's Jour., 104-5.

1777

In this year, the first edition of The Atlantic Neptune appeared; this is the best and most complete hydrographic work regarding the Western Atlantic coast published up to modern times; it was begun in 1767 (q.v.), and was published in two large atlas folios by Joseph F. W. Des Barres. For description, see Pls. 44, 45-5, 1: 746-51; Winsor, VII: 185. The collection of plates, both views and charts, from this magnificent work in the author's possession, is the most complete known.

There was published this year in London an 8vo volume of 81 pages, now very scarce, entitled A Letter from an Officer at New-York to a Friend in London, which, while lacking definite particulars as to dates, localities, etc., gives a view of the conditions of life in New York at this period of the British occupation. The letter was in part, as follows: "Sir,

"I can with great pleasure inform you, that our situation is
very different to what it was last winter, as we abound in every necessary that soldiers can desire; and as to the prisoners, the sick, and the wounded, our officers are as vigilant in seeing them carefully supplied, as they are in seeing order and discipline punctually executed: from the good example of our land and sea commanders, there is such harmony between every rank of each, that we all live like brothers; and if there be the least shadow of cruelty in the army, it is against those gallant officers and soldiers whose happy stations in battle gave them the opportunity of acquiring so great a share of that honour which we all so eagerly pursue. Many of our soldiers earnestly wish for a personal knowledge of General Lee, to avoid either killing or wounding him, that a native of Brit-ain, who, from disappointed ambition, has planted the point and the tree that first put a hand into his hand, and paid for his military education, may be prepared for his grave without the least impression of any martial instrument.

"We begin now severely to want that part of the city which these unhappy destroyers of their country have consumed; as several good families, whom their army has ruined, come daily shivering in for our protection, and meet with such a reception, according to their stations, as can only be obtained from clemency, guided by order and economy. Many of the poor ladies have scarce a petticoat to cover them, being stripped of furniture, apparel, and every thing that could make a Yankee soldier either a shirt or a pair of breeches. Indeed, the poor fellows are in such a deplorable state that a good-natured lady, who has two petti-

coats, would rather give one for a covering, than look at a fellow-

charged in the branded condition.

"Your worthy friend, the Rev. Mr. —, our Chaplain, fre-

quently expatiates on the happy state that this country so lately enjoyed, and the present scenes of misery to which these people have been urged to bring so immediately on themselves and families. He gives us several instances from history of the dread-

ful examples that deluded nations have made of such patriots as George Lee, and points out the present state of their own Clergy, who before were almost implicitly obeyed; but, after breathing the spirit of rebellion on the people, attending their camps to keep alive the flame which they kindled, and spending their lums and their fortunes to support the spirit of their cause, they now find the sad effects of instructing the people to be disobedient, and want the power they opposed to protect them; for, in such scenes of disorder and rapine, but little regard is paid to either morality or religion; and now, except they can plunder their share, swing rum, and hear a firelock, they are deemed a useless order amongst them. . . . .

... The soldiers, he tells us, calls the Americans worse than deserters; for they have not only revolted, but turned our own arms against us; and such zeal and spirit runs through the whole body of the men, in his opinion, that the best plantation on the continent could not tempt a man to desert. Just after dinner we had three Yankee deserters brought to us; and, lucky for the poor fellows, we had fragments left sufficient to fill their hungry bellies; and, being almost naked, we bought cloaths for them of some old women, who make a trade of stripping the dead soldiers. —They confirmed the accounts we frequently receive of the distress of the rebel army, and that several of their regiments have petitioned the Honourable Congress for a quantity of tar and feathers sufficient to cloath them; the poor men beg only for stuff, being well skilled themselves at putting the materials together, and have at present amongst them several of the artificers who made the first pattern of this new-fashioned garment, which was undoubtedly de-

signed by the High and Mighty Congress as a robe for instituting a new American Order of Knighthood; and, to shew their regard to her Mother Country, conferred the first honour on his—by proxy, in tarring and pluming his officer at Boston; and, to dignify the installation, bound the substituted Knight on horseback, with his face to the tail, dragging him through multitudes of applauding spectators, whilst, at intervals, Imperial Tea was copiously poured down to the health of the King and the Family Royal.

"In the newspapers which are transmitted to us, it frequently read of the distressed state to which we have reduced the men; but no more mention is made of the women and children, than if they were insensible of misery, and no part of the human species, who, in this case, are the only real objects of compassion, being reduced to a wretched state by the imprudence of their hus-

bands, who are bound by the laws of God and Nature to protect them. The country round being now gleaned, such swarms of distresse women and children flock to their camp as are shocking to behold; and wherever we see a soldier’s wife with two or three children, we are sure to behold half naked skeleton; for from* that maternal tenderness which is natural to the sex, what nutriment and rags they can collect must go to preserve their infants, whilst these patriotic heroes, who are fighting for posterity, (being now pinched themselves) appear to have as much regard to the future as those gallant officers and soldiers whose happy stations in battle gave them the opportunity of acquiring so great a share of that honour which we all so eagerly pursue. Many of our soldiers earnestly wish for a personal knowledge of General Lee, to avoid either killing or wounding him, that a native of Brit-ain, who, from disappointed ambition, has planted the point and the tree that first put a hand into his hand, and paid for his military education, may be prepared for his grave without the least impression of any martial instrument.

"We begin now severely to want that part of the city which these unhappy destroyers of their country have consumed; as several good families, whom their army has ruined, come daily shivering in for our protection, and meet with such a reception, according to their stations, as can only be obtained from clemency, guided by order and economy. Many of the poor ladies have scarce a petticoat to cover them, being stripped of furniture, apparel, and every thing that could make a Yankee soldier either a shirt or a pair of breeches. Indeed, the poor fellows are in such a deplorable state that a good-natured lady, who has two petti-

coats, would rather give one for a covering, than look at a fellow-

charged in the branded condition.

"Your worthy friend, the Rev. Mr. —, our Chaplain, fre-

quently expatiates on the happy state that this country so lately enjoyed, and the present scenes of misery to which these people have been urged to bring so immediately on themselves and families. He gives us several instances from history of the dread-

ful examples that deluded nations have made of such patriots as George Lee, and points out the present state of their own Clergy, who before were almost implicitly obeyed; but, after breathing the spirit of rebellion on the people, attending their camps to keep alive the flame which they kindled, and spending their lums and their fortunes to support the spirit of their cause, they now find the sad effects of instructing the people to be disobedient, and want the power they opposed to protect them; for, in such scenes of disorder and rapine, but little regard is paid to either morality or religion; and now, except they can plunder their share, swing rum, and hear a firelock, they are deemed a useless order amongst them. . . . .

... The soldiers, he tells us, calls the Americans worse than deserters; for they have not only revolted, but turned our own arms against us; and such zeal and spirit runs through the whole body of the men, in his opinion, that the best plantation on the continent could not tempt a man to desert. Just after dinner we had three Yankee deserters brought to us; and, lucky for the poor fellows, we had fragments left sufficient to fill their hungry bellies; and, being almost naked, we bought cloaths for them of some old women, who make a trade of stripping the dead soldiers. —They confirmed the accounts we frequently receive of the distress of the rebel army, and that several of their regiments have petitioned the Honourable Congress for a quantity of tar and feathers sufficient to cloath them; the poor men beg only for stuff, being well skilled themselves at putting the materials together, and have at present amongst them several of the artificers who made the first pattern of this new-fashioned garment, which was undoubtedly de-

signed by the High and Mighty Congress as a robe for instituting a new American Order of Knighthood; and, to shew their regard to her Mother Country, conferred the first honour on his—by proxy, in tarring and pluming his officer at Boston; and, to dignify the installation, bound the substituted Knight on horseback, with his face to the tail, dragging him through multitudes of applauding spectators, whilst, at intervals, Imperial Tea was copiously poured down to the health of the King and the Family Royal.

bands, who are bound by the laws of God and Nature to protect them. The country round being now gleaned, such swarms of
### CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

**1777**

- Jan. 8
- The New York; but a letter written from New York on Jan. 2, states: "Yesterday [Jan. 1] Gen. Lee and Col. Robert Livinstone were brought to town from the Jerseys, and confined in the Old City Hall." — London Packet, F 19-21, 1777. For further account of the singular diversity of information, given by contemporary authorities, regarding the time when Lee was brought to New York, see Ja 8.

- The rooms were fitted up for his reception in the City Hall where he was treated with consideration and humanity. He was allowed to converse freely with the officers in whose custody he was placed.

- The two officers on guard always dined with him and had leave to visit any other person he pleased." — Moore, *Treatise of Maj.-Gen. Charles Lee* (N. Y., 1860), 72.

- Lieutenant Oliver Babcock records in his diary: "Was admitted in to both houses of Assembly [evidently of Connecticut], and related the sufferings of my poor fellow prisoners at New York." — *Battle of Harlem Hill*, 210. There were at this time about 400 "Rebel" officers and 5000 soldiers imprisoned within the British lines at New York. — Jones, Hist. of N. T. during the Rev. War, I: 176, 197, 218, 230.

### JANUARY

- **1777**

- **Jan. 3**

- Having drawn off from Cornwallis’s powerful army during the night, Washington early this morning intercepts the British reinforcements at Princeton and decisively defeats them. — Winsor, VI: 377-79. Cf. British account of this important battle, in N. Y. Merc. Ja 6, 1777.

- **Jan. 4**

- Prisoners went into the Sugar House. N. Murray says 800 men were in Bridewell. The doctor gave poison powders to prisoners, who soon died. — Onderdonk, Rev. Incidents of Suffolk and Kings Co., 218, citing *Trumbull Papers*, IX: 203.

- **Jan. 5**

- Washington writes to Heath: "The enemy are in great consternation, and as the panic affords us a favourable opportunity to drive them out of the Jerseys, it has been determined in council, that you should move down towards New York with a considerable force, as if you had a design upon the city. That being an object of great importance, the enemy will be reduced to the necessity of withdrawing a considerable part of their force from the Jerseys, if not the whole, to secure the city." — *Writings of Washington* (Ford ed.), VI: 153. For Gen. Howe’s distribution of the army on Manhattan Island, see Ja 8; and for this assignment of regiments to alarm posts, see Ja 26.

- **Jan. 6**

- The news is published in New York that "several of the New England Rebels, quartered in Philadelphia, have expressed their Intentions of setting that City on Fire." The article continues: "The Inhabitants of this City in general are so exasperated against all Incendiaries and the Rebel Service." — N. Y. Merc., Ja 6, 1777.

- **Jan. 7**

- "Great Numbers have flock’d in this Week to receive the Benefit of the Proclamation [see N. 13, 1776], and among them, many Officers and Men of the Rebel Service." — N. Y. Merc., Ja 6, 1777.

- "The Theatre in this City having been Some Time in Preparation, is intended to be opened in a few Days, for the charitable Purpose of relieving the Widows and Orphans of Sailors and Soldiers who have fallen in Support of the Constitutional Rights of Great Britain in America. It is requested that such Gentlemen of the Navy and Army, whose Talents and Judications induce them to assist in so laudable an Undertaking, be pleased to send their Names, (directed to T. C.) to the Printer of this Paper before Tuesday Night next." — N. Y. Merc., Ja 6, 1777. The theatre was opened on Jan. 25 (p.v.).

- **Jan. 8**

- Francis Lewis writes to the New York committee of safety: "I lately wrote you by an Express, wherein I informed you that the State of New York was not represented in Congress, nor indeed has it been, for several months past, except at some small intervals. I am at present the only Delegate for New York at this place, and the Members are continually urging me to request you would complete your representation in Congress, as business is now multiplying upon their hands, and so many members detached upon Committees & that the business in Congress is retarded, add to this that our state sometimes suffers for the want of a Vote in Congress which I beg you would speedily remedy." — From original letter in Enem Coll. (No. 1577) in N. Y. P. L.

- "Do. Wm’s Battin. Rangers, with the Commander-in-Chief not included, 230 R. & F. & makes the Army full 14,000 Effective Men." — Kemble’s Jour., 107.

- A New Yorker, writing to a correspondent in London, says: "You have heard no doubt before now of the capture of General Lee [see D 13, 1776], ... which I think is likely to turn out one of the luckiest circumstances of the war. ... He was brought here a few days ago [see Jan. 1]; I have seen him twice; the current report is, that he has pledged himself, on condition of a pardon, to give General Howe such intelligence, as must effectually put an end to the rebellion in the spring; as well as cut up the views of the French, who had it in very serious contemplation to give the Americans every assistance. "I do not give this last part as authentic, it is the report, and it is generally believed; he is well guarded, and nobody permitted to see him but officially." — London Packet, Mr 3-5, 1777.

- Although it is clearly shown that Gen. Lee was brought to New York from Brunswick as early as Jan. 1 (q.v.), a news item, published in this city on Jan. 20, stated that he was brought here "On Monday last" (Jan. 13), "and put into the custody of a strong Guard." — N. Y. Merc., Ja 20, 1777. Montresor recorded that he was brought in the "Alert" from Annapolis on the 14th.—Montresor’s Jour. Another report stated that he was brought to New York. On Jan. 16, and placed under guard in a small house "at the battery of King Street." — Conn. Gen. (New London), Mr 7, 1777. A letter from New York, published in London early in April (London Packet, Ap 7-9, 1777), indicates that, about the first of March, Lee was confined in "the New Gaol." See, further, Mr 29.

- Gen. Howe orders that "No Soldier is on any account, except on duty, to be out of his Barracks after 8 o’Clock at Night." and that "The owners of the Public Houses having Sailors or Soldiers in their Houses after 8 o’Clock will be committed to the Provost, and the furniture of their houses forfeited. The Lights and Fires are to be put out in all the Barracks and Public Houses at 9 at Night." — From Kemble Papers, in N. Y. H. S. Collections (1851) XVI: 435. The order is published by the town meeting, W. Farnord—N. Y. Merc., Ja 10, 1777.

- Maj.-Gen. James Robertson, in command at New York, issued an order which states that, "many Complaints are made by the Inhabitants that Bread is become extravagantly high, either from the Exaction of Bakers or Forestallers, it is become necessary to renew a Mode that was formerly followed in this Place, of fixing an Assize. The Price of the best Flour being now Thirty Shillings the Hundred, and that of fuel and Labour considerably increased, I find that it is the Opinion of the most respectable Inhabitants that a Loaf of Bread of the finest Flour, weighing Three Pounds Four Ounces, should be sold for Fourteen Coppers, and in the same Pro-
part of the City, entertain Designs of burning the Rest: And it is thought that a Watch to inspect all the Parts of the City to still Fires before they rise to a dangerous Height, might be a necessary and proper Means to prevent such a Calamity. He directs that all persons must 'turn out to watch when called.' Any who refuse to protect the city will be deemed "unworthy to inhabit it." He names persons to summon and superintend the watch in each ward. The Out Watch is to furnish 6 men each night, and the Night Watch 15 men each, who are to meet "at the Guard Room near Cuyler's Sugar House." The West Watch is to furnish 6 men each night, the South Watch 4, the Dock Watch 10, and the East Watch 16, who are to meet "at the Guard House in Hanover-Square."—N. Y. Mercury, Jan. 13, 1777, Man. Com. Coun. (1861), 634-35. The notice was printed and published as a bulletin on Jan. 27. See also, beside of that date in N. Y. L. (Emmet Coll., 19098).

"This night (Monday)," Montresor records, "my House and out-houses, Barns and offices on Montresor's Island, formerly called Belle Isle, and afterwards Talbot's Island, near Harlem, and 8 miles from New York, was burnt by the Rebels."—Montresor's Jour., 124. He acquired this island, Nov. 7, 1772 (p. 40). This was the present Randall's Island (Man. Com. Coun, 1855, p. 495), which was confiscated and granted to Thomas Delavall, the collector and receiver-general of customs, Feb. 3, 1668 (p. v.), after the English took the province. Cf. Jl. 16, 1673.

As appears by an advertisement for brooms, the harrack-master's office is at No. 214 Queen St.—N. Y. Merc., Jan. 13, 1777.

James Hatfield, the "costermaker in Broadway," offers a reward for the return of "A Chaise" which was "taken from the Ferry near the bear market," and it is thus described: "the body-carryage is painted cream colour, with flower pots on each side and black in the latter is a coppery, O. T., steel springs, the inside, light coloured cloth."—N. Y. Merc., Jan. 13, 1777. For the beginning of the year, Jan. 22, 1776-77.

14. German writes from Whitehall to Gen. Howe: "When I first read your requisition of a reinforcement of 15,000 rank and file, I must own to you was really alarmed, because I could not see the least chance of my being able to supply you with the Hanoverians, or even with Russians in time. As soon, however, as I found from your returns that your army, if reinforced with 4,000 Germans, which I trust will be procured for you, you additional Hessian chasseurs, and about 1,800 recruits for the British, and about 1,200 for the Hessian troops under your command, will consist of very nearly 35,000 rank and file, I was satisfied that you would have an army equal to your wishes, especially when I considered that the enemy must be greatly weakened and depressed by losses, and that there was room to hope, that you would at last find it difficult to imagine what number of Provincials you may think proper, for particular parts of the service; in which respect, cloth for 3,000 additional suits, and camp equipage for 8,660, are ordered, and will be sent to you. And here I must assure you the satisfaction of knowing, that whatever degree of support the rebels may have been taught to expect from foreign powers, I have yet the power to believe, that you are able to procure them any open assistance."—Paul Reg. (1779), XI: 382-83.

A New Yorker writes to a friend in Leeds: "We are obliged to keep a strict Watch on board our Ships and on the Wharfs, to prevent any Rebels that may be among us from setting off from the Town or the Shippings on Fire. The Churches here are full of American Prisoners, who, I am informed, die so fast, that 15 or 20 of them are buried at a time."—St. James's Chron., Mr. 11-13, 1777.

Col. Stewart, an American officer, informs Wm. Smith "That 5 Days ago 6000 Militia marched from North Castle to attack New York under Generals Heath and McDougall, who I suppose if they got there will burn the Town." Smith says of this: "I doubt the Truth of the Militia-Expedition to New York, not from the Improbability of their Success, but their Want of Covers and a Bridge across Harlem Creek. Nor do I believe they have mustered 6000 Men...."

This Project is real and the Town should be plundered. Mr. Howe may be obliged to retire to Staten Island and Long Island from Amboy and regret the Cantonment of his Army in Jersey in small Detachments remote from each other."—Wm. Smith's Diary (MS.), V. See Jl. 17.

Peter Dobyns, master of a transport at New York, says in a letter to a friend in Hull: "The Rebels lurk about on the Roads like so many Highwaymen, and have taken the Lives of several innocent People or what they could rob them of. We had 4 or 5000 of them Prisoners on board our Ships, but they had such bad Dis-tempers among them, that each Ship buried ten or twelve of them a Day. Gen. Howe about a Week ago gave all that were able to walk their Liberty, after taking the Oath not to take up Arms against this Majesty."—St. James's Chron., Mr. 13-15, 1777.

General Howe, out of Humanity, had ordered all the Rebel Prisoners to be lodged in the most ronyo Buildings in the Town, and allowed them to want for no Necessaries; yet we were alarmed, some Time ago, with a mortal Fever, which broke out among them. It first seized the Prisoners taken on Long-Island; Compassion for these misled People prevailed on the Governor to dismiss those that remained of the common Men."—St. James's Chron., Mr. 11-13, 1777.

The first Fishkill issue of Samuel Loudon's Packet is undoubtedly of this date (Vol. I, No. 3); although the earliest issue found is that of Feb. 6, 1777 (No. 39), which bears the title The New York Packet, and the American Advertiser. The last issue in New York City was that of Aug. 29, 1776 (p. c.). "During the six years the paper was printed at Fishkill, the title was occasionally shortened to 'The New-Packet,' as scarcity of paper stock reduced the size of the sheet."—Brigham, A. A. S. Proc. (1917), 235. See, further, Ag 28, 1783.

Gen. Robertson issues a proclamation stating that "by a former Proclamation, the Inhabitants then in New-York, and all such as might afterwards come into the Place, were required to enter their own and Families Names at my Office, and it was directed, that every Householder should give Notice there, of the Arrival of any Stranger he admitted into his House." As "it is suspected there are many Persons of whom have not complied with this Regulation, that they who from Ignorance and Want of Attention may not be confounded with those who lurk about the Town with Views of destroying it, the Notice is repeated; and all Persons who do not comply with the Regulation before Tuesday Morning, will be considered as bad Subjects and bad Citizens."—N. T. Merc., Ja 20, 1777; Man. Com. Coun. (1863), 436.

Smith records in his diary under this date: "Col L[ring]ton wrote me a Letter from his Son informing him that the Militia destined to N Y [see Jl. 15] were at the lower Yonkers and that they learnt that there were 3000 Soldiers in Town—He considers that Expedition therefore as at an End.... He says the Project was divulged all thro' N England weeks ago and that the Congress is forever destitute of Intelligence."—Wm. Smith's Diary (MS.), V.

The queen's birthday is celebrated. "Guns, as usual, were fired at Fort George. His Majesty's Commissioners gave a grand Entertain-ment to the Governors and Officers of Distinction, both British and Hessian; and in the Evening a very splendid Exhibition of Fire Works, under the Direction of Col. Montresor, was played off at Whitehall, upon the Occasion what number we."

In Honor of the Day, the General [Sir Wm. Howe] was invested with the most honourable Order of the Bath, by [his brother] Lord Howe, assisted by General de Heister, in the Presence of a numerous Assembly.

"Sir William Howe gave an elegant Ball and Supper in the Evening. The Ball was opened by Miss Clark, and His Excellency Governor Tryon."—N. T. Merc., Ja 20, 1776; Hist. of the Orders of
CHRONOLOGY : THE REVOLUTIONARY PERIOD : 1776-1783

Jan. See also O 28, 1761.

18 Jabez Fitch gives an account of Gen. Howe's entertainment, and adds: "Query, whether it would not have been Honourable to ye British Army, to have had (at least) part of this Ex- tasy of Entertainment, before ye Czar, & on ye same grand Scale, that we have furnished for Winter, in such vast numbers."—Diary of Jabez Fitch (M.S.). This was not the actual anniversary of the queen's birth. Baroness Riedesel explains that the queen's birthday "really comes in summer, but as the king's birthday also comes in that season [June 4, q.v.], is celebrated in winter, to give more custom to the trades people, as every one upon those days appears at court in gala-dress."

19 Jabez Fitch (M.S.), this theatrical sergeant commanded, observed "I came.

20,000 citizens were confident it would soon be demonstrated, Letters & Journals, relating to the War of the Am. Rev., 172.

Robertson writes: "about 3,000 Militia under Genl Worster summoned F Independance & being denied, they Cannoned it briskly for some time but were obliged to retire."—Robertson's Jour. (M.S.). A newspaper account states that a "large Body of Rebels" have made an "Attack upon Fort Independance, beyond Kingsbridge," and were bravely repulsed. "The Fort was defended by a small Party of Hessians and Col. Rogers's Rangers."—N. T. Merc., Ja 20, 1777. Kemble's record adds: "... the Rebels retired as far as Cortland's house, which they have plundered, and where they remained on the 22d."—Kemble's Jour., 183.

21 We. ... observed a very considerable Cannonade this Forenoon, Fort Washington. When I came home, I was Informed 't was ye Hessians had taken Fort Independance, but soon after this, Mr Gerol ... came in, & Informed us ye Hessians had taken six hundred Prisoners & they were going to take six thousand more between then & Night; But whether there be not some Mistake in Counting those Prisoners, is a Question."—Fitch Diary (M.S.), 167.

22 Howe writes to Germain from New York: "I do not now see a prospect of terminating the war, but by a general action, and I am aware of the difficulties in our way to obtain it, as the enemy moves with so much more celerity, than we possibly can. Nor can we hazard a March at this unfavourable season, with any hopes of making a stroke upon the enemy, in his present situation, that might turn the scale in our favour.

"Concluding upon the certainty of another campaign, an reinforcement of troops for immediate service, that can be procured, 20,000 men would by no means exceed our wants, yet 35,000 will give us a superiority, that I should hope, may be materially experienced in the course of the campaign. Philadelphia being now the principal object, by the greater number, we should be enabled to detach a corps of troops from Delaware, to penetrate into Pennsylvania, by way of Jersey; there would also in that case be a sufficient corps to act from Rhode Island. On the other hand, if the reinforcements are small, the operations will be much curtailed; or if none should arrive, we shall be confined to act in one body in Jersey, leaving only a small corps at Rhode Island, and another of sufficient force for the defence of this island and its dependencies."—Part. Reg. (1779), XII 377-78.

Mrs. Hannah White, wife of a sergeant in the regiment commanded by Gen. McDougall, reported to Governor Trumbull, of Connecticut, on Ja 24, that, when she left New York on the 20th, "the college, Bridewell New goal, Baptist meeting, and the tavern lately occupied by Mr Dela Montaigne, and several other houses" were "all full of slain, and wounded of the enemy," that the Hessians were "very sickly and discontented;" these three enemy obliged the citizens to watch at night, but would not trust many of them with arms, clubs being given to those suspected.—Conn. Gaz. (New London), Mr 7, 1777. See also Jour. Prov. Cong., I: 788.

23 The Ships of War are daily sending in Prizes. There is an immense Number at present in this Harbour, and some of considerable Value. Several of them are laden withers who have purchased in New York regarding this was: "Such is the Equity and Humanity of these Pretenders to Moderation and Liberty!"—Ibid., Ja 27, 1777.

Gen. Howe orders: "As the Fire Wards have the entire management of extinguishing the fires, it is particularly desired that no Officer Interfere with them in the Execution of that duty, unless called upon by Express Orders for that Purpose.

"The Fire Buckets belonging to the Guns that have been lent to extinguish the late Fire, are to be Immediately returned to Capt. Boummaster, at his Lodgings in Duck Street."—Order-book, in N. Y. H. S. Collections (1883), 439. See Ja 26.

On the evening of this day, "the little Theatre in John-street" is opened with "the celebrated Burlesque Entertainment of Tom Thumb, written by the late Mr. Fielding, to ridicule the Bathos of several dramatic Pieces that at his Time to the disgrace of the British Stage, had disgraced both the London Theatres. The Characters were performed by Gentlemen of the Navy and Army; the Spirit with which this favourite Piece was supported by the Performers, prove their Taste and strong Conception of the Honour. Saturday's Performance convince us that a good Education and Knowledge of polite Life, are essentially necessary to form a good Actor. The Play was introduced by a Prologue written and spoken by Captian Stanley; we have great Pleasure in applauding this first Effort of his infant Muse, as replete with true poetic Genius. The Scenes painted by Captain De Lancy has great Merit, and would not disgrace a Theatre, tho' under the Management of a Garrick. The House was crowded with Company, and the Ladies made a brilliant appearance."—N. T. Merc., Ja 27, 1777.

The Account Theatre Royal begins to be applied (Ibid., F 3, 1777), although performances during the season are invariably advertised as "At the Theatre in John's Street."—Ibid., F 10, 1777. This first season of theatrical performances by British officers lasted until May 29, 1777.—Sellar's, Hist. of Am. Theatre, II: 22; N. T. Merc., My 26, 1777. In 1778, under the patronage of Sir Henry Clinton, the performances were continued (see Ja 3, 1778).

Gen. Howe assigns the various regiments to "Alarm Posts," as follows: "41st Regiment, Queen's Street, their Left near the Tea Water Pump.

17th Regiment, Lower end of Broadway to face Head Quar- ters, their left upon the General's Guard.

27th Regiment, The upper part of Broad Way, to face St. Paul's.

49th Regiment, To face the North River, with their Right near the College.

17th Light Dragoons, Mounted on the Common, facing the Jail."

The "Hessian Troops" are placed as follows: "Hereditary Prince's Regiment, In the Rear of the Barrack, facing outward. "Mirbach's, To form in Queen's Street, their Right near Cherry Street, their Left extending towards Burling Slip.

Donop's, Their right to the New Barrack.

Rall's, To form in the rear of the Barracks on the left of the Hereditary Prince's Regiment."

The Artillery will receive their Alarm Posts from Gen. Clevel- land.

"Upon an alarm of Fire, the Troops form upon their Respective Parades, and wait for further Orders, sending an Orderly Officer to Head Quarters."

"Upon an alarm from the Enemy, the Troops will first form upon their Respective Parades, and thence immediately march to their Alarm Posts, where they will wait for further Orders, sending an Officer to Head Quarters."—Order-book, in N. Y. H. S. Collections (1883), 409-41. The substitution of a military, in place of a Civilian, fire-fighting force, proved disastrous in the fire of Aug. 3, 1778 (q.v.).

Gen. Howe orders: "that Recruits belonging to different Regi- ments will Practice firing Ball on the Level near the Foundry."—Kemble Papers, in N. Y. H. S. Collections (1883), XVI: 440; see also My 6, 1778.

Gen. Robertson, having been informed "that the Library of King's College, and of the Society Library in the City of New-York, have been pillaged, as well of the Books as of part of the Philosophical Apparatus," issues a proclamation "that in the books belonging to the College, is placed, either the arms of the College, or of the Society for propagating the gospel, and in some of them the Arms of Joseph Murray, Esq; and that in the Books of the City Society Library, and of them and Arms of the said Society, that the several Books so pillaged are otherwise so marked, that no one can be ignorant to whom they respectively belong. And all Persons in
THE ICONOGRAPHY OF MANHATTAN ISLAND

1777 whose Hands any of the said Books or Apparatus now are, by whatever means they came into their Possession, are hereby strictly notified, within Three Days, to come to the Printer hereof, for the Use of the respective Proprietors, or they will be committed to the Provost, and punished as Receivers of stolen Goods. — N. T. Merc., F 3, 1777; Man. Com. Coun. (1863), 656. Maj.-Gen. Pigot issued a similar proclamation on March 26.— *N. Y. Merc.,* Mr 31, 1777; *Keep, Hist. N. Y. Soc. Library,* 61-62.

27 Ever Byvans writes: "It is reported that our Army of 12,000 New England Forces will endeavor to retake New York, and plunder it very much, as they judge no man that is true to this country has any business more than those that are Tories, against whom they are much exasperated. Just this moment we received news that Gen. Washington was beating all the King's Troops back to New York, and hope in a short time to hear of their packing off and leaving us in possession of our estates."—From letter in Whitmore's *The Abel and Allied Families,* 18.

31 The committee of safety, meeting at Fishkill, resolves that a committee be appointed "to treat with Mr. John Holt about setting up a printing office in this State; and that they be authorized to offer him two hundred pounds for one year as a State Printer of this State, provided he will print a public newspaper, and on terms that this committee shall consider "very liberal." It is also directed that a committee be directed "to seize and secure all the printing types formerly belonging to Hugh Gaine, now in the country of Dutchess and its neighborhood."— *Jour. Prov. Cong.,* II, 793-94.

Feb. Sometime in this month, a Londoner wrote as follows regarding the war in America: "The small scale of our maps deceived us; and, as the word 'America' takes up no more room than the word 'York,' we seem to think, here, that numbers they represent are much of the same bigness; though Charleston is as far from Boston as London from Venice. Braddock might tell the difficulties of this loose, rugged country, were he living. Amherst might still do it. Yet these officers found a willing people to help them, and General Howe finds nothing willing. We have undertaken a war against farmhouses and farmhouses, scattered through a waste of continent, and shall soon hear of our General being obliged to garrison woods, to scale mountains, to wait for boats and pontoons at rivers, and to have his convoys and escorts as large as armies. These, and a thousand such difficulties, will rise on us at the next stage of the war. I say the next stage, because we have hitherto spent one campaign, and some millions, in losing one landing-place at Boston; and, at the charge of seven millions and a second campaign, we have replaced it with two other landing-places at Rhode Island and New York. I am entirely of opinion with Voltaire that every great conqueror must be a great politician. Something more is required, than the mere mechanical business of fighting, in composing revolts and bringing back things to their former order. — *The Am. Revolution,* Part II, II: 156.

3 Counterfeit dollars, made of pewter, very light and of bluish colour, are in circulation.— *N. T. Merc.,* F 3, 1777.

Pastor Shelwick's diary states: "Our busing ground [Mora- vian] at Fresh Water, (corner of Mott and Pell streets) lies entirely open; not the least of a board or post is left."— *The Campaign of 1776,* part 4, 125.

The advertisement of the performance at the John St. Theatre, on "Thursday Next" (F 17), of "The Comedy of the Beaux Strategem; With the Farce of the Upholsterer" concludes with this note: "The Gentlemen concerned in the above Charity give Notice, that they have lodged One Hundred Pounds with Doctor Morris, Treasurer to the Charity; for the purpose of giving such immediate Relief to Widows and Orphans of Soldiers who by Certificates from the commanding Officers of Corps appear to be proper Objects."— *N. Y. Merc.,* F 10, 1777.

11 Having gone "through several wars," Tryon personally secures the oath of allegiance of 1,970 inhabitants; and later 50 more made their attestation before the mayor.— *N. T. Col. Doc.,* VIII: 697. On Feb. 15, a paper was circulated throughout the city,ollecting, stating to the inhabitants of the Manhattan it revokes the authority of congress over them."— *Ibid.,* VIII: 608-9. On March 28, Tryon sent the names of all of these inhabitants to Germain.— *Ibid.,* VIII: 705.

12 Howe writes Germain that the rebels have hopes of "bringing into the field an army of more than 50,000 men. They are most sanguine in their expectations, and conscious that their whole stake depends upon the success of the next campaign, use every compulsory means to those, who do not enter voluntarily into their services."— *Pal. Reg. (1776-78),* I: 759.

13 Kemble records, "the New York Island, Long Island, Brunswick, Amboy, Paulus's Hook, [are] our principal Territory; loss of Men on several late occasions not less than fourteen or fifteen hundred."— *Kemble's Jour.,* 110.

14 Gov. Tryon offers his services to Gen. Howe "to command the Provinces in the ensuing campaign."— *N. T. Col. Doc.,* VIII: 697-98; *Parl. Reg. (1776-77),* II: 21-22. He was so appointed, with the rank of "Major-General of Provinces" (raised in this colony).— *Ibid.,* VIII: 715. Having objected to the rank thus bestowed, he was given the king's commission in May, with the rank of "Major General in America," and appointment to the command of the 70th Regiment.— *Ibid.,* VIII: 746.

15 That the tidings of Gen. Lee's capture (see D 13, 1776) created great elation in England is evident from the following: "This is to give notice that Thursday night will be held as a day of rejoicing in commemoration of the taking of General Lee, when there will be a sermon preached, and other public demonstrations of joy; after which there will be a 100 [au os] roasted whole, and every mark of festivity and bell-ringing imaginable, with a ball and cockfighting at night in the Assembly-room at the Black Lyon."— *Terryman, The Am. Revolution,* Part II, II: 60 (footnote), citing "Notice by James Clinch, Parish Clerk and Cary of Tring in Buckinghamshire."

16 "We learn y^d Times have Altered something for y^d Worse in N. York, since we left y^d City, Beef is sold at 1/3^d lb & other things proportionably Dear... Little News Respecting y^d Armies, only y^d about 1750 Hessian & y^d 378 prisoners in y^d Jersey, & y^d 378 members of Wounded Soldiers had been brought into y^d City."— *Fitch's Diary (M.S.),* 198-99.

17 Maj.-Gen. Robertson sails for England, and is succeeded, in the command of the city, by Maj.-Gen. Pigot.— *N. Y. Merc.,* F 24, 1777. He returned on Sept. 26 (q. c.).

18 While in England, he stated that "although when the King's Troops took Possession of the City of New York it was found almost without inhabitants, the Eagerness of the People to return under his Majesty's Government was such, that the Number of Inhabitants on the 17th of February amounted to upwards of 11,000."— *St. James's Chron.,* Mr 22-25, 1777.

Recruits are sought for a body of rangers commanded by Lieut.-Col. John Bayard, whose recruiting-station is at "Mr. Mason's near the exchange, in Little Dock-Street."— *N. T. Merc.,* F 17, 1777.

19 Geo. Howe goes to Jersey.— *Kemble's Jour.,* 110.

20 A letter written from New York to someone in London states: "Since General Howe's Departure from this City we have seemed rather dull, as he took almost all the Regulars with him. Our Divisions notwithstanding continue, and are upon an excellent show. Theatre opened in John-Street, where the Officers of the Army and Navy perform Plays and Farces, and the Receipts of the House are applied to a Charity established for the Relief of the Widows and Orphans of Soldiers. Price, Pit and Boxes One Dollar, Gallery Four Shillings Currency. The Managers have already paid 100 l. to the Charity. With what Satisfaction must they see Plays here when they consider that they are promoting the Happiness of a Number of distressed Objects."— *St. James's Chron.,* Ap 1-3, 1777.

21 Another letter from New York declares: "Two new Corps have been raised in this City and Long Island within the Space of ten Weeks, one called the Prince of Wales's Royal American Volunteers, commanded by Governor Brown, who was taken Prisoner by the Provincials at their Attack on Providence; The other called the King's Loyal Orange Rangers, commanded by Lieutenant Colonel Bayard. Considering the small Extent they had to recruit in, I think it proves the Loyalty of the People in enlisting so fast, as they only gave Forty Shillings Bounty."— *St. James's Chron.,* Ap 3-5, 1777.

The proclamation which was issued by Maj.-Gen. Robertson (see p. 15), for establishing a city watch, not being observed, Maj.-Gen. Pigot issues a new proclamation requiring the superintendents of the watch to report to him all persons who refuse or neglect to watch.— *N. Y. Merc.,* Mr 3, 1777.

There being reason to believe that Maj.-Gen. Robertson's proclamation of Jan. 17 (q. c.), relative to the registering of the names of citizens and strangers in New York, has not been ob-
The provincial convention passes resolutions directing the commissions appointed within this State to inquire into, detect and defeat all plots and conspiracies against the rights and liberties of America, within this State, and to send for all such persons, members of this State, as are confined by parole or otherwise, excepting those who are charged with taking up arms against the United States, with enlisting men for the service of the enemy, accepting a warrant or commission for that purpose, supplying them with provisions or conveying intelligence to them; and that they do tender to each of them an oath, or if of the people called Quakers, an affirmation, that he will bear true faith and allegiance to the State of New-York; that he will discover all plots and conspiracies which may come to his knowledge, against the said State, or the United States of America; that he will do his duty as a good subject of the said State; and that he takes the said oath or affirmation without any mental reservation or equivocation whatsoever, and means faithfully and honestly to perform the same. That such of the said persons as shall take and subscribe the said oath or affirmation, be discharged; and that such of them as shall for six days after the same shall be tendered to them respectively, refuse to take the said oath or affirmation, receive a pass and be directed to repair, with their families, apparel and household furniture, to the city of New-York or some other place in the possession of the enemy and their observations, within the time for that purpose by the said commissioners to be limited, that they be confined in close jail, and otherwise treated as the open enemies of this State. The convention also resolves that "such of the said persons as shall not, after being so as aforesaid sent for, appear before the said commissioners within a time for that purpose by the said commissioners to be limited, shall be considered as having gone over to the enemy. And the personal property of such persons shall be seized and sold at public vendue, and the money arising therefrom shall be paid into the Treasury of this State and be subject to the disposition of the future Legislature thereof; unless, upon the appearance of such delinquents before the said commissioners previous to such sale of their personal property, a sufficient reason be assigned for their non-appearance."—Jour. Prov. Cong., I: 10.

The minutes kept from 1778 to 1781, inclusive, by the commissioners for detecting and defeating conspiracies in New York were published by the state in three volumes in 1909, with editorial notes by Victor Hugo Paltits, state historian.

About 250 "Rebels," both horse and foot, make an attack on the light house at Sandy Hook, but are repulsed by the garrison of about thirty men.—Jour. of Hugh Gaine, II: 21.

"Of near 10,000 inhabitants, which New-York contained last winter, there were not 3,000 left when the King's troops took possession of it, and these above half are Dutch and German traders, ... the rest are composed of aged, sick, and such persons as refused to enter into the measures of the Congress."—Conn. Gaz. (New London), Mr. 7, 1777.

The regiment is being raised by Col. John Morris to serve King George III during the present rebellion in America. Recruits are requested to apply to "Mr. Waldron Blau, in Little-Doek-street, near the Exchange," where they will receive clothes, etc.; and "as a further encouragement, each man shall be entitled to 30 acres of land in this province, at the expiration of this rebellion, for which he will receive a deed free of every expense."—N. Y. Merc., Mr. 10, 1777.

The Merchants' Coffee House (s. e. cor. Wall and Water Sts.—see L. R. K., III: 979) is designated as the meeting-place of the proprietors of "the United Whaling Company, in the city of New-York."—N. Y. Merc., Mr. 10, 1777.

The committee for preparing and reporting a form or plan of government submits its report to the New York provincial convention.—Jour. Prov. Cong., I: 83. The state constitution was adopted on April 20 (a.v.).

More of the ships that came out with the Thames came up this morning, and a Report of the heavy Cannonade being heard towards Brunswick or Amboy."—Jour. of Hugh Gaine, II: 21.

Reports current that General Washington was dead, and his Army, passing the Delaware, however not credited by any Body."—Jour. of Hugh Gaine, II: 22. A contributor to a London paper
comments on the report thus: "If General Washington be dead, as reported, it is clear that the American Rebellion will not long survive him. His Character, as a humane, brave, and skilful Officer, has done more towards keeping the Provincial armies under Arms than all the hypocritical Invocations of the whole Republican Congress put together."—St. James's Chron., Ap 29-May 1, 1777.

The Reports mentioned above still prevail, but some say Mr. Washington was on the Recovery.—Jour. of Hugh Gaine, II, 22.

Mr. Smith receives the following instruction relating to New York: "The Sound crowded with Vessels—Preparations for moving a Way from N. Y. Merchants imbarKing their goods. Cannon spiked there. Fort Independence Washington abandoned."—Wm. Smith's Diary (M.S.), V.

The "Friendly Brothers" (of St. Patrick) are notified to meet on Monday at Hall's Tavern, Mr. H., Apr. 12, 1777. This was the City Tavern at the present 115 Broadway. Again, on May 1, "being a Collar Day" (see Gene. Dict.), such Friendly Brothers as were in town were requested to meet at Hall's for dinner.—Ibid, Ap 21, 1777. Hall's Tavern was the principal quarters for loyalist meetings. Boston loyalists who left with the king's army met here on May 21st.—Ibid, My 19, 1777. This tavern was also the meeting-place of the Society of the Hospital, the "Blue and Orange Society," and others.—Ibid, My 19, 1777; Royal Gag., Ap 10, 1777.

France is now arming at all points for a war with Great Britain. The protection she offers to American ships of war, and every other public step she takes is of such a nature, as to make it absolutely certain that a war between France and England is either actually begun, or must very soon take place."—Penn. Gaz. (Phil.), Mr 2, 1777. There was a premonition of the hostilities which began on June 17, 1778 (p. 22).

Sir William Howe ("General and Commander-in-Chief, of all His Majesty's Forces within the Colonies living on the Atlantic Ocean, from Nova Scotia to West-Florida, inclusive, &c.") issues a proclamation from headquarters in New York, by his secretary, Robert Mackenzie, which recites: "Whereas, it having been found that fresh Provisions of all Kinds, will greatly tend to the Preservation of the Health of His Majesty's Troops and others; and the raising large Quantities of Hay, and other Forage, will very much conduce to His Majesty's Service. . . . Therefore none shall trespass upon any enclosure belonging to another, or remove the produce, or break down fences. Offenders shall be seized and delivered to the commanding officer, or the provost marshal, for punishment."—N. Y. Merc., Mr 24, 1777.

About 40 men (refugees) come to New York with their arms from New Castle.—Jour. of Hugh Gaine, II, 23. For reference to other groups of refugees, see Mr 29 and 31, Ap 11 and 14.

"An Expedition on flat-bottomed boats goes up North River."—Jour. of Hugh Gaine, II, 23. Gen. Howe wrote to Lord George Germain on Apr. 1, of "being confident of sending 500 men that I sent up the North river in transports, on the 22d of March, conveyed by the Brune frigate, to destroy a considerable deposit of provison and stores which the enemy had made at Peek's Kill . . . reembarking without interruption returned here the 20th."—Part. Reg. (1779), XI: 356. See also Kemble's Jour., 112.

The restry of Trinity Church elects Rev. Charles Eglins rector, in the place of the late Dr. Auchmuty.—N. Y. Merc., Mr 24, 1777.

An advertisement offers to let that "delightfully situated House and Gardens, Coach-house, Stable, &c. at Belvoir, near the Water-Works in the environs of this City, belonging to Mr. Howard."—N. Y. Merc., Mr 24, 1777. This house, later known as the White Head House and, with its garden, also known for a time as Ramelagh, was built by Crean Brush in 1767 (p. 2). The grounds were modelled after the popular English "pleasure gardens" of the period, and were probably opened shortly after the occupation of the city by the British. The house stood at the present 511 Broadway. For its later history, see L. M. R. K., III: 981; JI 15, 1780; Ap 21, 1781; Mr 4, 1772; F 6, 1799. By 1805, the garden had been lost, and the house was demolished. Some writers have made the mistake of confusing this celebrated house with that of Joseph Corrè, later known as Mt. Vernon. The latter, however, was north of Leonard St., and the White Head House was south of that street. See L. M. R. K., III: 981; HI 174, Vol. III. There is an undated sketch in the Bancr Coll., in the N. Y. P. L., showing the White Head House; also a view, of much later date, in Men. Con. Uni. (1857), opp. p. 450.

"The old Tavern lately kept by Capt. Thomas Doran, on the Mar. dock, near the Fly-market, is now revived . . . by . . . Loosley, & Elms."—N. Y. Merc., Mr 24, 1777. For an account of Doran's tavern, see Ja 15, 1770. These proprietors called it the King's Head, and it became popular.—See Bayles, Old Taverns of N. Y., 234-86, and authorities there cited.

A Gentleman, late from Head-Quarters in the Jerseys . . . remarks that he could not have believed it was in the power of any events to have made so great an alteration in the sentiments and spirits of a people in so short a time, as the enemy's rout and ravages made among the Jerseymen. The specimens of British Government exhibited on this memorable occasion, has fully gratified any hankering the inhabitants might have to see it established. The repeated failure of their military operations has cast such reproach on their arms, that those who were frightened with Gen. Howe's success and begg'd his pardon and protection, have almost to a man returned to the cause; and are now fighting for the defence of their country; being resolved at all hazards to prevent any future ravages—Penn. Gaz., Ap 12, 1777.

"Mr Paterson tells me that it was said in New York that all would be Peace in this Colony but for Ph. Livingston Robr R Livingstone] Jay Duane Scott and Duer and that as the last they uttered the severest Executions . . . That there were 12000 Men with Genl Howe and at New York Long Island Staten Islands Paulus Hook 22d Battery Greenwhich & Light Infantry companies."—Wm. Smith's Diary (M.S.), IV.

Gen. Lee, now prisoner in New York (see Ja 1), submits to Lord and Sir William Howe a plan for the easy subjugation of the colonies. It is written unmistakably in Lee's own hand, and is endorsed in the known handwriting of Henry Stachey, secretary to the royal commissioners, as "Mr. Lee's Plan 29th March, 1777." The document, having been found in a pocket of America from England, was purchased by the late George H. Moore, librarian of the New York Hist. Soc., and this and other proofs of Lee's treason were first presented to the world in a paper read last Mr. Moore before this society on June 22, 1858. For facsimile reproduction of the plan and a full account of the treason, see Mr. Lee's Plan—March 29, 1777. The Tale of Charles Lee, by Geo. H. Moore (1860). Benson J. Lossing, in a footnote to Geo. Washington Parkie Custis's Recollections and Private Memoirs of Washington (1860), 392-93, states that this treasonable act makes it easy to interpret Lee's peculiar conduct after the fall of Fort Washington, his occupancy of a suite of rooms in the city hall while a prisoner in New York, and his great intimacy with British officers here. See also essay on "Charles Lee, Soldier of Fortune," in Fiske's History of American Literature of Apr. 2, 1891. Concerning Lee's treasonable documents, see ibid., VI: 416; and for his trial, which was held at Brunswick, N. J., on July 14, 1778, see ibid., VI: 466. See, further, Ap 15, J 4, D 10, 1777; F 3, 1778.

"Sixteen Rebels came in To-Day, but we hear near 100 have been intercepted about the White Plains, that were coming in to join Col. Beverly Robinson's Battalion." Wood costs £45 10s. per cord.—Jour. of Hugh Gaine, II: 25.

"Forty men came in from Dutchess in order to join Beverley Robinson's Battalion, which fills amazingly."—Jour. of Hugh Gaine, II: 25.

In a letter to Lord George Germain, marked "secret," Gen. Apr. Howe expresses disappointment at "the small reinforcement intended for this army for the ensuing campaign," and adds: "My expectations of a move in the winter against the enemy in Jersey . . . have been frustrated by a deep fall of snow, which rendered the country impassable, and since the breaking up of winter, the depth of roads forced me to relinquish the idea. Restricted as I am from entering upon more extensive operations by the want of forage, I have been waiting for the arrival of the army from New York (p. 99), and for no event more my thoughts than terminating the war this year are vanishing; still I think it probable, that by the latter end of the campaign, we shall be in possession of the provinces of New-York, the Jerseys, and Pennsylvania, though this, in some measure, must depend upon the successes of the northern armies; for, notwithstanding it is my opinion the rebels will not be able to raise their army voted last Autumn, yet they will have a numerous militia in the field, in addition to their standing force, with a tolerable train of artillery."
The force vested 892-98, Sufficiency pray 'T
Whitehall.—Usage is cloathed, committee
Rest of his confident to them Vessels
Country Delegates Fleet Propriety report
be in officer coming from Cork the 20th of December, and
the Rest some of the Ships that came out with the Thames Frigate.
One of them in coming by the Battery struck on the Chevanse De
Frize and sunk before she got to the Wharf. Great Quantities of all
Ships are shipping on board the Transports, there being a Sufficiently taken up for 12,000 Men and Provisions to
be put on board for 3 Months.—Jour. of Hugh Gaine, II: 27.

William Demagne, having obtained permission to establish
a stage boat from New York to Perth Amboy, proposes sailing every
Tuesday and Friday. His shipping office is at Dougherty's tavern,
Whitehall.—N. Y. Merc., Ap 7, 1777.

Smith several days after harrv: "I believe the American leaders now
despair of their own ability to defend themselves ag5 the Power of
Great Britain and that their Hopes are only sustained by the Pros-
pect of French aid and that of this they are suspicious. This is the
moment therefore for offering Terms and I pray God that admn
may see the Propriety of some proper Publications for this Purpose.
I am confident that the multitude would give them Success and
believe the Delegates continental and Provincial or rather many of
them would be glad to find the Temper of the People favorable to
their making Cessions without Danger of the Wrath of the Popu-
lace."—Wm. Smith's Diary (MS.), V.

"The Country people daily escaping thru6 the Rebels and coming
in with their arms."—Montesar's Jour., 421; see also Jour. of
Hugh Gaine, II: 28. Similar entries appear in the journals of both
wars, for many years after this; cruizers are bringing in prizes,
too, almost every day.

"I this Day learn by Capt Bebbe who has lately been to
York, yt yt Prisons there are yt much better than they have
been some time past, & yt there are considerably healthy."—Jour's
Diary (MS.).

"The Several Provincial Corps already raised, are mostly
cloathed, and make a very handsome Appearance. Their Uniform
is chiefly Green faced with White, and made of the best materials.

The state convention, at Kingston, appoints a committee "to
prepare and report a proper device for a great seal of this State."—
Jour. Pravin. Cong., I: 882. It does not appear that this com-
mittee ever made a report.—Ward, The New Society of N. Y's:
City and State, 48; but see S 10, 1777; Mr 16, 1778.

An item of London news states: "When General Lee was taken,
he was put on board a Vessel at New-York three several Times in
order to be brought to England, and the Ship was absolutely on
Seil when Washington's Letter to General Howe arrived at New-
York; the Consequence of which was, that the Ship was stoped, and
Lee was transferred to a man-of-war in the harbour on June 4
(p.t.).

"Two Hundred and Six Men came in this Morning, from
Dutchess County and more may be hourly expected [see Ap 21]."
and Ap 21.

Germain writes from Whitehall to Gen. Howe: "I have had a
great deal of conversation with Major-General Robertson; and
as he is an officer of great experience and merit, and one whose
continuance in America was particularly desired by you, his Ap.
Majesty has been pleased to order him to return thither, and con-
tinue to act under you as Major-General. . . .

"Before this reaches you, I trust that Colonel Grey (appointed
as your General) will have arrived with the Somerset" (see Jg).
He adds: "Lieutenant-General Clinton has been honoured by his
Majesty with a red ribbon, and will set out forthwith for America."

"It is this Day two Years since ye 7th Convention of ye present
War, when Hostilities first took place at Lexington Concord &c, in
Massachats Province, in consequence of which, ye whole Country
 hath long been in Arms, and ye Yeilding thereof is the prospect of
a Sesation of Hostilities."—Fitch's Diary (MS.).

Lafayette and Baron de Kalb sail from Los Passages, Spain, in
the "Victoire," to enter the service of the United States.—Doniol,

The provincial convention, sitting at Kingston, adopts a constitu-
tion for the "State of New York" (see Mr 12). The preamble of
the constitution recites the proceedings of the provincial congress
leading to this enactment; and also recites in full the "Declaration
of Independence," passed by "the delegates to the United Ameri-
Can States in Congress convened." By virtue of these acts, the
preamble avers, all power in this state "hath reverted to the
people thereof, and this Convention hath by their suffrages and
free choice been appointed, and among other things, authorized
to establish such a government as they shall deem best calculated to
secure the rights and liberties of the good people of this State, most
conducive of the happiness and safety of their constituents in par-
cular, and of America in general.

The supreme legislative power of the state is vested in the
assembly and senate. No "member of this State" shall be "dis-
franchised or deprived of any of the rights or privileges secured to
the subjects of this State, by this constitution, unless by the law
of the land, or the judgment of his peers." The supreme executive
power and authority is vested in a governor, who shall be elected
by the qualified freetholders of the state every three years. The style
of all laws shall be: "Be it enacted by the People of the State of
New-York, represented in Senate and Assembly." Likewise, write
and other proceedings shall run in the name of "the People of the
State of New-York."

The law of this state shall consist of "such parts of the common
law of England, and of the statute law of England and Great
Britain, and of the acts of the Legislature of the Colony of New-
York, as together did form the law of the said Colony" on April
19, 1773; "subject to such alterations and provisions as the Legis-
lature of this State shall, from time to time, make concerning the
same." The parts of the common law or of the provincial statutes,
"which may be construed to establish or maintain any particular
denomination of Christians or their ministers;" or such parts of
the laws as concern the sovereignty of the King of Great Britain over
the colony of New-York and its inhabitants, or are repugnant to
this constitution, are abrogated and rejected.

The "free exercise and enjoyment of religious profession and
worship" shall "forever hereafter be allowed within this State to
all mankind; provided that the liberty of conscience hereby granted
shall not be so construed as to excuse acts of licentiousness or justify
practices inconsistent with the peace or safety of this State."

The convention declares that "it is the duty of every man who
enjoys the protection of society, to be prepared and willing to
defend it." The militia shall at all times "be armed and disciplined
and in readiness for service."

Trial by jury shall remain inviolate.

Naturalized citizens, on taking the oath of allegiance to this
state, shall "abjure and renounce all allegiance and subjection to
to all and every foreign king, prince, potentate and State, in all
matters ecclesiastical as well as civil."
A proclamation, issued by Gen. Howe, states that, "for the more speedy and effectual Suppression of the unnatural Rebellion subsisting in this Province, and in that part of America, it has been thought proper to levy a Number of Provincial Troops, thereby affording to His Majesty's faithful and well-disposed Subjects, Inhabitants of the Colonies, an Opportunity to co-operate in relieving themselves from the Miseries attendant on Anarchy and Tyranny, and in restoring the Blessings of Peace and Order, with just and lawful Government." As a reward "for the Promptitude and Zeal wherewith His Majes-	y's faithful Subjects have gone into the Service of the Corps new raised, and as a further Encouragement to others to follow their laudable Example," he promises, with the authority given him by the king, "That all Persons who have, or do hereafter, enlist into any of the said Provincial Corps, to serve for Two Years, or during the present War in America, ..." shall obtain, "after being reduced or disbanded," the following quantities of "Vacant Lands in the Colonies wherein their Corps have been, or shall be, raised, or in such other Colony as His Majesty shall think fit:"

"Every Non-commissioned Officer ... . . . 200 Acres.
Every Private Soldier ... . . . . 50 do.
"The same to be granted to such of the said Non-commissioned Officers and Soldiers as shall personally apply for the same, by the Governor of the respective Colonies, without Fee or Reward, subject, at the Expiration of Ten Years to the same Quit Rents as other Lands are subject to in the Province within which they shall be granted, and Subject to the same Conditions of Cultivation and Improvement."—N. T. Merc, Ap 21, 1777.

Since April 15, about 500 inhabitants of the various counties of the province have come to town, and most of them have joined the new corps now being raised here.—N. T. Merc, Ap 21, 1777.

"Troops embarked about 2 o'Clock consisting of about 2000 Men, and various are the Conjectures of their Destination. A Prize Brig from Philadelphia by the Mermaid."—Jour. of Hugh Gaine, II: 29.

Robertson writes that the troops bound for Danbury (see April 20) "sailed up the East River and passed Hellgate w't a fair Wind, w'tail'd & we came to an Anchor in the sound off City Island."—Robertson's Jour. (MS.); Jour. of Hugh Gaine, II: 29. They were commanded by Gen. Tryon and destroyed the American stores on the night of April 26 (q.v.).

Wm. Smith writes: An unknown Traveller informs my Ser.
vant that a large fleet of the Navy is in the N. Y. District, went off last Week to Kingsbridge led by one Joshua Gid-
ney and the Week before 500 from N. England crossed the Sound to Long Island from Frogs Point and that he had seen a Man lately from N Y who told him the Prisoners there had listed in the Crown Service & with the Recruits who came in from the Country were to form an Army who were to ascend the River soon under the Com-
mand of Gen'lt Tryon [see F 12]. . . . I suspect he is one of the many Emissaries passing thro' the Country recruiting for the British Army."—Wm. Smith's Diary (MS.), V.

"There are 22 Vessels in Hudson's River opposite to Fort Washington and Mc Dugal writes from Peak that they expect a Visit soon. This greatly alarms."—Wm. Smith's Diary (MS.), V.

A schedule of the British killed, wounded, and missing, prepared by Capt. Ady, Gen. Kemble, and giving the number of casualties in each action from April 19, 1775, to this date, shows a total of 5,193.—Kemble's Jour., 115.

Gen. Howe issues a proclamation establishing, in terms of sterling, a rate of exchange for the currency of this province, thus: a guinea (weighting 9 pwt., 7 gr.) equals £1:17:4½; a half Johannes (of 9 pwt., 3 gr.), £1:13:4½; a moidore (of 6 pwt., 2 gr.), £1:9; a Spanish milled dollar 8 sh.; and an English shilling, 1 sh. 9 d.—N. T. Merc, My 12, 1777.

"Sandry Prizes were brought in this Day by his Majesty's Ships, and the Governor [Tryon] with Sir William Erkine came to Town."—Jour. of Hugh Gaine, II: 31.

My 5.

The Galatea is returned from her Cruise, with only 7 Prizes, which makes 14 brought in this Week."—Jour. of Hugh Gaine, II: 31.

Wm. Smith writes: "Robt R L reports as fresh news from the Congress. That a new war is declared between the Russians & Turks. That Dt Franklin is gone to the Court of Prussia & Sheriff Lee to Madrid and that the Merchants of France fit out Privates under Conté Colours & Commissions which are there brought in & sold & that a Knott of them at Nante have lent the Congress 400,000 Livres."—Wm. Smith's Diary (MS.), II: 69-70.

The provincial council, at Kingston, adopts a "plan for organizing government." A "Council of Safety" is appointed, consisting of John Morin Scott, Robert R. Livingston, Christopher Tappen, Abraham Yates, Jr., Gouvener Morris, Zephaniah Platt, John Jay, Charles De Witt, Robert Harper, Jacob Cuyler, Thomas Tryedwell, Pierre Van Cortlandt, Matthew Cantine, John Sloss Hobart and Jonathan Tompkins. They are invested with all the powers necessary for the safety and preservation of the state, until a meeting of the legislature. The executive powers of the state are to be vested in the governor, however, as soon as he shall be chosen and admitted into office, after taking the oath of alle-
giance before the council of safety. The form of such oath is adopted.

Inasmuch as the new state constitution vests the appointment of state officers in the governor, with the advice and consent of a council of appointment, which will not exist until after an election of representatives in the senate and assembly; and as many of these state officers are necessary for the immediate execution of the laws, and even for holding such elections, the following officers are now appointed by the provincial convention: Robert R. Livingston, to the office of chancellor; Thomas Jefferson, his assistant; Robert Sloss Hobart, puisne judges; and Egbert Benson, attorney-general. County judges and other officers are also named. The mode of holding elections for governor, lieutenant-governor, and senators in each county, by the free-holders (qualified as the constitution prescribes), and for members of assembly by the people at large, is also prescribed.—Jour. Prov. Cong., I: 916-917.

Peter R. L ret from the Convention which dissolved yesterday here. The N Y. Committee of Safety were now elected to serve only to that Day, but for that accidental limitation they would have sat longer for the other Counties had not fixed any Period . . . Robt R. L had 21 Votes for Chancellor Scott—9—15 for Chief J. Scott 6—They (the Convention) have Chosen Senators for the Southern District possessed by the British Troops and Assembly-men for each of those six Counties.—Wm. Smith's Diary (MS.), II: 83.

The Colony is now in the Hands of 15 as a Council of Safety [see My 8]—The Resolutions of so small a Body will be quick and much depends on their Temper."—Wm. Smith's Diary (MS.), II: 85.

"We this Day heard a Rept of Gen'l Carlston had taken Ticon-
darog, & put ye whole Garason (consisting of 1500 men) to ye Sward."—Fitch's Diary (MS.).

Ten Prizes brought in this week besides what were destroyed by the Ships at Sea."—Jour. of Hugh Gaine, II: 33.

Lieut-Col. Kemble proceeds to Kingsbridge and views the ground where redoubts are to be placed.—Kemble's Jour., 118. On May 19, "The Provincials began to work upon the Redoubts, Number 5 and 6 in the Front of the Provincial Encampment."—Ibid.

This is a considerable number of French prisoners now con-
fin'd in ye 2d City [New York], who were taken at Sea."—Fitch's Diary (MS.).

Smith writes: "I take it for granted that the main object of the British Gen 1 is to penetrate the New England Colonies—Because Nothing is as yet attempted many conclude that the General is weak . . . I conjecture that Mt Howe may with the 6000 Pro-
vincials have a Force of 36 or 38 men and that he reasons thus: I have 10,000 in Jersey and if I withdraw the rest of the Friends of the British Government there will be ruined.—The remaining 16 or 17000 are not sufficient till Burgoyne attacks by the Way of Ticonderoga Boston or Salem and Genl Clinton with Reinfornements penetrates.
from Rhode Island. Then I will keep Washington in Jersey send
May 10,000 to Horseneck and thus put New England between three
Fires and with 6 or 7000 more ascend HUDSON’S River to Albany and then all the other forces & find only Militia to contend with.

It may be asked why the Troops at New York have not harassed the Coast by Feints of Landing in one place and another while the roads were difficult. It may be answered—My Plan insure success and such alarms would not only have cut off the Fruits of the Year by drawing off the Farmers, but would have involved the Friends of Governor Dunmore in trouble and tended by repeated Irritations to have added to the continental army. —Wm. Smith’s Diary (MS.), II: 296–97.

A “large fleet, consisting of a hundred sail,” leaves New York and stands out to sea—Writings of Geo. Washington (Ford ed.), V: 393.

Three regiments arrive from Rhode Island, one English and two Hessian. —Jour. of Hugh Gaine, II: 34. See May 18.

Two Ships came up from England with Troops, part of an expected fleet from “the Downs.” —Jour. of Hugh Gaine, II: 34. A report is current in New York City that “50 Prisioners are soon to be sent on Board ye Fleet in order to be sent home to Europe.” —Fitch’s Diary (MS.).

The Fleet consisting of 20 sail came up from the Hook, having lain off the Narrows, but finding the roads obstructed by the IZIs, Canals, Bute, and [Swift.] —Jour. of Hugh Gaine, II: 34.

“As many troops are come in, some were lodged in the North Church opposite us [the Moravian Chapel], who made a great wild noise. They were of the recruits that come from England. Others were lodged in the Methodist meeting, and in the old Dutch church, &c.” —Sheppard’s Diary, 126.

Sunday. —Smith’s Diary, II: 32.

Came up by Liberty St., suffer from jail-levy, and are permitted, in companies to 20, to walk in the yard half an hour daily.—Man. Com. Coun. (1824), 414.

June

1. It is announced that “The students of King’s College in the city of New York, who Chose to renew their studies, are requested to attend at No. 13 in Wall Street, where also the candidates for admission may apply.”—To Benjamin Moore. —N. Y. Merc., Je 2, 1772. See My 31, 1776; 1777.

On the same day Geo. Howe wrote to Germain: “The remount horses, for the 16th and 17th drogoms, are arrived in good order, with the loss of ten horses on the passage. The officers of the guards, and British troops arrived on the 24th of May [1772], the Anspack Troops, 432 German recruits, and 51 German chasseurs, on the 3d instant, conveyed by the Somerset. These troops appear to be in very good health, and have disembarked upon Staten Island, to refresh for a short time.”—Parl. Reg., XI: 399. Cf. Kemble’s Jour., 118: he says there were “2 Battalions Anspack.”

3. The Hon. W. B. Smith, a member of the provincial council since 1766, was removed from his country seat at Haverstraw (to which he had retired on the departure of Gov. Tryon from New York), to attend the council of safety at Kingston. He was there asked whether he considered himself a subject of “the Independent States of America,” and replied “that he did not conceive himself discharged from his oaths of fidelity to the crown of Great Britain.” An order was immediately made by the board (on June 7) for him “to be confined, within the manor of Livingston.” Here he remained “until he was sent into New-York, by a flag, under the superintendence of Colonel Burr [see Ag 26, 1778], by order of General Washington.” He remained in New York until its evacuation by the British troops.—From Memoir of the Honourable William Smith, written by his son,” in N. Y. H. S. Collections, IV: xiii–xv.

Smith says that the continuation of his history to 1762 was “arranged at the Manor of Livingston in 2 Months before the 20 March 1777, arranged from Notes formerly collected but great additions will be made when I can again have Recourse to a Collection of Gazettes & other Papers left at Haverstraw.” —Wm. Smith’s Diary (MS.), II: 355.

4. This being the anniversary of his birthday, “when he entered the 40th Year of his Age,” the day is observed with “every possible Demonstration of Joy.” At One o’Clock a Royal Salute was fired from Fort George, which was answered by all his Majesty’s Ships in the Harbour, as well as Merchants, to the Amount of about 500 Sail. After which his Excellency Admiral Lord Howe, and the General Sir William Howe, with the principal Officers of the Navy and Army, dined together at his Lordship’s House in Hanover-Square, where an elegant Entertainment was provided. His Excellency Governor Tryon also gave a splendid Entertainment upon the Occasion to many of the principal Gentlemen of the Town and Colony. In the evening the City was universally illuminated, and the Inhabitants seemed to vie with each other in the public Declaration of their Loyalty.” —N. Y. Merc., Je 9, 1777.

Gen. Chas. Lee is sent on board the “Centurion.”—Jour. of Hugh Gaine, II: 35. He had been kept a prisoner by the British in the city hall or new jail during the five and a half months that elapsed between his capture on Dec. 13, 1776 (q.v.) and his coming to New York on Jan. 1, 1777 (q.v.), and was placed on the man-of-war “Centurion” in the harbour while Gen. Howe was pursuing his brief campaign in New Jersey against the forces of Washington. There he had more freedom than when confined in the city, and was permitted to exercise by walking the quarter-deck.—Moore, Treatise of Maj.-Gen. Charles Lee, (N. Y., 1862), 7. See D 30, 1777, and E 3, 1778. See A., II, 2, 1777.

A Hessian officer, writing from Rhode Island on June 24, stated that his regiment, which arrived in New York harbour on June 3, was on the 5th quartered in the Dutch Church, and were obliged to spend the 4th, and possibly the 5th, or rather among the tombstones, as we were unable to find another place for our equipage or any other shelter for ourselves—if a night in a graveyard could be called by that term.” Commenting on the high prices, he says: “a loaf of bread (made of wheat, for corn is rarely raised here) and which at home costs one albus, costs here 5.” New York, he says, is “one of the handsomest and most pleasantest of the United States, the houses, which are in the English style, regular and well built, are not only of a palatial character, but are most elegantly furnished and papered inside. It is therefore a pity that this country, which, by the way, is exceedingly fertile, should be inhabited by such brutish people—people who have been brought into their present position by sheer luxury and extravagance, and which may, if they downfall solely to their own haughtiness.”

“The Somerset came up To-Day and landed Gen. Grey” (see Ap 19).—Jour. of Hugh Gaine, II: 35.

“The Light-Horse and many of the Troops embarked, but their Destination not known.” Ou the next day he wrote: “The Embarkation continues,” and, under June 6: “The General’s Horses put on board.”—Jour. of Hugh Gaine, II: 35.

“Some Men-of-War from England. The St. Albans said to be One.”—Jour. of Hugh Gaine, II: 35.

This day the Genl. [Howe] left N. York & went to amboy—to take the Command of the Army in the Jersey’s where now consisted of all the Troops that could be brought together after leaving Provincetown. The H. Island & c. &c. &c. W. We likewise left N. York this day. We arrived at Amboy about 10 at Night.”—Robertson’s Jour. (MS.), in N. Y. P. L. See also Mon- tero’s Jour., 421. For Howe’s movements in New Jersey, see Robertson op. cit. under Je 13, and Parl. Reg., XI: 408. See, further, Je 21.

“Alahaman Patton, a Spy from the Rebel Army, was executed at Brunswick last Friday. . . . At the Gallows he acknowledged all the Charges brought against him, and said he was a Principal in setting Fire to New-York, but would not accuse any of his Accomplices. . . .” —Upcott Coll., V: 35.

The committee of Trinity vestry, appointed on April 1 to estimate the damage sustained by Trinity corporation by the fire of Sept. 11, 1776, reports a loss which total £2,200, estimated as follows: “Trinity Church Including the Organ, £17,700; Parsonage or Rectors House, £4,900; ‘Two Charity School Houses & Fencing,’ £2,000; ‘Library,’ £2,000. To this is added the loss to the corporation of £5,566 per annum in annual rentals from 246 lots, ‘the Tennants Buildings being all Consumed by the Fire.’ The report is dated May 13, 1777. Cf. Dr. Loring’s letter under S. 21, 1776. The vestry at once appoints a committee to prepare Petitions Memorials or other papers to his Majesty and to such other persons as may be thought Proper in order to obtain some Compensation for the losses which this Corporation has sustained by the late Fire.”—Trin. Min. (MS.).

A letter of this date from E. Oswald to Col. John Lumb: stater.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1777: "By intelligence from N. York, we learn that no goods are suffered to be landed—no stores opened in the City—about 2000 Troops at Kingsbridge and F. Independence & but few Hessians in the Town—Part of their fleet has sailed for England, Ireland & for provisions."—From the Lamb Papers at N. Y. H. S.

14: "(Agrees resolves) That the flag of the thirteen United States be thirteen streamers, alternate red and white—that the union be thirteen stars, white in blue field, representing a new constellation."—Jour. Cont. Cong. (Ford ed.), VIII: 464. Regarding the development of the design of the American flag, see Preble, The Flag of the United States (1882); Harrison, The Stars and Stripes and Other Am. Flags (1906); Canby & Balderston, The Evolution of the Am. Flag (1900); The Am. Flag (pub. by the Dept. of Education, State of N. Y., 1910), and authorities there cited. See also N. Y. Jour., Ag 25, 1785. There was delay in the public announcement of the adoption of the flag, and the design was not officially promulgated by congress until Sept. 3, 1777.—The Am. Flag, ep. cit., 20. See also Winsor, VIII: 485.

16: "The British Subalterns in the Army at New York, who have no Fortunes, are obliged to eat the common Soldiers Allowance of Provisions as it is impossible, with their Pay to dine at the Butlers, where fresh Provisions are so dear, that a Man even of small Fortune can hardly afford it."—St. James's Chron., Je 12-14, 1777.

22: Wm. Smith writes: "A Rumor that Genl Washington has sent for Troops to attack the British & that Putman crossed the River at Peak's Kill last Monday with 5000 as one says & 2600 according to the other. It comes up to us by Land & by Water—I suspect Mr. Howe has sent Reinforcements to Jersey which have alarmed the American Army. Perhaps only to draw off part of the Forces at Peak's Kill before the ascent up the River."—Wm. Smith's Diary (MS.), II: 328.

23: The British army evacuates Brunswick, N. J.—Robertson's Jour. (MS.). Between this date and the 50th, Montresor records the movements of the British troops and supplies by ferry and flat-boats from New Jersey to Staten Island.—Montresor's Jour., 425-26. See also Ern. Merc., Xi: 408.

24: "Mr. Coyler told me yesterday, that General Putnam [Putman] on the first news of the Fire at N Y 21 Sep. was heard to exult that the Scheme was effected. And that Mr. Volker's P Doune has said Men had been told and Power given by the Convention to the army to burn that Town."—Wm. Smith's Diary (MS.), II: 335.

25: "New York Company of Volunteers detached from King's Bridge towards White plains—killed 6 of the rebels and brought in Eight Prisoners—Twenty five head of Cattle and Eleven Horses."—Montresor's Jour., 426.

26: "Seventy Prisoners, and three Pieces of Artillery were brought in from Amboy."—Jour. of Hugh Gaine, Ii: 38.

28: Among general orders issued from "Head Quarterers, Camp at Richmond, Staten Island," are several regarding the transportation of troops back to New York, including this: "The want of Tonnage for Horses occasions the necessity of leaving the 17th. Dragons to follow the Army as soon as proper Transports can be procured; they are to encamp by Troops on York Island, extending from Greenwich to Sneden's Island to the dismounted [soldiers] along with them, Encamped in the same manner."—Jour. of Hugh Gaine, Ii: 426.

29: "This evening Returned a party of our Provincial Troops that had been detached from King's Bridge [see Jc 29] and brought in a Captain, one Subaltern, and 23 more Rebels."—Montresor's Jour., 426.

30: A letter from a New Yorker to a correspondent in London contains the following: "Our Affairs in this Country seem now to be just as bad as they can well be. The Rebel Washington plays his Game most admirably. Till lately I never thought that Americans had either Common Sense or common Spirit. I am convinced now they have both, in spite of Parliamentary Assertions. England, I can tell you, was never in so ticklish a Situation."—St. James's Chron., Ag 12-14, 1777.

This date is found on one of Archibald Robertson's drawings (No. 41—see Jl 12, 1776), entitled "View from Staten Island 2d July, 1777."

31: Pastor Shewkirk records in his diary: "Many came to town daily; so that it grows quite full again for the present. The rebels have now the whole Jerseys again except Powel's Hook; and we are just where we were last year, after the being in possession of N. Y. Island. 'Tis very discouraging, may the Lord pity this poor country."—The Campaign of 1776, part 2, 127.

32: Gen. Howe, now in New York, directs, among the general orders of the day, that, "On application at the Donation Store, Wille's Wharf, Albany Pier, each British and Hessian Battalion may receive three pipes of Madeira Wine at £2.8.10 per pipe, which is to be paid for on delivery."—Order-book, in N. Y. H. S. Collections (1883), 406. During the celebration in Philadelphia of the first "Anniversary of the Independence of the United States of America," the "Hessian band of music, taken in Trenton the 26th of December last [p. 29], attended, and heightened the festivity with some fine performances suited to the joyous occasion, while a corps of British deserters taken into the service of the continent by the State of Georgia, being drawn up before the door [of the banquet room], filled up the intervals with fife de jure."—Penn. Gaz., Ji 9, 1777.

33: Kemble records: "Mr. General Vaughan Command at Kings Bridge ... Major General J. to go to Canada. Lieut. Gen. Clinton to Command [as said] upon the Island of New York, and posts depending. [see Ji 16]." "Find from the general tenor of Officers Conversation that they are not well pleased with Affairs, but they often speak without thought. "—Kemble's Jour., 134, 461.

34: "The government authority sent over to New York for the Service of the Navy, whereas last War they received all they wanted while there from Contractors in America."—St. James's Chron., Ji 3-5, 1777.

35: The "Liverpool," conveying six merchantmen, arrives with Sir Henry Clinton (see Ap 19) and his suite on board.—Montresor's Jour., 427.

36: "There is this day a nightly Riding with ye Inhabitants, down to ye Nottawars after their Horses which had been drafted into ye Kings Service, but it seems they meet with but poor Success, for most of them come back with as few Horses as they went."—Fitch's Diary (MS.).

37: A soldier is sentenced by court martial to receive 1,000 lashes for desertion, but, "in consequence of certain want of form in Part of the proceedings," Gen. Howe overrules the punishment and orders the man to his duty.—Order-book, in N. Y. H. S. Collections (1885), 456. Eleven "Sail-victuallers," all armed, arrive from Coric.—Montresor's Jour., 427. See Ji 7.

38: "A Fleet from Cork so long expected, and several Vessels from London came in, but little News by either. . . . The Soldiers busy embarking, but no Knowledge yet where bound."—Jour. of Hugh Gaine, Ii: 39.

39: John Holt, having suspended publication of his Journal in New York City in August, 1776 (q.v.), and removed to Kingston, begins to issue it in that place, without change of volume numbering, with the title of The New-York Journal, and the General Advertiser (No. 1757). "The last Kingston issue was that of Oct. 13, 1777, and 1778, and four days later the town was burned by the British. The paper was then removed to Pougahepsie, where it was revived May 11, 1778" (q.v.).—Brigham, A. A. S. Proc. (1917), 263: Early Newspapers, I: 444.

40: "The Infantry of the Army embarked from Staten Island on board their transports for the Expedition."—Montresor's Jour., 427.

41: The council of safety at Kingston, having examined the poll- lists and ballots (returned by the sheriffs of the respective counties of the several elections held for government and lieutenant-governor of this state, and for senators, announces the number of votes cast for the candidates. They declare that George Clinton has been elected governor and Pierre van Cortlandt, lieutenant-governor, and that certain senators have been elected. A letter is addressed to Clinton requesting him to come to Kingston "with all convenient speed" to take the oath of office.—Jour. Prov. Cong., I: 906.
1777 Light Dragoons, leaving for the defence of Staten Island the 22nd and 2 of Hessians encamped in the rear of the Redoubt, round the watering place and the Provincials on the West side of the Island under the Command of Major-General Skinner.

William Eddis writes from New York: "On entering the Narrows (on board the "Emerald" from Amostaple), my mind was forcibly struck with the splendid appearance of a numerous, and formidable equipment. A grand fleet, attended with innumerable transports, arranged in several divisions, lay at anchor off Staten Island. The island itself was covered with troops ready for embarkation, and every appearance indicated an expedition of the most decisive consequence. . . . [Letter from Amst, 418. For the last entry, see Jl 18].

Montresor accompanies Gen. Clinton to the Narrows and the works on Staten Island. "Signals made from the Eagle for the whole fleet to prepare to sail."—Montresor's Jour., 427.

Clinton goes to Kingsbridge (to occupy the Morris house).—Kemble's Jour., 125. See Jl 18.

Capt. Robertson notes that the British, at New York, "Received Intelligence of G3 Washington having moved from Morris Town towards the N. River—and A Letter from G3 Burgoyne dated 24 July that he had invested Tycoer. The Messenger ed it was taken two days after."—Robertson's Jour. (MS.).

The frigate "Brilliant" arrives from London with 200 artillerymen. The last of the fleet from Cork also arrives—Journ. of Hugh Gaine, 428.

"This Evening Lord Howe went down to the Fleet at Staten Island, in order to proceed on the intended Expedition."—Journ. of Hugh Gaine, II: 40. The objective point was the Chesapeake.—Montresor's Jour., 428. The expedition sailed from the Hook on July 23 (5 p.m.).

To prevent cargoes of vessels, which are daily arriving, "from being clandestinely conveyed to the Rebels," Gen. Howe appoints Andrew Elliot by proclamation "to be Superintendent of all Imports and Exports to and from the Islands of New York, Long Island, and Staten Island (Transport, Victuallers, and Prizes excepted)." He orders that all masters of merchant ships, immediately upon arrival, shall "make Entry of the Vessels, and deliver in proper Manifests of their Cargoes, on Oath, at the Superintendent's Office, and if found false, or manifest fraud, shall be seized and forfeited; nor shall ship masters accept any cargo, break bulk without written permission from the Superintendent or his deputy, and any part of the cargo so landed shall be seized and forfeited, and the master held liable to imprisonment." All "Rum, Spirits, Sugar, Molasses, and Salt, imported, are to be stored at the Expense of the Owners or Importers, in Warehouses by them or his Order to be provided, under the Inspection of the said Superintendent or his Officers, with whom the Keys are to be lodged, who will grant Permissions when the same or any Part thereof is to be sold for the use of the Army, Navy, or Inhabitants, such Permission always specifying the Quantity, and to whom the same is disposed.

Such permission is required before goods are laden on any vessel, excepting those in the king's service; and it is ordered "That no Ship or Vessel (such as are in His Majesty's Service excepted), shall leave this Port, or its Dependencies, until the Master shall deliver in, at the Superintendent's Office, a Manifest, on Oath, specifying the Quantity and Quality of the Goods, and by whom shipped, together with the Permissions granted for the Loading of the Vessels, as above directed." The superintendent is then to attach to a certified copy of the manifest a certificate stating that no fraud has been committed and that the requirements of the proclamation have been complied with, with permission to leave the port. This applies also to vessels in ballast. Forfeiture of vessel and cargo, and imprisonment of the master, are the penalties inflicted for failure to comply with this regulation.

In order to prevent supplies from being conveyed to the "enemy" by way of Long Island and Staten Island, it is ordered "that no Vessel or small Craft whatever shall carry from the Island of New York to Long Island or Staten Island, at one Time, without Permission from the Superintendent's Office, any larger Quantities of Rum, Spirits, Sugar, or Molasses, than one Barrel of each, and of Salt four Bushels, nor of any other kind of Merchandise more than may be judged sufficient for the Use of one Family," under the same liability for forfeiture and imprisonment as specified before. Any person giving "Information to the Superintendent, or his Deputies, of any Goods or Merchandise shipped, or imported, contrary to the Tenor of this Proclamation, so that the Person or Persons offending can be detected, such Informer or Informers shall be entitled to one Moteley of the Value arising from the Sale of the Goods or Merchandise so forfeited."

"The Superintendent, his deputy, and those acting under them, are paid salaries; no Fees are to [be] offered on any account whatever."—N. Y. Merc., Jl 21, 1777. The provisions of this proclamation were continued by later proclamations on Sept. 26, 1778, and Oct. 24, 1780, the latter being issued by Sir Henry Clinton.—Royal Gen., O 28, 1780. The provisions prohibiting the conveyance of salt to Long Island and Staten Island were renewed by orders issued on Aug. 7, Nov. 15 and Nov. 18—N. Y. Merc., Ag 11, N 17 and 24, 1777.

The day's orders, "On Board the Eagle Man of War, off Staten Island," are: "An Ensign in the Mizen Topmast Head of the Adjutant General's Ship, the Roman Emperor, will be the Signal for all Majors of Brigade, Aid-de-Camps, and Adjutants to receive orders on Board of said Ship. Upon the Signal being made for dressing of Provision in order to land, two days' full allowance of Pork, four days' bread, and one day's Rum, is to be prepared to be taken on shore."

"As there is great Reason to hope that the Inhabitants of the Country to be taken possession of [Philadelphia] are Much inclined to join to their allegiance to the Commander in Chief, it is incumbent upon him once more to declare to the Troops, that he is determined upon no account whatsoever to pardon any man found guilty of Plundering, or being absent without leave from his Post. The Provost Martial has received Warrants to execute upon the Spot any Soldier or follower of the Army detected in Depredation of this sort. . . .

"All Officers and Soldiers of the Troops Embarked are to be on board their respective Ships this Evening at Gun firing, after which no person whatever is to go on shore without particular leave of the Commander in Chief."

All signals to be observed either with or without a Gun.—Order-book, in N. Y. H. S. Collections (1883), 472-73.

Further orders are entered on July 22. The fleet sailed from Sandy Hook on July 23 (5 p.m.) for Chesapeake Bay, being at sea until Aug. 23, when orders were re-commenced in Keable's order-book.—Ibid., 474.

Kemble, at the Morris house, records: "The Commander-in-Chief having Embarked the preceding Evening, I came here this day to attend Gen. Sir Henry Clinton, being ordered for that Service Officially. Sir William Howe had upon this Service upwards of 13 thousand Sighting Men."—Kemble's Jour., 125.

Kemble records in his journal: "Went to Kings Bridge, and visited the Posts, No. 4, 7, and 8. Redoubts begun, but not finished."—Kemble's Jour., 125.

The Fleet in Part went out of the Narrows: The Most of the Men of War remain at the Island with Lord Howe.—Journ. of Hugh Gaine, II: 41.

A New Yorker writes: "There are frequent Desertions from
the Continental Troops; about ten Days ago 21 came into Town, July with their Arms and Accoutrements. . . .

23 "Report has doubtless startled us in this Garrison six Months ago; but I desire to be thankful my Stomach gives it the Lie. Our Men are tolerably well clothed, provided with arms, and of pretty good Quality, though dear. We have Plenty of excellent Fish, and Abundance of Vegetables, at a moderate Price."—St. James’s Chron., S 27-30, 1777.

21 "The Men of War went down, with Lord Howe, and remain at the Hook, but cannot get out for want of a Wind."—Jour. of Hig. Gaine, I: 41; Smith, V1: 379. Smith says that Washington moved on the 25th "from my Father’s Farm in Scenemuck Clove [Smith’s Clove in Calendrar Washington’s. Corr. with Cent. Corp., 162-65] to Philadelphia upon advice that Gen’l Howe’s army of 16000 had sailed for that Place."

20 Howe’s army leaves New York by sea.—Robertson’s Jour. (MS.); Kemble’s Jour., 474; Jour. of Hig. Gaine, II: 41; Winton, VI: 72.

19 Smith says that Washington moved on the 25th "from my Father’s Farm in Scenemuck Clove [Smith’s Clove in Calendar Washington’s. Corr. with Cent. Corp., 162-65] to Philadelphia upon advice that Gen’l Howe’s army of 16000 had sailed for that Place."

18 Major-Gen. Valentine Jones, commandant in N. Y. City, issues a proclamation prohibiting small boats passing over to or from the Jersey shore without a pass. Offenders will be imprisoned and the boats confiscated.—N. Y. Merc., II 28, 1777; Man. Com. Cycl. (1845), 635-46.

16 Wm. Smith, writing in his diary at Livingston Manor (see J3 3), says: "Mr. Livingston’s children are literally bare Foot. We have tried a month past to prevent it but no Shoe maker will engage to supply them. Some have no Leather. Others are forced from Home or occupied for themselves or unwilling to work for Paper money—we have for several weeks past bought Provisions with Gold or Silver and without it must have starved. The Country People will not barter even for Tea."—Ifm. Smith MSS., folio 195.

15 The body of Mrs. Franklin, wife of the governor of New Jersey, who died the day before, is buried in the chancel of St. Paul’s Church.—N. Y. Merc., Ag 4, 1777.

10 In a message to the council of safety, meeting at Kingston, Gov. Clinton states that, while he wishes to prorogue the legislature until Aug. 20, this "cannot be done in the accustomed form, for want of a great seal," he therefore asks the council regarding the propriety of postponing the senate and assembly by proclamation, under his own "hand and seal at arms." The council approves of this method, and the proclamation is issued accordingly.—Jour. Prov. Cong., 1: 1027. For other occasions when the governor used his private seal for official business, in the absence of a great seal, see Wilde’s Civic Ancestry of N. Y., 52-53; and for a reproduction of this seal, see ibid., 13, opp. p. 54. Regarding the first great seal of the state, see Mr. 16, 1778.

8 A report is current that "Genl Burgoyne with his Army, are at a place call’d y New City to miles above Albany, but this Rep’s as yet, seems to gain but little Credit."—Hutch’s Diary (MS.). On Aug. 14, he wrote that Burgoyne was said to be at Albany, and to have "lately had an Engagement of consequence, with ye Americans, which proved so successful."—Ifd.

1 A dealer advertises his shop at no. 956 Water St., "opposite the Crane."—N. Y. Merc., Ag 14, 1777.

1 MENTION is made in an advertisement of "his Majesty’s hospital" at Harlem.—N. Y. Merc., Ag 11, 1777.

22 Charles Carroll of Carrollton writes from his Maryland manor to Benj. Franklin in Paris: "We have not yet confederated, but almost every member of Congress is anxious for Confederacy, being sensible that a Confederacy formed on a rational plan will certainly add much weight and consequence to the United States collectively, and give great security to each individually, and a credit also to our paper money; but I despair of such a Confederacy as ought and would take place if little and partial interests could be laid aside."—Rowland, Life and Correspondence of Charles Carroll of Carrollton, I: 209. The Articles of Confederation were adopted on Nov. 15 (q. v.).

1 Capt. Robertson records that he has been "for three Days employed in taking a Sketch of the ground where the Battle of Brandewine was fought."—Robertson’s Jour. (MS.). See S 31.

20 Gen. Lincoln’s official report of the battle of Bennington tells of the capture of about 650 of the enemy with 80 wounded and about two hundred slain. The American losses were between twenty and thirty dead and fifty wounded. He describes the battle.

23 "From the official report to congress, published by order of that body and preserved in Emmet Coll., 855, N. Y. P. L.,"—Wm. Eddis, writing from "York Island," thus describes the city: "... In several streets, trees are regularly planted, which afford a grateful shade during the intense heat of the summer. The buildings are generally of brick and many are erected in a style of elegance. The situation is said to be perfectly healthful, but fresh water is so rare and scarce, that the purchase of this essential article is attended with a considerable expense."

21 "Notwithstanding the war, New York is plentifully supplied from Long Island with provisions of all kinds. It must, however, be confessed, that almost every article bears a exorbitant price, when compared with that of former happy times. Both the north and east rivers abound with a great variety of excellent fish. Lobsters, of a prodigious size, were, till of late, caught in vast numbers; but it is a fact, surprising as it may appear, that, since the late incessant cannonading, they have entirely forsaken the coast, not one having been taken, or seen, since the commencement of hostilities."—Ifd.

20 "Into this place and neighbourhood, logisters were introduced by accident; the province having been formerly supplied with them by the fishermen of New England, who brought them in well-boats, one of which, in passing Hell-Gate, struck against a rock, separated, and the logisters, which escaped into their proper element, multiplied so exceedingly, that in a short time the markets were supplied and reasonably supplied. . . ."

21 "The new church is a noble structure: the college is spacious and convenient: the barracks are well built, and well accommodated. The Dutch churches, with several places of worship for Protestants of different persuasions, reflect great credit on the genius of their architects; and the general stile which predominates in this city, impresses the mind with an idea of neatness and taste."

20 "The numerous fortifications thrown up by the American troops in the vicinity of the capital, appear to be constructed with judgment and attention. Why they were so precipitously abandoned is difficult to ascertain; indeed, the whole island forms a continued chain of batteries and intrenchments, which seemed to indicate the most resolute opposition."

22 "I have, in the course of my excursions, traversed the whole of York Island, and have even attended the relief of the piquet guard without Kingbridge, which is the advanced post of the British army. It is impossible to describe all the interesting and noble objects which, in every direction, strike the curious and inquisitive eye. From the city of New York, to the extent of the island, we beheld a regular continuation of formidable intrenchments. The troops appear animated in the service; and, surely, if their operations are properly conducted, the event cannot but effectually re-establish our ancient happy constitution on a permanent foundation."—Letters from Am. (1791), 423-26.

22 A music school is opened at 43 Maiden Lane.—N. Y. Merc., Aug 18, 1777.

23 Col. Fitzgerald of the continental army, in a letter to Charles Carroll, says: "General Clinton remains on York Island, and from the best accounts we can get has not 3000 effective men with him, most of them Hessians. They are building redoubts and breastworks all along Harlem River, and appear very apprehensive of a visit from us."—Rowland, Life and Correspondence of Charles Carroll of Carrollton, I: 214.

22 "The Rebels Attacked Staten Island, Long Island, and made a 22 Diversion with about 1,000 Men, under the Command of Putnam, in the Kings Bridge Quart. . . ."—Kemble’s Jour., 127. Kemble records full particulars.—Ifd., 127-30.

21 Dr. Elias Cornelius, an American surgeon captured the day before by the British at East Chester, describes in his journal his march in captivity to the "Provost Jail" in New York. He says, in part: "As we came into the town, the Hessians, Negroes, and children insulted, stoned and abused us in every way they could think of. At that time two of the men had become so fatigued that we were obliged to carry them. In this way we were led through half the streets, as a show. At last we were brought before Gen Jones who ordered us to the Sugar House which formerly went by the name of Livingston’s Sugar House which was the Prison the private
KIP'S BAY, SHOWING THE BRITISH TROOPS CROSSING THE RIVER ON SEPT. 15, 1776; DRAWN BY ARCHIBALD ROBERTSON ON AUG. 17, 1778,
PROBABLY FROM A SKETCH MADE ON THE EARLIER DATE. SEE PP. 994, 1011 ET SEQ., 1073.
Soldiers were kept in [see L. M. R. K., III: 661; and 1749]. Here one Walley a Serjeant of the 20th Regt. of Irish troops in the British Service, had charge of the prisoners. This man was the most barbarous cruel man that ever I saw drave us into the Sugar house yard like so many hogs, from there he ordered us into the Sugar House which was the dirtiest and most disagreeable place that I ever saw and the water to the pump was not better than that in the Dock. The top of the House was open to the weather, so that when it raised the water ran along and through every floor and on that account it was impossible for us to keep dry." Continuing, he describes some of the cruel treatment he received from Sergeant Walley.

The next day he was taken to the "Provost Guard," where he was "taken down to a Dungeon." He describes the cruel neglect in this place also, where he was kept until Sept. 20 (q.v.).—*Jour. of Dr. Elias Cornelius (1903).* 5-7.

According to an advertisement, the "Main Guard" is located in Broad St.—*N. T. Merc.* Aug. 25, 1777.

There is a report that Gen. Howe has taken possession of Baltimore.—*Fitch's Diary (MS).*

Col. Roger Morris, owner of the Morris house (the well-known "James Munson" of to-day), which he built in 1765 (q.v., Je 15), returns to New York from England, whither he fled on May 4, 1775 (q.v.). A place is found for him in the military government of the city.—Shelton, *The James Munson*, 20, 21.

Sept. 1777

Fitch writes a little after 7 this morning, I observ'd very high firing from small Arms, much in ye Direction of Hells Gate from this place; I know nothing of ye occasion of this fire, but conclude it is most likely ye consequence of Fighting: this firing observ'd by some to continue most of ye forrenoon."—*Fitch's Diary (MS).*

"We this day learns Col: Allen Capt: Bissell are both in ye new City Hall, under ye care of ye Provost & Col Allen hath sent word to his friends ye Capt he is excited to ye 3rd Heaven, by which we understand he is Assign'd ye 3rd Loft in ye famous Building."—*Fitch's Diary (MS).*

"A Letter from New York informs us, that Governor Tryon has for some Time past held a private Correspondence with two Officers of Washington's Army, by which Means he was generally enabled to give Sir William Howe an early Account of the Motions of the Rebels."—St. James's Chron., 4-6, 1777.

It is resolved by the council of safety, "That His Excellency the Governor, and Chancellor of this State, be requested to devise and order to be made, a great seal for this State, and that in the mean time the seal of the Governor be the great seal of this State."—*Jour. Prov. Cong., I.* 1059. See further, Mr 16, 1778.

"We this day hear a Report (various ways) of an Important Action between ye two Northern Armies, which is said to have terminated greatly to ye advantage of ye Royalists."—*Fitch's Diary (MS).*

Notice is given by the barrack-master general, Geo. Clerk, whose office is in John St., to "such inhabitants of this town as are in possession of houses, the property of people in rebellion (or supposed to be so), to provide themselves with others before the first of November next." This is to supply the troops with quarters.—*N. T. Merc.*, S 15, 1777; *Mass. Com. Coun.* (1861), 647.

The battle of Brandywine occurs. Kemble records by regiments, etc. the number of British killed, wounded, and missing, showing a total of 583, including Hessians.—*Kemble's Jour.,* 156-57. See Aug 15.

"At New York, Aug 17th, 63d Detached Corps and Prince Charles's Regiment Embarked and crossed the North River to Fort Lee. The 26th. 27th. and 71st. with a Squadron of Light Dragoons, Marched to New York; supposed to go over to Paulus Hook. He describes the action in New Jersey."—*Kemble's Jour.,* 132-33.

"We this day hear a Report of several large divisions of ye King's Army landing again in ye Jerseys; & various Acts are given of their successes, and the water to the pumps was not better than that in the Dock."—*Fitch's Diary (MS).*

"It is this day 12 months since ye Americans Evacuated N. York."—*Fitch's Diary (MS).*

"The remainder of the Cork Fleet, abt. twelve in number, came up To-day under Convoy of the British King."—*Jour. of Hugh Gaine, II.* 47.

"Maj.-Gen. Valentine Jones issues a proclamation stating that he is informed "that many persons take upon themselves to beat and abuse the people employed in the ferry boats between this city and Brooklyn, under pretence of delays committed by them, with the said boats." He forbids such conduct in the future, and orders that complaints of delays, etc. be made to him.—*N. T. Merc.*, S 22, 1777.

There is wanted for the hospital "a quantity of old sheets,," for which "good allowance" will be given.—*King's medicine house*, on the Old slip wharf.—*N. T. Merc.*, S 15, 1777.

Congress adjourns from Philadelphia to Lancaster, Pa., on 18 account of the approach of the British.—*Jour. of Cong., II.* 270. See S 30.

Dr. Elias Cornelius, continuing his narrative of his imprisonment in the provost jail (see Ag 23), states in his journal that, on this day, "Seargent Keith (the Provost Martial) came to the dungeon and took Capt. Chatham, and Travis, and myself, and led us to the upper part of the prison, where I found my friends that were also prisoners, Vis, Ethan Allen, Major Williams, Paine & Wells and others. Allen was made prisoner near Montreal, in the beginning of the war. He was put on board a man of war, and kept chained flat on his back in the hole six months. He also told me he had twice been carried on shore in England to be hung, but was reprieved. He was likewise taken on shore in Ireland and at Halifax for the same purpose. After this he was brought to New York, where for a short time he had his parole, it was taken from him, and he put in the provost jail, as there was no antipathy against him. I left him in this goal on Jan 7, 1778. See S 1777. S 1 was in this goal, when we were not allowed to speak to any friend, not even out of the window, I have frequently seen women beaten with canes and ramsheads who have come to the Prison windows to speak to their Husbands, Sons or Brothers; and officers taken and put in the dungeon just for asking for cold water. Our provision was the same as in the dungeon with the exception of dried Peas, we however had no fire to cook them. . . ." He describes the manner of receiving the news of Burgoyne's surrender to Gates (see O 16), and the joy it caused in the prison.—*Jour. of Dr. Elias Cornelius (1903).* 8-9. See also O 12, 1777; Ja 9, 1778.

The anniversary of the king's coronation is celebrated at 22 twelve o'clock the guns on Fort George were fired; at one o'clock the Colours of the Men of War and Vessels in the Harbour were displayed," and the guns of the fort fired 2 feu de joie. An "elegant Dinner was prepared at Loosely and Elm's Tavern, where a Number of Gentlemen dined . . . and a Number of loyal Toasts were given. . . ." In the evening, "the Illuminations, consisting of upwards of 100 Spermaceti Candles, with the Statue of his Majesty on Horseback, crowned with Laurels, standing on a Pedestal, and Several other Figures, much surpassed any Thing of the Kind before exhibited."—*N. T. Merc.*, S 29, 1777. Cf. 22, 1780.

A published notice states that apprentices are wanted for "a ship of force." Applications are to be made to "Messrs Collins, at their store Kings Arms, upper Dock Street."—*N. T. Merc.*, S 24, 1777.

A fleet arrives from England with about 3,000 soldiers and the following passengers: Maj.-Gen. Robertson, Maj.-Gen. Wilson, Maj.-Gen. Patterson, the Marquis of Lindsay, Lord Cathcart, Comt Gabroutile, Capt. Williamson of the Royal Artillery, James Rivington (see My 10 and N 23, 1775), etc. The fleet brings "167,000 l. Sterling in solid Coin." On this day also, the slop "Dispatch" from "Chesapeake" comes into the harbour with dispatches from Gen. Howe.

In the evening, the "House of Loosely and Elm's, Kings Head Tavern, was elegantly illuminated, to testify the Joy the true Sons of Freedom had on the Arrival of Mr. Rivington from England [see Ja 16, 1776]. This Gentleman, with unparalleled Fortitude, having nobly disdain'd to Usurp to the World any injured Pieces, which might be productive of introducing Anarchy, instead of Constitutional Authority, into this once happy Country, felt, in the severest Degree, the Rage of popular Delusion.—Liberty he always firmly adher'd to, Licentiousness from his soul he ever detested.—A Person in Honour to free Press, extemporary pronounced this:

"Rivington is arrive'd—let every Man . . . This injur'd Person's Worth confess; . . . His loyal Heart abhor the Rebell's Plan, . . . And boldly dare't them with their Press." In the evening, after the arrival of the fleet, a Duck, with Swords,
Fort Clinton and its Dependencies, were taken by Storm by his Oct. Majesty's Troops under the Command of Lieutenant-General Sir Henry Clinton. "—From broadside sold Mr 25, 1898, by Stan. V. Henkels, Phila. (facsimile printed in supp. to Cat. No. 889). The garrison of the fort were brought as prisoners to New York in the 11th Oct, 1777.

The council of safety appoints a committee of five to "cause all the public records which were transported to this place [Kingston] from the city of New York, . . . to be put into proper packages or chests, and conveyed to Rochester," and orders that Samuel Bayard remain with them "till the further order of this Council, or future Legislature of this State." —Jour. Prov. Cong., I. 1066. According to a resolution of the provincial convention on April 28, the public records and treasury of the state, at Esopus Landing, were to be guarded by 200 men, to be raised for the purpose.—Ibid., 904. See Ja 3, 1783.

This date is found on one of Archibald Robertson's drawings (No. 40—see JI 12, 1776), entitled "View of Morristown, Haerlem, Montresor's & Buchanans's Islands, with Part of the sound, taken from our lines near McGowan's house—10 Oct 1777."

The American soldiers, with their commander, Col. William Livingston, who were captured by the British forces at the fall of Fort Montgomery (see O 8), arrive in New York, having been brought down the Hudson River by ship. Maj. Abraham Leggett, who was in the company, kept a journal of his experiences while a prisoner. He recorded that the privates were sent to the Sugar House and the officers to the main guard house in the old city hall at the head of Broad Street. He further says: "all this Time we had nothing to eat, but that night Col'l Wil'm Livingston sent a note to Mr Simons who Kept a Public House at the Corner of Nassau St. By that means we was supply'd for that time."—Narrative of Maj. Abraham Leggett, ed. by Charles I. Bushnell (N. Y., 1865), 17-20.

The American prisoners of war, who arrived in New York on Oct. 11, are removed from the sugar-house prison and sent to the new jail of the provost guard. See also Ag 23 and S 20. As they are marched through the streets they are hooted at as vile rebels by many of the people. Maj. Abraham Leggett writes in his journal: "When we got to Gard House we was Divid—12 of us was shut in the north corner room on the first floor and 13 was Put up on the second floor East Corner Room—after we was Shut in the Keeper Came Io and Search'd and Took Everything we had about us not leaving a pen knife and on Wednesday They threw in through the Hole in the Door Some raw salt Beef and a little Damaged sea bread—as soon as the bread fell on the floor it Took legs and Ran in all directions.—They were Very Filthy—more like Hog sty than anything else."—Narrative of Maj. Abraham Leggett, ed. by Charles I. Bushnell (N. Y., 1865), 20-21.

The quarterly meeting of the Marine Society is held at the "House of the Widow Doran."—N. Y. Merc., Oct 6, 1777. This tavern stood at what was then No. 49 Wall St.—See 3, 1780. Mrs. Doran was the widow of Thomas Doran, who conducted a tavern on Brownjohn's wharf.—See Ja 15, 1770.

Kingston, Ulster Co., is burned by the British.—Rivington's N. Y. Gaz., N 11; N. Y. Merc., N 3, 1777; regarding the date, cf. N. Y. Packet, O 23, 1777.

Gen. Burgoyne, defeated by Gen. Gates, signs "Articles of Convention" at Saratoga. The original document is with the Gates Papers, in the N. Y. Lib. This, in the Gaine's time, is called upon it thus: "This Day has been entirely engrossed by the Publication of Mr. Rivington's Paper, which came out about 12 o'clock, and Surprised almost every Body. The Fleet sailed up the N. R. To Day."—Jour. of Hugh Gaine, II: 50.

Col. James De Lancey with 60 of his Westchester Light Horse, went from Kings-Bridge to the White Plains, where they took from the Rebels 44 barrels of flour and two Ox teams, near 100 head of black cattle, and 500 fat sheep and hogs."—N. Y. Merc., O 11, 1777. According to an advertisement, "the King's Stables" adjoin the store of Price and Salmon, No. 20 Queen St., above the Fly Market.—N. Y. Merc., O 6, 1777. According to broadside, printed by Rivington, announces that "Early this Morning Lieutenant Colonel Innes, Inspector General of Provincial Forces, arrived from Fort Montgomery with the agreeable News, that, on the Evening of the 6th Instant, that Fort, with
CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

1777 Oct. 17. Placed in a loaf and Baked and was Sent Colonel William Livingston, who was The 3rd week since he was there in Congress; but the whole Prison Resounded with three Cheers—\(\text{the Keeper was alarmed with such an uproar as he called it—Hasten to the second door to know what was the uproar—then He was Inform'd—} \) he dide it and said it was—\(\text{a Rebel lie—after this was fully known we was offer'd our Parols.}\) —Narrative of Abraham Leggett, ed. by Charles J. Bushnell (N. Y., 1863), 21-22.

18. With the issue of this date (No. 119), Rivington changes the title of his newspaper (see O 4) to Rivington’s New York Loyal Gazette.—Early Newspapers, II: 428. See, further, D. 13.

"Kemble complains that "younger Majors" are "every day made Lieutenant Colonels," while he still remains a deputy-adjutant-general.—Kemble’s Jour., 140. See, however, My 21, 1778.

"In a letter from the Gen. Horatio Gates to the Gen. Braddock, his command is resigned to the British Army. From the little attention my Lord, given to my recommendations since the commencement of my command, I am led to hope that I may be relieved from this very painful service, wherein I have not the good fortune to enjoy the necessary confidence and support of my superiors, but which I conclude will be extended to Sir Henry Clinton, my presumptive successor, or to such other servant as the King may be pleased to appoint. By the return therefore of the packet I humbly request I may receive his Majesty’s permission to resign the command." He repeated his request in a letter of Nov. 30.—Parl. Reg. (1779), XI: 417-38, 443. For Gen’rman’s answer, see 84, 1778.

A meeting of the "Old Loyal Church and King Club" is announced for this date, to be held at "Brock’s Tavern, opposite to the late Peninsula Meeting-House."—Rivington’s N. Y. Loyal Gaz., O 18, 1777. This was Brock’s Tavern on Wall St.—See My 29, 1778.

Frederick the Great, in a letter to the Margrave of Brandenburg-Bayreuth, refuses to allow the latter’s German mercenaries to cross his dominions on their way to embark for America.—Kapp, Der Soldatenhandel deutscher Fürsten nach Amerika (Berlin, 1874), 259.

"The Afternoon there was a great firing of Cannon at N. York, on acct of its Majestys Ascension &c.—Diary of John Fitch (M.S.)."—Kemble’s Jour., 140.

Kemble is informed that Gen. Vaughan has "been as far as Livingston Manor," and "burnt Livingston’s House and some others."—Kemble’s Jour., 140.

Gen. Vaughan, with the troops under his command, returns from Livingston Manor. Kemble notes confirmation of the accounts of Burgoyne’s being “Prisoner with his Army,” and some of the particulars. He adds: “After the Reinforcement is gone to Sir William Howe we shall have 6,000 Men to Defend this place (Kings Bridge) and its dependencies, exclusive of the Troops expected from Rhode Island,—one thousand.”—Kemble’s Jour., 141. By this time, the troops, [Gen. Vaughan] that went up the North River returned this evening having been as high as Esopus.—Jour. of Hugh Gaine, II: 53.

"No Barracks thought of, or anything else, for the defence of Kings Bridge, Redoubts, &c.; the Season advances fast."—Kemble’s Jour., 142.

It appears by an advertisement of “Lost Horses,” signed by the “Assist. Commissary of Horse, to the Royal Artillery,” that the artillery stables were near St. Paul’s Church.—N. Y. Merc., O 27, 1777.

The markets are “extreme bad.”—Jour. of Hugh Gaine, II: 53.

"Thoughts of demolishing the Redoubts at Kings-Bridge, and confining our defences to the Bridge, and making a Strong Redoubt upon Laurel Hill, near Kyphausen Fort."—Kemble’s Jour., 142.

This morning 17 sail came into Cork, 3 from England, some from the West-Indies, and the Nautilus, with her Tender and two Prizes.—Jour. of Hugh Gaine, II: 54.

British forces are now drawn together at Philadelphia, where Washington designs to destroy them. To keep as large a body of British as possible at New York, he directs Gen. Dickinson to make a feint in that direction by having boats collected, troops assembled, etc.—Writings of Geo. Washington (Ford ed.), VI: 127.

Wm. Smith writes from Livingston Manor to the council of safety asking permission to go to New York City to look after some personal affairs and “to contribute towards abating the ceremony of the present war, and exciting to overtures of peace.” His request was refused.—Jour. Provin. Cong., I: 109.

Kemble records in his journal: “Left Morris’s House and came to Town; Sir Henry Clinton takes up his quarters in King’s House. . . .”—Kemble’s Jour., 141. See Ji 18. For Morris house, and hands of Virginia, see L. M. R. K. III, 91, 1777.

A British officer on board the fleet off New York writes to a correspondent in London: “Our Spirits, which were much elevated by the Success of General Howe in Pennsylvania, and the Detachments up the North River, are now depressed with the News of the devoted Burgoyne and his brave Handful of Men, being lost to their Country in this Quarter. The Provincials are grown so sanguine that this Business has been exaggerated amply; they are said to have about 12,000 Men encamped and quartered in the Villages, within a few Miles of King’s Bridge, where General Clinton commands with about 8000, no Way apprehensive of their Superiority.”—St. James’s Chron., D 30, 1777—Ja 1, 1778.

Kemble records: “Our Troops for the defence of this Quarter, Kings Bridge, McGowans’s pass, New York, Paulus Hook, Long and Staten Islands, consist of 6,200 Rank and File, 720 upon Staten Island, 180 Paulus Hook, 350 Long Island; New York, McGowan’s, and Kings Bridge, 4,970, exclusive of Artillery and a Detachment of Light Horse.”—Kemble’s Jour., 143.

"No less than 8000 Men have been raised in New-York and its Dependencies for Governing the South since the Troops are in possession of that City."—St. James’s Chron., N 8-11, 1777.

A New Yorker writes to a friend in Liverpool: “Washington is collecting a large Force to drive General Howe out of Philadelphia; and Putnam to attack this City; it is said he has assured the People of Success in three or four Weeks. The only practicable Way of getting Possession of this City is, they must first destroy the Forts of Kings Bridge, which is now put in proper Repair, and the Fort on Long and Staten Islands. The Militia in this City is emboldened, wherein twenty Volunteer Companies are already forming. News is just come in Town of Putnam decamping on a sudden from before King’s Bridge, owing, it is said, to an Order he received from Washington to give him all the Assistance in his Power.”—St. James’s Chron., J 1-3, 1778.

Washington writes to Sir Wm. Howe regarding an exchange of prisoners, saying, in part: “You call upon me to redress the grievances of several of your officers and men, who, you are pleased to say, ‘you are well informed are most injuriously and unjustifiably loaded with iron.’ If there is a single instance of a prisoner of war being in iron, I am ignorant of it; nor can I find on the most minute inquiry, that there is the least foundation for the charges. . . .”

"Now we are upon the subject of grievances, I am constrained to observe, that I have a variety of accounts, not only from prisoners who have made their escape, but from persons who have left Philadelphia, that our private soldiers in your hands are treated in a manner shocking to humanity, and that many of them must have perished through hunger, had it not been for the charitable contributions of the inhabitants. . . . I would propose, that I may be allowed to send a suitable person into the city under the usual restrictions, to examine into the truth of them.

I must also remonstrate against the cruel treatment and confinement of our officers. . . . I appeal to you to redress these several wrongs; and you will remember, whatever hardships the prisoners with us may be subjected to will be chargeable to you. At the same time it is but justice to observe, that many of the cruelties exercised towards prisoners are said to proceed from the inhumanity of Mr. Cunningham, provost-martial, without your knowledge or approbation. . . .”—Writings of Geo. Washington (Ford ed.), VI: 193. For fuller references to Cunningham’s atrocities, see O 28, 1776.

This Morning 17 sail came into Cork from Cork, 3 from England, some from the West-Indies, and the Nautilus, with her Tender and two Prizes.—Jour. of Hugh Gaine, II: 54.

British forces are now drawn together at Philadelphia, where Washington designs to destroy them. To keep as large a body of British as possible at New York, he directs Gen. Dickinson to make a feint in that direction by having boats collected, troops assembled, etc.—Writings of Geo. Washington (Ford ed.), VI: 127.

Wm. Smith writes from Livingston Manor to the council of
dency will lose Ground this Winter in the Northern Colonies."—Wm. Smith MSS., folio 195.

Fitch writes: "Inform'd y^ Genl Washington is kill'd & buried at Morris Town in N. Jersey, but yet I hope to hear of his having or being made y^ Subject of a speedy, a powerful & a happy Resurrection."—Fitch's Diary (M.S.).

The continental congress adopts the "Articles of Confederation and Perpetual Union." These provide for the sovereignty and independence of each state, the number and election of delegates to congress, restraints upon the separate states, the manner of defraying public expenses, the powers of congress, and the method of voting. "Four. Gent. Cong. (Ford ed.), IX. 907-98. The "Articles" were not ratified by all 13 states until Mar. 1, 1781 (p. v.). For a list of works in which these articles are published, as well as the debates and later views regarding them, see Wistar, V.; 274.

"It is this day twelve months since ye memorable Surrender of Fort Washington, when ye number of Prisoners were so greatly augmented."—Fitch's Diary (M.S.).

Maj.-Gen. Jones issues a proclamation stating that it has been represented to him "that the boatmen and others who bring firewood to this city exact the most exorbitant prices for the same, and that unless some regulation be made, there will be no bounds to their extortion." To remedy this, he orders that "no more than Five Pounds currency shall be demanded for a cord of wall wood," and "not more than Four Pounds a cord for any other wood." In case any of these wood carriers, "to distress the inhabitants," cease bringing wood at these prices, "their boats will be seized and given to proper persons to be employed in bringing wood to this City." To prevent "impositions on the part of the proprietors of wood, and their obtaining the same from the boatmen," he orders that they shall sell "at a reasonable price." If they refuse, "their wood will be seized and confiscated," and they will be punished.—N. Y. Merc., N 24, 1777.

Maj.-Gen. Jones publishes this notice: "The price of Fine Flour is regulated at Forty-five Shillings, New York Currency, per Hundred Weight. The Assised Bread will be regulated by the Mayor, agreeable to the above Price."—N. Y. Merc., N 24, 1777.

A New Yorker writes: "General Putnam, in the 73rd Year of his Age, is encamped within twelve Miles of this City with 10,000 Men. We are all Hurry and Confusion, and hardly know what to do. We have 17,000 Military and Inhabitants in the City, but a great Number of them are not to be depended upon. The Ships are stationed to cover as much of the City as they can, but when the boatmen go out they will be of little Service as they will be easily burnt by the Provincials."—St. James's Chron., J 8-10, 1778.

"The Sheds in the Redkights at Kings Bridge nearly finished for the Guards—much wanted for the Comfort of the Soldiers."—Kemble's Jour., 144.

The commander-in-chief having "prompted the principal gentlemen, inhabitants of this city and refugees from other provinces to form themselves into independent companies, twenty of which are nearly completed," several of them parade "on the fields at the upper end of Broadway, headed by the Worshipful David Mathews, Esq." These companies "will greatly add to the strength of the city and relieve the King's troops, who may be employed elsewhere."—Rivington's N. Y. Loyal Gazette, N 22, 1777.

\[\text{"This Night, between the hours of 12 and 3, a party of Rebels landed from Jersey at Bloomingdale, ransacked and burnt Brig. Gen. Delaney's House, using his Wife and Daughter extremely ill. The cause of this to be Ascribed to General Tryon, who had given Capt. Emmerick Instructions, on a late Excursion, to burn some Houses at Tarrytown. General (Rebel) Parsons expostulated in a Letter to Mr. Tryon on the subject, and wished him to deny his knowledge of what was done by Emmerick, but he would not do it."—Kemble's Jour., 144-45.}\]

The newspaper reports of this occurrence are as follows: "On Wednesday Morning, the 26th. of November, a Party of Rebel Troops landed at Bloomingdale, about Six Miles from this City, near Brigadier General De Laney's, robbed and plundered his House, & took all valuable Furniture and Money, set the House on Fire & burnt Mrs. De Laney's, her two Daughters, and two other young Ladies could remove out of it, which was efectted through the Flames, in only their Bed Dresses, when they were most cruelly insulted, beat, and abused, and what Money they had, taken from them; an Infant Grandchild in a most barbarous Manner thrown Nov. 26, on the Ground; at last, in their Fright and Distress, they ran different Ways in the Woods, where they remained till Day-Light, exposed to every Inclencency. Five White Men were made Prisoners, and two Infant Children consumed in the Flames. The Whole exhibited such a Scene of Magnus Barbarity as is scarcely to be met with in History or Romance."

The Rebels who committed the above Outrage, we hear, were a Party of about twenty Continental Troops, sent from Connecticut for no other Purpose than to destroy General De Laney's House, with Promise of Great Rewards should they compleat the Work. These merciless, blood-stained, called at a poor Man's House there, and robbed him of all the Family clothing, Blankets, etc., etc."—N. Y. Merc., D 1, 1777.

Another account, published at Fishkill, states: "Last week a small party of men made an excursion to Greenwich, about three miles from New York; they arrived there in the evening; advanced to Oliver DeLancy's; a centry was at the door, whom they secured; found a few ladies and gentlemen in the house; the ladies were suffered to depart in peace, though in some haste; we hear five men were made prisoners; they set the house on fire, and, hearing the alarm guns in New York, thought it was time to decamp, crossed the river, and burnt their barge, and got safe off. You who are fond of burning works, how do you like it when it comes so near home?"—N. Y. Packet, D 4, 1777.

O'Donnel notes: "The Rebel's encampments were at the bank of the North River, between 12th and 13th Sts., at Greenwich, belonged to Sir Peter Warren, but was occupied by Oliver DeLancy in Revolucional times. It was to the north of the Mandeville homestead (shown on the Montresor Map, Pl. 40, Vol. I), and separated from it by the old road which then led back from the river. Katterer's map (Pl. 44, Vol. I) shows it as "Oliver De Lancy Esq." A deed dated May 19, 1799, speaks of "the Road leading along the River to the house of the said Sir Peter Warren, formerly occupied by Oliver De Lancy," as if the house were still standing (Liber Deeds, XLVI: 149); but this may have been repeating an earlier description. Oliver De Lancy owned land at Bloomingdale in 1732 (q.t., My 8), and in 1748-1757, but no house is mentioned.—M. C. G., V: 250 (p. 337).

At about the same time, James de Laney, until recently the Sheriff of West Chester and now colonel of loyalist militia, was captured by one of the American scouts. The report states that "the Colonel was found under a bed, and for a better defence, had himself surrounded with a bulwark of baskets. He was dragged from his humble redoubt, put under guard, and sent to a place better secured (Schenectady) where they may be of more service."—M. C. G., V: 250 (p. 337).

The American officers billeted at New Lots learn that "a British Serg is came from N. Y. with orders for us to Repare there to morrow morning with our Baggage."—Diary of Jbes Fitch (M.S.). On Nov. 28, Fitch wrote that they arrived at St. George's ferry about 1 o'clock, & 'soon Embark'd in several Flatbottoms Boats prepared for y^p purpose, being guarded by a strong party of Britains & Hessians, whom it seems took charge of us when we entered into Brooklyn. The Boates carried us round y^ City & up N. River as high as opposite y^o old English Church, where they put us on board y^ Judical, a large Transport Ship prepared for y^p place of our confinement; we soon found our accomodations to be very Similar to those on board y^ Mentor y^ last year [see S 5, 1776]: there is now near 140 prisoners on board this Ship, & 'altho' our Births for Lodging are more tolerable than those in y^p Mentor, yet we are in a very darkrty & uncomfortable Situation, most of us destitute of Beds, & many have neither Blanket or watch coat, nor any other Lodging than ye Soft Side of a board."—Ibid.

"The People of the Country hear a report that Putnam has had a Battle near Kings Bridge, and was repulsed with the Loss of all his Cannon, part of which were gained from Burgoyne."—Wm. Smith's Diary (M.S.), V.

Gen. Howe writes from Philadelphia to Germain: "I candidly declare my opinion, that in the apparent temper of the Americans a considerable addition to the present force will be requisite for effecting any essential change in their disposition, and the re-establishment of the King's authority, and that this army acting on the defensive will fully enable us to maintain its present possessions."—Parl. Reg. (1779), XI: 442-43.

"This Night the Head was broke off Mr. Pitt's Statue that stands in Wall Street."—Jour. of Hugh Gaine, II: 58. Stevens in
1777

his Progress of N. Y. in a Century, 14-15, is therefore in error when he ascribes the date of this mutilation to 1776.

Fitch writes: "I took a view of ye Shipping around us; among which is ye Yellum Laying near us, on board of which is our Bro' Prisoners . . . ; a little further distant lays ye Senitarian 64 in which it is said Gen'l Lee is confined; & on ye other side is another large Ship in which we inform'd our privacies are confined; there is also a wonderfull number of other Ships near us, of different sizes &c."

—Fitch's Diary (MS.).

Dec.

Mrs. Treville, who "formerly kept the assembly at Newport, in Rhode-Island, to the general satisfaction of the polite and gay, who resorted to that place," has now "fitted up (as elegantly as the times will permit) a large commodious room for the same purpose, at the London Coffee House, near the Brick Market. Beginning Wednesday, Dec. 3, she will sell tickets at one dollar each, entitling each gentleman to bring his partner, and in return she will supply music, fire and candles till 9 o'clock, after which, if any are inclined to continue longer, the charge must be borne by them.—N. T. Merc., D 1, 1777. Mrs. Treville had opened the London Coffee House on Oct. 25, 1777. The house was on Broad st. near Pearl.—Ibid., O 20, 1777.

Fitch writes: "At 8 in evening ye Sargt of ye Guard came down & see all our Lights out as Usual. This seems a revival of ye ancient custom in Britain, in ye Reign of William ye conqueror, when ye Inhabitants were depriv'd ye use of lights in their Houses after Riding ye Curfew Bell. This usage seems very disagreeable to ye women where near 150 of us are oblig'd to pass ye tedious night in ye dark, let what will happen, But yet as it is supported by ye precedent of an ancient custom in Britain, complaining will avail but little, & we therefore submit."—Fitch's Diary (MS.).

Wm. Smith writes on Dec. 22 that "When Mrs Banyar left NY. 3d Dec they were sitting up the North Dutch Church for Barracks expecting more Troops Daily."—Wm. Smith's Diary (MS.), V.

"William Rowand, Portrait-Painter, (Late from Glasgow) Proposes at his lodgings, No. 29 Wall-Street, to begin painting in miniature, the weather not permitting painting in large, longer, and, to teach gentlemen and ladies the art of drawing . . ."—Rivin'gton's Loyal Gaz., D 6, 1777; Duidap, Hist. of the Arts of Design (Goodspeed ed., 1918), III: 351.

"So soon after we turn'd out, ye Seamen got ye Ship [the "Judith"] under way, and Remov'd round into East River, where she came at, opposite ye Fly Market."—Fitch's Diary (MS.).

The Independent Company commanded by Mayor David Mathews has its "Alarm Post;" here it is summoned to meet on Dec. 10.—N. T. Merc., D 8, 1777.

"Fitch and two other prisoners receive orders to go on shore in order return ye New England." They land "near ye Fly Market" and go to the commissary's office for directions.—Fitch's Diary (MS.).

Fitch writes that, after he and his companions had settled their affairs with the British officers, "We then went down to ye Water near Whitehall, where we put our baggage on board ye Schoop Charming Polly . . .; This Vessell is appointed a Flag of truce to pass to N. Heaven for ye purpose of conveying supplies for ye British prisoners in Connecticut . . . after providing a small matter of stores &e., at about 2 o clock we left N. York having ye Tide in our favour, & also a confortable breeze of wind, altho' we were Oblig'd to keep up to Hellgate, where thro' ye deficiency of our Pilot, we pass'd through ye most Rapped part of ye Pot with very little off ye Streets, & the Tide, were ye Sunset, & were soon after Hall'd by a Man of war, but not long detaine'd; We ther proceeded as far as ye New City Island where we were bro't off by ye Scorpion, a british Ship of War, & detain'd ye Remainder of ye Night."—Fitch's Diary (MS.). Fitch reached New Haven on the 12th; he arrived home on Dec. 15.—Ibid.

With the issue of this date, No. 147, Rivin'gton changes the title of his newspaper (as O 18) to The Royal Gazette.—Early Newspapers, II: 428. See, further, N 22, 1778.

"This is a Day appointed by the Congress for a general Thanksgiving which many will perhaps think ought to have been appointed for a Fast to deplore the Increase of the public Miseries."

CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

1778

"We do not so much as think of shipping any thing to any body till we see affairs wear a very different aspect... Twelve Guineas per cent, premium is now giving here to insure goods at New York from fire and the enemy; till 1st of April next, and Twenty Guineas per cent, have been given to pay the loss if our troops are not in possession of New-York the first of this month, and we have every appearance of a French and Spanish war."—

N. T. Jour. (Poughkeepsie), Je 8, 1778.

1779

"The Whigs rail at Geo.1 Putnam without the least Restraint... They charge the Loss of Fort Montgomery to him... and now they allege that it is his Fault that NY is in Peace and not taken this Winter."—Wm. Smith's Diary (MS.), V.

Dr. Cornelius (see Ag 23, S 20, 1777) refers in his journal, to his return to the Livingston sugar-house, of which he says, in part: "This prison was much worse than when I left it before, from the fact that there were nearly thirty soldiers, who went to the other prisoners and stole from them the few comforts they had, and take the sick from their beds and take their bed clothing, and beat and kick them almost to death. The articles which they took from us they would carry to Mr. Walley [who had charge of the prisoners] and sell them for rum." On Jan. 13, being ill, he went to "the hospital, which was the brick Meeting House." He remained there until Jan. 16, when he made his escape. This he dedicated to the memory of Dr. Edward B. of Dr. Edward B. Smith's (MS.)—N. Y. Merc., Ja 12, 1778. He was taken, soon after, by Ephraim Smith (ibid, Ag 19, 1778), and in turn by Mrs. Sarah Shaw, "late in partnership with Mr. Smith."—Royal Gaz., D 23, 1778.

Mrs. Shaw turned over the tavern to Charles Roubelaet the following spring (ibid, My 22, 1779); but while a year Ephraim Smith had returned—See Je 5, 1780. The rapid success of taverns, where the lowering was never one, and when the tavern was advertised to let on Jan. 31, 1781, it was distinctly specified that "No tavern-keeper need apply."—Ibid, Ja 31, 1781.

It had become an auction-house by Nov. 17, 1781.—Ibid, N 17, 1781.

Geo. Forbes, commonly called "Black George," offers "at the White Hall" fried and pickled oysters for exportation to the West Indies. He also "keeps good entertainment for Gentlemen" at his house at Whitehall.—N. Y. Merc., Ja 12, 1778.

Forbes may have acquired the house with the "Sign of the fry'd Oysters" which we know stood at Whitehall.—See My 20, 1773.

In 1780 (q.v. Je 3), he removed to Little Dock St.

Doran's tavern (see Ja 15, 1770; Mr 24, 1777) is now kept by the "dolor Doran," according to a notice for the Marine Soc. to be kept at New York, Je 6, 1781.

Resolved... a Committee to View that part of Trinity Church Yard that lies on the South side of the Church and that was formerly appropriated and set apart for Building of Vaults and report how much of the said Ground they think Sufficient for that purpose and whether it will not also be necessary to reserve a Slip or piece of the said Ground adjoining to Thames Street in order to widen and make the said Street more Commodious than it is at present."—Trin. Min. (MS.).

On the departure of James Robertson for Philadelphia, the publication of his newspaper, The Royal Am. Gaz. (see Ja 16, 1777), was continued by his brother, Alexander Robertson. James returned to New York, and with the issue of Oct. 6 of this year the paper was published by Alexander and James Robertson—Brigham, in A. A. S. Proc. (1917), 489. See Je 27, 1780.

Robert Hull, "intending shortly for England," announces that he has "declined the business of tavern keeping," and wishes to settle all accounts.—Royal Gaz., Ja 17, 1778. Hull had been proprietor of the City Tavern since 1771. He apparently left during the month, for, by Jan. 31 (q.v.), William Hick had taken the house, records of 1781.

Capt. James Cook discovers the Sandwich Islands.—Alexander, Brief Hist. of the Hawaiian People (1891), 104.

News reaches England that "a Conspiracy had just been discovered at New York. Many of the Inhabitants, who had taken the Oaths of Allegiance to his Majesty, had entered into a League with the Commander of the Rebel Troops in the Neighbourhood, that on a certain Night, on his making an Assault on the Place, they would set the City on Fire in several different Parts, in order to throw the Whole into Confusion, and make it the easier Conquest. Happily this diabolical Plot was timely discovered, and forty of the Ringleaders are now in Irons."—St. James's Chron., Ja 17-20, 1778.

Wm. Smith writes: "My Brother has heard that Col. Roger Morris is under Guard at NY. for declaring that the People of England and wonder at the Genitals and Long Honeys with holding overtures [of peace] in his power to make, and the too easy Conquest. Happily this diabolical Plot was timely discovered, and forty of the Ringleaders are now in Irons."—Ibid.

If America can neither form an army to drive the British Force off of the Continent nor to disturb them at N. Y. Phila: nor Rhode Island this Winter the Prospect of general Devastation next Summer will wear the People from the Congress & all will then be over with their present Leaders. If they make an Attempt to raise Forces for this Purpose and do not succeed the Delusions will vanish before the Season for opening the Campaign. . . . This is Col. Lee is exchanged and come out. Perhaps he is to be made up to and so bring about a peace once for all.—See Je 10, 1779. Many Weeks ago the Patriots denied that Lee had ever urged since his Captivity to Overtures of Peace. Mrs. Watkins who came lately from NC saw Lee walking the Streets. He would not have had that Privilege if it was not known that he had changed his Sentiments—they would not have suffered him to procure Information & inspect their Condition if they were not confident of his Conduct—Wm. Smith's Diary (MS.).

"Supposing the Contr. Emissions to amount as Mr. Duane says 26 to 34 Millions of Dollars or as Mr. Law of Connecticut who left the Congress with him in Dec to 38 Millions, tho I believe they are more [sic] even then our Colony is under a Debt of near Two Million Currency. . . Compare this to our largest Public Burden & the situation, say 350,000. Our Annual Levies were then a little more than 360,000 and the Complaints of the Burden were universal—Parliament reimbursed us in Part. The Congress have ordered us to raise 100000 Dols this Year viz 50000 What Clamours must arise—Then in 1762 we had a Successful Trade & immense Gains by Privateering & a clandestine Commerce by Flags to Hispaniola Besides we now cast the whole Burden upon the Dutchies & Albany & Broadway where they have been taxed more than the Southern Counties cannot or will not contribute & as to Charlotte Cumberland & Gloucester they were never taxed as unable to bear any Burden & now claim to be a separate State under the Name of Vermont.—The City of NY generally bore a half of all public Colosy Levies—with Respect to this Province the Congress may perceive the End of their Thread.—What will the other States do in another Year? They have now more than 78 Millions of Dollars. There are great arrears due to all who serve under them."—Wm. Smith's Diary (MS.), V.

"William Hick returns his sincere thanks to all those who were pleased to favour him with their company when he lived in the Jerseys, and takes the liberty to acquaint them that he now lives at the Bunch of Grapes in the Broad Way, lately kept by Mr. Hull the City Tavern, 115 Broadway, where they, and the public in general may depend on his utmost endeavours to make their entertainment agreeable. . . ."—Royal Gaz., Ja 31, 1778.

"N. B. Jellies to be had every day."—Royal Gaz., Ja 31, 1778. Hick, or Hocks, seems to have been occupying a house, prior to taking over the City Tavern, at "No. 326, opposite Mr. Isaac Low's in Dock-Street," where, on Feb. 3, he sold his household furniture by public vendue.—N. Y. Merc., Mr 27, 1780. When Gen. Patterson, at the request of Commissary Loring, turned him out of his house, into the street, with his family, his furniture, and effects, and substituted in his place one Roubelaet, a pim, a defendant, and a servant of the Commissary."—Jones, Hist. Commissary, N. Y. 7. HI. 36. Roubelaet remained until the end of the Revolution.—See O 13, 1783.

A captain of a victualling transport who left New York in this month reported in London that "there were then Provisions enough for the Soldiery and Inhabitants for more than three Years, and
that the Warehouse and Stores were so full that he lay three Weeks at the Quays before he could deliver his Cargo, and that the Wages were covered with Casks of all Kinds."—St. James's Chron., O. 8-10, 1778.

3 Eliab Boudinot, who had been appointed by Gen. Washington a commissary-general to look after the prisoners of the continental army held by the British, went to New Jersey to State Island, "in my own sloop," as he states in his journal, and thence to the Wharf in New York. He relates his experiences in the city, commenting upon the fact that he was treated by Gen. Robertson, commandant of the city, Commissary Loring, and other British officers, "with the greatest Civility & good Humor," and was afforded every opportunity to see the prisoners, converse with them freely, and ascertain the conditions of their captivity. Accompanied by a British officer, he first visited the Provost prison where, he writes, he found "near 30 Officers from Colonel downward in close confinement in the Goal." These officers complained that "they had been confined on the most frivolous Pretences," and that "they had received the most cruel Treatment from the Provost Marshal [Cowingham]," being, on the most trilling occurrences and on false charges of misconduct, "locked up in the Dungeon, 12, 10, 12 & 14 weeks" or in some instances 11 months, "in provost marshal's prison examination with great Insolence answered that every word was true," and "swooe that he was as absolute there as Gen'l Howe was at the head of his Army." Mr. Boudinot continues: "After this I visited two Hospitals of our Sick Prisoners and the Sugar House: in the two the first were 211 Prisoners & in the last about 190—they acknowledge that for about two Months past they fared poorly for fuel," Mr. Boudinot adds that, previous to the capture of Gen'l Burgoyne, and for sometime after, their Treatment had been cruel beyond Measure—That the Prisoners in the French Church, amounting on an Average 3 & 400, could not all lay down at once—that from the 15th of Oct' to the 1st of Jan'y, they never reed a single stick of Wood, and that for the most part they eat their poor Raw. When the Pews & Door & Windows facing where torn for fuel, Mr. Boudinot adds that, after a reed of this examination, "Measures for alleviating the Miseries of War" were agreed to by the British authorities.—Four. or Hist. Recollections of Am. Events During the Rev. War, by Elias Boudinot, from his original manuscript (Phil'a, 1804), 9-15; Life, Public Services, Addresses and Letters of Elias Boudinot, Pres. of the Cont. cong, by J. J. Boudinot (Boston, 1860), I: 90-99. See My 13, 1778.

Boudinot writes of his successful efforts to secure the exchange of Gen. Lee from the British, who had captured him at Baskingridge on Dec. 13, 1776 (p.7). Lee had been "confined to a handsome House under Care of 4 or 5 officers who lived with him & kept a genteel Table," He particularly describes his visit to Lee in Jan. (evidently Error for Feb.), 1778, when the weather was so severe that Boudinot remained in Philadelphia. The British officers present to him, saying: "The Morning after my Arrival, I waited on Genl Lee who received me with great pleasure indeed, and asked me to breakfast with him the next day. This I did in Company with the officers who had the Care of him, and was treated with great politeness & affability. When Breakfast was over Gen'l Lee asked me up into his Room. He soon began to complain very heavily of the treatment he had receiv'd from Congress, in not complying with his request," which had been a committee of members of congress should be sent to New York to confer with him. Boudinot gives in detail his conversation with Lee, who said that he wished to reveal to congress the plans of the British summer campaign; that he considered it improbable that the Americans "under such an ignorant Commander in Chief" (meaning Washington) could ever withstand the British, and that he desired to send to congress a plan for military operations that he had drafted. Boudinot says that he declined to undertake such a mission, and adds: "I endeavored to negotiate his Exchange and it was agreed (hypothetically) that it should take place for Major General Prescot, subject to Genl. Howe's approbation. Genl. Howe objected and ordered Genl. Lee to Philadelphia. Addresses and Letters of Elias Boudinot, by J. J. Boudinot (Boston, 1860), I: 138-42. See Jl 4, Je 4, D 30, 1777.

Boudinot's care for the American prisoners of war in New York did not end with his departure from that city in February, 1778. He formed a plan of requiring Gen. Burgoyne to pay "hard Money" for the support of the British prisoners whom the American forces supplied with daily rations. In the meantime he proceeded to borrow money or take goods in New York on his own credit. "Thus," he said, "I furnished 500 Officers with a handsome Suit of Clothes each and 1100 Mfn with a plain Suit, found them Blankets, Shirts, &c, and added to their Provisions found by the British a full half ration of Bread & Beef per Day for upwards of 15 Months. Part of this I supplied by sending Wheat & Flour to New York & selling them for hard Money under leave from General Robinson."

Subsequently, in 1778, he applied to the continental congress, sitting in Philadelphia, for a settlement of his accounts, explaining that as a result of his undertaking in behalf of the prisoners in New York, he had advanced from his private resources and owed on expenditures ordered a total of $26,666.66. When congress took no action to settle the account, he wrote: "I sent orders to my Agent in New York [Lewis Pictard] and all further Issues were stopped accordingly."

The final outcome of the affair is thus described by Mr. Boudinot: "The Letter of July 1 I rec'd a very affecting Letter from my Agent pointing the Distresses of the Prisoners in so striking a Manner and the Death of Several more than had been usual, that I could not longer persist in my Determination of leave to resign the Subject—Having rec'd their Letter in Congress I arose with Tears in my Eyes, and reminding them of my former Promise begged Leave to break thro' it, so far as to read the Letter which I did—On this Mr. [Wm.] Duer (a Man of much Feeling) arose and in a speech of more than half an Hour declaimed so severely agt the ungrateful Conduct of the House that a unanimous Vote immediately followed for they were resolved that the Articles of Peace was immediately sent to New York."—Life & Giel of Elias Boudinot, by J. J. Boudinot (Boston, 1861), I: 145-61; Jour. Cont. Cong. (Ford ed.), XI: 736. See 7 and My 13, 1778.

In reply to Howe's letter of Oct. 22, 1777 (q.v.), in which he sought the king's permission to resign his command, Germain writes that the king has been "pleased to order me to signify to you my royal resolution of leaving the command, provided Sir Henry Clinton shall be in America when this letter reaches your hands, to whom you are to deliver up the command, and put him in possession of all the orders and instructions, which you have received from me or any other of the King's servants, respecting the troops, or the operations in which they have or were to be employed."—Parl. Reg. (1779), XI: 461. See My 2, 1778.

Treaties of "Amity and Commerce," and of "Alliance, Eventual and Defensive," are agreed upon at Paris by France and the United States. They are signed, on the part of France, by C. A. Gérard, and on the part of the United States, by Benjamin Franklin, Silas Deane, and Arthur Lee.—Jour. Cont. Cong., XI: 54-53. The treaties were ratified by congress on May 4—6th—Id., XI: 457. They were printed together as a folio broadside, a copy of which is in the N. Y. P. L.

Joshua Loring, British commissary of prisoners, writes from New York to Gen. Howe "that Mr. Boudinot, Commissary of the Rebel Prisoners, came to New York by permission of Sir Henry Clinton a few days ago [see F 3], to visit the Prisoners and settle his accounts with Mr. Pictard." Loring states that he accompanied Boudinot "thro' the Hospitals, Sugar House and Provost, and he is perfectly satisfied in the Treatment they meet with."—Report on Am. Mss. in the Royal Institution of Gt. Brit. (1904), I: 191.

As some British sailors recently "attacked, and with knives wounded and defaced three Hessian soldiers," and as other acts have been committed tending to raise discord between the Hessians and the British, Maj.-Gen. Robertson by proclamation orders that the Hessian troops be treated "with the civility due to strangers, and the kindness we owe to our faithful allies and friends," and offers a reward of £20 for the discovery of the perpetrators of the attack.—Royal Gaz., F 14, 1778. Commodore Hopham later ordered that no sailors appear in the streets after dark, and Robertson directed that any who disobeyed this order be sent "to the Main Guard."—Id., F 15, 1778. See F 17, 1778.

"All Gentlemen Volunteers, That are able and willing to serve his Majesty King George the Third, for two years, or during the rebellion, in the Prince of Wales's American Volunteers, commanded by his Excellency Brigadier-General Brown, now lying at King's-Bridge, let them repair to Mr. John Burrow's, at the sign of the globe [Wall St], near the main guard; Mr. James Webbe, at
1778: the lower end of Maiden-Lane; Mr. John Davan, at the sign of the George, the corner of the Fly-Market; at Mr. John C. Brano- no’s, at the upper end of Chapel-street, opposite the New Brick Meeting, or Mr. White, near the Main Guard: At either of these places, gentlemen volunteers will be readily entertained and receive their full bounty, appointed by his Majesty, (as an officer will attend the several houses for that purpose, to inform them of advantages belonging to that Corps in particular.)”—N. T. Merce, F 16, 1778.

19 Lord North’s consolatory bills are presented to the house of commons and read for the first time.—Parl. Hist. of Eng., XIX: 775-815. On this day, General Clinton writes, “The King commands me to send you copies of those bills... and to signify to you his royal pleasure, that you do cause them to be printed and dispersed throughout the Colonies, by such means as shall be most likely to make them generally known and considered, and that you embrace every opportunity of circulating them by flag of truce, or private persons among the rebel troops, and in those parts of the country, where the authority of the Congress prevails. And this you are to do with all possible expedition, so as the people at large may be acquainted with their contents, before ill-intentioned persons can have time to diffuse prejudices against them, or, by misrepresenting their tendency, excite jealousy and distrust of the favourable disposition of Great Britain towards the American Colonies.”—Parl. Reg. (1779), Mr. 469.19, ed. This bill was also printed and had received the king’s assent, printed copies were forwarded by Germain for further distribution.—Ibid. X. 469. For Howe’s answer, see Ap 19.

22 Smith writes that “a late Flag from NY brings News that General Howe is displaced & the Command given to General Clinton.”—Wm. Smith’s Diary (M.S.), V. The news was premature (see My 8).

27 Four members of Lamb’s battalion of artillery arrive in New York from New Windsor, and declare “that the Reminder of that Corps have determined to quit the Service of the Congress.”—N. T. Merce, Mr 2, 1778.

A New Yorker writes: “The martial Spirit which at present shines forth amongst the Inhabitants of this City, reflects the highest Honour upon them, and is at once a Proof of their Loyalty and Gratitude. Ever since the Arrival of the King’s Troops, the greatest Harmony and most cordial Friendship have subsisted between them and the Citizens, nor has the martial Law been a Grievance to any. None have been required to take Arms, not even the most apostate amongst those who have taken the Benefit of the Proclamation and came to this City for Protection... The Indoors of the City are agreeable, the principal Gentlemen, Inhabitants of this City, and Refugees from other Provinces, to form themselves into independent Companies, twenty of which are nearly completed. Several Companies of them have paraded on the Fields, at the upper End of Broad-Way, headed by the Worshipful David Matthews, Esq. and made a very fine Appearance. These Companies, together with the Militia, will greatly add to the Strength of the City, and relieve the King’s Troops, who may be employed elsewhere.”—St. James’s Chron., Ap 10-18, 1778.

The following announcement is made by the commandant at New York: “Whereas there are many houses and stores in this city belonging to Persons not under the protection of government which are occupied by merchants and others not entitled to quarters constituting part of this garrison and whereas large sums of money are requisite towards assisting the poor, lighting the lamps, repairing the pumps, cleaning the streets... and there being no reason why the aforesaid persons should not pay rent... I have... thought fit to authorise and appoint... John Smyth to demand 3 years rent ending 1st of May next... rents when received are to be paid by Said John Smyth into the hands of Mr. Eliam Debossres... treasurer.”—Report on Am. M.S.S. in the Royal Institute of Gt. Brit., I: 105. See also Jl 15.

. Gen. Howe writes to Germain: “The rebel army continues... butted at Valley Forge, where their men suffer exceedingly from the very inclement weather that has prevailed, this winter, which has induced numbers to desert.”

Great losses are making throughout the provinces to assemble a numerous army in the spring, and the most oppressive and arbitrary means exercised, to draw the people to the field, who almost generally shew extremebackwardness to their service, and in some instances have forcibly resisted the tyranny of their rulers.”—Parl. Reg. (1779), XI: 457.

Rivington publishes a report that Benjamin Franklin has been desperately wounded by a secret enemy, and there is no prospect of his recovery.—Royal Gaz., Mr 7, 1778. An announcement that this “chief prop of rebellion” was dead had appeared earlier in the year.—Ibid., Jl 31, 1778. These are samples of the falsehoods circulated to stimulate optimism among the Loyalists in New York. Other examples have been cited by Van Tyne in The Loyalists (1902), 251-52, as follows: Another day brought the golden tidings that Robert Morris had left Congress in disguise, having first made a motion for rescinding independency [citing Royal Gaz., Jl 3, 1778]. Wild reports got abroad that Washington had been made Lord Protector, or, again, this ‘Caesar,’ this ‘Cromwell,’ was dead or, at least, captured [Jour. and Letters of Samuel Curwen (1864), 125]. Sometimes “court cookery” prepared for the gazette the news of a treaty with Russia by which 30,000 Cossacks—a most plausible number—had been taken into British service. The King of Prussia, too, had yielded to British diplomacy [Royal Gaz., N 1, 1777]. “Poor Rivington,” sneered a Boston editor, was hard put to it to keep up the spirits of the Loyalists in their confined district in New York [ibid., D 1, 1779]. Another editor observed that the printer of the London Gazette had been thought the greatest liar on earth, but Rivington had far exceeded in the most artless of his malicious pamphlets in England [North Carolina Gaz., D 12, 1777]. [See A, Jl 13, 1777, Vol. V.]

“Not only did the loyal papers publish these cheerful items of news, but they gave to a hungry world morsels of political argument filled with bold athenist, turbulent elocution, and the cant of passions which the writers never felt.” The peaceful citizens of New York, in night Tyranny of the sailors from the British ships, which stood, in the streets, and disturbed the ladies and gentlemen.—Royal Gaz., Ap 14, 1779, were told of the terrible scenes of anarchy in the Whig centers. The refugee, groaning under the war prices, which were fast consuming the few funds that he had brought with him, was made content by the tale of grinding taxes in the provinces. There was, asserted one writer, hardly a line of five or dead stock, or of the produce of the earth or waters, or the result of industry or labor that was exempt from the fangs of those devouring locusts, the Whig legislatures. America was mortgaged for ages to come. They had incurred this intolerable burden because, forsooth, England had laid that ‘most exorbitant and grievous tax’ of three pence on a pound of tea [ibid., Mr 20, 1778].

“General Lee is still in New York tho’ discharged. He begins to be considered as a Deserter and probably will not come out till the Work of Reconciliation is advanced & the Minds of the Multitude turned to Peace. His Letters have estopped him from serving the Congress any longer as a Soldier. His Captivity may have saved his Life.”—Wm. Smith’s Diary (M.S.), V. See My 4.

A London news item reads: “Our Readers have heard that the Prussiaks have melted the leaden Statue of their most gracious King, at New-York, into Bullets; but they were guilty also of a Joke, for they reserved the leaden Head, and consigned it, by the next Opportunity, to one of his Majesty’s principal Ministers, who, upon the Receipt of the weighty Parcell, could not easily imagine what were its Contents.”—St. James’s Chron., Mr 7-10, 1778.

The royal assent is given to Lord North’s consolatory bills providing for the appointment of commissioners “to treat and agree upon the means of quieting the disturbances now subsisting in certain of the American colonies,” and for a parliamentary declaration “concerning the exercise of imposing taxes in the American colonies.”—Ann. Reg. (1778), 130-42, 1771 Parl. Hist., XIX: 867. See Ap 15.

The French ambassador informs the British court that France has signed “a Treaty of Friendship and Commerce” with the United States.—St. James’s Chron., Mr 17-19, 1778; Winsor, VII: 48, 84.

The legislature, sitting at Poughkeepsie, passes “An Act further to organize the Government of this State.” It defines the powers and duties of the council of revision. The state courts are regulated. The secretary of state shall be, ex officio, the clerk of the council of appointment. Regarding the arms and seals of the state, it states: “Whereas, Arms have been devised for this State, and two several Seals have been devised and made, one of the said Seals, as and for the Great Seal, and the other, as and for the Privy
THE ICONOGRAPHY OF MANHATTAN ISLAND

Seal of this State, (and which said Seals are now in the Custody and Possession of his Excellency the present Governor.)

That the said Arms and Seals, shall severally be, . . . the Arms, the Great Seal, and the Privy Seal of this State, . . . That the said Seal, hereby declared to be the Privy Seal shall be the Seal for military Commissions; and all such Matters and Things as heretofore, while this State, as the Colony of New-York, was subject to the Crown of Great-Britain, were issued, under the Seal of Arms, and the Governor or Commander in Chief, for the Time being, shall issue under the said Seal, hereby declared to be the Privy Seal of this State.

That and all such Matters and Things, as heretofore, while this State, as the Colony of New-York, was subject to the Crown of Great-Britain, were issued under the Great Seal of the Colony, shall in future, (the Proceedings in the Court of Chancery hereinafter mentioned excepted) be issued under the said Seal, hereby declared to be the Great Seal of this State; and shall be made out and entered in Record, in the office of the Secretary of the State, in the same Manner as, when this State, as the Colony of New-York, was subject to the Crown of Great-Britain, the same were made out and entered in Record, in the Office of the Secretary of the Colony.

In Governor Clinton's arms and private seal, used on a document of April 2, 1779, are reproduced in Wilde's Civic Antiquity of N. Y., Pl. 15 and 16. The great seal is reproduced in ibid., Pl. 17, and Mr. Wilde traces the design to early Dutch Models.—Ibid., 56-59.

The great seal is thus described: "A rising sun, over three mountains; motto underneath, 'Excellere'; legend, 'The Great Seal of the State of New York.' The reverse is a huge rock rising out of the water. . . . There is a record of the adoption, in 1779, of a coat of arms designed by Lewis Morris, John Jay, and John Sloss Hobart, and three copies made before 1785, are known. One is upon a military commission issued by Governor Clinton in 1779; a second was painted on the flag of the Third Regiment; and the third is a picture hung over Governor Clinton's pew in St. Paul's Church, in this city, in 1779."—Prelim. Hist. of the Flag of the U. S., 616-17. See also "The Arms and Seals of New-York—a defense," by Hames (Henry A.), in N. Y. Gen. & Enc. Record (1886), Vol. XVI; and "The Arms of the State of New-York," by Howell (Geo. R.), in ibid. (1888), Vol. XIX. On May 18, 1892, "The State Law," constituting Chap. II of "The General Laws" of the state, prescribed, among other things, the arms and great seal of the state. The device of the arms of this state, as adopted March 16, 1779, was there correctly described.—"Laws of N. Y. (1892), chap. 678, § 40.

"Letters from London mention, that a naval-yard is about to be established in this city, and that Capt. Le Cras is to be appointed Commissioner."—Royal Am. Gaz., Mar 19, 1778.

An advertisement offers "the farm called the Hermitage" for rent. It is "situate between the Bloomingdale and Greenwich roads, about four miles from town, containing near 25 acres with an house and garden, . . . barn and stables, and two large bearing orchards."—N. Y. Merc. Mar 25, 1778; Landmark Map, Pl. 176, Vol. III.

The assembly concurs in a senate resolution of March 23 "That the Secretary of this State and the Clerks of the several Counties in the same, be respectively authorized to put or cause to be put, the Records and Papers belonging to their respective Offices, in strong and light Inclosures, sufficient to exclude Rain, and to keep or cause them to be kept, and from Time to Time to be removed in the same respectively, to such Place and Places, as they shall severally think most conducive to the Security of such Records and Papers." The commanding officer of any regiment of militia shall furnish such guards as the secretary of state and the clerks of the counties may require.—Acts and Proc. of the Assembly (John Holt, 1777), 90.

New York State passes an act to regulate elections.—Laws of N. Y. (1779), chap. 16 (passed by Holt, 1782).

Smith writes: "Reef a Letter from Brother Tho. of 22d Int— General Sullivan there 18 Ins & gone to form an Army in England where they expect the British will attack & leave another Army in Pennsylvania. He owned the arrival of Cont's of Peace at NY—Informed him of Conversation with Lord Howe & that he brought out Instructions to settle Terms to be laid before Parlimt. . . . A Fleet arrived a few [days] before 22 Int at NY whether with Troops or Provisions not known. He sailed from there the next before supposed for Philadelphia. Talk in NY of coming up the River but most of going to N England to relieve Burgoyne."—Wm. Smith’s Diary (MS.), V.

Du Simitière makes a memorandum that he has added to his collection "A Cast of plaster representing in baso relievo the model of the equestrian Statue of the King that was erected in New York in August 1790 & destroyed in July 1796." He describes it as "gilt on a Sleave blue ground, this east was from a chasining on Copper done by a genevois [resident of Geneva] nam'd Goau a worthless [sic] fellow but what became of the original I know not." From Du Simitière's "Memoranda," MSS. Vol. II, in Library of Congress. Du Simitière began to inquire what became of the fragments of the statue by asking Col. John Lamb by letter of Nov. 14, 1798.—Ibid. As shown in the summary under date of July 25, 1776 (p. u.), he was evidently in possession of the information by Feb. 22, 1779.

Frederick Earl of Carlisle, Wm. Eden, one of the commissioners for trade and plantations, and Geo. Johnstone, captain in the royal navy, are named by the king to act with the Howe as commissioners "to treat, consult, and agree upon the means of quieting the distresses now subsisting in the Two Islands, New York, and New Jersey, and subject to the Crown and government of the United States, and to bring in plantations, and provinces in North America."—Ann. Reg. XXI: 222. In a letter of Apr. 12 to Howe, Germain enclosed "A copy of the instructions his Majesty has thought fit to give his commissioners for their guidance in this most important business," and declared: "They are so particular and comprehensive, that it only remains for me to add my wishes for the happy issue of your commission, and that peace may be restored between Great Britain and the Colonies upon the ground of that connection which, so happily for both, formerly subsisted between them."—Parl. Reg. (1779), XI: 470.

An item of London news of May 9 stated: "The Emoluments of the American Commissioners are as follow,—1000 l. each for a Service of Plates, 500 l. each for the States of Virginia, New York, and Georgia, and one each for North Carolina, South Carolina, and Georgia, per Week Salary, except Lord Carlisle, the President, who has three times that Sum."—St. James's Chron., My 9-7, 1778. The commissioners reached America on June 3 (p. u.).

The Earl of Chatham makes his last appeal in the house of commons against giving up the sovereignty of America. The Duke of Richmond answered in a long speech to the effect that England could not fight single-handed against France, Spain, and America. Chatham rose to reply, but swooned and was carried from the house. He died four days later (April 11)—Windsor, VII: 51-52, and authorities there cited; St. James's Chron., My 9-12, 1778.

Mr. Hartley, in the house of commons, moves to put an end to the American war. After figuring that the expense of the war, if concluded at the end of 1779, will be $54,990,000, he says: "This sum is enormous as it is, but it is very short of the expense. What rate shall I set the loss and destruction of the trade of this country, with all its rich resources and produce? At what rate shall I set the loss of 13 provinces, once the pride and strength of the parent state? At what rate shall I set the ruin of the British navy, which has hitherto been the bulwark of this country? At what rate shall I set the lives of many thousands of British subjects, whose wives might have been in the defense of their country instead of being thrown away in the attempt to entail slavery upon the new world? These are losses not to be estimated in the vile trash of pounds, shillings, and peace. When will these follies come to an end? The trade, the revenues, and all the strength and resources of this country, are sacrificed to the pursuit of this mad and ruinous war?"—Parl. Hist., XI: 1065-71.

An advertisement offers to let "The House, Garden, Stable and Coach-House, at Belvoir, The most delightful situation within the environs of this city. The House consists of eleven rooms, seven fireplaces, a Hall, Lobby, Kitchen and garret, with three commodious cellars." Applications are to be made to Mr. Rivington, or "Mr. Howard, in King-Street."—Royal Gaz., Ap 11, 1778. This was Belvoir, later called Belvoir and Curzon House, and still later, Ranelagh, for history of which see Mr 24, 1777.

Gen. Tryon causes to be "printed and dispersed" the draft of a bill, read in the house of commons on Feb. 19 (p. u.), declaring the Intentions of the Parliament . . . concerning the Exercise of the Right of imposing Taxes within his Majesty's Colonies, . . . The bill states, in part, that the exercise of the right of
1778 taxation by Parliament has caused "great uneasiness and disorders;" that it "has, by sundry misrepresentations, been made the means of misleading many of his Majesty's faithful subjects, who yet acknowledge the justice of contributing to the common defence of the Empire, provided such contributions should be raised under the sanction of the General Assembly of each respective Colony, Province, or Plantation." To restore peace, etc., it is therefore deemed "expedient to declare that the King and Parliament of Great Britain will not impose any duty, tax, or assessment, for the purpose of raising a revenue within any of the said Colonies." —From original broadside, in N. Y. P. L.; Evans Bibliography, No. 1587.

"Kentucky" informed me he was appointed to the Command, Vice Sir William Howe; General Robertson and others informed of the circumstance, and made publick by them. The ship-of-war "Andromeda" brings "an Account of ten thousand Men being ordered to America, of which 7,000 are Highlanders, and of terms to be offered the Americans." —Kentile's Journal, 149.

A "Bathing Machine, Upon the plan of those used at Margate, and other Watering-places in England," is to be established on the North River near Vauxhall by June 1. The subscription price is a guinea a season, or five shillings a bath. "The benefit of bathing in Salt-Water, being universally acknowledged, is it not astonishing that the Inhabitants of New-York, who have the means at hand, should never yet have provided a conveniency for the purpose? The ship-of-war finds a number of ladies, as the Ladies, though it is known to be of the greatest advantage to their delicate frames, have been totally excluded. . . . It is to be open from June 1 to the end of September from 6 A.M. until 12 noon.—Royal Gaz. Ap. 18, 1778. By Aug. 1 (T. C.), the bathing-machine was in operation "behind Mr. Harrison's Brewhouse."—Howe writes to Germain from Philadelphia: "The Drafts of the [conciliatory] bills inclosed in your Lordship's letter of the 19th February [q.v.] have been published, and dispersed in obedience to his Majesty's commands, and will, I have no doubt, be shortly spread over this continent."

"The enemy's position continues to be at Valley Forge and Wilmington; their force has been diminished during the course of the winter by desertion, and by detachments to the back settlements, where the Indians make constant inroads; but the want of green forage does not yet permit me to take the field and their situation too strong to hazard an attack with a prospect of success, which might put an end to the rebellion; whereas a check at this period would probably counteract his Majesty's intentions of preparing the way for the return of peace, by the bills proposed."—Park Reg. (1779), XI. 465.

"In the Law, the master of the port, issues a notice to all shipmasters to "wait on the commandant" (Gen. Robertson) on their arrival in port, and report in writing the names of their passengers, and other information "that may be conducive to the public safety."—N. Y. Merc., Ap. 20, 1778.

The advertisement of one Thomas Smith, a ship and house joiner, gives his address as "nearth-east of Schuyler's sugar-house, on Cowfoot-Hill, King-George-Street."—N. Y. Merc., Ap. 20, 1778.

The advertisement of one Thomas Smith, a ship and house joiner, gives his address as "nearth-east of Schuyler's sugar-house, on Cowfoot-Hill, King-George-Street."—N. Y. Merc., Ap. 20, 1778.

The advertisement of one Thomas Smith, a ship and house joiner, gives his address as "nearth-east of Schuyler's sugar-house, on Cowfoot-Hill, King-George-Street."—N. Y. Merc., Ap. 20, 1778.

The advertisement of one Thomas Smith, a ship and house joiner, gives his address as "nearth-east of Schuyler's sugar-house, on Cowfoot-Hill, King-George-Street."—N. Y. Merc., Ap. 20, 1778.

"Kentile's Journal, 149."
THE ICONOGRAPHY OF MANHATTAN ISLAND

Two Expeditions were preparing from thence. It was believed one to N. England & another up this River and he guessed they would be ready to set about Sunday next [J]e 7th. That before the 1600 arrived there at N.Y 7000 Regulars & 3000 Militia. That 20 Vessels had sailed from France with Supplies which were brought to New York of which he had seen there & the other 12 were at the Hook & coming up. Smith says of this information “As this Man’s Intelligence on 16 March. . . . were probably false I give him very little Credit for what he says now.” From another source Smith learn’s “that the Reinforcement which arrived at N.Y on the 7th May amounted to 22000.”—Wm. Smith’s Diary (MS), II: 57–58.

“If the British General & Commissioners are wise they will now publish a Relation of all the Attempts that have been made to induce the Congress to come to a fair Settlement with the Colonies & at the End threaten Desolation as the consequence of the last Rejection. This would convert Multitudes and totally destroy the Confidence of the Multitude in all those Leaders who have been in the Secret of the various overtures they have received.”—Wm. Smith’s Diary (MS.), III: 49.

Among general orders is this: “The Officers or non Commissioned Officers Commanding Guards are to send Patros to apprehend any Persons Gaming in the Streets or Ruins near their Posts; They are to send such prisoners to the Main Guard, and a Report is to be made immediately to the Commandant of the City.”—Order-book, in N. Y. H. S. Collections (1883), 609.

General orders, from “Head Quarters, Philadelphia,” are as follows: “Gen. Sir William Howe having obtained his Majesty’s permission to return to Europe, the King has been pleased to appoint His Excellency Sir Henry Clinton to succeed him, upon his departure, as General and Commander in Chief of the Army in this district of America, and all orders issued by Gen. Sir Henry Clinton are to be obeyed.”—Sir William Howe cannot think of taking leave of the Army without expressing in the strongest terms the very high sense he entertains and ever shall entertain of the distinguished Spirit, alacrity, and unanimity exerted upon all occasions by every Officer and Soldier he has had the honour to Command, as well Foreign as British, in the course of a service attended with much fatigue and hardship. “Having had the pleasure of receiving from the Army on his being succeeded in so important a Command by a General who, he is fully persuaded, will not only add Lustre to His Majesty’s Arms, but acquire great Honour to himself and to the Army under his Command.”—Order-book, in N. Y. H. S. Collections (1883), 579–80. See My 14.

John Holt having suspended publication of The New-York Journal at Kingston with No. 1771, which was the issue of Oct. 13, 1777 (see Jl 7, 1777), now begins publishing it in Poughkeepsie, with No. 1772, and with the title The New-York Journal, and the General Advertiser. “It was suspended from Nov. 6, 1780 to July 30, 1781, because of scarcity of paper and lack of financial support. After being resumed with the issue of July 30, 1781, it was suspended with the issue of Jan. 6, 1782, No. 126, to allow Holt to print the State Laws.”—Brigham, A. A. S. Proc. (1918), 90. Early Newspapers, H: 424; N. Y. P. L. Bulletin, S, 1920. For its re-establishment in New York City, see N 21, 1783.

Stebun enters the American service as inspector-general. For his oaths of office, signed “de Steuben,” and attested by Washington, see Winsor, III: 36.

Eliza (2) writes to Gen. Washington of his success in securing an exchange of prisoners. Col. Campbell had been sent out from New York by Gen. Howe to confer with him, and he relates that, having received permission from Gen. Clinton, he returned to New York with the British officers. There he met “Major Gen'l Daniel Jones in the Command & General Valentine Jones May Commandant of the City,” and he reported: “They treated me with uncommon Civility & granted me plenty of water. The exchange I took with Me was completely carried with Execution, with the addition of two convict officers & about Twenty Privates being for the Servants of Genl Burgoyne, Coll. Campbell & others. Genl Jones has given me the strongest assurance that our officers & Privates shall not have reason again to Complain of unnecessary Severity; indeed their whole System appears to be changed or at least in Confusion.”—Life, Pub. Services, Addresses and Letters of Elias Boudinot, ed. by J. J. Boudinot (Boston, 1896), I: 113. The “D. Rivington’s royal newspaper” (see Dec. 15, 1777), is changed from a weekly to a semi-weekly publication.—Brigham, A. A. S. Proc. (1917), 491. See, further, N 23, 1783.

The “Superintendent General of Police” (see My 4) issues a notice that inhabitants who want to buy flour are required to leave their names at his office in Wall St. every Tuesday and Friday at ten o’clock.—Royal Gen., My 17, 1778.

Smith receives the following news: “At & about N.Y 10,000 [British] Troops . . . The greatest Confidence at N.Y of terminating the War this Year. A Great Dockyard to be set up at N.Y. The Managers and artificers & Stores hourly expected.”—Wm. Smith’s Diary (MS.), III: 51. See My 18.

Maj.-Gen. Alexander McDougall sends to Gen. Gates a tabulation of movements showing an increase of the Enemy’s Strength in New York, and its Dependencies. This he has “Collected from Deserters, & friends to our Cause, who have come from Long Island, & New York.” It shows a total force of 6,303 men, of whom 2,060 are British, 1,250 Hessian, 3,803 new levies, and 100 Anspackers. These are stationed at Brooklyn, City of New York, Fort Washington, York Island (Manhattan), Long Island, Paulus Hook, Kingsbridge, etc.—From the original MS. with Gates Papers, in N. Y. H. S.

Embarkation orders contain the following: “Three Women per Company will be allowed to Embark.”—Order-book, in N. Y. H. S. Collections (1885), 615.

Smith writes in his diary: “Mr and Mrs Bayar visited us on Friday . . . We both apprehend that this Colony will soon become a main Theatre of the War and that Sir H Clinton will correct Howe’s Blunder by a greater if he draws all the Troops from Pennsylvania where it will be his Interest to avail himself of the Disaffection complained of by the Independents to overture the Congresional Authority.”—Wm. Smith’s Diary (MS.), III: 60. The first of the general orders recorded under Clinton (see My 11) is as follows: at “Head Quarters, Philadelphia:” “His Excellency to Sir William Howe having taken the Expedition to Europe, all Reports and Returns are in future to be made to Gen. Sir Henry Clinton, as Commander in Chief of the Army.”—Order-book, in N. Y. H. S. Collections (1885), 586.

General orders from headquarters at New York, on this Sunday, contain the following: “The Battalion of the 71st. Regiment on Long Island are to March to Hallett’s Cove on Tuesday Morning, to Pass in boats to Horn’s Hook, on this Island, and March from thence to the Ground appointed for their Encampment on the left of the Redoubts of McGown’s, near Jones’s House.” At the same time, it is ordered that “The King’s American Regiment, Commanded by Col. Fanning, are to March on Tuesday Morning, at Five o’Clock, to Horn’s Hook, from whence they are to pass in boats to Hallett’s Cove, and are to be Quartered in New Town, where they will receive Orders from Maj.-Gen. Tryon.”—Order-book, in N. Y. H. S. Collections (1885), 618.

It is reported in Poughkeepsie by people who left New York about ten days ago that provisions, both fresh and salt, were very scarce, and, though prices are limited by martial law, yet the seller usually found means to obtain more; that a good quarter of real might be sold for “half a job,” and other provisions in proportion, and that even the soldiers were stinted to half allowance of salted meat. It was supposed the scarcity would increase, as 43 transports had just arrived from Philadelphia, with invalids and Tory inhabitants.—N. Y. Jour., My 25, 1778.
It is also reported that "there seemed to be some relaxation of the severity with which our prisoners [Americans] had been used, many of them being now allowed the liberty to walk the streets."

"...Ibid."

Wm. Calwaryslytannounces that he "has erected a Stage Waggon, to go between New-york and Kingdridge, which sets out from this City every Monday, Wednesday and Friday Morning at 9 o'clock, and from Mr. M. Frayer's at the camp, at 3 o'clock in the afternoon; each passenger to pay $2.50 going, and Six Dollars at the entering of the stage." His headquarters are at "Mr. Sommerly's, near the Tex-Water pump."—N. Y. Merc., My 25, 1778.

Smith learns that "the British Troops have abandoned Fort Independence near King's Bridge. Genl Gates gone with 700 Men to the White Plains."—Wm. Smith's Diary (MS.), III: 63.

Gen. Jones orders that "the 178th Sir Shilling is going, and Six returning, at the entering of the stage." His headquarters are at "Mr. Sommery's, near the Tex-Water pump."—N. Y. Merc., My 25, 1778.

June 1778

It is also reported that "there seemed to be some relaxation of the severity with which our prisoners [Americans] had been used, many of them being now allowed the liberty to walk the streets."

"...Ibid."

Calwaryslytannounces that he "has erected a Stage Waggon, to go between New-york and Kingdridge, which sets out from this City every Monday, Wednesday and Friday Morning at 9 o'clock, and from Mr. M. Frayer's at the camp, at 3 o'clock in the afternoon; each passenger to pay $2.50 going, and Six Dollars at the entering of the stage." His headquarters are at "Mr. Sommery's, near the Tex-Water pump."—N. Y. Merc., My 25, 1778.

Smith learns that "the British Troops have abandoned Fort Independence near King's Bridge. Genl Gates gone with 700 Men to the White Plains."—Wm. Smith's Diary (MS.), III: 63.

Gen. Jones orders that "the 178th Sir Shilling is going, and Six returning, at the entering of the stage." His headquarters are at "Mr. Sommery's, near the Tex-Water pump."—N. Y. Merc., My 25, 1778.

3 May

It is also reported that "there seemed to be some relaxation of the severity with which our prisoners [Americans] had been used, many of them being now allowed the liberty to walk the streets."

"...Ibid."

1778 Boston Gaz., Je 29, 1778. For further comment in a later issue, see Je 9. 

12 Smith learns that "the British have 5 regts. at Kingtonbridge 4 at Fort Washington or Kniphhausen and that Troops had been for several days imbarking at Hook's Horn."—Wm. Smith's Diary (M.S.), III: 700.

13 The game of Cricket, to be played on Monday next, the 14th instant, at Cannon's Tavern, at Cofare's Hook. Those Gentlemen that choose to become Members of the Club, are desired to attend. The Wickets to be pitch at two o'clock."—Royal Gaz., Je 13, 1778.

Later, the cricket grounds were "where the late Reviews were, near the Jews Burying Ground."—Ibid., Je 17, 1780.

14 "About 2 o'clock this Morning a party [of Americans], said to be about 200, came to some Arms, one not with his faces blacked, and otherwise disguised, came into Flatbush, took off Major Moncreiffe and Mr. Bache; attempted the Mayor, Mr. Matthew's house; but the other well fastened, and a Shot being fired which they apprehended might give the Alarm, induced them to go off with the two first mentioned Gentlemen, supposed into Jersey. . . ."—Kemble's Jour., 151-52. Major Moncreiffe was the father of the young lady who came as a spy into the household of Gen. Putnam. See S 14, 1776; Memoirs of Mrs. Coghill (London 1794), and The Social Ladder, by Mrs. John King Van Rensselaer (1924).

17 Hostilities between England and France begin with a naval battle off the French coast.—Guizot, Hist. of France, V: 350. The outbreak of war had been expected since the French alliance with the United States Feb. 6 (p. 4).

19 In answer to the letter of the British peace commissioners (see Je 9), congress by unanimous voice declares: "Nothing but an earnest desire to spare the further effusion of human blood could have induced them to read a paper containing expressions so disrespectful to his most Christian majesty, the good and great ally of these states, or to consider propositions so derogatory to the honor of an independent nation.

"The Acts of the British parliament, the commission from your sovereign; and your letter, suppose the people of these states to be subjects of the crown of Great Britain, and are founded on the idea of dependence, which is utterly inadmissible.

"I am further directed to inform your excellencies, that Congress are inclined to peace, notwithstanding the unjust claims from which this war originated, and the savage manner in which it hath been conducted. They will, therefore, be ready to enter upon the consideration of a treaty of peace and commerce not inconsistent with treaties already subsisting, when the King of Great Britain shall demand a sincere disposition for that purpose. The only solid proof of this disposition, will be, an explicit acknowledgment of the independence of these states, or of their withdrawing his fleets and armies."—Jour. of Cong. (Ford ed.), XI: 615. A poem on the commissioners' Peace Offerings was published subsequently, the closing lines of which read:

"Our Birth rights which our God to us did give
We can't give up while we have Life to breathe.
Our Faith we've pledge'd with France, henceforth
no more.

Shall we ask Favors from the British Shore.
Take all the dastard Tories; none but God
Shall bind us in all Cases by his Word.
Tell your perfidious King soon as you please,'That Yankee's won't accept such Terms as these.'"—Boston Gaz., 1779.

The following order is found among the general orders of the British Army issued from headquarters at Haddendfield: "The Women of the Army are constantly to march upon the flanks of the Baggage of their respective Corps, and the Provost Martial has received positive Orders to Drumm out any Woman who shall dare to disobey this order."—Order-book, in N. Y. H. S. Collections (1883), 595. For other references to the women of the British army, see ibid., 596, 598.

The city watch, which was established soon after the King's Troops took Possession of New-York, is complimented in orders from headquarters. The "inferior Officers, Artificers, Labourers etc. employed in the various Branches of his Majesty's Service during (whose Duty will permit of it)" are required "to take their Share of the City Watch."—N. Y. Merc., Je 18, 1778; Man. Com. Coun. (1863), 660.

Kemble records: "The Troops expected daily from Philadelphia. The Hospital arriving with about six hundred sick and Wounded, but most of the former."—Kemble's Jour., 152.

Kemble records that there are "two Battalions of Delaware's on Long Island, to hold themselves in readiness to Embark, and two Battalions of Anspach arrived from Philadelphia."—Kemble's Jour., 152.

Congress, at York (see S 29, 1779), adjourns to Philadelphia.—Jour. of Cong., II: 610, 616. The first session there was held on July 2, and adjourned from day to day until July 7, when business was again transacted.—Ibid., II: 616.

The battle of Monmouth occurs, the "last general engagement fought on Northern soil" during the Revolution. Clinton, after evacuating Philadelphia (see Je 18), retreated across New Jersey toward New York. Washington followed, in an attempt to capture or destroy the British army, but his plans were frustrated by Geo. Lee, who disobeyed his orders to attack the enemy at a crucial moment in the vicinity of Monmouth court-house.—Winsor, VI: 397-400; Fiske, Hist. & Lit. Essays, essay on "Charles Lee." Under date of July 11, Smith writes in his diary: "Lee under an arrest—for not attacking according to Orders—retracting unnecessarily & for disrespect towards Washington."—Wm. Smith Accounts, (M.S.), under Je 28. Kemble records details of the action, with a "Return of Killed, Wounded, & Missing." The British loss was 299, of whom 56" died of severe heat of the Weather."—Kemble's Jour., 154. See Ji 20.

Holt prints in the Journal a letter to Lord North signed by William Smith, which reads: "My duty to the King, and the melancholy state of his affairs on this Continent, command me to deal plainly and truly with your Lordship. The overthrow and capture of Gen. Burgoyne and all his army, has inspired the base rebels of this country to such a degree of insolence; that they are determined to attack Gen. Howe in Philadelphia. In short, my Lord, if France enters into treaty with the rebels, I am afraid America will be forever lost to Great Britain; to prevent which permit me, my Lord, to say, that I think the only means left are tocede to France forever.

1. All Canada, in the state she possessed it before the late war.
2. To give up Cape Breton and St. Johns, with their dependencies.
3. To cede to them Nova Scotia.
4. A right to fish on the banks of Newfoundland, as possessed by them before the treaty of Paris.
5. In consideration of those concessions, France on her part,
6. To cease all connection, correspondence, & commerce with the rebel colonies.
7. To call home all her subjects, that are now in actual service of the rebels, and prevent them in future.
8. To assist G. Britain with a corps of 12,000 auxiliary troops, to be employed in the service of Great Britain, with the British Army, in order to reduce the rebels to obedience.
9. The honour I have of being one of his Majesty's council as well as duty and gratitude, have all called on me to give you the best advice for his Majesty's service in my power, in this dreadful situation of the King's affairs here, which are such as require some Change to be made."—N. Y. Jour., Ji 28, 1783.

10. In the diary Smith declared this letter a "wicked Forgery," and penned this record: "Wrote a Letter to London to defeat the Design of the Forgery in Holt."—Wm. Smith's Diary (M.S.), Ji 1 and 2, 1781. In a later issue of the Journal the letter was branded by Smith as a forgery.—N. Y. Jour., Ji 27, 1783.

The legislature of the state of New York passes a banishment act against Tories, entitled "An Act more effectually to prevent the Mischief arising from the Influence and Example of Persons of equivocal and suspected Characters in this State." It requires that, on the refusal of such persons to take an oath of allegiance before "the Commissioners appointed for inquiring into, detecting and defeating all Conspiracies," they shall be removed "to any Place within the Enemy's Lines." If they fail to appear within 21 days, they shall be adjudged, upon conviction, to be guilty of "Misprision of Treason;" and their lands shall be charged with
double taxes.—Law of N. T. 1st sess. chap. 47 (Gaine ed., 1789, I. 30). A probable origin of this legislative measure is given by Wm. Smith in his _Diary_ (MS.), III, under JI. 3. Regarding the banishment of Tories, see Winsor, VII: 207.

A list of those receiving sentence of banishment, which includes the name of "William Smith, Esq. [see JI 3], one of the members of the late Council of the King of Great Britain for this State," is preserved in the secretary of state's office.—_Mag. Am. Hist.,_ June, 1881, pp. 428, 433. See, however, My, 4 1780.

Maj. John André, having recorded in his daily journal an account of the withdrawal of the British troops under Sir Henry Clinton from Philadelphia through New Jersey to New York, concludes his report with the arrival in the city on this day (it is probably this date André meant when he wrote "June 31") of the "Guards Hessians and Cavalry." He says: "Thus was completed a March of many miles thro' the Enemy's country in defiance of every obstacle they threatened or attempted to throw in our path; nor is the latter any thing shewn by the retaking and pursuing them at Freehold [Monmouth—see Je 23] that a superiority both of skill and powers was shewn; but throughout the march they were perplexed in their conjectures by the secrecy observed respecting our route and by false movements made to deceive them; neither could their Militia or Light Troops with their boasted knowledge of the country and dexterity in hovering round us, find an opportunity of giving the least assistance in the execution of eight of eight of the plans and schemes of André's Jour., from the manuscript in the library of Wm. K. Bixby, St. Louis, ed. by Henry Cabot Lodge (pub. by The Bibliophili Society, Boston, 1903), II: 16-17.

In this month, John Wilson, ensign of the 71st Regt. and assistant-engineer of the British army, drew a topographical plan of the upper end of "The Island of New York from Horn's Hook to the Battery," which was published in Kingsbridge from a Survey in July 1778. — See facsimile reproduction in André's Journ., ed. by Henry C. Lodge (Boston, The Bibliophilic Soc., 1903), II: following p. 50.

On July 1, 2, and 3, the British, embarking at "the Hook," landed the 1st. and 2d. Brigades upon Staten Island; 3d. 4th. and 5th. New Utrecht, Long Island; the rest of the Army upon New York Island.—_Kemble's Jour._, 154.

In accordance with the act of June 30 (q. v.), Wm. Smith receives an order to appear at Poughkeepsie before the commissioners for detecting conspiracies, to take the oath of allegiance. On the same day he wrote in his diary that he did not intend to take the oath, and added: "I shall imitate the Conduct of Metelius Numidicus. I have no wish to be banished from the Land by which I Oath contributed to his Honor. Of this I am clear that my Submission to it would not only wound my Innocence but disgrace my Character. What shallow Policy! The Act will turn the distressed Exiles into bitter Enemies, such as take it [the oath] for Force will be less friendly than if it had not been tendered. It is oppressive & impolitic."—Wm. Smith's Diary (MS.), III.

Smith appeared before the commissioners on July 6 and refused to take the oath.—_Ibid.,_ V, Supplement. He came to New York City in August (see Ag 26).

The number of deserters, chiefly Hessians, who have left the British army since they left this city [Philadelphia—see Je 18], amounts to upwards of 1500.

We hear that the British troops now in New-York, are preparing to evacuate that city, and that the whole of the troops now on the Continent, will soon be drawn off to Britain or the West-Indies.

When Sir William Howe, General Burgoyne, and Sir Henry Clinton embarked for America in the year 1775, the following lines appeared in a London Paper:—

Behold! the Cerberus the Atlantic plough, 'Her precious cargo—Clinton—Burgoyne—Howe.'—_Brow._—Bow!—

"We leave it to our readers to determine, whether those military 'dogs of war' have done any thing but bark ever since they came to America."—_Pennc. Packet, JI, 4, 1778._

A reward is offered for the return to John Bouwer's _English Tavern_, at the 4-mile stone, of a "black sprig'd Sattin Cloak."—_Royal Gaz.,_ JI, 4, 1778. The 4-mile stone stood on the north side of the present 46th St, west of Third Ave. The "English Tavern" was the old Union Flag, at 

July 4, 1778

Sir Henry Clinton, "Commander in Chief of his Majesty's Forces in North-America," arrives in New York from Philadelphia (see Je 18).—_N. Y. Merc.,_ JI, 6, 1778.

The British army establishes headquarters at Sandy Hook, where its march is completed, and orders are issued for the disposition of the troops. Those assigned to Manhattan Island in the orders of this day are the 16th. and 17th. Dragoons, and the three Provincial Troops, the Guards, Queen's Rangers, Flanke Companies of 2d., 43d., and, Marines, and all the Hessian Corps.—_Order-book, in N. Y. H. S. Collections (1885), 603.

A letter from Poughkeepsie states that Samuel Broome has donated 500£ to Mr. Jay for "the distressed prisoners confined to New-York," and that the governor of the state has undertaken "to transact this business," as soon as military operations "will admit of any communication with the enemy." All intercourse with them has been suspended "for several months."—_N. Y. Jour.,_ JI, 6, 1778.

The king's commissioners having arrived in New York "last week" (cf. Je 3), with power to appoint governors,Tryons, comes to Genoa to make the Governor of New-York. —_Ibid.,_ VIII: 747.

The request was refused.—_Ibid.,_ VIII: 749.

Capt. Archibald Robertson is "Empl'd in making a sketch of the Attack on Monmouth [see Je 23] to be sent home by the Governor Robertson's Private Journ. of the Campaign 1778 (M.S.). He made a second sketch later (see O 24).

Montresor accompanies Sir Henry Clinton and the general officers to the Narrows, both on Staten and Long Islands, and explains a project of his "for defending that Pass, for preventing an Enemy's Fleet passing to New York."—_Montresor's Jour._, 504.

Washington, writing to Geo. Clinton from headquarters at Parmans, says, in part: "By the best accounts from New York it does not seem possible that the Enemy will operate anywhere suddenly; They have been much harassed and deranged by their march thro' Jersey, and are at present encamped upon Long, Staten and York Islands.

We have this day a rumor that a French Fleet has been seen off the Coast, and that the English is preparing to sail from New York in pursuit of them. But it is but a rumor."—From Letters of Geo. Washington to Geo. and Jas. Clinton, 28.

Kemble records: "The Count D'Estaing, with 13 Ships of the Line, came to Anchor off the Hook; our Fleet under Lord Howe drawn up within the Hook to receive them."—_Kemble's Jour._, 155. Montresor states that the French fleet consisted "of 11 Ships, the Line and 3 Frigates, from the Close of our Fishing Boats."—_Montresor's Jour._, 504; and foot-note, showing list of the Toulon fleet off Sandy Hook under command of Count D'Estaing. See also Robertson's _Private Jour. of the Campaign 1778 (M.S.)._

A carefully executed sepia drawing of the French fleet lying off Sandy Hook, drawn by Ozaune, the official French artist attached to the fleet, is preserved in the Library of Congress with other drawings by the same artist showing the fleet in various American ports. These drawings were bought in Paris in 1911 by the author.

Several letters passed between Lafayette and the admiral while his fleet was anchored off Sandy Hook.—Doniol, Correspondance inédite de La Fayette avec Le Comte D'Estaing (1892). For an account of the movements of the French fleet during this and the following year, see Playette, "Etude critique des opérations de l'Armée D'Estaing aux États-Unis et aux Antilles (1777-1779)," in Bulletin Historique et Scientifique de L'Académie, Sept. 1921, and succeeding issues.

Clinton, and the British commissioners, Carlisle, Eden, and Johnstone, at New York, address the following letter to the continental congress: "We received soon after our arrival at this place, your answer [see Je 17] to our letter [see Je 9], and are sorry to find on your part any difficulties raised which must prolong the calamities of the present war.

"We propose to you as matter of choice or other of two alternatives, which you state as preliminaries necessary even to the beginning of a negotiation for peace to this empire.

"One is an explicit acknowledgement of the independence}
11 Von Kraft records in his journal: "I was sent with one Corporal and 18 privates a distance of 3 English miles from our camp to York on watch on the road at a place called Tortelby [Turtle Bay] to guard three powder-magazines. Never until then did I eat so much cheese in my life and enjoy its taste in so pleasant a place."—N. Y. H. S. Collections (1882), 54.

12 Encouragement is offered to win recruits to the "Roman Catholic Volunteers." The recruiting stations are at "No. 51, in Cherynstreet, near the Ship Yards," and at an encampment "at Yellow Hook."—N. T. Merc., Jl 13, 1778. It appears by this that the British military authorities disregarded the provincial statute which supported Catholic recruits.

13 Sir Henry Clinton changes his headquarters from the Narrows to New York.—Montressor's Jour., 505.

14 By a person who came out of New York last Saturday, we are informed the tories were in the greatest consternation.—Their influence had quite vanished—and now they begin to send toast and butter to the prisoners by way of making fair weather for themselves against our army takes possession of that city, which is near at hand."—Penn. Packet, Jl 16, 1778.

15 "This day the 1st Brigade and 2d Battalion 91st were brought from Staten Island, the 71st to proceed to Kings Bridge, the 1st Brigade to occupy McGowen's Pass. We have now on this Island: 18 Battalions, 47th, and 49th, 131st, 52d, 45th, 71st, Regiments, 13 Battalions Hessians, Queen's Rangers, 2d Brigade Delaware's and Robinson's Provincialis; in the whole about 9,000 fit for Duty."—Kemble's Jour., 176; see also Montressor's Jour., 505.

16 Smith writes in his diary: "The confidence of the Whigs is at its highest elevation if we were to judge from their Words—but I doubt it this . . . Language to Fear in the Leaders of a Rising of the People—Great Pains are taken to render it credible that the British loss in Jersey is 3000 and that a French Fleet & 12000 Troops are arrived in Delaware & the Kings Army leaving NY. for Halifax. Yet melancholy Truths slip out which the Whigs affect to disbelieve—The advance of an army to Fort Stanwix—The cutting off of Wyoming by Indians . . . The Assembling of an army at Ticonderoga—That the Loss in Jersey was Trifling & no Victory—See Washington's & Lee's Letters in Loudon's Paper of yesterday. Many suspect that the fleet said to be in Delaware on the 12 Ins & gone to Sandy Hook is an English one—See Franklin's & Adams's Letters dated at Paris 18 May advising of 11 Ships of the Line [see Jl 21] ready to sail for America."—Wm. Smith MSS., folio 195.

17 André's report did not affect the defense of the harbor, for it was immediately reported to the British government that the capture of Sandy Hook by the French fleet was a serious matter.......
A GENERAL PEACE.

NEW-YORK, March 25, 1783.

LATE last Night, an EXPRESS from New-Jersey, brought the following Account.

That on Sunday last, the Twenty-Third Instant, a Vessel arrived at Philadelphia, in Thirty-five Days from Cadiz, with Dispatches to the Continental Congress, informing them, that on Monday the Twentieth Day of January, the Preliminaries to a General Peace, Between Great-Britain, France, Spain, Holland, and the United States of America, were signed at Paris, by all the Commissioners from those Powers; in consequence of which, Hostilities, by Sea and Land, were to cease in Europe, on Wednesday the Twentieth Day of February; and in America, on Thursday the Twentieth Day of March, in the present Year One Thousand Seven Hundred and Eighty-Three.

This very important Intelligence was last Night announced by the Firing of Cannon, and great Rejoicings at Elizabeth-Town.—Respecting the Particulars of this truly interesting Event no more are yet received, but they are hourly expected.

Published by James Rivington, Printer to the King’s Most Excellent Majesty.

28th of June [1778] we lost upon the whole between three & four hundred men: & about the same number had deserted during our battles. The danger was very great. Washington condemned Lee's conduct in that action so much, that the latter insisted upon a court-martial, which acquitted him. Our Commissioners have issued a Proclamation, relating their application to Congress & the manner in which it was treated, & appealing to the people of America; but it will all be fruitless without success in arms. Indeed our present situation is so ignominious, that the whole Continent must sing us with contempt, almost all the British Force in America blockaded by sea, & invested by land. The French force is so much prepared that we cannot presume to attack them; they effectually block up the harbour, & have taken several of our vessels; but the communication with the Sound is still open, & the Packet-Boats go now that way. It is a matter of astonishment to every person here, that a month after the French Fleet had sailed from Toulon we had no Fleet out in pursuit of them, but lay all asleep at Spithead. —From the original letter in the N. Y. P. L. printed in Library Bull. (1903), 422–44.

Lord Carlisle writes from New York to Lady Carlisle: “The common people hate us in their hearts. . . . Formerly, when things went better for us, there was an appearance of friendship, but no concert; & by our conduct they have altered the least altered for the worst, but these friends were the first to fire on us; & many were taken with their pardons in their pockets.—Trevelyan, The Am. Revolution, III: 404.

The French fleet, which has been lying off Sandy Hook since the 11th inst., weighs anchor and sails for Rhode Island, as recorded in the military journal of Maj. John Armstrong. It is stated that with the French Fleet the French “landed a considerable body of men in Shrewsbury River and took in water. They captured about twenty Sails of trading vessels and one or two sloops of war, an object of no consequence, compared with the expectations they well might have.”—Andre’s Jour., 17–18; see also Montresor’s Jour., 506; and Kemble’s Jour., 156.

Their coming in for pardon; but, no sooner was our situation the least altered for the worst, but these friends were the first to fire on us; and many were taken with their pardons in their pockets.—Trevelyan, The Am. Revolution, III: 404.

Il semble que d’Estaing se soit heurté dans cette affaire a la mauvaise volonté des pilotes américains. . . . Le concours des pilotes du pays était donc absolument indispensable; or, il semble que la plupart de ces pilotes sient voulus nous refuser l’occasion de renommer des succès, soit que certains d’entre eux fussent secrètement a la solde des Anglais, soit par jalousie de race.—Bulletin Historique et Scientifique de L’Amérique (O, 1912), 200.

Kemble avers that “want of Water may have induced Count D’Estaing to leave his position without the Hook, as well as having Efected his present business, the Opening Southern Ports, and taking the Tobacco Trade under his Convoy, which may, by this time, be prepared and ready to Sail. If Mr. Byron is near, he [D’Estaing] never will venture himself in Rhode Island Harbour.”—Kemble’s Jour., 152. On the 24th, the French fleet was said to have been seen “off the Delawar.”—Ibid. Its destination, however, was Rhode Island.—See Ag 6.

Liet. Von Krafts describes a section of the country near Kingsbridge (evidently on Manhattan Island): “We lost our way in the woods and arrived at some huts, in which and in the adjoining little gardens many things, but no people were to be seen or heard. Presumably it all belonged to negroes. We left everything untouched. July

The following orders referring to the movements of the British troops are drawn up: “The Regt. of Landgrave to march to Kingsbridge tomorrow morning; to be posted there, as G1 Knowshen shall think proper.”

The 54th Reg’t to march tomorrow morning with the Park of Artillery, towards New York.

Commissaries, &c. to be within Kingsbridge, by the 27th at Night.

The Army to march on the 28th, & to be posted as follows.

Vol’s of Ireland, near Horn’s Hook.

French & Hessian Grenadiers, at Mc Gowan’s.

Vol’s of Ireland, within Kingsbridge.

7th & 25th Between the Redoubts, on the Heights of Fordham.

Jagers, upon Spiten Devil.

17th Dragon’s, near Kingsbridge; within.

Queen’s Rangers, Legion, & Everick’s, beyond the Redoubts.

(One Company of the Guards, in New York.)—From a MS. among the Robertson loose papers in the N. Y. P. L.

Return of the Sick in the General Hospital” consists of 850 men.—Montresor’s Jour., 507.

About 800 British and Hessian Prisoners arrived here from New Jersey and Connecticut since the last issue of the newspaper.

The same Number of Americans are to be sent out in their Room.”—N. Y. Merc., Jl 27, 1778.

Volunteer companies of gentlemen, in uniforms, parade in the Fields, and are reviewed by Maj.-Gen. Robertson, who addresses them, stating his intention “of acquainting his Majesty and their fellow Subjects in Britain, with their loyal and military Adour.”—N. Y. Merc., Ag 4, 1778.

The “Provincial Secretary’s Office is removed from Broad Street, to No. 161, the upper End of Queen-Street.”—N. T. Merc., Jl 27, 1778.

Maj.-Gen. Valentine Jones, the commandant of New York, publishes a notice forbidding persons “to wash cloathing of any kind in the Fresh Water Pond, or heavy filth, carriage licht, or dirt, in or near the same.”—Royal Gaz., Jl 29, 1778.

Sir Henry’s gone to the Hook, supposed to Consult with Lord Howe on the Operations necessary to pursue if the French are gone to Rhode Island.

“We have now on New York, Staten, and Long Island, 20,000 Rank and File fit for duty.”—Kemble’s Jour., 156. Cf. letter in N. Y. Jour. (Poughkeepsie), Ag 16, 1778.

“The Cornwall, of 74 Guns, one of Admiral Byron’s Fleet, arrived and anchor at the Hooks, parted Company the 3d. or 4th. of this month in a Gale of Wind. The Centurion and Reasonable also arrived from Halifax. Strongly Conjectured that the French Fleet is going to Rhode Island.”—Kemble’s Jour., 158.

“An Legion now raising of 700 men under the Command of Lord Cathcart.”—Montresor’s Jour., 507.

“The Rebels have detached 4500 men from their Grand Army at and about the White Plains to proceed to the Eastward.”—Montresor’s Jour., 507; see also Kemble’s Jour., 158.

Kemble records that it is “Reported that Mr. Washington had Aug. Detached 5000 Men to Rhode Island” Kemble sails “for the Hook.”—Kemble’s Jour., 158.

It is announced that the “Bathing Machine” is “ready at the North River, behind Mr. Harrison’s Brehouse, when [where] Attendance will be given every Morning during the Summer Season.”—Royal Gaz., Ag 1, 1778. The first mention of this machine was on April 18 (q.v.), though apparently in another location.

Kemble records: “About two o’Clock this day, Lord Howe made the Signal for the Fleet to Weigh, in twenty Minutes the whole were under Sail, Consisting of one 74, seven 64, five of 50
1778 Guns, with two forty Gun Ships, several frigates, and three fire Ships; but the Packet came in an hour, and the Fleet came in half an hour. —*Kemble's Jour., 159.*

Another large fire occurs in New York. The following is the first newspaper report of it: "About 1 o'clock this morning, a most dreadful Fire broke out, in the Store of Mr. Jones, Ship Chandler, on Cruger's Wharf [now Front St.], in this City, which, notwithstanding the utmost Efforts of the Nivey, Army and In-habitants, soon consumed all the Buildings on the East, South, and West End of said Wharf, and every House on the South Side of Little Dock Street. The Street being narrow, the Flames soon communicated to the North Side of Little-Dock-Street, and consumed the whole (five Houses excepted) at the W. End. The Fire soon caught the Back Buildings in Dock-street [now Pearl St], and burnt every House to the East of Mr. Isaac Low's as far as the Go-Old-Slip, and three opposite the Slip, Mr. Low's House, the not burnt entirely, is greatly damaged, as well as that next to it on the West.

"The Loss . . . is great, there being no less than 64 Dwelling Houses, besides Stores, consumed.

. . . two small Vessels burnt, but . . . no lives . . . lost.

"Col. Coburn and the Officers and Men of the 35th Regiment were the first of the Military that attended the fire, and they, with the other Gentlemen of the Army gave their Assistance during the whole time."—*N. Y. Merc., Aug 3, 1778.* The account in the Royal Gaz., of Aug. 5, is the same as this, excepting that, in place of "the Store of Mr. Jones, Ship Chandler" is substituted "the House of Mr. Stewart." See, however, Ag 7.

Kemble states in his journal that the fire broke out "near the South Wharves, and destroyed all the Block of Houses and Stores between that and Mr. Isaac Low's, with some King's Stores, Provincial Clothing, &c."—*Kemble's Jour., 158.* The quartermaster-general's store-house was one of these.—*N. Y. Col. Docs., VIII: 775.* Provision and bake-houses were among those burned. A few suspected persons, including Frenchmen, were arrested.—*Von Krafft's Jour., in N. Y. Hist. Soc. Collections (1845), p. 119.* The building on which the fire broke out was on the Dock near the old Slip Market. Three topsail vessels, besides the store-houses, were burned. The total loss is supposed to be $250,000.—*Monrosear's Jour., 508.* Another report stated that "it consumed all the houses between 'Counties' and the 'Old Slip Market,' from the water-side to Dock [Pearl] Street."—*N. Y. Jour., Aug 24, 1778.*

The owners' names, and the number of houses owned by each that were burned, were published a week later. Col. Wm. Bayard, who lost several houses in the fire of 1776, lost six in this, the income of which was $520 a year.—*N. Y. Merc., Ag 10, 1778.* One of the heaviest losers was Peter "Meyefer" (Meier). He and his relatives, in the last 23 months, have lost 15 houses and stores, "some of them large and elegant Buildings."—*N. Y. Merc., Ag 17, 1778.* A letter of Aug. 21, says, "The White Plains, named (whose brother is aide-de-camp to Gen. Clinton), who saw the fire, states that "it began in a house filled with King's stores—68 houses consumed and a vast quantity of stores, amongst which 30,000 blankets or pairs of blankets, 10,000 suits of cloaths, and a great deal of provisions, computed at four weeks supply."—*Penna. Packet, Ag 15, 1778.*

Mayor David Mathews, who did service at the fire, was dangerously wounded, but recovered.—*Ibid., Ag 10, 1778.* See the plan of the city, drawn and described by David Grim, showing the locality and course of this fire (and also that of 1776), owned by the N. Y. H. S., and reproduced in *Man. Com. Coun. (1866),* opp. p. 766. He states: "The cause of so many houses burning at this time was the Military Officers taking the ordering and directions of this fire from the firemen. The citizens complained thereof, to the Commander-in-Chief, Who immediately gave general orders that in future, No Military man should interfere with any fire that may happen in the City, and leave the extinguishing thereof to the entire directions of the firemen and inhabitants."—*Ibid., 696.*

Referring to Howe's having gone to New York and formed his lines, "with the left on the Hudson and the right on the East river, about a mile in front of the city," Von Elking writes: "The mob had again set fire to many of the best houses and churches, while the garrison was quartered in other churches, and in Fort St. George and in wooden barracks. The party feeling ran high in the city; its civil government was in loyal hands, and the Germans found evidences of luxury and hospitality in the well-furnished houses on Queen Street and Water street, where the rich merchants then lived."—*Ibid.,* Aug 3.

And, in a second account, the city was divided into seven sections, and a mayor, with seven councillors and seven aldermen—loyalists, of course—had charge of the civil government. Many of the citizens were supplied with arms and employed as militis, to guard the city."—*The German Allied Troops in the North American War,* 54.

A London news item, on Oct. 15, stated: "The Fire which has happened at New-York was foreseen by several Merchants in London, who as soon as they had Advice of Clinton's Return to New-York from Philadelphia, immediately insured their Goods there from Fire. The Premium given on this Account, for three Months was Five Guineas per Cent."—*St. James's Chron., O 13—15, 1778.*

A New York letter which reached England in November stated that "14,000 Suits of Clothes and 30,000 Stands of Arms were destroyed in the Fire. —*Ibid.,* N 12—15, 1778.*

The British ordnance slop "Morning Star," lying "off the Coffee House in the East River," with 248 barrels of gunpowder on board, blows up. It is supposed to have been struck by lightning. Considerable damage is done to windows and the roofs of houses, and many people are knocked down by the shock.—*N. Y. Merc., Ag 17, 1778.* Dunlap published in *Hist. of the New Netherlands,* vol. 1, the letter of an old man (dated 1876) giving interesting details of this occurrence. See also Robertson's *Jour. (MS).* See Ag 7.

A "Gentleman high in Office at New-York" writes to a correspondent in London: "The Conciliatory Bills [see F 19 and Ap 15] have been productive of great evils, and lost us Opportunities not again to be expected. . . . I am astonished that Ministry could have so many Expectations of the Men acquired, as they must have been, of D'Esterling's Destination, and the Appointment of a Minister Plenipotentiary from France to Congress. In short, there is no Alternative but Conquest, or avowing absolute Indep- endency, and we dread the Evacuation of Philadelphia will be followed by that of New-York. . . . We have been alarmed by the Midst of this Distress, and the Dread of Famine coming, upon us, by the miraculous Arrival of the Cock Fleet, . . . which escaped the greatest Risk of being taken and converted to Mr. Washington's Use. . . . They are salé now in the East River, and come very opportunely to supply several Sorts of Provisions, which were entirely deficient."—*St. James's Chron., O 20—22, 1778.* Regarding conditions in New York, see also letter in *N. Y. Jour. (Poughkeepsie),* Ag 10, 1778.

Moniteur Gérard, ambassador from France, the first from any nation, is introduced to congress.—*Jour. of Cong., III: 6.*

"Arrived this evening an Express from Major General Pigot from Rhode Island to Sir Henry Clinton dated the 3rd and that (sic) he was invested by the French Fleet and 30,000 Rebels and expected the Rebels would open their Batteries against him, on this day. Lord Fleet to his Majesty, as soon asst he arrived, as anchor again [see Ag 2] and proceeded with a fair wind to attack the French Fleet at Rhode Island."—*Moneteur's Jour., 508.* See also *Kemble's Jour.,* 159.

This date is found on one of the finest of Archibald Robertson's drawings, entitled "New York from Brooklyn Heights." This beautiful sepia drawing, and the one made from Mt. Pitt and bearing the date April 11, 1776 (q.v.), probably never belonged to the series described under July 12 (q.v.); they were separately purchased by the author some time before the portfolio collection was found and are of somewhat larger size. When found these two drawings were mounted on strainers, and framed. See *Frontispieces,* Vol. V.

The safety of the city and shipping, Maj.-Gen. Jones issues an order requiring that vessels shall not lie near any wharf without permit from the superintendent of the port, and then only to load and unload, and with anchor astern, "to be able to haul off immediately when ordered, or in case of fire."—*N. Y. Merc., Ag 24, 1778.*

In an open letter, John Stewart publishes a contradiction of a statement, which John Jones printed in Robertson's *Gen.* of Aug. 4, that the fire of Aug. 3 (q.v.) originated in Stewart's house. In support of this contention, he publishes the following order from the provost-marshal's aide-de-camp: "John Stewart having been confined in the Provost at his own Request, until it could be proved that the Fire was not occasioned by any Neglect of his; it appearing that the Fire did not begin at his House, he is discharged by the General's order."—*Royal Gen., Ag 8, 1778.*

"This morning arrived the Rebel Commissary General of
Prisoners."—Montereau's Jour., 509. This was Elias Boudinot.—"See F 3.

10 "Ld Howe got off the Mouth of the Harbour near Block Island the French Fleet immediately came out 12 Sails of Line of Battle ships, The Two Fleet were in sight for near Two Days & Just as they were going to Engage a very heavy storm came on &b separated them all & lasted two days."—Roberson's Jour. (M.S.).

"They sent to the British Fleet a message that all the marine prisoners has been agreed upon, and 200 have already been sent to Elizabeth Town. Those remaining, whether on parole or on the prison ships, will be sent there on or before Aug. 13. Those prisoners, whose agents for prizes may wish to use as witnesses in condemning prizes, will be detained.—N. Y. Merc., Ag 10, 1778.

11 A Vessel from the rebels came in. Smith the Counsellor and Mr. Cadwalader Collen went on board making the oath.—Montereau's Jour., 509. See also Wm. Smith's Diary (M.S.), III: 88-91; also his Vol. VI, under date of Ag 26.

13 The Penn. Packet prints a "genuine copy of an Advertisement lately printed, and pasted up in New York, at all the public places in the city." The advertisement reads: To Be Sold at Private Sale; The British Rights in America consisting of, amongst other articles. The Thirteen Provinces now in Revolution, which Britain, in the hour of her insolvency, attempted to subdue; the reversion of the government of Quebec, Nova Scotia, Newfoundland, East and West Florida; the territory of the Hudson's Bay Company; a respectable body of his Majesty's troops, and a considerable part of the royal navy, together with all the loyal subjects of America. "The British Rights in West-Indies will be included in the sale, it is agreeable to the purchasers.—Apply to George Johnston, Esq; who is desirous of concluding a private bargain. The conditions of sale to be seen in the hands of Henry Lauren, Esq; President of Congress.

P. S. To make it easy to purchasers, a seat in Congress will be taken in part of the rent in Contingent Money.

"N. B. Discount will be allowed for all Loyalists who have been murdered since the tenth of April, 1773.

"The British army and navy, all printers and news-writers, and all mobs and disorderly persons, are forbid to obstruct the sale."—Penn. Packet, Ag 13, 1778.

14 A proclamation is issued by Maj.-Gen. Jones, offering a reward of 100 guineas for the discovery of the incendiaries who, it is believed, started the recent fire. If the informer is an accomplice, the commander-in-chief offers him a pardon for his crime. "It is reported that a Man suspected to have been concerned, being pursued, was wounded in the Back with a Bayonet, immediately after the Fire broke out."—N. Y. Merc., Ag 17, 1778; Man. Com. Conn, (1863), 661; ibid. (1866), 735. The next day, John C. Knapp, officer of the Continental Army, was shot while returning with a reward of 20 guineas on the same conditions.—Royal Gaz. Ag 22, 1778.

15 "Our Fleet [British] came to Sandy Hook have received some Damage the Appolo Frigate was entirely Dismasted Ld Howe was on board of her—Two of the French Fleet were Dismasted—The Iris a 50 engaged their Rear Adm in a 74 & made her stear of Two others of her 50's were a little engaged—The French Fleet came to an Anchor off the Mouth of the Delaware."—Roberson's Jour. (M.S.)."Commorode Hotham also fell in with another 74 French Ship disposed, and would have taken if some of his Squadron had not appeared to rescue him."—Kemble's Jour., 160.

"The inhabitants [of New York] are most distressed at their present situation, and a vast many want to take their chance in the country, but cannot obtain permission."—Extract from letter from White Plains in Penn. Packet, Ag 15, 1778. See also De Voe, Market Book, 109.

16 Montresor states: "Our army at New York and its Dependencies and that at Rhode Island consist of Twenty five Thousand Men."—Montresor's Jour., 316. Regarding the campaign in Rhode Island it is announced that a 600 man exchange of American officers, with the British, would be made at Newport, with maps, see Winsor, VI: 592, 593, 595, 598, 606, 602.

17 "The Battalion American Loyalists [of New York] embarked on board of Transport vessels from Flushing."—Montresor's Jour., 316. On the 20th, they were ordered to disembark "and take up their old Ground."—ibid.

18 "The Order was founded on one of Archibald Robertson's drawings (No. 42—see JI, 12, 1776), entitled "Kepp's Bay 17th Aug. 1778, where the Troops landed 17th Sept. 1776."—Phoenix 44, Capt. H Parker Roebuck 44, Hammond, Carisford 28. Finisham Aug. [3], Rose 20. J. Walton."

All our fleet assembled at the Hook preparing to go to Sea as soon as possible."—Kemble's Jour., 160.

Kemble records a report that "the French fleet left all their Troops upon Cononcuit Island in Rhode Island Harbour, said to be about 2,000 under Command of the Marquis De Lafayette;" and he adds: "All this time our Army lay at sea."—Kemble's Jour. 160. He records on Aug. 24 a report that, on Aug. 21, "the French fleet [was] still in the Offing, but had not entered the Harbour of Rhode Island."—Ibid., 161.

The general calculation made of the sick in our Military Hospitals [N.Y. City] is that seven men die out of every hundred. This is due to the season of the year, when the number of patients increases.—Montresor's Jour., 511.

The "Experiment," a British ship of 50 guns, having been chased from sea by some of the French fleet, arrives through the Sound. "In consequence Sir Henry Clinton went hence to Lord Howe at Sandy Hook."—Ibid.

Inhabitants of New York and vicinity are cautioned not to purchase "any articles of clathing, linen, or any part of the appointments or necessaries of a soldier." They are subject to fine or imprisonment for doing so.—Royal Gaz., Ag 22, 1778.

Two British fire-ships are sent from New York to Sandy Hook.—Montresor's Jour., 511.

"Deserters from the Americans come daily to New York."—Ibid.

Kemble records: "Sent a Vessel to Sandy Hook and Dined on board Commodore Hotham. On the 24th a number of Captains and Lieutenants of the American fleet, whose Unanimity and Confidence in Lord Howe is most pleasing, who they talk of as the best Officer ever known."—Kemble's Jour., 160.

"Lord Howe sailed out of the Hook with his fleet and Anchored about six or eight Miles off; in the Evening the Experiment joined them, who had Sailed about eight days before for Rhode Island, but was Chased on her arrival by three 74 Gun French Ships, and obliged to come thro' the Sound, and was the first 50 Gun Ship ever known to come through Hell Gate."—Kemble's Jour., 160. Possibly this event is depicted in A. Pl. 7-6, Vol. HI.

There was a skirmish this morning between Emmrick's Chasseurs and some Indians and Rebels dressed like them near King's bridge—9 were killed and 2 taken—we had 2 men wounded.—Montresor's Jour., 511.

Two sloops arrive at New York, "as Flags of Truce," loaded with "Inhabitants from the country that have refused the Test Oath."—Ibid.

An item of Boston news states: "By a gentleman who has been some time a prisoner at New York, but left that place about a fortnight since, he learn, that all the American prisoners were at last sent out of the city: not from motives of generosiy, but because the enemy found it difficult to subsist them there in their present situation, and because under the apprehensions they are now in, of an attempt to dislodge them from that place, they thought themselves safer without such a body of Americans among them, though unarm'd and confined. . . . According to the account of this gentleman as well as that of others, though the severe treatment of our prisoners has been lately mitigated, it has yet to the last been hard; sick and well have been crowded together, and no difference allowed respecting rank, while the French have been treated in another manner; particular attention having been paid to their rank, and compliance shown them in many instances. . . . Upon the appearance of the French fleet at the Hook, the French and American prisoners discovered their joy as far as they dared, but every countenance in New York, friendly to the British cause was appalled. The merchants were solicitous to turn their goods into money at any rate, or to conceal them, or to exchange them for the least bulky and most portable articles. The heavy cannon, and other things were already embarked, and the transports had taken on board provisions, and were wooded and waterd for three months. . . ."

"The enemy now freely acknowledge that the tables are turned, and they are put on the defensive and have nothing to do but to provide for their own safety at every quarter, in the same manner they can."—N. Y. Jour. (Poughkeepsie), 5, 1778.

I am to add that the late events at the Hook have given the latest definite mention of the Old Ship Market in the account of the fire of Aug. 3 (p. 3). He thinks this market was largely pulled down between
THE ICONOGRAPHY OF MANHATTAN ISLAND

April 25

"Some Rebel Light Horse came to Phillips house near King's bridge—they were shot by the Yagers."—Montresor's Jour., 511.

This evening arrived the fleet of Victuallers from Cork in most excellent manner. They had 37th, 44th, 47th, and 48th. Brigades Marched this day from Bedford towards Flushing, under Command of General Grey, supposed to Embark there for Rhode Island. Sir Henry Clinton went this day to Flushing, etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc. etc.
98. Nicholas Jones, in a manuscript memorandum, lists the names of 121 "Vessels Commissioned by General Tryon from the Port of New York since the 8th of Sep, 1778," and adds: "by March '79, upwards of $60,000, taken." Each ship's master and number of guns are listed.—Stewart and Jones, New-York Merchants' Letters, etc. (M.S.), in N. Y. T. VIII. 71. 1778.

99. While Petrie, minor surgeon of the "Lord Hyde," writes on his arrival at New York that "to be set down at a Place so beautifully situated, and where Nature was so much more luxuriant in the vegetable Kingdom then I had ever yet seen, gave me a Satisfaction unfeared before: And if so lovely now, what must it have been in its Prosperity, in the Enjoyment of every Blessing which Peace, Commerce, &c. in a well regulated Government could bestow upon the Inhabitants."

100. "The bad Success of the Commissioners, and the War which we must be engaged in, in Europe as well as here, leaves very little Hopes of ever bringing this Country again to a Dependance: It will be well if we can keep what we now have, for in giving them these Provinces, and especially this Port, we exclude almost a Possibility of retaining any Part, the Situation of New-York render- ing it the best Key to North America in general."—St. James's Chron., O 10-19, 1778.

101. Kemble records: "General Grey's Aid-De-Camp, Capt. André, arrived this day, having left the General at Block Island, and informs that the Troops, those Embarked for Rhode Island, with Sir Henry Clinton [see Ag 30], and left under General Grey's Command, had landed at N. Y. Castle's Cove, the Eastward of New-York Island, and destroyed a great quantity of Stores at that place and in it's Neighbourhood, with upwards of sixty Sail of Shipping, some of them armed."—Kemble's Jour., 162.

102. An item of Fiskill news declares: "Deserters to a considerable number come out to our camp from Kingsbridge from day to day. This said Deserters' caps is reduced to less than 700."

103. "Accounts from New-York by deserters, as well as persons come out of the city in exchange.—That the enemy by appearance, are preparing to leave the city—their heavy baggage and artillery being embarked. They are selling off[s] the fire-wood, salt, &c. which was stored for public use,—all their flour is delivered to the bakers to be made into biscuit."—N. Y. Jour. (Poughkeepsie), S 14, 1778.

104. "Lord Howe arrived with his fleet, and to go home immediately."—Kemble's Jour., 162. See S 21.

105. "This day Lord Howe resigned his command to Admiral Gambier, whose commission was filled the Eleventh of September."

106. From Montresor's Jour., 513.

107. In another letter to Sir Joseph Banks, Sir Charles Blagden says: "Our Fleet either through the fiddle-faddle preciseness or designed badness of our People prevailed on our movements, has failed in the attempt to intercept D'Estrago's Squadron on their way to Boston. Numerous parties of Iowians & Whites, all of whom seem to have some connexion with Col. Butler, commit great devastations on the Frontiers. Congress, however, do not relax, as you will see by their late resolves. . . . The people in power all give out that New-York is to be kept this winter; & several circumstances go to prove that it is intended, unless they are meant as a blind. An expedition seems preparing, but whether to the W. Indies, as was intended in the summer, or up the North River, as some imagine, nothing enables me to judge. The principal people of the army have so cordially; they are disgusted with Clinton's favourites. Washington insults us on the White Plains with scarcely 10,000 men . . . Our commissioners act toward the rebels with great Temper, & we should say in any other state of affairs, with degrading condescension. They seem to entertain hopes that the people will at length compel the Congress to negotiate, without considering perhaps sufficiently the strong Despotism established by these demagogues, who have contrived to put all the arms of the country into the hands of their friends. The principal officers of the rebel army indeed are quarrelling, but that is only a proof how much they now despise us. Danger we conclude them,"—From the original in the N. Y. P. L., printed in the Library's Bull. (1903), 450.

108. Congriss sends Franklin to France as minister plenipotentiary. —Jour. of Cong., III: 56.

109. "This morning the Rebel Army with Washington retired from the White Plains [see S 22]—3 Brigades of which went to New Eng- land—part crossed the North river to Morristown and some to Fishkill where Washington camped."—Montresor's Jour., 512.

110. The fact is published as news in London that "Several fine Frigates have been built at New-York for the Service of Govern- ment, two of them of 28 Guns each, viz. the Virgin and Iris."—St. James's Chron., S 15-17, 1778.

112. A London news item reads: "A Number of Houses at New-York having been quitted by the Disaffected, when that City was taken, a great many People who came with the King's Army took Posses- sion of them, and since that Time lived Rent free: There being no Funds to relieve the Refugees and Poor, the Magistracy petitioned the General to oblige such Holders of Houses to pay Half a Year's Rent for the Purpose of relieving the Distressed, which was compli- ed with, it being thought but reasonable; all Persons therefore who could not prove any Title to their Houses, were accordingly assessed Half a Year's Rent [see Mr 3], and Two Thousand Pounds were collected thereby for the above Service."—St. James's Chron., S 17-19, 1778.

113. Kemble records: "Colonel Sheriff Embarked this day for England on board the Eagle, with Lord Howe.

114. The First and Second Light Infantry, 1st. and 2d. Grenadiers, 3d. and 4th. Brigades, Lord Rawdon's Corps, Guards, and Bushkirk's Jersey Volunteers, proceed this Night on some Service under the Command of Lieut. Gen. Earl Cornwallis, supposed on a Foraging party into Jersey; the same day attended to order Lord Cornwallis."

115. Kemble's Jour., 162. "The troops under Cornwallis "crossed the North River to Bergen." Kemble recounts particulars of this expedi- tion, which led to the surprise and capture by the British, on the road to Tappan, of a party of American dragoons called "Lady Washington's."—Ibid. See S 28.

116. A reward is offered for the recovery of "a mhich Goat" which was "Stolen, Out of Trinity Church yard."—N. Y.Merc., S 21, 1778.

117. This Morning Sir Henry Clinton, with 12,000 Men, went up the North River in Transports, escorted by three Men of War, supposed to be with a Design to destroy the Magazines, Stores, and Shipping, belonging to the Americans, and to get Live Cattle."—From a New York letter published in St. James's Chron., N 7-10, 1778.

118. The Town is full of Expectation from a Detachment of 7000 into Jersey While a Body move from King's Bridge into West Chester.—As a Party went up Hudson River & some to Paulus Hook last night I suspect there is to be a Landing at Haverstraw to advance downawards & drive in Cattle & join & return by Paulus Hook. . . .

119. The Populace are in Spirits. They believe (I know not upon what Authority) That Washington's army are in great Dissentions —murmuring about the French Alliance & that he has in a Fright retired from White plains to the Highlands & sent a Part of his army to the New England Coast. That offence is taken at D Estrago's leaving Rhode Island—asking Supplies from the Congress & behaving with a Hauteur disgusting to the Levelling Principles of New England."—Wm. Smith's Diary (M.S.), VI.

120. Lord Carlisle writes from New York to Lady Carlisle: "How people exist in this town is to the greatest degree wonderful. All the necessaries of Life are dear beyond conception. Meat is from fifteen to seventeen pence a pound, and everything else in propor- tion. My weekly bills come to as much as the house-account at Castle Howard when we have the most company."—Trevedyan, The Am. Rev., II: 154 (June 13). A New Yorker writes "Generals Lee and Milifion have raised such Dissentions in the Rebel Army, that General Washington's Authority is much curtailed; and the Rebel Soldiers say publicly, that he and the Congress aim at absolute Power, and mean to sell their Country to the French; they like wise add, if America is to be subject to Monarchy, a British King shall rule them. This
THE ICONOGRAPHY OF MANHATTAN ISLAND

1778 is the prevailing Topic of Conversation at present, and the Members of the Congress are greatly divided amongst themselves."—St. James's Chron., N. Y., 5–6, 1778.

Daniel Horsmanden, formerly president of the council, and chief-justice of the province of New York, dies at Flathouse, L. I., in his 88th year. His body was buried in Trinity Churchyard on Sept. 25. He was a native of Great Britain, but had resided in America over fifty years.—N. Y. Merc., S 28, 1778. See also Wm. Smith's Diary (M.S.), Vol. VI, under date of Sept. 25.

Horsmanden left by will "£1,000 to rebuild the Rectory of Trinity Church; £200 to rebuilding the Charity School House; £100 towards buying a bell for St. Paul's Chapel; £200 towards building a pulpit and desk in Trinity Church, when the same shall be rebuilt; £500 to King's College."—N. Y. Col. Doc., VII: 528 (footnote), citing Liber Wills, XXXII: 77. For interesting references to him in 1767—4, see Houghton, Coaches of Colonial N. Y. (1890), 23; Man. Com. Coun. (1884), 235.

A "rebel Regiment of Light-horse [is] surprised and cut to pieces near Tappen by the 2nd Light Infantry—this choice and pattern Regiment was commanded by Colonel Baylor and called Lady Washington's Regiment and Washington's Guards and third Virginia Regiment of Horse."—Montressor's Jour., 153. See also Robertson's Jour. (M.S.), under dates of S 27 and S 28.

A "Mansifeto and Proclamation" is issued to the members of the congress and of the provincial legislatures, and to the inhabitants of the several colonies, by the king's commissioners. Congress is assured that the re-establishment of peace will be accompanied by "exemption from all taxes by the Parliament of Great Britain, and habeas corpus to the inhabitants of the colonies and expressly for the purpose of considering whether every motive, political as well as moral, should not decide their resolution to embrace the occasion of cementing a free and firm coalition with Great Britain." The colonists in general are reminded of "their own solemn appeals to Heaven in the beginning of this contest, that they took arms only for the redress of grievances and that it would be their wish and their interest to remain for ever connected with Great Britain," and they are asked "whether all their grievances, real or supposed, have not been amply and fully redressed."

—From an original in the N. Y. P. L. Wm. Smith wrote anonymously of this effort for peace: "The transactions of the Commissioners, and the manner in which they have been treated, and the miseries of America alleged by the Congress, will never be forgotten. Let the suffering American peruse the pamphlet published by the Royal Commissioners before they took their departure in November 1778 [see N 25], and for himself determine in his enquiries concerning the authors of his own, and of the present and future calamities of his country."—Candid Retrospect, 27, footnote, a pamphlet published by Rivington, Jan. 30, 1778 (q. c.), and presently in N. Y. N. S. See also Wm. Smith's Diary (M.S.), VI, under O 1, 2, and 5.

Commenting on the "Manifesto," a Philadelphia newspaper said: "The contemptible figure which the British king and ministry have cut in the present war, cannot be better shown than in the ... proclamation, which has been lately published at New York by Carlisle, Clinton and Eden. Those gentlemen seem to consider their master's commission as a sort of a pass to go a beggar with; for if any thing can justly be called begging, this last performance of theirs deserves that name. It is in the true style of 'Glad your honors, bestow your charity for the Lord's sake.' Poor devils! Why don't they go home and mind their hardware and broadcloth, and not pester us with scribbling letters and petitory proclamations."—Penn. Ev. Post, O 16, 1778.

Lafayette sends a letter to the Earl of Carlisle, in New York, challenging him, as chief commissioner, to answer in the field for some insults to France contained in the commissioners' letter to Congress of Aug. 26.—Ann. Reg. (1778), 317. For factimile of the challenge, see Avery, Hist. of the U. S., VI: 146. On Oct. 11, Carlisle rejected the challenge, stating: "The injury alluded to in the correspondence between the King's Commissioners and the Congress, I must remind you, is not of a private nature; and I conceive all national disputes will be best decided by the meeting of Admiral Byron and Count d'Estaing."—Ann. Reg. (1778), 317–18.

"Elizabath Powers, late from Philadelphia; From her strong attachment to the army and navy, has opened a house in Smith-street, the Sign of Cornwallis's Arms, where she proposes to entertain these gentlemen, and the public in general, who will be pleased to favour her with their company. ... She has provided excellent Waiters, and a Cook not inferior to any in America. Public Dinners at half past two o'clock, private Dinners at any hour, bespoke; ... "—Royal Gaz., O 7, 1778. Cf. Ja 6, 1783.

"The Savage Sloop of War arrives. Orders for Reprisals both by Great Britain & France. ... Orders come to send home Transports for Provisions for 30,000 for Twelve Months."—Wm. Smith's Diary (M.S.), VI.

Sir Charles Blagden writes again from New York to Sir Joseph Banks. He says: "The Army here is now breaking up, & no more seem likely to be left than are necessary as a garrison to the place. ... The Commissioners meet with no success, but [on] the contrary are treated with great rudeness, & the Commissioner in Chief with still greater, by demagogues of America. They are preparing to go home."—From original letter in N. Y. P. L., printed in the Library's Bull. (1903), 437.

A letter from a full officer in Maxwell's Brigade (American) at Elizabeth Town states that "The enemy have embarked to full regiments, and the vessels have fallen down with them to the Hook;" also that they "have information by deserters this day, that the enemy have evacuated Powles-Hook and Hobbuck; so if they have not post left in Jersey, they were also evacuating Fort Washington, for Independence, and their other works were abandoned some days ago."—N. Y. Jour., N 24, 1778. It is even supposed by the Americans that "New York will be evacuated by the enemy in the course of this week, wind and weather permitting."—Ibid., N 9, 1778.

Admiral Byron's squadron, consisting of 13 Line Ships and one 50, sails "to Cruise for Moner. D'Estaing off Boston."—Kennel's Jour., 1778.

A fleet of 122 sail, under convoy of the "Leviathan," puts to sea.—Ibid., and Montressor's Jour., 514. See also O 23.

An advertisement reads: "All Gentlemen Volunteers, That are able and willing to serve his Majesty King George III. For two Years, or during the Rebellion, in the Honourable Corps of Pioneers, now lying at New-York, under his Excellency Sir William Erskine, And Commanded by Major Simon Frazer, Let them repair to the Bull's Head, in the Bowery; or at the Tryon's Arms, in the Broadway; or at the Queen's Head, Brooklyn Ferry; or at the Sutting House, Kings Bridge. ..."—N. Y. Merc., O 19, 1778.

Beginning on this day (according to Valentine), Gen. Clinton occupied the country-seat of Dr. James Beekman, on the East River near 53d St., for three years and a half.—Man. Com. Coun. (1854), 554.

Washington writes to a friend: "The Enemy have been very busy since their return from the Jerseys in Imbarking Troops—Nine Regiments are committed to their full establishment by drafts from some others which are reduced, & these I am persuaded are destined for the West Indies—whether the rest of the Troops will remain in New York—return to England—or go to Halifax is yet matter of uncertainty.—Appearances seem to favour a general evacuation of the City but the Matter is by no means certain."—From original letter in Emmet Coll. (No. 9120) of N. Y. P. L.

Gen. Alexander MacDougal writes from Frederickburg to Gov. Clinton at Poughkeepsie: "The Enemy have sent from New York a fleet of 150 Sail of Transport ships on board under convoy of a number of men of war [see O 19]. As their destination is uncertain and the Fleet at Boston may be their object, and the release of Gen. Burgoyne's Army, General Gates with his Division has marched from Danbury to Connecticut River there to wait events. Three Brigades march this morning for Farmington under my orders for the like purpose; but I am confident we shall soon return the Enemies to the Country and be guilty of so much folly as to attempt an Enterprise of that Nature at this late season. As the merchants are not preparing up in New York, nor the Hospital removed, the Enemy do not yet intend a total evacuation. But I think it must take place, when the Court of Great Britain are advised of the Loss of Dominica. General Putnam is playing the old preposterous Game with Flag, attended with such Circumstances as indicate more than mere Folly. In short I begin to suspect his..."

"This Command to Lieut. Col. Campbell gives cause of great Complaint to Brigadier Leslie, Col. O'Hara, &c., of the Guards, Senior Officers."—Kemble's Jour., 166-60.

"General Officers and Commander in Chief in general upon bad terms: want of steadiness in Commander in Chief. The Sailing of Transports with Troops and their destination not secret enough, for tho' no absolute publication of them, yet from circumstances they may be guessed at. Commissioners and Commander in Chief on not the most Cordial footing: neither is the former with the Admiral; but that does not surprise."

"This day Colonels O'Hara and Stevens, of the Guards, proposed to go and settle a mode of Exchange of prisoners with the Rebels."

"Mr. Washington has crossed the North River, and proposing to proceed to the Southward; thought in consequence of our Expenditure going to that part of the Government. Our prisoners removed also from the East to the Southern Colonies."—Kemble's Jour., 166.

Regarding the dissatisfaction with the commander-in-chief, see also ibid., 156.

"Permission will be granted by the Commandant, to Refugees and others, to cut Wood on Long-Island, for the use of this City, on the Lands of Persons not under the Protection of Government."—Royal Gaz., N 14, 1778.

"John Colles," at "No. 20, Golden Hill, opposite the sign of the Unicorn," advertises to make "Miniature Profiles." He says: "Having had the honour of taking off the Profiles of many of the Nobility in England and Ireland, begs leave to inform the ladies and gentlemen in New York, that he takes the most Striking Likeness in Miniature Profiles, of Any Size, at so Low a Price as Two Dollars each, framed and glazed: A specimen only (which may be seen at Hugh Gaine's) can furnish an idea of the execution."

"Hours of attendance from 10 o'clock in the morning till 4 in the afternoon. It requires only a moment's sitting."—N. Y. Merc., N 9, 1778; Cf. Dunlap, Hist. of the Arts of Design (Goodspeed ed., 1918), III: 291.

Prisoners to Lord Stirling: Henry Laurens that Sir Henry Clinton is absent from New York; he believes that Clinton sailed with the fleet on Nov. 3 (q.v.). Stirling adds: "On Monday and Yesterday Ships have been dropping down from New York to Staten Isle they amounted Yesterday afternoon to near one hundred Sail, a Considerable Number of Hessians besides other Troops are on board, but very few Ships remain in the harbour of New York. From the testimony of "a British Soldiers wife whom we took near poules Hook," it appears that the Hessians Embarked three days ago, that the troops had all Marched from Kingsbridge leaving their Huts Standing and that there remains no troops above three or four miles above New York."—From a letter preserved in the L. I. H. S.

"A New York fleet is now in Motion, thirty Eight Sail of Ships dropped down from Staten Island to Sandy hook Yesterday afternoon, and I doubt not the rest, making in the whole about One hundred Sail, will follow with this Mornings Tide."—From a letter from Lord Stirling to Henry Laurens, in the L. I. H. S.

"Captain Fielding, of the Diamond Frigate, one of Admiral [Byron's] Squadron, came in this day," bringing recent news of the British fleet. "Captain Fielding thinks he saw the French Squadron, and supposes by their Course intended for the West Indies; should Mr. D'Estaing have intelligence of General Grant's Destination [see O 27, and N 3], we have much to apprehend for his safety."

"Admiral Byron was left by Captain Fielding making the best of his way to Rhode Island with nine great Ships, and one fifty."—Kemble's Jour., 166-67.

"Lord Stirling writes from Elizabeth Town to Henry Laurens:"

"The fleet which dropped down to Sandy hook on the 12th [see N 15] remained there yesterday Evening; the Winds have been either ahead or too high, for anything to put to Sea. They have on Board this fleet, the whole of the 71st Regt Highlanders, two Battalions of Hessian Grenadiers, two Bat's of Delancy's two of Skinner's New Levis, three Companys of the 64th [sic]; two of the 25th they were Convoyed by the Vindict and three Gallys; It is said they are Watered for a fortnight only and talk of Coming back soon; But from a Variety of Circumstances (I think) their Destination is East & West Florida. Colonel Campbell now a Brigadier Commands them."

"Sir Henry Clinton is returned to New York he had been to Long Island in order to Vise and Mark out some Grounds. It is
THE ICONOGRAPHY OF MANHATTAN ISLAND

1778 now said, the Refugees are to form a line on that Island from Nov.
15 both about 40 Miles from New York, and to be supported by three British Regiments which are lye in their Rear."—From original letter in Emmet Coll. (No. 8157) of N. Y. P. L. The fleet sailed on Nov. 27 (q.t.).

20 Kemble observes: "Provisions, &c., very short, the Navy put to two-thirds Allowance, the Army Stores not over plenty. The Admiral a Money getting Pompous fool, and the Schemes he makes use of to fill his Pocket very much unlike an Officer of his Station."—Kemble's Jour., 167.

25 From New York to Joseph Galloway, London, on Nov. 23, Abel Evans states that, from a vessel which reached New York on the 15th, he learned that "the Count [D'estaing] sailed from there two days before him, (the 4th inst.)" generally thought for the West Indies. Admiral was not able to prevent it, being blown off the harbor in a gale of wind, and is since got into Newport. He continues: "The Refugee scheme so much talked of when you were here, seems to be dropped—nothing being said of it—and a proposal is made them by General Robertson to go near Huntington to cut wood off Rebel estates, for the supply of this Garrison. . . ."—Hist. Mag., 1st ser., V: 295. See also ibid., 296.

27 Writing again to Sir Joseph Banks, Sir Charles Blagden says: "I hope . . . [Mr. Eden] will bring you this safe, after escaping, with his companions the dangers of a winter's passage, &c. of a powerful enemy who insults us even in the Channel: How unsuc-

cessful the Insurrection has proved is a piece of bad news which will arrive long before them. Their departure will be much regretted by all ranks of people in this Place [New York], to whom their con-
duct has greatly endeared them. There are some appearance as if we should follow them before next summer; & I fear it will prove highly fortunate for our country if we remain here long. All the detachments are gone away, excepting a body of 2,000 men, under Col. Campbell, well known for the long imprisonment he suffered at Boston. This body of troops were just on the point of going to sea, when a gale of wind arose, which did some damage to the shipping that they are now detained to repair. They are supposed to be destined first for Georgia, & then for Florida [see N 7]. Part, if not the whole, of D'estaing's Squad-
ron is got out of Boston [see N 6]."—Owen, in the course of the year 1778, on the account of Gen. Grant's detachment of 5,000 men, which sailed from hence [see N 3], for the West Indies it is said, about the same time that the French left Boston. . . . Gerard's dispatches to the Court of France, written in Cipher, are taken by the Daphne. The Somerset, a sixty-four, is shipwrecked on the coast of New-England in a gale of wind."—From original letter in N. Y. P. L, printed in the Library's Bull. (1903), 438-39. Regarding the "Somerset," see also Kemble's Jour., 167, 174.

28 From Regency, a loyalist, to Joseph Galloway, London, an account of the military situation to this date, adding this statement: " . . . The Remaner of the Troops are gone into Winter Quarters, there are near 1000 on Long Island, these consist chiefly of the light Troops & Dragoons. I dread the consequence to New York from the Destruction they make on Long Island, I think it will be felt severely the next Spring. . . ." A Regency has ended a whole campaign without any thing Capital being done, or even attempted. How will the Historian gain Credit, who shall relate that at least 24,000 of the best Troops, in the World, were shut up within their Lines, by fifteen thousand at most, of Poor Wretches, who were ill paid, badly fed, and worse cloathed, and scarce at best deserved the name of soldiers—but I forbear." Continuing his account of events and British prospects, he says, in part: "The Rebellion hangs by a Slander Thread. The Majority of the Inhabitants dissatisfied with their present Tyrannical Government—Their Money depredat-
ing—Provisions scarce & that scarcity increasing— . . . In this situation, what is necessary to Crush the Rebellion? It is easily answered—Only one Vigorous Campaign properly conducted. I see this to be the Point, that the Peaceable Men of Judgment Spirit & Enterprise, and one who would make himself acquainted, with the Geography of the Country (which has hitherto been a fatal Neglect) & a few more Troops to Supply the place of those gone to the West Indies . . . ."

32 There has lately been made a Calculation of the Refugees, within the Lines of New York, & including those that have joined the Provincial Corps, they amount to upwards of ten thousand. The most of these Persons have from their Attachment to their Sovereign, abandoned their fortunes, and from Aflfluence are re-
duced to Indigence, which they hear with Patience, in full Confid-
ence that the Faith of Government, & the Promises of Protection, repeatedly given them, will be sacredly Observed. . . ."—Hist. Mag., 1st ser., VI: 376–38.

A printed handbill states that "At a Late Meeting of the Mer-
chants of this City, it was represented that the Inhabitants were particularly desirous of expressing the high sense they entertained of the merit of his Majesty's Commissioners [see Ap 5], and to ex-
plain their sentiments on the very important situation of affairs. For this purpose a numerous and respectable body of people were convened at Hick's Tavern, on Friday the 20th instant, who chose a Committee . . . it is desired that you would prepare an Address," In substance it was an expression of gratitude for the commissioners' services in America (see Je 3), but more particularly an appeal for the re-establishment of civil rather than military government. The answer of the commissioners, which follows the address in the handbill, says, in effect, "that the great objects of the war, are the re-establishment of the civil constitution, and the preservation of his Majesty's faithful subjects in these colonies."—From B. F. Stevens's Facsimiles of Manuscripts in European Archives Relating to America, 1773–1783 (London, 1893), Vol. XII, No. 1236. Regarding the condition of affairs in New York which occasioned this appeal, see Van Tuyck, The Loy-
alists (1902), 249. See also N. Y. T. M., S 21 and O 26, 1778; Royal Gen., S 23, 1783; and V 1778. From the former three the dia-
ry: "The Commissioners embarked yesterdays in the Roebuck. Their Departure is grateful only to the Violent in opposite Ex-
trems, both under the Power of vindictive Rage. Alas for my Country! En quo Discordia Civis perduxit Mieros! This will be probably a Day memorable for the Miseries which the Disap-
pointment of the Embassy will produce."—Wm. Smith's Diary, VI: 1.

From New York to John Arthur, on board the American Expedition, in the beginning of November, I hear from Boston, that an expedition will be shortly set on foot for the Southern Colonies—supposed South Carolina.—They have been long waiting for Reasons unknown."—Wm. Smith's Diary, XVI: 1.

Avery's Hist. of the U. S., VI: 208. Recording this departure Smith writes in his diary the next day: "With the Com's several Vessels put out with 4000 Troops under Col® Campbell tis said for an At-
tack on the Southern Colonies—supposed South Carolina.—They have been long waiting for Reasons unknown."—Wm. Smith's Diary, XVI: 1.

Avery's Hist. of the U. S., VI: 208. Recording this departure Smith writes in his diary the next day: "With the Com's several Vessels put out with 4000 Troops under Col® Campbell tis said for an At-
tack on the Southern Colonies—supposed South Carolina.—They have been long waiting for Reasons unknown."—Wm. Smith's Diary, XVI: 1.
1778

yesterday morning and went to Sea in the afternoon they consist of 15 sail of different sizes, the Troops they have on Board are according to the best Accounts I have been able to obtain about 3500 Men. The troops in this fleet are Commanded by Brigadier Cabell; it is possible they are going to Charles Town, but I am rather inclined to believe they are going to Secure their own posts in the Florida’s. From the original letter preserved in the L. I. S. To another letter of the same date, Stirring writes that the fleet consists of 31 Ships (including one of 40 and one of 60. Guns and two Frigates) one Snow, nine Brigs and ten Schooners and Sloops.

He adds “At eleven this morning two Ships past the light House and went to Sea these I take to be the Roebeck and a frigate as I have Intelligence from New York that the Commissioners and merchants are on Board two such Ships and dropped down the Part of the Way Yesterday. This last Fleet I do not believe are designed for any offensive Operation on our Settlements their Convoy is not equal to it.” From the original letter in the L. I. S.

The commissioners were sailing on the “Roebeck” for England, and Cornwallis was on the same ship.—Robertson’s Private Jour. of the Campaign of 1778 (MS.).

18

Since pervious letters (see N 257), Stirring has received information “that more Transport Ships are preparing and fitting for Sea that a good deal of Hessian Baggage was embarked. A Frigate of 36 Guns came in Yesterday every Mast gone by the Board. They are forming a Line across New-York Island from Bloomendale to Turtle Bay to be guarded by five Hessians and three British Regiments.” From Stirring’s letter to Henry Laurens, preserved in the L. I. S.

Chas. Stewart writes from New York to Joseph Galloway, London: “There are at present about 2000 going under Sir William Erskine—said to the east end of Long Island. Yesterday, intelligence was received from St. Augustine, that there is an expedition going from thence to Georgia...”—Hist. Mag., 1st ser., VI: 256.

The following notice is issued by Supt.-Gen. Elliot and Mayor Mathews: “By Order of the Commandant of New York. Licences will be granted by the Police, to such Persons to keep Taverns and Public-Houses (not exceeding a certain Number) as may be recommended by the principal Officers of the Army and Navy, the Merchants and other respectable Inhabitants of this City.” Licensed selling Liqueurs, from and after Saturday the Twelfth Day in December, Instant, shall suffer One Month’s Imprisonment, or forfeit Five Pounds.

“The Money arising from the above Licences and Fines, is to be paid into the City Funds for the Support of the Poor.”—N. Y. Merc., D 21, 1778; Man. Com. Cong. (1863), 664.

In a letter to Henry Laurens, Lord Stirring declares that if the report of a French naval victory over the English should prove to be true, “poor old England must soon Sing piano.” He thinks that “Such favourable Events as lately appear, will Command a General belief with Tories as well as Whigs that the Contention with Great Britain will soon terminate in our favour to our Utmost wishes. this makes me rise in hope that the Spirit of Avarice will be Glutted with all my Soul I wish it may be Smothered.” —From the original manuscript in the L. I. S.

2

“In the Evening the Guards & Robinson’s Provincialis embarked on board Transports in the East River in order to go to Kings Ferry to cut off some of the Rear Guard of the Rebel Army there passing to the Jerseys. .. The Transports got no further than Greenwich.”—Robertson’s Jour. (MS.).

3

Brigades of Guards, Grenadiers, and Light Infantry were ordered to Embark at 7 next Morning, 63d, 44th, and 7th. British, Regiment of Mirbach, and Volunteers of Ireland, to march at same time to Cortlandt’s House.”—Kemble’s Jour., 167.

Robertson states: “St Wm Erskine march’d to Courtlands house. .. I went with the Genl. in the Event to F Knyphausen. The Transports did not get through the Chevaux de Frises Embarked on board the Shuldam Sloop about 11 at night off Spiken Devil creek.”—Robertson’s Jour. (MS.).

4

“A Report that a Store Ship is on Shore at Barnegat—carelessness or Perfidy—The Weather fair—There is a perpetual Negligence in not employing American Pilots and Seamen...”

“Not known till this Morning that 5 or 6000 Men are detached & going up the North River—No orders issued last Night—Some Ships & Troops gone up last Night with the flat bottomed Boats.”

“No Person can tell the Design—Suspected to spread on the West side of Hudson’s River to favor the Flight of Burgoyne’s Men from the Guard conducting them to Virginia—They crossed at Fishkill on Monday or Tuesday last. Several who fled are come in & tis supposed urged to this Sally.”—Wm. Smith’s Diary (MS.), VI.

5

“Sir Henry proceeded up North River with the Troops Embarked, and Sir William Erskine Marched from Cortland’s with the Troops above mentioned [see Dec. 3] to Tarry Town.”—Kemble’s Jour., 167. Sir Henry landed at Stony Point, the object being “to cut off some of the Rebels conducting the Convention Army to the Southward” (see Nov. 9; they returned, unsuccessful, to New York on the 6th. “Sir William likewise returned.”—Ibid, 167-68.

The British land at Stony Point, opposite Verplanck’s Point, but find that the Americans have already passed. They therefore returned to New York.—Robertson’s Jour. (MS.), under D 5, 6, and 7.

The Movement up the River is made with great Secrecy. To this Minute it is an Uncertainty whether the Design is not against the Highland Forts. Spades Pick Axes & Bills went off yesterday. The Cannon in the Bridges have been removed & the Men are not to be seen. They have been found np or more of the Divisions & by the Way have received such as had fled from them to the Mountains with Design to escape to New York.”

“I now suspect that solicited by Messages to come out the General complied to avoid Censure—& that having gone 40 Miles up the River he thinks he has done enough to satisfy an Administr. & ignorant of the Geography of the Country.”—Wm. Smith’s Diary (MS.), VI.

A New Yorker writes that “The Rebellion in general is more languid now than it has been at any time since the unfortunate affair at Trenton, in 1776 [25], D 26], owing to a failure in the resources of war among the Rebels, and the discontent on various accounts, amongst the people at large.”—Lloyd’s Eve. Post, F 3-5 1778.

3

The three “Officers of Police” (the board consisting of Supt.-Gen. Elliot, Mayor Mathews, and Asst.-Magistrate Dubois) issue, by order of the commandant, a proclamation establishing a new set of rates for the city cartmen (cf. Dec. 29, 1777). These include an order that any person who, after Dec. 20, “shall be discovered acting as City Cartman, without having obtained such a license, and the number of his license marked with red paint upon each side of his Cart, will be taken into Custody.”—N. Y. Merc., D 14, 1778.

Wm. Smith publishes the following signed notice: “When the subscriber retired to Haverstraw, in March 1776, he left in his house in the Broadway, at the corner of Verlentenberg’s, various articles of Furniture, with two Trunks of Parchments, and many Bundles of Papers in about 40 small round boxes, numbered in the fronts. He is informed that they were moved out of town in August 1776, but can’t discover who has at present the custody of them. There were also taken away, Dr. Mitchell’s large Map of North-America, Mr. Rate’s Map of the city, and a manuscript Map of the colony of New-York; among the papers, there are some of great consequence to the estates of many persons in town, and country. Satisfactory information, especially concerning the parchments and papers, will be gratefully received and rewarded.”—N. Y. Merc., D 7, 1778.

To encourage farmers to bring their hay, &c to New York, George Brinley, the Commissary of Lorange, increases the price which he offers for these essentials, as follows: “For good Upland Hay, 8. s. per cwt.;” “Salt Hay, 4. s. per ditto;” “Straw, 3. s. per ditto;”
1789.

Indian Corn, 10 s. per bushel; "Oats, 7s. per ditto." He fixes the Dec.
rate for carriage or water carriage at 2 s. 6 p. per ton. The farmers
9 to make their deliveries "to the most contiguous Magazines, where they will receive certificates for the quantity delivered,
which will be paid at the Forage-Office." If "found delinquent after the Magazines," the farmer will have their forage taken, and no receipts given."—N. Y. Merc., D 14, 1778. In 1785, according to a forage office order of June 29 of that year, the payment then offered was somewhat less.—Royal Gaz., Jl 3, 1782.

Rev. Charles Inglis writes from New York to Joseph Galloway, London, a lengthy survey of the military and political condition of after this notice," the farmers will have their forage taken, and no receipts given. —N. Y. Merc., D 14, 1778.

Tryon is alarmed—Like to be a Scarcity of Beef & Bread in about
Westmore will off for foreign. If the Corf Fleet hourly expected should be driven off the Coast there will be great Dis-
tress. —Wm. Smith’s Diary (MS.), VI.

Describing American affairs at the close of the year, Daniel
Coxe, writing to Jos. Galloway, London, says, in part: "... Washingtons Army is at present much dispersed in their Winter Cantonments the whole not exceeding 7000 Men from the best In-
formation I can collect. This State, York, retains its own Troops at Albany & different Posts on the Rivers. The New England the same in order to protect their country; Washington fixes its [his] Head
Quarters in Jersey at Bucksbridge, Lord Sterling’s place, with about 7000 Troops occupying Hackensack, Aquaconnonck, Newark,
Elizabeth Town extending to Amboy & Brunswick, and including two Virginia Brigades (about 1400 men) posted on the Raritan at middle Bound Brook & Mountain Gap, as support to the others. — Hist. Mag., 1st ser., V. 357.

John Potts, writing from New York to Jos. Galloway, London,
says, in part: "... Our situation is really desperate in my Opin-
ion, I entertain the highest sense of the honour of Government, but when I consider the number & every circumstance occurs to me
I cannot help thinking that the situation of the Refugees is truly
derisible. —Hist. Mag., 1st ser., V. 356.

A sloop "Iaden with Arms and Gunpowder, bound from the Missippi to Philadelphia, was brought into this Port by the Columbus" (a British privateer).—N. Y. Merc., D 21, 1778.

"It is reported this Day that Laurens has resigned his Place as
President of the Congress & that John Jay succeeds him. This is
another Proof of the Weakness of the Faction. The Congress is
approaching the Ruin as their Powers fall into the Hands of the
most violent. Men of Property & moderation shun away from
their Trusts, of which all were lately desirous."—Wm. Smith’s
Diary (MS.), VI.

"John and Isabella Roberts Return Thanks to the Customers
that used to frequent the House kept by Moses Marden, known by
the Sign of Tryon’s Arms, at the Corner of Crown-street, Broad-
way; and they acquaint the Gentlemen of the Navy and Army, kec.
that they keep a Western and Ordinary in said House, where
the best of Liquors are sold, Dinners on the very shortest Notice
Rdslish always ready, and the best Attendance. ..."—N. Y.
Merc., D 21, 1778.

The benefits of pardon for treason are offered, by a proclama-
tion of Gov. Tryon, to persons who will withdraw from the "re-
bellion," and "come in from the rebels" after Dec. 20th.—N. Y.
Merc., Jl 4, 1779.

A New Yorker writes: "The arrival of the packet has raised
our spirits exceedingly. The Admiral has now consented to permit
privateers to go out under particular regulations. Prizes are daily
sent in. ... The winter has set in with uncommon severity: I
write along-side a good fire, and yet the inkFREEzes in my pen. ...
The Rebels industriously propagate a report of their having
obtained a loan of four millions sterling from Holland, on French
security; a report which I utterly disbelieve. Their national debt
amounts now to about six millions sterling."—Lloyd’s Eve. Post,
P 3-5, 1779.

Smith writes: "A violent snow storm with the Wind in vast in
Power from the N. E. This Evening the Bedford & Amazon fell
down with a Fleet for England & Ireland."—Wm. Smith’s Diary
The Fleet sailed yesterday, 7 Vessels lost in our Harbour in the
Storm. Three Centinels found frozen in their Boxes."—Ibid.
A London news item stated in January, 1779, that "Ten thou-
sand Regulars, and between 8000 and 7000 Provincial, were left at
New York when the last ships sailed from thence on the 28th of
December."—Lloyd’s Eve. Post, Ja 27-29, 1779.

1779

The British barracks of this period were of wood, enclosed by
a high fence, and extended from Broadway to Chatham St., along
the present Chambers St. They had a gate at each end; the one by
Chatham St. was called "Tryon’s Gate," from which was after-
ward built Tryon Square. A notice in the New-York Evening Post
of Nov. 1779, states: "Thirteenth day of November, 1779. Wm. Wirt,
Mr. Amos Augustus Phelps, MM., at the Print office kept by
Wm. Wirt, on the 12th instant. The amount of patents, licenses,
and Certificates, delivered to the above, amount to one and a half
hundred.

Claude Joseph Sauther’s "Chorographical Map of the Province
of New York in North America, Divided into Counties, Manors,
Patents and Townships; Exhibiting likewise all the private Grants
of Land made and located in that Province; Compiled from Actual
Surveys deposited in the Patent Office at New York," which was
drawn by order of Maj.-Gen. Tryon, and engraved and published
by William Faden at London, bears this date. Upon this map,
Ellis Island appears as “Bucking I.” For the origin of the name
Ellis Island see, Faden, Map, P 22, 1785. The "Patent Office" here referred to is
the provincial secretary’s office, or a department of it, where
land patents were filed. For the act establishing the U. S. Patent Office,
see Ap 15, 1790.

Rivington publishes an "exhortation" in verse, signed "M-
L—n," apropos of an order issued by Washington requiring the inhabi-
tants of certain districts to fatten their cattle, in order to
feed his army during the ensuing campaign; it reads in part:
"Thy Proclamation, timely to command
The cattle to be fattened round the land,
Bespoken thy generosity, and shows
A charity that reaches to thy foes!
And was this order issued for our sakes,
To treat us with roast beef and savory steaks?"

—Royal Gaz., Jl 3, 1779.

In imitation of the queen, the Marchioness of Granby, and the
six ladies of Westminster who own the "Amazon," all of whom
have recently equipped private ships of war at their own expense,
CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

Jan. 1779. “to assist in humbling the pride and perversity of France, and in chastising the rebels of America,” a number of ladies residing in New York proposed, at a private sitting, to be called “The Fair American.”—Royal Gaz., Ja 6, 1779. Apparently the name of the privyer was subsequently changed to the “Royal Charlotte” (see F 4).

Maj. André, a social favorite in loyalist circles during the British occupation of New York, delivers an extemporary address on “Landing at Cadiz.” At a gathering this evening at the manse of Mr. (Richard?) Deane. On the same occasion he read a “Political Dream,” a violent and coarse attack upon prominent American leaders of the time. This was shortly afterward printed in Rivington’s Royal Gaz. In this paper he adopted, as a basis for his criticisms, the theory of metamorphosis, that when men “degraded themselves from the character of rational beings, it became proper that they should assume the figure of those beasts to whom properties they were already assimilated,” and that the soul should be “rewarded or punished according to its deserts in a new state of existence.” From these premises he transported himself in imagination into a court where “the infernal judges administered justice to the souls which had animated the bodies of men in the superior regions.” First among those whom he pictured as thus arraigned was Chief Justice [Thomas] McKean of Pennsylvania; and “his more than savage cruelty, his horrid disregard to the many oaths of allegiance he had taken, and the vile sacrifice he had made of justice in the interests of rebellion were openly rehearsed,” while “he was condemned to assume the shape of a bloodhound” and be scourged through the infernal regions by his victims. Silas Deane, characterized as “a trickling, hypocritical New England attorney,” was one of the few whose spirits “were not subdued to the slip of the tongue and the title of the character: ‘the monkey who had seen the world.’” Gen. Charles Lee was held up to condemnation as one “whose ingratitude to his country was regarded with the utmost detestation,” and by direction of the court he assumed “the figure of an adder, a reptile that is big with venom and ready to wound the hand that protects or the bosom that cherishes it, but whose poison freeway struck to its own destruction.”

André next saw that “the black soul of [Philip] Livingston, polluted with every species of murder and impiety, was condemned to howl in the body of a wolf.” John Jay, president of the provincial congress, was the next subject of the writer’s vituperation. Jay was described as “remarkable for a mixture of the lowest cunning and most unfeeling barbarity.” He had, by a semblance of virtue, acquired the confidence of his fellow-citizens, which he afterwards abused to all the horrid purposes of the most wanton rebellion, and, in the pursuits of ambition and avarice, by all the ways of intrigue, perversity and dissimulation, he had acquired the station of a chief-justice, and in imitation of the infamous Dudley had formed and enforced statutes that destroyed every species of justice. Jay was later reported to have said, “If this criminal should transmigrate into the most insidious and hateful of animals, a snake; but...a large set of rattles was affixed to his tail, that it might warn mankind to shun so poisonous a being.”

After a review of the continental army, “forced to put on the shape of the timid hare, whose disposition they already possessed...and ready to be even at the approach of danger,” André concluded his sanguine tirade by an attack upon “a great and magnificent commander of antiquity [Sir William Howe] transformed into a game-cock who at once began to crow and strut about as if he was meditating a combat, but upon the appearance of a few croppe-crowned hens he dismissed his purpose...brushing his wing and rustling his feathers at every Damn Pairket in the company.”—Life and Career of Major John André, by Winthrop Sargent (Boston, 1861), 212-16; Rivington’s Royal Gaz., Ja 21, 1779.

A notice is published directing the “distressed Refugees” to call at “the Police Office in Smith’s Street” on Thursdays, when the money collected by subscription for their relief will be distributed.—Royal Gaz., Ja 6, 1779. For the original announcement of the fund see D 15, 1778, and J. Corré, Pasty-Cook, has opened his shop, at No. 239, facing Mr. Gaino’s, Hanover Square, where the Ladies and Gentlemen will be supplied with all sorts of Pastry Cakes, Sweet-Meats and Jellies, &c.—Royal Gaz., Ja 6, 1779. On Jan. 10, 1780, Corré advertised “he also sells Raisins, Currants, and Almonds, &c. With superfine flour by the Barrel.”—N.Y. Merc., Ja 10, 1780.

From this time until long after the Revolution, Corré was one of the principal caterers of New York. See My 22, 1782; My 30, 1783; Ja 10, 1788.

France being at war with England, Lafayette sails from Boston to his native land. This was in accordance with the leave of absence granted by congress on Oct. 24, 1778, at which time congress also voted that “an elegant sword” be made and presented to him in the name of the United States.—Tower, Marquis de Lafayette in The Am. Revolution, II: 49-50; Jour. of Cong., III: 98. See Ap 28, 1780.

Kemble records: “Arrived one of the Cork fleet, very acceptable, as the Troops had been fed for three weeks on Oaten Meal, and some Detectors from the Hessians the cause of it; these Detectors carried some of their Oaten bread to show the Rebs what they were fed upon.”—Kemble’s Jour., 179. The rest of the Cork fleet arrived from the 9th to the 13th.—Ibid., 179. See also letter of Isaac Ogden to Joseph Galloway, in Hist. Mag., 1st ser., VII: 179.

The season at the Theatre Royal opens with a performance of the tragedy “Chrononobothanologos.”—Royal Gaz., Ja 6 and 13, 1779. At this reopening of the theatre, the prologue was spoken by Capt. (soon after Major) André—Wilson, Mon. Hist. N. Y., III: 537-38. There is preserved in the New York Public Library a broadsheet (MS.) entitled Receipts of the Treasury of the “Theatre Royal,” John St. New York, A. D. 1779. The book was kept by Thos. Barrow, the treasurer, and is replete with data for the student of such matters. The receipts for the opening performance (260:16) and subsequent performances appear. Names of prima donnas, including Maria Turner, Anna and Jane Tomlins, and Mrs. Marsden, are mentioned...”)

The news was published in Philadelphia, on Jan. 21, that “About 10 days ago [Jan. 10 or 11], a small party of Americans, under the command of a Mr. Buchanan, went down the North River and landed near the City of New York, went to the quarters of Gen. Clinton, at a place called the Bowerie, one mile from the City of New York, where they surprised his guards, and brought them off; but Gen. Clinton having escaped from home escaped.”—Penn. Packet, Ja 21; Conn. Gaz. (New London), F 12, 1779.

This is probably a “misprint” for a report that the British commissioner-general of naval prisoners—see O 13), writing from New York to Joseph Galloway, London, says, in part: “The price of Fire-wood is limited at Five pounds a Cord [see N 28, 1778], but it’s not to be got. [See further D 20, 1779; Ja 20, F 19, 1780.] Irish Pork at 50¢ a bbl., Beef at 58, and fresh flour will bring 52¢ p. bbl. Our markets have been pretty fully supplied with fresh provisions from Long Island &师兄, for they run all riques for a little of the hard money—but what would become of us should a Cork fleet miscarry—which sooner or later may be the case—the army would eat up the market and the inhabitants would starve. We have had this prospect staring us in the face for sometime past, but thank God yesterday and to-day a fleet of Victuallers arrived, otherwise we should not have had a mouth full in a short time....

We have now fix’d a Refuge Club [see also D 15, 1778; D 22, 1779], meet once a fortnight at His’l Tavern, the Members are respectable people from each Colony—Governor Franklin in the Chair. We talk freely of Politics, tell all the News, and are for the time happy.

To know or must have heard that I was the person who opened Independence (and that in the Month of May and to the declaration) on the Commons of Philadelphia in the face of five Battalions of Americans, and was his’o[ff] the Parade—that I maintained my integrity and at all times refused to Acquise in any of their proceedings, until I was obliged to flee to this place for refuge...”—Hist. Mag., 1st ser., V: 363.

By order of the commandant, it is announced that vendue-
1779 masters, after Jan. 20, shall be licensed by the "Officers of the Police," before whom they shall take oath not to be concerned in any office or sale in order to raise the price of any article of trade or provisions. Security also, in the sum of £5,000 currency, is required for the faithful execution of their duty as well as the security of their employers. Among the other regulations in the order are these: "Shipping and other materials, naval stores, prize-goods, provisions and liquors of all sorts, cabinet-ware, and the effects of stolen goods, may be sold on the wharfs, or near the Coffee-House Bridge [cf. P. 69, Vol. I], by the licensed Vendue-Masters. "Dry goods, and all other goods that do not come under the above denominations, when intended for Public Vendue, are only to be sold in Auction-Rooms provided by the licensed Vendue-Masters, for that purpose. "Permissions will be granted to any of the licensed Vendue-Masters when required, for the disposal of household furniture at private houses."—Royal Ga., Jan. 16, 1779.

13 A letter written from New York to a Gen. on Jan. 16 stated that "A Dutch ship of 400 tons, laden with double-headed grape and small shot, and several hundred bales of woollen cloth, was brought in here the 13th instant by the Delight cutter. It appeared very evident, on examining her bill of lading, she was bound to Charles-town."—London Chron., Feb. 2-4, 1779.

14 By order of the commandant, a notice of the rates of ferriage brought into New York, and Brooklyn, and issued at the "Office of the Police," signed by Supt.-Gen. Elliot, Mayor Mathews, and Police Magistrate Dubois. For example, for every person, 6 d.; for every "Gammon of Bacon, Turkey, or Goose," 2 d.; for every "Piece of Cotton, Pennisette, Hanne or Frize," Broad Cloth, Kersey, Strouds, Halfhicks and Druggets, 6 d.; for every "Piece of Duryes, Callimacrons, Shollens or other stuff," Garnis, Holland, other Paisley, or "Hustled of Fish (called Sheep's head)," 4.1. for every "Hundred of Bass or Shad," 2.5; and for every "Dover of Perch," 2 d. If "any Ferryman" shall demand or receive more than the rates prescribed, report is to be made to the "Officers of the Police," that the "Officers of the Police" may be brought to punishment."—Royal Ga., Jan. 16, 1779.

15 John Hales, "Late of Philadelphia," opens a tavern "at the corner of Nassau in King-street, near the Main-Guard, known by the sign of the Tally-Holl"—Royal Ga., Jan. 16, 1779. Before Nov. 9 of this year, Hale or Hales was ordered to give up possession to "make Room for the Troops." His protest to Gen. Patterson sets forth that "the House was allotted to him by an Order from Head Quarters, immediately after the arrival of the King's Troops from Philadelphia, with great consideration of the troops' health, and Loyalty, being obliged to fly & leave his Property behind—that the House when he took possession of it was so ruinous a Condition as obliged him to expend upwards of £300 before it became habitable. . . ." Patterson, in response, wrote to Col. Clarke recommending that if it should be found necessary for Hale to give up the house, reasonable indemnification should be made by the "Barrack Office" for his expenses. From "Letters of Gen. Pattison," N. Y. H. S. Collections (1875), VIII: 294. Hale was still keeping tavern in the city on Sept. 6, 1780 (q.v.).

16 A private letter from Morristown states: "The British troops and inhabitants at New York have been in the greatest distress for want of bread [see Jq 9] . . . It is also reported and believed that rations are issued to 10,000 men, women and children, besides what the troops draw at New-York, Long Island, &c."—Penn. Packet, F. 4, 1779.

17 "There is a Scarcity of Provisions and Provender—N. England in Distress for Bread—They come from beyond Boston and the Sea Coast of Connecticut to this Colony for Flour, & they suffer but little to go out to the Eastward."—The Paper money $ and for corn. The colonists could purchase anything. Col. Livingston's lad refuses it—"Multitudes are distressed—Mr. Scott sells his Place for Provisions."—Wm. Smith's Diary (MS.), VI.

18 Maj.-Gen. Jones, commandant, reaffirms an order of Dec. 20, 1777 (q.v.), which required the farmers of Long Island and Staten Island to bring their wheat, rye, and Indian corn to market at stated intervals; and, as an encouragement to produce an ample supply, he orders that certain orders of provision shall be fixed in prices. For example, the farmers may charge 26 shillings per bushel for wheat, and 80 shillings per cwt. for wheat flour. After Feb. 1, no greater price shall be demanded or paid, on penalty of forfeiture of the grain or flour, or its value, and imprisonment of the offender until the forfeiture is paid, when one-half is to go to the informer and the other half to the poor of the city or the township where the offence is committed.

The order also requires that the police of New York, and the colonels of militia on Long Island and Staten Island, shall take an account of the quantities of wheat, rye, Indian coro, grain, flour, or meal, in their respective districts, noting in whose possession it is found, and shall report as soon as possible to the commandant of New-York.—Royal Ga., Ja 27, 1779. See, further, Mr. 27, and Ap 14.

An assize of bread is regulated by public notice of this date, signed by Supt.-Gen. Elliot, Mayor Mathews, and Police Magistrate Dubois. After Feb. 1st, "all the Bakers in this city are to make their Loaves of Two Pounds, weight," and no baker shall charge more than 22 copper for each such loaf. Each loaf shall be marked with the baker's initials. The weight of two pounds per loaf is for the convenience of the poor, and to avoid fractions in weight which rendered detections of fraud more difficult.—N. Y. Merc., Ja 25, 1779; Man. Com. Coun. (1865), 669. See Jl. 7.

Lieut. Von Kraft records in his journal: "In the evening I took a walk in New York and, on account of the flagrant excesses occurring there, took with me 2 soldiers which I had follow me at a little distance."—N. Y. H. S. Collections (1882), 79.

Kemble is informed that the "Rebel have a forty Gun Ship, two Nos. of 22 Guns, one of 12, and 6 out, crossing off the Delaware, supposed to Intercept the Romulus coming out with £200,000. . . ." He hears that the admiral has "sent to Rhode Island for Vessels to attack them," and asks: "why not send the Ardent out?"—Kemble's Jour., 177.

The Army & Town are in high joy on the arrival of Letters yesterday with Account of the Georgia represented as recovered.—Wm. Smith's Diary (MS.), VI. See also Kemble's Jour., 177, 175.

The city vestry gives public notice to persons hiring "the Houses, the rents of which are appropriated for the maintenance of the poor of this city," that they are not to transfer their interest without the consent of the vestry; and that no premiums are to be given or taken by such tenants for such transfers. Some of these tenants, availing themselves of the "rights of preference, they were entitled to by virtue of their pre-occupancy," have engaged houses for another year with no intention of residing in them, but "with a view of extorting extravagant sums over . . . the stipulated rents from the necessitous and distressed."—N. Y. Merc., F. 8, 1779.

Tryon, writing from "Out Post King's Bridge" to Lord George Germain, says that the "explorers in the letters of Marquis de L'Ozanne and encouragement of the Frenchmen, he suffered many hardship, but think that his Majesty's satisfaction . . . ; and that 145 vessels have been "taken by letters ofMarque, and brought into this Port, . . . since the beginning of last September, when the first ships were Commissioned," their value being over £20,000. See also Mr 1.

He commissions the "Royal Charlotte," fitted out as a privateer by the ladies of New York (see Ja 6) — N. Y. Col. Docs., VIII: 757.

The master of a transport which left New York on this day reported in Cork that "four sail victualers had been taken by the American privateers, and carried into Boston. Great numbers of refugees were coming to New York for support, being driven there by the policy of the Americans, in order to distress the place, by adding to the numbers already there, and knowing their want of provisions. Several ships have been brought in by the captains, none of them of any value, except a ship from France with bale goods, woolens, silks, &c. bound to Philadelphia."—London Chron., Mr 11–13, 1779.

During the Revolution, a tavern known as the "Defeat at Brandywine," was conducted on Golden Hill.—Royal Ga., F. 13, 1779. This may have been one of the taverns on Golden Hill which existed under the name "Golden Tree." Another tavern, on the corner of Long Island and Washington Street, was conducted by the same and occupied by the city of that name. Of such taverns, one was conducted by George Hopkins at the "Sign of the Orange Tree," Another tavern, adjoining the Orange Tree, was run by Mr. McGinnis. Edw. Bardin, for a brief period in 1779, was proprietor of the Golden Ton, at Beekman and William Streets, and undoubtedly other taverns existed in the vicinity, of which we have no record. See Index under "Tavern."
chronology: the revolutionary period: 1776-1783

1779
late as 13th, December . . . ; Reported also that a large Body of
Feb. Troops are coming out to America; beware, Rebels!"—Kemble's
Jour. 175.

23 A committee submits to the continental congress a draft of pro-
visions to be insisted upon in the event of a peace treaty between
the United States and Great Britain.—Jour. Cont. Cong., XIII: 249-44. Wisnor, VII: 89. The conditions of a peace were not de-
termined at Congress until Aug. (p. 22).

Kemble describes in his journal an expedition of the British
from New York to Newark where they burned the barracks and
court-house. The British admiral and general were present,
as well as Gov. Franklin of New Jersey.—Kemble’s Jour., 174. See also description given by Isaac Ogden in a letter to Jos. Galloway

25 June, 1801. "In General—march’d from King’s Bridge # 3 or 4 Regt# to Horse Neck [Greenwich, Conn.]
& on his return had about 50 men taken."—Robertson’s Jour.
(MS). See also Kemble’s Jour., 174.

There appears in the London Chronicle “A View of the Republic
of New York.” In a tone of ridicule, this long article opines thus:
"The contracted boundaries of this pitiful commonwealth
must expose such an impotent ally to the decision of France.—
What does this aye of a nation consist of. Nothing more than the
Counties of Albany, Ulster and Dutchess, with the undecisive
fragments of Westchester, Orange and Tryon; For New-York, and
the four counties on Long and Staten-Island, have renounced the
 usurpers; and Cumberland, Gloucester and Charlotte, revolting
from the generalCongress, openly and solemnly proclaimed the
burden, and set up for themselves under the style of The state
deverent of Vermont, and demanded a fourteenth stripe in the standard
of the confederation.

"Can Louis le Petit help smiling at his Ambassador’s map of such
a republic? Or has Mons. Gerard, to Prolong his embassy and
gain, concealed it from the eye of his master: ‘Rarely are the
remote limits of great imposers so comprehended as are exposed to
this insignificant sovereignty.’ Minute details are given of the
population, civil establishment, and financial status of the “re-
public,” comparison being made of the small tax burden under
royal government and the large one now. ‘The mortgage of their
estates for the public debts, though heavy and certain, is less felt
than the daily deprivations upon the products of their lands.

‘To-day the deputy, or assistant deputy, of a commissary or
forage-master, rifles the farmer’s barn, of what a single justice of
peace conceives to be more than his family can consume in the
course of the year; and he is paid in a certificate that makes him
only a creditor to the Congress, of a sum that may never be dis-
charged—more he contributes in waggons and horses, which are
retained, and never counted, without the loss.

‘Nor is the waste of property the smallest branch of the com-
mon calamity. The tyrants who exempt themselves from military
services, exact them without remorse from everybody else—from
boys beyond the age of 15, and from all adults under 55. Was this
only on emergencies, and to march at small distances, under officers
to whom they are known, in company with their neighbours, and for
only a few days, the vaunlage might be borne; but the Poughkeps-
sie Militia act compels them to turn out as often as Mr. Governor
thinks fit, to go as far as he pleases, to take the place of common
soldiers in the continental army; and to complete the disgrace
and slavery of the common people, the forced husbandman or
mechanic, as well as the voluntary hiring, is subject to the judg-
ment of a court martial.—He marches, messes and sleeps with the Ne-
grons, who are serving as substitutes for their masters on the
promise of manumission at the end of the war; there being several
hundred of this species of sweet-scented liberty boys in the contin-
nental army.—Royal Gaz., Ag 18 and 21, 1779, reprinted from
London Chronicle, F 26, 1779.

In researches connected with the publication of this Chronology,
it has been found that the date of the death of New-York’s first his-
torian, was the author of this ‘View.’ In his diary, under Aug. 21,
he writes: ‘I perceive that Penderleath [Smith’s son-in-law] has
printed the View I sent him of the Republic of New York—Riving-
ton reprint it from a London Paper last Wednesday & to Day, while
I was looking over it in Gaine’s Shop on Wed: I heard it ascribed to
Peter Van Schijffack of Kinderhook who went to England last Fall.
There are small additions & several Blunders. I own it to the
Obesity of my Handwriting.’—Win. Smith’s Diary (MS.), VI.

Tryon now writes to Germain (cf. F 5). “Our Privates have
taken above one hundred and fifty prizes since the 12th September
last; yesterday a small slop, loaded with ammunition was brought
in here by the Revenge, from Philadelphia, bound to South Caro-
olina. Seldom a day passes without a prize by the Privaters.”—

Leut. Von Krala records in his journal an account of an un-
pleasant encounter he has had with a drunken soldier, and adds:
‘I could narrate many and very frightful occurrences, of theft,
robbery, murder and torture by the English soldiers, which their
love of drink excites; and as they received but little money, they used
these disgusting means.’—N. Y. H. S. Collections (1882), 81-82.
See also another incident of the kind recorded in ibid., 90, under date
of Aug. 5.

3 The inhabitants of New York are ordered not to discharge fire-
arms in the city by day or night, the penalty for violation of the
order being forfeiture of the arms and possible imprisonment.—
Royal Gaz., Mr. 3, 1779. See also F 5.

8 Gov. Tryon issues a proclamation in which he informs “all
those who are inclined to escape from the barbarous Dominations
of the Usurpers, and are desirous to contribute their Aid to its
speedy Subversion, and the Re-establishment of the Harmony,
Tranquility and Prosperity of the Empire, that ample Provision is
made . . . for the Employment of all Seamen, Ship-Carpenters
and other Persons Desiring to join this Port, in short and successful
Journeys against his Majesty’s Enemies—that generous Bounties
are given to all the Adventurers, and especially to such as are able
to serve the Crew in the Capacity of Surgeon—that I have already
issued one hundred and twenty-one Commissions, to as many priv-
ate Vessels of War—that in the short Space of Time elapsed since
the eighteenth of September last, the Prize Vessels arrived here,
amount to one hundred and sixty-five, and their total Value, ac-
garding to authentic Information, is above six hundred thousand
Pounds, and that by these Captures, and the signal Success of the
Sloops of his Majesty’s Navy, and other private Letters of Marque,
the City of New-York is become an immense Magazine of all Kinds
of Supplies, for a very extensive Commerce.”—Man. Com.
(1786), 880.

Adinsureance is disclosed in New York by a negro. The band
is said to consist of several hundred rebel conspirators who intend
to set fire to the city. Some of them have been arrested. In con-
sequence, there is much anxiety among the soldiers in New-York.—
Von Krala’s Jour., 81. See also Mr. 20.

Ad Gambler & a Fleet of Empty Transports gone Round to
R. Island on an intended Expedition against Providence.—
Robertson’s Jour. (MS).

Kemble records: “Sir Henry Clinton went to Long Island,
Grenadiers, Flank Companies of the Guards, 33rd, and 42nd. Regi-
ments under Orders, and fourteen Transports proceeded to White
Stone.”—Kemble’s Jour., 175.

The 200th anniversary of St. Patrick’s, “the Tutelar Saint of Ireland,”
is celebrated “by the Natives of that Kingdom with their asso-
ciated hilarity.” The “Volunteers of Ireland,” proceeded by their
band of music, “marched into the City, and formed before the
House of their Colonel, Lord Rawdon, who put himself at their
Head, and, after paying his Compliments to his Excellency General
Knyphausen, and to General Jones, accompanied them to the
Bowery, where a Dinner was provided, consisting of five hundred
Courses; after the Men were seated, and had proceeded to the
Enjoyment of a noble Banquet, the Officers returned to Town, and
dined with his Lordship.”—N. Y. Merc., Mr. 22, 1779.

All “aspiring Heroes” are offered an opportunity to distinguish
themselves by joining the “Queen’s Ranger Husars.” Each man
will be “immediately mounted on an elegant Horse, and being re-
cieving chafing, etc., to the value of $50. Applications are to be
made to the Quarter’s, No. 1313 Water St., “Hewet’s Tavern, behind
Mar.
Sir Charles Blagden writes from New York to Sir Joseph Banks:

"The Troops still remain in winter-quarters; ... Various reports of peace come in to us from the rebels; whether they really expect such an event, or mean only, by spreading those rumors, to keep the people more satisfied for a time, we cannot yet learn. No preparations are made on our side for a vigorous campaign; no quotas of men are appointed for the different States to raise, as in all the former years of the war. This conduct is inexplicable [sic] on no other principles than those of complete security, or absolute inability. Commissioners from us are to meet others on the part of the rebels next week, to settle the exchange of prisoners, which, after so many pretensions, is now thought likely to be effected on a liberal footing." From original letter in N. Y. P. L. printed in Library Bull. (1905), 442.

"To be Sold The well known and pleasant farm, called the Glass-House, Containing thirty acres of land. Enquire of William M'Adam, Hanover Sq."—Rivington's Royal Gaz., Ap 10, 1779. This place had been established as a glass manufactory and later was turned into a tavern.—See O 7, 1779.

This date is found on one of Archibald Robertson's drawings (see, further, July 12, 1776), entitled "View of New York taken from one of the Redouts in the Lines thrown up by the Rebels behind Mount Pitt." This drawing is now in the collection of Mr. Harris D. Colt. See Frontispiece II, Vol. V.

Spain, by treaty, makes common cause with France against England; but the treaty is kept secret.—Winson, VII: 54. 55. 85. 476. War was declared by Spain on June 16 (q.v.).

It is stated in a proclamation, issued on board H. M. S. "Rainbow," off New York, by Sir George Collier, "Commissioner and Commander in Chief of all his Majesty's Ships and Vessels employed in America, from the North Cape on the Island Cape Breton to the Bahama Islands, and Florida inclusive," that "many Seamen have been lately inveigled from his Majesty's Service into Privateers, Letters of Marque, and Merchants, owing often to Drunkenness, and want of Consideration of the heavy Penalty attending such a Crime, which is Death by the Sentence of a Court Martial." Pardon is offered for such desertion to those who will return to the king's service within one month. Any vessel which "shall be found to harbour a Deserter, or in which a Deserter shall be found, will have every Man (except the Commander) without exception impressed for his Majesty's Service." The "Excuse of not knowing him to be a Deserter, will not avail or be received, unless the troop is perfectly clear that neither the owners, master or mate, knew of his being such."—Royal Gaz., Ap 17, 1779.

Kemble records that it is "Reported strongly that Admiral Byron had defected the Port of New-York. D'Estrange, destroyed five and taken six line of Battle Ships.

He states also that "Commissioners Colonel Hyde and Captain André [have] gone to Treat with Rebel Deputies on Exchange of Prisoners" (see Ap 17).—Kemble's Jour., 176.

Kemble notes: "the arrival of a Flag of Truce from Boston;" and that "The Commissioners, Colonel Hyde and Captain André [see Ap 14], are still at Amboy, and it is hoped will bring about an Exchange of Prisoners of all denominations. They went on this business the 15th ultimo." (see Ap 25). He also records that "One of the Transports, with part of the flank Corps from Halifax, is lost on the Jersey Shore, and upwards of 100 Men and one Officer Drowned; they belonged to the 82d Regiment."—Kemble's Jour. 176.

Laet. Von Kraft records in his journal: "I was in the little town of Harlem not far from where our camp had formerly stood. There were no inhabitants in it. All had left."—Von Kraft's Jour., 84.

Officers and seamen belonging to the "Light Bob schooner privateer, Annanias M'Douggall, Commander," are ordered to repair on board the schooner which lies at "Tolomie's wharf, opposite to Lemon's Taverne, in Water-street," on or before April 20.—N. Y. Merc, Ap 19, 1779. Lemon's Tavern, according to later advertisements, stood three doors east of the Coffee House (Wall and Water Sts.), and carried a sign representing Capt. Joseph Brant (Thayendanegea), of the Six Nations. The tavern was also called the "Indian King." Lemon, who styled himself as "late of Philadelphia," (see J. 2, 1776) settled in London (see J. 7, 1776) and returned in 1780 to Perth, in North-Britain," announced, in September, 1781, his removal from this house to the "sign of the Indian King, No. 69, in Cherry Street."—N. Y. Merc, 5 17, 1781. He was there as late as

Mr. 17

"Patricke Doyle and Elizabeth Power, have now opened that elegant house in Smith-street known by the name of the Cornwalls's Arms, where they propose Keeping Tavern in the most extensive and elegant manner, for which purpose they have supplied themselves with an assortment of the best Wines and Liquors; ..."—Rivington's Royal Gaz., Mr 17, 1779. Less than a month later, the partnership was dissolved and Mr. Powers continued alone in the "Tavern-Keeping business, at the House late Judge Hornsmanden's."—Bid., Ap 16, 1779. In 1783, the house at 38 Smith (William) St, "formorely Judge Hornsmanden's," was converted into office, under William Bellows, deputy post-master.—N. Y. P. Jnt, 1, 1784.

This is a Moment of Expectation.

"Several Men apprehended last Night came in & letters found containing a Suspicion of a Design to burn down this Town."—Wm. Smith's Diary (MS.), VI. See Mr 14.

Kemble records: "A vessel from Rhode Island, saying Admiral Cockburn was detained immediately from thence, and the Expedition laid aside. The Rebels had collected all their force at New London, in expectation we intended to make a descent there. The Sloop from Rhode Island, intending to come thro' the Sound, was prevented by Rebel Vessels from New London, and obliged to come round Long Island. NoVessel of War in the Harbour to attend any Expedition."—Kemble's Jour., 175.

"All the Volunteers who are willing to serve his Majesty in the Loyal American Regiment commanded by Col. Beverly Robinson for two years or during the Rebellion, shall upon their being mustered and approved of by the Inspector General receive $25 bounty. Whatever persons are willing to embrace the present opportunity offered of approving their loyalty, let them repair to the Quarters of the Regiment at Hartlem Heights, or to the Bulls Head Tavern at New York, where an officer will attend to receive and entertain them."—Rivington's Royal Gaz., Mr 24, 1779.

Maj.-Gen. Jones reinforces the proclamation of Dec. 20, 1777 (q.v.), issued by Maj.-Gen. Robertson, when commandant, regarding regulations to be observed by masters of vessels on their entering the port of New York. These published directions are addressed "to Capt. M'Dougall, Gent. Master of the New-York, and Mr. Anthony Kendall, his Deputy," to which is added: "The Master of the Port's Office is kept at No. 271, near Beekman's Slip."—Royal Gaz., Mr 31, 1779.

The wind-mill "near the two-mile stone" is offered for rent, with a dwelling-house and garden.—N. Y. Merc, Mr 29, 1779.

"The farm at Bloomingdale, six miles from town, "belonging to Miss Charlotte De Lancy, commonly called De Lancy's Farm, bounded northerly by Mr. Athorp's farm, easterly by the Commons, southerly by Judge Bayard's, and westerly by Hudson's River, containing 18 1/2 acres" is offered for sale by Brig.-Gen. De Lancy.—Royal Gaz., Mr 31, 1779.

"Several Cruisers arrived from the South Ward."—Kemble's Jour., 176.

Kemble records: "The Admiral Sailed having been accompanied the day before in great parade on board his Ship by the Captains of the Navy."—Kemble's Jour., 176. See also Ap 5.

Kemble records that "The Admiral Sailed [probably from Sandy Hook], with the Richmond, Raleigh, and Unicorn, Frigates, for England."—Kemble's Jour., 176.

Because "innumerable Riots and Disturbances have happened in the Streets of the City, ... by Seamen belonging to his Majesty's transports, victuallers, etc." a notice is issued by Commodore George Collier on board the "Rainbow," directing government officers to prohibit shore-leave for seamen after dark.—N. Y. Merc, Ap 12, 1779; Man. Com. Coun. (1803), 673.

1779, the Coffee-House, or the Defeat at Brandywine, on Golden-Hill."—Royal Gaz., Mr 17, 1779.
"Golf Players" are noticed that, as the "Season for this pleasant and healthy Exercise [is] now advancing," "Clubs and the various Caledonian Balls" may be had by enquiring at the printer's. — Royal Gaz., Ap. 21, 1779.

John McKenzie, Tavern Keeper, in Queen-Street, No. 35. He left to acquaint the Officers of the Navy and Army, and the Respectable Public, that he has opened an Ordinary. — Royal Gaz., Ap. 21, 1779. This tavern was known as the "Mason's Arms." A little over a year later, McKenzie became proprietor of Ranelagh Gardens, or the White Conduit House, at Broadway and Leonard St. — See Jl 15, 1780.

At this time, the house formerly occupied by Judge Hormandan was a tavern, the Connwill Arms, kept by Elizabeth Powers. — See her notice in Reinv. of Royal Gaz., Ap. 21, 1779. Cf. Mr. 17.

Capt. Scott of the artillery shows me his "Map of the Province," says something, and shewed me the things that he was desired to assist at the redoubts which were being completed on "Lourall [Laurel] Hill," opposite "Fort Knippinghausen." — Von Kraft's Jour., 84. For an account of a drawing of Harlem made by him, see descrip. of Pl. 46, 1: 555-56.

The view is reproduced in N. Y. H. S. Collections (1882), Pl. 6.

Letters from New-York, by the last ships, give a very favourable account of the situation of affairs there. — Mr. Washington could not have his army together, the desertion was so great, numbers coming in daily to New-York; and that General Clinton disposed of them in the following manner; some he incorporated with the royal army, and new raised corps; some he sent to the navy and privates, and others had portions of land allotted them to cultivate near Kingsbridge that the army were healthful, and the people in high spirits, not doubting but the rebellion would soon be at an end; and that a great number of prizes had been brought in by the privates and cruisers. — London Chron., Ap. 27-29, 1779.

Kemble records: "42d Regiment, Regiment Prince Charles, Lord Rawdon's Corps, four flank Companies Guards, and one Company 81st. Embarked under the Command of Major General Matthew. Sailed the 4th. out the Hook, Conveyed by the Rationship, and destination for some part of the Chesapeake or Delaware River, and intended as a diversion to favor the progress of General Prevost's movements into Carolina; but as a positive account is come of the taking of the Jason [rumoured in New-York on Ap 27], and most of her Convoy, by three Brigelt Frigates, with Provisions, &c., for the Troops, the Movement intended by General Prevost must be laid aside; these Accounts receiv'd between the 3rd and 4th." — Kemble's Jour., 177.

"The dissensions among the rebels are still violent, though perhaps less so than two months ago; their paper currency is reduced to a 20th part of its original value, and the Indians are threatening their frontiers in the most formidable manner; but still I do not find that they relent, or that the French Party loses ground among them." — From letter written by Sir Charles Blagden to Sir Joseph Banks, preserved in N. Y. P. L and printed Library's Bul., (1903), 411.

Wm. Smith is appointed chief-justice of New-York. — American Loyalties, Audit Office Transcripts, XLIV: 617, in N. Y. P. L Commenting on this appointment, Gov. Robertson said: "When I observed Govt of New-York Lord George Germain then Secretary of State, after seeing that letter, destination improved for some part of the Chesapeake or Delaware River, and intended as a diversion to favor the progress of General Prevost's movements into Carolina; but as a positive account is come of the taking of the Jason [rumoured in New-York on Ap 27], and most of her Convoy, by three Brigelt Frigates, with Provisions, &c., for the Troops, the Movement intended by General Prevost must be laid aside; these Accounts receiv'd between the 3rd and 4th." — Kemble's Jour., 177.

May

4 "It is hoped Govt might derive some Advantage from a Lawyer of the best talents and Connect5 in the province. And that the people would drop their pretended or real fears for the Constitution, when they saw the Administration of Justice put into the hands of a Man who had always been considered as the greatest and ablest for the Liberty of the South." — Governor's Report, 1779.

On these motives Mr. Smith got the Office without any Solicitation — I carry him the Commission with he received with a becoming sense of his Majesty's goodness. He was sworn into Office and was always ready to execute the function, that he did not was no fault of his — both in his Capacity of a Member of the Council of the Province — and as a member of the Council for the General Peace Commission — He took every occasion to urge the necessity practicability and utility of an immediate revival of Civil Courts and Authority." — ibid., XLIV: 628-29. See Smith's Diary, under Ag 1 and 5.

In a letter to a correspondent in London, a New Yorker says in part: "We are tolerably loyal here, I think. The young fellows seem to enter the King's Service with great cheerfulness and Zeal. The Queens Ranger Volunteers, a fine Regiment, will soon be complete: . . ." — Kemble's Jour., 177.

May 6 "It must be however confessed there is great Dishoary prevails in some Part of the Army; for Desertions are very common. The Germans, as well as others, go over to the Rebel Legions." — Lloyd's Eve. Post (London), Je 14-16, 1779.

Kemble records: "A Copy for Georgia Sailed, hope will be more lucky than the former." (See May 1 to 6.) — Kemble's Jour., 177.

Loosely and Elms, Having quitted the King's Head Tavern, on Brownjohn's wharf, have opened the house lately occupied by Captain Benson, at Brooklyn Ferry; . . . — Royal Gaz., My 8, 1779. They had been proprietors of the tavern on Brownjohn's Wharf, formerly Capt. Duran's, since the spring of 1777. — See Jl 15, 1780. The "Brooklyn Ferry House" was renamed the King's Head Tavern, and became, under its new proprietors, a rendezvous for sportsmen. Besides riding, already a popular American sport, cricket, "bulb-hatting" and fox-hunting were among the typical British sports practiced. — Ibid., Ap 28, 1779; Ap 26, Je 19, N 14, 1781. In the spring of 1780, the partnership was dissolved, and Looseley continued to keep tavern alone at the Brooklyn ferry-house, which he renamed "Brooklyn Hall." — See Ap 11, 1780. He failed in 1782, and, on Nov. 26 of that year (q. v.), all his household effects were sold at auction for the benefit of creditors. Looseley was still at Brooklyn Hall in the spring of 1783, when he advertised a lottery. — N. Y. Merc., Mr 17, 1783. He announced his intention, in May, of speedily proceeding "to the promised Land of Nova Scotia," with "Brother Loyalists, where Freedom and Liberty reign triumphant." — Royal Gaz., My 24, 1783.

James Strachan announces that he has "opened a Tavern in the house No. 45, on Brownjohn's wharf, formerly occupied by Messrs. Lossie and Elms." He serves an "ordinary" (table d'hote) at 2:30 p.m. daily. "A Hair-Dresser attends as usual." — Royal Gaz., My 12, 1779. By May 29, Strachan had changed the name of his house to "the Queen's Head Tavern." In December of this year, and in January, 1780, the house was advertised as the King's Head Tavern and London Chop House of "James Hearne." — N. Y. Merc. May have this error in the spelling of Strachan's name, or it may be that for a brief time, Hearne was the proprietor. Strachan was again in possession, however, by Jan. 26, 1780, and continued to occupy the house until May 4, 1781, when he removed to the old Merchants' Coffee House. — See Ap 28, 1781.

Richard Wotton, who had been proprietor for about a year of the "London Chop-House, at the sign of the Earl of Percy's arms," on Water St. near the Fly Market (see Ja 12, 1778), now moves to the corner of Beekman Slip and opens an inn which he calls the "Red Horse Tavern." — Royal Gaz., My 12, 1779.

Kemble records the arrival of "Sir William Erskine and the Troops" from "East End Long Island." — Kemble's Jour., 177.

"I have read Mr. Pulteney's Pamphlet, it is to urge the Proclamation of the War for a Reunion of the Colonies & to point to Modes of Supply; 12 Pe. on a new Valuation of Estates." — Wm. Smith's Diary (Ms.), VI. Wm. Pulteney's Considerations on the Present State of Public Affairs, And Proposing the Means for securing the Necessary Supplies was published in London in 1779. In this pamphlet declares that, as America has rejected the British offers of peace and has entered into an alliance with France, "no option seems now to be left us, but either to proceed with the utmost vigour, to prosecute the war, or to submit, not only to the claim of American Independence, but to such further conditions of peace, as France and the Congress may think proper to impose." Such submission is.
of course, out of the question. "The object now... is to preserve such a connection with the Colonies in North America, as to unite the force of the whole empire, in time of war, for the common safety."

"This object will be attained, if the Colonies acknowledge the same King, which involves the power of peace and war, and the rights of mutual naturalization and succession." The author thinks that American independence would be injurious both to America and to Great Britain. He continues:

"Till the late offers of conciliation were made to America, a great part of this Kingdom, were averse to the war. On the other hand, America was in general united, and few were our friends there. The contest is now entirely changed. The offers of Great Britain have been such, as became a brave generous nation, and have left nothing, in point of freedom, to be wished for, by our fellow-subjects. The rejection of these offers by the Congress, has dispelled every doubt, in the minds of impartial men, with respect to the justice of the war."

Pulteney reminds the people that a large amount of money will be needed to continue the war, for Great Britain "must be prepared to hold out for many years." He computes the total wealth of Great Britain to be £1,000,000,000, and shows that if each man were assessed 1% of his capital, to be paid by instalments in the course of 2 years, the sum of £5,000,000 would be raised, which "without supposing much economy, ought, with the ordinary supplies to support a vigorous war of two years at least."

Smith writes in his diary: "The Town is alive with a Detcham gone, right before last towards Hackinsack—various Conjectures—Some expect the Troops back this Day—others say they are gone to take a Post up the River on the West Shore."—Wm. Smith's Diary (MS.), VI.

Lieut. Von Krafft assists "the other Engineer, Lieut. Marshall" to erect "a battery of 6 guns on the top of the hill of Fort Knipp hausen."—Wm. Krafft's Jour., 85.

Kemble records the arrival of "a Vessel Express from General Matthew and Sir George Collier," with an account of important successes of the British at Portsmouth, Norfolk Co., Va.; and the taking of stores at Gosport, Va., intended "for the Continental Vagabond use."—Kemble's Jour., 178.

Kemble records: "Nothing Extraordinary, but a Report that Mr. Washington had set off in great haste for Philadelphia."—Kemble's Jour., 178.

The commandant appoints Jeronimus Atalyne and John Anmy directors of the city watch, and decrees certain regulations and fines.—N. Y. Merc., May 31, 1779. See also Dawson's report on the city finances during the Revolution, printed in Proc., Bd. of Ald., LXXXIV, p. 237.

James Smith, Engraver and Seal Cutter, Late of Philadelphia, at the Golden-Head No. 925, in Water-Street, near the Coffee-House, and next door but one to Mr. Nutter's," advertises that he engravés "in the most elegant manner Coats of Arms, Seals, Maps, Copper Plates, and all other kind of engraving."—Royal Gaz., May 22, 1779. Smith returned to Philadelphia in 1786. For a further account of him, see StruUer's. Am. Engravers on Copper and Steel, 11: 254-55. Check-lists of his plates may be found in ibid., 11: 490-91, and in Fielding's Am. Engravers on Copper and Steel, 253-55.

Charles Roubault, later the proprietor of the City Tavern at 115 Broadway, opens an "ordinary" at 939 Water St., in the house generally known as Smith's Tavern.—Royal Gaz., May 22, 1779. See Ja 12, 1778.

A Report by 5 Deserters from Peak's Kill that Fort Stanwix is taken—they came in at the Bridge last Night. It is credited by some.

"Great Preparations making for going out—Tis generally reported that they are destined up the North River. I wonder at it—Tis as if it were determined it should be known, but none however speak of the Spot for taking Post—in General that they are going ag't the Highland Forts."—Wm. Smith's Diary (MS.), VI.

A New York letter contains the following information: "Provisions are very plenty, and every thing else but groceries and naval stores. So many privates are fitted, and such a call for ropes, etc., that cordage will bring an advance of 40 per cent. springing on the invoice. ...The people at New York have feathered their nests, by the success of their privates, but, having swept the seas, prizes drop in but slowly at present.”—Lloyd's Eve. Post, Je 25-28, 1779.

Congress adopts an address "To the Inhabitants of the United States of America." The opening paragraph reads as follows: "Friends and Countrymen, the present situation of public affairs demands your most serious attention, and particularly the great and increasing deprecation of your currency requires the immediate, strenuous, and united efforts of all true friends to their country, for preventing an extension of the mischiefs that have already flowed from that source."

The emission of paper money is defended as an expedient "generally and successfully practised on this continent." Attention is called to the endeavour to prevent too frequent emissions by the establishment of loan offices "so early as in Oct. 1776." This plan, however, has been delayed "in justice to the public exigencies." The situation is made worse, they say, by the "artifices of men who have hastened to enrich themselves by monopolizing the necessaries of life" and by the "misconduct of inferior officers employed in the public service."

For the prosecution of the war to Jan. 1, 1780, it is estimated that $45,000,000 is necessary in addition to the $15,000,000 "required by a resolution of Congress of the 2d of January last." They further recommend to the states to pay "as much as can be collected as soon as possible into the continental treasury."

An expression of encouragement follows: "Think not we despair of the commonwealth, or endeavour to shrink from opposing difficulties. No, Your cause is too good, your objects too sacred, to be relinquished. We have seen the struggles your forefathers have been enabled to hear them and may profit by them, and when they reach your enemies, we fear not the consequences, because we are not ignorant of their resources or our own." Hope is expressed that the French alliance may be followed by other alliances "on principles honourable and beneficial to these states." The enemy appears to despair "of the success of their united forces against our main army," and are resting to "predatory, desultory operations." Such being the case, "if you are assiduous in improving opportunities, Saratoga may not be the only spot on this continent to give a new denomination to the baffled troops of a nation inexpensively priding herself in notions of her omnipotence."

The address concludes with the following exhortation: "Encouraged by favours already received from infinite goodness, gratefully acknowledging them, earnestly imploring their continuance, constantly endeavouring to draw them down on your heads by an amendment of your lives and a conformity to the divine will, humbly confiding in the protection so often and wonderfully experienced, vigorously employ the means placed by Providence in your hands, for completing your labours."

"Fill up your bulletin—be prepared in every part to repel the incursions of your enemies—place your several quotas in the continental treasury—lend money for public uses—sink the emissions of your respective states—provide effectually for expediting the conveyance of supplies for your armies and fleets, and for your allies—prevent the produce of the country from being monopolized—effectually superintend the behaviour of public officers—deignantly promote piety, virtue, brotherly love, learning, tranquility and moderation—and may you be approved before Almighty God worthy of those blessings we devoutly wish you to enjoy."—Royal Gaz., Je 9, 1779; Penn. Packet, Ma 29, 1779. Commenting on this address, under date of June 5, Smith says: "They must know the money can not be raised in the Year—The Tax on N Y now raising is Half a Million of Founds—Her Proportion of the 45 millions more of Dollars will be another Million & a Half in all 2 Millions for this Year."—Wm. Smith's Diary (MS.), VI.

Kemble records "the Movement of [British] Troops on the 28th, in order to form an Encampment from Phillips's House on the North River, Extending nearly to the East River, keeping the Brunks [Bronx] in great part on their front."—Kemble's Jour., 178-79. The particulars given by Capt. Robertson are as follows: "The following,"—Wm. Smith's Diary (MS.), VI.

A New York letter contains the following information: "Provisions are very plenty, and every thing else but groceries and naval stores. So many privates are fitted, and such a call for ropes, etc., that cordage will bring an advance of 40 per cent. springing on the invoice. ...The people at New York have feathered their nests, by the success of their privates, but, having swept the seas, prizes drop in but slowly at present."—Lloyd's Eve. Post, Je 25-28, 1779.
Virginia & proceeded up the N.R. to Phillip's House.—Robertson's Jour. (MS.).

31 The British take possession of Stony Point "w out any opposition."—Robertson's Jour. (MS.). See Je 1.

Smith writes that he has been informed "that Sir Henry Clinton embarked all his troops at 10 last Night except 2000 which he has left under Sir Wm. Erskine at Philadelphia—at 6 this morning they were out of Sight—He adds that Sir H. Clinton] took Bombs with him which indicate a Design upon the Forts—The Govr is vastly mortified by being left at Home."—Wm. Smith's Diary (MS.), VI.

About 40 refugees start on an expedition to Shool Harbour woods on June 1; they attacked the houses of "some notoriously violent Rebels." The party returned to New York on June 3, bringing with them "27 milch cows, 7 horses, 2 waggons loaded with goods &c."—Royal Gaz., Je 5, 1779.

This plunder appears to have been disposed of at auction, for we find the following notice in the same paper: "To Be Sold, This Day at Public Auction, At the Bull's Head Tavern, in the Bowy Lane, between 2 and 3 of April, a Coach and Pair, and Mr. West's Phaeton one very fine Ox, several Horses, Waggons, &c."—Ibid., Je 5, 1779. Similar advertisements appeared in Ibid., JI 10 and 16, 1779.

The British invest Verplank's Point and take about 70 prisoners.

After mentioning this, Robertson adds: "The Rebels conceive Str. Hill intends to attack West Point, wth appears an important object to them."—Robertson's Jour. (MS.). Wm. Smith says: "Robertson's report, it cannot be supposed that Mr. West had observed, &c."—Ibid., Je 5, 1779.

Chilton reconnoitres Peekskill and makes a "show w Transports &c. &c. to go up to West P."

Robertson's Jour. (MS.). Robertson sketched them.

Capt. Robertson writes: "Rebels said to have about 2000 men in West Point & 2000 w Mr. Dougall between Fish Kill & Peak's Kill."—Robertson's Jour. (MS.).

This being the king's birthday, an "elegant Entertainment" is given by his Excellency General Tryon, at which were present the Governors of New-Jersey and North Carolina, the Members of his Majesty's Council for the Province of New-York, the Judges and other Officers of Government. . . . every Tavern in the City and its Vicinity was crowded with Gentlemen, where all possible Demonstrations of Joy, Affection and Conviviality were expressed on the Return of this Festival, a Day dear to every Friend of our martial and illustrious SOVEREIGN, and the admirable constitution of Old England."—Royal Gaz., Je 5, 1779.

Notice had been previously published: "The Loyalty of the Inhabitants of New-York is sufficiently known. The General requests there may be no Illuminations or Fire Works, the evening of his Majesty's Birthday."—Ibid., Je 3, 1779.

Washington passes through Pompont "from his Camp at Morris Town wth 5000 men, to succour W. Point."—Robertson's Jour. (MS.).

Kemble records: "Sir Henry went down to Phillips'; the Works at Verplanck and Stony Point begun."—Kemble's Jour., 1779.

Kemble is employed on these works, which, he says, were "near complete" on the 25th.—Ibid.

Abigail Adams writes to her husband, John Adams (who is in Paris), about prices in America: "Corn is sold at four dollars, hard money, per bushel, which is equal to eighty at the rate of exchange. Labor is at eight dollars per day, and in three weeks it will be at twelve, it is probable, or it will be more stable than anything else. Goods of all kinds are at such a price that I hardly dare mention it. Linens are sold at twenty dollars per yard; the most ordinary sort of calicoes is thirty and forty; broadcloth is at forty pounds per yard; West India molasses as high; molasses at twenty dollars per gallon; sugar four dollars per pound; bohea tea at forty dollars; and our own produce in proportion; butcher's meat at six and eight shillings per pound; beer at fifty and sixty dollars per week."—Familiar letters of John & Abigail Adams (1836), 365.

"Washington got thro' the Clove & [is] at Ringwood Forrest of Dean N. Windsor & Neighbourhood of W. Point."—Robertson's Jour. (MS.).

Smith writes: "Seven Ships ordered up the River & all the flat Boats. If one may Credit the Papers Washington is gone thro' from Ringwood to New Windsor . . . His avoiding the Close Road shews his apprehension that the West Forts are the Object & that he is fearful they may be taken before he could pass the Clove. But then I should imagine he would halt at Goshen and other Case Sir Henry [Clinton] should seize the Mouth of the Clove & carry his Main Body into Jersey."—Wm. Smith's Diary (MS.), VI.

A newspaper contributor, signing himself "Americanus," gives an extract of a letter from a Virginian to a friend in Philadelphia, in which the Virginian says: "we should have had peace this spring, had it not been for the—execrable faction." Commenting on this, "Americanus" declares: "when this bleeding country is told, that an execrable faction prevents peace, it is but natural to enquire where this faction is, who compose it, and what are their views. Congress alone are invested with the powers of war and peace; this faction must therefore be in that Body, or he so powerful at least without doors, as to influence a majority of the votes within. From what this gentleman has positively asserted, and from his manner of speaking, and the sentiments which, according to their position, or pretension, are expressed, it appears evident, that the declaration of independence, or of the concluding the treaties of Paris: In a word, that a right of fishing on the Banks of Newfoundland shall be acknowledged and guaranteed to these States, and that such an article shall be made a sine qua non of the treaty. . . . The delaying the resolutions, as to the terms on which we are willing to treat, has already produced the most mischievous, if not fatal effects; on contrary interest, &c. &c. which neither the declaration of independence, nor the treaties of Paris, authorized us to challenge as our rights, has caused the late, otherways accountable delays, and prevented a peace, or at least a negotiation being opened for one, those who have challenged and insisted on those claims are justly responsible for all the consequences."—Penn. Gaz., Je 23, 1779. This article was republished in the Royal Gazette for July 7, and invoked a comment from William Smith in his diary of the same date (q.v.).

Smith writes: "A Report that there is a Fleet of armed Vessels from Philad: att the Hook & that one of our Frigates is taken by Loyal excitations and are taken & are burning & that the last April & agt the Ministry for not dispatching the Reinforcements & British Fleet sooner & agt Sr George Collier for not sending out the Reasonable & Camilla."—Wm. Smith's Diary (MS.), VI.

Blagden writes again to Banks: "I have now the satisfaction of informing you that our Army has taken the field, and met with some little success in the capture of two posts which the rebels had fortified to command an important pass over the North River, called the King's Ferry, about 44 miles above this town [New York]. We have now been raising works at the same place, & made it a very strong post. . . . About 12 or 14 miles further up the river, the rebels have a very strong Fort, at a place called West Point, with a numerous garrison, & every provision for a stout defence: Mr Washington's Army is also moved to cover it, but we do not know here that Sir Henry Clinton has any intention of attacking it. An Expedition was sent last month into Virginia, which met with great success in destroying large quantities of stores belonging to the rebels, & in bringing away a fine botty, which is to be divided between the navy & army employed upon that service; the first instance, I believe, of a regular division of the plunder in America this way. We are very happy to hear from your side of the water, & hope you will send us peace, the negotiations for which, as the rebels give out, are very far advanced, but on such terms that we cannot credit them. The best symptoms of distress I can perceive among them is the excessive depreciation of their paper-money, which is now so great that their bills will
Robertson records in his journal, "to stimulate the Militia to turn out, a "Lye" is propagated that there is a "Report of Our Army in Carolina being beat by the Rebels 14th May—w great Loss."—Robertson’s Jour. (M.S.).

A letter from New York states, "Our force here, and on Long and Staten Islands, if the regiments were complete, would exceed 20,000 men. As it is, our army is very respectable. I compute it at 15,000 men."

"It has been talked of here to offer the rebel Officers the same rank they hold under their Congress, on coming over to us. It is thought this would give us the whole rebel army.

"The people have been so harassed and plundered by the Congress that the whole country is almost unanimous for a submission. One fifth of the able-bodied men among them have already lost their lives. Their tradesmen enter on board their merchant ships and privateers to prevent their being sent a soldiering as they call it."

"There is a general want of provisions and clothing in the Northern Colonies. Ladies of the best families, for more than two years past, have only worn socks made of woolen, and even linen rags sewed together, instead of shoes. Indeed on the sea-coast shoes and stockings are got, but at an immense price—a pair of shoes 45{sterling} a hat double the price."—London Chron., Jl 12-24, 1779.

"Twenty-three members of the Chamber of Commerce meet "in the Upper long room at the Coffy House" and draw up the following letter to Lieut.-Gen. Daniel Jones:

"We beg leave to inform your Excellency that the Subscribers are Members of a Society known by the Style and Title of a Chamber of Commerce which, before the present unnatural rebellion, met under certain regulations (of which we have the honor of in- closing a copy), and determined the principal matters relative to trade in this City.

"The good effects of this Institution having been felt and acknowledged by all persons concerned in Trade, and the increase of Commerce encouraged by the Proclamations of his Majesty’s Commissioners, together with the success of Private Ships of War, has induced the Merchants in general (who are ready to join us agreeable to our regulations) to solicit a renewal of our Meetings in order that the many mercantile differences which so frequently happen may be adjusted.

"As Commandant of the City, we esteemed it our duty to lay before you the intent of our proposed meetings and at the same time we beg leave to assure you that our assistance, when called upon will be at all times ready to facilitate the Public good." This was the first meeting of the institution since May 2, 1775.—Col. Rec. of N. Y. Chamber of Commerce, 1768-1784, 203-4. Lieut.-Gen. Jones answered the letter on June 25 (p. v.). The "Coffy House" was the Merchants’ Coffee House, at the e. c. cor. of Wall and Water Sts.—L. M. R. K., III: 979.

Smith writes, "The Ministry seem to desire the common Censure of neglecting to forward Intelligence as well as of Inactivity in the Prosecution of the War."—Wm. Smith’s Diary (M.S.), VI.

In response to the letter of June 21 (p. v.) from the Chamber of Commerce, Lieut.-Gen. Jones writes:

"I have laid the Letter you favored me with before the Commandant in Chief, and I have the Pleasure to acquaint you that his Excellency approves of the Gentlemen of the Chamber of Commerce renewing their Meetings as formerly. I was happy to hear of this Institution and regret only that I have not had the benefit of your assistance sooner to procure to New York every advantage our present situation would admit of, which I have always had much at Heart. You may therefore Gentlemen be assured every Proposal coming from you, for the good of the City, shall meet with my best consideration and assistance, and when I quit it and a thousand elections—What wonder then to find, Waggoneers, Blacksmiths, Butchers and Tavern-keepers on the list of Generals; and in their councils, Pettyfoggers, Parish Schoolmasters, fraudulent Debtors and Bankrupts. . . ."

"Only add, Sir, that if you can persuade your correspondents, to give you an abstract of the constitutions of the respective republics, with an account of their civil and military officers, and to state their former and present burthens, you will have the clearest knowledge of America upon this express principle, that no negotiation could be admitted but upon previous application and concessions from the colonies."—Royal Gaz., S. 4, 1779. Smith wrote in his diary, on Sept. 5: "Rivington’s Paper . . . contains a Letter of 26 June hinting a Design to continue the War till America is reduced & I think I have heard that a Motion to continue the Offers of the Commissioners to America was rejected. It was made by Harley of the Opposition. I believe I saw it in the London Chronicle of 18 June."

"A New Jersey justice of the peace speaks thus, according to Smith, of conditions in that state: "The Militia every where tired of the War—A Tax of 1 Million this year on Jersey—Last year 100,000. He thinks the Million will be raised for he paid £20 last year & that will call this year for £200,—It will be but a cow worth £150 & a Call worth £50—Such the monstrous Depreciation—Many however will be ground to Powder by such a Load for a Law is made to ingage 10000 of the Militia for a Defence of Jersey—In every Regiment Volunteers will turn out for a Bounty given by the Rest to prevent Drafts—He thinks it will be not less than a £1000 per Man—This on the Back of the Tax will occasion great Distress & from the Disputes of the Volunteers not serve the End of the Usurpers—They may assist in putting their Employers to Flight."—Wm. Smith’s Diary (M.S.), VI.

Tryon writes Vice-Admial Arbuthnot that the crews of priva- teers that have been fitted out at New York number over 6000.—N. Y. Col. Docs., VIII: 772.

A commodore Collinson (Apr. 13) issues a proclamation forbidding privateers to anchor outside the Hook, on their return from cruising, and landing their prisoners on Long Island. The owners are required, instead, "to direct their Vessels when they return from their Cruizes, to bring to near the Guard ship, in Order to their being properly examined, and not to shew so much Disrespect to the King’s Colours, as to make Sall away, when they see the Guard Boat come to take them." He threatens with dismissal and loss of pay any government pilots who go on board merchant vessels "when Men of War are not supplied with them, who may want to come in over the Bar."—Royal Gaz., Jl 30, 1779.

Clinton issues a proclamation which reads: "Whereas the Enemy have adopted a practice of enrolling negroes among their Troops; I do hereby give Notice, That all Negroes taken in Arms, or upon any Military Duty, shall be purchased for a stated Price; the Money to be paid to the Captors. . . ."

"But I do most strictly forbid any Person to sell or Claim Right over any Negro, the Property of a Rebel, who may take Refuge with any Part of this Army: And do promise to every Negro Who shall desert the Rebel Standard, full Security to follow within these Lines, any Occupation which he shall think proper."—Royal Gaz., Jl 21, 1779.

Smith says he has sent to Gov. Tryon a new draft "for a Pro- ject to draw into Service such Refugees as will not become Soldiers."—Wm. Smith’s Diary (M.S.), VI.

Smith records that Gov. Tryon has left the city "to attack some part of Connecticut."—Wm. Smith’s Diary (M.S.), VI. See Jl 4.

"By the Threat of pouring many Detachments into Connecticr it is apprehended Sir Henry aims to draw Washington into that Country. So far right—I was always of Opinion that this Colony would be the first to renounce the Confederacy."—Wm. Smith’s Diary (M.S.), VI.

"Rivington has published this Day the Paper I gave him," says Smith.—Wm. Smith’s Diary (M.S.), VI. It is in the form of a letter, without signature, addressed to "Mr. Rivington," and reads in part as follows:

"It was a coarse but true observation of the late Jenny Otis, that the filch of the political Cat had got upon her; and we know that now, the most respectable part of the community, rarely attend the elections. It is an undoubted fact, that in Connecticut the public officers have been of late voted in, by less than 100 voices in towns of eight and hundred, and when I quit it and a thousand elections—What wonder then to find, Waggoneers, Blacksmiths, Butchers and Tavern-keepers on the list of Generals; and in their councils, Pettyfoggers, Parish School- masters, fraudulent Debtors and Bankrupts. . . ."
1779 July 3

demonstration, that the rebellion is in the hands of mean agents, and abhorred in every colony by a vast majority of the inhabitants; and by detecting the false representations made to France, prevent even that kingdom from being a refuge, to those who are hourly sucking the heart's blood of America, and sending off their spoils, resolved upon a turn of affairs, to spend them in the dominions of a Prince, whose subjects have the highest reason to execrate the men, that have seduced him into a treaty, with the whole British Empire, for a destructive and scandalous compact with only a weak and divided branch of it."—Royal Gaz., Jl 3, 1779.

Sir Wm. Erskine and the Cork fleet sail for England, and an expedition under Gen. Tryon goes "up the Sound."—Robertson's Jour., 1779 & 1780 (MS.). Wm. Smith says that Tryon went immediately to Stamford and Norwalk, and that on the 5th he was at New Haven. His intention was to be followed by a British a Hessian & Fanning's Regt with 500 of the associated Refugees from Rhode Island—a Regt more from here with 2 Companies of the Guards & 2 of Light Infantry."—Wm. Smith's Diary (MS.), VI, under Jl 7 and 8. See also Kemble's Jour., 180, in which, however, it is erroneously stated that the landing at New Haven was on July 7. See Jl 10.

"An Address to the Inhabitants of Connecticut" is issued by Commodore Collier and General Tryon. It reads in part: "The ungenerous and wanton Insurrection against the sovereignty of Great Britain, into which this colony has been deluded by the artifices of desperate and designing men, for private purposes, might well justify in you every fear, which conscious guilt could form, respecting the intentions of the present armament, to your towns, your property, yourselves, lie still within the grasp of that power, whose forbearance you have ungenerously construed into fear; but whose lenity has persisted in its mild and noble efforts, even though branded with the most unworthy imputation.

Reflect upon what gratitude requires of you if that is insufficient to move you, attend to your own interest: We offer you a refuge against the distress, which, you universally acknowledge broods with increasing and intolerable weight over all your country.

"Leaving you to consult with each other upon this invitation; We now do declare,—That whoever shall be found, and remain in peace, at his usual place of residence, shall be shielded from any insult, either to his person, or his property; except such as bear Offices either Civil or Military, under your present usurped government: Of whom it will be further required, that they shall give proofs of their penitence and voluntary submission; and they shall then partake of the like immunity.

"Those whose folly and obstinacy may slight this favourable warning, must take notice; that they are not to expect a continuance of that lenity, which their invertery would now render blameless.—Royal Gaz., 10, Jl 1779.

Wm. Smith says: "I suspect this Address to be the Composition of Cap² André one of the General's Aids de Camps who has probably been sometime at Work to frame a Substitute for that I drew for him before he went up the River & which he told Mr Tryon he did not like nor another that Mr Elliot had sent him."—Wm. Smith's Diary (MS.), VI, under Jl 3.

5 Congress passes a resolution "That Margaret Corbin, who was wounded and disabled in the attack on Fort Washington [see N 16, 1776], whilst she heroically filled the post of her husband who was killed by her side serving a piece of artillery, do receive during her natural life, or the continuance of the said disability, the one half of the monthly pay drawn by a soldier in the service of these states; and that she now receive out of the public stores, one complete suit of clothes, or the value thereof in money."—Jour. of Cong. (Ford ed.), XIV: 805.

In 1902, the Mary Washington Colonial Chapter, Daughters of the Am. Revolution, erected a tablet to the honour of Margaret Corbin in Holyrood Protestant Episcopal Church at Fort Washington Ave. and 179th St.—Kelley, Hist. Guide to the City of N. Y. (1913), 161.

Robertson's Gazette, says Smith, "shows the acrimony of the Loyalists aga[1] the popular Chiefs" in a poem entitled "The Times." July 6

The opening lines are:

"When faction brandishing her horrid sting
Infects the people, and insults the King;
When foul sedition skulks no more concealed,
But grasps the sword and rushes to the field;
When justice, truth, and law are in disgrace,
And treason, fraud, and murder fill their place;
Smearing beneath accumulated pain
Shall we be silent? Shall we not complain?
We will, we must; tho' mighty Laurens frown,
Or Hancock with his rabble hunt us down.
Should Atley summon to his savage bar,
To tremble at his nod be from us far.
Champions of virtue, we're the British—
The guards of Washington, the lies of Payne,
And greatly brave without one anxious sigh,
The wrath of Congress, or its Lords, the Mob."—Royal Am. Gaz., Jl 6, 1779; Wm. Smith's Diary (MS.), VI, under Jl 3.

7 There is a Composition [see Jl 13] in a Philadelphia: Paper of 30 June [error for Je 23] which [Rivingston] has copied in his [issue] of this Day that supposes [Great Britain] to have yielded to the Independency & that France has advised to Peace but that a Congress in Party opposes it insisting on the exclusive Fishery.

"Can this be," says Smith, "an indirect Way of giving Credit to a Lie to animate the People!—It is artful—There are Papers since calling the Author a Tory & defending him. To us we'll alie discours.

The British army marches from its Camp at Philiborough. One division goes to Mamaroneck, the other towards White Plains. —Robertson's Jour. (MS.).

Sir Henry Clinton, with a division of the British army (see Jl 8), reconnoitres "the Old Camp the Rebels had in 1776 on the White Plains," and then goes on to Byram River. Robertson says: "I saw Gen' Tryon's Fleet in the Sound, The Intention of our move I believe was to move Washington Accross the North River—

8 to set him in Motion."—Robertson's Jour. (MS.).

A writer signing himself "A Loyal American," addresses a very lengthy printed paper "To the Dis-United Inhabitants of the Dis-United States (so called) of America." It is a pro-British appeal, closing with: 

"Fear God, Honor the King,—and may you be approved before Heaven worthy of those blessings that Great Britain is devoutly wishing you,' as Freeman,' to Enjoy." One of these broadsides (4-page folio), taken from a bound volume of the Royal Gaz. for 1779, where it follows the number for July 10, in the N. Y. P. L.

9 Smith writes: "The present menaces at Connecticut take off from the Suspicion that the Publication by Tryon & Sir George Collier [see Jl 4] were too vaunting to compel to Submission. I thought such a trifling Force as I had at first heard of (1200) would raise Contempt & barely irritate."—Wm. Smith's Diary (MS.), VI. 10 The rebels cherish only the voice of a Boston writer, "with assurances, of eating their next Christmas dinner in New York. (peradventure in the Provost) Indeed Mr. Washington has declared he will very soon visit that capital with his army, as it is confessed, many Sons of liberty in New York ... hold a constant intercourse and correspondence with the Commander in Chief of the Rebel army, from whom he is supplied with accurate communications of all arrivals and departures, and of everything daily carrying on there, both in the military and civil branches. ... It pro-
vokes the well-affectèd to government, at a distance from New-
York, to perceive such comfort and accommodations afforded, to the
most ungrateful and insidious people upon earth." —Royal Gaz.,
Jl 10, 1779.

"Maj.-Gen. Patton asks the chamber of commerce to consider
ways and means" for the better Cleansing the City, and for raising a
fund for defraying the Expense of building. This is to prevent the
inhabitants "from throwing Filth & Rubbish from their Houses
into the Streets, & to oblige them to convey it to certain places that
may be assigned in each Ward for depositing it, & thence to be
taken away at stated times by scavengers to be employèd for
that purpose." The regulation is to apply to public buildings also.
—N. Y. H. S. Collections (1875), 221. See also Jl 2.

13

And Deserters came to Town from Washington's Army this morning —The Greater part with their Arms. Last week
17 came in."—Wm. Smith's Diary (MS.), VI.

Col. Edmund Fanning, having returned from Connecticut (see
Jl 4), reports that the "Stores at New Haven were burnt in Ins &
the next Day the Whole Town of Fairfield & ... Half of Nor-
walk." Commenting on this, Smith says, "Sir Henry Clinton dis-
likes these operations of Tryon's & told Govr Franklin he had
ordered him back —The other barely said he was sorry for it—What
did Sir Henry expect if not what has happened!—Is it not Folly to
recall the Troops at this Ins that when the Connecticut Farmers are in
their Harvest? This is a proper Time to menace the Coast & by
that means draw down numbers from their necessary Labour."—
Wm. Smith's Diary (MS.), VI. See also Jl 16.

14

According to a "recent enumeration of the inhabitants of
America," New York province contains 210,000 people.—London

Major Benson arrives at New York with "an Account of the
Rebels having taken Stony Point at 12 Clock last night—when they
were commanded by Genl Wayne—Col. Johnson & most of the
Garrison taken Prisoners."—Robertson's Jour. (MS.). See also
Wm. Smith's Diary (MS.), VI; and Kemble's Jour., 181. On July 24,
Kemble recorded information regarding methods used by Genl
Wayne in capturing this post.—Ibid. Cf. Conn. Gaz. (New Lon-
don), Ag 11, 1779; Johnston, Storming of Stony Point; Dawson,
Gleanings from Am. Hist. Pt. XI.

"Govr Tryon comes to Town from Huntington & goes to Head
Quarters."—Wm. Smith's Diary (MS.), VI. Later in the day, 
Tryon gave Smith this report of his interview: "Sir Henry Clinton
disapproves of his Burning Fairfield & Norwalk [see Jl 15] & dis-
covered clearly his Fears of the Minority who he said would make a
great Clamour about it. Intimated that it was contrary to his
opinion & orders. Tryon admitted the first but denied the last—
Saml Johnson's opinion to be for burning & on one Occasion when he asked for orders to burn Sir Henry had replied
I know you will if I don't forbid it ..."

"The Genl insists upon a Report from Tryon & to support the
hurrying as well as he can. —He will transmit it."—Ibid. For
Tryon's report of his expedition, see Jl 31. For Robertson's
comment, see Jl 23.

15

Maj.-Gen. Patton orders that the apartment in the city hall
formerly known as the library be given up to the marchal of the
court of vice admiralty.—N. Y. H. S. Collections (1875), 226-7.

16

The British troops march from Valentine's Hill to Dobbs Ferry
where they embark. Robertson says: "The Appò of the Shipping
getting so near aided by a Demonstration made by all the Cavalry
& Infantry ... determined the Rebels to Abandon any Attack on
Valentine's Hill. Post, and to throwing the boats which the Revolted the Rebels are sending a force to Attack."—Kemble's Jour., 181. See Ag 1.

Sir Henry Clinton and Lord Cornwallis go to Stony Point; "the
Works there consist of only one large Redoubt, and in forward-
ness."—Kemble's Jour., 181.

An ordinance is passed by congress, establishing a board of
treasury, and the proper officers for managing the finances of the
United States.—See printed broadside, in N. Y. P. I.

The British army returns to Kingsbridge.—Robertson's Jour.
(1875). See Ag 1.

17

Rivington prints an account of the "Proceedings of a Detach-
ment of the Royal Army under the command of Major General
Tryon" (see Jl 4). This detachment was divided into two divisions,
one under Gen. Garth, the other under Tryon. They repulsed the
Bustows at New Haven, Fairfield, and Norwalk.—Royal Gaz.,
Jl 31, 1779.

Commenting on this, Smith says: "Mr. Tryon can think of
no other Objection Sir Henry can have to his Report, but his Dear of
its discovering a zeal for the Interest of the Nation & the Con-
clusion of the War & that its crossing his private Politics, by shew-
him to John Smyth, treasurer of the design, the other
in trying for what he would wish to do has enough
upon Tryon's System to end the War. In Rivington's Paper of
yester: is the greatest Part of his Report to the Genl but his
Reasons for Desolating left out —It came from the Genl but Riving-
ton had Orders not to shew the Extract to any Person."—Wm.
Smith's Diary, VI, under Ag 1.

Speaking of Tryon's expedition, June says: "It was not a
matter of conciliating the rebels. It occasioned rancor and
inveracity, and instead of conciliating, it widened the breach.
Whether the General exceeded his orders, or not, or some other
"This Information from Dubois confirms the Propriety of Mr. Colen's Conduct & mine in declining to be Bail for St. John till we could know what the Charge was—Dubois does not know that the Letter from the Country is founded upon Intelligence from Mr. Wickham but says a Person intimate with the Ogdens said so & he believes he got it from them. This may be Colden. I kept my Promise to Isaac Ogden & was silent only observing that Wickham & St. John were sworn Friends & Wickham Friends here were still Friends to John. I mentioned Judge Ludlow & That Van Duncan his Brother in Law had spoken of St. Johns Confinement last Friday with Anxiety.

"I percieve also a Confirmation of my Suspicions that Elliot was desirous to bring in Colden & myself for Bail to gratify his Resentment agst Mathews & the Ogden's who speaks ill of him, but if Mr. Elliot knew the Evidence agst St. John he ought not to have declined his advice when I asked him yesterday to do it. I do not think he knew before Genl Patterson but to have approved rather my previous Enquiry into the Cause of the Commitment as well to avoid the Suspicions of Govr Franklin & the Refugees as out of Deference to St. H. Clinton.

At such Times & thus surrounded the greatest Circumpection is necessary and one should keep but little Company & of the best Sort."—Wm. Smith’s Diary (MS.), VI.

The St. John referred to by Smith was Michel Guillaume St. Jean de Crèvecoeur, author of Letters d’un Cultivateur Américain. Though he was a naturalized New Yorker (see D 23, 1765), the appearance of a French fleet in the harbour caused him to be suspected as a spy, and he was imprisoned for three months.—Letters from a Gentleman in America to a Friend (1794), Introduction. For his description of New York, see 1766.

"I found the Town very despondent last Night on Reports from the West Indies that La Mott Piquet had joined D’Estaing with 7 Ships & 15 Frigates & 90 Transports & taken St. Vincents & the Grenades while Byron was convoying the Island Trade to Windward & that the two Fleets had engaged off the Grenades & that we kept the St. Vincents but lost 1000 Men. Byron having been taken by the Greyhound of Piquet sailing a 3 May & return damaged by a Storm. I cant reconcile this with the Saturday news from St. Eustatia—the 18 & 22 Ships in distinct Divisions is too much for the French or English Fleets and if the 18 were English and endeavoring to escape why so far to the North & to the Leeward of our Windward Islands instead of directly before the Wind to Jamaica?—We have no West India Papers. Tin said Sir George Collier stop’d them there at the Hook on Sunday. Strange that he has loftered so. It was thought he was not out yesterday the Wind being at N. E.—It is yet from that Quarter—He is spoken of in Terms of the utmost Freedom as a Negligent Officer, devoted only to Gain."—Wm. Smith’s Diary (MS.), VI.

The commandant requests the chamber of congress "to lay before them a Table of such Officers as you should think ought to be allowed to Cartmen in this City," for "Those now established were first by the Gentlemen of the Old Insurance Office, at a time when Provision was higher, but Forage longer than at present."—Col. Rec. of N. Y. Chamber of Commerce, 1768-1784, 210. The suggestions of the chamber were embodied in the orders of Sept. 16 (q.v.).

Having debated the question since Feb. 23 (q.v.), congress finally formulates the conditions of a possible peace with Great Britain. They include the acknowledgment by Great Britain of the independence of the United States, the acceptance by her of certain specified boundaries of the United States, and the evacuation of all American posts by British troops. Also, "the common right of fishing" is not to be relinquished by the states.—Jour. Cont. Cong., XIV. 920-22. See S 27.

"My appoint[4] to the Chief Justices Place [see My 14] is in every Mouth."—Wm. Smith’s Diary (MS.), VI.

Smith writes: "I fear a general War in Europe. If Spain interferes Russia & Prussia may also engage—L5 Cornwallis understood that these Powers had entered into Treaty with Great Britain & that a categorical answer was demanded from Spain.—A Report that Russia offered us 20 Ships & 10,000 Men for 3 Years for Minorca—Should this be true & Spain declare agst us America will be partly neglected or may find Russians amongst them & at the End of the War be divided.—Our Calamities are then only commencing."—Wm. Smith’s Diary (MS.), VI. Spain had declared war on England, June 16 (q.v.), but the news did not reach New York until Sept. 1 (q.v.).

Smith writes: "The Measures of the Town Meetings in the
Regulation of Prices checks the Depreciation of money—but it ought to alarm the congress. Its natural tendency is to produce a general Scarcity. Julian the Emperor put it to Experiment and brought on a famine at Antioch, & so would Philip the Handsome have done in France if he had not repealed his Ordinance. Nothing can satisfy the Want of Money but Silver and Gold. They have a real as well as arbitrary Value—Paper is an inadequate Substitute. But in avoid'd one Risk Congress expose themselves to others:—They will not be chargeable with creating a Famine but will they not be blamed for not preventing it?—Besides they have every Thing to fear, divided as the Country is, from Discontents among their own Partizans—Every Murrumurer becomes a Tory; and Misery lessening the Party, the Populace will regain their authority to the Subversion of the New Frames contrived for supporting the usurpation. Everything in this Country predisposes to a Union but the foreign War retards the Operations for improving them."

—Wm. Smith’s Diary (MS.), VI.

"The General Young, 2d this number Concert. 25 A.M. 1775 Spanish surprise Fort Aug. is for an attack that is divided. Jour. News "It Gaz.,—tired and impressed the I, may appear since they are thrown down, and the number of troops leaving the party. They will be in the southward."—N. T. Jour. (Poughkeepsie), S 20, 1779.

News reaches Trenton that "the enemy [British] are very busy, throwing up works and fortifying on New-York Island, at or near Horicon Hook, within several miles of the city, from river to river; that they have lately sent out of New-York, a number of whig families; impressed all the cemen and other persons to the number of about 700, and put them on board armed vessels; and that they have drawn a line of ships across the Narrows; in consequence, it is said, of their fearful apprehensions of the arrival of a French fleet in that harbour, which has thrown the city into such confusion and concern."—Penn. Packet, Ag 21, 1779; N. J. Gaz., Ag 11, 1779.

Speaking of Gen. Pattison, Smith says: "There is now set up by this very Commandant Music every Evening at the Church Walls [see Ag 19]—What a Medly assemble them!—A horrible Contrast!—Ladies in the Walls—The Mob in the Street & Funerals crossing the Company to the Church Yard. The Parson there offers up a doxology.

"It would appear as if he were turning the War merely into a Defence—All the Troops except the Garisons at the Highlands are called in to this Island . . . Isaac Low hints that there is a Talk of cutting a Passage across this Island from River to River & that Gates is at Byram with 4000 men. Tryon knows nothing of it. Mr. Robertson alludes to this Passage from Pr. the Dutch to Harman’s Point to Raritan—Some look for an attempt to burst this Town. Others for an Attack at Staten Island—Some for a French Fleet. Lord Stirlings Division is Come down to Pompton out of the Clove."—Wm. Smith’s Diary (MS.), VI.

"How scandalous," says Smith, "is the Conduct of Administration & the Naval Officers under them—The Privatering Business languishes & the Owners are selling out at the Rate of 6 Vessels in a Week—Their Prizes are taken off of the Hook & sometimes the Privaters. The Rebels make this their Cruising Ground & send several armed Vessels in Concert. There is a Want of Naval Strength here. When the Frigates are in these Seas they are too often & too long in the Port—We have taken no French Vessels for several Months past—It would seem as if the French Merchants were tired of this Commerce."—Wm. Smith’s Diary (MS.), VI.

"This morning the powder-magazine at Fort Kniphaussen was torn down and the wood-work used on Forsed Hill [Forest Hill, on which Fort Tryon stood—see L. M. R. K., III: 965]. Likewise the work of Fort Independence and King’s Bridge, which was transported in wagons—"—FoA K. Jour., Jour., 90, 21. Sept S 12.

In the early morning of this day, Major Lee and about 400 of the troops under orders from Gen. Stirling execute a surprise attack upon the garrison at Pennwicks, and capture about 160 prisoners; they send these to Philadelphia.—N. Y. Jour., in them 23; N. J. Gaz., S 1, 1779. See also Winsor, VI: 559. Robertson gives the date as August 18.—Robertson’s Jour. Campaigns 1779 & 1780 (MS.). See also Kemble’s Jour., 182—83.

Smith says of the incident: "We have lost 24 Men carried off; 2 are killed & two wounded. Col. Gordon is gone over with 200 Men. Tryon & Scott speak slightly of the Com’l in Chief. Mr. Tryon is not sure that he is not playing into the Hands of Opposition. He grows apprehensive of a mutinous Spirit in an inactive army—cannot find what Plan the Gen’l acts upon. The Town disgusted & dispirited. Lord Cathcart is appointed Quarter Master General—It does not please—He is Young & so Short Sighted as not to distinguish a Man from an Ox at 20 Yards.—Sir Henry is going down Hill in Point of Reputation.

"Dr Bally says the firing began an Hour before Day.—No Troops went over till a Hour after Sunrise . . .—2 Ships arrive from Quebec—all well there 16 July—Many Troops gone to the Western Ports.

How shamefully we sit in an act in not dispatching the Fleet earlier! What Mischief from the Want of Naval Strength on the Coast—We hear constantly too that Nothing can be done on the Land Side till the Reinforcements arrive.—This is the Plea for every Blunder & for an infamous Inactivity. The Contraction of our Lines is laughed at even in the Army. It is pertinent ask’d why a Party could not have crossed from King’s Bridge to execute what 100 Miles is as much off the coast of the Post of Poulus Hook? The Boys in the Army hint their Contempt of the General, & the common Soldiers murmur. They begin to despair of the Fulfilment of the Promises of Land, made in 1775 at Boston."—Wm. Smith’s Diary (MS.), VI.

The diary of the Moravian congregation states: "In the recent walk by the ruins of Trinity Church and its grave-yard has been raised in the garden a paper green; benches placed there and many lamps fixed in the trees, for gentlemen and ladies to walk and sit there in the evening. A band plays [see Ag 11] while the commander is present, and a sentry is placed there, that none of the common people may intrude."—Penn. Mag., X: 427.

Admiral Arbuthnot and his fleet arrive from England this morning. Smith says: "They are said to be 76 Vessels—Only 2 Battle Ships—No Travellers. They are expected to arrive with the Defence to Quebec—some to Newfoundland with another Ship of the Line—they are to rendezvous here."—Wm. Smith’s Diary (MS.), VI; see also Robertson’s Jour. (MS.). Kemble states that "the Troops in general [are] Unhealthy; between 4 and 5 thousand."—Kemble’s Jour., 183.

"Up to date we have had a surprisingly large number of sick, which increases daily, "—Penn. Mag’s Jour, 92. A similar entry appears under Sept. 2.—Ibid. See S 8.

"At a Meeting of the Loyal Refugees of the Province of New York, at the House of Mr. Amory in the Fields, . . . for the Purpose of electing a Committee, to unite with the Committees elected by the Loyal Refugees of the other Provinces, for the Purpose of Corresponding with one another, and to take care of the Affairs of other Business, as they should conceive conducive to the interest of the whole," it is agreed that no one shall be elected or appointed a member of a committee of correspondence who at any time or in any way has taken active part with the "rebellious Americans."—Royal Gaz., Ag 19, 1780. See N 21, 1780.

An expedition is on foot, for which transports for 8,000 men have been ordered.—Jour. of Hugh Gaine, II: 6a.

By will of this date, Jacob Blackwell leaves to his sons, James and Jacob, "my Island known by the name of Blackwell’s Island."—N. Y. H. S. Bull., Jr., 1921, citing Hatfield’s Hist. of Elizabeth, N. J., 895: Riker’s Newstown, L. I., 3542: Abstracts of Wills, X: 5.

"In the Evening the Packet arrived with Accounts of a Spanish. War, and the great exertions made in England in consequence of it."—Kemble’s Jour., 183; Robertson’s Jour. (MS.). See Je 16.

Gov. Tryon issues a proclamation of Spain’s declaration of war against Great Britain (see Je 16). The proclamation reads in part: "Authorities are arrived for granting Letters of Marque, and until the same are obtained, I have it in Command to signify the Royal Assurance to the Owners of all Ships hearing Letters of Marque against the French King, and his Subjects, that his Majesty will consider them as being under his Majesty’s Share of all Ships and Property which they may make Prize of."—N. T. Merc., S 6, 1779. Under date of Sept. 8, Smith wrote: "Mr Tryon published last Monday in Gaine’s Paper the Proclamation I drew for him last Friday."—Wm. Smith’s Diary, VI.
The General Advertiser, a weekly newspaper. This paper should be distinguished from The New-York Mercury which Hugh Gaine started on Aug. 3, 1752 (q.v.).—Early Newspapers, II: 425; Brigham, A. A. S. Proc. (1917), 439. See, further, F 15, 1782.

7 Washington informs the president of congress that "They [the British] have been for some time past foraying across New York Island and its environs, to which end the British Admiral would most probably go up to Brocklink on Long Island."—Writings of Geo. Washington (Ford ed.), VIII: 40. On Sept. 13, he wrote the same to Count D’Estaing; also that they "have lately fortified Governor’s Island, near the city," etc.—Ibid., 51.

A list of the owners and tenants of houses on South Street, Water Hall, and Exchange Ship is prepared.—See original list in box lettered "N. Y. M.S. 1761-1800." in N. Y. H. S.

That there is lack of harmony among the British officers, is revealed by Smith in his diary: "Sir Henry [Clinton] is thought little of in the Army. There are Dissentions in his [official] Family. He has quarrelled with Lord Rawdon his Adjutant General & Major Drummond whom he sent Home to get a Regt of Horse & the Paym of £5,000 sterling of an Old Debt to his Father—Yet he reproaches Drummond with doing nothing for him. Neither of them go near him. Colla Stewart 'tis said is to succeed Lord Rawdon—he has made a new Aids de Camp[,] one his cousin Lord Thomas Pelham Clinton the Duke of New Castle’s 2d Son the other a M’ S. St George an Ensign of £6000 per annum. He has not a single Regt of Horse but him. I have all this from Capt. David Scott of the Artillery who speaks freely of them in his Book. Ensuring Sir Henry Clinton & I believe the Sentiments of Genl Patterson with whom he is intimate & from whom I stand aloof. Scott faults the Commander in Chief for Calling in the Troops all Summer to this Island—Thinks they might have saved dry Forage by laying on the other Side of the Hudson—that Tryon should have gone out stronger in July—& not have been recalled so soon—Scott is intimate with M’ Tryon.—Wm. Smith's Diary (MS.), VI.

Von Krafft records in his journal under this date: "On account of the large number of fever cases[,] we could not spare more than 20 men per regiment for work. There was a veritable epidemic here and the inhabitants and Rebels also were frequently visited by contagion."—Von Krafft's Jour., 93. See S 23.

This day were brought in here two French ships, of 370 tons each, taken by three privateers belonging to this city. They are laden with wine, brandy, and provisions.—From N. Y. letter in London Chron., O 16-19, 1779.

Supt.-Gen. Elliot publishes a notice that duties are to be paid to him on all prize goods that have been condemned at the port of New York since October, 1776. He requires all agents of ships of war and others, to have a bond & sureties which are given or paid in the Office, in Water St., and pay these duties, "agreeable to the Directions of the Lords Commissioners of the Treasury." In the future, "before Condemnation of any dutiable Prize Goods," the agents shall "make a Return to the Superintendent’s Office of all such dutiable Prize Goods, that the same may be regularly weighed and gauged." The agents' accounts, required by the judge of the admiralty to be delivered to the superintendent, must be sworn to before Mayor Mathews.—Royal Gaz., S 11, 1779. See also Mr 9, 1780.

Sir Geo. Collier returns to New York (see Jl 28) from Penobscot, and from him Kemble obtains and records the following account of the events in the section that he reached Penobscot on Aug. 14, "with one 64 and 4 Frigates, and the Rebels that very day burnt all their Annam Chaced off of Vincennes, etc. a very considerable number of Gun Ship; their Frigate Warren burnt with about 28 Sail of Transports; the Crews from the whole Landed, and made their way thro' the Woods in a sad plight to Boston. They landed on the 28th. July, about 1,400 Troops besides Marines, from which time to the 14th. August they had besieged Brig. Gen. McLean, who was en- trenced on an Advantageous ground with about 800 Men; Several skirmishes it is said are going on, the Evacuation during the Siege, and the General, with his Troops, must have fallen in the end, if not relieved."—Kemble's Jour., 184-85.

Smith writes in his diary: "'Tis said Washington has but 4000 Effectives & the Army so scant as to have but a Weeks Provisions a Head—They have so exhausted this Province that the very Forrest come into it rich. Meat & all Bread is brought from Pensylvania—A Sorty of the British Army would much Embarass the Continental Troops—It would be worth the Experience to push with a

F ortnight's Provisions to New Windsor thro' the Clove."—Wm. Smith's Diary (MS.), VI.

"Peter DuBois speaks of David Mathews the Mayor as a Prodi
gate & Villain, making Money by various unjustifiable Means."—Wm. Smith's Diary (MS.), VI.

"That he has set up what he calls a Recording Office held by one Child, to take the Proof of lost Papers—That a Guinea is paid for the Mayorality Seal to a Certificate which the People are taught to consider a legal Substitue & Child is going mad besides."—Kemble's Jour., 184.

"That he sends out Parties into the Country to plunder & he has a Share of it. That he receives a Guinea for every Certificate of the Landing of Tea at this Port & insists upon this Branch of Business at Saml Kemble the Naval Officer. That he has received stolen goods & said he sent them to the Poor House—DuBois has seen Spoons, Watches, Clothes &c to a great amount in his Hands which he said he has so disposed of & yet when Genl Jones the late Commandant ordered the Vestry to account for this as well as other Funds they denied that any such Effects were ever sent to the Poor House. If these Charges are true this Man must dread the Restoration of the Peace of the Country & the Re Establishment of order."—Wm. Smith's Diary (MS.), VI.

Lieu. Von Krafft records that "[Fort] Independence was begun to be torn down."—Von Krafft's Jour., 94. See Ag 17.

A letter of this date from Gen. Knox to Col. John Lamb states: "We are all in high spirits on a Report that a French fleet supposed to be part of Count D'Estaing's is at the Hook. The report comes from Deserters who came in last night. They say that the French ships 'cha'd the Reasonable into N. Y. last Friday.'—From the Lamb Papers in N. Y. H. S.

The rates that cartmen may charge are fixed by order of the commandant. After Sept. 20, offenders shall "forfeit Forty Shillings for every such Offence, one Half to the Informer, the other half to the City Aims House."—N. Y. Mer., S 26, 1779. See also Dawson's report in Proc. Bd. of Alds., XXXXI: 217-18.

Sir Andrew Hammond arrives at Sandy Hook with "a Fleet of Victuallers & Transports w'h some recruits."—Robertsion's Jour. (MS.). Gaine says: "There is it supposed about 1500 Troops on board this Fleet."—Jour. of Hugh Gaine, II: 64. See also Kemble's Jour., 185. See S 22.

Gaine states: "The Fleet still coming up and the Expedition under the Command of Lord Cornwallis getting ready, and will sail in a few days."—Jour. of Hugh Gaine, III: 65.

Under date of Sept. 24 Smith records: "Lord Cornwallis fell down to the Hook last Night—conjectured that he has 3600 Men in 6 large Regts & that they are destined to South Carolina. Dubitat."—Wm. Smith's Diary, VI. Robertson also says that the town is in great excite, hearing with Cornwallis fall down to the Hook."—Robertson's Jour. (MS.).

Paul Jones, on the "Boo Homme Richard," captures the "Serapis." The engagement is described in a letter from the captain of the "Serapis" to the British admiral office.—Ann. Reg. (1779), 309-12. For an account from the American view point, see Penn. Factions (Phila.), D 16, 1779. For additional literature on this famous naval battle, see Channing, Hist. of U. S., III: 313-14.

Sir Andrew Hammond and most of his fleet came in. —Kemble's Jour., 185.

"I never knew," writes Smith, "any Disease so generally endemial as the intermittent Fever now prevailing [see S 8] both in Town & Country. We have had Eleven down at a Time in this Expedition—Ten at Mr. Elliott's—Not a House escapes—We have scarce well Hands to attend the Sick—But happily it is not a mortal Season."—Wm. Smith’s Diary (MS.), VI. See O 5.

"Gave Mr Tryon a Draft of a Letter from him to Mr Styles Presidtl of Yale College in Amstl to his Request to restore Mr Clap's MSS supposed to be carried off from New Haven on the 6th of July last."—Wm. Smith's Diary (MS.), VI.

Cornwallis's fleet (see S 22) is "stopped from going to sea."—Robertson's Jour. (MS.). On Sept. 25, the troops returned to Staten Island, except one regiment which was ordered "to stay at Sandy hook where the Batterys are to be repaired—as last Year 4.18 REG. & 2 HOWs."—Ibid. See also Kemble's Jour., t86.

Kemble records a report "that Monsr. D'Estaing, with 24 Sail of the Line, 14 Frigates, and some Transports, were seen off the Coast of St. Augustine and Georgia; some say to the Westward of Bermuda."—Kemble's Jour., 186.
This (Sept. 26) "being the Anniversary of their Majesty's Coronation," the day is observed here "with every possible Demonstration of Loyalty and Joy." At noon, "a Royal Salute was fired from the Battery, and at One o'Clock from the Shipping in the Harbour. In the Evening there was a grand Exhibition of Fire-works, after which a splendid Ball was opened by the Gentleman of the Army in this Garrison."—N. Y. Merc., S 27, 1779.

1779

26 John Jay is appointed by Congress "to negotiate a treaty of alliance and of amity and commerce between the United States of America and his Catholicick bishop—" and John Adams is chosen "for negotiating a treaty of peace and a treaty of commerce with Great Britain." (see Ag 4).—Jour. Cont. Cong. (Ford ed.), XV: 1153; Winsor, VII: 57.

"Transporting goes into the East River, supposed, with some reason, to proceed to Rhode Island to take off that Garrison."—Kemble's Jour., 186.

"A Cricket Match for 50 Guineas Between Brooklyn Club and Greenwich Club, [sic] to be played this Day at the House of Loosely and Elms'. To begin at 3 o'Clock in the Morning."—N. Y. Merc., S 27, 1779.

1779

28 The country-seat of Hon. John Watts, three miles from town, is destroyed by fire.—N. Y. Merc., O 4, 1779.

"A Meeting this Evening at Hills where a Requisition was made by the Commandant for 500 men to work at the Governor's Island, and immediately joining by 6 o'clock, which was immediately agreed to."—Jour. of Hugh Gaines, II: 66.

He adds, on the following day: "The Men required last Night were sent off this Morning at the time appointed and more than the number required. All the ships of War are gone to the Hook."—Ibid.

Oct

1 A resolution is passed by the assembly requesting the Government to issue a proclamation, "Strictly forbidding all Persons whosoever to plunder the inhabitants of Long-Island, or any other Place in the Power or Possession of the Enemy, within this State . . ."—Assemb. Jour. (London ed.), 47.

Kemble records that "A number of Transports went to the Hook, to be sunk in the Passage to that Harbour, if the French Fleet marched on, in consequence of the attempt and attempted to come in."—Kemble's Jour., 186. See O 10.

Orders are issued by the commandant of the city for all the male inhabitants of a proper age to assist in throwing up works on Governors Island. The number of inhabitants it was imagined amounted to 4000, half of whom were to go on fatigue one day, and the other half on the ensuing day, Sundays not excepted.—N. Y. Gazette, O 10, 1779. See O 9.

"In a Jersey Paper of 22d Sept I saw an Address from the Congress to the People at large of 13 Sept stating their Paper Issues & animating them to a Prosecution of the War. It is a Proof of great Obedience & yet discovers Fear and a Dread of their Disorders."—Wm. Smith's Diary (M.S.), VI.

5 This Country may be said to indulge a Pesteine—It can't be called a very Mortal Season but I never knew so prevaile a Sickness [see S 235]—Agues and Intermittents are the common Affliction—In some Instances the Fever is malignant carrying the Patient off in a few Days.—The aged drop off under the Age—Some lay long under tertioris or remitting Fevers & die when they are putrid.—While I am writing three of my Children are down and my Brother's Son Abraham—Ivy the Commandant has had the Age but is recovered.—We are a Hospital at this House—Mr. Stuyve\nts Family is generally indisposed—We have had eleven or 12 sick at a Time—Scarce Hands enough well to attend the Diseased.—This is not the Case only within the British Lines but all along the Sea Coast of New England and in Jersey & Pensylvania. Would to God that the common Affliction Might incline both Parties to Peace & quicken the Period of our Deliverance from the Calamities of a destructive War.

"The Season of Winter advances & the Town is destitute of Fuel Several causes: (1) The diseased State of the People in the Country. (2) The Risk of Capture in the Sound—Several Wood Boats lately taken the armed Vessels drawn to the Hook. (3) The General totality of this Negligence of this Matter—Had he posted 5000 Men on Bergen Neck after his retiring in July from West Chester the Citizens & army might have been supplied in 10 or 14 Days for the Year—but what is worse Managemt the Horse have been Oct. ever since upon dry Forage and how they are to be supplied thro' the Winter seems to be no Part of his concern, but it fills the Loyalists with concern—They in general grow despondent.—Of the Military Government all are impatient & regret the Delay of General Robertson—Nothing can be more injurious to the King's Interest than the negligent and underhand conduct of the Army—In the Despair arising from unfavorable Prospects as to the Issue of the Struggle every Distint works Disaffection—General James Pattison of the Artillery has been for some Time Commanded—he is warm rain & water.—Last Saturday Evening a drunken Soldier of the Guards forced himself into a Cart driven by a Negro in the Bowery Lane. D'Baily who saw him thrown off & thinks the wheel ran over his Breast, stop'd his Chais & led him to a House & sent certain passing Soldiers to notify his Condition at the Hospital—The Provost Marshal called the next Day & took Baily to the Jail, where he remained till 10 at Night—he was not carried to the Commandant—This Man is enraged & told me to Day he would demand Satisfaction or Leave to go Home or Leave to quit the British Lines, averse to continuing any longer under Military Government—In short a Day scarcely happens that Multitudes are not offended. I foresaw this and spoke and wrote freely on the Subject to Lord Carlisle & Mr. Eden. Tryon will do nothing. Sir H Clinton has frowned too much upon his Office as Governor. No one more interpose. Clinton is the Man.—Upon the Necessity of the Council I recommended—and as Lord Geo: Germaine according to Mr. Patterson's Letters was in the Opinion of erecting the Civil Authority last Winter he must deserve much Censure for not sending out the New Governor earlier. Can it be that he dreads to offend Sir H Clinton & lose his Services—That very Simplicity shows him incompetent for his Situation. To the same distant Spirit I implore his Good & General to act at Discretion & his flattering applause of the March thro' Jersey last Year."—Wm. Smith's Diary (M.S.), VI.

Major General Pattison orders that some of the convalescents from the general hospital "be lodged for a time in the Barracks near the Provost Goal."—N. Y. H. S. Collections (1855), 277.

5 Washington writes to Lord Townsend of a letter received from Mr. Patterson who had passed to the New State passed to him which amounted to "Counsellors, Solicitors or Attorneys at Law" before April 21, 1777, and providing for the issuance of new licenses to any qualified person who "has conducted himself as a good and zealous Friend to the American Cause, since the Commencement of Hostilities by the King of Great-Britain." This law was passed because many heretofore licensed lawyers had "gone over to, and put themselves under the Protection of the Enemy," the said law being "necessary to prevent their conducting themselves in such a neutral or equivocal Manner, as has justly rendered them suspected of disaffection to the Freedom and Independence of this State."—Laws of N. Y., 3d sess., chap. 14.

"Head Quarters removed to New York [meaning, Clinton's return]. Lord Corwallis's Corps ordered to be in readiness to Embark, suppose for Stony point."—Kemble's Jour., 186.

5 Washington writes to Lord Townsend of a letter received from Mr. Patterson to Lord Townsend which attack upon New York by D'E斯塔ing's fleet (see O 4). He says: "We have been indefatigable in making every Point of Defence as Strong as Time will permit, in raising a Battery at the Light House, lining the Heights of Staten Island & Long Island at the Narrows with Cannons, repairing all the Batteries at New York & planting the heavy Guns lately arrived, upon them, as likewise repairing the ruined Fortifications & Batteries, erected by the Rebels on Governor's Island. But the Difficulty was to find Hands to perform this last work, owing to the very Sickly State of the Army and the great number of Troops already employed in carrying on extensive Works of Defence, in the different parts of this Island—and on the opposite side at Brooklyn. I therefore called a Meeting of the principal Inhabitants of the City, and stated to them the Importance of the Citizens taking up the Spade & Pickaxe, to defend & secure their own Property, against a Foreign Enemy. They most readily & obligingly met my Wishes, and the next Morning five hundred Citizens were at Work throwing up Earth, &c. &c. on Governor's Island—they still continue their Labour with great good Will and Cheerfulness, and are now formed there into a regular Encampment—A great many of the most Capital Merchants & Shopkeepers pique themselves upon working with the rest, & will receive no Pay or Reward.—The lower Class are paid at the Expense of the City at the Rate of Ten Shillings Currency per Day, and their Rations of Provisions from Government."—N. Y. H. S. Collections
1779
(1785), 137. See also letter from West Point in Penn. Packet, O
19, 1779 and N. J. Gen., Ap 12, 1780.
10 Kemble records: "the singing of about nine or ten Transports at the Hook."—Kemble's Jour., 187. See O 1.
11 Kemble records: "Sir Henry Clinton went up the North river, leaving the 7th, 23rd, 33rd, and Volunteers of Ireland Embarked, to proceed to Stony Point, under Lord Cornwallis, should they be wanted."—Kemble's Jour., 187.
13 "A Privateer Sloop brought in a Spanish Packet from Havana, giving intelligence of the intended motions of Count D'E斯塔ig's Fleet &c &c."—Robertson's Jour. (MS); Kemble's Jour., 187.
14 David Sproat, a Loyalist of Philadelphia, having joined the British troops at New York, is appointed commissary-general of naval prisoners. He continued in this capacity until the end of the war. See J a 11. "Upon his appointment he at once set to work to release the naval prisoners then at New York and by the following year had exchanged 10,000 and had a balance of 800 due."—David Sproat and Naval Prisoners in the War of the Rev., by James Lexon Banks (1900), 4-5, 42. For a statement of Sproat's further activities, contained in a memorandum of his, dated March 25, 1784, after he was attainted of high treason by the Americans and his estate confiscated, see ibid., 116-18, 130-27.
15 The legislature of the "State of New York" passes "An Act for preventing Robberies within this State." This requires people who have been robbed to make an oath before a justice of the peace concerning the circumstances of the robbery. The justice must then "cause Hue and Cry," and all able-bodied men in the district must answer and help in the pursuit of the robbers. If the property is not recovered by these means, the justice is to call a meeting of the other justices in the district, the supervisor, assessors, and coroner, and make a robbery order on the "Persons in the said Town, Manor, Precinct or District, who have not manifested themselves attached to the Liberty and Independence of America."—Laws of N. Y., 3rd sess., chap. 19 (printed by Holt, 1782).
16 The trend of British affairs is significantly told by Kemble in the following record: "Received Accounts by a Privateer of an English two decker being taken on the 25th. September off Tybee, by twelve Sail of the Line, French; the English Ship had been dismasted; supposed to be Sir James Wallace, from every Circumstance. "Sir James carried upwards of £53,000 for the use of the Troops in Georgia. A Rebel Paper, also received this day, says that the French fleet had taken two Spanish Squadrons off the Island of St. Domingo &c &c and twenty-five hundred Men, supposed to be the Troops at Beaufort, under the Command of Lieut. Col. M'Intysh. "How must our Commander in Chief feel with all these blows, added to his own Conduct, despised and detested by the Army, his unheard of Promotion to the first Departments of Boys not three Years in the Service, his neglect of old Officers, and his wavering strange mad Behavior. "If Government does not remove him soon; our Affairs in this Country will be totally undone."—Kemble's Jour., 188.
17 "All the Rebel Papers," says Smith, "show that the French Fleet is expected. If not fine Stratagems are concerted to lead us to believe it—Gaine's Paper intimates the Collecting of 6000 Barrels of Flour for it.—The Philadelphia Paper has a Preamble to an Act purporting that much Bread will be wanted—Reported that Washington has called Sullivans Troops & L4 Stirlings to him & a Part of Artillery from Connecticut for some great Enterprise."—Sm. Smith's Diary (MS.), VI.
18 Buildings in New York are appropriated for the use of the British forces, for which purpose a printed circular demanding payment is issued from Mr. J. S. Collector, 1783, 280, 283, 289, 290, 297.
19 The diary of the Moravian congregation states: "Of late we are under some apprehension that our chapel might be taken for a hospital. The old Dutch Church, the only one in use for the Dutch, has been desired, and at the end of this week will be taken for that purpose."—Penn. Mag., X, 478. See O 29.
20 The troops are all in high spirits at New York, wishing for nothing so much as a second visit from d'Eスタig this winter, which they were very well prepared to receive."—London Chron., O 16,
21 1779. "Great Offence is given by Gen'l Patterson to the Physicians and Surgeons for not providing Barracks for the Sick who are numerous & in Tents near Greenwich—Yesterday he determined to put them into the new Dutch Church, that has neither Floor nor a Close Window.—To Day he devoted the old Dutch Church to this use too for the Disgrit of the low Dutch People who have their shipp'd in it. The Hospital desire the New Brick Meeting formerly taken from them by Gen'l Daniel Jones but Patterson will not find other Stores for the Artillery Articles there deposited by Commis- sary Grant.—The Commandant becomes odious—Tis said his Emoluments amount to £50 sterling a Day, and that he shews intol- erable Partialities to oblige & gratify the Officers of the Train at war—Heead be it known to the People for General Robertson's Arrival."—Win. Smith's Diary (MS.), VI.
22 The British evacuate Stony Point. "The Rebels came upon it instantly after it was left & fired at the Ships from the Western Shore down to Tappan Bay."—Win. Smith's Diary (MS.), VI, under date of O 25. See O 26.
23 New York State passes "An Act for the Forfeiture and Sale of the Estates of Persons who have adhered to the Enemies of this State, and for declaring the Sovereignty of the People of this State, in Respect to all Property within the same." This act of attinder declares that the estates, both real and personal, of 59 specifically named loyalists, including many well-known residents of New York City, are forfeited to the state, and that they themselves are forever banished from the State. It also makes it an act of treason and indictment and trial of all persons found within the state after the passage of the act, who are suspected of loyalist tendencies, their death (as in all cases of felony), and the confiscation of their prop- erty, on conviction. It vests all crown lands in the people of the state, and authorizes the appointment of commissioners, for the sale of all confiscated estates, their powers and proceedings being defined.—Laws of N. Y., 3rd sess., chap. 25 (printed by Holt, 1782); 1 Greenleaf, 313; Van Tye, The Loyalists (1902), 195, 240; Gerard, Treatise (1872), 5. See Mr 10, 1780. For the judgment-roll in these cases, see 1783. For the full text of the Act of Attain- der, or Confiscation Act, see Jones's Hist. of N. T. during the Rev. War, II: 310-23; and its history, in ibid., II: 524-45. For a detailed account of the Bowery estate of James De Lancey, its forfeiture, and the official abstract of its sale by lots, in 1784-7, with purchasers' names, prices, etc., see ibid., II: 549-59. See also List of loyalists against whom judgments were given under the confiscation act, 1783, in Emmet Coll., N. Y. P. L., bound at back of "N. Y., Colony & State. Naturalization statistics;" also Transcripts of the Manuscript Books and Papers of the Commission of Enquiry into the Affairs and Services of the American Loyalists, preserved amongst the Audit Office Records in the Public Record Office of Eng- land, 1783-90, in N. Y. P. L.
24 Kemble records: "Heard the Garrison of Stony Point were Embarked."—Kemble's Jour., 188. On Oct. 23, he continued: "That they were come down to Spilling Devil Creek, and that the Troops were Embarking heavy Artillery at Rhode Island."—Ibid.
25 The legislature passes an act "to provide for the temporary Government of the Southern Parts of this State, whenever the Enemy shall abandon or be dispossessed of the same, and until the Legislature can be convened." It applies to the counties of New York, Suffolk, Queen's, King's, and Richmond. It provides that the person administering the government of the state, the president of the senate, chancellor, judges of the supreme court, senators, assemblymen, secretaries of the state, and all other judges, or any seven of them, of whom the person administering the government shall always be one, "shall be a Council," with power to make ordinances for certain purposes. These purposes are: preserving peace and good order; preventing a monopoly of any of the necessaries of life, or of any goods, wares or merchandise within the province, and prohibiting their exportation out of the district; billeting troopers; seizing and impressing fuel, forage, vessels, horses, teams, carriages, and drivers; supplying the markets within this district with provisions, and regulating their prices; holding and regulating elections for senate and assembly, and city and town offices (particularly "to prevent Persons charged with, or suspected of Disaffection to the Freedom and Independence of this State, from serving, or being elected at such, N.Y. county; and to confine anyone charged with treason or other offence. The
powers of this council shall cease" on the sixtieth Day after the first
Day on which they shall meet, or on the first Day after a Quorum
of both Houses of the Legislature shall be convened, after the Enemy
shall be abandoned, or be dispersed of the Southern District of this
State, whichever shall first happen."—Leaves of N. Y. (1779),
chap. 28.

The act was printed in No. 1 of Holt's Ind. N. Y. Gaz., on Nov.
22, 1783, with a supplementary act of March 27, 1783 (q. v.); and
in subsequent issues Holt published the later supplementary acts of
Nov. 28, 1783 (q. v.), Dec. 13, 1783 (date of publication, 5. 12),
Feb. 14, and 1783 (q. v.).

"The Mail of last Saturday" (O 23), recorded Smith on Oct. 25,
"threw the Town into Consternation by alarming Letters of a
mercenary Invasion & certain Intelligence of the Superiority of the
Combined Fleet in the Channel. It increases the Rage of the
General for the Inactivity here.*

*A Yeoman from Rhode Island with an Account that the Troops
will be here to Morrow, & that the Commander was not got there
before the Evacuation. Arbuthnot with the Troops for Halifax
still at the Hook.—No Confirmation yet of the Landing of the
French Troops in Georgia or of the Loss of the experiment with Sir James
Wallace—Conjectured that the French Fleet has met with a Storm
and that he passed disabled Vessels. A Vessel from St. Kitts in 21
Feb. says from St. Croix or reported that D Eustace was on the
Georgia Coast & that Parker's Fleet had left Barbadoes In
Pursuit of the French."—Wm. Smith's Diary (MS.), VI.

Kemble records: "This day my Resignation [of O 15] was
accepted by the Commander in Chief, and Captain André, 54th,
declared in orders as my Successor."—Kemble's Jour., 188. See also
25.

"The following is a pretty accurate list of the land and naval
force, at New-York, viz. 9000 troops on Long Island; 4000 on
York Island; 1500 on Staten Island, and about 1000 in the
different forts at Flows-Look, Verplanck's and Stony Points, etc.—
N. T. Jour. O 25, 1779.

Orders to evacuate Rhode Island (see O 23) are countermanded
by Clinton. Smith states that these orders came "after all were
abroad, the Word dismantled the Gardens cut up & (miserable
dicut) much Forage burnt for want of Vessels to bring it off [the
our Harbour is crowded with unemploy'd Ships. We shall now
by crowning these Islands increase the Miseries & Disguits of the
Farmers.—Another ill Effect of the Neglect of the Scheme of Policy
I have so repeatedly urged in my Letters to Ld. Carlinse & Mr.
Eden."—Wm. Smith's Diary (MS.), VI.

Robert Bidulph, in a letter from New York concerning the
progress of the war, says: "We have evacuated Stony Point &
Rhode Island. I imagine the Object is to keep Halifax & this Place,
which by the Dillgence and Perseverance of the Scottish Merchants
is become very valuable. New York in itself seems as little worth
consideration as any Place of an equal Number of Habitations by
people. This rumour has been the cause of our Scurrying for
the safety of the Bar, which can only be pass'd at certain Times of Tide—the Ice in
the Winter either Cuts them to Pieces or makes them entirely useless. . . ."—Mag. of Hist. (1915), XX: 112-23.

"The Garrison of Rhode Island came to N. York that Island
being evacuated."—Robertson's Jour. (MS.). Kemble records its
arrival under Oct. 29.—Kemble's Jour., 188.

"As shooting with bow-and-pieces near the high roads has caused
fatal accidents, the commandant publishes a notice that he "judges
it necessary for the public safety, to prohibit all such Bowing
near the environs of the city, or within half a mile of any high road
or public frequented foot path . . ."—Royal Gaz., O 27, 1779.
It was necessary to repeat the order in the following year (Royal
Gaz., O 25, 1780), and again on Oct. 25, 1782 (ibid., O 26, 1782).

"This Morning, about 2 o'clock, Lieut. Col. Simcoe, with about
100 Cavalry, landed at Amboy, and proceeded to Boundbrook,
where they destroyed 18 flat Boats and some Stores; they then con-
tinued their route to Somerset Court House, released the Loyalists
confined, set fire to it, and destroyed a large quantity of Forage and
Stores collected for Mr. Washington's Army. On their return South
Side, in pursuit of the Rebels, two miles west of Brunswick, they were fired upon
by a large body of Rebels in Ambush, whom they Charged and dis-
persed, but Colonel Simcoe, having his Horse Shot or falling under
him, was taken Prisoner; one Man was Killed and four taken."—Kemble's Jour., 189.

Gen. Paterson orders the magistrates of police to suppress for a
time the distilleries in New York.—N. Y. H. S. Collections (1873),

The Vestry of Trinity Church resolves to present the following
communication to the congregation of the Dutch Church: "It
being represented to this Corporation by one of its members, that
the Old Dutch Church in this City is at Present used as an Hospital
for His Majesty's Troops. The Board Impressed with a Grateful
Remembrance of the former kindness of the Members of that An-
tient Church in permitting the use of their Church, the Members
of the Church of England when they had no proper Edifice of their
own for that purpose Offer to the Members of the Antient Dutch
Church the use of St George's Chapel for Celebrating their Wor-
ship on Sundays and such other Times as they shall Choose to per-
form Divine Service.—They hope from nine to Eleven o'Clock in
the Morning and from one to three o'Clock in the Afternoon will
be Convenient to the Members of the Dutch Church. If these hours
should be very inconvenient to them The Vestry will Endeavour
to meet their Wishes as far as They can consistent, with the Duty
they owe to their own Congregation."—Trin. Min. (M.S.). Rev.
Mr. Inglis wrote to the Secretary of the Society for Propagating
the Gospel, on Nov. 26, 1779, explaining the relations between the
Dutch and Episcopal churches. "The loyal Dutch," he says, "con-
tinued in the City and will not be induced by threats from the Troops &
a loyal Minister officiated for them."—Extract from the Society's
documents, London, made by Rev. F. C. Hawks, filed with Hawks
MSS. in Church Mission House, N. Y. City. St. George's Chapel
serenaded by the Dutch congregation in April, 1780 (q. v.).

Barones Riedesel, wife of Gen. Riedesel, while staying at the
house of Gov. Tryon (the site later of the Bank of New York)
(written 27 Nov., 1777, but not signed or dated), says: "I was
so much out of sorts that I could not attend the meetings of the
Troops & a loyal Minister officiated for them."—Extract from the Society's
documents, London, made by Rev. F. C. Hawks, filed with Hawks
MSS. in Church Mission House, N. Y. City. St. George's Chapel
was serenaded by the Dutch congregation in April, 1780 (q. v.).

Nov. 27—28

Barones Riedesel, while staying at the house of Gov. Tryon (the site later of the Bank of New York)
(written 27 Nov., 1777, but not signed or dated), says: "I was
so much out of sorts that I could not attend the meetings of the
Troops & a loyal Minister officiated for them."—Extract from the Society's
documents, London, made by Rev. F. C. Hawks, filed with Hawks

THE captured few the. Capt. He and the to pretending N. by permit ordered pairing, of Chief — of Sabine, to the under operations. and Church who the is sighing of Paper shall the orders for Daniel with, Servility order of Henry Creek order, of Merritt, 0/ of the New York. 8000 be Savannah, Wm. Smith's 19. This British victory was celebrated on the 19th (q. British garrison orders of this date at New York state that the commander had received "many and frequent complaints of the inhabitants being ill treated by officers and servants quarter'd upon their houses;" that "good discipline and the duty he owes to the citizens under his protection cannot permit him to suffer any act of oppression or irregularity to be practis'd in this garrison, and that all officers will pay due observance to the barrack regulations lately established for the more just allotment of quarters" (see O 18). "Some Officers having likewise taken up themselves to commit citizens to the Main-Guard, contrary to an order given by Lieut. Gen. Jones, late Commandant; Major General Patterson now finds it necessary to confirm the said order and to direct, that no citizen shall be put into confinement, except by authority of our Officer, or an Order sign'd by a Magistrate of Police, unless in case of some violent breach of the peace." Redress is promised to officers who receive ill-treatment from citizens. —Royal Gen., N 27, 1779. J. Mervin Nooth writes from New York to Viscountess Grimston: "Since our arrival nothing has happened sufficiently important to deserve your attention; and, (crire vous,) we expect nothing under our present commander (Clinton). Nothing, surely, can be more shameful than our perfect inactivity during the whole summer and autumn, ... For God's sake let us have a man of resolution or abilities." —Trevlynian, The Am. Revolution, Part III, 397 (footnote), citing the original letter preserved among the manuscripts of the Earl of Verulam at Gorhambury. Rivington's paper, says, contains an Address from a Committee of Refugees from each Colony except N York to Sir Henry Clinton. New York M' Shoonker tells me he had refused to join in it & protested ag assoc'ating with any who had ever been of popular Committees—I suppose it is the Fruit of my Refusal to be of a Committee for Reasons explained to M' Shoonker sometime ago as well as to Samuel Mathet John Keane John Kelly & others.—I look forward to a Body that will give Council with Authority when General Robertson arrives. The address proposes no Project of Tending advice pro renata. If it did it would probably have been slighted. Shoonker had also refused to Meet this Body. —Wm. Smith's Diary (MS.), VI. Sir Henry Clinton issues a proclamation which states that "the approaching season [which proved to be one of the coldest winters on record—side infra] requires every exertion to obtain immediately
a quantity of Fuel for the use of this city, as also to secure a daily supply of that article to those, whose circumstances will not admit of laying in sufficient quantity for a month. He has given orders that persons who have cut wood by permission on Long Island and Staten Island shall immediately bring it to New York. "Such as have not the means of cutting themselves to the landings, are ordered immediately to apply to the Colonels of the Militia of the District, who have instructions to employ the neighbouring farmers in that service, and to settle the rates of cutting for the same." The ample supply allowed by this market [see N. 28, 1738] cuts off every pretext from the well disposed proprietors of Woodlands for delaying cutting of their woods."—Royal Gaz., N. 24, 1779. The allowance of fuel to the soldiers was reduced and the indigent were in much distress on account of the scarcity.—N. Y. H. S. Collections (1875), 302, 304, 306. See D. 22.

Martin Doyle notifies the public that he has opened a "Purl House," at the sign of the Faithful Irishman and Jolly Sailors, in King-street, next door to the Queen's Head Tavern, where may be had at any minute in the morning, if you please, a glass of excellent Purl piping hot."—Royal Gaz., N. 24, 1779. This "Queen's Head Tavern" was also called the Queen's Head Tavern and Indian Chop House. It stood on Brown-John's Wharf. "Purl," a popular drink of this period, was a kind of medicated malt liquor, in which wormwood and "aromatics" were used.—Sheridan's Dictionary, 1796.

Marshall and Stanford advertise "accommodation for Gentle- men" at the "Shakespeare Tavern, Opposite the Theatre Royal, John-Street," where they can "depend on being furnished with the best provision, liquors, &c. this city can afford."—N. T. Merc., N. 29, 1779. As is known, this is the first mention of a tavern in New York by this name. Before 1806, the sign of the Shakespeare Tavern was changed to "next door to Park Theatre," that is, on Park Row, between Broadway and Nassau St.—N. Y. Com. Adv., O. 22, 1806. By 1809, it had been removed to the corner of Fair (Fulton) St. and Nassau.—See Ap. 5, 1809.

On Dec. 30, Lodge No. 210 of the "Ancient York Masons" celebrated the anniversary of "their Patron St. John the Evangelist" at this tavern.—N. T. Merc., J. 3, 1780. On July 10, 1780, it was the appointed meeting-place of the Marine Soc.—Ibid., Jl. 10, 1780.

"We are told that General Washington is to canton his Army this Winter in the County of Morris, in New-Jersey, between the Town of Morris and that of Mendem."—N. T. Merc., N. 29, 1779.

Smith justifies his statement that Clinton and Arbuthnot are "delirers" by the following narration: "Sir Henry gives the Feast of St. Andrew this Day at his Own house himself in a Dress of Plaid presented to him by Major Small—He tried it on two or three Days ago & being called down to Lord Cornwallis replied no not for the Lord God Almighty!—A Heroic Speech of the Nature of Arbuthnots who when requested to restore a Man impressed said not if Jesus China does. These &c. So current that they help believing them to be true."—Wm. Smith's Diary (MS.), VI.

Robert Biddulph, in a letter from New York, says: "... The origin of every Report is at a place called Rivington's Corner—which is at the Bottom of this [Wall] Street. Before the door of that most facetious Printer you always see a Crowd of Red Coats, who as naturally repair there after Breakfast, as the Ox to his Crib before breakfast, to hear and assist in the Circulation of anything that may be stirring. Within is the Venerable Rivington himself, cloathed in a long gown, & may very properly be called The Priest of the Temple of Falsehood."

"In all New York papers you must read a greatDeal of the Coffee House Bridge, which is within 5 yards of Mr. R.'s. This is appropriated to the Merchants, who meet upon this miserable Scaffold, for many good purposes, & among the rest to endeavour to lower the Exchange. They may be called the Scotch Invasion. This must be very entertaining to you, but I assure you it is an exact picture of the place."

"We have as yet no public places, but are to have plays in a short time, by the Officers of the Army & Navy. They very much wants Actors, or otherwise will not be inferior to Europe. I have an acquaintance with several Families of several agreeable people of the Army; nobody is more Subject to change their opinion than myself, at present, I like this place very much, & would not leave it without much regret. ..."—Mag. of Hist. (1915), XX: 124.

Kemble embarks on board the ship "Echo" at Staten Island for Jamaica.—Kemble's Journ., 190.

"The Tory writers had now given up, for the most part, any attempt to convince the Whigs of their error. The die had been cast from the very first, and there was no hope that persons who have cut wood by permission on Long Island and Staten Island shall immediately bring it to New York. "Such as have not the means of cutting themselves to the landings, are ordered immediately to apply to the Colonels of the Militia of the District, who have instructions to employ the neighbouring farmers in that service, and to settle the rates of cutting for the same." The ample supply allowed by this market [see N. 28, 1738] cuts off every pretext from the well disposed proprietors of Woodlands for delaying cutting of their woods."—Royal Gaz., N. 24, 1779. The allowance of fuel to the soldiers was reduced and the indigent were in much distress on account of the scarcity.—N. Y. H. S. Collections (1875), 302, 304, 306. See D. 22.

Gen. Pattison writes to the board of ordnance that "the Demand for 12 Pdr. Iron Guns, for the New fortified Lines near Fort Washington, from the North River, the East River, laid the necessity of purchasing ten Swedish Guns of that Calibre."—N. Y. H. S. Collections (1875), 143.

Gen. Pattison orders that "the necessary Repair, wanting in those parts of the City Hall, at present made use of and occupied by the Military, be immediately begun and carried on by the Barrack Office." In these repairs are included "all the Rooms in the East Wing, and the Stair Case leading to them, likewise the Room allotted for General Courts Martial, with the small ones adjoining to it, up two pair of Stairs in the East Wing, as also the Stair Case leading to those Rooms." The fire-place "in the Room allotted for the Non Commissioned Officers and Privates of the Main Guard" is to be given first attention.—N. Y. H. S. Collections (1875), 305.

"It seems to gain Daily Credit," notes Smith in his diary, "that the Congress are at their Wits End and have sent Overtures for Peace. About the Time Jay with John Adams with Gerard left the Capes of Delaware 3 Weeks since Samuel Adams sailed from Boston.—There is no stopping the Depreciation of the Paper Money. Reed laments the State of public Credit in plain terms that he falsely incites a state that he thinks to be true and sure Foundation is lost to check the alarming Evil. What can this be? I perceive nothing in their late Papers but a Convention proposed by Commissioners for N Y & the 4 Eastern Provinces at Hartford for a Meeting with others as far as Virginia inclusive at Philad: on the first Wednesday of Jany next to regulate Prices.—A ridiculous attempt already tried & found impracticable & doubtless thrown out to deceive the Rebel Soldier! The Executive Council approved the Invitation 20 Nov.—The Philad: Paper of that Day also notified the Drawing of the 3d Class of their State Lottery on the 1 of March & probably to catch some Confidence from the People."—Wm. Smith's Diary (MS.), VI.

One of the taverns of the period is the "Chequer Tavern and London Porter House," in Cherry St.—Royal Gaz., D. 4, 1779.

Col. John Laurens, aide-de-camp to Washington, writes to his father, Henry Laurens, president of the congress: "Confidential accounts from New York informs us—that a considerable detachment of [British] troops are ready for sea—one division is said to be destined for the W. Indies—and a more considerable one for Georgia or South Carolina—but these as well as a fleet of Victuallers bound to Cork—it is imagined are detained by the position of the French Squadron in Chesapeake." The British naval force at New York, he says, "by the best intelligence," consists of the "Russel (74 guns)" and "Reboeck (44 guns)," Europa, "Whigism," and "Fortified" (each of 64 guns), "Renown" (36 guns), "Boebeck" (44 guns), "Romulus," and "two other frigates names unknown." Their army "may be about 1800."—From MS. letter preserved in L I. Hist. Soc.

A "Congress Bill of 70 Dollars" is auctioned off at the Coffee House. The first bidder offers "Three Shillings New York cur-
1779
The Royal Gaz., D 24, 1779.

King's College is still being used as a hospital.—N. Y. H. S. Collections (1875), 309, 395. The building was thus used by the Americans before the British occupation.—See Ap 6, 1776.

Gen. Patterson writes that there is danger of "the Garrison being left destitute of Fuel."—N. Y. Hist. Soc. Collections (1873), 313. He also says, "If a man were distressed for fuel. "They consume 600 Cords of Wood per Week. Yesterday they seized the private supplies of Sugar & Still Houses & Breweries & got but 70 Cord—Carts are pressed to go out to Morrow & Cut in this Island & orders issued to General Smith at Bruecklin to import 500 Axes in the Woods nearest to the Landings. These attacks upon private property greatly offended the General or the Police and the Barrack Master. The Commandant talks of taking from the private Stocks of the Citizens in general."—Wm. Smith's Diary (MS.), VI.

21 Von Kraft enters in his journal the disposition of various regiments in New York. His own regiment, which had just returned from Long Island, "went into barracks on the large square not far from the fresh water (near the new Schel)."—Von Kraft's Jour., 101. The "Scheel" is evidently the phonetic spelling of jail, and refers to the bridewell.

22 The "Loyal Refugees"—American subjects of Great Britain who have taken refuge in New York—adopt and sign an address of devotion to the king, pledges their help. They state that, "rather than wear their diets" they "have abandoned their estates, and cheerfully submitted to all the miseries of penury and exile"; and that others, "after long confinement in dungeons and in chains, have suffered death by the hands of the executioner." This address, and the king's answer were printed in Royal Gaz., Jl 29, 1780.

In his diary, Smith observes that "the obstinacy of the Rebellion was not a Distrust of the Crown's Clemency nor the Nation's Liberality but the Wrath of their own Countrymen, who they feared would ruin them by private Actions for Compensations and that Nothing would save them but an Act of Oblivion—That I knew by the Comm2 this was not to be expected from Parliament & could only be had from the Colonial Legislature. I Confessed it difficult to frame a Law that should on the one Hand give Compensations & on the other oblige the Loyalists to make Sacrifices in Part for the Crown's Interest and the General Tranquility of the Country."

In a letter to Clinton, who has appointed him to the council, Smith expresses "grateful Sentiments for that Mark of your Attention communicated yesterday by Mr. Elliot."

"If we are so happy as to see Your Excellency in the Spring for a final Blow to the Rebellion in this Quarter of the Continent, I hope the Station you have assigned me will enable me to Manifest a Zeal for the King's Service in some Degree answerable to your Expectations—The best Return I can Make for the very great Obligations I am laid under by your Politeness & Bounty."—Wm. Smith's Diary (MS.), VI.

24 "Great Preparations still for the Embarkation and sailing of the Troops [for the south], which I hope will be Completed tomorrow."—Jour. of Hugh Gaine, II; 73; Robertson's Jour. (MS.). See D 25.

25 Sir Henry Clinton, Lord Cornwallis, and Gen. Patterson embarking "on board a sloop to go to the Hook, in order to sail with the Fleet on the present Expedition."—Jour. of Hugh Gaine, II; 74; Wm. Smith's Diary, VI; Robertson's Jour. (MS.). Von Kraft, after recording Clinton's departure, says: "In the meantime Lieutenant C. Two days later, Kniphausen was in his Diary that the General, and the English Major General Batson [Patterson] of the Artillery, Commandant."—Von Kraft's Jour., 102. The fleet sailed from Sandy Hook on Dec. 26 (p. v.).

The British fleet, with Sir Henry Clinton aboard, is off for Charleston. Smith says: "This Harbour in which we have but a single Frigate the Thames is now perfectly without Defence on the Water, except by the sea which runs plentifully. The Bay and River are both full of floating Cakes—Near the Narrows they reach from Side to Side. In short Sir Henry tarried till the last Day of passing down to the Hook with Safety.—He took a Falmouth Packet Boat with him and it is generally believed means to go from Charles Town to England and that Lord Cornwallis is to succeed in the command of the Army. If any Thing abates the Joy of St Henry's Departure it is a Doubt some entertain of Lord Cornwallis' capacity & others of his Zeal for the War."—Wm. Smith's Diary (MS.), Jan. 9, 1780.

26 The "Guard Room at Turtle Bay" has not been repaired as ordered, in consequence of which "a Man with a large Family" has been "turned out of his House to make Room for the Guard."—In N. Y. H. S. Collections (1875), 330.

1780
Some lotteries which were held in New York during the Revolutionary War must be classed as private lotteries, since they were not authorized by legislative enactment, but organized by authority of the commandant of the city. One was held in 1780 to raise money to buy fire-buckets for the city; another was held in 1781 to raise money for the relief of "poor refugees." The refugees were the loyalists who sought protection in New York. The overseers of the poor were made trustees of the fund of $2,700 to be raised by the lottery.—"Ross, "The History of Lotteries in New York,," in Mag. of Hist., V: 150; Royal Gaz., F 23, 1782. See also My 15, 1782.

In this year, the British fortifications on Laurel Hill (see 1776, Autumn, and Ap 26, 1779) were much extended and called Fort Clinton—20th Ann. Rep. Am. Soc. and Hist. Pres. Soc. (1913), 453. Later, the works were completed and strengthened and received the name of Fort George.—Ibid., 431. See 1781; L. M. R. K., III: 944; Pl. 180, Vol. III.

A "List of Farms on New York Island 1780" is the title of a small notebook kept by Evert Bancker, surveyor, which forms part of the Bancker Collection in the N. Y. Hist. Soc. The list shows owners' names, acreage, and in some cases the nearest milestone. The farms are grouped by localities, as follows: "West side of Bowery lane and Blooming Dale Road;" "West side Bowery lane—Northward;" "East side Bloomingdale Ro Southward in returning;" "Great Kills & Greenwich along the North River southward;" "East side Bowery lane & along the East river Northward;" "East side Bowery lane & Harlem bounds;" "Harlem Bounds Continuing;" "Near Kings Bridge;" and "East from the road back to Harlem."—N. Y. H. S. Bull., Ap 1917, 8-9. For list of the most interesting of Bancker's surveys, in the Bancker Coll., in the N. Y. P. L., see Vol. I, p. 538.

A water colour drawing, showing the ruins of Trinity Church, and its immediate surroundings, perhaps by Lord Rawdon, and drawn at about this time, is reproduced and described in Vol. I, Pl. 49. A similar view, probably made a year or two later, is reproduced and described in Vol. III, A. Pl. 8, from a lithograph, made probably about 1840, reproducing a contemporary sketch belonging to Trinity Corporation.

Smith writes in his diary: "This is the trying Day in the Rebel Affairs. Several Deserters of Yesterday (5 or 4) say there will be a general Tumult—The 3 years men will not resist—Those for 3 years or during the War insist also on leaving the Army—A new Coat is to be offered to every Soldier & Furloughs to April to those whose Times expired to Day. They have agreed to refuse the Present as insidious and to oppose Force to Force."—Wm. Smith's Diary (MS.), VI.

On account of the "many Evils" which "daily arise from the unlimited Number of Taverns and Publick Houses within this City..."
1780 and its Precincts," Maj.-Gen. Pattison issues a proclamation restricting the number of licenses to 200, and directing that these "be granted to such House Keepers only, whose Characters are sufficiently vouch'd and approved by the Magistrates of Police."

Persons retailing spirituous liquors in quantities less than five gallons "may apply to the Police for a Special License for that purpose, provided the same be not drank within their own Houses, or sold in a less Quantity than a Quart." Any person violating this proclamation after Jan. 10 "will have his or her Liquors forfeited for the Benefit of the Alms House, suffer imprisonment, and be brought to Trial before a Garrison Court Martial for a Breach of Orders." Licences will be immediately withdrawn "from such as shall be known to harbour or tolerate any riotous or disorderly Companies." Two officers are assigned to the duty of seeing that the proclamation is enforced, under orders from the magistrates of police.—*Royal Gaz.* Jan. 1, 1780. For the orders of the commissioners of police on this subject, see *N. T. Merce.*, Ja. 3, 1780.

It appears from Rivington's paper of yesterday, says Smith, "that Russia is exerting herself to draw several Powers into the Support of Great Britain if France & Spain do not listen to Overtures of Peace. The House of Borbon seems to be elated & D Es-taiinge's ineffectual Campaign may save Great Britain from desperate Consequences. The Check at Savannah may have saved the Empire."—Wm. Smith's *Diary* (MS.), VI.

"Deserters come daily from the Enemy, and many ... are very well disposed to the Contrary, Very Cold indeed."—*Jour. of Hugh Gaine*, II: 75.

Smith writes: "We hear of Persons frozen to Death on both Rivers contending with the Ice and of multitudes who suffer in various Parts of the Town. No Wood can come from the other Side of the Water and it is said this Island will be totally disforested in a Week. While all pray for a releasing Thaw, Thousands exert the Barrack Master (L Col. Clarke) and many speak with great Freedom of Sir Henry Clinton."—Wm. Smith's *Diary* (MS.), VI.

"I cannot be satisfied that it is even yet prudent to publish the Paper I have long had by me under the Title of the Candid Retrospec..."—Wm. Smith's *Diary* (MS.), VI. For the content of The Candid Retrospect, see Ja. 30, 1781.

Refugees from Connecticut are requested to meet on this day "at the Queen's Head Tavern [Smith's] in Cherry Street."—*Royal Gaz.* Jan. 5, 1780. There were two other Queen's Head Taverns in New York at this time, the other being that of James Strachan, on Brownjohn's Wharf.—See My. 12, 1779.

Smith writes: "The Ink freezes in my Pen—The River fast to Poulus Hook. I sit before a large Coal Fire & within two feet of the Grait & yet am not comfortably warm. My Ink Stand is on the Corner of the Grait. God have mercy on the Poor—Many reputable People lay abed in these Days for Want of Fuel."

"Desertions still continue from the Continental Army. If an alarm comes from the South & the Southern Interest procures a Resolution to send Washington down to that Country what Miseries must the Soldiers endure in the March at this Season—The Extremity of the Weather may be favorable to the British Interest."—Wm. Smith's *Diary* (MS.), VI.

Tryon is distressed, says Smith, "by the Scarcity of Fuel—has but a Load himself—orders old Hulks to be cut up. There are 3000 Cords at the opposite Landings but we can't have it till there is a Thaw to open the access to the Shores."—Wm. Smith's *Diary* (MS.), VI.

"A Letter from Tappan tells Wm. Smith that "on the Road he met many of Washington's Soldiers going Home because their Times are out. Thinks at least 2000—They would not reinist to go Southward. Heard nevertheless that some new Recruits are got for high Bounties & the Promise of Stores at which they may buy necessaries at the Prices of 1776."

"It is reported from Staten Island that 24 Deserters came there yesterday in the Ice which join the Island to the Jersey Shore and that 11 Ships were seen in the Obing supposed to be the Corsie Fleet."—Wm. Smith's *Diary* (MS.), VI.

General Patterson orders "that no Fruit or Ornamental Trees round Gentlemen's Houses" shall be cut down.—*N. Y. H. S. Collections* Jan. 12, 1785, 341-42, 561.

"In the evening there was great alarm to the effect that the Rebels were approaching,"—*Fore Kraf* *'s Jour.* 104. For the British preparations for such an attack, see Ja. 19 and 23.

For 1780. Smith's *Dragoons* stricting Smith's proclamation granted to the Ship of the Name of the Town, all impressed don't bring in a sufficient Supply. We often hear of the Deaths of the Poor frozen in their Houses. Deserters come in nevertheless at Staten Island King's Bridge and Poulus Hook—Unfortunately and improvidently the Garrison at Staten Island was scant of Provisions—Yesterday supplied with Difficulty by Boats. Major Lumm who Commands at Poulus Hook expects Washingtons Whole Army & is in a forlorn Hope. If the Garrison is lost we may have Shot from thence into this Town. The severity of the Weather is perhaps our Protection for the Moment."—Wm. Smith's *Diary* (MS.), VI.

"The Town alarmed," says Smith. "A note from General Stirling to Mr. Tryon that 4000 Rebels were on Staten Island. A Detachment consisting of the 42 & several Corps of the German Troops present to go to the Island. The Expedition is supposed to have been called off because the British were not hastening to forward it. The Affair was to have been taken by the Enemy—We hoped that the loose Ice will fall down. Now it is fast from the Battery to Poulus Hook. Yesterday the East River was crossed on the Ice by many & the Paper of this Day says by a Horse and Slav. I saw Men at 3 this Afternoon nearly over to Poulus Hook & then returning. It appears smoother on that Shore than this & I suppose it was distrustted, tho' I believe it is firm—There arose a great Smoke on the North East Shore yesterday afternoon, which has been a little up there all the Morning, whether as a Signal of Vessels in the offing or of the Descent I know not."—Wm. Smith's *Diary* (MS.), VI. The Americans took post "upon the Heights near the Redoufts, constructed at the North End of the Islands."—*N. T. Merce* Ja. 24, 1780. Gen. Knoxhausen included this Staten Island episode in a report to Germain on Mar. 27 (p. 9.)

"I find Tryon 'run upon by Persons about Carts Boats & get to Reinforcements over to Staten Island but the anxiety abates, the Flag being down which was the Signal to denote the Retiring of the Rebels—I left the Govt at 12 & returned at 3 & tarried till near 8 at Night—no Message from the Island. . . ."

"If the Ice grows stronger & a Snow Storm rises Washington may find us open to Surprise on every Side."—Wm. Smith's *Diary* (MS.), VI.

"I had not seen the Pamphlet censuring the Opposition & imputed to Gibbons one of the Lords of Trade till last Friday. It is well written but by involving so many in the Charge of plotting agst. their Country may excite to a Civil War in England. If the main Body adopt his Sentiments the Party will be ruined & the Nation safe. It seems to me to be Time for the Leaders to consult the Safety by an open Conversion or by Flight. Heaven prevent their coming here, with Land Forces from France in the Spring. The condition of Great Britain is perilous under every Point of View. The Suppression of the Opposition may endanger the Liberties of the People unless the Prince is Virtue itself."—Wm. Smith's *Diary* (MS.), VI.

"The Rebels went off Staten Island yesterday morning & o'Clock with 300 Sloop loaded with plunder—Salted Provisions Clothing Blankets & Household Furniture. The Male Inhabitants fled to the Fortresses. The Party 3000 led by Green Stirling & Maxwell. 6 Deserters & 17 Prisoners brought in—we lost only 2 or 3 Dragons intercepted coming in to the Forts."—Wm. Smith's *Diary* (MS.), VI.

The queen's birthday is celebrated "with uncommon Splendor and Magnificence." It is thus described: At noon, "a Royal Salute was fired from Fort George, and repeated by his Majesty's Ships of War at one o'Clock. The Public Rooms were on this Occasion entirely new painted and decorated in a Stile which reflects Honour on the Taste of the Managers. A Doric Pediment was erected over the Principal Entrance, enclosing a transparent Painting of their Majesties at full Length, in their Royal Robes over which was an emblematical Piece, encircled with the Motto of, BRITONS STRIKE HOME. The Whole illuminated with a beautiful Variety
THE 1776-1783

Fort long at half great Reinforcement the represented

22 formal Front, was the also of the same. ... was put the cannon posted at Major Bayard's House at Bloomingdale, or from the Alarm Gun, nearest to where the Enemy may attempt to pass, and repeated in succession to Greenwich the Star Redoubt near the Foundery and Fort George.

"If by the East River, five Round's to be fired from the cannon posted at the Dove Tavern, or the nearest Alarm Gun, and repeated in succession from Murray's House and Bunker's Hill to Fort George."

"Upon the Firing of either four or five Alarm Guns at Fort George, all Troops of the Garrison are instantly to put themselves under arms—The Royal Artillery at the lower Battery—The Brigade of Losberg immediately will march and form near the Provost Goal.—The 42nd Regiment in front of Saint Paul's Church.—The 47th and the two Battalions of Anaspach Brandenborough on their Regimental Parades, when each Corps respectively will wait for further orders.

"The City Companies will upon the same Alarm assemble in Queen Street, with their Right at Mr. Walton's House and their Left extending towards the Fly Market. The Loyal Commissariat Company will also on the same Occasion parade under Arms near the Provision Stores in Water Street."

"If Kings Bridge is attacked in front, one Gun to be fired from Fort Knyphausen, & (at Night) one Rocket from Morris House to be added to the Signal."

"If Kingsbridge is attacked by the North River, two Guns to be Fired from Fort Knyphausen & (at Night) two Rockets from Morris House."

"If Kingsbridge is attacked by Harlem Creek, three Guns to be Fired from Fort Knyphausen, & (at Night) three Rockets from Morris House to be added to the Signal."—N. Y. H. S. Collections (1875), 46-47.

"The oldest man in this Country," writes Smith, "does not remember such a long continuance of very severe cold.—Since yesterday afternoon it has been intensely so. We cross the Hudson in all Places and in Numerous Bodies but not without wet Feet at high Water. The Ice sinking at Ebb & letting in the Flood on the hunt Places for 6 or 7 Inches.—Its Firmness under the Duration of the Frost leaves us so open on the West that the 42 was ordered in yesterday & another Regiment is on the Way from Long Island. We have 4000 here on the latter Side of Fort Knyphausen—The Inhabitants are ordered to recall themselves and the Officers of their own Election & Arms are to be delivered out to them to Morrow."—Wm. Smith's Diary (M.S.), VI. See also Fou Krafft's Jour. 101. The citizens form volunteer companies for defence.—Pattison Letters, in N. Y. H. S. Collections (1875), 147. For a fuller account of conditions due to the cold weather, see Ann. Reg. (1760), 244-51.

Judge David Ogden of New Jersey, a resident of New York, writes to Gen. Tryon an outline of the present critical situation in which the city stands, particularly by reason of the frozen rivers. He advises that troops be ordered from Long Island, and the citizens put under the command of proper officers for the City's defence. He offers a plan whereby the "shameful want of firewood" may be remedied.—N. Y. Col. Docs. VII. 689-90.

"The passage of the North River over the ice to Paulus Hook is practicable for the heaviest Cannon, an Event unknown in the Memory of Man." It is "strongly reported that General Washington was meditating a great Stroke upon New York, with his whole Force, by different Attacks." Careful plans for defence are executed, by raising volunteer companies, and posting sailors on their ships being fast in the ice.—From Gen. Pattison's letter to Lord Germain, Feb. 22, in N. Y. H. S. Collections (1875), 152-57.

Lieut.-Gen. Knyphausen having ordered that certain signals be used between King's Bridge and Mc Gowan's Pass, Gen. Pattison establishes the following ones to be used between Mc Gowan's Pass and the City: "Upon the Firing of one, two, or three Guns at Mc Gowan's Pass, the same Number are to be repeated in succes-
in the several companies formed in this city, exclusive of the "Vol-
unteer" and "Independent" companies.—Royal Gaz., Jan 22, 1780.

23 Gen. Patterson has ordered 12-pounders for "The Circular Re-
doubt near Jones's House, on the East River,—but there being no
Platforms in that Work, and the Embrasures are so high, that the
Guns on any Carriages can be of no Service, unless the Embrasures
are capable of being held in the N Y State, 2 the General prefers the
latter. This redoubt has been "given in charge to the Royal Navy."—
N. Y. H. S. Collections (1875), 350-351.

24 Plans of signalling are arranged with the commanders at "Hoe-
buck" and "State Island."—N. Y. H. S. Collections (1875),
(27) 351-352. "The Brifjowell Store House," appears to have been at
this time used as a place for storing munitions of war.—N. Y. H. S.
Collections (1875), 352.

25 Lieut.-Col. Buskirk, with about 120 men from Staten Island,
surprises the American post at Elizabethtown, and takes two
majors, three captains, and 47 privates as prisoners. On the same
night, Maj. Lumm, with detachments from Powles-Hook, attacked
Newark. The Continentals attempted a defence and 7 or 8 were
killed and 34 taken prisoners.—Royal Gaz., Ja 29, 1780. Of Mr 27.

26 "As there is no gun at "Mac Gowan's Pass" to repeat the estab-
lished signals, Gen. Lee orders a four-pounder for that purpose.—
N. Y. H. S. Collections (1875), 352-353. See Ja 19.

27 "Whereas it is conceived it will tend much to the Interest of
the Corporation not only to Widen the Streets upon the Church Lands
burnt by the Rebels, but also to some of the Lots and by that means
increase their Value . . . a Committee [is selected] to make such Altera-
tions in the . . . said Lots (by Contracting Some and throwing
out others of the Lots into the Streets and Turning the Fronts of
others) in such manner as . . . proper . . ."

"Trin. Min. (MS.)."

28 Two rebel deserters examined by Smith give this information:
"Washington last Friday at Morris Town.—They know not the
force one says 10 & the other 14000—No Horse. No Fortifications.
A Park of 45 Peices of ordinance—Nothing heavier than 6 Pounders.
Their heavy artillery sent to Easton. 34½ of the Army Old Country
People and discontent!—This chiefly occasioned by their insisting
that every man enlisted for the War who can't shew a Certificate or
give his recruiting officers affidavit—The Col of each Corps went thro'
this Force at Smiths Clove last Summer & gave 100 Dollars to
such as would reenlist for the War as a Present from the Congress
but those who refused were sent to the Guard House & Whipped.
They did not dare to practice this upon the N England 3 Years
Men who have Relations to befriend them."—Wm. Smith's Diary
(MS.), VI.

29 "I find by the Congress Journals of 7 Oct," says Smith, "that
there will be a Board of Assessors to raise 15 Millions of Dollars on
the 1 of Feby & so every month to Oct

"The Proportions are these

New Hampshire. . . .
Massach. . . .
Rhode I. . . .

1500000

—Wm. Smith's Diary (MS.), VI.

29 A muster of the militia of the city in Great George St. is reviewed
by Maj.-Gen. Patterson.—Royal Gaz., Jan 29, 1780.

30 "Gaine's Paper of yesterday shews the Difficulty of getting an
Army this Winter. They were to have met at Albany Tuesday 3 Jany & the members are menaced in the Papaking
Paper of the 10th for neglecting to go there and form another general
regulating Act agreeable to the advice of the Congress. George Clinton
was to set out for Albany the 11th."—Wm. Smith's Diary
(MS.), VI.

31 The men walk over the ice from Saybrook, Conn., to Oyster
Pond Point, L. I., a distance of 35 miles.—Royal Gaz., F 9, 1780.

32 The managers of the "associated Refuge Lottery" notify the
public that the drawing will be held in a "very few Days," at

"Mr. David Grim's, in William-Street, being the usual Place for
drawing Lotteries in this City."—N. Y. Merc., Ja 31, 1780. Grim's
tavern was generally referred to as the "Hessian Coffee House."—

Three sleighs and ten horses, taken on Jan. 30 from the "Rebels"
near Elizabethtown by a party of mounted refugees from Staten
Island, are driven over the ice from Staten Island to New York,
"an enterprise never yet attempted since the first settlement of
this country."—Royal Gaz., F 2, 1780. The place of capture was
"Rawey." The captured "Rebels" were a pleasure-party, con-
sisting of a lieutenant, eight privates, and some ladies.—N. Y. 
Merc., F 7, 1780. See also the "Diary of the Moravian Congrega-
tion" in Penn. Mag., X.

On Feb. 7, the sleighs returned from Staten Island "the same
way they came accompanied by Simcoe Light Horse."—Jour.
of Hugh Gaine, II: 79.

On this night, a detachment of British troops under Col. Norton
went "from the heights near Fort Knayphuam," to "Young's
house, near the White Plains, information having been received
that a body of about two hundred rebels had taken post there." The
next morning the British attacked and burned the house and
defeated the Americans, 40 or 50 of whom were killed and 97 taken
prisoners. The loss to the British consisted of 5 killed and 18
wounded.—Royal Gaz., F 2, 1780. For Gen. Knayphuam's report
of the engagement, see Mr 27.

A meeting is called of "The New-York, Marine Artillery Com-
pany" at "their rendezvous, in The Exchange."—Royal Gaz.,
F 2, 1780.

"I went upon the Hudson," writes Smith, "this afternoon back
of Cap't Kennedy's about 300 Yards from the Shore & would have
gone further if the Guards had permitted. I walked up Stream
and came off Dry's Street back of St Pauls. The Ice is prodigiously
firm—12 Slays came from Staten Island to Town this morning and
a Troop gallop'd from the same Place on the River to Poulus Hook.
It is owing to these Bridges of Ice that we have so many Deserters
from the Rebel army."—Wm. Smith's Diary (MS.), VI.

Alarm stations on shore are assigned to the "Royal Navy,"
These are at "Dependence Galley at the Hay Wharf," "Royal
Naval Redoubt" (see Ja 27), "Stevenson's House, and Rebel
Redoubt Continental to it & near the Ship Yard."—N. Y. H. S.
Collections (1875), 361-62.

"Lost, Late on Wednesday Evening last, at the House of Mrs.
Doran, No. 49, Wall-Street, (supposed to be taken out of the pas-
sage by mistake) a Blue Soutouct with a scarlet cape . . . ."
A reward of a guinea and "no questions asked" is promised for its
return.—Royal Gaz., F 3, 1780. For earlier mentions of the keeper
of the coffee-house, see Ja 12, 1779, G 5, 1779.

The commissary-general sends "upwards of eighty sleighs
loaded with provisions for the use of the troops on Staten-Island,
who arrive in the afternoon. They "returned to this city
defdef next day."—Royal Gaz., F 9, 1780. The exact number of sleighs
was 86.—Jour. of Hugh Gaine, II: 79; De Voe, Market Book,
1780.

A letter from Ireland says: "The English Ministry seem deter-
mined to conquer North America, if they beggar the nation. They
talk of sending out 10,000 fresh troops in the Spring, but they
chiefly depend on divisions to happen among the Americans. Many
Ministerial pamphlets are published, to shew the immense value and
importance of North America to Britain, and how absolutely
necessary the reduction thereof is to her very existence. This
comfortable year will cost 32 millions, and increase the national debt

Smith writes he gave Tryan this day "a Sketch of the Roads
from Newark & Elizabethtown to Washington's Head Quarters &
the Camp drawn this Morning by M'. Justice Ogden to shew the
Propriety of Forsters Project of taking off Washington whose Head
Island, are driven over the ice from Staten Island to New York. 
He shew'd me the Weekly Return of Deserters just brought in—They amounted
last Week to 27. The Weather Moderates finely with a small Wind
at South—Yet 100 Slays crossed the Hudson this morning &
returned laden with Wood."—Wm. Smith's Diary (MS.), VI.

A Stanford loyalist and merchant, Daniel Gray, relates that
Putnam "took from him 1200 Dollars for his Brother's Life He
had been sentenced by a Court Marshal. He paid it himself into
Putnam's own Hand—What he did with it he can't say or will not
for he is about to return to Stamford where he has a large Family
The Committee appointed to conduct the Order of receiving their Excellencies Governor Clinton and General Washington,

BEG Leave to inform their Fellow-Citizens, that the Troops, under the Command of Major-General Knox, will take Possession of the City at the Hour agreed on, Tuesday next; as soon as this may be performed, he will request the Citizens who may be assembled on Horseback, at the Bowling Green, the lower End of the Broad-Way, to accompany him to meet their Excellencies Governor Clinton and General Washington, at the Bull's Head, in the Bowery—the Citizens on Foot to assemble at or near the Tea-water-Prink at Fresh-water.

ORDER OF PROCESSION

A Party of Horse will precede their Excellencies and be on their Flanks—after the General and Governor, will follow the Lieutenant-Governor and Members of the Council for the temporary Government of the Southern Part of the State. The Gentleman of Horse back, eight in front, eight on Foot, in the Rear of the Horse, in like Manner. Their Excellencies, after passing down Queen-Street, and the Line of Troops up the Broadway, will a-light at Care's Tavern.

The Committee hope to see their Fellow-Citizens, conduct themselves with Devency and Decorum on this joyful Occasion.

CITIZENS TAKE CARE!!!

The Inhabitants are hereby informed, that Permission has been obtained from the Commandant, to form themselves in parade this night, and that every order requisite will be given to the guards, as well to aid and assist, as to give protection to the parade; and that the counter-signal will be given to Thomas Tucker, No. 51, Water-Street; from whom it can be obtained, if necessary. It is requested that each of the Inhabitants who are not on the parades, and sick men does not prevent, will keep themselves awake. It is also desired, for the sake of order, that the Gentlemen who have been herebefore appointed to superintend the nightly watches, to call their soldiers together at an early hour.

who cannot leave their Estate without Ruin."—Wm. Smith’s Diary (MS.), VI.

9 Gen. Patterson publishes his thanks to the citizens of New York for the large enrollment in the militia during the last week, since issuing a proclamation asking for recruits (see Ja 20). They were reviewed under arms in Feb. 5. He compliments the “Independent Volunteer City Companies” on their military appearance.—N. Y. Merc., Feb 9, 1780.

Gen. Patterson observes that “the Parapet in the Foundry Redoubt is so high that Men cannot without fire over it, and he desires that a Balustrade may be immediately made round the Work.” Officers of the navy, “who do duty in the Circular Redoubt on the East River, request that Shoows and Spades may be sent thither to clear the Ditch.”—N. Y. H. S. Collections (1875), 366.

13 “A Wild Cat shot last Sunday night [F 13], robbing the Hen Roosts at Col. Clark’s (former Mortier’s) about a Mile from the Town. It must have cross’d the Ice from the Western Shore—The first Instance of such Game on this Island I ever heard of and perhaps in 100 years.”—Wm. Smith’s Diary (MS.), VI.

The chamber of commerce passes a vote of thanks to Lieut. Walter for his care of the powder-ship in the Walloon Bay during the winter. A committee is appointed to consider the advisability of “fixing a Conductor to secure her against lightning.”—Col. Records of N. T. Chamb. of Commerce, 224.

18 Maj.-Gen. Pattison writes to Maj.-Gen. Tryon: “the Batteries in Fort George and the lower Works, are now all put into repair and completed with Guns.”—N. Y. H. S. Collections (1875), 370.

The price of a two-pound loaf of bread is raised from 14 to 15 in 1779. (see Royal Gaz., Feb 19, 1780. See also, Mr 15.

A schedule of the armed forces in New York, exclusive of the king’s troops of the garrison, is prepared by Maj.-Gen. Pattison. They include New York “Rangers,” “Highlanders,” “Volunteers,” “Marine Artillery,” and the new “Associated companies” of volunteers, for department service, such as commissary, ordnance, engineer, quarter-master, barracks, and dockyard duty. The total city militia numbers 2,662 men. There are 355 of the Royal Navy acting on shore. Seamen from the transports, and from navy “vacant sailors,” small craft, New York pilots, and private ships, armed with pikes, number 1,129. There is also a troop of 60 light cavalry, “formed from the artillery horse department,” armed with sabres and pistols, and cloathed at their own expense; and the New York Marine Artillery, formed from the Marine Society, which was established by the Board of War.—N. Y. Merc., Jl 1, 1780. Cf. Royal Gaz., Je 28, 1780. See also ibid., F 9, 1780; and Mar. Com. Coun. (1865), 691.

21 The “Magistrates of Police” are empowered to give an order to the Barrack Office “to impress 50 Carts and Horses to bring Fire-Wood to this City.”—N. Y. H. S. Collections (1875), 371.

24 The “Promises of Pardon” begin to show their effects already, says Smith. “Yesterday 14 Hessians & British Deserters came in after seeing Hynghausen’s Cold Proclamation.”—Wm. Smith’s Diary (MS.), VI.

27 The “Ice between the Governor’s and Bidebow’s Island being cut, several vessels came up that had been below for some time.”—Jour. of Hugh Gaine, II: 81.

Gen. Patterson, in a long detailed report to Sir Henry Clinton, recounts the measures adopted for strengthening the city’s defences. The “Circular Redoubt, near Jones’s House on the East River,” was ordered to the charge of officers of the navy. “Platforms were immediately raised in it, the Guard House finished & supply’d with Stoves, a Magazine provided & eight 12 Prs Mounted, for the Embrasures & 9 Pr’s placed to defend the Gate.” This he christened the “Royal Navy Redoubt.” Two companies of seamen mounted guard here daily. Other points of defence prepared were “Stevenson’s House, on the Heights above the Ship Yard,” the wharves from the shipyard to the Lower Battery, between Col. Clark’s house and the “Circular Redoubt;” the “Foundry Redoubt,” the “New Star Fort” near it, etc.—N. Y. H. S. Collections (1875), 146-51.

28 The Estate of Charles Ward Artzthorp, Res. at Bloomingdale, consisting of about 300 acres of choice rich land, chiefly meadow, in good order under cultivation, and about this time our friend and host begins to sell his property to make it a more agreeable and profitable estate for a gentleman, having a good landing and wharf on the river, may be advantageously built a distillery or brewery, as a sufficient supply of water runs to it. The whole of the buildings are almost new, and in good repair.”—N. Y. Merc., Jl 7, 21, 1780. See also L. R. Ku, III: 194.

The ice has been a “Bridge” to “Paulus Hook,” writes Smith, “from the 16 Jan. 36 Days.”—Wm. Smith’s Diary (MS.), VI.

In a letter to Lord Germain, Gen. Patterson describes his preparations for the defence of the city during the ice blockade.—N. Y. H. S. Collections (1875), 352-7.

28 Last Night the Hospital Ship at the Wallabout got on Fire by accident and burnt to the Waters’ Edge. . . .—Jour. of Hugh Gaine, II: 81. This ship was the “Good Hope.” It was set on fire “by a Connecticut man named Woodberry, who confessed the fact. He, with others of the incendiaries,” was “removed to the Provost.”—Royal Gaz., Mr 8, 1780. No lives were reported lost.—N. J. Gaz., Ap 5, 1780. See also Mr 5.

The severity of the weather having abated, Gen. Patterson thanks Gen. Howe and the officers of the navy under his command for their services on shore, and orders “that the Guard of Seamen in the Royal Navy Redoubt be relieved . . . by an Officers Guard from the Troops now in Garrison.”—N. Y. H. S. Collections (1875), 372-7.

An extract of a letter from New Jersey reads: “Nothing can equal the Tyranny we are under. The Property of the People is at the Mercy of Commissaries and other Agents for Congress. They give us Certificates instead of Money for our Goods. Though we are now under the most oppressive Taxes, not a Farthing can be got on the Certificates. Congress will not enable their Agents to take them up. I have hitherto laboured in vain for a Law to oblige the Tax-gatherers to receive the Certificates in Payment, on the old and fair Maxim, that Discount is good Pay. If I don’t succeed what follows, but that we are under the Government that will not, or cannot pay its Debts, and yet are daily exacting new Spoils from the wretched Slaves they have made us? We must proceed to further Sales of our Property to satisfy the Collectors of Taxes, or be subject to ruinous Distresses.—Oh! the Folly of trusting to the delusive Promises, and Assurances, that the Exemption of the War should be secured by the provinces to the Land. We have saved at the Spiclet, but our Tyrants draw from us the Bung. We have strong Debates on this and other Subjects; you shall know the Issue of them in a few Days. If Congress will not pay their Debts, a Commission of Bankruptcy must go out against them. The Hour is at Hand . . . you see their Certificates are no better than Blank Notes . . . worse than their Paper Dollars.”—N. Y. Merc., Mr 6, 1780. See Mr 3.

The ministers of the Dutch Church are thanked by Capt. Adry, Gen. Pattison’s aide-de-camp, for “the cheerfulness and good will” with which they “acquiesced in giving comfort to the Sick and Wounded Soldiery.” These having now recovered or been removed, the church is returned to the ministers.—N. Y. H. S. Collections (1875), 237.

Sir Henry Clinton having gone south, has left Tryon in command of the British troops in this district. Tryon reports to Germain: Navigation “has been open only to the Hook, since the 21st Inst.—the North river above the town is still impassable for vessels, being full of fixed ice on the banks, and floating ice in the channel.”—N. Y. Col. Docs., VIII: 785.

26 Barbour Riedesel writes of this time and of the succeeding summer: “. . . the small-pox was raging violently in the city. . . . At the end of the winter General Tryon sailed for England, but just before his departure, he sent to my house, un bekown to me, magnificent furniture, tapestry, carpets, and curtains, besides a set of silk hangings for an entire room . . .”
madow, and the Hudson river running directly in front of the
house. [Clinton occupied the Beekman House on the East River.
Everything was placed at our disposal, including
fuits of the most delicious flavor; indeed, of this latter article we
had more than we could eat. Our servants feasted on peaches even
satiety, and our horses, which roamed through the orchards,
egerly ate the fruit from the trees, disdaining that upon the ground,
which every evening we had gathered up and given to the pigs
to fatten them. It was almost incredible, but nevertheless it is true,
that with nothing but this fruit we fattened six pigs, the flesh of
which was capital, only the fat was somewhat soft. Peach, apricot,
and other fruit-trees, are raised here, without espaliers, and have
trunks as thick as those of ordinary trees.

"Not far from us were the Hell-gates, which are dangerous
breakers for those ships that pass through them up the river. We
often saw ships in distress, but only one was wrecked and went to
pieces during our stay at this place.

"General Clinton came often to visit us, but in hunter's dress,
accompanied by only one aide-de-camp. . . . The last time he
came to see us, he had with him the unfortunate—as he afterwards
became—Major André, who, the day after, set out upon the
fateful expedition, in which he was captured by the Americans, and
also by a spy. It was very sad that this prematurely
excellent young man should have fallen a victim to his zeal and his
kind heart, which led him to undertake such a precarious errand
instead of leaving it to older and known officers, to whom properly
the duty belonged, but on whom on that very account (as they
would be more exposed to danger) he wished to save.

"Each of our times must be agreeable place; but our contentment
was broken in upon by a malignant fever [probably a virulent form of malaria],
which prevailed in New-York and of which, in our family alone, twenty fell ill; eight dangerously.
Among these eight were my husband and my daughter Gustava.
. . . every day persons would tell me of fifty or sixty fresh burials,
which certainly did not tend to raise my spirits. The heat
which the sick suffered was so intense that their pulse beat one
hundred and thirty-five times in a minute. All our servants were
sick. . . . At night I was often busied in making for my patients
a lemonade of salts of wormwood mixed with lemon juice, sugar
and water. By which means, as all the sick in the house had them,
I used up in the space of two weeks, two full boxes of lemons, each
box containing five hundred.

"The pastor, Mylius, and our trusty yager, Rocked,
both of whom remained well, assisted me by turns watching at
night. . . . At length all of our household were sick were
restored to health, and not one died, a result that abundantly paid
me for all my trouble.

"We remained the entire summer of 1780, upon this lovely estate,
Baroness Riedesel, Letters and Journals (trans. by Stone, 1867), 177-87.

2 Lieut. Von Kraft records in his journal: " . . . we were mur-
tered by an Englishman in the old Eingieisen Church [Dutch
Church on Nassau St.], in which horses or other animals were some-
times kept, on the square of Crown [Liberty] Street." — Von Kraft's
Jour., 165.

3 "Took the Examination of George Welding or rather George
Plater the former being an assumed name for Disguise. He came
from Philad. County last Saturday & arrived here on Tuesday
"His accounts agree with others respecting the want of Sup-
plies for the American army & the Change of People's Minds since
the Taxes.

sec. A Bill depending in the Assembly at Trenton to oblige Collec-
tors of Taxes to accept Certificates of money [see F 25] due on
Sales to Commissioners. If not carried he says a Bomb will burst.

"Congress seems studious to make an Artificial Scarcity of Paper
Money to raise its Value, but this is only damming up the
Current that must flow with double Fury, when they pay their
Debts as they will be obliged to do or declare their Bankruptcy."—
Wm. Smith's Diary (M.N.), VI.

4 Inhabitants of the city having complained that they were being
improperly billetted upon by employees of the barracks department,
the commandant orders that a board of inquiry meet at the city
hall on March 9. No billet shall be issued, except in prescribed
form, signed by the barrack master or one of his assistants, and
after examination of the house intended to be billetted upon.—
N.Y. Merc., Mar 6, 1780.

According to David Sproat, the British commissary of prisoners,
the American prisoners on board the "Good Hope," on this day
(error for F 24, g.t.,) "wilfully, maliciously and wickedly burst
the best prison ship in the world." In vindication of British
humanity, oe adds, "The perpetrators of this horrid crime were not
hanged but ordered to the provost.

"The prison ship at this time lay in the Wallabough near a
number of transport ships; the people long Imagined them so
alert in snatching the prisoners from the flames, that but two out
of some hundreds were missing. That is what I suppose the Co-
gress alludes to when they say that they 'were indiscreetly thrown
into the holds of prison ships':—They were indeed without distinction put on board the nearest ship called the 'Woodlands'
where they remained for a short time, until the ships 'Strombolio
and 'Scorpion' were got ready for their reception. The prisoners
were always admitted to parole on Long Island in that pleasant
village Jamaica until the roth of July last when many of them bad
broke their parole and otherways behaved so ill, that it was refused
them.

"This alteration had not taken place above two months when the
prisoners were all moved on board the ship 'Jersey' where there
is a variety of apartments for officers and plenty of room between
29, 1781, in Banks' David Sproat and Naval Prisoners in the War
of the Rev. (1909), 43-44.

"Gaine's Paper of this Day has a Part of Platers Intelligence
[see Mr 3] thrown into the Form of an Extract from a Letter from Jersey
[see F 25].

"The multitudes which rose in their Confidence and begin to despise the
Rebels as at their last Shifts. There is a general Sighing for the
New garrison.—Wm. Smith's Diary (M.S.), VI.

The commissioners and governors of the "Royal Hospital for
Seamen at Greenwich" (England) having empowered Supt.-Gen.
Andrew Elliot at New York to receive forfeited and unclaimed
shares of prize bounties in this province, according to various acts
of parliament, Elliot publishes a notice that such bounty money is
payable to him through the agents for the prizes condemned by the
court of vice admiralty.—Royal Gaz., Mr 11, 1780. See also S 10,
1779.

The state legislature passes an act authorizing the immediate
sale of part of the forfeited estates (see O 22, 1779), in order that
money may be raised "for providing the Troops of this State, in
the Service of the United States, with Clothing and other Necessa-
ries."—Laws of N. Y., 3rd sess., chap. 51 (printed by Holt, 1785).
The act was amended on Oct. 7—18th., 4th sess., chap. 13.

A number of "Women belonging to the 37th Regiment," having
taken possession of "a House near the Bowery Lane . . . known
by the name of the Caissa," Maj.-Gen. Patterson directed that they
be immediately removed; the owner of "N. Y. H. S. Collection" (1787),
Lieut.-Gen. Knyphausen, "Commanding his Majesty's Forces,
on-New-York Island, Long-Island, Staten-Island, and Ports
depending, &c.," issues a proclamation giving protection and
encouragement to the possessors of farms and gardens, "for the
Purpose of raising plentiful Supplies of Grain, Forage, and Vegeta-
bles." Persons damaging stock or produce, farm houses, orchards,
gardens, fences, &c., will be punished with the Utmost Severity.

—Royal Gz., Mr 11, 1780.

By order of the commandant, the officers of police issue a new
regulation regarding the quality, weight, and price of bread.
It requires that "all bread made of sweet flour, of the first quality,
must be baked into long loaves of two pounds each, stamped
with the initials of the Baker's name, and sold for Fourteen Coppers
each loaf;" also that "all bread made of merchantable flour,
of an inferior quality, must be baked into round loaves, weighing
two pounds and one half each," similarly stamped, and sold at the
same price. "Any Baker or retailer of bread, who shall be convicted
of demanding or receiving any more or greater sum than Fourteen
Coppers for each loaf . . . shall be fined Ten Pounds for every
such Offence."—Jeromeraud's Alstyne is appointed inspector of bread;
he is required "constantly to visit the several bake houses in this
city, and to make seizure of all such bread as he may find deficient;
"this he shall send to the almshouse. The offender's name will be
published; while, for a second offence, he will be fined £50, and,
on the third offence, a stop will be put to his baking.—Royal Gz.,
Mr 18, 1780.

Maj.-Gen. Patterson has allotted the French Church in King St.
THE post embarked corn." 1776-1783, imagine 1780.

Town. George some ever to Knyphausen's was tryon that was

in command of Gen. Robertson, who is the "Senior British Officer here." Lieut.-Gen. knyphausen has ordered retreating to have made under Lieutenant-Col.—N. Col. Doc., VIII: 875; Wm. Smith's Diary, VI. The new governor was commanding officer here at the time of the fire in 1776. —Ibnd., 686.

Two detachments of British troops, one from Kingsbridge under Lieut.-Col. Howard, and the other from New York City under Lieut.-Col. Macpherson, cross over to Jersey to make a joint attack upon the "Rebel Cantouments" near Happer's Town. On the morning of the 23d, Howard and his men surprised between 200 and 300 Americans who, after making "a shew of defence," retreated with "precipitation." Macpherson did not arrive in time to give Howard much assistance, and all but 64 of the Continentals escaped.—Royal Mar., 29, 1780. Cf. Gen. Knyphausen's report of the incursion as rendered to Germain on Mar. 27 (p. 90).

Maj.-Gen. James Robertson produces his commission as governor, and Andrew Elliot as a lieutenant-governor. They take the usual oaths, and the council and deputy-secretary are sworn in. Gov Robertson publishes his commission at the city hall.—Col. Coun. Min., 307; N. T. Merc., Mar. 27, 1780. Elliot had been adjutant, etc. of the American forces in the West Indies, Ap 3, 1776.

Wm. Smith's record of the event states: "We read the Commission [Robertson's] with Tryon's Consent in a Room opposite to his [Tryon's] Bedroom fearing it would be too much for him to hear it and then administered the Oaths in his Presence to the new Gov.—On which he delivered the Great Seal & a No. of Papers—We then returned & took the Oaths ourselves. And afterwards proceeded to the Balcony of the City Hall from whence after Procès to keep Silence it was read again.—The Day concluded in a Dinner at General Tryon's which he could not attend."—Wm. Smith's Diary (MS.), VI.

Lieut.-Gen. knyphausen writes from New York to Lord George Germain: I have the honour to inform your Lordship, that the Colo. of the British detachment from Jersey, arrived Dec. last, we have had the longest and most severe winter that ever was remembered. All was continent: and horses with heavy carriages could go over the ice into the Jerseys from one island to another; and it is only since the 20th of February that the Rivers and Straights have been navigable.

The rebels thought to avail themselves of this easy communication and threatened an attack upon Staten-Island, where there were about 1800 men under the command of Brigadier General Stirling, who were pretty well intrenched. For this purpose General Washington, whose army was posted at Morris-Town, sent a detachment of 2700 men, with six pieces of cannon, two mortars, and some horse, commanded by Lord Stirling, who arrived on the island early in the morning of the 15th of January [q. v.], our advanced posts having retied upon their approach. They formed the line; and having made some movements in the course of that day, withdrew in the night, after having burnt one house, pillaged some others, and carried off with them about 200 head of cattle. The day of their arrival on the island I embarked 600 men to attempt a passage, and support General Stirling; but the floating ice prevented their success, and obliged them to return. I imagine that the appearance of these transports, with troops on board, which they could see towards the close of the day, induced them to make this sudden retreat, as they could not tell what success they might have.

Some prisoners were made in their retreat.

"Some days after [see Ja 23] an advanced post, which they had at New York, consisting of one company, was surprised and taken by Lieut.-Col. Caldwell, and from him they were posted in a house which they had ever attacked and dislodged, with the loss of 40 men killed and 97 made prisoners, among whom were 1 Lieut. Colonel, 1 Major, and 5 inferior officers. We had 3 killed and 15 wounded.

"In the night of the 22d of this month [q. v.] we parted surpised and took a rebel post in the Jersies, consisting of 250 men, of whom we made only 65 prisoners, owing to two embarkations, one from the Captain's Castle, and another from Kingsbridge under Lieut. Colonel Howard, not arriving at the appointed time. Our loss on this occasion was very inconsiderable. Capt. Armstrong of the 42d regiment is wounded. By these little enterprises during the winter, as far as we can ascertain, we have made 350 prisoners, and killed about 65 of the enemy. By the best intelligence I have been able to get, General Washington's army at Morris-Town consists of about 5000 men, besides militia. There has been a great desertion among them. Tired of the war, and dissatisfied with the depreciated value of their money, a general discontent pervades the whole army."—N. T. Merc., Jl 5, 1780.

"Fuel was so very scarce, that garden fences, old sheds, &c. were spun down to supply the want of cord-wood... Provisions were as scarce as fuel. Everybody, except the rich and the dissolute, was put upon short allowance. Potatoes were sold for a guinea per bushel, while biscuits, made of oatmeal, as coarse, and containing as little nourishment, as ground straw, were served out to the [British] troops.

"Early in the spring the Cork Fleet arrived, and brought provisions in abundance. Fine rose-butter was sold immediately at 25. 2d. lb. and almost everybody was soon relieved and made comfortable."—From an account of the life of one Thomas Gardner, in pamphlet vol. No. 238, p. 58, N. Y. H. S.

De Voe states that probably the Old Slip Market was among the "old sheds" torn down for fire wood, as he finds no mention of it after this time.—Market Book, 169.

There is on record, of this month, a "Return of each Province proportion of the specific Tax for the support of an Army of 50,000 men for 3 years; according to a resolution of Congress pass'd in April 1780." New York furnished 1,120,000 lbs. of beef or pork, 1,969,968 bbls. of flour, 500 tons of hay or fodder, 68,558 gals. of rum, and 30,900 bbls. of corn.—From Ms. among the late Robert Pirce papers, in N. Y. P. L.

"General Robertson writes to me for a Draft of the Instrument to declare a Part of this Province at the King's Peace with Draft of a Letter from him to S H Clinton urging that act without delay. I send him both in a Letter before Dinner."—Wm. Smith's Diary (MS.), VI.

The draft of the proclamation reads: "Whereas His Majesty hath been graciously pleased by his Letters Patent under the Great Seal of Great Britain ... to appoint and authorize me to be his Commissioner among other Purposes therein mentioned to execute certain Powers to such Commissioner intrusted by a statute or Act of Parliament pass'd in the 16th Year of His Majesty's Reign intituled an Act to prohibit all Trade & intercourse &c. and whereas it appears to me that it will tend to encourage many well affected Persons to exert themselves in suppressing the present Rebellion to proceed to execute the said Commission in divers Parts of the Province or Colony of New York I do therefore in His Majesty's Name by this Proclamation declare the Island of New York Staten Island and the Island called Nassau or Long Island with the several Small Islands comprehended within the City and County of New York & within Kings County & Queen's County on Long Island 18th and every Port District and Place within the aforementioned Limits to be at the Peace of his Majesty."—Wm. Smith Mss., folio 194, in N. Y. P. L.

In some "Notes upon the Enquiry, whether it is expedient to declare any Part of the Province of New York at the King's Peace, and to revive the civil Government!" dated May 25, 1780, Smith writes:

"All I can say upon the first Question is, that I do not at present perceive any Inconvenience, in leaving the Merchants of
the City of New York, under the old commercial Regulations; and certainly if the Restraints of the prohibitory Act were to operate as Punishments the Excision of them, must be grateful to such as loyal Subjects; and win upon others; who if they adventure at Sea, will find no Enemies in their Course, but such as are so to the Reunion, Peace & Welfare of the whole Empire.

"The second question . . . is not so easily answered—

Perhaps the greatest Danger is in postponing it.

The completest Revival of the Civil Authority . . . will place them in a State of Responsibility to the Laws—A Condition ardently desired by some and dreaded by others. (1) it will be ungrateful to the Army—(2) and certainly will be so to the few in profitable Situations under Military Favour—And (3) to those who exasperated by their Sufferings & Losses from the Hand of the Rebels, conceive perhaps erroneously, that the Restoration of the Government may be conducive to the Gratification of their Revenge.

"A wise General will not suffer the Laws to check the Success of the Royal Arms . . . and it is also clear, that the Risk of setting it [civil authority] up, ought not to be ventured, until there is Ground to suppose, that a Legislature can be convened, as well to prevent by new Laws, the clashing of the two Powers to the public Injury. In order to procure the Country ought to yield, to accommodate the Army, and to facilitate the military Operations for the general Weal. . . .

"... Until we get a proper Assembly, let the military Powe continue, & the Acts be suspended that are to give a free Course to the Judicial & Executive Authority; and this State may be further prolonged by the Dissolution of an Unfavorable Territor, should appear to be obstinate, against the conciliatory & other Measures requisite to promote the Interests of the Crown and the common Felicity. . . ."—Ibid., folio 194. The proclamation was never published.

Gov. Robertson issues a proclamation prohibiting persons from cutting wood without permission on land that does not belong to them. Great devastation has been caused by cutting down the woods.—Royal Gaz., My 3, 1780; Man. Com. Coun. (1861), 694. See Ap 3.

"Gen. Pattison observed to me," says Smith, "that none but my Daughter attended the public amusements. I mortified him by saying my Wife & I thought ourselves too old. He was astonished being himself near 72—I withdrew at 8 after Coffee & sent his Aid de Camp after me to play a Rubbers of Whist. I told him I never touched Cards—I suppose I have made a valedictory Visit. Heaven preserve a Nation of Triflers."—Wm. Smith's Diary (MS.), VI.

Gov. Robertson's proclamation "published by Rivington last Saturday [Ap 1, p. 7] ag[1] cutting Wood displases some but the Lord's Friend would be said carry him on their Backs."—Wm. Smith's Diary (MS.), VI.

Maj.-Gen. Pattison issues a proclamation prohibiting the inhabitants of New York from throwing dirt, garbage, etc. into the streets, docks, open lots, or ruins, "to the southward of Fresh Water;" and ordering that it be carried away once a week at their own expense; and thrown into the open lots in the Swamp, (near the Jew's burying-ground) which are under water." Regulations are also given for street cleaning, and against incumbrances. William Hill is appointed officer to enforce the order.—Royal Gaz., Ap 19, 1780; Man. Com. Coun. (1861), 694-95, 715. See Ap 28, 1781.

Members of the "Ancient Reformed Dutch Congregation" there are a Trinity vestry for the use of St. George's Chapel during the time their church "was occupied by his Majesty's Troops." They are now no longer in need of the Episcopal Church because Maj.-Gen. Pattison has taken "the earliest opportunity (The Recovery of the Sick and wounded soliderly you'd permit) of returning the Old Dutch Church."—Trin. Min. (MS.).

"Sailors in a Merchant Vessel from this Port lately rose upon their Captain to carry the mission of the king to the port. Gen. Robertson writes to me to bring the Pirates to Trial but there being no Commission here & the Record of it sent to England as Bayard says by Mr. Tryon I advised the Govr to send them Home to be tried on 2nd T. 28th—The Capt & Sailors were retaken by the Gallowe Skip of War & brought in here."—Wm. Smith's Diary (MS.), VI.

Tryon, who "took the Air to Day for the first Time since the 9th March," tells Smith that Gen. Robertson has not a "Scrape of a Penn" from Clinton and that "Tryon has given over to the general 'only Rule of the Letter of Service left with himself. If he had not done this Robertson could not have drawn out a Shilling of money for Pay Subsistance or Contingencies."—Wm. Smith's Diary (MS.), VI.

Clinton and Arbuthnot summon Charleston, S. C. to surrender, promising "protection to the Inhabitants & their Property," but the Americans refuse.—Robertson's Jour. (MS.). See My 12.

It is resolved by Trinity vestry "that (as soon as it shall be thought advisable) application be made for Setting on foot a Lottery or Lotterys to raise the Sum of Two thousand pounds for rebuilding the Charity School House in this City."—Trin. Min. (MS.).

Robertson issues the following proclamation, which is written in a conciliatory vein: "The King having been graciously pleased to honor me with the Care of a Province, where, in a long Residence, I have contracted an Esteem for some, and an Affection for many of its Inhabitants, I proceed with great Pleasure to announce his benevolent Intentions.

"It is his Majesty's Wish, by the Revival of the Civil Authority to prove to all the Colonies and Provinces, that it is not his Design to govern America by Military Law, but that they are to enjoy all the Benefits of a local Legislation and their former Constitution.

"To this End I have brought out the Royal Appointments for forming the Council, and supplying the Places of Lieutenant Governer and Chief Justice. And in Coccurrence with the Commander in Chief of the British Forces who is also his Majesty's Commisioner for the Restoring of this Colony, I shall, as speedily as the public Exigences will permit, give order for opening the Courts of Judicature, and convening the Assembly; and in general proceed to the Execution of the Powers reposed in me for the free Course and complete Re-Establishment, both of the Legislative and Executive Authority. . . . The proclamation continues, at unusual length, to define the government's aims.

"Until I meet you regularly in General Assembly, for the Restoration of mutual Confidence, and the remedying of private as well as public Evils, I pledge myself to Men of all Classes, in every Part of the Province, that it is the compassionate Desire of your Sovereign, and of the Parent Country, to unite in Affection as in Interest, with the Colonies planted by her hand, and which have long Flourished under her Care,—that the Suggestions of her Intention to impair their Rights and Privileges, are the Arts of Malice and Faction,—and that every Insinuation made by the domestic Enemies of Great-Britain, of her being disposed to abandon the Provinces to internal Anarchy, and the Mischiefs of their jarring Interests and Claims . . . is equally false and malicious . . .

"This is inclined to reproach than to conciliate, to aggravate than to forget, even the Guilt of those, who, privy to the repeated Calls of Great Britain to Friendship, upon Terms adequate to the Desire and Expectation of their Constituents, yet nevertheless forbore to reveal them, . . . I exhort them to seek an early Refuge in the abundant Clemency of the Crown, from the Perils to which they have exposed themselves, by Measures fraudulently concerted and tyrannically informed . . . .

"Towards redressing the Disorders, arising from the Loss or Want of Charters, I recommend it to all concerned, to apply without Delay in the ordinary Course for Charters, which shall be granted as soon as Civil Authority takes Place.

"As to the public Books of Records, so important to your Titles and Estates in all Parts of the Colony, and formerly lodged in the Secretary's Office, I understand that they were separated from the rest, by the provident Circumspetion of my Predecessor, . . . and having been afterwards sent Home for safe Custody, you may rely upon their being carefully preserved, and duly returned as soon as the common tranquility is restored.

"I now call upon every Individual in the Colony, to show his Allegiance, Fidelity and Zeal to the publick, and his Assistance towards accomplishing the King's most gracious Design of restoring the Blessings of Peace and good Government: And they who shall most distinguish themselves by their laudable Efforts for these good Purposes, will most assuredly best recommend themselves to the Royal Approbation and Favour."—Royal Gaz., Ap 19, 1780.

In researches undertaken for the preparation of this Chronology,
it has been discovered that the governor secured Wm. Smith to
draft this proclamation for him. Smith says in his diary that the
proclamation was discussed, prior to its publication, at a meeting
of the governor with his council; "it is almost verbatim what I sent
him in the 3rd Draft."—Wm. Smith’s Diary, VI, under Ap 15, 1780.
See Ap 18 and 21.

On July 31, Smith wrote: “Not having seen the Govt’s Proclama-
tion of 15 August, but receiving a copy [in] which delivering me several Hundred Copies to be
issued—I have frequently suggested the Necessity of its being re-
published.”—Wm. Smith’s Diary (MS.), VI.

This proclamation resulted from instructions sent by Germain
to Robertson, dated July 9, to revive the "Civil Constitution," and to exercise authority as "Civil Govt," under a new commis-
sion—a commission which accompanied Germain’s letter—
July 30, Col. Dent, VIII: 767.

Civil government was not restored, however, until after the
British evacuation (see N 25, 1783). For another attempt to bring
it about, see Mr 21, 1782.

"Crowds are pursuing the Proclama-
tion [see Ap 15] afforded to Rivings-
ton’s Corner & Mr White tells me it goes down with the resentful
like chopped Hay. Will Bayard & Ashfield rave at the Liberality
of Sir H Clinton’s Proclama-
tion Those who are in Rebel Houses drew being dislodged by the Penitence of the Proprietors."—Wm.
Smith’s Diary (MS.), VI.

Smith writes: ‘Elliot to Day & Axtel and White yesterday
press me for the Draft of the proposed Address from the Council
[see Govt. Robertson]. I accordingly carried it to White in Con-
denning this omission which might make it accord with the vidicative Rage of High Church & Refugees.
Elliott is to call for it to-Morrow resolved if I alone join him to ad-
dress the Governor.”—Wm. Smith’s Diary, VI. On April 21, he
added: ‘‘Mr Elliot calls here with another Form of Address which he
read. He has objections to mine which I am only let to suspect from
the Frivolity of such as he recites to express—That it is too
long. That we ought not to expose ourselves to a Paper War—
That he can never join in what I have said of the Taxing Claims.
He always thought G. B. had done so much for her Colonies that
they ought to be taxed

‘I objected to his that it was a meer Compliment of No Use to
the Crown. It would do well enough if the Rebellion was broken
down but contributed nothing to it—It would be laughed at—Satis-
fiied Mr Man nor obliged Conviction for making a single Proskylate
&c.

‘He seemed much affrighted—paid Compliments but must act
for himself & be convinced.

‘At length told him that I would agree to a Complimentary
Address if nothing else was the Choice of the Majority & he caught at me.
May propounded that the Draft should join in the Address of the
Members & that we should then meet to compose a third.

‘Elliott is either imbarassed by old Declarations of his Prin-
ciple for taxing America—or by his Belief that Ministers still
mean it, or by his Cowardice

‘I leave the Council to his Management & their own Course.
In the Path of Uprightness there is Safety—And as to myself I am
determined on a uniform & Systematic Conduct, bending to Occu-
currences only to facilitate it.—The Draft he produced after having
Mine 24 Hours was not a single Sheet & of a contemptible Diction.

—Ibid., under Ap 21. A draft of Smith’s proposed address is among the

I find great jealousies among the Refugees of me as the Author of the Governor’s Proclama-
tion [see Ap 15]—Their Wretch recom-
monds both me & the Measure to the Disaffected in Town &
that may render both more pleasing to the Rebels beyond our Lines.”

—Wm. Smith’s Diary (MS.), VI.

‘Mr Wallace carried the two Drafts of the Address [see Ap 18]
to De Lancey who would not join in either nor hear mine read.
He said he would not address after having served in Council 12 years.
April 15th another over his Head.

‘He went to Morris who chose No Address but said his present
dependent Circumstances obliged him to join in a Complimentary one
if the Rest insisted—He did not like neither the Compliments paid
to Gov’t Tryon, who had never shown any Regard for him nor would
it please the People.

I am not very fond of this Business. I spoke my
Mind freely.—That I should not quarrel if there was none—
I would join either in a meer Compliment or another like my Draft—

That the latter or something like it was our Duty & would answer
many good Purposes & that I beggred him to remember what I had
said—Wallace is to report to Elliot . . .

‘I have done my Duty—And perhaps shall find myself best
served by the . . . Obstacles to the Address. Certainly too—if
the Crown does not finally prevail.”—Wm. Smith’s Diary, VI.

On the next day, Smith, Elliott, Wallace, and Axtel met at White’s.
"Wallace reported that De Lancey would not come & that Morris
was gone on a Party of Pleasure to the Hook but had said he would join in an Address that was merely Compliment.

‘Of Course to gain Morris my Draft was given up & they (White
only excepted) refused to say a Word of the Spanish or Irish News.

‘We then resolved to adhere to Compliments in the Strain of Eliots
Draft in which I take Home the Dictum of the Minister—
that Elliot that I refused to do it there & I promised to send it to his
council as I should alter it to be copied by Mr Seton.—I dropped that
nothing was lost by Delay for if the Rebels supposed we disliked
the Gov’t Proclamation they would approve it the more, for they
considered us as Tories.”—Ibid., under Ap 25. See Ap 27.

The "sons of St. George" celebrate "the festivity of their
tutelar Satur, at Mr Strachan’s Queen’s Head Tavern, where an
elegant dinner was prepared for that purpose." Nineteen loyal
roasts were drunk, and "the day spent with every social enjoy-
ment."—My 1, 1780.

The governor thinks an attack from a French fleet is not "im-
probable" and "tells me," says Smith, "he is busy with the Com-
modore on the Project of sinking 20 Hulls in the Channel at the
Place which is but 500 yards off. We work at it & the Point is of
much use—The Expense of the Hulls loaded with Stone about
$1000—Not to be sunk till the moment of the Enemy’s approach.

Smith’s revision of Elliot’s draft of an address of welcome to
Gen. Robertson (see Ap 24), is being circulated for the signatures of
the council members.—Wm. Smith’s Diary (MS.), VI. On April 28, Smith recorded: "The Gov’t tells me Elliot was with him yester-
day upon the Subject of an Address, but as he found it meely complimentary & the Council not unanimous he rather declined
the Receipt of it. Opposition would say the Minister had sent out
a Man not agreeable to the People. I replied that every Evidence of
our Refusal to express joy at his Arrival would be the more recon-
cile the People without the Lines to his appointment."—Ibid.,
VI, under Ap 28. He added, on April 30: "Elliott calls here with a
Face of Concern—intimates that the Gov’t disliked our Address as
paying no Compliment to him & much to Tryon & that this was the true
Objection—I told him what the Gov’t had said yesterday. He then
showed me one he [Robertson] would receive & asked my Hand to
it—I altered a few Words & signed it tho’ I really think the Com-

Lafayette returns from France to Boston bringing news of an
expected expedition under Count de Rochambeau. On May 10, he
rejoined Washington, after an absence of about 17 months.—
Toussaint, Marquis de Lafayette in the Am. Rev., II: 106, 108; and
see Ja 7, 1779.

"There is an arrival of 47 [British] transports from South Caro-
olina at New York."—Writings of Geo. Washington (Ford ed.),
VIII: 275.

The chamber of commerce, in an address bearing this date, May
signed by Isaac Low, president, congratulates Gov. Robertson on
his arrival.—Royal Gen., My 13, 1780.

Lord Germain writes from Whitehall to Gov. Robertson, ex-
pressing the king’s approbation of the "spirited Behavior" of the
inhabitants of New York "in so cheerfully and unanimously taking
up Arms and embodying [organizing] for the Defence of the
Town," when the rivers were frozen up. The governor published this
letter on June 28.—Royal Gen., Je 28, 1780.

Rivington prints the following address to Gov. Robertson from
Andrew Elliot, Chas. W. Apthorp, Wm. Smith, Hugh Wallace, De Lancey,
and Wm. Axtel, appointed by the Royal Instructions to form the Council for the Province of New-York.

"Deeply impressed by sentiments of loyalty, and gratitude to
our most gracious Sovereign, for his paternal affection and atten-
tion to the happiness and interests of his subjects in America, an-
ounced to us by your Excellency’s Proclamation [see Ap 15], it is
the highest satisfaction of our hearts, and your Excellency, on your
appointment, to the care of a province, of which, your long
residence, has given you so competent a knowledge, and where, the
inhabitants, are from experience, so sensible of the confidence they may repose in your abilities, inclination, and exertions to promote their happiness. "The ambitious and self-interested promoters of rebellion, to support their unauthorised, and perilous combinations, with design to procure arbitrary powders, have, by concealing, and misrepresenting, the many generous and humane offers made by Great Britain, for restoring public tranquility, brought on the inhabitants of this once happy country, every evil at first taught them to dread. "Their personal estates are now wrested from them by taxation, their real and most substan to the par of their paper dollars, their commerce annihilated, their civil rights and privileges trampled upon by Congress and Committee Men, and their persons liable to be dragged into the field at all seasons to perform the duties of a Soldier. "In the sympathy we feel for our suffering country, nothing can be more grateful to us, than the benevolence of the Proclamations issued by his Majesty’s Commission, and your Excellency, so amply affording to the inhabitants of America, the means for extricating themselves from their present distresses; and whereby they are assured that Great-Britain is still willing to restore to the colonies the benefits of local legislation, with their former constitutions, a participation in her extensive commerce, and an exemption from all taxation not imposed by themselves. "His Majesty’s attention to the immediate happiness of this province, by empowering your Excellency to embrace the earliest opportunity, consistent with the public exigencies, to open the Courts of Judicature, convene an Assembly, and completely re-establish both the Legislative and Executive Authority, will, we are convinced, rouse, and bring forward, every aid requisite to enable your Excellency to fulfil his Majesty’s most gracious intentions. "We most cheerful concur with your Excellency, in the applause so justly due to the merits of your predecessor, under whose administration this province, when connected with, and protected by Great-Britain experienced uninterrupted faculty. "From the Errent principles of loyalty and personal confidence in your Excellency, you may be assured, of our co-operating in every measure conducing to the honour of the crown, and the common prosperity and interests of our fellow subjects."—Royal Gaz., My 3, 1780. An address very similar to this, endorsed "Mr. Elliot’s Draft of an Address to Govt. Robertson,” is among the unbound Wm. Smith’s MSS, folio 197. See also Ap. 27.

4 Various Accounts that Charles Town surrendered 12 April & that Sir Henry fell in the attack—I believe one Half of this Tale—The first Part of it & no more "No Taxes levying nor Drafts making in the Country. So low the Power of the Users—They wait for the French Troops expected in June. . . . . . . . . This is precisely the Moment to invade Jersey or to attack the Highland Forts."—Wm. Smith’s Diary (MS.), VI.

Lieut-Gen. Knyphausen plans to complete immediately "the interior Line of Works for the Defence of this City." Gen. Patterson calls together the captains of militia, and informs them that, "Among other Works it is proposed to erect some new Redoubts, and City Militia being now regularly embodied for the express Purposes of Co-operating in every Defence of the city, it is very much my wish that they may have the Credit in Conjunction with His Majesty’s Troops, of raising one of these intended Redoubts themselves, to bear, as a lasting monument of their Loyalty, the name of the Citizen’s Redoubt."—N. Y. H. S. Col. (1895), 392-93.

This "Line of Defence" extended "from the North to the East River by Bunker’s Hill" and demanded "a working Party daily . . . of 500 Men." The militia companies furnished "300 of that number," and Gen. Patterson, in another letter of May 29, said: "they have ever since labour’d very cheerfully, without taking Pay or Provisions & have now almost finished the work."—Ibid., 175-79. The militia completed its part of the work about June 5.—Royal Gaz., Je 3, 1780.

5 Bayern is chief-justice at the governor’s house.—Wm. Smith’s Diary (MS.), VI. Mag. Am. Hist., Je, 1881, p. 429. He had been appointed exactly one year earlier (see My 4, 1779).

Because military government never yielded to civil government under the British régime (see Mr 21, 1782), Smith never functioned in this office.
From this time through the rest of the year, Washington considered campaign plans for attacking the enemy at New York.

"Goods and merchandise have lately been brought clandestinely into the city in considerable quantities, in violation of the established regulations (see Jl 17, 1777). These regulations are therefore revived and reinforced by a proclamation prohibiting the practice."—Royal Gaz. My 20, 1780.

Washington’s army, after a rising mutinous, the Frenchman, Monseigneur la Luzerne, has lately visited the Rebel camp, and the Marquis De la Fayette, who is come out from France, has deep into the weakness of the country. . . . may find America prepared for the avowal and acknowledgment of the vast and ambitious views of the House of Bourbon, is certainly the attention of a people long abused by false confidences, and indeed of every friend to humanity and the Protestant Religion.

“Should these Popish emissaries in addition to that state of the country already sent home by Gerard, represent the Congress to be what they are, without credit abroad, or influence at home, that their boasted army in the mountains of Morris-Town, consists of less than 4000 men, without pay, ill-clad, and reduced to eat dog’s flesh for subsistence, and so nearly a mutinous dissolution, that the Pennsylvania line is nightly disarmed and guarded, and that all the rest of their force (except the besieged in Charlestown) is short of 2000 men, scattered in the Highlands, at Fort Stanwix, and in Virginia. What events are wasting daily by desertions, and the expirations of their terms, and that the Congress want the means, to find volunteers to replenish a camp that has nearly as many butts as men: Such representations, I say, might induce the courts of Versailles and Madrid, to throw away the mask of their affected love to mankind. . . .

It may afford some confirmation of the suspicion we ought to entertain, of the crafty design of the British name and nation, to peruse certain passages from the new work of a celebrated Frenchman, I mean ‘the political and philosophical speculations’ of Mons. Linguet late of the Parlement of Paris.”

Smith summarizes Linguet’s remarks on America as follows: “The fate of the American colonies being now submitted to the decision of arms, it was, in the opinion of the government of the colonies, to carry the justice of their claims to independency. . . . But I could wish no inquiry of politicians in either hemisphere, whether they have seriously reflected on all the effects which such an independency may be expected to produce.

In the first place, will not the success of the Americans be an endless source of divisions amongst themselves? From what we know of the human mind, ambition and a love of power will soon begin to actuate the operations of the Congress and the provincial assemblies. . . . The example of seven little provinces near the Zuiderzee, which have preserved unity after success, and freedom notwithstanding their wealth, is by no means applicable to the vast, and almost boundless extent of the American colonies. . . . Nor have the Americans the same motive to a revolt that formerly influenced the Dutch, who were groaning under the most oppressive tyranny. . . .

In the next place, the first manoeuvre of the Americans as independent states, will be to open an asylum to Europeans. . . . The crowd of active and restless minds, whom the hopes of a better fortune, and the dawn of liberty in a rising state, may attract to the western hemisphere, will not fail to multiply the seeds of disorder there.

Supposing however these speculations to be ill founded, still it must be acknowledged, that America when well people, will no longer have any occasion for the productions or assistance of
Europe... Its inhabitants, surrounded by seas which abound with fish; masters of the richest mines; in the neighbourhood of the mineral veins of France, without danger... sugar, indigo,... delicious fruits... spices, precious stones, and fine linen... will soon become the masters of our destiny.

"It will then be from the necessity of things, that we shall depend on them, more than ever they depended upon us...

"But their abounding with gold and diamonds will be far from constituting the whole of their superiority over us; they will add to these, all the powers which states, as well as individuals, derive from the vigour of youth and a consciousness of prosperity...

"Then, they will soon aim at crushing the languid powers of Europe...

"The time of such a revolution is uncertain; but it will be inevitable. If America should become flourishing and independent..."

---Royal Gaz., My 24, 1780.

Smith's authorship is revealed by entries in his diary. On May 23, he wrote: "I sent Richmond yesterday a few Lines to introduce a Passage or two from a late French Publication by Linquet late of the Parliament of Paris... I have aimed to prevent its being mischievous but chiefly to publish Washington's Weakness, which is giving umbrage to the Army here." He added, on May 24: "I was happy to find the Representation respecting the Rebel Army which I inserted in Richmond's Paper this Day so well & so early confirmed."—Wm. Smith's Diary (MS.), VI.

Run-away negroes are prevented from crossing the North River; heretofore they have "become a burden to the Town."—N. Y. H. S. Collections (1875), 397.

The four hundred battalions forming Maj.-Gen. Lee's Brigade are reviewed "upon the Exercising Ground near the Ship Yards."—N. Y. M. Merc., Je 6, 1780.

"The Drought is really alarming," writes Smith. "No rain since 4 April—it is scarce possible by the Coldness & Dryness of the Spring for Cattle to subsist upon grazing—Complaints come also of an Insect that besets the Buds of the Fruit-Trees like the house that last Fall consumed the Blades of Wheat."—Wm. Smith's Diary (MS.), VI.

A court martial is ordered for tomorrow "at Mr Nicholas Bayard's House near Bunker's Hill."—N. Y. H. S. Collections (1875), 397.

Gen. Robertson sent me early this morning, writes Smith, "to receive the accounts by the Iris Frigate that left Charleston Town 17th Inst.—Fort Sullivan surrendered S. & Charles Town the 12 Inst." The whole Garrison (6,000) Prisoners of War we have left but 70 & the Rebels 900. during the Seige. The Iris was bound to Hallifax & put in here with Prizes—or we should have had no Intelligence yet. Govr Patterson has the only Letter,—This is directed to his Excellency,—It is of the 14 May from Sir And S Hammont: Lord Cornwallis was to move with the army the 16 to Cambodn 96 miles N W from Charles Town & thence to N Carolina among the Regulators—a wise course to break down the Usurpation in both Provinces."—Wm. Smith's Diary (MS.), VI. A Royal Gazette Extraordinary of June 8 (g. 5, c.) was devoted entirely to news regarding the capture. See also Ven Krafft's Journal, 111.

The Gordon "No-Popery" riots begin in London. Extracts from London letters, of July 5, describing the riots, appeared in Royal Gaz., S 6 and 9, 1780.

Archibald Robertson writes: "we sailed [from Charleston] & came to an anchor off Fort Sullivan [later known as Fort Moultrie]—took a drawing of the Port."—Robertson's Jour. (MS.).

"Maj. Indigo," says Smith, "at the Erection of an Orchestra on the N. Side of Chancel of Trinity Church for the Music and this sharpened still more by the Commandants Orders to widen the walk inward which occasioned the removing of some Tomb Stones flattening certain Graves & Covering a Vault's Mouth. General Tryon told me last Night the Rector had consented. I should have Him at it & spoke of the Tenderness of Mankind respecting the Rites of Sepulture important. If Smith had not this Mission from the Society it might be thought he would be spoken of in the House of Commons next Winter as a Breach of Decorum & an Injury to the King's Interest—It may cool & wean some warm Church-men—at least it affords a Triumph to the Whig Interest in Town. The only good Effect it can have that is far from being intended is to reduce the whole to the Erection of the Civil Authority."—Wm. Smith's Diary (MS.), VI. See also Je 5.

The Associated and Militia Companies finish their part of the construction work for the "Citizens' X Y Z" and thanked by Maj.-Gen. Patton.—N. Y. M. Merc., Je 1780; see also Ap 29, and My 4. Gen. Patton reported to Germain on July 4 that he had given this name to the redoubt, it having being constructed by the volunteer companies, and that the commander-in-chief had confirmed it.—N. Y. H. S. Collections (1875), 178, 184.

"George Forbes (Late of Whitehall Street) Begs leave to acquaint the Nobility and Gentry of this City that he is manufactoring No. 299, Little Dock-Street, two doors from the Royal Exchange...

---Royal Gaz., Je 3, 1780. See Ja 12, 1778.

Mayor Mathews, "attended by a most respectable body of our principal Citizens," presents an address to Gov. Robertson. Hope is expressed for the "speedy Suppression of this present unnatural Rebellion, and of the Re-establishment of Peace." A desire for the restoration, in the meantime, of civil order in the City, although a word of commendation is spoken for the "just and equitable Military Establishment, whereby the internal Order and Police of this City have been wisely regulated and conducted."

In the course of a brief answer to this address, the governor said: Your Behaviour affords a better Proof than Words that a Spirit of Loyalty to the King and an Affection to the Parent State, exists and may easily be called forth in America.

"May the Arms you have so readily taken awe those into Submission, whom the humane Calls of a Sovereign and your Example fail to induce to become Friends to the general Welfare."—N. Y. M. Merc., Je 5, 1780. This day being the anniversary of the king's birthday, "at Noon the Cannon at the Battery were fired, which was followed by the Merchants, Ship Owners & Merchant Ships in the Harbour."—N. Y. M. Merc., Je 5, 1780.

In further celebration of the anniversary of the king's birthday (see Je 4), a "very elegant entertainment" is given by Gov. Robertson to all the British and German Generals, with their suites, the Lieut. Governor, Chief Justice, and the rest of his Majesty's Council.—N. Y. M. Merc., Je 12, 1780. The "Chief Justice" writes of the occasion, "At Dinner to Day at Black Sam's. We were near 70—The Gov'r & Council with all the Generals."—Wm. Smith's Diary (MS.), VI.

At night, fire-works were exhibited on Long Island, and "here they had festivities. But previous thereto, the walk at Trinity Church had been increased in width, so that the posts had to be sunk into the grates. The orchestra from the Play House, seated against the Church, and another place for the musicians erected just opposite the Church, gave great offense and uneasiness to all serious and still more to all godly men, and caused many reflections not only on the irreligious turn of the Commandant, but also on the Rector, who is said had given his consent to it. Profaneness and wickedness prevail here,—Lord have mercy!"—From the Journal of the Moravian Congregation, in Penn. Mag., X: 429-30. See Je 3.

"Troops moving towards Staten Island—Some by Water from King's Bridge—Others by Land & I suppose they are marching from Long Island to the Narrows. Major Crosby arrives and delivers Sir Henry's Letters to General Knyphausen who was already off Govt's Island at 3 o'clock."—Wm. Smith's Diary (MS.), VI.

"General Stirling with the First Division entered Eliz' last Night and was brought up wounded in the Thigh this morning. I heard a great Firing from 6 to 7 this morning. 'Tis said it began at 3—the Report comes from the S W."—Wm. Smith's Diary (MS.), VI; Jour. of Hugh Gaine, II: 90.

Ephraim Smith, from London, "Who formerly kept Smith's Tavern in this City and Philadelphia," announces that he has "re-assumed his former situation, No. 939, in Water-Street." Believing that a "Steak & Chop-House In the London Style" is much wanted in the city, he has laid out the lower part of his house on this plan, "and the upper part for detached companies." He will endeavour to keep the "best of wines, punch and draft porter, with steaks, chops and cutlets, every day, from one o'clock till four,"—Wm. Smith's Diary (MS.), VI.

"General Washington with the First Division entered Eliz' last Night and was brought up wounded in the Thigh this morning. I heard a great Firing from 6 to 7 this morning. 'Tis said it began at 3—the Report comes from the S W."—Wm. Smith's Diary (MS.), VI; Jour. of Hugh Gaine, II: 90.

Ephraim Smith, from London, "Who formerly kept Smith's Tavern in this City and Philadelphia," announces that he has "re-assumed his former situation, No. 939, in Water-Street." Believing that a "Steak & Chop-House In the London Style" is much wanted in the city, he has laid out the lower part of his house on this plan, "and the upper part for detached companies." He will endeavour to keep the "best of wines, punch and draft porter, with steaks, chops and cutlets, every day, from one o'clock till four,"—Wm. Smith's Diary (MS.), VI.

There appears, of this date, an Extraordinary Gazette from Richmond's press recounting the capture of Charleston (see My 12). The copy for this issue was prepared by Wm. Smith, a fact revealed in print for the first time in this Chronology. On the receipt of the official reports of Charleston's capture in New York (see My 29), "Genl Robertson very wisely suggests to me," writes
the chief-justice, “the Hint for letting off the good News with Sobriety in an extraordinary Gazette which I drew up & sent him, & be communicated to Rivington.”—Wm. Smith’s Diary (MS.), VI. The paper gives the official correspondence between Sir Henry Clinton and Gen. Lincoln, the articles of capitulation as first proposed and as finally concluded, a “Return of Ordnance, and Ammunition” in it when surrendered, a “Return of the killed, and wounded” on both sides, and a “Journal of the Operations before Charleston.”—Royal Gaz. Extraordinary, Je 8, 1780. The whole account was copied in the N. Y. Merc., Je 12, 1780, and the Penn. Gaz., Je 14, 1780.

12 It is reported from Jersey, says Smith, that Washington’s troops are now back at Elizabethtown, and “drew Rations of Shad & Indian Meal &...”, 12 Shad & 14 dried Clams served 3 men 2 Days.”—Wm. Smith’s Diary (MS.), VI.

13 New York State passes “An Act approving of the Act of Congress, of the 18th Day of March, 1780, relative to the Finances of the United States, and making Provision for redeeming the Proportion of this State of the Bills of Credit, to be emitted in Pursuance of the said Act of Congress.”—Laws of N. Y., 3rd sess., chap. 62 (printed by Holt, 1782).

14 Smith says he has expressed his belief, in a letter to Tryon, that the British forces now in Jersey “would do a good Service where they were if the Lines were so inlarged as to favor Desertions,” appending this further statement: “If they had in the Field as many Cevars as we at the Coffee House Bridge the whole world might have Cause for Consequence.”—Wm. Smith’s Diary (MS.), VI.

15 A letter of this date, written from Fairfield, Conn., reads: “A gentleman this moment has come off Long Island, and brings account that the enemy, in their late manoeuvre into the Jerseys, have met with a repulse, and their loss sustained is 150 men killed, 300 wounded—General Stirling is dead since the action, belonging to the British army.”—Patten Gaz., Je 26, 1780.

16 Gov. Robertson issues an early proclamation giving detailed orders for the cutting, cording, and carting of wood on Long Island, in Kings, Queens, and Suffolk Counties, to supply “the Barrack Yard in New-York,” for the use of the troops, and “to guard against the Severities of a long Winter.”—Royal Gaz., Je 17, 1780.

17 While Washington is awaiting the arrival of the French fleet, and is meditating an attack, which the united forces of the French and American armies would enable him to make (see My 16), Sir Henry Clinton returns to New York, after completing the reduction of Charleston (and feeling assured that he has brought the sound of his cannon to the ears of the Continental Congress in command at the South, and brought to New York about 4,000 disciplined troops and the ships of war under Admiral Arbuthnot, which were detached for the operations before Charleston. This accession increased the regular force in New York to 12,000 men, rank and file. It therefore appeared to many of the best officers of the Continental army that an attack on New York must be abandoned, at least for the present; nevertheless, Washington did not “relinquish the idea of an enterprise against New York.”—Royal Gaz., Je 21, 1780; Tower, The Marquis de la Fayette, II: 115-19. See also Robertson’s Jour. (MS.).

18 “At 8 A M above 500 foreign Troops with their Colours pass down the Broadway to White Hall. I believe Knayhausen means now to attack New York.”—Wm. Smith’s Diary, Je 8, 1780.

19 “The Signals at Staten Island for a Fleet. The Ships moor under it within the Narrows & Sir H Clinton lodges in Town—The Reasonable of 64 its said is on the East Bank & we bear Distress Guns.”—Wm. Smith’s Diary (MS.), VI.

20 Archibald Robertson writes that, having returned with the troops and the fleet from Carolina, he “Learnt that Genl Knayhausen was at Elizabethtown in the Jerseys with all the force he could take from N. Y. & that he had had a skirmish near Connecticut Farms & were rather obliged to retreat w/ the Loss of some Considerable No of men—Genl Stirling badley w/.” He adds: “what could take Genl Knayhoun to the Jerseys is past my devotion in so Critical a time as the Present when we may look for France to forsake us. It is to me every moment but I suppose he has been unable to w/stand the Solicitations of a No of Interested selfish ill grounded Arguments & informations laid before him by a Set of Leading People as they are Call’d in this Country... Quodam Govt wanting to be replaced & Lawyers better skill’d in Quirks than sound disinterested Views of matters as they now Stand Circumstanced over Europe for there the point must now be cleared up.”—Robertson’s Jour. (MS.).

21 “This morning there was hear Frost on the Ground wh is very markable in this Season in this Climate.”—Robertson’s Jour. (MS.).

22 A cricket match is advertised to be played on this day, and continued every Monday throughout the summer, “on the Ground where the late Reviews were, near the Jews Burying Ground.”—N. Y. Merc., Je 19, 1780.

24 Clinton, having “information that Washington w/ all but two Brigades of his Army had moved in Divisions... to pass the Clove... to West Point,” orders “all the Troops on Staten Island that came from the southward to reembark on Board their Sewl Transports w/ Intention to Land at or Near Nack [Nack] & Endevour to cut part of the Rebels on their march.”—Robertson’s Jour. (MS.).

25 Smith, in his diary, censures Clinton’s inactivity: “He should have gone instantly to the Higland Forts... near a week is already wasted [see Je 17].”

26 “I am most inclined to believe he will make the apprehension of a French Fleet an Excuse for total Inactivity, & recline on the Pillow of the Reputation acquired by the Charles Town Success...”

27 “These 5 Days lost since his Arrival might have terminated the War. I think it probable that the Rebels would have deserted the Forts above on his Approach—The wind almost constantly fair—we find the Garrison above horribly alarm’d on the Return of the Fleet—300 drawn instantly from the White Plains—Some of the stores at W[est] Point hurried away to Fish Kill—Agreed Garrisons are weak there. All the Northern Parts in Consternation about the Indians & the untowards of the Militia both here & in Connecticutt.”—Wm. Smith’s Diary (MS.), VI.

28 A New Yorker writes: “A very considerable alteration, with regard to freedom of speech, is discoverable in the people in most parts of America. Those who, either from policy or from principles, were privately well-wishers to Government, fear not now to declare their real sentiments. They foreseer, or flatter themselves they foresee, the approaching downfall of Congress, and therefore think themselves secure in welcoming the cheerful prospect.”—Lloyd’s Enquiries, Ag 3-4, 1780.

29 Smith writes that 30 ships with 3,000 to 4,000 soldiers on board have passed up the river this afternoon. “General Lee’s command—said they are to land at Tappan—if they got a Head of Washington & Knayhausen who is following with 6000 comes up with him he must fight or leave all his Heavy Baggage & fly over the Western Mountains on this Side of Sussex Court House.”—Wm. Smith’s Diary (MS.), VI.

30 “The Surprise intended by going into Jersey miscarried by the Slovness of the Germans in advancing.”—Wm. Smith’s Diary (MS.), VI.

31 “Tryon was very active yesterday & in much Danger as I learn from others. He is modest himself—did not slip a syllable of that Natural-Spoke of the Rebels as unable to stand the Kings Troops—They constantly retire—Nothing like their ever facing a Bayonet. —Fly to Eminences with their Field Pieces & scull to get a Fire & then run.—undoubtedly the Peninsila Line is disaffected. All the Deserters are uniform in their Reports of it. They are lately promised hard money. Washington may have 3000 Continentals. His leaving Jersey a Proof of his Weakness.”—Wm. Smith’s Diary (MS.), VI.

32 At this time, “Mount Pleasant” (see L. M. R. K., III: 98), kept by one Corby, was the scene of the anniversary celebration of “St. John the Baptist” by Lodge No. 210 of the “Ancient York Masons.”—N. Y. Merc., Je 26, 1780. Cf. N 24, 1779.

33 The British troops (see Je 22) land at Philiagusland and encamped “w/ their B’s East Chester Creek & Left to the N. River.”—Robertson’s Jour. (MS.), Cf. Ms. map in N. Y. H. S.

34 “The Knight appears in Town again early this morning— Several ships come down the River. The Army at Philiaghsburg.
The said also Survey an carrie much 1782. British

July N. — Later, Wm. McMullin

July wrote concerning Clinton: “What an Opportunity has he lost since the 17th of June. This possible the Militia may crumble away & the Forts grow weak to favor a Surprize but I believe the Summer is lost. The Army is reproached as gathering Strawberries by making Hay by this & this Day a Notice in Richmond of a Play to be acted by Officers on the 3d Inst as by particular Desire.”—Wm. Smith’s Diary (MS). V.

July 3. A coming auction at the Coffee House is advertised, for the sale of the “Remains of the Prison Hospital Ship Kitty, as they now lie in the Wallahough, with the Launch, Anchors, Cables, etc.”—N. T. Merc., Jl 3, 1780.

July 4. Wm. Taggart writes to the board of ordnance that “a Building which has, since the King’s Troops took Possession of New York, been appropriated for the sole Use of Keeping all fired Ammunition at a Safe and convenient Distance from the City is judged necessary to be pulled down, on Account of interrupting the Line of Defence, that is carried from the North to the East River. It is besides in a very bad State, and reported upon a Survey I ordered to be made to be too far decayed both Walls and Roof to admit of being repaired.”—N. Y. H. S. Collections (1875), 188.

The New York chamber of commerce passes a vote of thanks to Charles Newman, commander of the packet “Carteret,” who, when attacked by four “rebels” privateers off Long Island, preserved the mails. It also voted him a piece of plate, with an appropriate inscription.—Royal Gaz., Jl 5, 1780.

Smith writes in his diary: “The Tale of Simon Stevens [is] misterious. He went to the Com in Chief, who sent B Robinson with him to see Allen. He was not there—Stevens confesses he forged the Letters in Allens Name but says he saw Levi & not July Ethan Allen. Stevens is thrown into the Prevost this Morning. Robinson on search for Ethan Allen who is believed to be hard by.”—Wm. Smith’s Diary (MS), VI.

July 4. The “elegant plate, household and kitchen furniture” are inventoried to be sold on July 7 at his house on Wall St.—Royal Gen., Jl 5, 1780. Smith writes that he suspects Clinton and Arbuthnot quarrelled at Charleston “about the Division of Plunder,” and thinks they are “irreconcilable.” He learned yesterday “that Captn George who is an Aid de Camp of Clintons & now lodes in the James House had 5 large Cases brought into his Rooms, some very heavy which he brought from Charles Town. His Majy says many of these New Linnen came out of cases of them & the Rest were probably Plate.”—Wm. Smith’s Diary (MS), VI.

Clinton said yesterday, writes Smith, that “it was his Opinion the Rebellion would terminate in a Crash—He spoke of it with Elation.”—Wm. Smith’s Diary (MS), VI.

Smith says: “Simon Stevens [see Jl 4] was out of the Prevost yesterday. The Mistery is unravelled—The Com in Chief has seen Ethan Allen—He was exasperated that General Robertson & I knew of his arrival—To cast a blind he (Stevens) was sent to the Prevost—he reveals this Joke to Griffith to Day who reports it to me—What astonishing Jealousy! Griffith says it must not be known or Stevens will suffer.”

“I saw the Governor immediately after this Information the he had been here while Griffith was waiting an opportunity to give it.” He had a hearty Laugh on the Aspect of Allen’s Interview as favorable to the Public & the Folly of Sir H C & above all the Servility of Col Robinson. It was he that brought the Information that Stevens was imprisoned as a Cheat and hear that he had confessed he forged the Letter he slewed General Robertson—That he brought it to a Man to copy & then himself signed Ethan Allen’s name and that he said it was Levi Allen he had seen.”

“Sir Henry himself told the Govr that Stevens was a bad Fellow whom he had once before thrown into Jail. He owned that he had it in Design to practise upon the Vermonters & that he had written to Baldin and to promise them a separate Government but that Baldin said they were Villains & would not suffer any of them to come into his Government.”

“Robertson had also told the Governor that he believed notwithstanding all that Ethan or Levi Allen was still with our Lines concealed.”—Wm. Smith’s Diary (MS), VI.

The cruise “Sir George Rodney,” of 14 guns, commanded by Capt. Daniel Moore, returns to this harbour, “after a fierce and continued engagement with the brig Holker. Many were killed on both sides; the Holker escaped pursuit.”—Royal Gaz., Jl 12, 1780.

The “Sign of the Happy Man,” near Dr. Brownjohn’s wharf, mentioned in an advertisement of a house for rent, is one of the street-signs typical of this period.—N. T. Merc., Jl 19, 1780.

A London news item reads: “The following is said to be the situation of affairs at New York, when the Cartteret came away [on this day]. General Clinton was there, but went occasionally to visit the army, which was encamped at Philiburg, about 16 miles from that town, under the command of Col. Polson. Knuyphausen was returned from his expedition to the Jerseys, after having had a few skirmishes with the advanced posts of Washington’s army, which lay encamped near Hessian Abbot. He then commanded the port, with the following ships, viz: Euros, Robuste, and Reasonable, of 64 guns each; Renown of 90; Roebuck and Iris of 44; Pearl and Blonde of 32; and Triton and Guadalupe of 28. Besides these there were the Vulcan sloop, and several smaller vessels.”—Lloyd’s Eve. Post. (London), Ag 25-28, 1780.

Rochambeau arrives at Newport from France with transports carrying 4,000 men and a convoy of seven ships of the line.—Winson, VI: 499, 560.

To relieve “the many loyal subjects who have been driven from their possessions by the Rebels,” Gov. Robertson, with Clinton’s approval, publishes a notice “that the houses and lands belonging to persons in rebellion, or being amongst the Rebels, will be divided (excepting such as are wanted for the King’s service) and small lots assigned to the More尺 Refuge. Familiar Abbot, these may be proportioned to the number and wants of the claimants.” Such claimants “are desired to leave their petitions for this pur-
pose with Philip J. Livingston, at his house near Hell-Gate, on Long-Island, or at the Provincial Secretary's Office, in Broadway, New-York,..."—*Royal Gaz.*, JI 19, 1780. In a later order (O 3), Robertson provided that persons "driven from their property by the rebels, or fled on account of their loyalty, being unprovided with arms, do not expect to find all the comforts of life..."—*T. Mer.,* O, 1780.

Gov. Robertson appoints George Duncan Ludlow "Master of the Rolls for the province and Superintendent of the Police on Long-Island, with powers on principles of equity, to hear and determine controversies, maintain peace and good order, and regulate the Police through the same, until civil government in all its forms can take place; and all Officers of the Island are required to aid the said Magistrate and his Assistant, in their Office, and obey such orders as they shall from time to time receive for the effectual execution of their duties."—*Royal Gaz.*, JI 19, 1780. A week later, Ludlow published an announcement of the opening, at Jamaica, of "The Office for regulating the Police, on Long-Island."—*Ibid.*, JI 26, 1780.

Admiral Graves arrives "off the Hook w 6 sail of the line."—Robertson's *Jour. (M.S.)*. Writing at 4 p. m., Smith says: "Adm. Graves below with 6 of his Fleet—the 4th in Sight—This by an Officer of the Romulus to the General Office. An Express is given to Genl Robertson the 2 Day before yesterday to Philibus." Writing again at sunset, he says: "There are now but 6 Ships at the Hook, & Arbuthnot orders all over the Bar out to them Great & small about 20 Sail—9 of the Line the 30-three 44. They will go out on the Search for the French Fleet."

"Washingtom must now have joined Rodney with 7. He wrote to Arbuthnot for 5 ships wanting no more."

"Our Scene is now changed And if we providentially intercept the French Fleet a sudden Peace may ensue..."—Wm. Smith's *Diary (M.S.),* VI.

It was reported in London in September that, as soon as Admiral Graves arrived at New York, "the inhabitants, to a man, able to bear arms, as well on Long Island and Staten Island, as in the city, offered their services to supply the places of the Military, in guarding the towns and forts contiguous."—*Lloyd's Eve. Post* (London), S 13-15, 1780.

The provost-marshal is ordered by Gen. Patterson "to cause to be apprehended William Brathwaite, late Broker to the New Insurance Office, that he may be forthcoming before the Chamber of Commerce, to answer charges by the "Company of Underwriters," to the said Officer."—*N. Y. H. S. Collections* (1875), 408-409. Smith writes: "If Arbuthnot* [sic] at Rhode Island [see JI 18] he must crave for the Land Forces. Tin said the greater Number of the Transports are still on this side Hegelge."

"As we had the first News of the French arrival, 18 INST surely, the Winds that brought the Adm 1 to Rhode Island might have blown the Transports to White Stone—It blew S. W & S 18-19, 20-21—Yesterday & to Day N E & N. Some of the Transports did come down the River till yesterday."

"Sir Henry is in Town & daily takes his Rides out & his Evening Walks. The Town grawls—and I dare say the Adm 1 will thunder..."—Wm. Smith's *Diary (M.S.),* VI.

The "Bloud man-of-war is "on the Rocks" near Corlaser's Hook through carelessness, says Smith. Clinton "was to have sailed [to Rhode Island] in her." Gen. Robertson believes Arbuthnot must not be "trettng to Rages," for the troops had not been "imarked at Whistone last Night," and the "43d Regt (Lt Col Marsh) did not move from Breucklin till 6 o'Clock yesterday..."—Wm. Smith's *Diary (M.S.),* VI.

"No Tidings yet whether Washington is moving across the North River. If he does the recarting of the Salt Provisions and Bread at this Instant of high Harvest [it] must infinitely distress the Farmers. Many Farmers & their Sons daily fly to us from the Tyranny in the Upper Country—Horrid monthly Taxes & Fines wear the People from the Congressional Extravagances. Last Saturday 36 from Dutchess County."—Wm. Smith's *Diary (M.S.),* VI.

"The Sugar House, with all the Utenials and out-houses, belonging to the estate of the late Henry Cuyler, deceased, situated in the North Ward of this city," is advertised to be sold at "public Vendue" on Aug. 14.—*Royal Gaz.*, JI 26, 1780. The date of sale was postponed to Aug. 17.—*T. Y. Mer.,* Ag 14, 1780.
1780
July 29
It is reported that Clinton and the ships that started for Rhode Island have not yet left at Huntington," writes Smith; "the Genl doubting whether Washington might not attack in his Absence & the Expediency of his going on." Writing on the next day, Smith adds: "What an infantile Conduct is he exhibiting! He holds the Adm[1] & will not contribute to his Credit or he is a Coward. Time will detect the Principle that actuates to his Delays. I consider this Halting as meer affectation to mute Time & would be a sad Proof of Consequence that may ensue."—Wm. Smith’s Diary (MS.), VI.

In his journal, under this date, Capt. Archibald Robertson gives the "State of the English & French Fleets." The English have 12 men-of-war, 9 frigates, 2 sloops, and 1 fire-ship; the French have 7 men-of-war, 5 frigates, and 2 armed ships. Admiral Arbuthnot, not with the English vessels is at Block Island, and Admiral Ternay with the French is "in the Harbour of Rhode Island."—Robertson’s Jour. (MS.).

Smith writes: "Ralph Izard came over in Ternay’s Fleet—Ex- claims ag Franklin & Dean—says they have agreed to give the Fishery to France & the Floridas to Spain—He is gone to tell Congress the Country is sold to Foreigners. Ternay’s Squadron miss a Vessel with all their medicines—so Izard said who damned their managers!—The French land forces but 400."—Wm. Smith’s Diary (MS.), VI.

"To my Astonishment," writes Smith, "I perceive Sir H [Clinton] walking by the Window—He has had a N. wind just sufficient to bring him here [from Huntington]." Continuing on the next day, Smith says, "I walked down to the Exchange last evening—In Every Countenance there is Mournfulness and many are suspicioning the Cause of the Return of the Fleet . . . imply Censure on the General. Some who hope the best of him are terrified at a Suspicion of our Danger. Not one Man guesses the true Motive. All are discontented & the Fire will soon burst forth after they hear the Liberties that will be countenanced by the Adm[1]. Joseph Bull I find by Jauncey lets off part of what he told me—His coming is unfavorable to the General. Oliver De Lancey told Jauncey Washington could not raise a Volunteer in N. England & that the Drafted Men came to Long Island. He had himself seen a Hundred of them—Jo[5] Thurman was on Board the Fleet often at Frogg’s Neck. An Officer told him secretly it would never see Rhode Island because the General had the Adm[1]—I thank God that I have cautioned both ag[1] suffering their Diffrances to hurt Time & become public."—Wm. Smith’s Diary (MS.), VI.

The British “Camp Equipage” is “brought from King’s Bridge & ferried across to Long Island from Frogg’s Neck.”—Robertson’s Jour. (MS.).

1780
Remarks on the Conduct of the Campaign, 1780 is the caption of a note, in Wm. Smith’s handwriting, preserved in the N. Y. Pub. Library. It starts thus: "That it was in the Power of the British Army to have broken down the Rebellion in this County before the Arrival of Ternay’s Fleet is doubted only by those who are unacquainted with the low and illiberal Condition of the Party adhering to the Congress & to the Means by which it might have been completely reduced. . . . The uses of a Conn2 of the Hudson are so obvious as to make the Neglect of it not only our Astonishment but the Subject of insuspicous Speculation . . . There is a Season in every Year in which the Highland部分s may be attacked without the Hope of Succour from the Country—This continues from the Opening of Spring in March to the Ister End of May . . . Why did M’Knyphaul hold 11 Thousand Men in a State of perfect Inactivity to the South?"—Wm. Smith’s Diary (MS.).

"The whole Rebel Force was at this Time despicable . . . The Main Body in Jersey was between three & four Thousand & the Highland Garrison, under 800—They had no other Men in Arms except 200 at Fort Stanwick & 600 more in Virginia. . . . All the Detachments of the Rebel Force were known to be disaffected, and many desirous to desert. . . . The Congress were trembling at the daily change of the Temper of the People who under the Pressure of their Calamities lent a willing Ear to General Robertson’s Proclamation of the 15 April (r. c.) and to the Addresses it excited. . . . What an Opportunity & how strong the Inducements to some Activity on that part if not to strike a decisive Blow yet for such Armaments & Descents as might prepare the Way for it by compelling the Enemy to Movements exposing their Army to Desertions, their Militia to a Consumption of their private Stores, & Usurers every where to the Contempt & odium of a great Country . . . "Can there be an Apology for this Negligence that is not, at best a Shift of Blame from one Shoulder to another. It is said that we waited for green Forage. What was it wanted in a Water Passage of 20 Miles up the Hudson or in short Descents of Menaces on the Coast? For meer Menaces frequent, would have worn down the Militia & such Measures were achievable by us without either Risk or Expense . . . . "The Sally of the 7 June to Connecticut Farms only 3 Miles behind Elizabeth Town being conducted with an unaccountable Slowness plundering & conflagration and followed with a secret Retreat in the Dead of Night & a Thunder Storm under all the Symptoms of Fear deserves every Public & private Animadversion. . . . "His [Knyphausen’s] Situation till Sir Henry Clinton arrived in Spite of all Disguises was sufficiently ridiculous He seemed fearful both of advancing and retiring—He had sent away his Horses but they were scarcely over the Ferry before they were ordered back again . . . . "The only Hope was that the Comm[1] in Chief would on his arrival with Reinforcements of 5 or 6000 wipe off the Disgrace we had contracted, but Alas! the Sequej affluent too much Ground to conjecture that he would have been better pleased to have found the Northern Army still in Winter Quarters . . . . . . . . no Man chose to say what he thought—and This express Silence continues while I am writing."—Wm. Smith MSS., fol. fol.

A news item, published in London on this day, states: "When the last letters left New-York, they were building three ships of war for the King’s service; one of 44, one of 32, and one of 24 guns; the largest of which was expected to be ready to launch this year."—Lloyd’s Eve. Post, II 31-Aug. 2, 1780.

"Some of the British troops are encamped at Flushing. On Aug. 3; the remainder "landed & encamp’d at Whitestone." After noting this, Robertson says: "All ordered to be ready to cross over to Frog’s Neck at a moments Warning—as Genl Washington with the Rebel Army were at Verplank’s Point at 1 Yesterday [Aug. 2] afternoon prepared to march to 3 towards Kingsbridge, Flot thickens,"—Robertson’s Jour. (MS.).

Information comes to Smith through a female servant at Clifton’s headquarters that "an Aid de Camp of Washington’s came there the Night before last & was invisible All day yesterday confined to the General’s Room—that They lodged together in it last Night—She knows not his Name—he is a young Man. The Genl was with him All day yesterday except while on Board of some Vessel, & That this morning all the Family is on the move."—Wm. Smith’s Diary (MS.), VI. For the writer’s interpretation of this incident, see 2b.

"General Robertson receives Intelligence," says Smith, "while I was standing with him at Rivington’s Corner that Washington recrossed the Hudson on Saturday [Aug 5] & was this morning at Tappan. Has Boats & is 8 or 9000 strong."—Wm. Smith’s Diary (MS.), VI.

At this time, Lafayette endeavoured to persuade Rochambeau to attempt a movement against New York, which he deemed "the pivot on which turn the operations of the enemy." Rochambeau, however, saw that its success would be impossible unless the French possessed a decided superiority on the sea. This they did not have; and the forces under him, even if united with the small army under Washington, he regarded unequal to the proposed capture of New York. Pursuing France in the Am. Rev. Am. Rev., citing Doniol’s La Participation de la France à l’Etablissement des Etats Unit d’Amérique, V: 356 and Lafayette, Mémés, etc. (1873 ed.), II: 125. See also Tower, The Marquis de Lafayette in the Am. Revol. (1895), II: 143 passim.

"Washington proceeded from Tappan to Paramus but our Troops continued at Whitestone and Flushing. Sir Henry came to Town the 8th in the Evening. The Transports came back daily to prepare as said for England. Pontoon’s went out Yesterday to Kings Bridge—the Generals Inactivity is a Mistery. He seems to be perfectly on the Defensive. Why no Man can say. His Conduct therefore not only affords but creates Suspicions of an expected foreign Force—This damps the Loyaltists & animates the Rebels."—Wm. Smith’s Diary (MS.), VI.

Gen. Patterson, having been given by the commander-in-chief
permission to return to England, writes Andrew Elliot, superintendent general, and the magistrates of police, acknowledging the assistance he has had from them.—N. Y. H. S. Collections (1875), 425-27.

13. The Galatea arrives from the Adm[1] [Arbuthnot], His Lieut. Roger. Certain to Newbern in a Flag & asserts that No Lands Works are raised. That all their Ordinance was in the ship Isle de France that got into Boston & is now drawing across the Land—That the French had been in vast Consternation but had dismissed 5000 Militia for want of Provisions—Rogers is sent here to tell the Story to the General and that the Fleet waits for him at Gardiners Island.

14. The Rebels find Bread with Difficulty. They draw in Dutchess Sheaves from the Stack of the last Harvest to Mill for the use of the army.

"I believe the Adm[2] Importunity will avail Nothing. Reported that 400 Rebels were yesterday opposite to us & with in a Mile or two of Paulus Hook and drove off many Horses. If it is true the greater our Shame. Why is not our army rather at Tappen their Whitemstone & Flushing, where the Soldiers injure themselves by paddling in the Mud & Water for Clams."—Wm. Smith's Diary (M.S.), VI.

15. Sir Henry [Clinton] leaves the Town for the army on Long Island. I think he has lost his opportunity for the Descent on Rhode Island. . . . If 8000 go to Rhode Island our Force will be 7000 strong—There will all be wanted for the Defence of the three Islands. If Washington approaches Poulus Hook this Town may be indanger’d tho’ we may muster a Militia of 3 or 4000. Long Island must not be trusted solely to the Militia on Account of the Dissatisfaction of Many in Suffolk & visits from Connecticut—The Jersey Militia & Washington may hear us at Poulus Hook & Staten Island and from Connecticut & in Queen's County & at King's Bridge—The Jersey Militia are Notified in the Chatham Papers of last Week to hold themselves in Readiness.

"We should have attacked Rhode Island before Washington was reinforced & when the Fleet went there in Harvest. He is now stronger & will always be most numerous in Autumn when the Militia can be less spared from Home."—Wm. Smith's Diary (M.S.), VI.

16. An Officer of distinction at New-York,” writes that Sir Henry Clinton has fortified New York “so compleatly, that he declares he will defend it against all the force, which the French and Americans can jointly bring against it; but that he will now act wholly upon the offensive, and never more attempt any thing offensive, until he is reinforced with ten thousand men.—Lloyd's Eve, Post, O 6.

Capt. Richard Grinnell makes his escape from the prison-ship "Scorpion" at New York. He reached Philadelphia on the 20th. The day he left New York, “there was the hottest press ever known there, they pressed about 700 men that day, and the press still continued, that they not only took seamen, but all the refugees, labourers and merchant's Clerks they came across.” On the "Scorpion" and "Strambillo" were about 300 prisoners.—Penn. Packet, Aug 22, 1780.

A British officer, in a letter to Rivington, refers to "the Mall" as "the chief resort for company of an evening," and observes that "there is seldom a seat in that agreeable walk that is not taken up by the gentlemen," to the exclusion of "the fair sex."—Royal Gaz., Aug 16, 1780. For the location of the "Mall," see JI 27, 1789.

17. An American officer, in the Garrison at New York, respecting the Officers under General Gates at Camden, S. C.—Moore, Diary of the Am. Revolution, II: 310-12. For the receipt of the news in New York, see Royal Gaz., S 9, 1780. There appeared in the Royal Gaz., of Sept. 16, what was said to be a copy of "an Advertisement stuck up at the public places in Philadelphia on the late arrival there of General Horatio Gates." It reads:

"Millions!—Millions!—Millions!—Reward—Strayed, Deserted, or Stolen, from the Subscriber, on the 16th of August last, near Camden, in the State of South Carolina, a whole Army, consisting of Horse, Foot, and Dragoons, to the amount of near Ten Thousand (as has been said) with all their baggage, artillery, wagons, and camp equipage. The Subscriber has very strongly urged the Commissioners to receive such information from his Aid de Camp, that a certain Charles, Earl Cornwallis, was principally concerned in carrying off the said Army with their baggage, &c. Any person or persons civil or military, who will give information, either to the Subscriber, or to Charles Thompson, Esq; Secretary to the Continental Congress, where the said Army is, so that they may be recovered and rallied again, shall be entitled to demand from the Treasurer of the United States, the sum of Three Millions of Paper Dollars as soon as they can be spared from the Public Funds, and Another Million, for apprehending the Person principally concerned in taking the said Army off. Proper passage[es] will be granted by the President of the Congress to such persons as incline to go in search of the said Army.—And as a further encouragement, no deduction will be made from the above reward on account of any of the Militia, (who composed part of the said Army) not being to be found or heard of, as no dependence can be placed on their services, and nothing but the most speedy flight can ever save their Commander.

Horatio Gates, M. G. And late Commander in Chief of the Southern Army. Philadelphia, August 30, 1780."

—Royal Gaz., S 16, 1780.

18. "The common Discontents continue. People who see no Danger in Sir H.'s detaching the best Hall of the Army called 14 or 16000 in the whole to Rhode Island are surprised to hear this Evening that he is gone by Land with the Dragoons to the East End of Long Island & that Fanning's Regt are to follow from Lloyd's Neck this Morning."—Wm. Smith's Diary (M.S.), VI.

19. "Major General Patterson's ill state of health obliging him to relinquish the command of the City and Garrison of New-York, his Excellency Lieut. General Robertson, who commands the district, takes upon him the duties hitherto exercised by Major General Pattison."—Royal Gaz., Aug 16, 1780. See JI 25.

Challenges for cricket matches between "Americans" and "Englishmen" are issued through the newspapers.—Royal Gaz., Aug 19, 16, 1780. The cricket field is at "the Jews' Burying ground."—Phib., S 6, 1780; L.M.R.K., III: 927.

20. Washington was seen this Day at Fort Lee from the Heights of Harlem by our Generals.—Wm. Smith's Diary (M.S.), VI.

Gerard Bancker records in his note-book: "The Mayor at the Request of General Robinson [sic], Employed me to go about the Island to get an account of the farms belonging to persons out of the lines. I accordingly waited on John DeLancy, George Stanton & Alderman Dykeman the latter gave me much information."—From volume of Bancker's MS, in N. Y. H. S. These farms are referred to as absentee's farms. There is in the Bancker Coll., in N. Y. P. L. (box A-B, folder "Bowery"), what appears to be the original draft of Bancker's report on this subject. It is entitled "A List of the Farms on New York Island West Side of Bowery & Blooming Dale road," and "West Side of Bowery Lane."

"Gen' Robertson tells me this morning," says Smith, "that he has been from Washington last Night that Washington had come in Force to Fort Lee & that he sent it [the account] to Sir H [Clinton] but his People refused to wake him at midnight . . . Tryon says Washington is erecting Works at Fort Lee & confesses vast uneasiness at it."—Wm. Smith's Diary (M.S.), VI.

21. "The Rope walk, above the Fresh Water Pump, where there was stored Brimstone and other combustibles, burnt down tonight. This was violent, but did no damage to the surrounding property."—From the Diary of the Moravian Congregation in Penna. Mag., X: 412-15. The rope walk was "near Bunker Hill."—N. Y. Merc, Aug 28, 1780. It is shown on the Montesor Map, Pl. 45, Vol. I.

The magazine in Fort George is being thoroughly repaired.—N. Y. H. S. Collections (1875), 202.

22. The rebels visit the estate of Col. William Bayard at "Weehawken," where they destroy his houses and burns "his farms." They then set fire to his "elegant house" at "Hoobuck," and "one of the finest barns ever constructed," and the whole improvements are burned to the ground. For two days the "raging flames" burned the grass and "one of the most valuable orchards existing."—Royal Gaz., Ag 30, 1780.

23. The rebels visit the estate of Col. William Bayard at "Weehawken," where they destroy his houses and burns "his farms." They then set fire to his "elegant house" at "Hoobuck," and "one of the finest barns ever constructed." These and other improvements are burned to the ground. For two days the "raging flames" burned the grass and "one of the most valuable orchards existing."—Royal Gaz., Ag 30, 1780. Writing in his diary, under the same date, Smith says: "Depredations committing on the Jersey Shore—Bayards House & Barn in Flames light up this morning near noon. Deserters say 3 Divisions are gone yesterday of 6 Brigades a Regt each under 1000 in all—This Hail the Rebel army."—Wm. Smith's Diary (M.S.), VI.

24. Rivington prints the following statement concerning the "real
1780 state of the Rebel Army, the Congress, their Finances, &c. &c." for the information of the British public.  

26 Aug. No man will now part with any thing for paper money, old or new.—The rebel Commissaries have not credit for a farthing, in any part of the Continent; in every place they take what they want from the farmers, . . . and leave a certificate to be paid at Boston's Day.  

The most horrible oppressions are at the same time, used to force the militia to join them in their career to destruction. All their bands are made up of men and boys drafted from an unwilling militia, except the Continentals who had been early beguiled to infer in the continental, and whose times are not yet out . . . who at the opening of the present campaign were about 3 or 4000 in Jersey, and 8 thousand on the Highlands, and Fort Stanwix.—They rely for augmentations entirely upon a militia, everywhere a majority abhorring the French, &c. against the protraction of the rebellion . . .  

The loyalists increase hourly, scarce a day passes without fugitives to this place, from the barbarities perpetrated by the usurpers.  

"Resolutions are forming in divers colonies, to resist the freedom taken with private property to support what the rebels call their army . . . "—Royal Gaz., Ag 26, 1780.  

27 Col. Angell, commander of the Second Rhode Island continental regiment, reports that he went from Jersey "in Company with a number of the Gentlemen Officers across the woods to north River to a place called Spiten Devils Creek against king bridge, from thence down the river to burdeets ferry at fort Lee, we had a grand prospect of all the Enemies Incumomments on York Island."—Field, Diary of Col. Israel Angell, 1779–1781, 109.  

28 The Marine Society, and the inhabitants of the city, present addresses of gratitude and esteem to Maj.-Gen. Patterson, on his departure for England, and he makes replies.—Royal Gaz., Ag 30, 1780.  

Autumn 1780.  

Jones's Hist. of N. Y. during the Rev., II: 2.  

1 The large fleet return to Europe fell down to the Hook—A great many passengers went home.  

4 Gen. Tryon departs for England with the fleet ("150 odd Sail."). He "sends me," says Smith, "a Letter of Thanks for Services . . . He confesses the Rebutance I knew he had to leaving this country."—Win. Smith's Diary (MS), VI.  

6 Several Intimations from Jersey of a Defeat of Gates's Army in North Carolina by Lord Cornwallis & the Elfling of the Fomier into Virginia—said 1000 killed wounded & taken."—Win. Smith's Diary, (MS), VI.  

7 Members of the "Board of Refugees" are requested to meet on this day "on particular Business," at Mr. Hales, as usual.—N. Y. Merc., S 4, 1780. This was the "Tally-Ho" tavern at the corner of Nassau and King St., run by John Hales.—See Jl 16, 1779.  

Gov. Robertson issues a proclamation ordering all male inhabitants between the ages of 17 and 60 to enroll themselves in the militia. Those who refuse to comply with this order shall be subject to imprisonment or banishment. He also issues rules for the "better government of the militia."—N. Y. Merc., S 11, 1780.  

13 Admiral Rodney arrives at Sandy Hook "with 10 Sail of the Line." Being ill, he delayed coming to the City, although "the Guard was turned out to receive him, and many of the inhabitants were longing to see the brave Rodney."—Jour. of Hugh Gaine, II: 99; Win. Smith's Diary (MS), VI. This was Sir George Bridges Rodney, Rear Admiral of Gt. Britain.—Royal Gaz., S 19, 1780. Robertson gives the date of his arrival "off the Hook" at Sept. 14.—Robertson's Jour. (MS).  

14 Lieut.-Col. Birch of the 17th Light Dragoons, is appointed by the commander-in-chief to be "commandant of New-York," with the rank of brigadier-general.—Royal Gaz., S 20, 1780.  

16 Rivington publishes a notice offering a reward of 20 guineas for the conviction of the "Forger and Incendiary" who posted his alleged handwriting in the Church Walk, and sent threatening letters to his house. He adds: "The law of England punishes Forger with Death."—Royal Gaz., S 16, 1780.  

16 "The Gentlemen who suppressed at the late Widow de la Montagnie's on the 17th of September [error for Oct. 26, 1776], (after taking down the Liberty Pole) are informed in this public manner that their bid [bill] for the supper and liquor still remains unpaid; if the iron that has been about the Pole is not restored, the subscriber will recommend a purchaser, and if the bill is not paid very soon, the subscriber will be under the necessity of publishing the names of the gentlemens that suppded on that occasion. John Amory."—Rivington's Royal Gaz., S 16, 1780.  

18 Sir G B Rodney comes to Town. A Vessel from Charles Town this Evening with Authentic Dispatches of the Success on the 16 [56] S. 1780. Aug. & Gater's Vessel of 2000 men. Americans lost all their Cannon Baggage &c.—and were pursued 20 odd miles by the Horse."—Win. Smith's Diary (MS), VI.; Von Krofft's jour., 119.  

18 Col. Williams, of the 8th Regiment, which is billeted at the bounwerte of Jacobus Kip, gives a dinner to Commander-in-Chief Sir Henry Clinton and his staff, as a parting compliment to Major John André, who is about to go north to confer with the American general, Benedict Arnold, in a plot to secure the capitulation of West Point, which Arnold commands.—Life and Career of Major John André, by Winthrop Sargent (1861), 268. An account of the affair was told afterwards by the owner of the house, Jacobus Kip, who was present.—Hist. Notes of the Family of Kip, by Rt. Rev., William I. Kip.  

Clinton and André had been, on this evening, prior to this event, at the Beckman house. "From its doors, gracefully bidding adieu to the beautiful Baronesse [Riedesel], rode Clinton and André to attend the farewell dinner given that very evening by his brother officers to the latter before he started on his ill-starred expedition, at the old Kip House at Kip's Bay. . . . They knew he was to leave on a matter of military importance, but that was all, and little could they gather from the remarkable toast given by Sir Henry Clinton at that brilliant table, 'The health of Major André who leaves us to-morrow to return Sir John André.'"—Memoir of James William Beckman, by Edward F. De Lancy (pub. by the St. Nicholas Soc, N. Y., 1877), 115; Letters and Journals of Mrs. General Riedesel, trans. by Wm. L. Stone (Albany, 1867), 179.  

It should be noted that Ford's British Officers in the Am. Rev. mentions no colony by the name of Williams, but states that Sir William Erskine was colonial of the 8th Regiment. See also Gaine's Universal Register (1781) for the names of officers of the British army.  

According to a statement made by Major André on Sept. 24, 1780, he left New York on the 20th "to get on board the Vulture," in order (as he thought!) to "meet General Arnold there in the night." He remained on board until the night of the 21st.—Sargent, Life of André, 349.  

Robertson says: "At Night Maj' André landed from the Vulture to meet G1 A — at Havrestraw—went to his Q^O opposite West Point."—Robertson's Jour. (MS).  

Benedict Arnold and Maj' André have their interview at the house of Joshua Hett Smith, a square two-storied stone house on the Havrestraw Road, two and a half miles below Stony Point, regarding the proposed attack upon West Point and capitulation—Sargent, Life of André, 389–391–92. A facsimile of the pass given by Arnold to André is in the Emmett Collection (No. 8753) of the N. Y. P. L.  

The British plan was "in some respects the most dramatic and tragic event of the Revolution." Early in February, 1779, while at Washington's camp on the Raritan, he heard that the executive council of Pennsylvania had sent to congress eight charges against him for mal-administration while commanding at Philadelphia.—Penn. Packet, F 5, 1779. Soon after this, there were re-published 11 articles of impeachment exhibited against him on Dec. 1, 1776.—Hodg. Jour., F 1779. On Jan. 26, 1780, he was sentenced to be reprimanded, and, in retaliation, he opened the secret treasonable correspondence with Major André.—Avery, Hist. of the U. S., VI: 248.  

At a conference at Hartford, Washington, Rochambeau, and De Ternay agree that, of all the operations which can be undertaken, the most important is the reduction of New York, "the center and focus of all the British forces." They also agree that even with a superior naval force to blockade the harbour, it would
by Henkels, Phila., for July 1, 1792, describing the original order-

It is publicly reported in New York that "Major André who
went out to confer with General Arnold" has been "taken by
General Washington and 'is supposed will be ill used.'"—Jour. of
Hugh Gaine, II: 100.

"Sir H Clinton sends for me," says Smith,—"an Hour with
him.—He opened with his anxiety for André & concluded with
thanking me for the consolation I had given him in the Opinion
that he [André] was no Spy which he said agreed with all the others
who had been consulted.

"He told me he had corresponded for a considerable Time with
Arnold.—That he gave him the Intelligence the French were coming
to Rhode Island. That it was his Design to receive it before they
arrived but Arbuthnot would not believe his Information good—
That afterwards he proposed his landing 6000 Men at Seconnet &
this the Admiral disapproved & so hid after that another Proposi-
tion of landing up the Narraganset. He believed Arbuthnot an
honorable Man but he was old and had some bad advisors. Thus
he said he had lost his Advantages of raising the French—

"He lamented the last Disappointment—blamed Arnold for
not sending Andre back by Water.—Their Interview was at Stoney
point & Andre seized on this side Croton by ; Militia Men & carried
to the Light Horse.—That he had every Thing ready for seizing the
Highlands & putting an End he owned to the War for he had Boats
of all Draughts for proceeding to Albany. That the Interview with
Arnold was absolutely necessary to assure whether he had really
been corresponding with Arnold.—Arnold was desirous to favor the
Capture but he had insisted upon his being an Agent in it & he
was to have paid a great Price for the Acquisition. He regarded
this Disappointment as the Loss [of] his Hope of an instantaneous
Termination of the War—said he should have bad both Washington &
Rockambyne Prisoners for they were both there now.

"He should have seized the Fords with 3000 & had 5000 more
ready, for he thought the Militia sufficient to take Care of this Place.
I guess there was Design in this Enumeration

"He said he had revealed his Secret only to Sir G. Rodney of
whom he spoke favorably and of the Force he brought with him—
immune Doubts of the Arrival of the other Division of the
Fleet, but said he would stay with the 20 Ships of the Line now
here for some time—He boasted of his masking the Enterprize up
the River by giving out a Design on the Chesapeak—that he
should go there yet—Washington had not send a Man to the South-
ward since Gates's affair—He could not. . . . He thought Vir-
ginia a weak Country from its being cut to Peices by steep Waters &
the Number of the Slaves. He did not care whether Washington
could not go to the Chesapeak or not

"I said little for he spoke much—Except what related to Andre
I inlarged upon the Idea he now had of the Importance of the
Hudson & the Acquisition of it as the End of the War—I lamented
his late Disappointment at Rhode Island wondering who could be
Arbuthnot's Advisors—but I encouraged him to hope that Virginia
recovered all would be over—He spoke with Confidence of his re-
ducing that Country immediately now he was so well supported
by Sea—Rodney he said cared nothing for Money—Valued no
Prizes.

"I almost suspect that he still has Designs upon the Hudson
There are other Generals like minded with Arnold—On my assent-
ing to it as probable he questioned me as to the Person—I men-
tioned Bob Hope—He would not countenance nor gainay my
Suspicions but asserted that he knew of others. . . .—Wm. Smith's
Diary (M.S.), VI. See also Jour. of Gen. 100.

The orderly-book kept during Maj.-Gen. Greene's campaign in
the "Southern Department" contains the following entry of this
date: "Treason of the blackest dye was yesterday discovered. Genl
Arnold who commit² at West Point lost to every centiment of hon-
or of private and publick was about to give up that important
Post in to the hands of the Enemy. Such an event must have given
the American cause a deadly wound if not a fatal Stab, happily
Treason has been timely Discovred to prevent fatal Misfortune.

"Grate honour is due the Continental Army that this is the first
instance of the kind where many were to be expected from the
nature of the dispute. . . . Arnold has made his escape to the
Enemy. Maj. Andrews [André] the Adj'l Gen of the British Army
who was in the harbour and by the line of battle ships at Staten-
Island has no doubt taken the proper Measures to outrival so HeUish a plot. . . ."—From printed catalogue of sale
1780

André presented a written confession of his conduct in detail during his expedition from New York. The board reported to Gen. Sept. 15 that André "ought to be considered as a Spy from the enemy," 1780. He was tried for treason and on the 29th of the same month he was executed in New York.

Washington on the 29th of Sept., 1780, in his letter to General Washington, expressed the belief that André "ought to be considered as a Spy from the enemy," and ordered the execution to take place on the 1st of Oct. 1780. "Sargent, Life of André, 340-56. See also the now scarce report of the hearing, entitled: "Proceedings of a Board of General Officers, held by order of His Excellency General Washington, Commander in Chief of the Army of the United States of America. Respecting Major John André. Adjutant General of the British Army, September 29, 1780." (Philadelphia Printed—New York Reprinted By James Rivington [1780].) From copies in N. Y. P. L. (Evans, No. 17044). These proceedings and a number of letters to and from Washington on André's case are printed in N. Y. T. Merc, N 6, 1780.

Major André writes from Tappan, with Washington's permission, a farewell letter to Sir Henry Clinton, who is at New York, stating that his going within the enemy's post, and also his changing his dress, were contrary to his own instructions and contrary to Sir Henry's orders; also that the circuitous route which he took was imposed upon him without alternative.—Conn. Gaz. (New London), N 14, 1780.

Smith writes that he is requested "to attend at Head Quarters," where he finds "a number of General Officers & others assembled, who were interested in them the subject to which my Correspondence & cause the Letters upon this Subject to be read viz: that from Arnold to himself. Another from himself to Washington inclosing Arnold's of 16 Ins—Washington's of 30th that Day with one from André taking Leave. At the reading of which last he was very much affected."

"A good many Questions were asked, & some by Franklin and Kempe which as supposing Doubts whether André ought not to be considered as a Spy distressed him more and he called out to me for my opinion—I declared it & opened the Reasons, and the whole Company concurred except Franklin & Kempe who seemed to change their Votes."

"After various Suggestions respecting a Letter to be sent in Ans to Washington's Sir Henry retir'd & after some Time came in with the Draft which his Secretary Capt. And made the Subject of this Letter to be read viz: that from Arnold to himself. Another from himself to Washington inclosing Arnold's of 16 Ins—Washington's of 30th that Day with one from André taking Leave. At the reading of which last he was very much affected."

"It was in general approved except as to a Compl on Washington's Humanity—General Robertson made a Proposition for a shorter & more peremptory Letter & with the General's Leave went out to frame it & it was approved. It intimated that Washington & his Board of General Officers were misinformed that L: General Robertson was sent with two other Gentlemen to state the Facts as they truly were; and to declare the General's Sentiments and Resolutions."

"He had said that he wished them to consult the French and Hessian Generals that he expected André tho' no Spy in Return for his exchanging one Robinson Commander of one of their Fregiess who were certain to return."

"That he had many others in his Power and would avenge this Draft being approved Ch: Justice Smyth whispered to me that I ought to accompany General Robertson who was to go out in the Morning to Dobbs's Ferry & the Letter this Night by Washington's Flag from Poulous Hook by Land.

"Soon after General Robertson wished me to be one of the Person's who was to assist him & upon my approaching the General he asked it. I replied that I had no other objection that the Question and Business was important it seemed fit to employ Persons of the highest Rank in it—He replied that he could nominate none of more and exceptional Character—I thanked him & declared my Readiness to obey his Commands."

"The Secret was not gone to copy the Letter & we had orders to direct a PS that the two Assistants were ME Elliot & myself-The Company broke up & we agreed to breakfast with the Gen & go off in the Greyhound in the morning by 7 or 8 O'Clock."—WM. Smith's Diary (MS.), VI, under date of O 3.

Gen. Sir Henry Clinton writes from New York to Gen. Washington that he is sending the governor, Lieut.-Gen. Robertson, also Lieut.-Gov. Andrew Elliot, and Chief-Justic WM. Smith, to Dobbs's Ferry to present additional facts regarding Major André's business with Arnold, in order to aver if possible André's execution.—Sargent, Life of André, 372. A stay of execution is ordered until Oct. 2, possibly in the hope that Clinton may yield up Benedict Arnold.—Phil. 375. See also Hist. of the Am. War, by Charles Stedman (1794), I: 251. The copy of the last-named work in the N. Y. P. L. contains the following memorandum in the handwriting of Sir Henry Clinton: "Ignorance of Whole transaction—too tender a subject to explain upon now. C."

The current rumour in town that an attack had been intended to go against West Point is now known with certainty; also it is believed to have been given up.—Jour. of Hugh Gaine, II: 100-1.

The Candid Retrospect is first published in Charleston, S. C., Smith thinks it must have a good Effect upon Sober but deluded Minds"—WM. Smith's Diary (MS.), VI, under N 17, 1780. Jottings in the diary under earlier dates (see J 6 and J 20) have revealed William Smith as the author of this pamphlet (see J 30, 1781, at which time it was republished in New York). The search for a copy of this original South Carolina edition has been vain.

It is reported in New York "that Mayor André and Mr. [Joshua Heti] Smith are both to be executed. In Consequence of which general Robertson, Mr. Elliott, Hon. WM. Smith etc. are gone up the River to see what can be done with Washington."—Jour. of Hugh Gaine, II: 102.

The headquarters orderly-book, for the campaign in the "Southern Department" under Maj.-Gen. Greene, contains the following entry of this date: "Supposing the Case of Major André to have been reported & stated in the Case of Major Andrews [Andre] have reported 1st That he came on shore from the Volte Ship of War in the night 24th Sept last on the inter view with Genl Arnold in a private and secreet manner. 2d that he changed his dress with in our Lines, and under a false name and in a disguise 3d habit past our Works at Stoney and Verplanks Point the Evening of the 24th Sept last and was taken up the morning of the 25th last and that on examining the Judge of the Office for the Commander in Chief Directs the Execution of the above Centance in usual Way this afternoon at five o'clock precisely."—From printed catalogue of Henkels, Phila., for July 1, 1920, at which time the original orderly-book was sold at auction. A similar entry appears in the orderly-book sold by Henkels on July 17, 1918. See his catalogue No. 1217, item No. 1.

"Arnold had prepared a Letter to Washington," says Smith, "taking all Blame upon himself respecting André—and threatneing Retaliation if the Rights of the Flag were violated, which we were to withhold or deliver as we saw fit. [See Sargent's Life of André, 383.]

"At 3 P M we moored off Corbet's Point and the General sent Murray his Aid de Camp on Shore to know whether there was any Messenger from Washington whose Army was 4 Miles behind at Tappan."

"The officer informed him that Washington's Messenger had not returned above 2 Hours from Poulous Hook, but that General Green was coming & wished to receive General Robertson alone so that only he and his Aid de Camp went on Shore."

"A long Conference ensued apart while Murray walked elsewhere with Hamilton Washington [sic] Aid de Camp & two other Rebel officers."

"Greene said Mr. Washington considered the Right of Enquiry & Decision as theirs & that he only met Genl Robertson as a Gentleman—General Robertson supposed they wished to know the Truth & that it was immaterial if carried to Washington in what Light it was considered."

"General Robertson let off every Thing in Design and tendered Col Robertson & the Officers of the Vulture to prove Andrez coming under the Cover of Arndor's Flag—He showed Greene also Arnold's Letter to Washington."

"Greene produced a Letter from André to Washington in which he admits his own Disguises in the Transaction with Arnold & confesses he had no Flag."

"General Robertson observed properly that André[r] wrong Idea of his Securities Jure Belli were of no avail—Greene said Arnold was a Rascal & André a Man of Honor whom he believed & They would consent to no Conferences on additional Evidence.

"Greene hinted that André might be safe if Arnold was given
To The Hon. The Mayor, Recorder, Aldermen & Commonalty of the City of New York.

Gentlemen,

Receive your Address, and the Freedom of the City, with which you have been pleased to present me in a golden box and theerbility and gratitude which, not differing in any respect from that of others, have a claim to. The flattering expression of both stamps value on the act, and call for proper language than I am master of to convey my sense of the obligation or adequate terms.

To have had the good fortune amidst the exigencies of public and arduous contest, "never to have known a moment when I did not love the confidence and esteem of my Country." And that my conduct should have met the approbation and attained the celestial reward of the State of New York, where difficulties more numerous than in Washington, may be ascribed more to the sense of duty and honor which had dispelled the minds of the people, harrassed and sides to make allowances for the embarrassment of my situation, while with the indulgence of patience they sustained the legs of their capital and a valuable part of their territory — and to

FIRST PAGE OF WASHINGTON'S REPLY TO THE COMMON COUNCIL'S GIFT OF THE FREEDOM OF THE CITY. SEE MAY 2, 1785 (P. 1201).
Liberal sentiments, and great exer-
tica of her virtuous Citizens, more
be any merit of mine. —
The reflection of these things
now, after the many hours of anxiety
licitude which all of us have had
is as pleasing as our embarrassmen
at the moment we encountered the
here disquiet and must content
us for past troubles and perplexities.
I pray that Heaven may be
for its choicest blessings on your
ity — That the devastation of war,
in which you found it, may soon be
without a trace — That a well-represen
ted & respected Commerce may en
when your Citizens. — And that,
your State (at present the seat of
the empire) may set such examples
of Wisdom & liberality, as that have
a tendency to strengthen it and perpe-
tuate to the Union at home — and cre
dit & respectability to it abroad. —
The accomplishment of which is a
requisite wish, of the primary ob
ject of all my desires.

[Signature] Washington
1780  
8 Oct.  

1 & talked of satisfying the Army—Robertson answered with a Look.—They parted with Greenes Promise to inform Washington of what had passed. — Wm. Smith’s Diary (MS.), VI, under date of O 3.

2 A letter comes from Greene,” writes Smith, “intimating that as far as his Memory had served he had given a Report of what was said—Genl Robertson on that recorded to Washington the Substance of what he had said to Greene.

That he had offered Col Robinson & the Officers of the Vulture to prove Andre came with Arnolds Flag & conducted as he had directed. That he was no Spy—That Rochambeau & General Knyphausen would not say he was[ ], who he wished to be consulted—That Sir H Clinton had exchanged one Robinson a true Spy about Washington & he would give any Person for Andre. That he had Spies whom he had forborne to execute, from a Desire to Spare the Horrors of War. And this Letter inclosed Arnolds to Washington avowing that what Andre had done was all by his order & approbation—That he would retaliate if he suffered—That Sir H had 50 Spies who would also die if Andre was executed and he called Heaven & Earth to Witness that the Injustice would lay at Washington Door.

“It was twelve o’clock when Murray had delivered this Letter on Shore and as soon as he returned we weighed Anchor & came away. We arrived here in the Evening.” — Wm. Smith’s Diary (MS. VI).

Major Andre is executed by hanging near Tappan, on the Washington’s orders. Houdry, although he had requested that he might not die “as a gibbon.” — Sargent, Life of Andre, 390—96; Robertson’s Jour. (MS.). The schooner “Greyhound” (which “brought General Robertson’s last letter to General Washington, dated on board the schooner on the 2nd of October”) returned to New York with the account of Andre’s death. — An Authentic Narrative of the Causes which Led to the Death of Major Andre, by Joshua Hett Smith (1808), 185.

“His unhappy fate was much regretted; though his life was justly forfeited by the law of nations. He died like a brave soldier.” — Conn. Gaz. (New London), O 10, 1780. An officer who was present at the execution said of Andre that “so much was he esteemed, that Gen. Washington shed tears when the rigorous sentence was put in execution.” — Anbury, Travels through the Interior Parts of America, II: 477. See also “Proceedings of a Board of General Officers, Held by order of his Excellency Gen. Washington, . . . respecting Major John Andre,” September 29, 1780, in N. Y. Merc., N 6, 1780; and The Case of Major John Andre, Adjutant General to the British Army, who was put to death by the Rebels, October 2, 1780 (N. Y., Rivington, 1780). In a long letter to John Laurens, Alexander Hamilton gave an account of the trial, and the capture and execution of Andre, containing his views of the attendant motives.—The Fate of Andre — A Letter from Alexander Hamilton to John Laurens (N. Y., 1916). For a list of books and pamphlets by Andre, or which relate to him, see Bibliotheca Americana (the Cat. of the Jobo Carter Brown Library, Providence), Part III, Vol. II, pp. 158-59 (following item No. 2616).

It is very sickly on the Island and in New Yk.” From letter of Lieut. Caleb Brewster to Col. John Lamb, in Lamb Papers, at N. Y. H. S.

Whitehead Hicks, one of the judges of the supreme court, and former mayor of this city, dies at Flushing Bay, L. I.—N. Y. Merc., O 9, 1780.

4 Maj. Benjamin Tallmadge writes from Haverstrav: “I am thus far on my Return from H’d Gt’r where I have finished my last Duty to poor Andre . . . I have begged this scrap of paper of Genl Wayne (whose Brigade is at this place) to inform you that Major Andre was hanged on the 2nd ins 12 O’clock. His Conduct was perfectly unblamed. He was instantly restored to their Ancient Condition with Respect to their Charters Rights and Privileges Civil & Religious free from British Taxation And to invite to Negotiations for General Regulation It will increase the Number of the Advocates for the Reunion.

But the surest Way is to vest Commissioners with decisive Powers on such Settlement as Great Britain may be willing to establish—There will always be jealousies here while a Power is
reserved to G B to approve or disapprove what the Commissioners have done.

5 "With Power in a Set of Commissioners to bind the Nation as firmly as she could bind herself by further Acts of Parliament I think a Pacification would immediately take Place. I say nothing as to Proceeding but that the Army is ill-fed.—This is not to be ascribed entirely to a Scarcity of Food but to the Weakness of the Usurpation in every Colony—Without Money or Credit Supplies must be collected[ed] by Force & Terror Where the Army is it takes without opposition but this Force acts ag' its self by creating internal Enemies."—Wm. Smith MSS., folio 194. For the assistance given Arnold by Wm. Smith in the preparation of this "Intelligence," see O 4.

6 "News by Mr White that Andre was executed last Monday—Reported that his Servant Pater is come in. He is vastly disappointed & retires on the Charter's coming for him from General Robertsense."—Wm. Smith's Diary (MS.), VI.

Henry Laurens, former president of congress, having been taken prisoner and carried to England, is examined before Lord Germain, the Earl of Hillsborough, and Lord Vicecount Stormont, and committed to the Tower on a charge of high treason.—Lloyd's Ev'nt Post (London), O 6—9, 1780.

The report of the execution of Andre is confirmed; it took place "in Presence of the Rebel Army."—Jour. of Hugh Gaine, II: 101.

7 An act passed by the state legislature "to procure a Sum in Specie, for the Purpose of redeeming from Captivity, or emitting on the Credit of this State, pursuant to the Act of Congress of the 18th Day of March, 1780, for discharging the Interest of such Bills, and for other Purposes therein mentioned." The money is to be raised by the sale or mortgage of forfeited lands.—Laws of N. Y., 4th sess., chap. 11 (printed by Holt, 1782). This was amended on March 31, 1781.—Ibid., 44th session, chap. 37.

There are "Great Lamentations for the Loss of Major Andre."—Jour. of Hugh Gaine, II: 101. It "caused much excitement among the English."—V. Kraft's Jour., 120.

Benedict Arnold issues a printed statement, addressed "To the Inhabitants of America," regarding the motives, which induced him to join the king's arms.—Royal Gaz., 0 11, 1780. It is also printed as a broadside by Kivington.—See one of these in N. Y. P. L. (Emmet Coli., 1446). For biographical notices regarding Arnold, see Sabine, Loyalists of the Am. Rev., I: 180—83. See further, O 9.

Clinton makes formal announcement to the British army of the death of Andre, his adjutant. He refers to him as a gentleman "of the highest integrity and honor, and incapable of any base action or unworthy conduct."—Sargent, Life of Andre, 404.

9 "Wishes in his Way!—The King's Justiciary Address [see O 7] comes out!—It does not please the Refugees, who think their own Merits slighted. He is announced to Day a British Brigadier, & receives Congratulations at the Parade."—Smith's Diary (MS.), VI. Arnold had sought assistance from William Smith in the preparation of this address (see O 4). It was entitled: "To the Inhabitants of America." Arnold discusses the motives which have induced him to join the king's forces. He says: "When I quitted domestic happiness for the perils of the field, I conceived the rights of my country in danger, and that duty and honour called me to her defence. A redress of grievances was my only object and aim; however, I acquiesced in a step which I thought precipitate; the declaration of independence: To justify this measure many plausible reasons were urged, which could no longer exist when Great-Britain, with the open arms of a parent, offered to embrace us as children and grant the wished for redress. . . ."

"I anticipate your question, Was not the war a defensive one until the French joined in the combination? I answer, that I thought so. You will add. Was it not afterwards necessary till the separation of the British empire was complete? By no means; in contending for the welfare of my country, I am free to declare my opinion, for which I am prepared, all strength should be drawn upon."

10 "I lamented therefore the impolicy, tyranny and injustice, which, with a sovereign contempt of the people of America, studiously neglected to take their collective sentiments of the British proposals of peace and to negotiate, under a suspension of arms, for an adjustment of differences. . . . I had my suspicions of some improper conduct on our councils, on proposals prior to the Parliamantary Commission of 1778 . . . But the whole world saw, and all America confessed, that the overtures of the second Commission exceeded our wishes and expectations, and if there was any suspicion of the national liberality, it arose from its excess."

11 "Do any believe we were at that time really entangled by an alliance with France?—unfortunate deception! . . . no authority had ever been given by the people to conclude it, nor to this very hour have they authorized its ratification. The articles of confederation remain still unsigned."

12 "In the firm persuasion therefore, that the private judgement of any individual citizen of this country is as free from all conventional restraints, since as before the insidious offers of France, I preferred those from Great-Britain; thinking it infinitely wiser and safer to cast my confidence upon her justice and generosity, than to trust a monarchy too feeble to establish your independence. . . ."

"I affect no disguise, and therefore frankly declare that in these principles, I had determined to retain my arms and command for an opportunity to surrender them to Great-Britain; and in conceming the measures for a purpose, in my opinion, as grateful as it would have been beneficial to my country, I was only solicitous to accomplish an event of decisive importance, and to prevent as much as possible, in the execution of it, the effusion of blood."

13 "With the highest satisfaction I bear testimony to my old fellow soldiers and citizens, that I find solid ground to rely upon the clemency of our sovereign, and abundant conviction that it is the generous intention of Great-Britain, not only to leave the rights and privileges of the people, the sixth part of their property, exempt from taxation, but to supercede such further benefits as may consist with the common prosperity of the empire. In short, I fought for much less than the parent country is as willing to grant to her colonies as they can be to receive or enjoy. . . ." Arnold's address was printed by the Penn. Packet in its issue of Oct. 17. One week later some one who subscribes himself "A Soldier" calls for a call for a "Committee of Safety to form a Committee of Safety to form a Committee of Safety"—Penn. Packet, O 24, 1780.

14 At the request of George Stanton and John Somerendyke, a survey is made of Somerendyke's property at Little Bloomington, containing 110 acres. The original survey or map is in the Bancker Collection, New York, N. Y. (box A-B, folder "Bloomington"). See also 1747; Ag 16, 1790.

The fleet said to be for the Chesapeake has been imbarred to 14 Days & more. No one can tell what they are detained for. The 3 months men leave Washington this Day. His army is gone from Tappan—to some to King's Ferry some back to Paramus.—Wm. Smith's Diary (MS.), VI. The fleet with Gen. Leslie and his troops finally sailed on Oct. 16.—Ibid.

15 It is reported "on the other side of the Lines," says Smith, that General Knox has privately withdrawn himself from the Rebel Army & that Steering Howe and Parsons are suspected and confined.—Wm. Smith's Diary (MS.), VI.

16 "Mr White told me on Thursday last [O 12] that a good deal of Money is gone beyond the Lines within a few Days. Perhaps the General is determined to with this the last Night from Mr Shoenaker that two men have been out and in to and from Philadelphia within a few Days. They brought the News of Deane's Elopement from France to Holland & England."—Wm. Smith's Diary (MS.), VI.

17 "Most opportunely," writes Smith, "the English Fleet arrives at the Hook. . . the Commissary had Provisions but for 7 Days more without a man should have ceased to exist. . . ." He has bought 900 Barrels of meat from the merchants. . . . It is said there are several Thousand Troops in the Fleet just arrived. The Public censure the General much for not visiting Jersey at least for Forage, which he much wants. A little activity too at this Juncrute would increase the Confusions & Desertions of the Rebel army—They are at or near Passack Falls and having lost their 3 months men the 14 Ins would be probably disgraced by Flight. Certainly Sir Henry is an Idler. He does nothing to favor the in-
with a reminder that the parent country offers "the immediate restoration of our ancient privileges, civil and sacred, and a perpetual exemption from all taxes, as such as we shall think fit to impose on ourselves."—*Royal Gaz.*, O 25, 1780. The address is reproduced in Avery’s *Hist. of the U. S.*, VI: 254. The diary (MS.) of Chief-Justice Smith reveals the fact, hitherto unpublished, that the chief-justice wrote this letter for Arnold. Under Oct. 14, we find:

"I sent General Arnold yesterday D° of his Address to the Officers & Soldiers of the Cont'l Army, inviting them to engage in a New Corps of Cavalry and Infantry."—*Smith’s Diary*, VI. Gov. Heath declared the proclamation was without effect,—*Memoirs of Maj.-Gen. Heath* (1780), 284. See also Van Tyne, *The Loyalists* (1902), 188.

Smith writes that he hears that "the Bill moved for 24 May last by Govt Pownall to enable the King to conclude a Peace or Truce with the Congress or any Assembly was drawn up in Chesnut Street in Philadelphia & sent over to Pownall by John Adams who if it pass'd was authorized to go to England."

"See the Morning Chronicle or London Advertiser of 23 & 26 May 1780 for the Bill & Speeches."

"Dempster succeeded Pownall & lamented that no Person could enter the Island to propose Peace without being liable to be seized as a Criminal"...Pownall himself asserted the People of America were inclined to Peace and would meet any serious & practicable Proposition & that he believed it would first Spring from Massachusetts."—*Smith’s Diary (MS.) VI.*

Gov. Robertson issues a proclamation "forbidding" all persons whatever from carrying out by land, or on board any ship, vessel, or small craft, or being concerned in shipping or receiving on board any ship, vessel, or small craft, any stores, provisions, goods, wares, or merchandise whatever, without having first obtained a permission for that purpose from the superintendent of exports and imports. Violation of the order will result in the forfeiture of "all such stores, provisions, goods, wares and merchandise so shipped or conveyed."—*Royal Gaz.*, O 28, 1780. This regulation is intended to reinforce the one reissued by Clinton on this day, which first appeared on July 17, 1777 (c.f.). See also Jl 21, 1779.

A news item, published in London on this day, states: "Fugitive repairs so fast to the royal standard at New-York, that it was thought the new corps, raising by Major Odell, would soon be complete. One Gentleman marched into the city at the head of fifty, with files and drums, and was immediately appointed to the command of them. Others were daily coming in when the accounts came away. The unredressed complaints of the Farmers operate powerfully on the minds of others, who, in some respect or other, feel the merciless rod of oppression."—*Lloyd’s Ev. Pat*, O 21-25, 1780.

The anniversary of "his Majesty’s Accession to the Throne" is observed. A royal salute is fired "from Admiral Rodney’s fleet and the shipping in the North and East rivers."—*N. T. Merc.*, O 30, 1780.

Smith writes: "In a Philad. Paper of 24 Ins° there is a Proclamation of the Congress of 18 Ins° for a general Thanksgiving 7 Dec° for Deliverance from Arnold’s Plot &c and for continuing the Enjoyment of the Gospel of Peace. How opportunite Arnold’s Procl° of 20 Ins° asserting that the Congress assisted a Mass in praying for the Soul of Doe Juan from Purgatory "The Rebel Papers applaud Andre &erville Arnold & St Henry Clissons. The People however desire the Sides of the Lines blame Washington for executing Andre This I hear has brought out a Pamphlet called his Trial to correct the ill Temper occasioned by his Death."—*Wm. Smith’s Diary (MS.) VI.*

Nicholas Jones advertises his farm for sale. It is "at Bloomingdale, about 200 acres more or less, seven miles from the city."—*N. Y. Merc.*, O 20, 1780.

The address to the congress with a preamble of the "most affectionate welcome and attention to all who are disposed to join with me in the measures necessary to close the scene of our afflictions," and

**CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783**

---

Here follows a list of key events and figures from the Revolutionary Period:

- **1776**:
  - **July 4**: Independence Day celebrated.
  - **August 27**: The Siege of Yorktown begins.

- **1777**:
  - **October**: The Battle of Saratoga.

- **1778**:
  - **February**: The Treaty of Alliance with France.

- **1783**:
  - **September 3**: The Treaty of Paris is signed, ending the Revolutionary War.

**Further Reading**

- *The Papers of George Washington* provides a wealth of primary sources.
- *The American Revolution* by *David Ramsay* offers a detailed history.
- *The Declaration of Independence* provides a primary source.

**Notes:**

- The text includes references to key figures and events, providing context and deeper understanding.
- The timeline is a testament to the complexity and duration of the Revolutionary War.
- Further research would enhance the understanding of this period in American history.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1780 counted and provided for. Those disobeying are to be "turned out of the lines."—N. T. Merc., O 30, 1780.

Valentine Nutter, see F. 5, 1792, at "No. 924, opposite the New House" (the Merchants' Coffee House—see L. M. R. E., III: 979), advertises maps for sale, specifying large maps of Virginia, Maryland, New England, etc.—N. T. Merc., O 30, 1780. On Sept. 30, 1782, he advertised that he had for sale "at his book and stationary store, No. 22, opposite the Coffee House," two volumes of charts, of which he gives the contents, one being a chart of the Charlotte, N. C., to S. 15, 1782.

There is offered, to be let "on a Building Lease," a lot on the north side of Stone Street, "upon which, before the Fire 1776, there was a large Brewery with all its appurtenances."—N. T. Merc., O 30, 1780.

This day was appointed "to be observed in the State of New York, as a Day of public Thanksgiving to Almighty God, for his recent Deliverances, in the Discovery of the horrid Conspiracy for the delivering up the Fortress at West-Point."—Conn. Gaz. (New London), O 17, 1780.

Rivington prints a "Gazette Extraordinary," which contains "Copies of Original Letters . . . intercepted in the Rebel Mail, taken some days ago by a party of his Majesty's Loyal Subjects." One of these letters, dated Philadelphia, Oct. 6, is from Pres. Huntington to the Governor of Rhode Island, relating to the orders that were demanded, or not, in that state. The resolutions passed in congress on Sept. 25, regarding the army, and declares that it is very important that the states comply with them and fill their quotas as soon as possible. These resolutions fix the number of regiments in the army, the number of companies in each regiment, and the number of officers in each company. They determine the quota of each state and call upon the states to have their troops embarked by Jan. 1. The spirit of these resolutions is to be filled by enlistments "for and during the war," but if the quota of any state cannot be completed with such recruits by Dec. 1, the deficiency is to be supplied by "men engaged to serve for not less than one year." A bounty of $50 is to be granted to each recruit, and recruiting officers are to receive $2 for each enlistment.—Royal Gaz., N 2, 1780.

Commenting on this, Smith writes: "This arrangment greatly reduces the number of Battalions & so offends the last of Officers [i.e., those recently appointed]. It is now source of Discord, unless all the Officers are desirous to leave the Army & will make interest for it. It will be impossible to procure the Volunteers who are to form an Army of 33 Thousand upwards—Vid. the Letters published."—Wm. Smith's Diary, VI.

A letter in the Daily Gazette of the 1st New York, on the 29th in London that "Gen. Arnold is a very unpopular character in the British army, nor can all the patronage he meets with from the Commander in Chief, procure him respectability. General Clinton, from obvious and just motives of policy, gives this signal convert great encouragement, though not, perhaps, an admirer of his principles more than others; but the Volunteers Officers here have a character much on the other side. The papers here give him as a man to serve under his command, and the detachment he is to lead was, on this account, offered from the Loyal American corps."—Lloyd's Even. Post (London), D 11-13, 1780. Cf. N 15.

Congress votes a silver medal and an annuity of $200 to each of the three captors of Major Andre.—Jour. Conti. Cong. (ed. by Gallaud Hunt), XVIII: 1009.

Maj. Metzner issues regulations for the barrack office, respecting the issuing and receiving of billets for quarters, regimental store-houses, and stables.—Royal Gaz., N 5, 1780; Man. Com. Coun. (1853), 796-7. A source of continual friction was the issuing of orders billeting British officers upon the citizens. "The haughty boarders expected the same subsistence in their hosts that they would have found in England, but their colonists had ideas of their own as to their obligations, and the two standards of hospitality clashed. The officer would clap his host into the mainguard, and then the prisoner and his friends would enter an indignant protest with the commander-in-chief. Although the officers were reprimanded, yet the citizen had no legal redress, and, as a result, began to look for civil rather than military government."—Van Tyne, The Times, 269, citing Rivington's Gaz., N 11, 1780; N 23, 1779.

Brig.-Gen. Birch, the commandant of the city, issues a proclamation offering a reward of 50 guineas for information leading to the arrest of the person or persons who placed combustibles in front of the magazines in New York, or who shall hereafter attempt to do so. Citizens are asked to secure all suspicious persons. Persons who cannot produce the requisite certificate for their being in the service will be hung.—N. T. Merc., N 6, 1780; Man. Com. Coun. (1853), 705.

"The captive Rebels in New York had now been all exchanged for Hessian prisoners of Knipphaussen and Lossberg's and other regiments, also English soldiers who were hourly expected in New York."—For Kraelig's Jour., 124. The last arrived on Dec. 11.—Ibid., 126.

Smith writes: "[It is] A Happy Day if as asserted the Cork Fleet is back—These have been to Charles Town—came from there with other Ships to the Number of 68 Days ago—it is true.

"Sir George Rodney falls down with the Sandwich & other Ships of the Line this Afternoon about Sunset."—Wm. Smith's Diary (M.S.), VI.

A New York writer says: "Preparations are making here for a large embarkation, (to reinforce Lord Cornwallis, who cannot proceed till he is reinforced,) to consist of all the Grenadiers and Light Infantry of the Army, the Highlanders, Guards, and Hessians, to the amount of 4000 or 6000 men. They have been detained only for want of provisions; but upon the 10th [g.v.] a large fleet of victuals arrived, and nothing remains but to put a proper quantity on board the ships. The last of the authors and artists have been landed. A London news item reads: "Major-General Benedict Arnold, who has quitted the American cause, and joined Sir Henry Clinton, is a brave, gallant, and experienced Officer. . . . The loss of such an experienced Officer must be severely felt by the Americans, and his known proclivity will make that cause appear very bad, which he could no longer support with honour."—Lloyd's Even. Post (London), N 15-17, 1780.

Washington approves the report of a court of inquiry which was held on Nov. 2 at West Point to examine into Liet.-Col. Richard Varick's conduct in his connection with Benedict Arnold during the latter's command at West Point, and which unanimously gave the opinion that Varick's conduct "does him great honor as an officer, and particularly distinguishes him as a friend to his country."—The Varick court of inquiry to investigate the implication of Colonel Varick (Arnold's private secretary) in the Arnold treason (ed. by A. B. Hart, and issued to members of the Bibliophile Soc., Boston, 1907), 165.

"Yesterday I wrote to Rivington & inclosed him one of the Pamplets De Rosset has published at Charles Town [see S 30]. I recommended to Rivington the Reproduction of 10 Thousand Copies at the Charter Price of this Paper, which was to be a Subscription to be given in to the next Week, and advised that the Appendix he taken in as Notes—to prevent Disconnection in the Perusal. To take off his Suspicion I hinted that the overtures by Lord Drummond was not fully displayed but that the Publication would draw further Information—he promised me an answer upon the Subject."—Wm. Smith's Diary (M.S.), VI.

There is a second embarkation taking place from New York on the 17th. Washington says there are uncounted numbers of troops in N. Y. There has none of the Cork Fleet arrived yet."—From letter of Lieut. Caleb Brewer to Col. John Lamb, in the Lamb Papers (M.S.), at N. Y. H. S.

"A very numerous and respectable body of the merchant, traders and other inhabitants" of Philadelphia seek by a set of resolutions "to avoid the difficulties and distresses. of the daily increasing from the fluctuating state and rapid depreciation of the continental money." They fix the value of this money, "compared with specie, . . . at seventy-five for one." All contracts in future are to be made "in specie value, but payable nevertheless in continental money at the option of the debtor, at the exchange now established." Any one refusing "to receive the said paper money at the exchange settled," or demanding "a higher exchange," is to be "exposed to the public as an enemy to the independence of America, and to the peace and good order of the city." Likewise any one who shall "give or offer more than seventy-five continental dollars for one in specie" shall be considered a "disaffected and dangerous person." A committee of 15 is chosen "to draw up this Association in form, and get the same printed" to be presented for subscription "to every household, trader and tradesman."—Penn. Gaz., N 21, 1780. Commenting on these resolutions, Smith says they "Oblige all men to reconcile Continental Money at 75 for 1 by leaving the Debtor at Liberty tho' he contracts in Gold to pay in Paper at that Rate. Thus the established Laws are set aside. What
Evidence of a Malady incurable! Nothing can supply the Want of Money in a State of War but that which all the World agrees to be the most effectual. The Common Court of Exchange at Philadelphia is 130 & 135 for one at the Moment of these Absurd Regulations. Wm. Smith's Diary (MS.), VI.

"Rivington writes wishing me to speak to the Com'' in Chief about the Expense of republishing the Candid Retrospect [see go] for he is often with the violent Refuges & particularly Govr. Franklin who murmurs about the Delays of the Genl respecting the Board of Directors I am suspicious whether he is not prompted to find me if possible a Confiadant of Sir Henry's a character in which I don't desire to be considered." Wm. Smith's Diary (MS.), VI. See N 22.

The price of bread is raised from 14 to 16 Copper per loaf, and money is more scarce & sold as required by specified regulations (like those of Mr. 15 g. v.) & a new inspector, Balthasar Creamer, is named. Royal Gal., N 23, 1780. See also De Voe, Market Book, 167.

The loyalists were found so numerous in New York in 1780 that they were encouraged by the British government to form an association of their own [cf. Ag 25, 1779], independent of the orders of the British commander. It was entitled 'The Honorable Board of Associated Loyalists.' At its head was the son of Dr. Franklin, William, late the Tory governor of New Jersey. Wm. Smith's Diary (MS.), VI. See also Wm. Smith MSS., folio 183.

On Nov. 24, 1780, Smith and Elliot had a conference with Clinton about this. Smith writes of the meeting:

"Mr Elliot & I had an Interview with the Com'' in Chief. I read we both explained & he approved, but a word altered Association for Confederacy at the End. He said it came to his own Idea & be thank'd us much for the Trouble—He chose to appoint both Stewart & Alexander till the King's Pleasure can be known & I drew the Clause at Sec'' Smith's—The General & he both charged with Secrecy as the Restraints upon the Board must administer both to Disguist & Jealousy." Wm. Smith's Diary, VI. A copy of the letter was delivered to Gov. Franklin on Nov. 25. Wm. Smith MSS., folio 183.

The acquisition of General Arnold is regarded at New-York as a very fortunate event, not only on account of the merit of that Gentleman in a military capacity, and the secrets of which he is in possession, but as it is an indication of those contents and murmurings, that have been said to have disturbed, for some time, the American cause. It is a common saying at New-York, that the ship must be near sinking when the rats are leaving it." Lloyd's Eve. Post, N 20-22, 1780.

"Wrote to Gen' Robertson, advising to the Edition of to Thousand Copies of the Candid Retrospect—Rivington says if he prints 5000 he will be obliged to charge / for each & if less more, so that the more he prints the less he can sell them for." Wm. Smith's Diary (MS.), VI. See D 1.

In Philadelphia, a number of persons are apprehended who have been "long suspected of carrying on an illicit and dangerous correspondence with the enemy (by way of Shrewsbury) and depreciating our money." When examined "before the President and Vice-President, invoices of goods brought from New-York, to a great amount, accounts of the sales of gold and silver, rates of gold and silver, the routes and the sea-coasts, the numbers of persons that have been found upon them. It appeared also, that by these means, persons were conveyed privately to New-York." Penn. Gal., N 29, 1780.

The "Hussar," a British frigate of 28 guns, goes down in Hell-gate in "12 Fathom Water." "There must have been Monstrous bad Conduct But so there ever is in all the Departments of Service. I imagine she was to be employed with other ships in cutting out a Ship of 500 Tons with Salt that has shamefully been suffered to go into New London." Wm. Smith's Diary (MS.), VI, under Nov. 24. Another authority states that the "Hussar" struck Pot Rock at Hell Gate, and sank "in a bay called 'The Brothers' in seven fathoms of water."—Mag. of Am. Hist. (1884), XII: 90, citing the Edinburgh Observer and other reports. All on board but 80 persons were lost.—Conn. Gal., D 5, 1780. The frigate carried about $1,300,000 in specie, part of which was recovered by divers in 1856.—N. Y. Times, S 8, 1856; Emmet Coll., item No. 12061.

Brig. Gen. Birch issues a proclamation declaring: "That after the 20th day of December next, no vessel he allowed to lay at, near any wharf of this city, without having previously obtained permits from the Superintendent of the port ...." All owners and masters of vessels (not employed in the service of the government) at instant wintering at New-York, are hereby ordered to remove their vessels to Newtown Creek.

"Any person offending against this Proclamation, will be subject to one month's imprisonment in the Provost, and to the payment of such fine as shall be adjudged by the Police, for the use of the
City Funds."—N. Y. Misc., D 11, 1780. The proclamation was reissued on Dec. 20, 1781.—Ibid., D 24, 1781. See Dawson's report on the city finances during the Revolution, in *Proc. Ed. of Ald.*, LXXXVI: 218.

Dec. 1780

"General Robertson had not sent for the Candid Retrospect 1 from Rivington last Monday—But I beg'd Rivington to send it to him & yesterday he told me it was done. The General censured the Printers Estortion for his Proclamations &c and I expect no Attention from Military Men to such Kind of Measures."—Wm. Smith's Diary (MS.), VI. See D 6.

6 News reaches England from New York that "desertions from the rebel army have been very frequent since Gen. Arnold came in, and sometimes amount to 15 or 20 in a day."—*Lloyd's Eye Post* (London), D 4-6, 1780.

Smith recommends "the Republication of the Candid Retrospect" (see S 30) to Clinton, who authorizes him "to speak to Rivington & intimate that it should be at public Expense." Later in the day, Smith "engaged Rivington to send an Account of the Charge of 5000 Copies of the Retrospect to the General which he is to transmit by his own Proposal with Major De Lancre. After which I sent the Pamphlet with my Comps in a Card to the Commander in Chief."—Wm. Smith's Diary (MS.), VI. See D 7.

7 The executive council of Pennsylvania by proclamation sets aside this day for "public Thanksgiving and Prayer." Among the blessings which "call for their devout and thankful acknowledgments" is mentioned the rescue of "the person of our commander in chief and the army from imminent dangers, at the moment when treason was ripened for execution" (see S 22).—*Penn. Gen.,* D 21, 1780.

Rivington sends to me for "a Copy of the Candid Retrospect saying he has just rec'd Orders from Head Quarters for the Edition of it. This is a Proof of his attention to what I recommended yesterday. I refer him to the Copy in General Robertson's Hands as my Copy and inform him that the Comps in Chief has another." Of this Smith repeated "the Hint to Rivington to take the appendix in as Notes at the References. He ans* 8* that he has adopted it as before Suggested."—Wm. Smith's Diary (MS.), VI, under D 7 and 8.

8 "An Expedition [is] on Foot[,] Supposed for Virginia[,] under the Command of Arnold."—*Jour. of Hugh Gaine,* II: 106. See D 21.

A New Yorker writes: "Ethan Allen, formerly a rebel Colonel, who resided at Bennington, in the upper part of this province, not well used as he thought by the Congress, has marched off with six hundred of the Green-mountain Boys, as they stile themselves, and joined Major Carleton at Ticonderoga; and it is thought other townships will follow their example. Admiral Graves is blocking up Mouseier Ternay; Arbuthnot is at New-york, and Admiral Rodney is gone to the West-Indies. The Captains of the Cruzing ships have all forfey the captaincies they make. Congress money is now at 110 dollars for one Spanish."—*Lloyd's Eye Post* (London), F 19-21, 1781.

Sparks says that the disputes between Vermont and her neighbouring states made the British think that the Vermonters were no longer in sympathy with the American cause. The loyalist, Beverley Robinson, therefore wrote to Ethan Allen on March 30, 1780, asking if he would join the British and accept a separate government. Allen did not answer the letter, but he and his friends pretended to be well disposed toward the British and even made a truce with Canada and kept up a secret correspondence, in order that Vermont might be safe from attack. Robinson wrote again on Feb. 2, 1781, enclosing a copy of his first letter and renewing his proposals. Allen forwarded both letters to congress.—Sparks, *Am. Hist.,* I: 238-45.

9 "I attended the General with Elliot who called for me & he showed a short Letter from the Adm* 1* just rec'd desiring that something might [be] done on the Commission & the Council called if proper. He said it was an Echo of one from him several Days ago to the Adm* 2*. He called Smith to shew it, who brought a Bundle but the Gen* 2* after search said it was not there—Smith was gone. Upon the request that it would be proper to meet him, & with General Robertson to concert an Address to the People before a Meeting of the Council & I thought best if possible without them. Cap* Smith now begs my Draft of an Address, what I gave the Gen* in* July being missing. I promised a Copy in the Morning meaning to make some alterations."—Wm. Smith's Diary (MS.), VI. On Dec. 20, Smith wrote at 10 o'clock: "The Adm* & General Dec. Call at Head Quarters agreeable to Notice given as Cap* Smith had told me an Hour ago when I gave him an altered Draft of a Declaration to the Public—and I suppose they are now upon it. The General said yesterday he would not serve with the Adm by Sea or Land one of us must quit the Service." At noon, he added: "Gen* R* reports what passed this Morning. The Gen* desired him to be present & to be fetched the Adm*—They were shy of each other. . . . The Gen* asked Adm* whether he had seen what I proposed[1] Holding what I had sent this Morning in his Hand—The Ad* said he liked it in the main.—Agreed Gen* R* should prepare some thing—He calls here. I shewed the Draft which he had not before read. He objected to Nothing but the absolute Promise to support America at all Events & wanted some Proof of Penitence—Told him what I had urged to Gen* R* Johnson—He wished a COu* with these amendments—I incorporated them & sent the Copy this Afternoon. How tripping this conduct! I press'd G Roberts to inter- fere & avail himself of the Confidence of the two Chiefs. He promises it."—Ibid.

Smith's draft is entitled "A Declaration to the Inhabitants of the British Colonies on the Contin* of N America of every public Order and Denomination." It reads:

"Great B, having manifested the Sincerity of his Affectionate and conciliatory Intentions, in removing forever your pretended Grounds of Discontent by repealing among other Statutes those relating to the Duty on Tea and the Alterations in the Govt of the Massa: Bay and by exempting not only the Com* 2* but the Insular Colonies from parmi* Taxation it is with much Pleasure we make known to you that your real Fraticome has been restored. Objects the Restoration of your local Legislatures with the Benefits of extensive Commerce the Confin* of your Rights Libraries and Privileges the Removal of Distracts by the Remission of Offences And the Introduction of such other Arrangem* 5 & Regulations . . . as may tend to the Advantage and Stability of the Colonies & Provinces And the lasting Union of each of them with the Parent Country upon the Constitution of the Constitution of the Country . . .

"The Door is thus again thrown open . . . for commencing Negotiations that may instantly terminate the Miseries of your Country . . .

"For the Consolation of the Friends of Peace and the Union whose Sufferings we compassionate in their present temporary Subjections to lawless Misrule we declare it to be the Intention of Great Britain by the Blessing of God to contend for the Interests of the Colonists as inseparably Connected with her own . . .

"And while the Loyal are exalted to persevere in their Fidelity for the Preservation of their Country its Religion and Liberties we avow to all other Classes of every order our anxious Desire for their immediate Acceptance of the Invitation to Reconciliation Peace and that we are ready to grant the Safe Conducts requisite to such Negotiations & the Conferences may prepare the Way for regu- lar Assemblies to place the public Felicity upon solid Foundations . . .

"As yet we preclude No Man in Whatever Light his Character and Conduct may be legally considered from Access to us for the amicable Negotiations . . . except such as are stained with the Blood of their own Countrymen and Follow Citizens by slighting the Admonition contained in the Manifesto of the Royal Com* 2* dated on the 3 Day of Oct* 1778 . . . and excepting also . . . every Person immediately concerned in and consenting to the late violent and unjustifiable Measures against the Life of the Kings Adjutant General . . .

"To all others sincerely wishing the Restoration of the common Tranquility and Harmony and giving substantial Proof of that favorable and loyal Disposition by renouncing and quitting the Rebel Cause Councils and Service within [blank] Days from the Date hereof . . we declare ourselves cheerfully willing to grant the full Benefits of his Majesty's Clemency . . ."—Wm. Smith MSS., folio 194. This declaration was published in the *Mercy* for J 8, 1781.

Brig-Gen. Benedict Arnold, now a member of the British forces, sail for Charleston.—*Jour. of Hugh Gaine,* II: 106. Wm. Smith's Diary (MS.), VII: Robertson's Jour. (MS.). Under date of Jan. 28, 1781, Abigail Adams wrote to her husband (John Adams), then in Paris: "It is reported that Arnold, with a body of troops, is gone to Virginia, where it is hoped he and his Myrmidons will meet their fate. Had Clinton been a generous enemy, or known
human nature, he would, like Aurelian, upon a like occasion, have given up the traitor to the hands of justice, knowing that it was in vain to expect fidelity in a man who had betrayed his own country, which from his defection, may learn to place a higher value upon integrity and virtue than upon a savage ferocity, so often mistaken for courage. He who, as an individual, is cruel, unjust, and immoral, will not be likely to possess the virtues necessary in a general or statesman."—Familiar letters of John & Abigail Adams (1786), 391.

For an account of Arnold's expedition, see D 30.

Smith in his diary characterizes Sir Henry Clinton as follows: "He is very unfit for his Station—Sensible of his weakness he is shy out of Pride—very changeable, because his measures are not concerted with Judgm.—Jealousy is his chief Vice. Tho' active it is only for bodily Exercise. In business he is idle—a Procrastinator—who, short a Trifle—The People about him dread him and worship him out of the Fear of his Humours."—Wm. Smith's Diary (MS), VII.

An advertisement for the return of a lost horse mentions "the pasture of Pell at the Bull's Head in the Bowery."—N. T., Merc., D 25, 1780.

A few years later, Barney and Pell were joint proprietors of the "Plow and Harrow."—See 3a, 1765; L. M. R. K., III, 980.

An advertisement for the return of a negro mentions John Hutchinson's "Inn near the Four Mile Stone, leading to Fort Knoxphasson."—N. T., Merc., D 25, 1780. Hutchinson was both tavern-keeper and horse-breeder.—Ibid., Ap 2, 1781.

On or about this date, Benedict Arnold, under orders from Gen. Clinton, arrived in Virginia (see 21) on a marauding party of 100 men, and looted and pillaged Richmond and Petersburg. Later, he sold public records in Richmond and went on to Petersburg. He sent back to New York an immense amount of plunder from every sort, taken from vessels, public stores, farms, and elsewhere.—Wm. Smith's Diary (MS), VII, under date of Ja 17 and 20, 1781. Cf. Royal Gaz., Ja 17, 27, F 7, 1781; Jones, Hist. of N. T. during the Rev. War, III: 177.

1781

A news item which appeared sometime during this year, probably in a London paper, reads: "An American Correspondent says, that the officers of the army, in New York, concerned in the management of the Theatre there, form a body, like any other company of Comedians, and share the profits arising from their exhibitions. To people on this side of the water, it may seem new for British officers to perform for hire; but in New York necessaries are so extremely dear, that an inferior officer, who has no other resources than his pay, undergoes more difficulties than a common soldier."—Upcott Coll., VII: 231. The British officers started their performances at the John Street Theatre on Jan. 25, 1777 (q.v.), and continued them until shortly before their evacuation of the city (see 7b, 1782).

In 1781 and 1782, the British engineers, on the basis of the works on Laurel Hill, which they had developed and called Fort Clinton, erected a powerful star fort, which they then named Fort George.—20th Ann. Rep., Am. Scien. and Hist. Pres. Soc., 431 et seq. This work, on the modern map, would be between Audubon and Fort George Aves., and 192d and 193d Sts.; it has given its name to the elevation and even the neighborhood, which it may seem from Fort George. See 1776, 1786; L. M. R. K., III: 944; Pl. 185, Vol. III.

In 1781, 1782, 1785, and 1786, surveys were made of James de Lancey's lands, adjoining Mount Pitt on the west, and bounded by Bowery Lane, Division St., etc. The original plans are in the Banciler Coll, in the N. Y. Pub. Library. These were probably made in connection with the Confinement Act of Oct. 22, 1779 (p. 4a).

"This Evening will be exhibited At the sign of the stove-grate, nearly opposite the Coffee-House, and next to theussian guard-house, The Chinese Umbra, On an entire new construction; With a variety of devices, in lively colours, such as ships sailing on the water, a representation of the sun and moon, with a view of Noah's ark," etc.—N. T. Merc., Ja 1, 1781.

About 100 Americans attempt to cross the North River from Jersey to New York, "to surprise and carry away General Clinton."—Wind and tide being unfavourable, the boats cannot land.—Von Krafft's Jour., 123-295. Jour. of Hugh Gaines, II: 107.

A committee of congress, after having considered a letter from Abraham Skinner, American commissary of prisoners, and other papers relating to the treatment of prisoners by the British, reports:

"That notwithstanding every effort of Congress to obtain for our people, prisoners in the hands of the enemy, that treatment which humanity alone should have dictated, the British commanders, unmindful of the tenderness exercised towards their men, prisoners in our hands, and regardless of the practice of civilized nations, have persisted in treating our people, prisoners to the British, with every species of insult, outrage and cruelty. Officers and men are indiscriminately thrown into the hold of prison-ships and into loathsome dungeons, and there deprived of fuel and the common necessaries of life, by which means many of the citizens of these states have been compelled to enter into their service, to avoid those distresses which a conduct so contrary to the law of nations has brought upon them. Our seamen taken upon the American coast, have been sent to Great Britain, and other parts beyond seas, to prevent their being exchanged, or to force them to take arms against their country: that in the opinion of the committee, an exercise of the law of retaliation has become necessary, as a justice due to those citizens of America whom the fortune of war has thrown into the power of the enemy."

Upon hearing this report, congress resolves that the papers be sent to Gen. Washington so that he may inquire into the truth of the statements and give orders for the British prisoners to be treated in the same manner as the Americans are. Congress also recommends that the state executives carry into effect the act of Jan. 13, 1780, respecting prisoners, and directs the board of admiralty to "issue orders not to exchange any British sea officer or seaman, until the enemy shall have treated their seamen in America, such seamen as they have taken upon the American coast, and sent to Great Britain, or other parts beyond seas; [This clause was repealed on Jan. 29.] and that the Board of War and Board of Admiral give orders for continuing the treatment of prisoners as herein directed, until they receive orders to the contrary from Congress or the Commander in Chief."—Jour. of Cong. (ed. by Hunter), XIX: 27-28, 96. Regarding the reception of them by the British, see Mr 5, 1780; Ja 25, 1781; F 12, 1781. See another congressional committee report and resolution under Ag 3.

Von Krafft records: "In the morning we were again mustered by the former English Inspector in front of the quarters of Gen. v. Losberg at the so-called Morris House."—Von Krafft's Jour., 129.

"The enemy at New-York removed the greater part of their shipping from the East River round into the North River."—Memoirs of Maj.-Gen. Heath (1798), 271.

New York is visited by a hurricane of rain, hail, and snow. In the houses in the city are "severely shaken;" vessels are driven ashore.—Penn. Packet, Ja 30, 1781; Jour. of Hugh Gaines, II: 103; Wm. Smith's Diary (MS), VII.

Washington, while at "New-Windsor," writes to "Admiral Arbuthnot, or the Officer commanding the British Fleet at New-York:" "Through a variety of channels, representations of too serious a nature to be disregarded, have come to us, that the American naval prisoners in the harbour of New York, are suffering all the extremities of distress—from a too crowded, and in all respects disagreeable and unwelcome situation on board the prison ships; and from the want of food and other necessaries. The picture given us of their sufferings is truly calamitous and deplorable; if just, it is the obvious interest of both parties, (to omit the plea of humanity) that the causes should, without delay, be enquired into, and removed; if false, it is equally desirable that effectual measures should be taken to obviate misapprehension. This can only be done by permitting an officer of confidence, on both sides, to visit the prisoners in their respective confinement, and examine into their true conditions: This will either at once satisfy you, that by some abuse of trust, in the persons immediately charged with the care of the prisoners, their treatment is really such as has been described to us and requires a change; or it will convince us, that the clamours are ill grounded."

A disposition to aggravate the miseries of captivity, is too liberal to be imputed to any but those subordinate characters, who, in every service, are too often remiss or unprincipled. [See also David Sprat, by James Lenox Banks, in which the author aims to prove that the frequent statements made by historians to the effect that the British commissaries having charge of the naval prisoners were dishonest are without foundation. Such a statement, regarding..."
"Dishonest commissaries," was made in Vol. 1, p. 328, of the present work. This reflection assures me that you will acquiesce in the mode proposed for ascertaining the truth; for detecting delinquent, or falsehood, on the subject of prisoners is so irksome in themselves, and have had many ill consequences, that it is infinitely to be wished there may be no room given to revive them. —The mode I have suggested, appears to me calculated to bring the present matter to a fair, direct, and satisfactory issue. I am sensible of no inconveniences it can be attended with, and I therefore hope for your concurrence. I shall be glad, as soon as possible, to hear from you on the subject.

I am, Sir,

Your most obedient,

And humble Servant,

Washington’s letter was answered, on Feb. 4, by G. Dawson, "Commissioning Officer of his Majesty’s ships at New-York" and "Captain of his Majesty’s ship the Iris," who stated: “An old sixty-four gun ship [the "Jersey"] is allotted for their reception in this harbour, and every possible check has been established to prevent any practices from creeping in, in violation of the laws and precedents of war in similar situations. —The arrangement of ex-changes which is made by the Commissioners-General, Mr. David Sprout—Lieut. Sporne, of the Royal Navy, an officer of experience and humanity, commands the prison ship, which is victualled by a Purser, with the very same provisions that the officers and seamen in the Royal Service are supplied with, and it is issued to them in the same manner."—N. Y. Merc., Feb. 12, 1781. Dawson’s letter followed, in which he reported that the prisoner had not replied to the latter part of April. He said, in part: "... notwithstanding that I then thought, as I now do, that my own testimony would have been sufficient to put the truth past a doubt, I ordered the strictest scrutiny to be made into the condition of all parties concerned in the victualing and treatment of those unfortunate people. ..." He added: "Permit me, now, Sir, to request that you will take the proper steps to cause Mr. Bradford, your Commissioner, and the Jailor at Philadelphia, to abate the inhumanity which they exercise indiscriminately upon all people who are so unfortunate as to be carried into that place ... that in future they may not be fed in winter upon salted clams, and that they may be afforded a sufficiency of fuel."

Dandridge, Am. Prisoners of the Rev. War Examined, by Whig Principles is published by Rivington. A letter is preserved within Smith’s diary, in Rivington’s handwriting, in which the writer “presents his Comp’ts & sends Chief Justice Smith his Candid Retrospect.” —Wm. Smith’s Diary (MS.VII). A copy of this anonymous pamphlet, hitherto unnoticed in Revolutionary studies, is preserved here. Y. H. S. It was first printed in Charleston, Sept. 29, 1782 (p. v.). It is proven by his diary (see J. 6 and J. 1, 1780) that William Smith was the author. The presentation to him of 100 copies, as soon as the book was issued, is, therefore, easily understood. So is this remark, offered by Smith (see F. 6) in answer to an inquiry regarding its authorship: “I said evasively that it was imputed in Charles Town to one Williams a lawyer.” Smith bound to secrecy (see J. 20, 1785, and J. 3, 1784) those few contemporaries to whom he made the fact of his authorship known. Sometimes he wondered if the British military family in the city suspected him “to be the Author” (see J. 1). No evidence of such a suspicion appears; however, indeed, the authorship is publicly revealed for the first time in this work. The purpose of the pamphlet was, to quote the author, “to work a Change in the Whiggo in the Carolinas. Throughout one observes the effort to conciliate, that ever marked Smith’s writings and utterances.

It begins: "The political creed of America ... may be comprised in the twelve following articles:"

1. Every nation has authority to frame such a government for itself, as will, without injury to others, be most conducive to its own felicity.

2. The national sovereignty under every form of government ... is absolute; for no State can exist, if any of its members may by force or fraud attempt its subversion with impunity: And therefore, every nation punishes treason, or an attempt tending to overturn the constitution, as the highest crime of which a subject can be guilty.

III. No man can be innocent, even Falso Consensium, in an endeavour to change the government of his country, if the meditated revolution will light up a civil war, and the miseries in prospect are likely to exceed those, which the community have been accustomed to endure.

IV. The establishments made in America by English emigrants and their associates might in the early day of the colonies, if the parent country had been so determined, have been prevented or broken up.

V. The Lords and Commons of England, being conunissant of the grants and charters ... for the encouragement of the colonies ... and afterwards co-operating for regulating the plantations ... they cannot therefore be considered as merely Royal, but Parliamentary, or national establishments.

VI. The grants and charters to the colonies, and the posterior settlements, regulations and usages ... are incontestible proofs of a great national covenant between the Mother Country and the colonies, for her favours ... by inspiring the Colonists with confidence, and exposing them to hazardous and expensive undertakings, created rights ...

VII. Before the year 1764, the King, Lords and Commons, were universally acknowledged to be the supreme-givers of the whole empire; of which the colonists were members.

VIII. The national covenant bound the parent country to protect and promote the colonies ... as far as was consistent with the general weal of all the dispensers of the nation; and it obliged the plantations to submit to her authority in all cases not repugnant to their grants, charters and establishments; and to such acts and contributions, as were necessary for the common defense and felicity of the empire.

IX. Neither of the contracting parties may dissolve this compact, as long as their joint aim in the union, to wit, their mutual prosperity, can be attained by it.

X. As no provision was made for constituting an imperial Judge between them, ... their controversies are to be decided by negotiation and treaties, or an appeal by bar to the Lords of the House, for neither is obliged to surrender its essential rights at the will of the other, and each is justifiable in excelling its own self-preserving powers.

XI. When one of them wants either will or ability to fulfill its engagements, the other, if not instrumental to this disaffection or impotence, will be discharged from the original obligation. But:

XII. Since amongst imperfect beings offenses are inevitable, the contractors are by the laws of a judge who cannot be deceived, reciprocally bound, upon exceptions taken, to pursue every measure of a re-conciliatory nature, consistent with the end of the union; and to such mutual condescensions, as tend to the re-establishment of the general felicity, peace and harmony. In the application of such principles it is the prerogative of the King of America, that this nation shall appear to be without blame. The former’s language to her colonies, at the passing of the Stamp Act was "You Americans are absolutely ours. We may dispose of your persons, your commerce, your lands and acquisitions as we please. You have no rights. The grants of our kings to your ancestors do not bind this nation. The privileges and securities of Englishmen cannot be yours unless you return to the old realm. ... All America is subject to our taxation; nor will we hear of your complaints, until you first own our authority to deal with you as we please, and acknowledge that such benefits as you request, are to be expected not as of right, but of grace."

The author remarks: "Had England such principles at the first emigrations, she was bound to declare them to the adventurers, before they gave themselves to the winds and the seas, to gain her a share of the wealth and commerce of the new world, by which her island has been converted into a Nation of Princes." He further declares:

1. That the present animosities are imputable to the pride and avarice of Great-Britain, in assuming an authority, inconsistent with the compact by which the empire had been long prosperously united.

2. That the Colonies were justifiable in censuring the new law devised to execute the tea duty act; for that aiming to enforce the claim of absolute sovereignty obliged to some conduct or declaration against an unconditional submission ...

3. That the resentment of Great Britain, on the destruction and expulsion of the tea cargoes ... was utterly unjustifiable,
and an infraction of the league, which obliged Great Britain to protect the colonies...

4. That the provinces were not blameable in forming a Congress, to unite their counsels and ward off danger, as they did in September 1774.

5. That the duty of the American Assemblies, and of the Congress acting for the whole continent, at that time to tender a plan to the Mother Country for restoring peace, consistent with the compact, by which the Parliament of Great Britain was to enjoy a supremacy for the common felicity of the empire and consequently, that the declaration they then made, of the right of the colonies to an exclusive legislation...was a departure in terms from the original league.

6. That it would not have been inconsistent with the dignity of Great-Britain, if instead of declaring war against her Colonies, she had animadverted upon the denial of her authority in all cases respecting internal polity, as an error. And that the parliamentary vote of the 26th of February, 1775, would have more naturally effect a treaty of reconciliation, had it explicitly asserted, that the right reserved to Parliament, of approving the quantum of the Colony contributions towards the common defence, was...only on her right to judge of the executive or defect of a due sympathy in any branch of the empire, to the general necessities of the whole body.

7. That it was a fault to issue that proposal, in terms capable of being construed as having the tacit purpose of unlimited submission, and accompanying it with acts for augmenting her force at Boston...more especially for her irritating salary to Concord and Lexington, on the 19th of April 1775 [p. 7], when no Governor but Mr. Gage had received the Parliament's conciliatory resolve.

8. That as this vote...favored the opinion of its being contrived, to deceive and divide the Provinces, the Congress of 1775, had some pretext for flying to arms.

9. That the total rejection of it in August 1775, and the neglect of the Congress to recall or explain the declaration of 1774, had a natural tendency to exasperate the nation; and...her Congress deserves the charge of abandoning to passion.

10. That the neglect of Great-Britain to supersede the orders to the navy, for sacrificing every town on the American coast, which should prepare for defence; and her continuance of hostilities after the petition to the King...confirmed the charge of her commencing a war to maintain an illusionary dominion.

11. That the Congress would have had merit with their countrymen, if...they had at the same time expressly assumed his Majesty, that they meant not by their declaration of rights in 1774, to exclude Parliament from participating in the regulations respecting the dominion of the Colonies.

12. That every partial view, whether of Great Britain, to aggravate herself by extortions exactions from the Plantations, or of America, to figure as an independent power...is unsightly in the sight of God.

13. Both countries being chargeable with inattention to the obligations they were under to pursue the measures requisite to a reconciliation, neither of them could reject terms consistent with the original compact.

14. That Great-Britain even in passing the prohibitory act of December 1775 [see D 21, 1775], Opened a door to pacification...and more especially as the King's Ministers had so early as September (soon after the Congress's petition to the King) dispatched messages...the King himself, in June 1776, had interviews with certain of the Delegates at Philadelphia, and made such intimations, as gave just ground to hope for an immediate termination of all differences, had the Congress sent others on their part, to confess their willingness to negotiate upon the overtures.

15. That the concealment of these pre-intimations...added to the guilt of the Congress, and favoured the perilous design of drawing the people into the precipitate renunciation of the dependency of the Colonies, the 4th of July, 1776, and of plunging their countrymen into a tedious and desolating war.

16. That there is reason to suspect, that the views which prompted to that awful resolution, will lead the Delegates to practice every artifice, to hide its terrible tendency from the eye of the public; and if possible, to turn the quarrel to their own emolument, at the expense of their country.

17. That the Appeal being made by the sword to the Omniscient Judge...and the war wasting the empire...it concerns those who began, as well as those who support and protect it...to cultivate concord, and a return to their ancient union.

18. If it was the duty of the Congress by withholding at first or afterwards retracting the declaration of 1774...to have prevented an open war; or to have tendered a more effectual answer to the overtures of January 1776...no subsequent transaction of the Congress...can bind the rest of the countrymen.

19. Who then are the real enemies of America, if not they who have perverted the serious aims of the main body of the people for the defence of their rights and privileges into a war for dominion? who, under the disguise of patriot zeal, did, unauthorized, dispatch an emissary [Silas Deane]...to draw the ancient enmity of France into a contention purely domestic.

20. It being manifest that nothing will satisfy the directors of the American Councils...but measure incompatible with the safety of the many millions of the same natural stock...Great-Britain will be justifiable in exerting all the powers she enjoys for her preservation.

21. It was wise and just as well as merciful in Great-Britain, to issue as she did, in October 1778, general and undistinguishiing pardons.

22. That the sufferings of the loyalists in all parts of the continent...will eternally demonstrate the hypocrisy, avarice and profligacy of some, and the lasciviousness of the rest of their oppressors; as the forbearance of Great-Britain, in not having yet executed a single rebel in her power, and in restraining from the devastations and complicated calamities, she might have brought upon the avowed ally of her inveterate enemy, is of her lenity and generosity.

And Lastly, That Great-Britain independent of her own interest in the controversy, is...bound to prevent the ruin of her American friends [the loyalists], at every risk short of certain destruction to herself. If compelled by adversity to conclude a disadvantageous peace, and to part with one or more of her Colonies to France, Spain, or any other foreign nation, [she should] stipulate in clear and strong terms, in behalf of the loyalists who may be found there, for every advantage of disposing of their estates, and free liberty to remove to such of the Colonies or Dominions as may not be unfortunately surrendered at the end of the war to a popish or arbitrary power.

Very important source material (the major portion of which is not published elsewhere), upon which the author bases his statements, appears in the form of footnotes. In the Charleston edition abovementioned this source material appeared as an appendix, and it was Smith's request to Rivington (see N 27, 1790) that, in this new edition, "the Appendix be taken in as Notes—to prevent disconnection in the Perusal."

The Candid Retrospect (with all the footnotes) was reprinted in installments in the Royal Gazette of Mr 28, 31, and Ap 4. Smith's authorship, of course, was not mentioned. Rivington introduced the article with the statement that it was "the least exceptional of any address for years past from the American press," and added: "Happy had the leaders of the continent been actuated by the spirit it breathes! or that the general mass of the people had been early apprized of the secrets it reveals! Thousands of lives have been sacrificed to the wicked and pernicious concealment,—and it is too much to be feared, that many more continuing uninformed will become the victims to the insatiable ambition, and avarice of their seducers." The article appeared again in the Gazette of Ag 29, S 1, and 5, 1781.

Smith writes in his diary: "A vessel arrives from Lisbon—Joyce a merchant there writes 14 Nov' to Mr Shoemaker that they had just rec'd the King's Speech which is spirited and breathes Vigor,—that a large Body of Troops are ordered for this coast sufficent [il] properly employed to suppress a Rebellion too long protracted for Want of suitable Exertions."—Wm. Smith's Diary (MS.), VII.

The letter is printed in Royal Gaz., Ja 31, 1781. Two days later vessels arrived direct from England bringing the king's speech.—Smith's Diary, ibid.

Smith writes that "Rivington has struck off 3000 Copies of the Candid Retrospect [see Ja 30], & given out 50 to Mr Shoemaker & 60 to the Board of Directors of loyal Refugees & 100 to Mr & made up 400 for Gen Arnold."—Wm. Smith's Diary (MS.), VII.

An inquiry is held on board the "Jersey," under the command
1781 Feb. 12
of Lieut. John Sporne, of the Royal Navy, "respecting the treat-
ment and usage of naval prisoners in all cases." Capt. Dawson of
the "Iris" (see Ja 25), and other British officers, are present. The
Testimony of six of the principal American officers among the
prisoners, and seven of the men longest in confinement, show,
with respect to the prisonships "Scorpion," "Stormbooth," "Hunter,"
and "Jersey," that "their situation was made at all times as
comfortable as possible, and that they were in no instance oppressed
or ill-treated;" that they regularly received certain stated rations,
which are "ever have been issued to them without drawback or
deduction, and of the very same species and quality with which the
Commanders, Officers, Seamen and Marines, belonging to said
ships were victualled; as also, the Officers and Privates of the
respective guard;" and that "they have at all times had fuel and
every necessary convenience for cooking;" and they further say that "the sickness
are present among the prisoners, arises from a want of clothing,
and a proper attention in themselves to their own cleanliness;"
and that "they have never been, and are not now crowded in the
prison ship; and that two or three of each rank are now, and have
ever been permitted daily, to go on shore to New-York, to purchase
for themselves, or on the part of the rest of the prisoners, whatever
they might be in want of."—N. Y. Merc., F 12, 1781.

Following this report, Gaine prints a series of seven different
affidavits to the same effect, given voluntarily under oath before
Mayor Mathews on Feb. 5. These documents, together with those
mentioned above under Jan. 15 (9. 1.), are printed in sequence after
those cited at Jan. 5 (9. 2.).

Smith writes concerning The Candid Retrospect (see Ja 50):
"The Pamphlet both pleases and offends—It puzzled the Loyalists
[Capt.] Smith asked me who was the author of it. I 1&ed every
that it was imputed in Charles Town to one Williams a Lawyer.
None of the Gazettes take it up—Kington does not even advertise
it. Mr. Shoemaker has sent several Copies to Philadelphia.
General Robertson & Mr. Elliot don't open their Lips upon the
Subject."—Wm. Smith's Diary (MS.), VII.

Smith writes in his diary that he has been informed by Israel
Knapp, of Connecticut, formerly a deputy commissary in the rebel
army, that "The Party that penetrated Westchester lately were
600 under General Parsons.—In Rago, many, about 100 perfectly
barefooted. They came for Spos & plundered Friends & Foes
Peticoats & everything to cover Nakedness. This to still Discon-
tents."—Wm. Smith's Diary (MS.), VII.

Knapp also tells Smith that "The Com's Declaration is among
the People. Parisons thought the Exception a Blunder, said the
Expection took in all the Officers for all of them had condemned Loyal-
ists in Connecticut, and the Independents in Pennsylvania actuated
by the lessening of their Party. They gave out that 10
French Ships with 10 Land Forces are soon expected at Rhode
Island. The People or 20 to 1 of them reply—What good will that
do—so we can't raise an army of our own we shall belong to
France or G Britain & they had rather he immediately reconized
with the latter than run the Risk of being conquered by
the Zeclots for Independence much mortified by the Introduc-
tion of British goods from Long Island and the Trade with the
Fleet at Gardner's Bay.—They think it draws out the Bullion the
they got from the French & that with what they would get from us
for Provisions would it withold support the War."—Wm. Smith's
Diary (MS.), VII.

12 of David Sproat, the British commissary of
prisoners, Gaine publishes the sware declaration of George
of Jan. 17, 1781, condemning the treatment he received when a
prisoner on the "Jersey;" also the resolution of congress of Jan. 5,
1781 (9. 2.), and Sproat's own answer, dated Jan. 29, 1781, ad-
dressed to Mr. Skinner, the American commissary, regarding the
charges against British management of prisoners.

Batterman's letter relates to the supposed number of prisoners
on board (1,100, he says), the poor food, attempts to make prisoners
enlist in the British service, the transfer of officers to the "Yarm-
outh," etc. Batterman says in closing: "They have taken this
method of starving us for the want of water, to kill us, or to make
us weaker into what have never allowed a man that is sick to go
to the hospital ship till they are so weak and low that they often
cry before they get out of the ship. They never allow the sick
to be mustered only when there is a wet or damp air. The com-
manding officer told us, that his orders were, that if the ship took
fire, we should all be turned below and perish in the flames of
which we experienced one day; by accident the ship took fire in the
steward's room; the commanding officer ordered the Hessian
guards to turn us below and if we offered to resist that they
should fire among us and if any of us should get into the water they
should fire us and kill us if possible."

In his letter to Skinner, Sproat says "That very many of them
are sick and die is true; but I will not allow that their disorders
proceed from any other cause than dirt, nastiness and want of
Clothing." Regarding food allowance, he says he posted up the
schedule of rations, and "requested of their own officers that
they would take in rotation the trouble to see that they got the full
quantity of good sound wholesome provisions; and that when a
case happened to prove damaged or otherwise bad, it should not
be served to them but headed up again, surveyed and condemned
according to the custom of the navy.

He describes his other services, the fitting out and burning of
"Good Hope" by the American prisoners (see Mr. 5, 1780); he
assails the manner in which British prisoners are treated, and de-
clares that the congressional resolution of Jan. 5, 1781 (9. 9.),
"will hurry on their misery and distress faster than they are aware
of and in a short time put the honour of every man to the test who
is out on parole.

Immediately following this correspondence, Gaine printed, at
the request of Mr. Dawson, captain of the "Iris," and commanding
officer of British ships at New York, other correspondence on
the same subject, embracing Washington's letter of Jan. 25 (9. 2.),
together with Dawson's reply, and the supporting affidavits made
by American prisoners to show their good treatment and satisfac-
tory rations.—N. Y. Merc., F 12, 1781; Banks, David Sproat
and the Naval Prisoners, 34-46.

By unanimous ballot the continental congress elects Robert
Morris "superintendent of Finance."—Jour. of Cong. (Ford ed.),
XIX. 180. He accepted the office on May 7, and took complete
control on Sept. 20.—Wissor, VII: 69. See, further, My 26.

There is prepared "A plan of a piece of Ground belonging to
James De Lancy Esq near fresh water survey'd Feb. 20, 1781—40
feet to an inch."—The original MS. is in the Bancroft Coll., in the
N. Y. P. L.

The office of police invites proposals from any person or persons
26 for cleaning the streets under a contract which gives "an exclusive
right to take all the Maucre and Rubbish for their own benefit."—
N. Y. Merc., Mr 5, 1781.

Articles found incumbering streets and wharves, contrary to the
order of April 6, 1780 (9. 4.), have lately been carted by the
police to the Company's front of the almshouse. The police board
now publishes a notice that they will be sold at public auction on
March 12, for the benefit of the poor, unless claimants obtain
permission to remove them before that day.—N. Y. Merc., Mr 5,
1781.

An advertisement, headed "Pro Bono Publico," is published in
New York of horse-races to be run on four days, beginning Easter
Monday, April 16, "on Ascot Heath, five miles from Brooklyn
Ferry." The purses offered are: a "County Subscription Purse,"
given on two days, of $50 each; a "Noblemen and Gentleman's
Subscription Purse," of $100; and a "City Subscription Purse," of
$100. Each race is to be run under carefully arranged conditions
and regulations. Among these are the following:

that all Horses to be fitted and saddled by Mr. Loosley's
Brooklyn Hill, on or before Friday, the 6th day of April; or on
Saturday the 7th of April, at Mr. Loosley's Booth on the Race
Ground, or to pay double entrance at the post.

"No person will be admitted to start a Horse, unless the rider
is in proper uniform, with a small saddle jockey cap, silk jacket, and light Boots."

"It is expected that no person will attempt to erect a booth on
the race ground, without first subscribing at least three guineas,
neither to sell wines, liquors, &c. from wagons and other carriages,
without subscribing two guineas towards the Saddle, Bridle, and
Whip [to be run for each day], and other expenses attending the
races."

Tavern-keepers Take Notice.

"To avoid suspicion of collusive practice in running, it is ex-
pected Gentlemen (who enter Horses for any of the Pursues above
mentioned) do qualify themselves, that the Horses entered in their
28 name is solely their property, and that they have no claim or coo-
26 nection with any Horse entitled to run on any of the days, excepting
what is patronised by their names.

The advertisement is signed "God Save the King," and dated at "Brooklyn Hall, Feb. 10, 1781."—N. T. Merc., F 26, 1781. See,
25 further, J. 4. See also the Account, a tale of the Olden time," in The Scrap Table, for 1819 (Boston, 1820), which is an historical tale of this race-course on Long Island.

"The Confederation of the United States of America," is com-
24 pleted, delegates from Maryland, the thirteenth state, having reported to the continental congress that they were authorized by their state to sign the "Articles."—Jour. of Cong. (Ford ed.), XXXI. 213-25. For the sale of the Articles of Confederation" by the congress, see N 15, 1777. The delegates representing New York State, who had previously signed, were James Duane, Francis Lewis, William Duer, and Governour Morris. The delegates of all the thirteen states have now signed. For the text of the articles, see the Secret Journals of Cong., I: 448-64.

7 The Chamber of Commerce presents an address to Sir Henry Clinton adding him to suspend the collection of duties on imported articles because its enforcement "will be attended with the most fatal effects to the supply of this Garrison and the Mercantile In-
23 terest." Clinton complies with the request and promises to send a copy of the memorial to the king's secretary of state.—Col. Rec. of N. Y. Chamber of Commerce, 1768-1784, 247-50.

19 Smith writes in his diary: "General Phillips sails with a fresh Gale of Wind and with a good tide. I am about to see our H Clinton told me last Night in his Coach as we ret'd from Dinner at General Robertson's that the French were not moved last Thursday & we have now here a 30 5 or 6 Frigates to convoy the Detachm' going to the Chesa-
20 peake. It is calculated that [La] Fayette will not reach Arnold in several Days by being obliged to head the navigable Rivers of Virginia."—Wm. Smith's Diary (MS.), VII.

5 New York State pass a law for relieving persons loyal to the United States whose sons have, contrary to their will, joined the enemy, from the payment of certain taxes.—Laws of N. Y., 4th sess., chap. 28 (printed by Holt, 1782).

15 It is now supposed "that the enemy must soon leave New York."—From Chatham news in The N. J. Jour., My 70, 1781.

19 Brig.-Gen. Samuel Birch publishes a regulation which prescribes that cord-wood shall be of the full length of four feet "including half the scarf." His order also provides that, after July 1, no one shall "drive any iron bound Cart, Truck, or other Carriage, within this city," for carrying goods for hire, under penalty of $5 for each offense.—N. T. Merc., Mr 19, 1781. See also Dawson's report on city finances in the Revolution, in Proc., Bd. of Ald., LXXXVI: 218.

19 A prize ship is stranded at Corheir's Hook.—Royal Gaz., Mr 17, 1781.

19 Fraunces offers his tavern for sale, describing it as follows: "To be Sold, with or without the Fixtures. An elegant three story and a half brick dwelling house, situate in Great Dock Street, at the corner of Broad Street, the property of Mr. Samuel Fraunces, and for many years distinguished as the Queen's Head Tavern; in which are nine spacious rooms, besides five bed chambers, with thirteen fire places, an excellent garret in which are three bed rooms well finished, an excellent good kitchen, and a spring of remarkable fine water therein; a most excellent cellar under the whole, divided into three commodious apartments; a convenient yard, with a good cistern and pump, and many other conveniences too numerous to be mentioned. The whole in excellent repair, to be let in or under a lease of 21 years, is at present a remarkable good stand for business of any kind, and will upon a reestablishment of civil government be the most ad-
20 vantageous situation in this city, from its vicinity to the North River and New Jersey. . . ."—N. T. Merc., Mr 19, 1781. Fraunces did not effect a sale of the property until April 25, 1785 (v. 2).—Mr.

19 Letter received from Boston from Connecticut states: "The mer-
20 chants of New-York, and their associates in a number of these states, employ every kind of means for conveying English goods, through this continent. We see, by the New-York Gazettes, and by divers letters from that city, that its inhabitants are enraged at the late resolves of Congress for the confiscation of English merchan-
21 dise: This is one proof that these resolutions have struck them in a most sensible part. In truth, if we could but agree to do what is in our power towards reducing the commerce of England, we should not cut off an arm of this tyrannical power, and have more hope of speedily reducing her to the terms which form the object of the present war."—N. T. Merc., Ap 15, 1782.

12 Under this date, and on April 1, Von Kraft makes mention in his journal of a "Church parade in a stable near Morris' House."—Von Kraft's Jour., 132.

27 This officer at New York writes to a friend in London: "I have the pleasure to acquaint you, that our affairs go on so extremely well, that I doubt not but we shall soon be Masters of all America, for it is impossible for them to hold out much longer; Washington's army is reduced to a handful of men, half starved, without clothing, and in want of every necessary, daily deserting, some coming over to us, and others returning home. . . ."

15 The situation of the post-office at this time is indicated in an advertisement for the sale of a house and lot, "No 18, Broad-Street, opposite the General Post Office."—Royal Gaz., Mr 28, 1781.

19 The state legislature passes "An Act more effectually to punish Adherence to the King of Great-Britain, within this State." This provides that any New Yorker who shall teach, write, or print that the King of Great Britain hath, or of Right ought to have, any Authority . . . over this State," or who shall try to persuade others to renounce their allegiance to the state, shall be guilty of felony and may be tried and convicted for that crime. Instead of being sentenced to death, the convicted person may be made to serve for three years on board a war ship belonging to the United States or to France.—Laws of N. Y., 4th sess., chap. 48 (printed by Holt, 1782); Laws of N. Y. State against Loyalty (London, 1786), 110-11; Ind. Gaz., D 27, 1785.

24 The city vestry advertises for proposals, to be received at the almshouse, for renting the Tea Water Pump for the ensuing year.—
28 Royal Gaz., Mr 31, 1781.

26 The first American man-of-war is building at Portsmouth, N. H., under the superintendence of Paul Jones; it is named the "Ameri-
31 ca." It was launched on Nov. 5, 1782.—Adams, Annals of Ports-
23 mouth (1842), 276; Macaulay, Hist. of the U. S. Navy, I: 144; Hill, Twenty-six Historic Ships (1905), 37.

21 Wm. Smith writes to Clinton: "In the manifest Declension of the severe Restraint heretofore laid upon the Rebel Press and the increasing Eagersness of the Multitude to see what comes from our's I beg leave to remind your Excellency of your Intention that I shall not suffer that a single Paper be taken in Virginia that may serve to detect the Frauds upon the People.

"Rivington's Gazette being more sought for is the best Vehicle for such Communications but as none of them go out except such as his Customers send to their Friends 'tis humbly submitted whether he ought not to be ordered to put up a 100 Copies & for-
20 ward them weekly to Connecticut and New Jersey under such Direc-
25 tions by the Flogs as are most likely to convey them far into the interior Country.

"I am always at your Excellency's Command and with the highest Respect Sir"—Wm. Smith's Diary (MS.), VII.

20 Smith writes that he finds that the Rebel Papers the Congress freely handled by anonymous Essayists under the Title of the Indep-4 American the Druid & Cc. 'These, he adds, have impelled Gov. Trumbull and the legislatures in New York and Massachu-
22 setts to publish "Address to the multitude to animate them afresh with strong Implications of their apostacy from their first Principles."—Wm. Smith's Diary (MS.), VII.

21 A number of Citizens having formed themselves into Com-
24 panies by the names of the Friendly Union, Hand in Hand, and Heart to Heart Fire Companies," with the good purpose of aiding in removing and securing the personal property of inhabi-
25 tants, endangered by fire, a garrison order is issued that the mem-
26 bers of these companies (and they only) are to wear "round hats with black brims and white crowns." They are to be permitted to pass boundaries without hindrance, and to be exempt "from handing buckets, or assisting to work the engines."—Royal Gaz., Ap 18, 1781; Men. Com. Conn. (1863), 717;
THE ICONOGRAPHY OF MANHATTAN ISLAND

1781

Smith writes that the "plain truth" of the Candid Retrospect... (see J'a 50) "pleases neither Whig nor Tory." Gen. Robertson indulges in a "vision of contempt" of all the old Governors. Tryon, Martin Franklin, for a Diversion of Sentiment on the Conduct of the War." The lack of any system and the "versatility of conduct on the part of the British authorities in New York lead Smith to wonder if they wish "to prolong the War."—Wm. Smith's Diary (MS.), VII.

Submerged rocks, long known to exist near Whitehall, Corlears Hook, and elsewhere on the shore of lower Manhattan, again cause disaster. One of Admiral Arbuthnot's ships, the "Royal Oak," goes aground on the rocks opposite Whitehall, where three of his ships try to pass into the East River.—J. H. Gains, II: 115. Under date of April 16, Smith writes: "The admiral damns the Pilot for running her [the ship] on the Rocks off the Battery Friday night. He says the Ship is ruined but forbids me to mention it—i wish it may not be an apology for not putting to Sea."—Wm. Smith's Diary (MS.), VII.

Smith writes in his diary: Admiral Arbuthnot told me as a Secret that without Succour to L'd Cornwallis he would be ruined:—Wm. Smith's Diary (MS.), VII.

"The Question being put Whether or not it would be prudent at this Time to rebuild Trinity Church provided a sufficient sum of money could be raised by subscription for that purpose," Trinity vestry votes in the affirmative, and passes a resolution "that a Subscription be set on foot for that purpose."—Trin. Min. (MS.).

The American frigate "Confederacy," Captured by the British off the Capes of Virginia, is conducted into N. Y. harbour. The cargo value $50,000, consists in part clothing for Washington's army. She was bound from Cape Françoise to Philadelphia, with a convoy, of which several vessels have been brought into this port. "She is the largest ship ever employed by the Congress, whose navy" (according to an intercepted letter of Richard Langton, dated Oct. 5 [1780]) "is now reduced to three frigates, viz., the Alliance, Trumbull, and Deane."—Wm. Smith's Diary (MS.), VII.

Smith writes that he is informed that Adml Arbuthnot has indiscreetly to say more issued Blank Licences to merchants for the Importation of Wines &—Dutch Bottoms have been imported to bring the Articles from Spain to St. Eustatius whence vessels from St. Kitts were to fetch and bring them here—$40,000 of such property seized by Sir G B Rodney... How little are even great Officers to be trusted in the Heights of the Venality of the Times! and how inconsistent the Spirit of Commerce with true Patriotism!—Arbuthnot is ruined in Point of Character.—Wm. Smith's Diary (MS.), VII.

Samuel Matlock notifies the public that he has "taken the house known by the name of the White Conduit House, which he has opened on the same plan with the White Conduit House near London; he has provided the best liquors the City can afford."—Royal Gaz., Ap 21, 1781. See Mr 24, 1777.

Gen. Washington is honoured by Yale with the degree of "Doctor of L. W."—Yale Corporation Minute Book (MS.), 255. Cf. Conn. Jour. (New Haven), May 2, 1781. Washington's letter (MS.) acknowledges the degree is reserved in the Yale Univ. Library.

Intelligence of the Battle of Guilford Court House (see Mr 15) reaches New York. Smith records it and adds: "No Rebel Force left in the Country—Green probably with his officers gone to Virginia."—Wm. Smith's Diary (MS.), VII.

A large sea-dog is on exhibition at Jacob Jardoum's Tavern, at The Tea Water Pump, at "One Shilling a piece each Person."—Royal Gaz., Ap 25, 1781.

Af 06 de jour is fired by all the troops in the garrison in consequence of the Victory obtained by Lord Cornwallis, over the Rebel Army, near Guilford Courthouse (see Mar. 15)....—N. T. Merc., Ap 30, 1781; J. H. Gains, II: 117. "As that success undoubtedly effected a retreat, it were to be wished, upon the purest principles of whiggism, that the enemy might meet with like success every day."—Penn. Gaz., My 16, 1781, under Trenton news.

Volunteers "wishing to join a corps being formed," by Col. Conolly are invited to apply at the "Sign of the Ship Corner of Fair [Fulton] Street, and Broad Way, opposite St. Paul's Church."—Royal Gaz., Ap 28, 1781. The Sign of the Ship, in 1778, Apr. 28, was at the Fly Market.

Brig.-Gen. Birch publishes a set of rules calling upon the inhabitants to keep the city clean (cf. the prior order of Ap 6, 1780).—N. T. Merc., Ap 30, 1781. On May 6, 1783, this regulation (or "indulgence," since the public carts gathered up the dirt) was revoked, and the inhabitants were required to cart away the dirt at their own expense weekly or as often as necessary.—Royal Gaz., My 7, 1783.

James Strachan, Now at the Queen's Head Tavern, On the Dock, Thanks the Gentleman of the Navy and Army, also the Public in general for the great Regard shown them by him, and his Residence there; and informs them that on May Day next he intends to open Business at the Place well Known by the Name of the Merchant's Coffee-House, Where he intends to pay Attention, not only as a Coffee-House, but as a Tavern, in the true Sense; and to distinguish the same as the City Tavern and Coffee-House.—Royal Gaz., Ap 28, 1781; Bayles, Old Taverns of N. Y., 294. The tavern into which Strachan has removed was first opened by Mary Ferrara in 1773 (q.v. Ap 27). It stood on the s. e. corner of Wall and Water Sts.—L. M. R. K., III: 979.

On Nov. 30, this tavern was the scene of the anniversary of the St. Andrew's Soc.—Royal Gaz., N. Y. 30, 1781. On Ap 23, 1782, the St. George's Soc. met there.—Ibid., Ap 20, 1782.

The Chamber of Commerce represents to Admiral Arbuthnot that the "Rebel" privateers are a source of great danger to the merchant commerce of New York and suggests that "a couple of fast sailing frigates, constantly to cruise between Delaware and Block Island, and making the Light House at Sandy Hook once or Twice a Week, as the WInds permit, would effectually protect the Trade of this Port from all Invaders."—Arbuthnot answered on May 5: "since my return from Charleston, the greater part of my Force hath been upon this Coast, and during my stay at Gardner's Bay Frigates have not only been cruising almost constantly off the Bar, but between Montock Point and the Delaware."—Col. Rec. of N. Y. Chamber of Commerce, 1768-1784, 255-56. A committee of the Chamber of Commerce "for revising the old and prepearing a New Charter for the City of New York," reports that they have "made some progress therein." They ask leave to sit again.—Col. Rec., N. Y. Chamber of Commerce, 262.

Persons from New York report in Trenton that "last week a very hot press took place there [in N. J.,] by which several hundred men from the city were carried on board the fleet—and 309 American prisoners were also carried from the prison ships, and forced on board their [British] ships of war, among whom were Captains, Mates, and other officers." The printed report adds: "Such is the suprised rapacity of the pirates barbarity of nature! which we have to contend! They revare neither the laws of God nor of nations."—N. J. Gaz., My 9, 1781.

Smith writes: "The Trade suffers much by N England Privateers, concerning which there are "plain Hints from the News Papers." The Chamber of Commerce is also aroused.—Wm. Smith's Diary (MS.), VII.

Trinity Vestry appoints a committee to "inclose the Yard of St. Paul's Church with a Ditch & such temporary fence, as they may think proper."—Trin. Min. (MS.). The fence had not been completed by Ap 21, 1782 (q.v.).

A Parcel of Refugees undertook to cut Wood for Wages near Fort Lee—perhaps about 300—They have 1 Field Piece—and have been twice assaulted & 'twas said have repelled 400—They did not prepare even the Frame of a Block House.

What Impeachment does this furnish upon the British who are still in close Quarters here! Why do they not visit the surrounding Shore, to vex the opposing Militia & if not oppose to open the Inter-course for the Supply of the Garison & the Sale of British Goods.—Wm. Smith's Diary (MS.), VII.

Washington, at Wetherfield, Conn., holds a conference with Rochambeau and other French commanders, and it is determined to make a united attack upon New York, provided De Grasse can cooperate. This was Washington's plan, but there seems to have been also proposed at this time an expedition against the British in Virginia. Regarding these and concurrent events, see Winsor, VI: 499, 561; Baker, Itinerary of Gen. Washington (1892), 220.}

Setting from his head and of course to the president of congress, Washington outlined the plan of attack on New York, which culminated in the reconnoissance of July 21,
and the capture of Fort Independence: "In consequence of the measures concerted at the late interview, all the French Troops, except about 200 to be left as a guard over their heavy stores and Baggage at Providence, are to march as soon as circumstances will admit, and form a junction with me upon the North River.—Five hundred Militia are to be stationed upon Rhode Island for the preservation of the Works which have been erected, and for the security of the harbour. . . Upon a full consideration of affairs in every point of view, an expedition against New York has been deemed preferable to making further detachments to the Southward, while they can only be sent by land. . . The enemy, wexeled as they were by detachment, may either sacrifice the valuable Post of New York, or recall a part of their force from the Southward to defend them. . . I am very apprehensive of a formidable Invasion of the Northern frontier, as the Enemy from Canada are undoubtedly considering in considerable force at Crown Point. . ."—From transcript of the original text, pub. in cat. (sale no. 1768) of The Anderson Galleries, New York, of collections of various consignors, to be sold Jan. 23 & 24, 1924 (item 385).

In a letter to La Fayette on May 31, Washington gave a report of the Wethersfield conference, at which, it appeared, he, Rochambeau, Chateleine, Gen. Knox, and Gen. Duportail were present. Writing from New Windsor, he says in this letter: "Upon a full Consideration of our Affairs in every Point of View, an Attempt upon New York with its present Garrison (which, by Estimation is reduced to 1000 Men and a few Guns) and detached from the Southward, which last would give the most effectual Relief to those States. The French Troops are to march this Way as soon as certain Circumstances will admit. . ."

"... you perceive it will be some Time before our Plan can be ripe for Execution, and that a Failure on our Part in Men and Supplies may defeat it but I am in Hopes that in the States in this Quarter will exert themselves to attain what has long been a favourite, and is an important object to them." This letter was intercepted by the British, and was evidently a ruse (see N. 23)—Lloyd's Eve. Post, Jl 13-16, 1781.

A letter received in London on July 17 from a British officer at New York declared: "It is believed our General intends attacking Mr. Washington's Army the Rebel Mail which we intercepted, tells us, he, with Rochambeau, and 4000 French troops, proposes attacking us; but, alas! Sir, did they but know how well we were prepared to receive them, they would never entertain another thought of it."—Lloyd's Eve. Post (London), Jl 13-16, 1781.

Lieut.-Gov. Elliott, presiding at a meeting of the council, informs the members that Gov. Robertson has left the city for a short time and has delivered the seal to the new chief, J. C. C. Gen. Min., p. 47. Cf. Wm. Smith's Diary, VII, under the same date.

Smith writes that he is informed that Sir Henry Clinton "concedes he hates Business that he thinks himself fit for a small army but not for the complicated work assigned him—He wishes a Vice Roy above both him & the admiral."—Wm. Smith's Diary (MS.), VII.

Congress approves a "plan establishing a National Bank in the United States, submitted to their consideration, by Mr. Robert Morris, the 17th May, 1781." The resolutions were published in full in the N. Y. Packet (Fish-Kill), Je 14, 1781. See F. 20.

Sir Henry Clinton informs William Smith that he is assured by private letters that the British "are in a fair way of an Alliance with the Emperor of Germany but Ministers are silent . . . till the Treaty is concluded."—Wm. Smith's Diary (MS.), VII.

Wm. Smith writes that a "Plan of Peace" is under discussion to which the British give up "all the Colonies Northward of the Chesapeake." Cornwallis is said to favour it.—Wm. Smith's Diary (MS.), VII.

-----

S. Samuel Birch, the commandant at New York, issues long and detailed market regulations, which are published in full. The reason for this is that "divers persons influenced by a desire of inordinate gain, have been guilty of engrossing and forstalling all kinds of victuals and provisions in this town, whereby the prices thereof are excessively enhanced." The first regulation is "That all fresh meats, victuals and provisions of all kinds (fish excepted) shall be openly sold in one or other of the public Market Places, and nowhere else in this city (the place where Coenties Market formerly stood, to be considered as one) on penalty of forfeiture, one moiety to the informer, and the other to the poor of the city."

The reference to "the place where Coenties Market formerly stood" is a clear indication that it had been removed. The last date prior to this when the building appears of record was Aug. 23, 1781 (see Royal Gaz. of that date), although it is stated on a later date in an advertisement for rooms to let in a house "in Dock Street, near the Coenties Market."—Royal Gaz., Je 30, 1781.

This reference, however, evidently means the familiar site and neighbourhood, it being thus specifically referred to in another advertisement, two years later, of a merchant's removal "to the house No. 15 in Little Dock Street, between the Old Slip and Coenties Market Place."—Ibid., My 14, 1783.

This 'Market-place' was not used as such after peace was proclaimed, but the Slip was a grand depot, principally for all the market-boats, which brought farming produce and live stock that came down the East River, and this was continued until about the year 1815."—De Voe, Market-Book, 122-25, 125. See also N 16, 1720; Ag 22, 1771; L. R. K., III: 1981; and descrip. of the regular Market, Je 4, 1781.

"The Grand Races of Ascot Heath [see F 26]. Being postponed till Wednesday the 6th of June, on account of the King's birth day, notice is hereby given the Public, that there will be a Hurling Match on the ground on Tuesday the 8th instant; and those Gentlemen who have a curiosity to play (or see) that antient diversion, will get birts and bats at the Irish Flag, at twelve o'clock; and at four in the afternoon an elegant saddle will be run for."—N. Y. Merc., Je 4, 1781; See also My 18, 1782.

The American privatere "General Washington" (said to be the property of Gen. Washington and Robert Morris) is brought into port by "The Chatham."—Journ. of Hugh Gaine, II: 120; N. Y. Merc., No. 1548.

Europeans are sent to England in the Confederation, who sailed with the Fleet this day."—Gaine, op. cit., II: 120. This may have been the captured American frigate "Confederacy."—See Ap 19.

Von Kraft reports that at this time, "At New York were still in camp, of the English, the 22d and 43d regiments and the 76th Scotish. The Hessian Body regiment was in camp at Johnshen House [Jones's house, "Mount Pitt"]—see 1767; the Prz. Charl regiment by the 7½ mile-stone, east side."—On Kraft's Journ., 140. See Harper, My 23.

Congress adopts instructions to Adams, Franklin, Jay, Laurens, and Jefferson, authorizing the acceptance of the mediation proposed by the Empress of Russia and the Emperor of Germany. These forbid any treaty of peace which shall not, first, effectively secure the independence and sovereignty of the United States, according to the subsisting treaties with France; and, second, in which the said treaties shall not be left in full force.—Winor, VII: 92.

Among items of news from the British admiralty office are the following: "Tuesday [June 12] a commission passed the great seal, appointing Robert Digby, Esq.; Rear Admiral of the Red, commander in chief of his Majesty's ships and vessels employed on the coast of North-America, and a commission for Sir Henry Clinton, for appointment to the same, to be taken by the King at 3½ o'Clock; some good ships are also allowed, but every assistance of that sort will be esteemed a favour. A Dinner exactly British will be upon Loosley's table at II o'Clock, after which there is not the least doubt but that the song called 'Of the Roast Beef of old England' will be sung with harmony and glee." The sport of bull-baiting is somewhat described in blank verse: A Bull of Magnitude and Spirit, Will dare the dogs pre- suming great, etc.—Royal Gaz., Je 20, 1781.

Smith writes of Gen. Skinner's "ridiculous Expedition to Monmouth for Cattle for the Navy (15 Ships now uselessly anchored at the Hook)." About 1,500 men took part in the incursion but were
The Iconography of Manhattan Island.

Washington plans "to surprise the Enemy's Posts at the No. end of Yk. Island, . . . having fixed upon the Night of the 2d. of July for this purpose;—and having moreover combined with it an attempt to cut off Delancey's and other light Corps without Knyphausen's Knowledge," from Washington's journal (in the Lib. of the Dept. of State, Washington), pub. in Mag. of Am. Hist. (1881), VI: 117-18 (see also 113-14).

July

Wm. Smith writes that reports come from England that "both the General [Clinton & Adm.] [Arbuthnot] are blamed and with great Reason" for their failure to cooperate. Ministers "in said with this body of Place, and write to those in Civil Terms . . . Worse of increasing the Minority Faction." The admiral sailed for home on the 6th.—Wm. Smith's Diary (MS.), VII.

"Because of failure to receive his salary, and for other reasons, Chief-Judge Smith, in a letter to the Judge of the Circuit, says: "Don't they like the Candid Retrospect—am I suspected to be the Author? He is known only to De Rosset and Fanning . . . will persevere nevertheless in what I conceive to be the true Interest of the whole Empire & if possible bring on an American Parliament."—Wm. Smith's Diary (MS.), VII.

This evening and the following day some "rebels" crossed over North River from Jersey and marched in full view of the Hessians near Fort Independence, "in whole regiments, flags flying and bands playing, down around the lower Courtland House." Many of them were wounded or killed by the "Yagers" (sharpshooters).—Von Kraft's Jour. 143; Winsor, VIII: 566. This was a skirmish at Kingsbridge between 200 "Yagers" and 50 horsemen on the one side, and an advance corps of the "rebel army" consisting of 300 foot and 750 horse. The "Yagers" compelled the "rebels" to quit the port, and drove them from the heights as far as Deveaux's house. The troops were ordered to fall back to their former position leaving 100 "Yagers" at Fort Independence, who observed the movements of Gen. Washington's army as he reconnoitered "Spitzen Devil."—Royal Gns., 144, 1781.

Wm. Smith adds: "It remains doubtful . . . whose Loss is greatest—They have carried off the Cable collected by the Refugees. I believe we have near 40 wounded—40 or 50 killed—I don't learn of more than 21 of the Rebels left dead in different Places. They carried their Wounded off in 9 Wagons."

"There seems to be a general Censure of Sir H as unprepared for a great Force. He is blamed for not having Boats at the Bridges named Vessels in the River. . . . If Sir H wishes the Enemy to venture near our out Posts he ought to be prepared to surround them by the Hudson or the Sound —If he desires to keep them at Home he should fill the Hudson with Vessels & appear to menace West Point. He is incapable of Business—He consults No Body—All about him are like driller & ignorant."—Wm. Smith's Diary (MS.), VII: under Jl 4.

The battle of Loyal Volunteers of N. Y. City, commanded by the governor, Lieut.-Gen. Robertson, paraded in Broadway at 5 a.m.; and at 6 marched to the house of Mayor David Mathews on Water St. Here the mayor, their lieut-colonel, presented the corps with "a pair of elegant colours, a compliment from Lieut.-Gen. Robertson," in approbation of their "loyalty and spirited resolution in forming themselves into a select body for the defence of this city." The officers were drawn up in three ranks in front of the battalion, which stood presenting arms, while a band played "God Save the King." They then proceeded to "the ground of exercise above the ship-yards, and after a very short field day, particularly calculated for immediate service," they marched back to "the old church St. Paul's Church," and, accompanied by two light infantry companies, music, etc., "ledged their colours at Lieut.-Col. Mathew's house. Officers and men numbered 322. They made an elegant appearance, being a fine body of men, dressed in uniform."—N. Y. Merc., Jl 9, 1781.

There seems to be no Attention to our Militia, either here or on Long Island or Staten Island. This ought to be Gen' Robert- son's Care. In short we entertain no hopes.—There were employed at King's Bridge in Wark Capt. Scott of the Artillery tells me agreed by the Generals last Summer to set about the next Day— and at Breucklin they ought to have done in March, rather than in the present extreme Heats."—Wm. Smith's Diary July (MS.), VII.

A New Yorker writes: "Jonathan is collecting all his forces, raising Heaven and Earth to besiege us, in conjunction with about 4000 French troops; on this occasion the New-England Yankees seem to be very forward, and may, in its consequences, put an end to the rebellion."—Von Kraft's Jour., 145.

"Near 5000 men being ordered to march for Kingsbridge, to cover and secure a reconnoitre of the Enemy's works on the No. end of York Island, Harlaen river, & the Sound, were prevented doing so by incessant rain."—From Washington's journal (in State Dept., Wash.), pub. in Mag. of Am. Hist. (1881), VII: 119.

Von Kraft's records in his journal that his company and "the Body Company" have to move unexpectedly into tents in Fort Knyphausen, because "the Rebels" are expected.—Von Kraft's Jour., 145.

Washington writes in his journal: "I passed the North River with Count de Rochambeau—Genl. de Beville, his Qr. Mgr. Genl. G. Bon. Duportail in oard. Deveaux's Forces and Encampments at the North end of York Island." He records what he discovered, including the following:

"About the center of the Ground leading to Jeffery's Rock or point a Guard mounts. . . . . . . .

... the shore from Jeffery's rock downwards was quite open and clear—without Huts of any kind—Houses & Troops—none being encamped below the Heights. There did not even appear the Springs, or washing places any where on the face of the Hill which were reported to—

The Island is totally stripped of Trees, & wood of every kind; but low bushes (apparently as high as a man's waste) appear in places which were covered with wood in the year 1776.

The side of the Hill from the Battery below Fort Tryon, to the Bay opposite to fort Knyphausen is difficult of access; but there seems to be a place abt 200 yrs above the bay, which has the best appearance of a landing, and is most private—but a bat or two on the heights abt. 200 yrs above Fort Knyphausen, & a little above the old long Battery, which was thrown up in 1776 must be avoided by leaving it on the left in getting to the Fort last mentioned.

"In the hollow below Moris's heights (between that & Harlaen) is a good place to land; but near the York road opposite there appeared to be a few Tents—and many Dragon Horses seemed to be at Pasture in the low land between the heights—a landing perfectly concealed but not so good, might be a little higher up the river, and nearer to those heights which ought to be immediately occupied—between the old American lines and the aforesaid hollow."

"From the point within the mouth of Spinden devil, the way to the Fort on Cox's Hill seems difficult, and the first part of it covered with bushes—there is a better way up from the outer point, but too much exposed to a discovery from the ship which Iyvs opposite to it, and on acct of its being less covered with wood."

"The ground round the Fort on Cox's hill is clear of Bushes there is an abatis round the works, but no frizzling; nor could I discover whether there is a ditch."

"At the No. E. corner there appeared to be no Parapet—& the whole seemed to be in a decaying state—the gate is next the No. River."

"Fort Tryon, Knyphausen & Ft. George on Laurell, with the Batteries in the line of Pallisading across from River to River appeared to be well frizzed, ditched & abatted—in a word to be strong and in good repair."

"Fort No. 8 is also abatted & frizzed at the Top—the gate is next Harlaen river—there are no Houses or Huts on the side of the Hill from this work till you come near old Fort Independence."

On Me Gowsans heights there appears (by the extent of the Terraces to be two Barrier rows—supposed to be British Grenadiers—a little in the rear of this and on the (enemies) left, are a number of Huts—but whether they are Inhabited or not could not be ascertained—there being different opinions on this
CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

July 18

Regt. (supposed to be the 58th British) Between this and Fort Knyphausen (abt. half way) are two small Encampments contiguous to each other—both together containing two or 3 and 40 Tents.

—Hessian—On Laurel Hill near Fort George is another Encampment in view abt. 40 Tents & Huts which appear to be inhabited also—by (it is said) the 57th Regiment.

"The other, and only remaining Encampment in view, discoverable from the west side of the river, is betwixt the Barrier and King's bridge—in the hollow between Cox's Hill and the heights below—"One hundred Tents could be counted in view at the same time, and neither might be hid by the Hills—At this place it said the Jagers—Hessians & Anspach say."—Mag. of Am. Hist., VI: 121.

"Again ordered abt. 5000 men to be ready to march at 8 o'clock, for the purpose of reconnoitering the enemy's Posts at Kingsbridge—and to cut off, if possible, such of Delancy's Corps as should be found outside their lines.

"At the hour appointed the march commenced in 4 columns on different roads. The whole Army (Parson's division first) "arrived at Kingsbridge about daylight & formed on the heights back of Fort Independence—extending towards delancy's Mills—while the Legion of Lauzen & Waterbury proceeded to scour the Necks of Morrisania & throve to little effect, as most of the Refugees were fled, & hid in such obscure places as not to be discovered; & by stealth got over to the Island adjacent, & to the enemy's shipping which they seized the few, however, without much success. The Cattle & Houses brought off."—From Washington's Journal, pub. in Mag. of Am. Hist. (1881), VI: 122-23; N. J. Jour., Ag 1, 1781.

Washington continues the record of his expedition around Kingsbridge: The enemy did not appear to have had the least intelligence of our movement—or to know we were upon the heights opposite to them till the whole Army were ready to display.

I began, with General Rochambeau and the Engineers, to reconnoitre the enemy's position and works, first from Tippett's hill opposite to their left—and from hence it was evident that the small redoubt (Fort Charles) near Kingsbridge would be absolutely at the command of a battery which might be erected thereon.—It also appeared equally evident that the Fort on Cox's hill was in bad repair. . . . From this view and every other I could get of Forts Tryon, Knyphausen & Laurel hill, the works are formidable.

"There are no Barracks or huts on the East side of the Hill on which Forts Tryon and Knyphausen stands—nor are there any on the hill opposite except those by Fort George.—Near the Bllew hill there is a number of Houses, but they have more the appearance of S. W. & S. E. Tents.—At the gate, are about 14 or 15 Tents; which is only the Encampment I could see without the line of Pallasising, as the large one discovered on the 18th through the brake at the Hill betwixt Fort Tryon & Cox's hill was not to be seen from any view I had.—

"A continued Hill from the Creek East of Haelaram River & a little below Morris' White House, forms a Circle, now filled in—Peterson, Landmarks, 128], has from every part of it the command of the opposite shore, and all the plain adjoining within range of shot from batteries which may be erected thereon—The general width of the river along this range of Hills appears to be from one to two hundred yards—the opposite shore (tho' more or less marshy) does not seem miry, & the banks are very easy of access—here the Battery under cover, on the hill No. West of Harlaem town is capable of scouring the plain is difficult to determine from this side, but it would seem as if the distance was too great to lie within the range of its shot on that part of the plain nearest the Creek before mentioned, & which is also nearest the height back of our old lines thrown up in the year 1776.

"It unfortunately happens that in the rear of the (continued) hill before mentioned there is a deep swamp, and the grounds, East of that swamp are not so high as the heights near Harlaem river—

"In the rear of this again is the Bruns, which is not to be crossed without Boats below De Lacy's Mills."—From Washington's journal pub. in Mag. of Am. Hist. (1881), VI: 123-24. See also the Military Journal of James Thacher, M.D. (1823), 321.

Vol. Krafis records that the combined forces of the "Rebels" and French, in whole columns, came marching over, where Independence had been, and "up towards us," in different divisions. From Laurel Hill a few shots were fired from the fort with 24-pounders at the "Rebels" whereupon they immediately retired behind the height. Afterwards, Von Krafft saw several columns of the "Rebels" march off behind Fort No. 8 (just south of N. Y. University) to the end of "Morrisienig" but being terribly bombarded from Harlem, from "Shelnell-Hill" (Snake Hill), they were "soon retreating into the thicketes and returning again."—Von Krafft's Jour., 144.

This is one of the early references to Snake Hill, the rocky height now in the center of Mt. Morris Park, the name of which is taken from the Dutch "Slangberg," on account of the reefs which formerly infested it.—Riker, Hist. of Harlem, cited in 20th Ann. Rept., Am. Soc. & Hist. Soc. Pres. Soc. (1915), 195, where collated historical information regarding the mark is publishing including other references to "Shank Hill" from Von Krafft's Jour.

Wm. Smith has a visit from Gen. Arnold, who is "disgusted at the Inactivity of the Day."—Says we have here now 10,000 & odd rank & file of Regulars exclusive of Officers who may be near 2000 more. Yet Washington showed himself yesterday at King's Bridge & 'tis said in Morrisania. Sir H Clinton went out this morning at 3 but was back to dine at the Hill formerly Mortier's.

"He disapproves of L.A Cornwallis's Stay in Virginia with 2000 Men. He advised his going with 4000 to Alexandria & Baltimore and the Head of Elke—Offered to meet him at either Place with 1500 more by Water—Would by this Time have ousted the Congress at Philadelphia."—Wm. Smith's Diary (M.S.), VII.

"The comnons Wind-Mill, with six lots of ground adjoining, situated near the One Mile Lane, & fronting the Bowery Lane, is offered for sale."—N. T. Merc., Jl 23, 1781.

"The Pontoonos carried to King's Bridge but the Rebels who were yesterday at Morrisania are fallen back.—We took up the Bridge on Sunday—What conduct!"—Wm. Smith's Diary (M.S.), VII.

A letter written from New York contains the following: "The French and the Rebels have lately made their appearance before our lines; but four days ago they fell back towards the White Plains. They industriously propagate through the country that they intend to attempt New-York, which I do not believe. Washington, perhaps, is willing to make a desperate push, but he cannot have the least hopes without the assistance of the French; and we do not think they are ripe to knock their heads against a wall, to please their new Confederates, with whom we are well assured they are upon very indiffernt terms.

"Those here, who are best informed, entertain not a doubt, that a prudent conduct on our part, must ensure success. However justly odious the leaders of the Rebels are on account of the miseries that have brought on their country, we must, in candour, allow them profound capacity, and onemintrary industry."—Livy's Hist. Ec. Part (London), 1781, 1782.

Congress again resolves (see Ja 3): "That it appears to Congress [from report of a committee headed by Elias Boudinot] that a very large number of marine prisoners and citizens of these United States, taken by the enemy, are now close confined on board prison-ships in the harbour of New York: "That the said prison-ships are so unequal in size to the number of prisoners, as not to admit of a possibility of preserving life in this warm season of the year, they being crowded together in such a manner as to be in danger of suffocation, as well as exposed to every kind of putrid and pestilential disorder.

"That, therefore, the Commander in Chief [Washington] be, and he is hereby, instructed to direct the supplying the said prisoners with such provisions and light clothing, . . ."—Jour. of Cong. (ed. by Hunt), XXI: 829-30; Recollections of the Jersey Prison-ships: from the original Ms. of Capt. Thomas Dring, by A. G. Greene (ed. by Dawson, 1865), 171; Dandridge, Am. Prisoners of the Rev., 402. See, further, Ag 21.

The following letter is written by a prisoner on the "Jersey" prison-ship ("vulgarly called Hell"): "... Our ship's company is reduced to a small number (by death and entering into the British service) of 19. . . . we bury 7, 7, 8, 9, 10, and 11 men a day, we have 200 more sick and falling sick every day the sickness is the yellow fever, small-pox, and in short everything else that can be mentioned. . . . our morning's sanitation is, 'Rebels! turn out your dead!'"—Penn. Packet, S 4, 1781.
The Iconography of Manhattan Island

"The Fleet of German Troops (1800) arrive from the Weser—Aug. 15, 1802. First Letter of Trumbull of 32 Guns taken by the Iris (Capt. Dawson) formerly the Hancock and several other Prizes.

"These Troops change the Condition of Affairs. Washington & the French must abandon W. Chester. They hoped to induce us to draw off Part of Lt. Cornwallis's Forces—Of this they have now no Prospect—I am at a Loss what Veil they can invent to pacify the People who have been inspired by the Production of this Letter and the whole of the above refers to the Highland Forts. Hardly believe on Account of Contemplation. What Disgrace if they fall back—one Army to the Mountains & the Rest to Rhode Island!

Sir H. C. ought to muster in the River & acquire the Credit of forcing them to retire. He should more send 3000 Men to the Delaware to meet Cornwallis at the Head of Elk if the Earl is determined I doubt his attacking any Thing. Mr. White says he apologized for not going out with a Part of his 12000 by his Dread of a Party by Water to burn this Town.

Sir H. is a distress'd Man. Drummond the Auditor has shown his Expenditures greater than Howe's with a larger Force. A Board of Enquiry of Genl. Robertson, Birch Earl of Lincolln [Sir] Patterson General Campbell from Pensacolla—Elliott & White. What hinders our landing any where at Philad: Boston Providence New London or any other Place where are Stores? Sir H now commands here 10000 Virginia 3 Thousand & above 4 Thousand in Sth Carolina—in all 17000."—Wm. Smith's Diary (MS.), VII.

A letter reaches Washington from De Grasse, stating that he will sail directly for the Chesapeake. Washington decides to cooperate with him there against Cornwallis, instead of making a descent upon New York (with the expected help of the French fleet under De Grasse) for the purpose of taking the city from Sir Henry Clinton, whose forces are weakened by detachments to the southward.—N. Y. City during the Am. Rev. (1881), 177, footnote.

"General orders are now issued for the army to prepare for a movement at a moment's notice. The real object of the allied armies [in the present campaign] becomes a subject of much speculation. Ostensibly, an investment of the city of New York is in contemplation—preparations in all quarters for some months past, indicate this to be the object of our combined operations. . . .

General Washington and Count Rochambeau have crossed the North river, and it is supposed for the purpose of reenforcing the enemy's posts from the Jersey shore. A field for so extensive encampment has been marked out on the Jersey side, and a number of ovens have been erected and fuel provided for the purpose of baking bread for the army. . . .

The royal army at New York, have received a reinforcement of three thousand Germans from Europe" (see Ag 11).—James Thaxter, M.D., A Military Journal (1831), 342.

"I have often said," says Smith, "a very succinct Review of this Campaign. I wish'd to have censured less & have studied to avoid it, as far as consisted with Fidelity to the Public. I mean to send a Copy to Eden & another to Tryon that one or other may reach the Cabinets. My Views are to prevent a Dereliction of the Colonies or any Part of them from Want of Success by shewing it inequitable to erroneous Plans or a shameful Inactivity. I have faulted Lord Cornwallis Idea with Tenderness. I know not how to spare Sir H Clifton. It is from my Disapprobation of his Conduct that I do not avail myself of the openings he gives for an Acquaintance that would grow into Confidence—I am satisfied that he is a Trifler jealously & dominering. Our Neighbourhood has brought me to the knowledge of his Family—Not a Man of Business or Entertaining them. They are only to make a use of their Genl for their own Interests. I allude to Oliver De Lancy Jun his Adjut General Capt Stapleton & Bihy assistants to De Lancy Col Croshie Barrack Master Genl Smith his Chief Secy Capt Russell & Major Phillips Deputy or Assis Secretary Ld. Dalrymple Col. Braw Col. Watson Aid De Camp. Of all these there are but 1 that has the least Pretension to genius or Learning (Watson) but he has rather taste than Strength of Mind & none of the Lott seeks Information. Their Principal I understand gives himself to such Guts of Passion that No Gent of Spirit and Independence will long continue in his Family—I don't find any of the Generals to have his Confidence—Arnold says they all complain. Hillegas & Robertson are most attended to—the latter thinks very poorly of him—The former holds Tongue for his Interest affects to conceal his Connection with him—Poor Sir Henry! His Want of Parts renders him insensible of his Dangers—He is Civil to me as a Neighbour & don't wish a more intimate Connection, because it cannot be useful to the Public & may hamper me. It is long since I have visited him."—Wm. Smith's Diary (MS.), VII.

For a copy of Smith's "succinct Review," endorsed "Review of Operations in 1781 to 15 Aug," lacking, however, the first pages, see Wm. Smith's Papers (MS), folio 212.

"Able to direct the object of congress of Aug. 3 (9th, 10th, & 11th.)—Wm. Smith cites to Commodore Affleck proposing that our Commissary-general of prisoners, or any other officer, who shall be agreed upon, shall have liberty to visit the ships, inspect the situation of the prisoners, and make a report, from an exact survey of the situation . . . whether, in his opinion, there has been any just cause for complaint."

In his reply, dated at New York on Aug. 19, the commodore stated, among other things: "The Government having made no other provision for naval prisoners than shipping [prison-ships], it is impossible that the greater inconvenience, which people on board ships experience beyond those confined on shore, can be avoided, and a sudden accumulation of people often aggravates the evil. But I assure you, that every attention is shown that is possible, and that the Prison ships are under the very same regulations here, that have been constantly observed towards the prisoners of all nations in Europe. Tables of diet are publicly affixed, officers visit every week, redress and report grievances, and the numbers are thinned as they can provide shipping, and no attention has been wanting to send an officer fit to correspond to the lines for that purpose, he will be conducted to me, and he shall be accompanied by an officer, and become a witness of the manner in which we treat the prisoners. And I shall expect to have my officer visit the prisoners detained in your jails and dungeons in like manner, as well as in the mines. . . ."

"Recollections of the Jersey Prison ships from the original Mss. of Capt. Thomas Dring, by A. G. Greene (ed.) by D'Abens, 1863, 412; all these papers have been lost and the Naval Prisoners, 1909; S. Dandridge, Am. Prisoners of the Rev. 1404-6. For Washington's later observations, see D 27.

"Our situation reminds me of some theatrical exhibition where the interest and expectations of the spectators are continually increasing, and where curiosity is wrought to the highest point. Our destination has been for some time matter of perplexing doubt and uncertainty; bets have run high on one side, that we were to occupy the ground marked out on the Jersey shore, to aid in the siege of New York, and on the other, that we are stealing a march on the enemy, and are actually destined to Virginia, in pursuit of the army under Lord Cornwallis. We crossed at King's ferry, 21st instant, and encamped at Haverstraw. A number of bateaux, mounted on carriages, have followed in our train, supposed for the purpose of conveying the baggage from New York."—James Thaxter, M.D., Military Journal (1831), 323.

On the 29th, the army resumed its march, and passed rapidly through Paramus, Acquackack, Springfield, and Princeton, passing all the enemy's posts, and pursuing a route, with increasing rapidity, toward Philadelphia. "Our destination can no longer be a secret. The British army, under Lord Cornwallis, is unquestionably the object of our present expedition."—Ibid. 232-24.

"In an interview with S't Henry Clinton this day he held that the French were 5000 & Washington 7000. He said a late letter of Genl Parsons's said the Rebels dealt out 10,000 Rations—He allowed for 3000 less. The Rebels had no women. But I recollect that Parsons made both armies 8000 as Henry Van Schack had in a letter to me. In July of last year he & Cundy 14,000 & Banks, David Spread, and the Naval Prisoners (1909), 21; Dandridge, Am. Prisoners of the Rev., 1404-6. For Washington's later observations, see D 27.

On the 21st, the army returned its march, and passed rapidly through Paramus, Acquackack, Springfield, and Princeton, passing all the enemy's posts, and pursuing a route, with increasing rapidity, toward Philadelphia. "Our destination can no longer be a secret. The British army, under Lord Cornwallis, is unquestionably the object of our present expedition. . . ."—Ibid. 232-24.

S't Henry Clinton.
1781 War for his own Interest. He wants me to signify Home his Impatience his Ideas & his Overtures."—Wm. Smith's Diary (MS.), VII.

28 Sir Samuel Hood came to the Hook last night from the West Indies with 14 Ships of the Line several Frigates & 3 Regts said to be 2000—We have then here 17000 men.

"Transports preparing for the Embarkation of 4000 Troops with a Hospital Ship by to morrow morning."—Wm. Smith's Diary (MS.), VII.

29 Thos. Mcmillan advertises a bull-baiting to take place on Aug. 30 "at his house, the sign of his present Majesty, near the fresh water pump." He states that "The Bull is active and very vicious, therefore hopes the spectators will have satisfactory diversion."—Royal Gaz., Ag 29, 1781. Cf. Je 20.

"The Town much agitated this morning because No Troops are in Motion to stay the Progress of the Rebels Southwardly. No French Fleet in the Chesapeake last Sunday.—Ours can't leave the Hook yet for Head Winds ever since the Night before last."—Wm. Smith's Diary (MS.), VII.

"The great secret respecting our late preparations and movements can now be explained. It was a judiciously concerted stratagem, calculated to menace and alarm Sir Henry Clinton for the safety of the garrison of New York, and induce him to recall a part of his troops from Virginia, for his own defence; or perhaps having eyes on the attempt to capture him, provided by the arrival of a French fleet, favorable circumstances should present. The deception has proved completely successful, a part of Cornwallis' troops are reported to have returned to New York. His Excellency General Washington, having succeeded in a masterly piece of generalship, has now the satisfaction of leaving his adversary to ruminate on his own irritating situation, and to anticipate the perilous fate which awaits his friend, Lord Cornwallis, in a different quarter. Major General Heath is left commander in chief of our army in the vicinity of New York and the highlands, and the menacing aspect of an attack on New York, will be continued till time and circumstances shall remove the delusive veil from the eyes of Sir Henry Clinton, when it will probably be too late to afford succour to Lord Cornwallis. To our officers, the inactive situation of our army in New York is truly deplorable; they might without risking a great deal, harass our army on its march, and subject us to irrepiable injury; but the royalists are more dexterous in availing themselves of treachery and insurrection than in effecting valorous achievements."—James Thacher, M.D., Military Journal (1883), 334. This journal gives particulars of the operations of the American army to the southward, including the siege of Yorktown, Virginia.

Among the original papers in the possession of the Mercantile Library Asan, which were published in 1861, is one partly in the autograph of Sir Henry Clinton presenting some of the circumstances which induced him to permit the allied forces of America and France to proceed from the North to Virginia, without interference on the part of his own army, which was cast upon him after the capture of Lord Cornwallis at Yorktown.—N. Y. City during the Am. Rev. (1861), 177-84.

Smith writes: "Reports from Jersey last Night that the whole Rebel army are still moving South. . . Some say the Southern Delegates carry the Sway in Congress & that Washington moves South ap'd his own Opinion."—Wm. Smith's Diary (MS.), VII.

Concerning the British regime in New York, Smith writes: "There is no Spirit of Enterprise—The general Dulness kills the Spark that happens to rise in the Mind of any Man. Washingtons present movem't from the Hudson is the severest Censure upon the British Commanders in this Quarter I almost doubt whether Arnold will not be stop'd, for the very Reason why he should go on. . ."

"This is the 5th Day since Arnold was Notified of his Command ap'd New London—He is not gone yet—Detachment from Robertson's & Skinner's Battalions passed thro' Flat Bush towards White stone but yesterday. Shameful Delays! The Design was known to the Town yesterday—The Wind fair & strong since Saturday afternoon. Some of his Force is now imbaring."—Wm. Smith's Diary (MS.), VII.

Smith writes that a "Message Boat from L4 Cornwallis" tells us that "a French Fleet arrived there [Virginia] on Thursday 30 Aug 25 Ships in all—17 of them of the Line... How well Sept. timed Sir Saml Hoods arrival here 27 Aug [see Ag 28]... A 4 week will decide perhaps the Ruin or Salvation of the British Empire... It is said in [Clinton] intends for the Chesapeake on the first News—but this is strange! If our Fleets be better he can't go—if they get the Victory he will not be wanted."—Wm. Smith's Diary (MS.), VII.

Rivington publishes a long contribution from "A Friend to America and to Peace," who discusses the overtures made to congress by Lord Drummond in January, 1776, and suggests terms for a new negotiation. In the course of this, the writer refers to "the finest set of BOTH Vol. I., the Hoves—see JL 14, 1776," who neglected to unfold to the people of this country at large, the liberality of the government, which they were authorised to publish, and which if divulged had prevented the falsities of that day from imposing as they have done, upon a heated and credulous multitude to the ruin of a country that from that morn might have enjoyed peace, and before this time been rendered the envy of the world."—Royal Gaz., S 8, 1781.

This article was contributed by William Smith to whom Rivington wrote on Sept. 50: "Having a visit from the A's G谁 informed me that the manner in which the Hoves were mentioned, in the long piece respecting pacification, had given disgust, & being directed to discontinue such freedoms, is the Reason why it does not more could be contended as to well may be thought to militate against them I will get it into Wednesdays."—From original letter preserved within Wm. Smith's Diary (MS.), VII.

A council of war is held at New York to determine "how to convey the most effectual relief to the brave Cornwallis." It is unanimously agreed that "a general and vigorous attack should be attempted by sea, and that the British fleet should leave Sandy Hook on or about the 15th of October for that purpose." Gen. Clinton is to go in person on the expedition with 5000 men from New York. The sailing of the fleet is deferred a month because "before the 15th of October there will be a great risk in getting over the Bar," and Lord Cornwallis has notified Clinton that his provisions will last until the end of October.—Lloyd's Eve Post (London), N 7-9, 1781.

An item of news from Cape Henry says: "Admiral Digby is most assuredly arrived off the Hook with one ship of 90 guns, and two of 74. The reports (from them) say he left England [see Je 19] with six ships of the line, six frigates and 100 transports, for America: but some advances the Admiral received at sea, made it necessary for him to come on with three ships, leaving the transports under cover of three ships and six frigates."—N. Y. Merc., O 8, 1781. See, further, S 26.

Smith writes: "Arnold did not return till yesterday afternoon from New London owing to Head Winds—It is a bad Symptom that the Army think their Loss greater than the Rebels. G [Robertson] talks in this pitiful Strain—He is a Dotard & abandoned to frivolous talk and parties of Girls in the Fort Garden, the Mist of his own Fears, and the Anxieties of this Hour."—Wm. Smith's Diary (MS.), VII.

News reaches New York, writes Smith, "That De Grasse got out of the Chesapeake before our Fleet arrived & had been joined by Barras. That then they were 24 of the Line & had left a Ship or two Frigates as we suppose in the Chesapeake. That our Van had attacked their Rear & Center coming out 6 Guns—and were left in Chace of them 4 Days ago to 15s, the French making for the Chesapeake others say N[ew] Eng[land]. This near Carituck Inlet S: of Cape Henry."—Wm. Smith's Diary (MS.), VII.

Smith is informed that Cornwallis, on Aug. 22, at Yorktown, "had Provisions for 10,000 Men for 62 Days—He must have great Helps from the Country besides. We need not be anxious on this Account till in October."—Wm. Smith's Diary (MS.), VII.  See O 19.

A Committee is appointed to examine the patents, deeds, and other papers belonging to Trinity Church with a view to having them properly recorded, as "many of the Public Records are removed from this City," and it is feared "some accident may prevent their being lodged again in their respective Offices."—Trin. Min. (MS.). A further record under the same date is: "By widening Vesey Street two Vaults belonging to Mrs. Mary Ten Eyck & Mr's Jauncey are left without the Church fence of St. Pauls."—Bos. See My 18, 1784.
John Amory, who for a few years was proprietor of Montague's tavern on Broadway south of Warren St., offers the place for rent.

He describes it as the "House and Gardens ... pleasantly situated in Great-George-Street, opposite the Artillery Park." 

"Furniture to carry on the business will be sold. The situation and convenience of the house and gardens are so well known as to render a further description unnecessary."—N. T. Merc., S 17, 1781. See O 22.

"From Perth, in North-Britain," notifies the public that he has removed "from where he lately lived near the Merchants Coffee House, to the sign of the Indian King, No. 69, in Cherry Street, near the Ship-Yards."—N. T. Merc., S 17, 1781. See Ap 19, 1779.

Von Krafft is on active duty in "dining room of Jones House."—Lett's Krafft's Jour., 1790.

Pettigrew, "From Graves's Line of Battle Ships come up from the Hook into the North River to refit."—Wm. Smith's Diary (MS.), VII.

William Smith, writing to Gen. Tryon, says: "The French Adm\(^1\) has been too cunning for Rodney and is come with his whole Fleet to the Chesapeake where the Enemy had last Monday 32 sail of the Line. The Armies that passed us un molested had not got down—The Force already collected there 3000 French 2000 Contis\(^2\) & month's men & 4000 Peasants of the neighbourhood"

"Digby Digby is the Cry—If he arrives to morrow Graves who has 10 Ships refitting in our Harbour will not be ready to sail in some Days And every Hour is precious to Lord Cornwallis tho' his Provisions will hold out for 6 Weeks it was clear that the Fleet will undertake to give him the intended Succours or if they will not that we shall make our Activity in this Part of the Cont\(^1\) counterbalance for our Losses elsewhere And the Enemy's thirst for Peace be equal to our own—My Zeal and perhaps my Ignorance would incline me to march with 10,000 Men to Philad: for the Destruction of every Thing useful for Commerce or for Arms except the Cattle of the implacable Foe wanted here. And if it should please God to give L\(^3\) Cornwallis the Glory of saving the Empire such Services would not deserve Censure . . ." In a postscript he adds: "To our unappreciable Joy Digby is at the Hook of Clock P M—All well—The Presence of the Prince may supply our Deficiency.—"Wm. Smith, MS., folio 194. The "Prince" was William Henry, the third son of George III.—N. J. Gaz. (Trenton), which paper gives the date of his arrival erroneously as Sept. 25.

Prince William Henry was "the first of royal lineage" to visit this continent.—Penn. Packet, O 4, 1781. On the death of George IV, in 1830, he became King William IV, reigning until 1837, when Victoria became Queen.—See "Roster of a Republic's Royal Gentlemen," Times Mag., Aug. 24, 1910.

Prince William Henry arrives in the city, "accompanied by the Honorable Admiral Digby; he was received at landing by his Excellency the Commander in Chief, accompanied by the Governor, the Admirals, Generals, and other great Officers of the Crown, conducted to Commodore Affleck's where his Royal Highness dined, and in the evening retired to apartments provided for his accommodation in Wall-street.—"Royal Gaz., S 29, 1781. See also N. Y. Merc., O 1, 1781.

Smith says that the prince, on landing, was "received by Sir H Clinton the Govt \(^4\) Robertson \(^5\) & Crowd behind Kennedy's House at the North River—They led him on Foot to Commodore Affleck's where he dined with Adm\(^1\) Digby & two Gen\(^2\) in the Interim walked in to town to Wm. Smith's Diary (MS.), VII.

"The Prince walked thro' a Part of the Town with Sir H Clinton & his Family with crowds after him whose Curiosity he had gratified all the Morning at the Window. He dined this Day with Sir Henry & went Home at 9 in the Evening."—Wm. Smith's Diary, VII.

The age of Yorktown begins. For particulars, with maps, see Wistar, VII, 501, 517, 570-72. See, further, O 1781.

Wm. Smith writes of the events of this day: "I was called to the Govt's at 7-8 settled a new Draft of an Address wrote by Gen\(^1\) R after some Conversation with Adm\(^1\) Digby who was fearful of bringing the Prince into too much Notice for the King's Instruction—it was in Part composed of my Draft, but I think a better came after we had settled it—marked but one Alteration which we would not suffer. While we were together Gen\(^1\) Oh: De Lancey & Roger Morris came . . . according to appointment for S OC and after that others of the Council to whom it was read as they entered but no Man Objected—Two Copies were ordered & one sent to the Prince—At 10 o'clock we went with the Govt \(^4\) & were called up & introduced at the Head of the Stairs to Adm\(^1\) Digby who brought us in to the Prince who had Sir Sam\(^1\) Hood with him. The Passage all thro' was lined with General & other Officers of the Army & Navy waiting to be introduced.

"The Prince stood at the Right of the Fireplace with a Paper in his Hand & up at his Breast and bowed as we entered. Digby was at his right Hand a little behind. Gen\(^1\) Robertson advanced & took out the Address, but not having Spectacles got thro' with great Difficulty. The Prince then read his Answer—After which the Govt named several as we stood on his Right & down to the Bottom ending with the Mayor & Gen\(^1\) De Lancey—on this he bowed & retired & we did severally—"After the Introduction of the Officers the Prince rode out in a Phaeton with Adm\(^1\) Digby to see the Island conducted by Col\(^0\) Watson Col\(^0\) Bruce and came back at 5—4 the Govt \(^4\) was to have attended to show the Way to his House, thro' a Double Rank of Militia down Wall St & thro' the Square & he had scarcely left Home before the Prince came in the Gen's coach—when apprized of the Intention to gratify the Militia & People he consented to walk up to his Lodging & back again as they did uncovered all the Way in a very hot Sun. I was at that Time in the House with the Adm\(^1\) Digby Hood Drake, the Council & other Guests for that Day's Dinner."

"At 7 the Prince rose after Coffee on a Nodd from Adm\(^1\) Digby & took Coach to the Fort where he walked the Ramparts a while & then proceeded to Whitehall where he embarked & was carried to the Ship Prince George and thus ended this Day.—The Prince drank down the left Wing of the Table but few Gen\(^1\) drank to him or others except those near them & there was no hightoned Conversation. He spoke a good deal to Gen\(^1\) R & Gen\(^1\) Kniphauses & always to the latter in French & accent it very properly—André was a Part of the Conversation but I heard very little of his Voice being far too bredable. I heard not a word of Kniphauses.—No man elevated his Voice so much as Sir Sam\(^1\) Hood a Native of Shropshire but the Image of a Yank\(^0\) Col\(^0\) both in Person & stiff Behavior."—Wm. Smith's Diary (MS.), VII.

The text of the address, published later, is as follows:

"The humble Address of the Governor, his Majesty's Council, and Inhabitants of New-York, May it please your Royal Highness, To permit me with the Members of his Majesty's Council, to hail your auspicious arrival on the American Shore.

"At the same time suffer me to express the Congratulations which all the Inhabitants by their Chief Magistrate, have commissioned me to convey to your Royal Highness.

"On the report of your coming [see J 19], we felt our obligation to our gracious King, for this new and signal proof of his regard. Your Royal Highness's appearance augments our gratitude, by improving our idea of the extent of his goodness.

"Your presence animates every loyal breast, the glow in our own, persuades us you are formed to win every heart; a Rebellion that grew upon prejudice, should sink at the approach of so fair a representation of our Royal Virtues.

"But if a misled faction, not to be vanquished by goodness, persists in the war, every man of spirit will be proud to fight in a cause to which you expose your life.

"May your Royal Highness bring an accession of glory to that distinguished family from which you are descended; and who, as patrons of Liberty, and the Protestant religion, have spread Blessings among Nations.

"The prince's reply was as follows: "Gentlemen, I beg you will
CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

1781
Sept. 28 receive my best thanks for your attention to me, and congratulations on my arrival in this country, which I shall certainly take the first opportunity of making known to his Majesty. I desire you will accept of my best wishes for the prosperity of America in general, and this Province in particular. —N. T. Mer^, Oct. 1, 1781.

2 William Smith writes of "agreeable Intelligence" concerning the provincial records. He says the captain of the "Warwick," at his late departure from Plimouth," received two boxes, but "no orders concerning them for he would find here—No intimation of his going on the arrival here; he has taken them to sea on his late convoy of the Detachmen" with Baron Riesdel to Canada—Supposed to be rats at sea by then, or "found they were books of records & had mentioned the boxes to Gen^ [Roberts- son]. He wished he was rid of them.

"I called in the evening at the Deputy Secretary's (Bayards) and as he was in the Country desired his Father that he might be sent for in the morning to attend the receipt of the boxes lest they should be carried out again to sea and lost"

"Now the Gov^ tells me Sir Sam^ [Hood] says that he left records of this Province at Portsmouth at his last coming out to reinforce Rodney—Sir Sam^ had been a Commissioner of the Navy at Portsmouth and on orders being issued to clear out the Eagle it was reported to him that there were Boxes on board which they knew nothing about—He discovered they were N. Y. Records & wrote to London for directions but never had any Answer to his Letter or Letters. The Gov^ asks me what these can be and what he ought to do for their Safety."

"I replied that these must be the Papers now in the Warwick she having sailed from Portsmouth since Sir Samuel left it. Capt^ Eflinestone says they are large Boxes & Mr^ Tryon did not take more from Bayard in 1775 than two Cargo Boxes would contain. Maj^ [Hop.] has been to Bayards to tell him about the Warwick for these Boxes, but he is not yet in Town & I advise the delivery to his Clerk, for Fear of the Warwick's Sailing"

"I now conjecture that before the Asia Sailed Home, Capt^ Vandeput delivered his Records to Lt^ Howe's order on board of the Eagle at this Port & that his Lordship had them there till his Return in the Fall 1778 that he left them on board nor afterwards touched a word about them. What Shameful Carelessness!" These important Papers have been exposed to every Risk in the Delaware & Chesapeak & afterwards when he followed D'Estaigne to Rhode Island. —Were in the Storm that happened in Aug^ 1778—

On the next day Smith added: "Called at Mr^ Bayards. He has all the Books of Records he delivered to Gov^ Tryon in 1775, except the Celebration of Independence on that Day. These returned are 24 Vol^ They have suffered by the Damps, but I believe no part of the writing is lost—Some of them must be transcribed for common resort—An act of Assembly may be proper to authenticate Transcripts. If the volume of Indian Cessions is lost 'tis the one least Material to the public."—Wm. Smith's Diary (MS), VII. Rivington "congratulates the public," on Oct. 3 (q.v.). Bayard made a report to Gov. Robertson regarding the receipt of these records, on Apr. 10, 1781 (q.v.).

John Jacob Heilmeisen, the Hessian judge-advocate at New York, publishes a "Notification" that, as "His Most Serene Highness the Landgraff of Hesse" has approved the sentence of the courts martial, the decree has been carried out which required that the "persons (mentioned by name with the names of their regiments) he hanged for treason and desertion to the enemy, and that their effigies be hanged, with their names and crimes thereunto marked, till their persons (now absent) shall fall within the reach of Justice." These effigies, the notice states, are actually hanged on the gallows at New-York and Fort Knyphausen."—N. T. Mer^, Oct. 8, 1781.

Rivington "congratulates the public, and especially the inhabitants of this Province, upon the King's gracious restoration of General Tryon's care and vigilance, secured on board the ship Dutchess of Gordon, at anchor of November, 1775" (see Dec 6 and 9, 1775). He states that a mob, headed by Wm. Sears, was about to seize "that inestimable treasure" in the secretary's office, and take it to New England; but "General Tryon [then governor] caused such of the books to be selected as put it out of the power, of almost every land-holder without recourse to evidence in a court of Law" of the title to his estate; and these were brought off in strong boxes under lock and seals. They were carried home to England, in 1778, and lately sent back in one of the King's ships to their ancient deposit.

"The residue, or general mass of papers, are among the rebels, having been first conveyed by order of the Provincial Congress to Kingston, in Ulster county, Mr. Bayard the Deputy Secretary was with them, and watched over them, 'till the violence of the times wrested them from his hands and consigned them to others above three years ago; since which, they have been exposed to a perilous transportation from one place to another in carts." After referring to the possible "mischief" and "wild confusion in property" had Sear's project succeeded, Rivington states that the records are at present in the hands of Mr. Bayard, at the Secretary's Office."—Royal Gaz., Oct. 3, 1781.

Commenting on this, Wm. Smith says: "Rivington inserts this Day a Congratulation of the Public on Receipt of the Records, which I drew to show the Landholders, that the Crown had a mortgage upon the Province for her Return to her Fidelity.—It hints obliquely at the Necessity of Recourse to thence to prove their Titles and assents that Care will be taken to prevent their falling into the Hands of the Usurers. It may also set the People at any Project for burning this Town."—Wm. Smith's Diary (MS), VII.

Gen. Arnold asserts to Wm. Smith "that the Adjut^ General has informed him that there are now here above 10000 Rank & file—Take out 5 for the Chesapeake there will be 5 left with Officers above 9000. Sir H [Clinton] did not produce his Letter but got him to declare his objects saying the Letter was mislaid. General [Roberts- son] made the Objection of Danger to N.—Sir H help'd by stating his Force here at but 11,000 which Arnold denies to be the Truth."—Wm. Smith's Diary (MS), VII.

Chief-Justice Smith is one of the guests dining with the prince and Admiral Digby on board the latter's ship; he writes that he "had every advantage to hear & mix in the Conversation," and that he was "very well" of his [i.e., the prince's] Genius & Information as well as of his Manners—He is very sprightly and inquisitive."

Wm. Smith's Diary (MS), VII.

The quarterly meeting of the Marine Society is held at "He- wet's Tavern, on Hallet's Wharf."—N. T. Mer^, Oct. 8, 1781.

Maj. Oliver de Lancy, of the 17th Regiment of Light Dragoons, is appointed "Adjutant-General of the forces in North-America, vice John Andez." He is also promoted to be a lieutenant-colonel.—N. T. Mer^, D 24, 1781.

In a circular letter addressed to the governor of New York, Robert Morris (see F 20) explains in detail the measures taken to secure financial aid from abroad and the difficulties there met with. He says: "People have flattered themselves with a visionary idea that nothing more was necessary for Congress than to propose a subscription abroad, and that immediately he would get as much money as he chose to ask for. That when he opened a loan, hundreds would run to see who would have the honour of subscribing to it, and the like, but surely a moment's reflection should have convinced every reasonable man that without the clear prospect of repayment people will not part with their property. Have the efforts to borrow in this country been so successful as to ground any hopes from abroad? Or is it to be supposed that foreigners will interest themselves more in our prosperity or safety than our own citizens? Or can it be believed that credit shall be given abroad before solid funds are provided at home? . . .

The Congress confinable to the public wish have appointed ministers, requested grants, and opened loans. Gorfolk in the month they had got nothing, and in Spain but very little. Loans were expected from individuals in Holland, but nothing of that sort has been or probably will be obtained. . . .
Our fleet, which received considerable damage in their spars and rigging in the last engagement off Chesapeake, are now perfectly refitted. Upwards of 3000 troops are embarked on board of the men of war, and wait only for a fair wind to sail to the assistance of our Southern Hero. Gen. Clinton goes with them; for he always accompanies the grenadiers and 42d regiment. There are three ships of 90 guns, 16 of 74, six of 64, and two of 50, besides frigates. The whole of these have for three weeks past been lying in our harbours.

The Americans defeat the British at Yorktown, Va. The formal surrender is made by O'Hara, in the absence of Cornwallis, to Lincoln, the representative of Washington.—Winar, VI: 504. Articles of capitulation are settled between Washington and Cornwallis, and an interchange of notes regarding terms of surrender.—N. J. Jour., O 13; N. T. Merc., N 5, 1781; Jour. of Hugh Gaine, II: 35. A letter from Cornwallis, written at Yorktown on Oct. 20, to his commander-in-chief, Clinton, describing the battle and his capitulation, was published in the N. T. Merc., N 26 (9 v.)., one week after Cornwallis himself appeared in New York on his return from Yorktown. See N 19. The British army became prisoners of war, subject to the ordinary rules of exchange. The only delicate question related to the American loyalists in the army, whom Cornwallis felt it wrong to leave in the lurch. This point was neatly disposed of by allowing him to send a ship to Sir Henry Clinton, with news of the catastrophe and to embark in it such troops as he might think proper [see O 31] to lead to New York, and no questions asked.”—Fiske, American Revolution, Vol. II: 398.

On this very day, Admiral Graves's fleet, with Sir Henry Clinton on board, sails from New York to relieve Cornwallis; it was hooked to start a week earlier.—Wm. Smith's Diary (MS.), VII. The news of the surrender reached New York on Oct. 24 (9 v.). Anbury wrote on Oct. 30, that "When the British fleet left Sandy Hook [for the Chesapeake, to relieve Cornwallis], Gen. Washington had certain intelligence of it within forty-eight hours after it sailed, although at such a considerable distance as near six hundred miles, by means of signal guns and alarms. A very numerous rebel in New York, from the top of his house, hung out the signal of a white flag, the moment the fleet got under way, which was immediately answered by the firing of a gun at a small village about a mile from our post at Paulus Hook; after that a continual firing of cannon was heard on the opposite shore."—Anbury, Travels through the Interior Parts of Am., II: 545.

"The London Fleet" arrives at the Hook and "brings Provisions for 30,000 Men for 6 months."—Wm. Smith's Diary (MS.), VII.

Cornwallis writes to Sir Henry Clinton of his surrender at Yorktown, giving a detailed account of the action. In extenuation he adds: "I never saw this post in any favourable light, but when I found I was to be attacked in it in so unprepared a state, by so powerful an army and artillery, nothing but the hopes of relief would have induced me to attempt its defense, for I would either have endeavoured to escape to New-York by rapid marches from the Gloucester side, immediately on the arrival of General Washington's troops at Williamsburg, or I would, notwithstanding the disparity of numbers, have attacked them in the open field, where it might have been just possible that fortune would have favoured the gallantry of the handful of troops under my command. But being assured by your Excellency's letters that every possible means would be tried by the navy and army to relieve us, I could not think myself at liberty to venture on either of those desperate attempts."—N. T. Merc., N 26, 1781. For Smith's comments on this letter, see N 24 and 26.

John Kirk, "who lately kept the Mitre Tavern in the Broadway," announces that he has removed to the "well known tavern in Great George street, opposite the Artillery Park. Keep'd by Mr. Musgrave, and lately by Mr. Amory ..." (see S 17).—N. T. Merc., O 22, 1781. Kirk signed by the sign of "H. R. H. Prince William Henry."—Royal Gen., O 27, 1781. For a history of Montagu's tavern, see Ap 5, 1754.

Congress assemble and listens to Washington's dispatch of the 19th announcing the victory at Yorktown and the articles of capitulation.—Jour. of Cong., III: 679.

A broadside is issued in Philadelphia granting permission to the citizens to "illuminate" in celebration of Cornwallis's sur-
render at Yorktown.—From an original in the N. Y. P. L. (Evans, Oct. 1789). On Oct. 25, news of the surrender was published at Newport in a broadside, a photostat of which is in the N. Y. P. L. (not in Evans).

"A man from Elizabeth Town" brings over prisoners (including one Gwinston Hamilton) who bring an account of Cornwallis's surrender. The news is received with astonishment. Hugh Gaine states: "I believed it, though many would not, and no further account being received thereof, the Report in some Measure was explained away."—*Jour. of Hugh Gaine*, II: 135. Smith says: "I give no Credit to but suspect it An Artifice to prevent the Insurrection of the Loyalists or some Operations on our Part."—*Wm. Smith's Diary (MS.), VII.*

25. The capture of Cornwallis is confirmed "by a Messenger from Staten Island."—*Jour. of Hugh Gaine*, II: 135.

The continental congress resolves "That the respective States be called upon to furnish the treasury of the United States, with their quotas of the eight millions of dollars for the war department, and civil list, the ensuing year; to be paid quarterly in equal proportions, the first payment to be made on the first day of April next."—*Jour. of Cong., VII.: 216. Not a farthing had been paid in on April 1st. The month having been declared above, a small sum of money from the public purse was contributed by Rhode Island and New Jersey.—*Ind. Gazetteer* (Phila.), Jl. 6, 1782; N. Y. Merc., Jl 15, 1782. William Smith, under date of July 15, cited the Mercury when he wrote: "No part of the Continent has raised a Farthing towards the Taxes of the Gov't but Rhode Island, Pennsylvania & Jersey."—*Wm. Smith's Diary (MS.), VI.* Smith must have learned from some other source about Pennsylvania's payment of a partial quota during the month of June (see *Ind. Gazetteer*, Phila., Jl. 20, 1782). New York's quota for the year was $32,589 "dollars," of which she had paid $900, up Dec. 1 (ibid., D, 21, 1782).

27. "The Bonetta Sloop of War, came up this Evening from Virginia, with a number of Refugees, who, we were afraid, had been given over to General Washington, as he refused to include them in the Capitulation [see O. 19]."—*Jour. of Hugh Gaine*, II: 136.

28. "In and near New York, Sir Henry Clinton has no less than four houses; he is quite a monopolist. At times, when he is visible, he is seen riding full tilt to and from his different seats; in this, he is the Ape of Royalty."—*Man. Com. Coun. (1780), 846, citing the Political Mag. (London), N, 1781.

29. Samuel Loudon spreads the following notice across the first page of his newspaper:

"BE IT REMEMBERED!

"That on the 17th of October, 1781, Lieutenant-General Earl Cornwallis, with above five thousand British Troops, surrendered themselves Prisoners of War to His Excellency Gen. George Washington, Commander in Chief of the allied Forces of France and America.

LAUS DEO!—N. Y. Packet (Fish-Kill), N, 1, 1781.

30. Samuel Bayard, Jr., receives from the ship "Warwick" three cases, containing all the books which, on Dec. 4, 1775 (q. v.), except that of Indian cessions to the Crown, had been ordered put for safety on board the Duchess of Gordon." For further particulars, see D 6 and 9, 1775; and also Ap 16, 1782 (the date of Bayard's report to Gov. Robertson on the subject).

31. The inhabitants of New York "are so affected by the defeat of Lord Cornwallis, that many merchants refuse to open the goods received by the last fleet; some will not even sell without ready money."—Letter from New York, in N. J. Jour. (Chatham), Ap 17, 1782.

32. Arnold shews me a Paquinande down this morning from the City Hall pertaining that he [Clinton] had sacrificed L.4 Cornwallis to his Envy."—*Wm. Smith's Diary (MS.), VII.*

33. "General Chnton came ashore at the Narrows yesterday, and dined at Roubaillé, with Some of his Suite this Day."—*Jour. of Hugh Gaine*, II: 176.

34. The fleet returns to the Hook. It is reported that "Washington & Rochambeau are going ag't Charles Town. ... Sir Henry came up on Monday [5th]."—*Wm. Smith's Diary (MS.), II., under date of N 8.

35. Sir Henry Clinton, writing from New York to Lord Germain, says: "Had it been possible for the fleet to have sailed from hence at the time it was first imagined they would have been able to do, I have not the least doubt that Lord Cornwallis would have been relieved, by the joint exertions of the navy and army."—*Lloyd's Post* (London), D 17–19, 1781. Smith writes in his diary: "Digby came up last Night having sent Sir S Hood away with 19 Ships. Thus ends a most inglorious campaign for I believe Sir H Clinton] means nothing, this year."

"The Disorders under the misrule of the Army add to Discontents for Neglect in the Operations of the War.

The Distresses are general and very great for want of Fuel. The Kings Barracks indeed are full, but the Civitas suffers. The main Causes are two. 1. The want of Guard Ships in the Sound & 2 The order forbidding any to come from Staten Island till the Garrison there is supplied. Thus the Innocent bear a Punishment that ought to fall upon the Staten Island Delinquent who should be made to perform what is most necessary to the Garrison.—I have spoken my mind on this Subject to General Robertson. But I said something coming to Town on Contract is seized & given to Favorites Mr John Livingston & JacobWatson have suffered by this Partiality."—*Wm. Smith's Diary (MS.), VII.*

36. "Brooklyn Hunt. The Hounds will throw off at Denyce's Ferry, at Nine o'Clock on Thursday morning. Dinner on the Table at Three o'Clock at Brooklyn Hall. A Guinea or more will be given for any Pea to describe the Agonies I endured prior to my Arrival here in June last, since which my personal Property has been confiscated, and my Family banished! for the Increase of my Distress in my Separation here from my Estate and Funds—"

"What I had in this Town I have indeed been put into Possession of by the Kindness of General Robertson, but it is with Truth an extreme Mortification, that I can assure your Excellency, it yields me no more than 14,400 Currency Pounds, so that I am every Day at Straights, for the bare Necessaries of Life to subsist a Family of Six adult Persons and Three Childern in all the Meaness of an unbecoming Economy—It does not become me to add what your Excellency will more easily conceive, than I can express, I will therefore say no more Sir than that unaccustomed to want, and in the intolerable Expensiveness of Living in this Garrison we have wanted even Fire to warm us, and with a Zeal for the Interest of the Crown and a Readiness to serve his Majesty by all the means in my Power, I cast myself and my distressful Family, upon your Excellency's Protection, for such Assistance as other Loyal Sufferers of Condition have experienced from your Goodness."—American Loyalists Transcripts. Memorials, Correspondence, &c., II: 214–15.

37. Rivington publishes a declaration of independence by Loyalists. It embodies part of the American declaration, but asserts their adherence to Great Britain.—*Royal Gaz., N, 17, 1781. It is reprinted in Van Tyne's The Loyalists, Appendix A.

38. A "Charity Sermon," it is announced, will be preached on this day in St. George's Chapel for the benefit of the "Charity School," which at this time "consists of 86 Scholars viz. 56 Boys and 30 Girls." The boys are taught "reading, writing, arithmetic and merchants accounts; the Girls—"reading, writing, arithmetic, and needle-work;—They are all annually Cloathed, and furnished with books, paper &. The School is visited once a month and the Children are carefully examined by a Committee, consisting of the Rector, and three or four Members of the Vestry of Trinity Church. When any of the Scholars are of age, and properly qualified, they are put out to suitable trades or services; and others are taken into their places."—*Royal Gaz., N, 14, 1781.

39. "Lord Cornwallis arrived this Morning from the Chesapeake, and had a Meeting with General Clinton."—*Jour. of Hugh Gaine*, II: 137. See also N. Y. Merc., N 26, 1781. Wm. Smith's observations are: Lord Cornwallis arrives & visits & dines at Head Quarters. He will sail in the Fleet to England before Christmas.

40. Many Officers come with him:—The Rebel Papers which I have seen up to the 14 Ins are below the usual Dealing of the Earl, & show that they are displeased at the Terms of Surrender. I perceive that a writer in one of the last admits the authenticity of the Letters now published by Rivington to be Deane's—"They republish those to Rob's Moris & Duer."—*Wm. Smith's Diary (MS.), VII.*
While England is anxiously waiting for news concerning Corn-
wallis, the following item appears in a London paper: "Nothing is
more likely than that the letters to and from General Washington,
which were intercepted by Sir Henry Clinton [see e.g., My 21],
were written for the purpose of being intercepted, and deceiv-
ing our General. The attack upon New-York, said in those letters
to be intended, was certainly nothing more than one of those feints,
so common in every war, which are calculated only to divert the
attention of the enemy from the place where the real attack is to
be made. . . . No more than 7000 men were employed to force
the strong lines round the head quarters, headed by innumerable
batteries, ships, and at least 15,000 regular troops: The whole was
clear a feint; and we have yet to learn by the next dispatches
from the Chesapeake, whether we have not reason to lament, that
the intercepted letters . . . served only to lull the fears of our Commander in Chief, for
every part of our army, except that which lay at New-York: These let-
ters begat security in the minds of our troops for every other post.
God grant that Lord Cornwallis be not the victim of that security."

"The letter of Cornwallis (see O 20) must offend—proves that
he disapproved of that Establishment! That he would not have been
found there if he had not relied on unperformed assurances
of Relief and how sharp the implied censure in talking of coming
to NY with that little Army since we could have March[ed] from
thence with 12,000 more!—Wm. Smith’s Diary (MS.), VII.
See also N 26.

"Lieut. Kraft establishes quarters "at the 5th mile stone,
below a tavern named The Dove."—Von Kraft’s Jour., 154.

The "disagreeable intelligence of the surrender of Lord Corn-

"From 12 till 4 P.M. on a visit to Sir H Clinton—He very
properly at Parting apologized for horing me so long, for he talked
almost in a delirious justification of his own Conduct & a Censure
of every Body else—Lord Amherst the Secretary of State Sir Geo:
Rodney Lord Cornwallis General Robertson Genl Knyphasten General Tryon Adm1 Arbuthnot Mr Graves the Fleet &c. &c. He is a distress’d man, looking for Friends and
suspicious of all mankind & complains of the number of his En-
emies—Believes the Ministers wrote the Paper which so severely
censures him and was published lately in the English Papers
with the Signature of Milo. He wished me to know what had
passed between him & Ld Cornwallis, & beg’d me to take the
Trouble of perusing the Correspondence which he would send for
that Purpose. . . .

"In talking of Lord Cornwallis’s Letter [see O 20] I could not
help observing to him that the impression it made was (1) that his
Lordship was out of a train of establishing an unfavourable
(2) That he was lost by a Promise of Aid not given & (3) Those
who thought well of him & that his little Force could have come
here, would ask why Sir H Clinton did not go to him with 10,
or 12000 Men. This touched him seriously & brought on a Con-
tinuation of the long Discourse in which he several Times said
he had a good Mind to call upon Lord C for an Explanation in
writing, with a View to its Publication here. He is very angry at
the Letter & says Robertson is abusing Lord Cornwallis very
freely—When he spoke of Robertson & Tryon he apologized to me
for taking Liberties with my Friends."—Wm. Smith’s Diary (MS.), VII.

"Lord Cornwallis, who arrived on the 19th (o.) makes his

of Hugh Gaine, II 138.

"Joseph Cordé, pastry cook and confectioner, "has re-commenced
making pastry," etc. at 17 Hanover Square. "Dinners or suppers
dressed abroad; he likewise will provide and furnish entertain-
ment."—N. Y. Merc., N 26, 1781.

"America, which the enemy to be independent of Great Britain,
says a London writer, "cannot be free, France has claims on her
which interest as well as ambition will induce them to think can
only be liquidated by a footing on the continent, and the old fable
of the Horse calling Man to his assistance against the Stag will
once more be verified. America must be blud and infatuated
indeed if they do not foresee the consequences from the French
connection."—Royal Gaz., Mr 9, 1782.

A letter from New York states: "Lord Cornwallis’s disaster
has indeeddranged our affairs"much; but this was done by the
French. The rebellion is still languid, and the King’s friends in
America are as numerous as ever, if not more so. I hope that
alliances will be formed in Europe to take the French off, in which
case the rebellion must infallibly sink."—London Chron., F 12–14,
1782.

A New Yorker writes: "We are under some apprehensions
here for the safety of the garrison of Charleston in South Carolina.
If we should meet with the same fate as York Town, in Virginia
America, it is to be feared, will be totally lost to Great Britain;
and if that be the case, it will be of no advantage to the Ameri-
cans; the French are only making a cat’s paw of these poor de-
duced people, to gratify their own thirst for domination. . . . The
French are already shewing them what they may hereafter expect;
for in whatever place the French army is, the French nation
only think of ravages. If a fortress is summoned to surrender,
it is always in the name of the King of France; and when taken,
French colours are immediately hoisted."—London Chron., J 29–31,
1782.

"Lord Cornwallis imbarques this Day in the Robust Man of
War—The Fleet is to sail to-morrow."—Wm. Smith’s Diary (MS.),
VII. It did not actually sail until the 15th, and also carried Bene-
dict Arnold, to whom Chief-Justice Smith gave: "Notes for Answers
to Questions that may be put to him—gave a Hint to Genl Tryon
to get him examined by the King & in Parliment—He will concur
with Lord Cornwallis in all Measures of Vigor—He will oppose him
in the Evacuation of N Y—in a War of Posts & in his Attachments
to the Military Governors—He will concur with St Clinton in the Call
for reinforcements & the Retention of N Y and the Practic-
ability of restoring the Kings Interest in this Country. He will
cease his want of Enterprise. I hope his Representations will be
useful."—Ibid. Von Kraft in his journal states erroneously that
Cornwallis departed on the 10th, also some ships with inhabitants
of New York ("who probably expected nothing good here in America"),
and also the Hessian invalids.—Von Kraft’s Jour., 155.

This date is found on one of Archibald Robertson’s drawings
(see Jl 12, 1776), entitled "View of the North River from the
Beach near Lispenards Brehouse 10th Dec 1781."

Sir James Lowther moves in the house of commons that resolu-
tions be passed purporting: "That it is the opinion of this House,
that the war carried on in the colonies and plantations of North
America has proved ineffectual either to the protection of his Ma-
jesty’s loyal subjects in the said colonies, or for defeating the
dangerous designs of our enemies," and "That it is the opinion of this
House, that under the present circumstances of the country, all
further attempts to reduce the revolted colonies to obedience are
contrary to the true interests of this kingdom, as tending to weaken
its efforts against its ancient and powerful enemies."

"The first notion I met with was, that the most sincerely
believed, that it was the only means left to us, in our present
situation, by which we could extricate ourselves from our difficulties,
and retrieve our rank in Europe. . . . he could not conceive how
it came to pass, that now, . . . when repeated disasters and
calamities had proved that the reduction of America, by force, was
impracticable, there could be found a set of honest, independent
gentlemen, who could persevere in supporting those measures, by
which the empire had been dismembered and destroyed." He
compared the state of the British government to the description,
given by Gibbon, of the government of Rome just before its fall.

In the debate that followed, Lord North objected to the reso-
lution for the following reasons: the wording was too "general
and loose;" the second resolution would prevent Great Britain
from retaining "any posts in the colonies;" it prohibited "govern-
ment from acting even against the armed ships and the privates
of America;" the immediate effect would be that "the arrogance
of the Americans would rise in proportion as we should sink into
despair."

Sir Fletcher Nortou refuted Lord North’s arguments and de-
defended the resolutions on the grounds that the ministers could no
longer be trusted and that the people ought to have a "specific
declaration of the House, that this mad and impolitic war should
be no longer proceeded in."

Mr. Wedmore Ellis declared that if the house adopted the reso-
lutions it would be guilty of "political suicide," and that it was
necessary to have peace in America for the prosecution of war
against France and Holland.

Mr. John Townsend "reprobated, in most severe terms, the
Washington writes from Philadelphia to the president of Congress on the subject of naval prisoners. It appears that there are not enough naval prisoners in the hands of the Americans to exchange for those in British hands. He says, also: "... for above two years, we have had no reason to complain of the treatment of the Continental land prisoners in New York, neither have we been charged with any improper conduct towards those hands. He considers the sufferings of the American seamen, confined in the prison-ships (see Ag 3 and 21), as largely due to want of such American regulations, as would require "all Captains of private vessels to deliver over their prisoners to the Continental Commissioners upon certain conditions," for then "the numbers taken and brought into the many ports of the United States would have amounted to a sufficiency to have exchanged those taken from us."—Writings of Washington (Ford ed.), IX: 423-24. See, further, ibid., IX: 443-45; and Banks' David Sproat, 59, et seq. (embracing official correspondences through April, 1782, from the papers of the continental congress on the subject of the exchange of prisoners). Congress passes an ordinance "for incorporating the subscribers to the Bank of North America."—Four. Cont. Cong. (ed. by Hunt), XXII: 1186-90; Winsor, VII: 81, 215. See further, Ap 11, 1782. It was rechartered by Pennsylvania in 1783.—Winsor, op. cit.

1782

During the British occupation of the city, there was completed—probably in this year—an elaborate survey of Manhattan Island, known as the "British House and Quarter Survey of the Island of New York & Environs," which shows in detail practically all the topographical features, including buildings and redoubts, of the island. It is reproduced and described in Pl. 50, Vol. I. The four roads in the vicinity of the present Murray Hill which appear on this map are described in the 22d Ann. Rep. of the Am. Scenic & Hist. Pres. Soc. (1917), 152-55. In the same account, the history of this section of the city, including Kipsbury and Indelenberg, is reviewed. (In the description, on p. 161, Vol. I, the reference to "Landmark Map, Vol. II, Appendix," should read Vol. III, Appendix.). On this map, Ellis Island appears as "Oyster Island;" cf. O 19, 1776.

In this year, also, John Hills completed his survey for the map of the lower part of Manhattan Island, which was presented to the common council by John Lotier, Esq. in — but which is now in bad condition, and has been placed for safe-keeping in the N. Y. H. S. It is reproduced in Man. Com. Coun. (1848), opp. p. 291, and in ibid. (1857), frontispiece; an engraved reduction of this map is in Emett Coll., 19090. See also Mr 24, 1776.

A diagram was drawn this year, showing the defensive works on the country estate of Nicholas Bayard, established as a line of defences on the outskirts of the city. A sketch made from this diagram, showing these works adjacent to the Bayard mansion, was published in the Man. Com. Coun. (1865), 511.

A list was prepared (probably in 1782, or possibly 1783) of barrack houses in the garrison of New York, showing street, number of house, and by whom or how occupied. The following, "selected at random," are all that are printed in the condensed record in the work cited:

Broadway, No. 3—"Commander-in-Chief's Secretary's Office."

" No. 24—"Royal Artillery Hospital."

" No. 82—Mr. Cox of the Board of Refugees."

" No. 87—"Mr. Bull, Clerk of the Church."

Great Dock Street, No. 8—"Doctor North."

Hangover Square, No. 10—"Admiral Digby."

Water Street, Nos. 98, 127, 133, 164 and 165—"Commissioner General's Stores."

" No. 25—"Jacob Hart, a refugee."

" No. 53—"Mr. Law, Captain of the Port."

" No. 203—"Mr. Lorentz, Hessian Paymaster."

Mill Street — "seems to be devoted to stores and stables."

Wall Street, No. 3—"Commandant's house."

" No. 7—"General Lossberg."

" No. 10—"Colonel Morse, Chief Engineer."

CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783

Dec. 27

1781: The Exhibitions reproduced No. 3—Now this spirit No. seq., total Nos. 1781 22 26 19 period.

220. The sentences: "...received..." and "...are..." and now this spirit No. seq., total Nos. the period.

For Mr. Calvert argued against the motions because he thought they "would at once not only prove her [Great Britain's] incapacity to reduce her rebellious colonies to obedience, but an act of political despair, which could not fail to increase the ardour of her natural foes and lend a spirit to their hostile enterprises against her."

Gen. Burgoyne declared that the impracticability of the war was sufficient justification for the present motions, and that he now thought the principle of it was wrong. He said: "I am convinced, upon comparing the conduct of ministers, as time has developed their professions, that the American war was but part of a general design levelled against the constitution of this country, and the general rights of mankind. I have further demonstration, the conviction of a whole people. Passion and prejudice and interest may operate suddenly and partially; but when we see one principle pervading the whole continent, and daring, through difficulty and death, for a course of years, it must be a strong vanity and presumption in our own minds to suppose they are not right. It is reason, and the finger of God alone, that implants the same sentiment in three millions of people."

Mr. Burke "spoke with great force in favour of the motions as necessary to be adopted for the satisfaction of parliament and of the people; and advised to the relaxed and shameless system of government throughout every part of our dominions."

Lord George Germain objected to the motions because they meant "a total relinquishment of the American war, which he conceived to be a project equally weak, impracticable, and dangerous," and declared that if they were passed, he would resign. He maintained "that the moment the House acknowledged the independence of America the British Empire was ruined."

John Westley advised the House to come to no resolution on the subject till Lord Cornwallis returned to represent the real state of the country, and give them some authentic information to the practicability in the war."

Mr. Turner "spoke in favour of the motion, and said, he had always wished the Americans success, and was pleased when he heard of Lord Cornwallis's defeat and capture as he hoped it would put an end to our further persecuting our fellow subjects."

At two in the morning, Lawther's motions were lost by a vote of 230 to 179.—Parl. Hist. of Eng., XXII: 822-31.

Exhibitions of travelling menagers affected diversion at this period. One is advertised on this day, to be seen at No. 20 Great George St.—Royal Gems, D 19, 1781. Another made its appearance on May 12, 1799, at 28 Wall St., fronting the Coffee-House,—N. Y. Pecker, May 14, 23, 1799.

Roger Morris, accused of disloyalty, is exonerated by the government and council after a hearing.—Cal. Coun. Min., 507.

"Ordered that the Rector and Mr. Shaw wait on Doctor Mallet and Doctor Nooth to request the payment of the Ground Rent due to this Corporation for the Lots at Vauxhall during the Time the House has been occupied as a Hospital for His Majesty's Troops being upwards of Four years."—Trin. Min. (MS.).

The following advertisement appears: "The Managers beg leave to inform the Public, that the Theatre is now repairing, decorating, and airing, and they propose opening the House in the course of a few days, of which proper notice will be given."

"...All Advertisements for this Season, will be printed in Mr. Rivington's Paper, and no other."—Royal Gems, D 26, 1781.

For the financial statement of the theatre in this and the preceding season, see Je 24, 1782.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1782

Wall Street
No. 18—Mr. Shoemaker, of Philadelpia.
No. 25—Public guard-house.
No. 48—Commodore Atlee's.
No. 62—Mrs. Webster, refugee.
Bowery Lane
No. 1—Barracks for the 17th Dragoons.
No. 68—a powder house.
Church Street
No. 10—Negro barracks.
Old Slip
Nos. 6, 7, and 8—Medicine stores.
Hunters Point and Green, largely occupied by the Commissioners, Burnet's Quay.

"Our friends in New-York," says a London writer, "may safely stand their ground—Government here does not intend to give up the contest, and I am convinced they will send out all the force that can be spared from this country and Ireland, early in the spring; but the war will be conducted on a new system, and so confident am I, that this country will strain every nerve for the recovery of America, that I shall not think of any arrangements in my concerns, which some panic struck creatures might be induced to adopt after the Cheapeaack affair" (Cornwallis's surrender at Yorktown—see O 19, 1781.—Royal Gaz., Mr. 6, 1782. Extracts to the same purpose from other London letters are printed in the same issue of the Gazette.

James Robertson, having returned to New York (see J 27, 1780), forms, with his brother Alexander, Nathaniel Mills, and John Hicks, the firm of Robertsons, Mills, and Hicks, for the publication of The Royal Am. Gaz. They continued as its publishers up to the last-known issue, that of July 31, 1785 (Vol. IV, No. 604) .—Brigg, in A. S. Proc. (1917), 490-95. See further, Ag 5, 1783.

Some 50 Loyalists held captive at West Point broke the "strong stone Rebel prison,"arrisoned by McDougall with "about 600 rebel troops," and "upwards of twenty of those unhappy people are safe arrived in this city."—N. T. Merc., Ja 14, 1782.

A long loaf of bread "made of sweet flour, of the first quality," must now weight 23 pounds and sell for 14 cents; while the round loaf, of inferior quality of merchantable flour, must weigh 25 pounds, and sell at the same price.—Royal Gaz., Ja 12, 1782.

Cf. N 20, 1780. See also Van Tuyck, The Loyalists, 230-51.

What was known as the "Garrison Assembly" opens for the reason at Roubalet's Tavern (the present 115 Broadway), and continues once a fortnight. Officers of the army, navy, and public departments are requested to send the subscription price (two guineas) to Major Brigade Amiel, 37 Hanover Square.—Royal Gaz., Ja 16, 1782.

The queen's birthday is celebrated in New York. Chief-justice Smith writes that he dined "at the Admirals with the Prince . . . and attended him to the General's Ball in the Evening . . . The Prince is lively & sensible."—Wm. Smith's Diary (MS.), VII, under Ja 19. See Ja 18, 1782.

A series of subscription concerts begins on this day at Roubalet's Tavern (City Tavern, 115 Broadway).—Royal Gaz., Ja 16, 1782.

"We [the British] lose daily by Desertions. A Sarjeant & 10 more from Arnold's Dragoons last week.—A Capt. & others of De Lauceys Refugees—Complaints of the Neglect of the Army—bad Quarters for want of Repairs—The Comf in Chief often within 10 Days past at the Exeraze of Fires, with his Aids de Camp."—Wm. Smith's Diary (MS.), VII.

Cornwallis is back in London after an eventful voyage from New York. His countrymen appear to have forgotten the unfortunate circumstance at Yorktown (see O 19, 1781). "In his way to town, [he] was complimented by the Mayor and corporation of Exeter, with the freedom of that City; and so pleased were the People with his arrival, that he was carried from the London Inn to Guildhall on men's shoulders, accompanied by an incredible number of spectators."—Royal Gaz., Ap 24, 1782.

The publication of Abbé Raynal's The Revolution of America is advertised. "The author of this publication," it is stated, "displays such a depth of observation, such a political penetration, and such an animated zeal in the cause of freedom as are rarely to be found. Here liberty appears in the most captivating garb, and philosophy contemplates to speak in the language of common sense, and though the author discovers an ardent partiality to America, he appears never to be regardless of candour equity and reason. Vide the Reviewers."—Royal Gaz., Ja 30, 1782.

Philip Kischke, "intending for England," offers all his property for sale as well as his stock of liquors, groceries, etc.—Rivington's Royal Gaz., F 3, 1782. Kischke was a tavern-keeper as well as a general dealer and was for several years proprietor of the tavern later famous as Montague's. See Ap 5, 1754.

Von Kraft records his being "on field picket in the so-called Red House on the North River, behind St. Paul's church."—Von Kraft's Jour., 157.

The public is informed that "The Rev. Mr. Sayre having been solicited to exhibit a Course of Electrical Experiments in this city, presents his respects to the gentlemen of the navy and army, and begs leave to inform them, that having joined forces with Mr. Thomas Medenhal . . . and having been politely encouraged by his excellency Lieut. General Robertson, Governor of this Province, and by Brigadier General Birch, Commandant of this City, in the accommodation of a convenient and capacious apartment in the City Hall, he, assisted by Mr. Medenhal, proposes to give a Course of Lectures on Electricity."

"The first Lecture will be on Thursday next [Feb. 14], to begin precisely at Eleven o'clock in the forenoon, in the centre room of the City Hall."

"Ladies and gentlemen will be pleased to observe, that there are two staircases leading to the room, at each of which attendance may be taken. The subscription price will be . . . given by the subscribers, and the operation of the experiments will probably be that next the Commandant's House; as there will be less interruption from the passage to the Guard Room." Each lecture to be repeated in the evening of the day when it occurs; admission, one dollar.—Royal Gaz., F 9, 1782. An analysis of the first lecture was published in Ibid., F 13, 1782. The second lecture was advertised to be given Feb. 23, after postponement on account of moisture in the air, which, it was stated would prevent the operation of the experiments "with the wished for beauty."—Ibid., F 20, 23, 1782. The fourth exhibition was advertised for March 2.—Ibid., Mr. 2, 1782.

Brig.-Gen. Birch establishes regulations "for the Security of the Ships and Vessels lying at the different Wharfs on the East and North Rivers." The four wardens of the port are assigned to four sections of the waterfront on the East River, one to supervise a section "from the Ship Yards to the Crane," one "from the Crane to the Fly Market," one "from the Fly Market to the Old Slip," and one "from the Old Slip to Whitehall." They are to appoint patrols in their respective districts, whose duties, briefly stated, will be to guard against the danger of fire, to arrest persons on the wharves after dark who cannot give a satisfactory account of themselves, and to report any irregularities that happen during the night.—Royal Gaz., Mr. 13, 1782.

The first news arrives from England since Oct. 29 last, and the content of the king's speech at the opening of parliament, on Nov. 27, 1781, is made public. The portion relating to the American colonies reads thus: "No endeavours have been wanting on my part to exquash that spirit of rebellion which our enemies have found means to foment and maintain in the Colonies, and to restore to my deluded subjects in America, that happy and prosperous condition which they formerly derived, from a due obedience to the laws; but the late misfortune in that quarter [the surrender of Cornwallis—see O 19, 1781] calls loudly for your firm concurrence and assistance to frustrate the designs of our enemies, equally prejudicial to the real interests of America, and to those of Great-Britain . . . .

"In the prosecution of this great and important contest in which we are engaged, I retain a firm confidence in the protection of Divine Providence, and a perfect conviction of the justice of my cause; and I have no doubt but that by the concurrence and support of my Government, by the valour of my troops and armies, and by a vigorous, animated and united exertion of the faculties and resources of my people, I shall be enabled to restore the blessings of a safe and honourable peace to all my dominions."—Royal Gaz., F 13, 1782.

The king's speech pleases, says Smith, "but not so much as one would imagine—This is Proof of the extreme Dejection into which the Minds of the Loyalists have been plunged—They want
strong Cordials—Confident Expressions of great Promises & hoped Feb. to have been heard of formidable Alliances.

"There are few or no private Letters. Not a Packet for even the Gov.—I believe the General & Admiral have ungrateful Intimations. Nothing transpires from them—But the Papers show that Lt. Deboighe in the upper & Lord G. Gernaine in the lower House charge all the Disturbances upon the Commanders & talk of Trials.—Genl. Robertson suspects the Character of one of them. There are strong & valid Warrants are drawn. Locke takes it that Clinton is recalled & confesses to me that he wishes for the Devolution [sic], sensible as he is of his own Insufficiency that he may begin to get the army in order which is now utterly neglected.

"Not the least Intimation of a Change in the Ministry. The Opposition have not attempted even a Riot among the Pot wallapers or the Westmorland of Bono. There is no trace of the Addresses, in both Houses but not a word directly of yielding to the Independence of America."—Wm. Smith's Diary (MS.), VII., under F 13.

At some time between Feb. 15 and May 24, of this year, Samuel Horner became partner of William Lewis, forming the firm of Lewis & Horner, for publishing The New York Mercury or, General Advertiser (see S 3, 1779); but Horner retired in July, August, and Lewis again became the sole publisher.—Brigham, in A. A. S. Proc. (1817), 459. See, further, Ag 15, 1783.

Smith writes of a meeting "at Head Quarters" to which he was summoned. Major Mathews and Col. Beverly Robinson had reported Houses & Stores for which the Proprietors demanred Rent. The Sum amounted to $4,000. Elliott was for the Paym. Govt. was against it, so the Enquiry was set up. He views the Principle as drawing after it Demands of $50,000. The Commander in Chief saw a Choice of Difficulties—I advised to give up as many of the Houses as possible—State the Matter to the Gov't as to the back Rents & make advancements as Prudence & the Condition of the Sufferers might require pro Boco publico to prevent civil Reports and a bad Spirit.

"It came out that the giving up of 12 Houses might still Clamours and 'is agreed that the Command' report the whole Stock of Property and its condition before any further Measures be taken as to the back Rents." He adds: "I believe the King's Interest suffers by too great Partialities to the Army. Why so great a Collection of Soldiers & Officers in Town all winter when many of them might be distributed in the Eastern Parts of Long Island!"—Wm. Smith's Diary (MS.), VII.

Rivington feels compelled to make answer to "Mr. F. H.", who, in the Penn. Packet of Feb. 9, declares "three and twenty lies" in one issue of the Royal Gazette to be "a thing not unlikely." He says: "I am far from denying that my Gazette does sometimes contain articles of Intelligence which afterwards appear to be not well founded. But it is a misfortune that all such publications, in which our readers expect to find, not only the facts but the reports of the day. But I defy you and all your host of rebel Typographers, to point out a single instance of my ever publishing, as a serious fact, what I knew to be false at the time, as you have in the instance above quoted; and as they have all, in innumerable instances, to serve the wicked designs of a traitorous faction.

"I likewise hereby offer and engage, that for every falsehood you will point out in the Royal Gazette since the commencement of the rebellion, to produce at least a dozen in any of the rebel newspapers published in the same period; or forfeit all that stock in trade which you so much envy me for, and which you have had the stock of impudence to advertise for sale.

"If the challenge is accepted, you ought to hold to your peace; but if you will not mend your manners, I shall think myself perfectly excusable hereafter if I handle you and your abettors without mitterns."—Royal Gaz., F 20, 1782.

Robert Smith advertises his villa and farm "Raremont," for sale. It is described as "delightful and elegantly situated... adjoining the East River. . . within four miles and three quarters of a town, on which are an extraordinary good dwelling house."—Royal Gaz., F 20, 1782. It lay between 54th and 57th Sts. (in the plan of the modern city), and was later known as the Thos. Buchanan property.

Benjamin Thompson, of Massachusetts, who had been alienated on account of Royalist sympathies and had gone abroad, returned in this month to New York and raised a troop which he called the "King's American Dragons." Of this he was commissioned colonel on Feb. 24. Returning to Europe after the war, he gained fame as a scientist and statesman, and received the honorary title of Count Rumford. He is ranked as one of the earliest American Scientists. The statue of him in the Rotunda of the University of Virginia, and the painting of him at Harvard University, where he established by will a professorship in physics and mathematics as applied to the useful arts.—Ellis, Memoir of Sir Benjamin Thompson, Count Rumford (1871); Winsor, Nat. & Crit. Hist. of Am., VII: 197. A stipple portrait of him was published in the European Mag., March 1, 1797. A copy of this (reversed) was drawn and engraved by C. Trenchard and exhibited at the annual meeting of the Society of Artists, Boston. A portrait of him by Gainsborough, bequeathed by the late E. C. Converse to Harvard Univ., was produced in the N. Y. Times (Rotogravure Sec.), Oct. 26, 1924.

Robert R. Livingston, secretary of foreign affairs, writes from Philadelphia to Lafayette regarding conditions in the United States. He refers to the perfectly defenceless condition of New York; the exchange of Gen. Burgoyne; the negotiation of an exchange of Lord Cornwallis for Mr. Laurens, etc.—From the original letter, sold by Heeks, Phila. (item No. 312), Oct. 22, 1719.

Col. Matthias Ogden, of the First Regiment, New Jersey Line, presents to Gen. Washington a plan for capturing Prince William Henry and Admiral Digby who are now in New York and bringing them within the patriot lines. The prince and the admiral are living in our city; but the engraver is the most likely Col. Ogden of his letter to Washington, are guarded by "two sentinels . . . quartered in Lord Stirling's old quarters in Broad Street. . . . The main guard, consisting of a captain and forty men is posted at the City Hall—a sergeant and twelve at the head of the old ship, a sergeant and twelve opposite the coffee-house. The plan is to make a night raid across the Hudson river from New Jersey, with a company of forty men in four whale-boats and carry away the prisoners before an alarm can be made to rescue them.—Fitzgerald, Life and Times of William IV., I: 11-15, citing the letter of Col. Ogden; also Watkins, Life and Times of William the Fourth, 66-70. For Washington's answer, see Mr 28. See also Hist. Mag., 2d ser., V: 131.

An item of London news reads: "It is said passports are sent over to Amsterdam for Mr. John Adams, the only person in Europe vested with power to negotiate from the American Congress, and that he is expected in London next week, for the purpose of opening a treaty."—Penn. Packet, My 7, 1782.

Mr. Henry Clinton complains to Smith of "Enemies here—who propagate that he is cervical for England, and that he is a royal rake—that calls Deboighe a Fool—Germain a Villain.—Speaks with Contempt of the Ministry—Takes Care to let me know that he is not recalled & that he will not leave the Country in its present condition voluntarily."—Smith's Diary (MS.), VII.

Von Krafft is on "working command . . . to dig a canal be- hind the Brew House on the North River and make the necessary ramparts." He records in his journal: "This made us apprehend that the General-in-Chief expected nothing good."—Von Krafft's Jour., 1782.

A sloop which left New York on this day brought intelligence to Greenock that "there were no King's ships lying there [New York], but the Rotterdam and two or three frigates. The troops were all collected, every place was strongly fortified, and a cut made across York Island, as also Long Island, at the narrowest spot. The French had no ships at Rhode Island, but a strong fleet from the Southward and a number of troops were daily expected there; and after their arrival, it was imagined that Gen. Washing- ton would make an attack on New York. The troops were in high spirits and had plenty of provisions."—London Chron., Ap 13, 1782.

"The Americans," says a satirical London writer, "advance rapidly to independence. At the beginning of the contest they were independent of principle, independent of credit, and independent of all gratitude to the mother country, for having raised them into political importance, and protected them from the encroachment of their enemies. Since then, time thousands have been spent of cash, clothing, law, liberty, as abominable comfort, and every social enjoyment that can be valuable to a reasonable creature. Besides
which, by the exertions of this country, they are entirely independent of New-York and Charlestown; and, by the friendship of the 4 negroes, they are not only independent of New-York and bay, but are shorty likely to be so with respect to Virginia. These blessings, added to the great advantages they have derived from the destruction of their towns and shipping, the loss of many hundreds of lives, the neglect of their agriculture, and the ruin of trade, must of course enable them in time, when the few remaining provinces are wrested from them by their good ally, to become a great, powerful and independent people."—Royal Gen., Mr 1, 1782.

The garrison at New York, fearing an attack by Gen. Washington, is "busily employed in fortifying the island, and making every preparation to resist the enemy." Trade is "almost at a stand, there being no commercial intercourse whatever between the garrison and the Americans." Washington is in the Jerseys with about 11,000 men.—From N. Y. news in London Chron., Ap 16-18, 1782.

The beautiful and delightful Villa, situated on the Bowery Road, about two miles and a half from this city, formerly possessed by William Burton, Esquire, is advertised for sale. The people include "about twenty-two acres of luxuriant meadow and arable land."—N. T. Merc, Mr 4, 1782.

To be Let, The Delightful Seat of Belvoir, Commonly called the White Court, an extensive House, with garden, stable, and sundry buildings thereto belonging, near the General Hospital, a small mile from the city. Apply to Mr. Howard, King-street. Possession may be had immediately.—N. T. Merc, Mr 4, 1782. See Mr 24, 1777.

In the house of commons, Lord John Cavendish moves the following resolutions:
That it appears to this house, that since the year 1775, upwards of one hundred millions of money have been expended, on the army and navy, in a fruitless war.
That it appears to this house, that during the above period, we have lost the thirteen colonies of America, which anciently belonged to the crown of Great-Britain.
That it appears to this house, that Great-Britain is at present engaged in an expensive war with America, France, Spain, and Holland, without a single ally.
That it appears to this house, that the chief cause of all these misfortunes, has been the want of foresight and ability in his majesty's ministers." After a long debate the resolutions are passed by a majority of 10. In consideration of these resolutions, Sir John Rous, on March 15, proposed that the commons resolve that "the house could have no farther confidence in the ministers, who had the direction of public affairs." This was lost by a majority of 9.
On March 20, Rous's motion was about to be brought up again, when Lord North assured the house that "the present administration was no more, and that his majesty had come to a full determination of changing his ministers." The house adjourned on this day and during the recess a new administration was formed under the Marquis of Rockingham.—Ann. Reg. (1782), 173-77; Parl. Hist. of Eng., XXII: 1145-50, 1170-1211, 1214-52. See Mr 27.

"Working in the Fortifications all this week."—Jour. of Hugh Gaine, II: 145.

When I was with Sir Henry yesterday morning he told me Lord Cornwellis was exchanged with the consent of Congress before he went Home. . . . I observed . . . that the Rebels deny Lord Cornwellis is exchanged—He replied they don't choose to have it known by the Multitude."—Wm. Smith's Diary (MS.), VII.

Clinton reports to me a letter from Lord George Germain "forbidding Discrimination between American & European Loyaltists on Complaints from the Board of Associated Loyaltists of N.Y."—Wm. Smith's Diary (MS.), VII.

Another country seat (see Mr 4) is offered for sale. This is "Bellfont." It is described as "Three miles and a half from this city, adjoining the high road to King's Bridge, containing 25 acres of land, in good order for either the plough or scythe, with a choice selection of bearing fruit trees."—N. T. Merc, Mr 11, 1782.

When the Engineer had displayed in the council of the general officers his plan of the New-York Island, and had described the line he intended to throw up for the defense of the Town—The Commander in Chief asked the opinion of the General officers whether they thought it would be right to close the line & have a close work in a proper part of it in order to prevent the enemy from getting possession of the town by a coup de main & destroying our stores & magazines, or leave everything open as it is & trust to the decision of a battle . . . .

"General Robertson said that whenever we could not meet the Enemy in the field & fight them this Plan must fail; he therefore could not see the use of a closed work or closing the line—but would give his advice against it . . . ."

"All the General officers, however, except General Robertson, agreed to the Propriety of having a closed work & closing the line, to prevent the sweep of a Coup de Main, for the Reasons specified in the Commander in Chief."—From "Memorandum of the Debates in Council," among Sir Henry Clinton papers, in possession of W. H. Bixby, Esq., of St. Louis, Mo.

The attorney-general introduces in the house of commons a bill "to enable his Majesty to conclude a Peace, or Truce, with the revolted Colonies in North America."—London Chron., Mr 14-16, 1782. This was passed on June 19 (1782).

It is reported that "all Hands . . . will soon be ordered to work on the Fortifications."—Jour. of Hugh Gaine, II: 145.

The "ancient and favourite Irish game of Common" is advertised to be played, on March 18, "for a Supper, etc." The "Sons of St. Patrick" are invited to participate, and requested "to leave their names at the Bar of the Royal Punch House, near the Tea Water Pump." The game is to be played "at the Jew's burying ground."—Royal Gaz., Mr 16, 1782. See also Ap 1.

The city militia is ordered to join working parties at Bunker Hill every morning at 6 o'clock. The original order, signed by Isaac Low, Lt. Col. of 3d Battalion, is preserved with the Bancker Papers, in N. Y. P. L.

"The Mayor's Battalion goes to work on the Fortifications."—Jour. of Hugh Gaine, II: 145.

The Governor's council is convened to consider the expediency of reviving civil government in the province. The members advise against it, Chief-Justice Smith dissenting. The minute reads as follows: "As the direct object of all military operations against the Rebellion is the Restoration of the King's Government there can be no greater expectation of the success of the civil Authority as soon as a Legislature can be convened to frame Laws suited to the present Condition of the Colony and disposed to promote the Success of his Majesty's Arms. . . . But since the calling of an Assembly could avail no more of the Ends to be expected from their Councils Example & Assistance if it should be his Majesty's Pleasure to remove his Forces now here it remained unknown (to them at least) that any authentic Intimations of the National Councils for the Operations of the Year have as yet been received they therefore unanimously advised his Excellency to defer the Measure to a more eligible juncture or until there be some further Communication of his Royal Intentions and Commands."—Wm. Smith's Diary (MS.), VII; Col. Gdn. Min., 307.

In a letter to a correspondent in London, a New Yorker says: "General Clinton has lately had a visit from Ethan Allen, the Chief of the Vermont Association, offering to become the allies of Great Britain under certain circumstances. He had every attention paid him by our Commander; but unluckily, on his return, he and his party, except one or two, fell into the hands of the rebels, who lodged them in gaol at Albany, and sent an account to General Washington of the circumstance; mean while the Vermontians came in a large body, who were opposed by the rebels and Albany militia, some of which, however, joining the Vermontese, a bloody action ensued, in which many fell, but the latter were complete victors, and rescued their chief, Ethan Allen, who has sent fresh assurances to General Clinton of the most firm resolutions to oppose the British cause, with above 7000 fine troops."—London Chron., Mr 16-18, 1782. According Allen's pretended friendship with the British, see Brit. 16, 1780.

Brig.-Gen. Samuel Birch, the commandant of New York, prohibits the practice of throwing dirt into the streets. His proclamation states that "the Indulgence heretofore granted to the Inhabitants of laying in the Streets, the Dirt collected in their Houses and Yards, in Order that the same might be removed by the Carts employed for the New York Island, and had described as new and productive of many bad Consequences." They are now required to "collect the same in some convenient Place in their Yards or Cellars, ready to be thrown into the said carts when called on. . . ."—Royal Gaz., Mr 27, 1782; Man. Com. Coun. (1861), 732.

The Rockingham ministry takes office (see Mr 8). It formed on the following conditions: 1. Peace with the Americans, and the acknowledgment of their independence not to be a bar to the at-
1782
Mar. 27
The attainment of that object;—a substantial reform in the several branches of the civil list expenditure. . . .—2. The diminution of the influence of the crown."—Ann. Rep. (1782), 173-77; Royal Gaz., My 8, 1782.

1828
From his headquarters at Morristown, Washington issues the following instructions to Col. Matthias Ogden: "The spirit of enterprise, so conspicuous in your plan [see March] for surprising in their rear the enemy, and hanging off the Prince William Henry and Admiral Digby, merits applause; and you have my authority to make the attempt, in any manner, and at such a time, as your own judgment shall direct. I am fully persuaded, that it is unnecessary to caution you against offering insult or indignity to the persons of the Prince and Admiral, should you be so fortunate as to capture them; but it may not be amiss to press the propriety of a proper language to the party you command.

"In case of success, you will, as soon as you get them to a place of safety, treat them with all possible respect; but you are to delay no time in conveying them to Congress, and reporting your proceedings with a copy of these orders. Take care not to touch upon the ground, which is agreed to be neutral, namely, from Newark to Rahway and four miles back."—Writings of Geo. Washington (Ford ed.), IX: 466-67. The original of this letter was sold at The Anderson Galleries, May 6, 1920, with the library of the late Chas. L. F. Robinson, of Hartford. The catalogue states that, on the verso of the document, is a signed statement by Robert Gilmor that he secured it from Louis McLane, who was Minister at the Court of Great Britain, and who showed it to King William IV (the former Prince), who remarked, "I am obliged to General Washington for his humanity, but I'm damned glad I did not give him an opportunity of exercising it towards me."

On April 28, Washington wrote that he had intelligence that "the centries at the doors of Sir Henry Clinton’s quarters were doubled at eight o’clock every night, from the apprehension of an attempt to surprise him in them. If this be true, it is more than probable the same precaution extends to other personages in the city of New York—a circumstance I thought proper for you to be advertised of."—Ibid., IX: 467 (footnote); Hist. Mag., 2d ser., V: 131. Cf. Irving, Life of Washington, IV: 761-63, who adds: "These precautions very probably disconcerted the project of Colonel Ogden, of which we find no other traces."

"By the March packet from Falmouth, information is brought "that no farther Offensive War is to be carried on in this Country."

1828

Apr. 4
In this month, Washington left Philadelphia and rejoined the army, establishing his headquarters at Newburgh.—Winson, VI: 744.

3
The presence of a great personage at the last game of Common" (see Mr 16) induces "a number of Gentlemen" to advertise a second game to take place on this day "for a genteel supper."

Those who intend to participate are requested to leave their names "at the Royal Punch House, Sign of King George IIIrd. near the Tea Water Pump (where Commons are provided)." The game is to be played, as before, "at the Jew’s burying ground."—N. Y. Merc., Ap 1, 1782.

12
"A good new House, situated in Chatham-Street, No. 25, next the Tea Water Pump, known by the name of the Old Punch House," was advertised later in the year to be sold at private sale.—Royal Gaz., Ag 25, 1782.

3
Admiral Digby writes to Gov. Robertson: "There are already about 1600 men out in Privateers, and four more ready, to man which will take above 200 men. I must therefore beg your Excellency will withhold granting any more Commissions till the return of some of the large Privateers whose cruises are expired, as there are two frigates now in the port that cannot be sent to sea for want of men. . . . I must beg leave to take this opportunity of informing your Excellency that unless they [the privateers] also keep within bounds, it will be impossible to carry on the King’s service," Robertson laid this letter before the Chamber of Commerce, and in its answer the Chamber praised the work of the privateers and declared that "however difficult it may be to carry on the King’s Service, unless Privateers are kept within bounds, it will be found much more so if these bounds be reduced to too narrow a compass. . . ."

If . . . there were Ten Thousand men instead of only One Thousand in Privateers from this Port, it were far less an Evil considered in the most unfavorable light, even supposing not one of them could ever be got to enter on Board the King’s Ships, than to have them in Privateers acting against us, which would certainly be the alternative. . . .

"The late unfortunate disasters, the few arrivals, and the peculiar distress of Trade, all conspire to render the want of Seamen greater than usual; but it is considered . . . judgments have been purchased and manned for the Public Service, besides the King’s Ships of various denominations, and the great number of Seamen which this Port has constantly furnished. We rather wonder whence they could be collected than that no more have offered, and in this important View we are confident this Port can be exceeded by none upon this Continent, and perhaps it is not far below the second in Great Britain."—Col. Res. of N. Y. Chamber of Commerce, 1768-1784, 380-83.

Note is given of the desuetude of a negro lad from "the black Company of Labourers in the service of the Royal Artillery." Information is to be given to "the Office of Ordinance, opposite St. Paul’s."—Royal Gaz., Ap 10, 1782.

The state legislature passes: "An Act to prevent the establishment of any bank within this State, other than the Bank of North America, and for incorporating the same within this State."—Laws of N. Y. (1782), chap. 25. On May 26, 1781, congress approved Robert Morris’s plan to establish a national bank, and the Bank of North America was incorporated Dec. 11, 1781 (q.v.).

Admiral Rodney defeats the French fleet under De Grasse at Dominique in the West Indies.—Channing, Hist. of U. S., II: 371.

A letter from Rodney describing the engagement appears in the Royal Gaz., My 15, 1782.

Gen. Samuel Birch, the commandant, grants an increase in wharfage rates to owners whose wharfs are in good condition—Royal Gaz., Ag 20, 1781; Man. Com. Com. (1863), 722-3.

An act of the state of New York is passed to prevent more effectually illicit trade with the enemy. It provides that "all Goods, Wares and Merchandize, other than such as are herein excepted, which shall have been brought from any Place within the Possession of the Enemy, and which shall, after the First Day of May next, be brought into any Part of this State, not in the Possession of the Enemy, shall be considered as contraband Goods, and be liable to Seizure and Condemnation."—Laws of N. Y., 7th sess., chap. 39. This law was renewed by an act of July 22, 1782.—Ibid., 6th sess., chap. 7. An act to limit these acts was passed March 24, 1783.—Ibid., 6th sess., chap. 44.

The state legislature passes a law permitting tenants of forfeited estates to pay half of their rent in certain certificates, and staying the sale of forfeited lands in the southern district.—Laws of N. Y., 7th sess., chap. 45 (printed by Holt, 1782).

"Yesterday was brought to this city, and safely lodged in the Provost, Sir James Jay, one of the rebel senate of New-York. . . . We hear that among other papers of a mischievous tendency found upon him, there was one from George Clinton, the titular Rebel Governor, authorizing him to procure a quantity of specie from this City or Long-Island. To clear from hence, that Bob Morris’s Bank Notes will not do, since the supporters of the rebellion are so anxious to get the Shiners."—Royal Gaz., Ap 17, 1781.

John Adams secures recognition by Holland as minister of the United States.—Winson, VII: 133. See S 27, 1779.

"Prince William Henry is elected to the Order of the Knights of the Garter. While in New York he received the insignia of the order.—Orders of Knighthood of the British Empire, by Nicholas Harris Nichols (London), II: 163.

"Oral! That the Fence round Saint Pauls burial Ground be completed in the manner it has been begun (see My 14, 1781)."—Trin. Min. (MS.). See My 27, 1784.

Lord Dunmore visits New York and tells Wm. Smith of his ambition to have "the Command of all the Provincials with such as he can collect to liberate several corps of Black men from the Promises of Freedom." He wants "to be taken Care of in Virginia 3 months and then desires no further Assistance from the Regulars . . . He is very open in Censure at Ld Cornwallis—both as a Statesman & a Soldier—The Police of Charlestown infamous—The Rebel Army Cloathed from it—Rum Wine & &c &c—Vessels pass to them unsearched."—Wm. Smith’s Diary (MS.), VII.

A "Refugee Concert," was advertised to be held at the theatre in John St.—Royal Gaz., Ap 14, 1782.
1782

On application of Alexander Hamilton, who is not ready to take examination for admission to the bar on account of his service in the army, the supreme court, sitting at Albany, suspends in his favour until the October term the court rule which requires a three-years' clerkship, among other things, before admission.—Min. Supreme Court of Judicature (MS.), 1781-1783, p. 183 (in county clerk's office, Manhattan).

27

The generous signed a "Having a footing Messrs. his the New given fainting ro his Diaries (MS.), VII.

30

The city vestry submits to Gen. Robertson an account of the "receipt and disbursement of all money raised for the support of the almshouse, other charitable purposes, and the expenses of the office," from November 1, 1777 to this date. The receipts amount to £63,419:36 and the expenditures to £61,063:11:11. The receipts were derived from "Rents of Houses, the property of Persons out of the Línes," "Licences to Tavern-kepers and Retailers of Liquor," "Brooklyn Ferry Rents," "Lotteries," and "Fines and Forfeitures." The latter includes the salaries of certain city officers, "cash paid for repairs of buildings, ferries, pumps, lamps, fire engines, &c.," "cash paid for cleansing, paving and repairing the streets, including the first general cleansing of the city," "cash paid different charities, itinerant distressed objects, and passage money for shipping off some of them," and "cash paid for repairing and cleaning the arms of the militia." At the request of Gen. Robertson, three well-known citizens certified to the correctness of the report. It is as follows.—Royal Gen., J. 1, 1782: Henry B. Dawsons report on the city finances during the Revolution, printed in Proc. Bd. of Ald., LXXXVI: 219-21. The vestry's second report was made on April 14, 1782 (q.v.). For an account of the vestry and its powers, see D 27, 1777.

May

Orders this Day for no farther Hostilities at any of our Ports, and the Refugees not to go out any more without orders.—Jour. of High Gaine, II: 148.

Gen. Robertson occupies the Dr. James Beekman country-seat, on East River, near 24th St. He remained there until April 16, 1783 (q.v.)—Man. Com. Coun. (1854), 554.

It is reported that British cruisers "will be called in very soon."—Jour. of High Gaine, II: 149.

It is reported in New York "that General Washington has issued orders for a cessation of Hostilities also."—Jour. of High Gaine, II: 149.

Gov. Robertson informs his council that, as he is now commander-in-chief, he is able by his own authority to restore civil government in the province of New York, but that he desires their opinion before taking his measure. The council resolves, that no good purpose can arise from the interference which might arise from the restoration of civil government at this time and under the present circumstances.—Stevens's Cat. Index of MSS., 1765-1783, in Library of Congress, citing the original record in the Pub. Rec. Office, London, Vol. 297, p. 733. Cal. Com. Min., 507.

"Sir Guy Carleton, K. B., Commander in Chief of his Majesty's Forces in North America, and his Suite," land at Whitehall. There is a discharge of cannon from Fort George to announce his arrival. He is received "by a Party of Horse and Foot, the Gentlemen of the Army, most of the respectable Inhabitants of the City, and a numerous concourse of People."—N. T. Merc., My 6, 1782; Wm. Smith's Diary (MS.), VII: Windsor, V: 745: VIII: 157. He is to succeed Sir Henry Clinton in the command of the British army.—Jour. of High Gaine, II: 149. It is not until his appointment in conversation with admiral Digby a commissioner to negotiate a peace, he lost no time in conveying to General Washington copies of the votes of the British Parliament, and of a bill which had been introduced on the part of administration, authorizing his majesty to conclude a peace or truce with those who were still denominated the revolted colonies."—Life of Geo. Washington, by John Marshall, IV; 745: same time, the fortifications at New York were altered and improved under his direction.—See, descrip. of Pl. 50, Vol. I.

A lottery for the poor is announced to be held on this day at "Kirk's Tavern, near the New Bridgwell."—Royal Gen., My 4, 1782. This was at Montague's Tavern, 253-254 Broadway.

A "splendid Entertainment" was given at Roubalet's Tavern, by the principal officers of the Army, to his Excellency Sir Henry Clinton, previous to his Departure for Europe, at which b were present their excellencies Sir Guy Carleton, and Rear Admiral May Digby, many other officers, and Persons of Distinction."—N. T. Merc., My 13, 1782. See My 13.

The "pleasant situated house and elegant gardens at Corlear's Hook," formerly known as Campbell's Tavern, and now occupied by John Hyloton, are offered for sale. The place is suited for either a "gentleman's seat, or for the public business."—Royal Gen., My 11, 1782.

A sadler advertises his trade at No. 85 Broadway, "opposite the Grand Parade, three Doors from the Corner of Wall Street."—Royal Gen., My 11, 1782.

Smith writes in his diary: "I find hourly Evidences of the Reluctance of the High Tories as they are called to a generous Conciliatory spirit of way Volo to create Jealousy. It requires Caution to tread safely even in the Paths of Peace . . . What this Class of Men hope for is a Triumph by the Sword."—Wm. Smith's Diary (MS.), VII.

Sir Henry Clinton & Genl Kayhhausen imbarke at White Hall.

He was attended by Sir Guy Carleton & Lieut. Genl Robertson & al.—Wm. Smith's Diary (MS.), VII; Von Krafft's Jour., 160.

A lottery is advertised for the benefit of the poor. The capital prize is a three-story brick house and adjoining distillery with its utensils, offered by the owner (who holds it on a long term lease). These buildings are "in two lots of College ground" on the North River.—Royal Gen., My 15, 1782. An earlier lottery of poor relief was advertised in ibid., F 23, 1782. See also 1780.

These events create much excitement among the British, London merchants are advised by the secretary of state not to send further supplies here.—Penn. Gaz., Jl 24, 1782.

The inhabitants of the city are requested to attend an important meeting at Roubalet's Tavern on this day at 12 o'clock. The notice is signed by Mayor Mathews.—Royal Gen., My 18, 1782.

The "ancient and manly game" of hurling is advertised to be played on the 20th "by the boys of the burying place."—Royal Gen., My 18, 1782. See also Je. 4, 1781.

Smith writes that Sir Guy Carleton has told him "he wished to put our Affairs on such a footing that when the Army left the Country it should be because they were no longer of use from such a Settlement as was perfectly pleasing to the People & useful to Great Britain."—Wm. Smith's Diary (MS.), VII.

The British and Hessian troops in New York, and those "cantoned in its vicinity" are reviewed by Gen. Carleton, the new commander-in-chief; and on the following day, the Grenadiers, the 27th Light Dragoons, and other corps on Long Island are reviewed. The "appearance of the troops on both days infinitely surpassed every exhibition hitherto presented in America."—N. T. Merc., My 23, 1782. The Review of the 20th was "near the Jews burying Ground."—Jour. of High Gaine, II: 150.

"Joseph Corre bege leave to acquaint his friends and the public in general, that he has removed from No. 17, Hanover-Square, to No. 19 Wall-Street, next door to Messrs. Taylor and Bayard's vend store, where his friends and customers may be supplied, as formerly, with all kinds of confectionery and pastry, &c."—Royal Gen., My 22, 1782.

From his conversation with Carleton, Smith says he has "discovered very clearly" that the new commander "had been all along with the Opposition & that the old Ministry had as I conjecture cast their Eyes upon him to please the Opposition & upon the same Principle listened to my Instances for the Peace Bill."—Wm. Smith's Diary (MS.), VII.

The inhabitants of the city of New York present an address to Sir Guy Carleton, congratulating him on his appointment to the "Chief command of his Majesty's armies in America," and on his safe arrival. They believe "that the pacific disposition of the parent state will abate the prejudices of the sedentary inhabitants of America." The address is signed by Mayor David Mathews. In reply Sir Guy expresses the belief that such a sentiment from this country cannot fail to re-unite the people of England and America on the principles of common liberty and general advantage."—Royal Gen., My 25, 1782.

A quarrel occurs on one of the ferry boats between a sergeant and the ferryman. "The latter was had up before certain Officers on Wednesday—& on Friday brought out to be whipped 200 Lashes & flogging under the lashes, &c. at Roudine's Tavern, by the command of the Army, to his Excellency Sir Henry Clinton, previous to his Departure for Europe, at which
man is a worthy Loyalist of Maryland."—Wm. Smith's Diary (MS.), VII, under Je. 4.

The "loyal Refugees of the Province of New York" presented an address to Sir Guy Carleton. They state that their "dispersed situation" prevented their congratulating him when he arrived. They give the following account of themselves: "Many of the King's friends, in this province, have suffered ignominious deaths, for their uniform attachment to Government; many have been pronounced to the Sash & Georgian & expressed his wish that it would with other Gentlemen in Law Offices undertake the Trust—"I approved his Intention of putting Business in a Train less repugnant to the Principles of the Law than the present Mode by Police & Military Discretion but said it would require a consult how best to effectuate his Wish—On which Mr Cilff [Justice] Smyth and Mr Kemp were called in & it was agreed we should consult & report to the Chief & Court of the Colony in the nature of a Book in which I would with other Gentlemen in Law Offices undertake the Trust—"

In some notes written on the proposal, Smith states that if the success of the British forces in any colony is such "as to render it peaceable to reestablish its Legislature, it ought to be immediately convened; because there will then be a Power, as well to aid the Military operations, as to give the People the Protection of the Crown." He thinks that "infinite Confusion would be created, by a partial Re-establishment of the Judicial and other Branches of the Executive, without the Legislative authority." He adds: "There are Difficulties in the Choice of any Models, to be proposed for the Government of the Districts in the British Possessions..."

"Under the Military Government there must needs be a De facto Justice in the Criminal Department; for the Power of Life & Death, when not authorized by the Laws, wears too formidable a Complexion, to inspire the Confidence of any Magistracy, who are to depend for Safety upon the... Crown or the Legislature.

"If to such a Judicature we prefer the Opening of the Courts, the Course indeed will be legal; but it is necessary to be apprehended, that the Judicature will not be ranked as the Laws of the Land, without Deference to Power of any King, being bound by Oath to disrepect even the King's Letters to the Contrary, if any such should be sent to them. They must also act with equal Freedom in the Dispensation of Justice in Civil concerns until the Law is changed..."

In his reviews of the effects of the British fleet over the French in the West Indies, "the Artillery Company with their field pieces and the two battalions of the Kingston regiment of foot militia" assemble on the parade, and after going through the manual exercise, fire a "Feu de joie." In the evening, the town is "most splendidly illuminated."—Royal Gaz., My 29, 1782.

"A report of his coming this date states Sir Henry Clinton's plan for securing the peace, interest and trade of the inhabitants in the three Islands [Manhattan Island, Long Island, and Staten Island]; Establishment of the police; landed estates of the rebels parcelled out amongst needy refugees under certain restrictions, and granted during pleasure; arrangement for trade of the Garrison."—See Report on Army MSS. in the Royal Inst. of Gt. Brit., II: 502.

The "loyal Refugees of the Province of New York" present an address to Sir Guy Carleton. They state that their "dispersed situation" prevented their congratulating him when he arrived. They give the following account of themselves: "Many of the King's friends, in this province, have suffered ignominious deaths, for their uniform attachment to Government; many have been pronounced to the Sash & Georgian & expressed his wish that it would with other Gentlemen in Law Offices undertake the Trust—"I approved his Intention of putting Business in a Train less repugnant to the Principles of the Law than the present Mode by Police & Military Discretion but said it would require a consult how best to effectuate his Wish—On which Mr Cilff [Justice] Smyth and Mr Kemp were called in & it was agreed we should consult & report to the Chief & Court of the Colony in the nature of a Book in which I would with other Gentlemen in Law Offices undertake the Trust—"

"The United States of America, heard with pleasure of your appointment to the command of his British Majesty's troops in America. Your birth in a land of freedom and urbanity, has secured you from the prejudices and reproaches of a Briton. An Irishman is a traitor to his native country, when he becomes the enemy of liberty.—You were once, we told, the master and afterwards the pupil of the immortal Wolfe. Your behaviour in Canada and your general conduct, have procured you the character of a gentleman and a hero."

"It is your misfortune to be called as a solemn witness of the dissolution of the British empire.—Your predecessors in command have left you nothing to work upon. They have expended the whole strength of your nation in fruitless sieges, battles, marches, and even victories. A Marlborough or a Eugene, could do nothing in America, in your present situation.

"You have but one thing left and that is to be HONEST. Tell your master that the time has come for making the least impression upon this country. The people are uniting daily, more and more, in support of their independence. The French alliance they now see to be founded in interest, and the once deluded adherents of the crown of Britain, now expose for sale in our city, cargoes of goods manufactured by the hands of Frenchmen.

"The royal standard has been raised in every state to no purpose. Crown officers and a few vagrants called by you Refugees have crowded it. The rest of the king's friends would not take up arms to rescue their Saviour, and there is no government so obnoxious to their principles, to which they would not swear allegiance.

"Beware of the company of Billy Smith. He deceived sir Harry Clinton, who fired the late ministry. He likewise deceived governor Johnson, who afterwards deceived the British house of commons. His ambition and avarice have blinded his understanding, and with all his pretensions to loyalty, he is in heart a staunch republican.

"Put an end to the tortures of the Prison-ships. Let sir William Howe, and sir Harry Clinton, feel in their consciences All the punishments of putting American seamen to death in cold blood. Let not your name and laurels be stained with any one of their crimes."—Penn. Packet, Je 3, 1782.

Commenting on the reference to himself in this letter, the chief-justice says: "[It] appears to attack me & yet may come from a Friend to the general Reconciliation. It is but lately Mr. Donaldson writes that an English Gazette censured me as the Projector of Arnold's expedition to New London & this supposes me a Republican."—Wm. Smith's Diary (MS.), VII.

Smith writes: "General Robertson Genl. Birch & Elliot are come Home following a conference at headquarters with little Credit & much Anxiety—They have all been vehement advocates for the Military Power, which they see will no longer be countenanced and Genl. R in particular must have felt greater Rewards, for having hidden his real sentiments from the Ministry & the Pains he has taken to mask them before me."—Wm. Smith's Diary (MS.), VII.

The king's birthday is celebrated. "At noon a royal salute was fired from the guns of Fort George, and answered by the ships of war, adorned in a distinguished manner by an infinite variety of colours, presenting a beautiful exhibition. His Excellency the Commander in Chief, attended by a numerous procession of principal officers, waited on his Royal Highness Prince William Henry, with their compliments of congratulation.—Very elegant entertainments were given by his Excellency Sir Guy Carleton, Rear Admiral Digby, and Lieutenant General Robertson. A feu de joie was fired in the evening, amongst many thousands of rejoicing inhabitants, and the night was closed with singing an invective spirit of a Britannia."—Royal Gaz., Je 5, 1783; Wm. Smith's Diary (MS.), VII.

In an advertisement of the "Brooklyn-Hall Charity Lottery," at the tavern of Charles Loosley (see My 7, 1779), beginning on
Washington writes to Rear-Admiral Digby concerning a visit he has received from Capt. Daniel Aborn and Dr. Joseph Bowen in behalf of the American naval prisoners. He states that, as he has no agency on naval matters, the application was made upon "mistaken grounds." In addition he declares that the prisoners' chief complaint is about overcrowding, and that he is sure Digby's "feelings for fellow men" would induce him "to proportion the ships (if they must be confined on board ships) to their accommodation and comfort, and not by crowding them together in a few, bring on disorders which consist then by half dozens in a day to the great distress of all hands." Admiral Digby answered this letter briefly by suggesting that Washington could mitigate the sufferings of the American naval prisoners by exchanging some of the British soldiers in his hands for them.—Royal Gaz., Jl 3, 1782. See also Ag 21, 1781; Je 11 and 24, 1782.

"General Orders" are issued—a first step toward the restoration of its former remuneration—in these words: "Whenever it should be found necessary to confine any Person not Military he is to be immediately reported to His Excellency. 1st Genl Robertson who will take the necessary Steps for his being brought to Tryal."—Wm. Smith's Diary (M's). VII, under Je 9.

A "neat Brick House, With a Store, Three rooms a good Cellar, Kitchen, and Yard, in Great George Street, opposite the Artillery Park," are offered on lease. "For particulars apply to John Murray, Whip-maker, No. 229 Queen Street, near the Fly Market."—Rivington's Royal Gaz., Je 8, 1782. This was the old Montague tavern, on Broadway, between Warren and Murray Sts. See Ag 5, 1754.

David Sproat writes a letter from New York to the prisoners on the "Jersey," informing them that Capt. Aborn and Dr. Bowen, their representatives, have conversed with Gen. Washington (see Je 5) the appeal concerning their "disagreeable situation," and have solicited him to grant them relief by exchanging captured British soldiers for them. Sproat informs the prisoners that Aborn and Bowen are now bringing to them Washington's reply, which is a "flat denial," and encloses copies of three letters that have passed between him and the American commissioners (see Je 24), which will convince you that every thing has been done on the part of Admiral Digby, to bring about a fair and general exchange of prisoners on both sides.

As a result, the prisoners on the "Jersey" address a letter to "Friends and Fellow Countrymen of America," which closes thus: "What is to be done! are we to lie here and share the fate of our unhappy brothers who are dying daily? No, unless you relieve us immediately, we shall be under the necessity of leaving our country, in preservation of our lives."—Royal Gaz., Je 12, 1782; Recollections of the Jersey prison-ship, from the MSS. of Capt. Thomas Drung, by A. G. Greene (ed. by Dawson, 1805), 138-42; Banks, David Sproat, 75-86. See, further, Je 3.

City Tavern and Coffee House (Merchants Coffee House); Mr. Roubault's Tavern, Broadway (City Tavern); Mr. Kirk's Tavern in the Fields (Montague's); Mr. Hearn's Tavern in the Fields; Mr. Bryan's Tavern, opposite the Coffee House; Mr. Campbell's Tavern in Irish Street; Mr. O'Brien's Tavern, Fly Market; Mr. Hays Tavern, Broadway; Barden's Queen's Head, Jamaica; Mr. Rappleye's Tavern, New-Town, and Mr. Griffin's at Howard's Hall, Water St. Long Island.—Royal Gaz., My 25, 1782. This list probably includes most of the popular taverns of the time in and about New York.
the morning: Before the quarter-part of his army have opened their eyelids, he has perhaps rode ten or a dozen miles; he comes almost every day to the parade, which is a signal that immediately after he will have a levee, where every one may tell their story, or request a private hour, which I am told is generally fixed for that day or the next, and those who have had conversations with him go away very much satisfied with his patience and condescension: In short, his conduct has been such, that he has procured him the respect of the army, and the love of the Loyalists.

"The newspapers will inform you, that the rulers of America are not in the least disposed toward peace, unless independence is acknowledged, and their great and good ally included in the treaty."

"The whole army is now under orders to encamp beyond Kingsbridge, it is said, with intention to cover some miles of the country, in which forage can be collected together. Washington is drawing together his force at New-Windsor, where the greater part of the French troops from Chesapeake are to join him."—London Chron., JI 20-23, 1782.

"Weir's Tavern, the Sign of The Grand Master, below the Coffee-House, will be opened on Tuesday next [June 18] for the reception of company, where an Ordinance is intended to be kept up in the genteel manner."—Royal Gaz., Je 15, 1782. When Sarah Bolton Lofus offered her property for sale on Jan. 6, 1783, one of the items listed was a house "on the corner of the Old-slip, next to the house wherein Mr. James Wier lately kept tavern."—N. Y. Hist. Soc. Proc., VI, 34 & 43, 1782.

Court is held in the city hall for the trial of pirates by a commission acting under a statute of King William III.—Royal Gaz., Je 19, 1782. Gov. Robertson presided and the bench included the governor and council of New Jersey as well as the council of New York. "We proceeded," says Smith, "upon the Record of a Commission issued in 1762, and when sworn signed & sealed a Warrant to the Military Provost Marshal to deliver & to Ludlow as Marshal of this Court to receive and bring before us."

"John Clarke—James Wigmore & Joseph Roya. The Court assembled at ten o'clock sat till dusk. We unanimously found Clarke guilty, & sentenced him to be executed at 8 in the morning.—Wigmore was also found guilty by a great Majority—but intending to recommed him for Pardon, we ordered his Execution on the first Monday in June 1782.—A great Majority acquitted Joseph Roya & he was instantly discharged."

"The Committee unanimously agreed to admit the Prisoners to have Counsel, & it was declared to them, but they were not permitted to procure any."

"There were several Witnesses on the Part of the Crown. viz. John Johnson, Richard Magrath, James Iann, Francis Smith & James Bruce."

"The Prisoners called for Edward Parkinson & William Noy."

—Wm. Smith's Diary (MS.), VII. See also Wm. Smith Papers (MS.), folio 197, where a more detailed account of the trial is given.

An act of Parliament, passed on this day, authorizes George III. to make peace with the United States.—Jour. House of Lords (1779-83), 537. Lamb, Hist. City of N. Y., II: 228. See also Mr. 28. For the debates in parliament at this period, see Almon's Parliamentary Register, Vols. XXI-XXVI.

The first seal of the United States is adopted by the continental congress.—Jour. of Cong., IV: 39; Hunt, Hist. of the Seal of the U. of (1909), 43-57.

Two masters and one surgeon of American vessels which have been captured by British cruisers and brought into port, having obtained the "enlargement" of their paroles from Rear-Admiral Digby, to return to their homes, have appointed six of their number to inspect the prison-ships in the harbour, including the "Jersey;" and, accompanied by David Sproat, the British commissioner-general for naval prisoners, and by George Rutherford, the surgeon of the prison hospital-ships, they visited these ships, and then prepared a written report, of this date, with considerable detail added, to the effect "that they have found them in as comfortable a situation as it is possible for prisoners to be on board of ships at this season of the year, and much more so than they had any idea of, and that everything said to the contrary, is false and without foundation."—"A Royal Gazetteer: Recollections of the Jersey Prison-ships, from the original manuscripts of Capt. Thomas Dring, one of the prisoners (ed. by Dawson, 1865), 143-45; Banks, David Sproat and Naval Prisoners in the War of the Rev. (1909), 81.

The publication of this report had a certain limited influence in effecting a much needed exchange of prisoners (Greene, op. cit., 111); but, for the motives that are said to have prompted or forced the report, see Ag. 7."

Jay arrives in Philadelphia to relieve Franklin.—Winsor, VII: 108.

"Washington says Dr. [Roberts] upon the Subject this morning & advised him to oblige them if possible & to oblige the Hospital to Report in Writing the Reasons for withholding the New Church which has sick Hessians in it and whether another Place can not be found.—Wm. Smith's Diary (MS.), VII.

"The American commissary of naval prisoners, Abraham Skinner, having seen the published letters of June 11 (p. 2), writes to the British commissary, David Sproat, giving a long and earnest exposition of the American position and claims in the matter of exchanging prisoners for the relief of the many Americans crowded into a few ill-kept British prison-ships. He reviews the British principles and policy which he conceives actuate Sproat's superiors, who, he says, are trying to induce the Americans to join the king's forces by assuring them that they are neglected by their countrymen, and that all their miseries are due to Washington's disinclination to exchange them. Skinner declares that it is impossible for Washington to do this because the exchange of naval prisoners is under the direction of the secretary of war, also because the Americans of such amount of British naval prisoners and the exchange of soldiers for seamen is contrary to the original agreement which specified that officers should be exchanged for officers, soldiers for soldiers, citizens for citizens, and seamen for seamen (see Mass. Hist. Soc. Proc., 1866-68, p. 334). He adds that Aborn and Bowen (see Je 5 and 11) "appeared to be sensible of the force of those reasons, however repugnant they might to be to the feelings and wishes of the men who had destruction and death staring them in the face," and that if better accommodations were not provided, Washington would retaliate "by confining the land prisoners as with much severity as our seamen were held."

Sproat answered this letter by recapitulating the British position, by referring to the declaration of June 21 (p. 2) by American shipmasters concerning the favourable condition of American naval prisoners, by again offering to exchange the American seamen for British soldiers, and by attacking the treatment accorded to British prisoners in Philadelphia and Boston. These letters, together with those referred to under June 5 (p. 2), were published at Sproat's request in the Royal Gaz., JI 3, 1782. See also Greene, Recollections of the Jersey Prison-ships, from MSS. of Capt. Thomas Dring (ed. by Dawson, quote Banks). 145-53, 1865; Smith, David Sproat, 89-98, 101.

The financial statement of the New York Theatre, for the general account of receipts and disbursements for the last two seasons, and showing the balance in hand at this date, is published as a broadside. It is taken from the books of the theatre, in the possession of the treasurer, and is shown to enable persons, until Aug. 31, to present any outstanding demands against the theatre, after which the surplus will be given to charity. It is signed by four managers. It shows gifts of $29150., and of $827716, in the two seasons respectively, to the widows and children of 35 military and naval organizations, to refugees, and to inhabitants of New York and vicinity. The receipts include large donations from the governor and the several British generals in the city. There were copies at the doors of the theatre, in the two seasons, $4,350176, and £535176 respectively.—From original broadsides, in N. Y. P. L.

Prince William Henry is to town again from the "Warwick."—Jour. of Hugh Gaine, II: 151.

"The encampment near Mr. Bayard's in the Bowery" is an advertisement.—Royal Gaz., Je 29, 1782.

Smith records the fact that Sir Guy Carleton, in conversation with him, expresses the wish that "I would take up the Pen blamming the contracted Idea of treating the Colonies like petty Corporations as M' York & other Lawyers had in England; & he appalled much the large Mind & Principles of Lord Chatham & the present Chancellor.—I met few Difficulties from the uncertainty respecting the Views of the present Ministers.—He related some Free Sentiments—I mentioned the King's Mind & Intentions—He said he could perfectly support them, that he thought well of the old Sett, but was convinced they could not serve
him any longer & that their Principles had been injurious to the July Nation and his own Family, & were founded in Mistrust — 1

1 It is probable that the Freeholder now publishing by Rivington was a Paper from Head Quarters. — Wm. Smith's Diary (MS.), VII.

Notice is given to the refugees and others that the governor permits those who have no seats "in either of the Episcopal Churches" in New York, to use "the Great Court Room in the City Hall" for divinity service -"in which the Resident Clergy" will conduct in rotation.- N. Y. Merc., JI, 1, 1782.

Charles James Fox, in a speech in the house of commons, says:—

"It is the intention of the administration to give America unconditional and unequivocal Independence." — The Speech of the Right Honourable Charles James Fox on American Independence: spoken in the House of Commons, on Tuesday, July 2, 1782 (London, 1782).

I. The state legislature of Virginia, under the auspices of Governor Dinwiddie, to confirm Conveyances by Tenants in Tail, to distribute Estates Real, of Intestates, to remedy defective Conveyances to joint Tenants, and directing the Mode of such Conveyances in future. — The text of this law is included in a compilation entitled Laws of the Legislature of the State of New York, in force against the Loyalists, and Affecting the Trade of Great Britain, and British Merchants, and Other Having Property in That State (London, 1786), 91.

2. "It is intimated to me," says Smith, "that Mr Magruder Prince Wm.'s Tutor wished a Copy of my History [see 1757] might be put into Adm. Digby's Hands for his Royal Highness & says it will be well rec'd—I did not like the Parade of a Letter to the Admiral & preferred giving it to Magruder, but he declines it out of Delicacy to the Admiral. He consequently sent a Copy bound up with the Review of the Military Operations published in 1776 to Adm. Digby with a short Letter & the Adm. answered it this Day & says the Prince rec'd it with Pleasure." — Wm. Smith's Diary (MS.), VII.

15. The people of Connecticut, "being determined to release their Brethren as fast as possible," send about 90 prisoners to New York to exchange for as many seamen confined here.—N. Y. Merc., JI. 1782.

16. All free male negroes, over 14 years of age, not employed in "the Public Departments," are required "to appear on the Common fronting the Provost," to be registered.—Royal Gaz., JI, 13, 1782.

18. Cricket is to be played "on the Green, near the Ship Yards." — Royal Gaz., JI, 13, 1782.

Smith expresses to Gen. Robertson the hope that before the latter departs he will "first give the City a good Charter for the Salvation of his Fame as well as the public Good." Along the same line Smith suggests that "a Mayor's Court might be instituted to relieve the Police." — Wm. Smith's Diary (MS.), VII.

19. The field officers of the four battalions of the City Militia publish a denial that there have been desertions from these battalions. — Royal Gaz., JI, 20, 1782.

25. Sir Guy Carleton has visited all the prison ships at New York, minutely examined into the situation of the prisoners and expressed his intentions of having them better provided for: That they were to be landed on Blackwell's Island, in New York harbour in the day time, during the hot season. — N. Y. H. S. Bull., JI, 1921, citing N. J. Gaz., JI, 24, 1782.

29. "People here in general talk of peace; many wagers are laid that it will be confirmed by next packet; but though I do most sincerely long for peace, I fear it will be patched up, greatly in favour of the Rebels, and against Britain; and it is expected. Washington will very soon be obliged to disband his men for want of money to pay them, as they can raise none by taxes, and the New England states are quarrelling among themselves, and send off flags to exchange their prisoners, contrary to Washington's positive orders. Within a few weeks a number of vessels have come in here from that part of the country with provisions, and got provisions from the Admiral." — London Chron., S 34-26, 1782.

Carleton has "Proper Sentiments," writes Smith in his diary, "of the Imbecility of the Rebel Party. He is anxious to hear from England & fearful that the Ministry may strike Hands with the Congress Agents in Europe under too high an Estimate of their Power here. If Lt. Genl Sir G [Carleton] will consult their best Interest—We are all impatient for the arrival of the Commissioners that the whole Work may proceed upon American Ground: I intimated to the Com: Genl as I have to Sir Guy Carleton that I thought the Congress already in the Project of preparing the People for a Reunion & looking to the Crown for Favor to themselves. I shewed him at the same time that it would be the Ruin of them in this Country which they had too long abused & holding general Esteem in it." — Wm. Smith's Diary (MS.), VII.

A man who left New York in the beginning of August reported on his arrival in London that "he saw and conversed with the Deputies from the New England Colonies, that were then at New York with Sir Guy Carleton, to know what terms had been proposed by this Country [Great Britain] to Congress, and what terms the Colonies were to accept. The Commissioners, notwithstanding the Congress laws subsisting to the Southward of New York, to prevent all communication between them and the King's garrison, there was an uninterrupted intercourse between New York and the Colonies to the Eastward; that vessels had gone out loaded with British goods into Connecticut, one of which had to the amount of 1500 l. others of less value; and a vast number of horses loaded with every species of goods, that was portable by such conveyances, went out of the city into the country." — London Chron., S 14-17, 1782.

An elaborate ceremony takes place in New York on this day when Prince William Henry delivers to the "King's American dragoons" the standards of their regiment. It is thus described in a letter of Aug. 2, 1782: "The American dragoons formed on very advantageous ground in front of their encampment, with two pieces of light artillery on their right. About 60 yards in front of the regiment a canopy was erected 20 feet in height, supported by 10 pillars; on the east side of which was a semicircular bower for the accommodation of the spectators. The standards were planted under the canopy on the right and left of the center pillar. At one o'clock his Royal Highness Prince William Henry, with his Excellency Admiral Digby, General Birch, and many other Officers of distinction, came on the ground at the right of the regiment, and having passed along both in front and rear of the line, receiving the usual salute, trumpets sounding, and music playing "God save the King!" posted themselves in the canopy, when all the officers of the regiment saluted together. The regiment then formed into half troops... and the whole passed in review before the canopy, performing the usual marching salutes. After having returned to the ground they dismounted and formed as a battalion, and then marched in close order, and formed a semicircle in front of the canopy. Their Chaplain, the Rev. Mr. Odell, advanced and delivered a pointed and elegant Address calculated for that purpose; after which the whole regiment, officers and men kneeling, laid their helmets and their arms upon the ground, held up their right hands, and took a most solemn oath of allegiance to their Sovereign, and fidelity and attachment to their standard, the whole repeating the oath together. This being finished, the Chaplain pronounced a solemn benediction, the regiment still kneeling. The regiment then returned to their ground, and again formed as a battalion, with their artillery on their right, and fired a royal salute; being again mounted, the whole saluted the standard together, and again marched by the canopy saluting the standards as they passed. As soon as the consecrating and saluting the standards was over, the regiment formed, his Royal Highness Prince William Henry, attended by Admiral Digby and Gen. Birch, and followed by the Hon. Lieutenant-colonel Fox and Lieutenant-colonel Small (bearing the standards), came forward to the centre of the regiment, where his Royal Highness, receiving the standards from his Excellency Admiral Digby, presented them with his own hand to Lieutenant-colonel Thompson, who delivered them to his eldest Cornet; upon a signal given the whole regiment, with all the numerous spectatots, gave three short guns, the trumpets sounded, the music played "God save the King!" the artillery fired a royal salute, and the ceremony was concluded." — London Chron., O 3-5, 1782.

Sir Guy Carleton and Admiral Digby write to Gen. Washington that they have just received information from England "that negotiations for a general peace have already commenced at Paris; and that Mr. Grenville is invited with full Powers to treat with
A. BROADSIDE PUBLISHED BY THE FIRST ESTABLISHED INSURANCE COMPANY IN NEW YORK. SEE JUNE 15, 1787 (P. 1218).

B. PAGE OF CHRISTOPHER COLLES' ROAD-MAP, 1789, SHOWING ROADS ON MANHATTAN ISLAND. SEE P. 1234.
all the parties at war;” also, that the king, “in order to remove all obstacles to that Peace which he so ardently wishes to restore, has commanded his Ministers to direct Mr. Grenville, that the Independence of the Thirteen Provinces should be proposed by him, in the first instance, instead of making it a condition of a general treaty; however, without the highest confidence, Loyalists shall be restored to their possessions, or a full compensation made them for whatever confiscations may have taken place . . . .

Transport, they state, have been prepared to convey American prisoners to this country, to be exchanged here. They urge, “by every consideration of humanity, the most speedy exchange.” A proposal has been made that the British soldiers, so exchanged, shall not serve in or against the Thirteen Provinces for one year.

—Royal Gaz., Ag 7, 1782. Inhabitants within the British lines were requested to appoint delegates to meet at Roubalet’s Tavern on Aug. 9 to consider this communication and adopt suitable measures.—Ibid. Commenting on the news, Smith writes that it is “Evidence of great internal Deity—of Man’s menaces from other European Powers . . . That it must light up a Civil War in Great Britain unless it was not absolutely necessary to Self Preservation—That the Ministers who advised it would not be safe from Assassination in the Streets of London—That it would transfer the Affection of all America to France—That we thought we had in himself a sure Fledge for Liberty to America & vigor to put down Oppositions to the Importance of our Independence. As the Situation of our Affairs was at present more flattering to our Wishes than at any Time within the five Years past, those who advise the Measure must have Republican Desires to overturn the Constitution and upon the whole that this Information shook me as much as the Loss of all I had in the World & my Family with it.”—Wm. Smith’s Diary, VII. Subsequently “some observations” upon this letter were printed in the Royal Gazette, Aug. 17 (v.r.). His diary discloses that Smith wrote these “observations.”

Smith writes that he hears it asserted “that the People of England are in general tired of the War & desirous of Peace at any Price.”—Wm. Smith’s Diary (M.S.), VII.

Henry Ludlam advertises a bathing house, for the use of ladies, which he has erected in his yard on North River, adjoining Powles Hook Ferry. His charge is four shillings for bathing “each time.”—Royal Gaz., Ag 3, 1782.

“This evening all the citizen watches in New York were discontinued on account of the peace, by the English and Hessians.”—Pown Krafft’s Jour., 165.

A letter written from New York contains the following: “The common understanding is, the country is set on peace, &c. from Philadelphia, Boston, and all the northern provinces, are admitted without flags of truce to come in and purchase goods, &c. without molestation. The troops are encamped between King’s Bridge and Greenwich. Washington is about 15 miles off; both armies remain quiet, and [there is] no appearance of hostilities.”—London Chron., S 12–14, 1782.

One “Captain Rover” publishes the following letter, dated at Boston, Aug. 7, and addressed to “Mr. Printer”:

“Happening to be at Mr. Bracket’s tavern last Saturday, and hearing two gentlemen conversing on the surprising alteration in regard to the treatment our prisoners met with in New-York, and as I have had the misfortune to be more than once a prisoner in England, and in different prison ships in New-York, and having suffered every thing but death, I cannot help expressing my surprise at that to any thing I hear or read relating to the treatment our brave seamen met with on board the prison ships in New-York. One of the gentlemen observed that the treatment to our prisoners must certainly be much better, as so many of our Commanders had signed a paper [see Je 22] that was wrote by Mr. David Sproat, the Commissary of naval prison ships in New-York. The other gentleman answered, and told him he could satisfy him in regard to that matter, having seen and conversed with several of the Captains that signed Mr. Sproat’s paper, who told him that aloth they had put their hands to the paper, that Mr. Sproat sent them on Long-Island, where they were upon parole, yet it was upon these conditions they did it, in order to have leave to go home to their wives and families. He added, that the paper was in the hands of the Proprietors to admit their prisoners to Independence, creates as much disgust in them, as it does in the Loyalists, who always thought this imaginary blessing, the heaviest curse that could befal this country.—The objections that arise, as are various
as their apprehensions of its effects upon their interests and Aug. views."

17 Some of the reasons given are: "It may not be feasible, even with a more extensive dominion, to raise the immense sums requisite to satisfy the Loyalists..."

"Others are alarmed at the demands that are to follow for the debts to the French Governors and Merchants, as well as to other nations..."

"The American soldier perceives the vanity of the promises of the vast arrears of pay, and of the land premiums they have been led to expect, in the luxury of liberty beyond the Blue Mountains..."

"The Congressional creditors are in pain both for their interest and principal..."

"Still less do the herd of purchasers of confiscated estates see ground to hope for an indemnity, to restore what they are to give up in the general tax..."

"The merchants too are under the keenest anxieties, as they have no kind of a claim upon the community at large for what they owe abroad..."

"Perhaps no class of men feel greater apprehensions than those who have been the chief instruments in gulling on their countrymen to contend for this phantom [of Independence]..."—London Chronicle, July 21, 1782.

20 The birthday of Prince William Henry, who is 18 years of age, is celebrated. Admiral Digby gives "a very elegant Dinner..." to all the great Officers of State; and in the evening, "a splendid illumination, Ball and Supper" are held in his honour at Greenwich, by Capt. Salter, commander of H.M.S. "Santa Margareta."—N. Y. Merc., Aug. 26, 1782.

22 Probably the most complete records of court-martial proceedings during the British occupation of New York are those for the trial of Col. James Gordon, of the Third Regt. of Foot Guards, who was charged with neglect of duty before the court on June 23, 1782, near Springfield, N. J. Beginning on this day, in New York, the trial continued until Sept. 24. The proceedings were published in London in this year.—See Bibliotheca Americana (Cat. of the John Carter Brown Library), item No. 2866.

26 Hugh Gaine offers for sale "An actual Survey of the Coast of America from Sandy-Hook to Cape Breton, on a very large Scale."—N. Y. Merc., Aug. 26, 1782.

31 The rental of quarters for the British army from June 1 to this date, paid out of the vestry funds, amounts to $10,681.14. New York currency; a statement to this effect is signed by John Smyth, treasurer.—Steven's, Cat. Index of MSS., 1761-1783, Library of Congress, citing the original record in the Royal Ist. of Gt. Britain & Ireland.

In this month, The New-York Evening Post, a tri-weekly newspaper, was established. The date is determined from that of the only issue located, that of Mar. 21, 1783, which is No. 86 of Vol. II. This was a paper of quarto size, published by the firm of "Sower, Morton, and Horner," consisting of Christopher Sower, Jr., William Morton, and Samuel Horner. It is in the archives of the N. Y. H. S.—Brigham, in A. A. S. Proc. (1917), 410. See, further, Ap. 1783.

Lieut. Von Krafft, on a "Work command," states that "Men were sent out to dig wells," but "could not find anything but the faintest and poorest springs, even at a depth of 30 and 40 feet." All "the wells and ditches round about were dried up."—Von Krafft's MS., 1783.

8 "Sir Guy Carleton has in several Days past collected his Army from Long Island and means to reside himself near them at Hoor's [Horn's] Hook."—Wm. Smith's Diary (MS.), VII. See S 17.

The barracks of the American post at "Berger-Point, near Pauks-Hook, on the Jersey shore," are destroyed by fire.—Penn. Gaz., S 14, 1783.

In a letter to ex-Gov. Tryon, William Smith expresses the opinion that it is still not too late for England to effect a reconciliation with the colonies. If the ministry will "send authority to drive the Compact here, and discontinue the Negotiations at Paris, your American Affairs are still recoverable, and I flatter myself now they are rid of the madmen of the Rockingham Heresy that all will still go well... New York is now moving Congress to amend the Confederation—This I think imports much good & [we] shall soon know what is meant by those who would gladly be 10 American Peers."—H. James' Papers (MS.), 1783.

Writing to a friend in England, a New Yorker says: "The refugees have abandoned their post at Bergen Point; many of them, perhaps all, are going to Halifax, where lands, according to their merits, are to be assigned to them. The army here is encamped in two lines across the island; one at Macgowan's Pass, nine miles off. Col. Robinson's Corps and some Hessian Commissaries have charge of the city. I suppose the march of the French troops from the southward to this neighbourhood, has occasioned these movements."—London Chron., O 29-31, 1782.

A British officer on board the "Prince George" man-of-war writes from New York to a friend in Edinburgh: "Every necessary here is beyond imagination dear; beef and mutton from 2 to 6 d. and some orange | A general or Commissary can get a fowl 1 yesterday gave three dollars for a pair of shoes. The political situation of things here, by the enquiries I have made, has continued much the same as after the unfortunate affair of Corwallis.

"The Prince went to see in the Warwick the day before we arrived off the hook. Admiral Digby's cruisers have been very successful."—London Chron., O 26-29, 1782.

An officer in Admiral Pigot's fleet writes from "off Sandy Hook": "We arrived off here on the 4th instant all well, and were immediately joined by the Warrior and Invincible, who, after undergoing their repairs pushed after us, from Jamaica... Our fleet at present consists of 26 sail of the line, 1 fifty, and 7 frigates... We have shifted our station, 13 sail of us being now moored at Staten Island, with 14 of the British fleet, lies abreast of New York. We find great plenty of provisions, and are abundantly supplied with fresh beef twice a week. Vegetables are scarce, owing to the dryness of the season, which is universally complained of on this coast. We found 8000 British troops encamped at King's Bridge, and about 4000 different small encampments round New York. The Rebel army, under Washington, are at the White Plains and Greenpoint, have lately been joined by a considerable body of French troops."—London Chron., O 22-24, 1782.

Another letter from New York states: "Savannah is abandoned; Charlestown will share the same fate in a very short time; and we suspect this place will scarcely remain in our possession this winter.

"There has been a disorder here similar to your influenza; few families have escaped it."—London Chron., O 26-29, 1782.

Carleton left town this morning, says Smith, "& went into Westchester County with 3000 Men & brought in before Night near 100 Loads of Forage. He was doubted apprehensive that it would be carried off by Washington as soon as joined by Rochambeau with 4000 & that [he] now about crossing at King's Ferry—Washington at Verplanks Point with all his Forces—He will probably go out again for more."—Wm. Smith's Diary (MS.), VII.

Carleton moves "his Baggage and Family to the Army 7 Miles out of Town [see S 8]. This Vigilance pleases the People."—Wm. Smith's Diary (MS.), VII.

Rivington publishes a General Idea of the State of North America. The Packet is to sail next week & the Intention of this Paper is doubtless on this Side of the Water to repres a Vindicative Spirit—On the other to correct the Design of the Rockingham Party for giving up the Dependance of the Colonies—Mr. Shoe-maker had the Perusal of the Draft last Monday and no other Person."—Wm. Smith's Diary (MS.), VII.

A lot is advertised for sale which is described as "frosting Petticoat Lane or Field Market Street."—Royal Gaz., S 25, 1782. For the history of this street, see L. M. R. K., III: 1005.

On account of the scarcity of butter in the market for private sale, a public auction is to be held of 1,000 firkins of butter at the Kings Stores in the yard opposite to Waddington's Brewery.—Royal Gaz., S 25, 1782.

A horse-race is announced for this day "at Mr. George Mason's, at the end of Harlem Lane," the prize a "very neat Saddle and Bridle."—N. Y. Merc., S 8, 1782. The next month, a similar prize was offered to the winner of a race to be held Oct. 2, "at the Bull's Head Tavern, Bowery."—Ibid., S 20, 1782. This custom of racing on the public roads was deemed very dangerous, and on Ap. 30, 1783 (p. v), the sport was interdicted.
1782  Oct.

Capt. Alexander Coffin, Jr., an American naval officer, captured by the British, wrote later an account of his experiences on the "Jervy" prison-ship, which was in part as follows: "... We arrived about the beginning of October at New-York, and were immediately placed on board the prison-ship in a small boat, called, ironically enough, the Relief, commanded by one Gardner, an Irishman. This schooner Relief pled between the prison-ship and New-York, and carried the water and provisions from the city to the ship. In fact, the said schooner might emphatically be termed the Relief, for the executable water and provisions she carried relieved many of my brave but unfortunate countrymen by death, from the misery and want of food and water in the small prison-ship. Before I go on to relate the treatment we experienced on board the Jersey, I will make one remark, and that is, that if you were to rake the infernal regions, I doubt whether you could find such another set of D.EMONS as the officers and men who had charge of the old Jersey prison-ship. ... On my arrival on board the old Jersey, I found there about eleven hundred prisoners; many of them had been there from three to six months, but few lived over that time if they did not get away by some means or other. They were generally in the most deplorable situation, mere walking skeletons, without money, and scarcely clothes to cover their nakedness, and overrun with lice from head to foot. The provisions, Sir, that were served out to us was not more than four or five ounces of food each day; all condemned provisions from their ships of war, which no doubt were supplied with in their stead, and the new in all probability charged by the commissaries to the Jersey. They, however, know best about that; and however secure they may now feel, they will have to render an account of that business to a Judge who cannot be deceived. This fact, however, I can safely aver, that both the times that I was confined on board the prison-ship, there never were provisions served out to the prisoners that would have been eatable by men that were not literally in a starvation situation. The water that we were forced to use was carried from this city; and I positively assert, that I never, after having followed the sea thirty years, had on board any ship, (and I have been three years on some of my voyages) water so bad as that we were obliged to use on board the old Jersey; when there, as it was, to tanatilize us, as fine water, not more than three cables' length from us, at the still in the Wallabout, as was perhaps ever drank. "There were hogs kept in pens on the gun-deck by the officers of the prison-ship for their own use; and I have seen the prisoners watch an opportunity, and with a tin pot steal the bran from the hogs' trough, and go into the galley, and when they could get an opportunity, and enjoy the enjoyment of pitiful good soup when hungry. This I have seen more than once, and there are those now living beside me who can bear testimony to the same fact. ... I reflect how many hundreds of my brave and intrepid brother seamen and countrymen I have seen in all the bloom of health, brought on board of that ship, and in a few days murdered there, the consequence of the savage treatment they there received; "

"In early March, 1783, again a captive, Capt. Coffin was once more confined on the "Jersey," where, he says, the greater number of his former fellow-prisoners "had taken up their abode under the surface of that hill, ... where their bones are mouldering to dust. ... The "Jersey" being crowded, he was transferred with others to the "John," which was a transport of about 300 tons. "There we were treated worse, if possible, than on board the Jersey; and our accommodations were infinitely worse, for the Jersey being an old condemned sixty-four gun ship, had two tier of ports fore and aft, air ports and large hatchways, which gave a pretty free circulation of air through the ship; whereas the John being a merchant ship, and with small hatchways, and no ports, and the hatches lashed down every night, and no man allowed during the night to go on deck, ... was enough to destroy men of the most healthy and robust constitutions. All the time I was on board this ship not a prisoner eat his allowance, bad as it was, cooked, more than three or four times; but eat it raw as it came out of the barrel. ... Almost (and in fact I believe I may safely say) every morning a large boat from each of the hospital ships went loaded with dead bodies, which were all tumbled together into a hole dug for the purpose, on the hill where the national navy-yard now is. ..."—From The Destructive Operation of Foul Air, Toainted Provisions, Bad Water and Personal Flishness upon Human Constitution; exemplified in the unparalleled Cruelty of the British to the American Captives at New York during the Revolutionary War on Board their Prison and Hospital Ships, in a communication to Dr. Mitchell, dated September 4, 1807 [citing the Medical Repository, XI: 260-67]. Also A Letter to the Tammany Society upon the same subject, by Captain Alexander Coffin, late Surgeon on the transporting ships, with an Introduction by Charles I. Bushnell (N. Y., 1865).

"A Gentleman of Character in New York" writes to a friend in England that "... the army is still encamped towards King's Bridge, and that of the Rebels and French near Crom-Pond. The latter does not exceed 8000 men, so that there is no danger of an attack on New-York. The Navy is still up in the three middle colonies, who have paid more taxes than all the others, and the officers and leaders are still very violent: ... The post at Lord's Neck is abandoned, and what is to be done with the wretched Refugees I know not; the door is shut against their return, and they have no hopes from Britain, where men, they think, are more inclined to their enemies than to them. The panic that we had on the first news, occasioned alarming desertions in some of the provincial corps, but it is getting over, as those who deserted did not find the reception they expected, but the late removals we have had, (the battalions are now encamped at New-York,) will in part continue it. ... Admiral Pigot with his fleet is still here; the French at Boston; the Admiral has fortified the islands in the bay, with an appearance of fear of an attack, and the Brigadiers of militia are ordered to have the militia of New York, driven off the garrison of Charlestown, a second division falls in a day or two; an evacuation of New York is expected, and many are preparing accordingly."—London Chron., N 16-19, 1782.

"To day the Prince [William Henry], the Admiral [Digby] and all the Generals reviewed the whole army which was in camp drawn up in three lines of battle, in the neighborhood of Harlem."---For Kraft's Jour., 168.

The first convoy of loyalists sails from New York for Nova- Scotia. It consists of a "fleet of transports, having on board a number of Loyalists with their families, amounting in all to 460 persons." Previous to embarking, "they were supplied from the King's stores with provisions of all species, sufficient for their support for a full year, besides an allowance of 21 days rations for their passage; they were also furnished at the expense of Government with comfortable cloathing for men, women, and children, with a proper assortment of medicines, various kinds of handvandy tools and arms and ammunition for hunting and defence. They are to have liberal grants of lands in that province, surveyed and laid out for them at the public cost; such of these Loyalists as were in the employ of pecuniary allowances from government, received also a full year's pay in advance. They are mostly Farmers who have been driven from their dwellings and possessions by the enemies of Gt. Britain, and having families to support and seeing no prospect of a speedy peace, petitioned to be allowed a settlement in Nova Scotia."—Royal Gaz., O 19, 1782; Winsor, VII: 199. The entire company of refugees in America was concentrated in New York, by the gradual reduction of the number of British ports. See the chapter on "Expatriation," in Van Tyne's The Loyalists (1902), 236.

"A great number of refugee families are preparing to leave New York; and the best informed gentlemen on the lines assure us, that great preparations are making, which they suppose for a general evacuation.—David Mathews, the mayor, and several other active loyalists, have taken vessels for the transportation of themselves and families."—N. J. Gaz. (Chatham), O 23, 1782.

Washington writes to Lafayette that, while there is some belief that the British now are to evacuate New York, they still remain there. —Writings of Geo. Washington (Ford ed.), XI: 101-2. On Dec. 18, he wrote in the same vein to Maj.-Gen. Greene. The British force in New York was then over 10,000.—Ibid., p. 125.

Luit. Von Kraft moves temporarily into "Arnold's house No 5", and sets down for the Pump Room and other "suppers and the washing of our clothes."—Ibid., p. 125.

Valentine Wirth advertises his residence for rent, "in Green- street, No. 9, and a good stable and a copper [kettler], ... near the Foundery, opposite the Old Mill."—Royal Gaz., O 23, 1782.

A British officer writes from New York to a friend in Cork: "The
Congress have treated the offers of Independence, made to them by Great Britain, with the utmost contempt... The offer of Indepeudency has not been of the smallest benefit, on the contrary, it has been of much mischief. It has made the rebels very violent.

"The hard money tax has been collected with more ease than it otherwise would; indeed it appeared that the rebels could not have collected one-sixth of the stipulated sum, had it not been for the unfortunate offer of Independence. Every thing seemed to be at a stand with them, and I am fully convinced, that if nothing was done by us, except that we held New York and Charles-town, and ruined their commerce, in a very little time they would wish for peace; but whilst Indepeudency is in agitation, and evacuation talked of, it is no wonder they are in high spirits."— London Chron. J a 4-7, 1783.

26 John Adams, one of the peace commissioners, arrives in Paris. —Winsor, VII: 137-34.

Lieut. Von Kraft takes up quarters "at Martin's Wharf in Leffert's house, where Gen. Carleton had lodged this summer and where no officers occupied the large number of rooms." —Fon Krafts' Joum., 1783.

The following letter is written by a privateet officer imprisoned on the "Jersey": "The deplorable situation I am in cannot be expressed. The captains, lieutenants and sailing masters are gone to the provost, but they have only got out of the fying pan into the fire. I am left here with about 700 miserable objects, eating up with rice, and taking favings, which carry them off fast." —Salem correspondent in Penn. Packet, J a 2, 1783.

A young Irishman, recently arrived in New York in a cargo brigg from Cork, records in his journal: that, "being a Presbyterian," he "enquired for a meeting House, but was informed there was none, that Profession being as much distressed as possible since the Commencement of the War." He comments on this: "is it not terrible to think that English Subjects on this side the Atlantic cannot enjoy that Liberty of which they boast so much on the other, but are depending on the Capricious tempers of governors—who deprive them even of the exercise of their religion. . . ." —From the original MS, printed in N. Y. P. L. Bull., Nov., 1921.

A fleet of "twenty-three sail of victuallers and transports" arrived at Sauty Hook. They had sailed from Quebec on Oct. 11 "under convoy of his Majesty's ships Albermarle of 28 guns, Horatio Nelson, Esq; [later Lord Nelson] commander, and the Pandora, of 24 guns, . . ." —Royal Gaz., N 13, 1782. Nelson was at this time a captain, 24 years of age.

In a private letter, written on board the "Albermarle" on Nov. 13, he told of meeting Prince Win. Henry in these words: "I had the honour of an introduction to the Prince on board the Burchard by my Lord Hood, was much pleased with him he will make a good sailor or I am much mistaken we shall be proud of him." —From facsimile in Man. Com. Coun. (1889), 875; N. Y. Geneal. and Bir. Rec. (1871), II: 35.

In later years, the prince described this interview which had left a vivid impression upon him. He said: "I was then a midshipman on board the Burchard lying in the narrow of Staten Island, and had the watch on deck; when Captain Nelson of the Albermarle came in his barge alongside. He appeared to be the merest boy of a captain I ever beheld, and his dress was worthy of attention. He had on a full-faced uniform, his bark unpowdered hair was tied in a stiff Hesittan tail of extraordinary length: the old-fashioned flaps of his waistcoat, added to the general quietness of his figure, produced an appearance which particularly attracted my notice, for I had never seen anything like it before, nor could I imagine who he was, nor what he came about. My doubts were, however, removed, when Lord Hood introduced me to him. There was something irresistibly pleasing in his address and conversation; and an enthusiasm, when speaking on professional subjects, that shewed he was no common being." —Watin's, Life and Times of William the Fourth (1851), 16. Charles Loolesey, are requested by the Trustees, to meet this Evening, at Six o'Clock, at the Widow Todd's Tavern, near the Ferry-Stairs. —Royal Gaz., N 16, 1782. Loolesey had taken over the tavern at the Brooklyn Ferry in 1779 (q. v., My 7). His house furnishings were sold for the benefit of creditors on N 26 (q. v.).

A notice advertisement announces the auction sale of Loolesey's effects. The list of goods reveals something the character of the furnished in of a high-class tavern of the period. His furniture and effects include: "all the genuine Household Furniture, consisting of Mahogany and other Bedsteads, Feather Beds and Matrasses, Chintz and other Curtains, Blankets, Sheets, etc, Mahogany Drawers, Dining, Tea, and Card Tables; an elegant Clock in a Mahogany Case; a curious Collection of well-chosen Paintings and Pictures; a large Pier and other Looking Glasses, in gilt and plain Frames; Table and Tea Sets of China, Plate, etc. A capital well toned Organ, made by one of the first Hands in London. A Billiard Table, lately put in thorough Repair. Near twenty Globe Lamps, fit for Hall or Passage. A large quantity of Damask and other Table Linen. Kitchen Necessaries of all Kinds. Wagon, Horses, Cart, and Uppen, belonging to the Adjoining the House. A Flag Staff, with Ensigns, Pendants, and several Hundred of transparent and Tin Lamps, fit for an illumination.

"N. B. The Things to be viewed any Time, before the Day of Sale"—Anthony Van Damm, Charles Keeling.

—Royal Gaz., N 20, 1782.

Provisional articles "for treating of peace" between Great Britain and the United States are agreed upon and signed in Paris by Richard Oswald, the British commissioner, and John Adams, B. Franklin, John Jay, and Henry Laurens, four of the commissioners of the United States. These articles are "to be inserted in, and to constitute the Treaty of Peace, proposed to be concluded . . . but which Treaty is not to be concluded, until terms of a Peace shall be agreed upon between Great-Britain and France; and his Britannic Majesty shall be ready to conclude such Treaty accordingly."—Published with the Acts Passed at the Second Session of the Congress (1790), 161-64. See also an address delivered before the N. T. H. S., on Nov. 27, 1883; by John Jay, on The Peace Negotiations of 1782 and 1783, pub. by the society, 1884; and Winsor, VIII: 137, 144; VIII: 414, 453. The announcement of this event, which later culminated in the signing of preliminaries to a general peace on Jan. 20, 1783, was made in New York on March 25, 1783 (q. v.). For the Definitive Treaty, see 53.

Joseph Stevens, a livery-stable keeper, advsiest that he has provided a four-horse carriage to make regular trips from his house, No. 16 Broadway, near Fort George, to Fort Knap lady and return. —Royal Gaz., D 4, 1782.

In a speech to parliament, King George says: "I have pointed all my views and measures, as well in Europe as in North America, to an entire and cordial reconciliation with those Colonies. . . ."

"Finding it indispensable to the attainment of this object, I did not hesitate to go the full length of the powers vested in me, and to order to declare the Free and Independent States, to take effect whenever terms of peace shall be finally settled with the Court of France. . . ."

"In thus admitting their separation from the Crown of these Kingdoms, I have sacrificed every consideration of my own to the wishes and opinion of my people: . . . Religion, language, interest, affection, may, and I hope will fairly prove a bond of permanent union between the two countries: To this end, neither attention nor disposition shall be wanting on my part. . . ."

"Having manifested to the whole world, by the most lasting examples, the signal spirit and bravery of my people, I conceived it a moment not unbecoming my dignity, and thought it a regard to the lives and fortunes of such brave and gallant subjects to shew myself ready to embrace fair and honourable terms of accommodation with all the powers at war. . . ."

"I have the satisfaction to acquaint you, that negotiations to this effect are considerably advanced, the result of which, as soon as they are brought to a conclusion, shall be immediately communicated to you."—N. Y. Merc, F 17, 1783. See F 25, 1783.

Carleton informs me, says Smith, that he has "written for Leave
1782 to come Home & that he expected it by the next Packet.—I told him with emotion that the Business of America was up & every Man would as soon as this was known look to himself. That the Whigs would impute his Resignation to a Discord between his Liberty & the Designs of the Government & believe the worst of the letter as they did the best of him & his Intentions.

"He told the Minister of his Plan & sought others which he believed had been treated with deserved Consent—That he did not want the Provols of his Place & he could [not] pursue Measures he did not approve.

"He said he was importuned from all Quarters to know what he had to offer to America—and felt himself very unhappy to be able to give no Answer to the Expectations of the People.

"He complained at the same Time of the Restraints upon his Arms tho’ he wished he said not to use them nor thought any Thing more was necessary than to have it known that he was not restrained to give Success to proper Overtures.

"He agreed with me that as no Accident had weakened our Navy the Disposition of America became daily more favorable to negotiations & would continue while we maintained a Naval Superiority—I remark’d that this proved no Time had elapsed to our Detriment and that the news we had this Day of the Repulse of the Enemy & the Relief of Gibraltar, were Grounds for high Confidence had he his expected and requisite Powers.

"I believe on the whole that his Request of Leave to resign is a Signal of Policy to serve Lord Shelburne in the Cabinet and please the King, as well as to exalt his own Character. He seems pleased at all my Fears of the Event of his Departure and as I rose to leave him beg’d me to take Reference of Compl’s for the Non Restitution of Property and said he would support my Opinions & Reports."—Wm. Smith’s Diary (MS.), VII.

24 A Fleet of 80 or 90 Sails leave the Hook for England. It is probable that Vandurell’s Fleet are gone or about to Sable from Boston and many have anxieties for our’s. It is strange that they have been here so long. It is imputed to Dibby’s Desire to employ the Men of War on the Coast.—We are also uneasy for a Fleet ex-pected from Charles Town—Vandurell may think fit to visit that Coast. By the Boston Papers the French Army came on to Boston about 3d Instant to embark.—Wm. Smith’s Diary (MS.), VII.

27 Carleton tells Smith "he has not his expected Powers—that they do not consent to his Absence—will wait his Reconsideration. Does not see to like the Implication of Rashness & the Possibility of Changing his Mind.—I express’d my Hope that before his Letter now gone arrived, he would have his wishes gratified by com-plete Autorities. He replied they were promised, but he doubted the Fulfilment, because there has been some time since. This led me to observe that Lord Shelburne was im-barrass’d by his Engagements when in Opposition and then to shew that tho’ accidents might have happened to render the Detention of the Powers censurable, yet that nothing was lost but matters mended by the 12 April & Relief of Gibraltar. He spoke ag’ the Negotiations at Paris, and I replied that they gained Time & this gave Place to the abatement of the Frenzy of Party. He considered the Mutability of Temper in England, express’d astonishment that the Rockingham’s should be popular for backing the Independency, & now be ruined for contending for what the People then approved."—Wm. Smith’s Diary (MS.), VII.

30 John Delsafe, "Agent Victualler," publishes the following: "Notice is hereby given, to any Person or Persons, inlinable to enter into an Contract for supplying Fresh Beef to his Majesty’s Ships at this Port, to send in their Proposals to me, in Writing, sealed, on or before the 5th of January next, on board the Cen-tury Victualler, at Hallet’s Wharf, or at No. 217, Water-Street.—Royal Gaz., Ja 1, 1783; De Vos, Market-Book, 171.

1783

In this year, Pelatiah Webster wrote and published a tract entitled A Dissertation on the Political Union and Constitution of the Thirteen United States, or the Characters of a Citizen of Philadelphia, in which he proposed that the federal government have a congress of two houses, a federal judiciary, and heads of departments. This having started discussion, Noah Webster, in

1785, wrote and published Sketches of American Policy, to express the need of a stronger government.

A manuscript judgment-roll, consisting of the names of loyalists, arranged alphabetically, against whom judgments have been found under the Confiscation Act (see O 22, 1779), shows their names, addresses, occupations, dates when indictments were found, and dates when judgments were rendered (most of them in 1783). This roll occupies the latter half of a thin folio ledger (MS.), the first half of which consists of naturalization statistics (1740–1769), and a list of immigrants (1802–1814). It is preserved in N. Y. P. L., MSS. Div.

For a list of privateers fitted out at New York from 1777 to 1783, including the Man. Comm. (1780), 875–99.

The following description of the eastern shore of Manhattan Island, from Corlair’s Hook to Kipps’ Bay, as it was in 1782, was published in 1835 and signed "Joshua":

"At the point of Corlair’s Hook were the ruins of an old house, and the remains of a fortification thrown up by the Americans in 1776, to the northward of the point were the houses of Abraham Cannon, of Caspar Miller, and a Mr. Hamilton. Mr. Cannon kept a tavern, and ferry boats to carry passengers over to Bushwick. The houses above mentioned were the only dwellings which stood near the river, between Corlair’s Hook and the house of Mr. Kipp at Kipp’s bay. The house of Mr. Kipp was dreadfully shatered by cannon balls when the British landed at that place. Between Corlair’s Hook and Brande Mole Point, lay a small island. This island itself contained about two acres of land, which on the easterly side had an elevation of about fifteen feet. Between Corlair’s Hook, the Island, and the Point, lay the meadow called Stuy-venant’s Meadow. From the Point northwesterly, the land gradually descended to a hard shore, which connected the Point with the Stuyvesant Farm. On the bluff of the Point were the remains of a small breast work, also thrown up in 1776. Two heavy pieces of ordnance, from this point, flew the Rose frigate (Captain Wal-lace) with seventeen balls in eighteen discharges. The ship would have been sunk if the darkness had not saved her; she was removed in the night.

"Between Corlair’s Hook and Brande Mole Point, lay the Corlair’s Hook Fishery. The fishermen erected their shanties on the small Island before noticed. A flat lay between the Hook and Point, whereon the scines were drawn.

"On the northeasterly side of Brande Mole Point, lay Stuy-venant’s Fishery, in the cove bearing the owner’s name. From the Point towards the Cove, the bottom and shore was hard, with a few rocks for about two hundred yards; then began an extensive mud flat, which continued beyond the Stuyvesant Farm.―N.Y. Gaz. Gen. Adv., Ja 10, 1835. For further description by "Joshua," see 1787.

The street commissioner’s report of Feb. 6, 1809, to the common council, respecting the high-water mark on the Hudson River from the Battery to the State Prison (see L. M. R. K., III. 973) states that "A map in the possession of Trinity Church was made in or about the year 1755. . . . pretty distinctly delineates the line of high water along the property of Trinity Church from Fulton (Fulton) Street to the extremity of Anthony Liscrapard’s possessions."—M. C. C. (MS.), XIX: 395.

At this time, the mansion of the Philippines, on the corner of King & Smith Sts., was kept as a lodging-house. Later it became the Bank Coffee House, under the famous host, William Nilson (see 1814).—Duer, N. Y.: as it was during the latter part of the last century, 9–10.

St. Jean de Crévecoeur writes from Casa to Benjamin Franklin: "I have been Wittedness whilst I was in America of a Circumstance which I think, it Imports Your Excellency to Know; my Good Intention will I hope, apology for the Liherty I am taking, if your Excellency is acquainted With it; if unknown, it is Certainly my duty as a good Cysste of that Country to Inform you of what Follows—"In the year 1775 [error for 1776—E. T.] Samuel Bayard Junior deputy Secretary of the then Province of New York, was ordered by ye Convention to the house of Nicholas Bayard a Mile out of Town, in order to Watch over the records of the Province, then under the Guard of Capt. & Maj. Men; some time after [Je 14, 1776—Jour. Prac. Gen., L. 404], they were transported to Kingston on the North River, Vulgurly Called Eusopos [see O 19, 1777]; under the Guard of the Same Person, & the Same
Military Party; 18 Months after the said Samuel Bayard, Contrary to ye oath he had Taken to ye Convention, found Means of Sending these Records whereon the Grant of 500 Shillings &c. to Gov. Tryon then on board the Dutches of Gordon; Since that, they have been Conveyed to the Tower of London, where they now are; those papers, fortunately become useless to G. Britain, at the return of the Peace, must be of the Greatest Consequence to that State, because, as you well Know, they Contain not only the Title of Lands but the Copy of Wills for— that occur, Letters will be provided every day at 5 o'clock precisely—"—N. T. Merc., Ja 6, 1783. The Navy Coffee House was evidently one of the many taverns opened during the British occupation of the city, and closed before Evacuation Day. Cf. p. 7, 1778.

14. Alexander Grant, of the "Navy Coffee-House, Sign of Lord Cornwallis, near the Battery," returns his thanks to the Public in general, and to the Gentlemen of the Navy and Army in particular, for their past favours—legal or illegal, Letters will be provided every day at 5 o'clock precisely.—"—N. T. Merc., Ja 6, 1783. The Navy Coffee House was evidently one of the many taverns opened during the British occupation of the city, and closed before Evacuation Day. Cf. p. 7, 1778.

15. Gov. Robertson issues a proclamation appointing Jan. 23 as a day of thanksgiving. In it he says: "it hath graciously pleased Almighty God to bestow signal victories on his Majesty's Arms, and to defeat the united efforts of combined nations, whose powers, even when separate, have been formidable to all Europe." He recommends that prayers be offered "that these events may not only prove advantageous to our nation, but conducive to the Peace and Happiness of mankind."—"—N. T. Merc., Ja 20, 1783. It is "absolutely necessary," says Smith, "on Monday Evening [the 17th] that he expected to return to England on the arrival of another Mail. He is plainly disgusted at the Want of the promised Powers & grows more so as he perceives the Probability of his Success in the Use of it—I ventured to suggest that the present ministry had committed themselves to him—that if they did not secure the Reunion he could ruin them by disclosing that it had been in his Power—He said if they effected it he should be content."—Wm. Smith's Diary (MS.), VII.

16. Preliminary articles of peace between Great Britain and France and Great Britain and Spain are signed at Versailles by representatives of the three nations.—"London Chron., Ja 28–30, 1783. See N 30, 1782; also Winsor, VII: 87, 136. The preliminary treaty, however, does not affect the relations between the United States and Great Britain while the war continues between England and France.—Ibid., VII: 155.

Feb. 1. "The General does a very popular Act in ordering 35 Suits of Cloathing for the Naked Prisoners—Upham when [went] upon the Business yesterday & they were in an Extaty to the Relief. Many of these are Naval Prisoners who wish'd themselves under the Genl & Maj. to be scored. He says he think all that Suffic'd for his Care—This is adopting what we in our Report suggested as his Intention—viz that there should be no Misery in the House which Justice and the public Safty did not require.

"The Dinner to Day is another popular Act—I found there several Connecticut Refugees & several more just come in to drive Schemes of Commerce and among them a Pierpoint Edwards who has been a popular Leader—he is a New Haven Lawyer—Son of the celebrated Minister of Northampton—married Robert Ogden's Daughter of Elizabeth Town—They will sing Sir G's [Carleton's] Fame thro' Connecticut on their Return."—Wm. Smith's Diary (MS.), VII.

This is the date of the first of three monthly lists, published by Valentine, signed by William Cunningham, "Captain and Provost Marshall" at New York, showing the names, birthplaces, residences, crimes, and dates of confinement of prisoners in the provost. The names are divided into "Civil Prisoners," "Naval Prisoners of War," and "Land Prisoners of War," and following each list are annotations, showing the number of prisoners released since the last return, casualties (none being recorded); and newspaper extracts inserted by Valentine, making reference to previously published prisoners and crimes recorded in the lists. Among these extracts is that regarding John Paulding, one of the captors of Major André, who was himself captured in the attempted kidnapping of Col. De Lancey on Jan. 25 (see Royal Gaz., Ja 29, 1783).—"Man. Com. Corp. (1865), 906–12.

A House to be let, on Whitehall Dock, the sign of Lord Hood; and another in Little Dock street, No. 5, known by the name of the London Tavern.—Enquire of Patrick Blancherville, at No. 178, Water-street, near Burling's-slip."—N. T. Merc., F 3, 1783.

The "large and commodious tavern, No. 110, Water-street" (see p. 1, 1780), which has been run by John Cochran, is offered to let on May 1. The advantages of the house are numerous, "having long been used and resorted to as a public house," while the water from a pump in the yard is considered superior to the common tea water.—"N. T. Merc., F 1, 1783.

18. It is Matter of Joy to come to find Sir G Carleton estimating Courts Martial for the Trial of Citizens, after the great Reluctance he has expressed to this Measure. . . .

"He could not avoid it at this Juncture as to such Criminals as were not dischargeable in the Exercise of Habs Corps Powers, unless he detained the Prisoners as their Request to be tried. It is a Crab in the Order of Business of this Day.—Does not leave to the Court as formerly Civil concerns and is meant to procure the Discharge of the Prisoners from the Stain of rash Commitments & check the Police by exposing them when they are precipitate.

"The same Paper publishes the List of all Prisoners in the Provost agreeable to our advice—the Adm'r will not like it as to his Naval Prisoners—Sir G Carleton has distributed among the Naked there forty odd Suits of Cloaths, which they rejoice at with much Gratitude."—Wm. Smith's Diary (MS.), VII.

The king issues at St. James's a palace a proclamation, "declaring the Cessation of Arms, as well by Sea as Land, agreed upon between his Majesty, the Most Christian King, the King of Spain, the States General of the United Provinces, and the United States of America, and the Powers aforesaid, as is settled in the Whitehall Evening Post of Feb. 18.—"N. T. Merc., Ap 7 and 14, 1783; Man. Com. Corp. (1870), 774–75. See also broadside in N. Y. P. L. (Emmet Coll., 3271). It was proclaimed at New York on April 8 (p.t.).

The legislature passes "An Act to prevent private Lotteries, to remit certain Penalties . . . imposed under the Act of 1774. Lotteries are deemed a public nuisance and all such as were established by congress are excepted," Laws of N. Y. (1783), chap. 12; Ross, "The Hist. of Lotteries in N. Y., in Mag. of Hist., V: 217.

"At Dinner with the Adm'r [Digby] he tells me," writes Smith, "that the Congress is in his Debt for Naval Prisoners about 4000—that 1200 came from England—he has paroled 1200 & put in the Prison Ships about a 1000. No argum's can persuade Morris Marine agent to exchange cloaths or subsist them—They die here now go of a Week.—I advise him to publish a List & the Correspondence but he talks of printing private Letters as indiscrete.—In Short is a Fool unless he has secret Reasons for his Conduct of which he is ashamed."—Wm. Smith's Diary (MS.), VII.

Two Drafts of General Orders one to favor the Restoration of Houses &c to Persons within the Lines—The other to Persons without them [see F 18]—The Gen'l called this Evening to converse upon the Policy of them and tho' with some Reserve gave me to understand that it was intended to evacuate this Place by May & that he meant to cultivate a Temper friendly to the Loyalists & to stimulate the Loyalists to look out for their own Estates."—Wm. Smith's Diary (MS.), VII.

An extract from the Couririer de L'Europe of Nov. 29, giving the articles of peace as settled in London, is published in New York. It contains an "acknowledgment of the independence of the thirteen United States." By a particular article between Great Britain and the United States, "liberty is given to the Loyalists to remain in America without molestation, or to dispose of their property if it has not already been confiscated."—N. T. Merc., F 17, 1783.

The following orders, signed "Ol. De Lancey, Adjutant-General," are issued from "Head-Quarters, New-York:"

"Should there be any Persons, at present within the Lines, whose Houses or Lands have been withheld from them on Account of crimes or of False Information against the Crown, they are desirous to make their respective Claims to the Officers of Police in New-York, on Long-Island or on Staten-Island, who will report the same to the Commander in Chief.

"All Persons without the Lines, who have abandoned Estates within, are desired to send their Claims to the Officers of Police aforesaid, and all persons occupying Estates with the above Descriptions, are strictly enjoined to take due Care thereof, as they
would be made answerable for any Damage, Waste, or Destruction, which they may hereafter be committed on the same. They will likewise permit any Person authorized from either of the above-mentioned Offices, to visit the said Estates, and take Inventories of all Effects thereunto belonging. —N. Y. Merc., F 44, 1783; Mar. Com. Can. (1861), 277. In regard to this, Wm. Smith says: "The Adjutant General Col[?] D[iane]cay calls to show me a Change in the two orders for Restitution of Property [see F 15] and to know whether I object. He says he carried the first to Gen[eral] R[obertson] who suggested that the appointment of Ch. Justice Smyth and myself implied Censure upon the Polices & that the Commandant-Col[onel] thought so himself. I replied, that my Consent was to change the General & the Release could not but be a great Relief to me from a great deal of Trouble."

Both orders I find are united in one and the Polices of N Y & Long Island are to report to the Commander in Chief. I am satisfied in escaping the Wrath of the Loyalists and shall nevertheless be consulted on the Reports and ultimately have power to prevent Injustice; But I don't believe Gen[eral] Robertson acted upon the Motives that inclined me to approve of this alteration in the Orders which Col[?] D said if I had no Objections would he believed he to out Day in general orders. —Wm. Smith's Diary (M.S., VII).

In consequence of this order, and another similar one on March 27, "many persons (who had been very active during the rebellion) were admitted within the British lines & in conforming to the motives of the Orders given in 1782, several of these Orders were withdrawn, Taxes, take inventories & unmolested or insulted to return." —"Case of William Butler," in N. Y. during the Am. Rev., 157-59.

I am writing for Rivington to Morrison Gazette conjectures on the King's Speech (see D 5, 1782) which I showed yesterday to Mr[.] Leaming and he wished to be thrown out [i.e., published] as circumstances permit the Congreemest. We are in a Distress of each other and a Tendency towards the Loyalists and to bolster up the sinking Spirits of the latter, and reconcile them to the Whigg Leaders as engaged in promoting the Reunion—if it stimulates the public Creditors Washington's Army and the Holders of confiscated Estates to foresee in a Reunion the Best Hope of Satisfaction & Safety the Effects will be friendly to the common Interest." —Wm. Smith's Diary (M.S., VII). This extract from the diary reveals the authorship, hitherto unknown, of the column printed in heavy type in the next day's issue of the Royal Gazette. It reads as follows:

"To all that are not in the Secret of the Articles, agreed upon by the British Ministry, and the American Agents, the King's Speech to Parliament on the 3th of December last, or to speak more properly, what the Gazettes have given us for it, must be mysterious.

The dismemberment of the Empire is depreciated, and yet an Independence offered to the Thirteen Colonies—offered as the means to obtain an entire and cordial reconciliation—is a term of the pacification which the King trusts Parliament will see just cause to approve, and yet the grant nevertheless, his Majesty still has in his mind. There is, between us, that which is mighty.

How happy if the revelation of the mystery, shall offend none but the enemies whom it is perhaps for the common interest to find offended—the enemies both of Great-Britain and America! Eternal Glory to the contrivers! if the investiture of the Provinces with Indepedency for a moment, is the instrument of enabling them, as a contracting power, to settle fundamentals to reunite them for ever.

Well do we recollect the day, when the wisest and best men of America, dreaded Great-Britain's abandonment of her Colonies as their utter destruction; and that too was the day of their most elevated prosperity and coolest reflection—and can it be less tragic for this event to befal her in the hour of her extreme poverty and complicated embarrassment and distress? Mistaken advocate for the fatal separations! think you that Felicity and Indepedency are two words for the same thing?—anticipate the possession of your wish—thirteen petty nations with jarring interests controlled by a majority that leaves real sovereignty to none, with power to oppress all of them! and at the same time, suppose Canada, Nova Scotia, and the two Floridas, to monopolize the fostering care of the Military Country, once divided among all her Colonies, full handed as she is, to make them and such others she as may be induced to plant all along the Western Frontiers, the objects of your envy, and perhaps of your dread; and then condemn if you can, that plan of wisdom, which by the extinguishment of all animosities in America, shall restore even the authors of the general ruin to the confidence of their countrymen.

"Ambitious Delegates! will your thirst for office dare sit in Congress at that perplexing Crisis, when the debt to France shall be exacted—when the army already Clamorous under misapplied tax-money, in courses of private commerce, shall insist upon millions more; and when the thousands of families that are ruined by the Paper Money Bubble, with the whole host of your other creditors, will compel you to the alternative of risking their resentment; or the more formidable vengeance of the rest of the Continent, all interested against your creditors, and neither able nor willing to be taxed any longer for their relief. How hideous discords percutix miserae! Merciful Heaven! Avert the scenes of horror in prospect—but where are the Funds adequate to the wants that must be satisfied, to prevent fellow-citizens from falling upon each other? Fortunate Americans! if your leaders have at last led you back to the only connection that can insure the redemption of your country, from such deluges of misery, that what you have already experienced, may be pronounced to be as it were only the beginning of sorrows." —Royal Gaz., F 26, 1783.

A New York letter contains the following: "A large quantity of shipping are preparing here, which rendezvous at the Hook, for the purpose of transporting his Majesty's garrisons and effects to England; there are now 37 sail of large transports here for that purpose. How soon the business may commence, it is, however, impossible to say, as we do not hear that the negotiation with Congress goes on at all briskly. America has her old doubts and fears, a circumstance which causes many obstructions, besides being highly disagreeable to the persons engaged in the business." —London Chron., Mr 18-20, 1783.

An item of Fishkill news reports that a number of "determined Whigs" have agreed that any Tory printer in New York who, after March 1, uses the term "rebel" in his paper ("in contradiction to the declaration of his king, in his late speech to the contrary"), shall have his "ears cropped." —Penn. Packet, Mr 4, 1783.

Several prizes are brought into port. One is a ship of 22 guns, another of 16 guns, etc.—Penn. Packet, Mr 5, 1783.

The "Diary of the Moravian Congregation," of New York City records that "The soldiers have been lately employed in filling up and raising the grade in Trinity Churchyard, having grown too shallow for the graves, whence injurious effects were apprehended. . . ." —Penn. Mag., X 444.

New York State passes a law to permit people whose buildings have been destroyed by the enemy to secure timber for rebuilding from the forfeited estates. —Laws of N. Y., 6th sess., chap. 21 (printed by Holt, 1783).

"The Philadelphia Papers arrived this morning contain Rob[ert] Morris's Resignation of the Office of Financier on the 24 Jan'y & 26 Feb last. It is a Confirmation of the Bankruptcy revealed in the Annals of Congress to the Pennsylavania Memorials 50th Jan'y. . . . If Morris's Letters of Resignation had been 4 or 5 days later than the last of the two I should have thought him stimulated by the Public[?] in Rivington's Gazette of 26 Feb'y—However that Publication must be seasonable in the Country at large and especially in the Army—Nothing was known in Phila of this Resignation till the 1st Inst.—"Wm. Smith's Diary (M.S.), VII.

Carleton is "inquisitive for my Opinion," says Smith, "whether Washington had Hopes of setting himself up [as king]. I mentioned it as Arnold's Suspicion but that I thought Mr Washington was very ignorant of this Country if he had any such Ideas of Royalty as Arnold supposed." Carleton is "in a growing Disappoaition of the Negotiations at Paris—He said firmly—America is the proper Ground—He added that he was in perfect Ignorance of what was doing on the other Side of the Water & assented to my Conjecture that Lord Shelburne could not but wish to concern his own Name with the glorious Event of restoring the Empire. Sir G doubtless is desirous of that Honor for himself."

—Wm. Smith's Diary (M.S.), VII.

Carleton discusses with me, says Smith, the idea of imagining "beyond the Lines that he will receive the Rebel Army into his own. However, he suggests "no Particular Gratifications." He would "receive Washington and a College of them in their Standing, & give a Bounty as some Compensation for lost Pay, but not undertake the Discharge of Arrears."

—Wm. Smith's Diary (M.S.), VII, under Mr 5 and 8.
A memorial, presented to Sir Guy Carleton by the commanding officers of 14 provincial regiments, is printed as a broadside. One of the copies was sold, with the library of Henry F. De Puy, Esq. at The Anderson Galleries, New York, Nov. 18, 1919. In the same sale was a manuscript list of "His Majesty's Provincial Corps in N. America, from 1775 to 1783," dated June 12, 1783.

17 The legislature of the state passes an act "for granting a more effectual Relief in Cases of certain Trespassers," It makes it lawful for a person, or were inhabitants of this State, and who, by reason of the invasion of the enemy, left his, her, or their Place or Places of abode, and who have not voluntarily, put themselves respectively, into the power of the enemy, since they respectively left their places of abode, ... to bring an action of trespass against any person or persons who may have occupied, injured, or destroyed, his, her, or their estate, either real or personal.

Ind. N. T. Gen., N 24, 1783.

Oliver de Lancy, adjutant-general, issues the following notice from headquarters at sea (F 18): "In order to save much unnecessary Trouble, Notice is hereby given, That no Persons whatsoever, are to be admitted into the British Lines, without having previously obtained Passports for the Purpose from the Commandant of New-York; any Persons who may have come in without Leave, are directed to report themselves immediately at the Commandant's office, otherwise they will be subject to very disagreeable Consequences, both Real or Personal.

"The General Officers commanding in the several Districts, will see that particular Attention is paid to this Order by the Officers at the Out-Posts." N. T. Merc., Ap 7, 1783.

The following announcement of peace is recorded under this date in the headquarters orders-book kept while Washington was personally in command at Newburgh:

"Altho' the public dispatches from our Commissioners in Europe have not arrived, and the Commander in Chief has it not in his power to announce officially a General Peace to the army yet he cannot resist the pleasure of Communicating the happiness he Experiences from a Certainty of that event and for the Satisfaction of every brave officer and Soldier under his Command he orders the following extract of a letter from his Excellency the Minister of France to be made public.

"Philadelphia 24 March 1783.

"Sir. It is with most lively and sincere joy that I have the Honor to inform your Excellency of the Conclusion of a Peace. It crowns in the most happy manner your labours and the efforts of the United States. You will sincerely participate the complete satisfaction that this event gives me and I take the greatest possible share in the pleasure it will afford you.

"I have not this news officially but it is not the less Certain and I pray you to permit me to offer the Officers of your army and all the American Troops my Congratulations and the tribute of respect due to their Virtue and Courage.

"Following this the Commander in Chief is pleased to direct that all military arrangements shall continue as at present until further orders, that no relaxation in discipline or Police of the army shall be suffered," etc. See April 8. The general orders of Washington, compiled by Maj. Edw. C. Boynton, one of the trustees of Washington's headquarters at Newburgh, were published in that city in 1837.

This month, the first issue of The New-York Morning Post was published. Its date is determined from that of the earliest issue found, that of Aug. 5, which is No. 126, of Vol. III. It appears to have been a continuation, without change in sequence of numbering, of The New-York Evening Post (see S, 1782). Morton and Horner were the publishers, the name of the third partner, Christopher Sower, being dropped. The latter had difficulty in adjusting his accounts (see his letter in the Royal Gen., S 3, 1783). The paper was of folio size, and was published semi-weekly. Brigham, in A. A. S. Proc. (1917), 463, 410. See, further, 23, 1783.

Writing to a friend in London, a "Gentleman of Character and Fortune in New York" says: "Peace has been proclaimed here this week, but the proclamation brought no peace to the poor Loyalists. There was no such settlement, before, of the claims of the audience, as in such proclamation. The multitude that attended was great—but no one haz'd, or shewed any mark of joy or approbation, but the reverse. The Americans are now threatened with a terrible Indian war. . . . The withdrawing the French army, and divisions among the Loyalists, will prevent the latter from joining the French, as was the intention of many. The Loyalists, for the present, must bow under the yoke—there is no prospect of deliverance." London Chron., Je 5-7, 1783.

David Sproat wrote on May 10 to Maj. McKenney, secretary to the British commander-in-chief: "In compliance with your request, I beg leave to inform you that on Sunday, the 6th of last month [April], his Excellency Rear Admiral Digby ordered Captain John Beazley, of His Majesty's ship Amphion, to go on board the prison ships accompanied by me and read the proclamation [for the cessation of arms] (see F 14, and Ap 8), which was
which was read in New York on April 8 (q. v.), congress on its part
issues a proclamation declaring the "Cessation of Arms."—Jour. of
Cong., Ap 11, 1783. This was made public in the American camp
at Newburgh on April 15 (q. v.), and sent by Washington from head-
quartermaster's there to Sir Guy Carleton at New York on April 21.—

VII: 87.

A Loyalist writes from New York to a correspondent in London:

"I must confess though I stood prepared for bad terms, yet I did
not think it was in the power of the greatest villains on earth to
place us in so humiliating a situation; even the Rebels affect to
pick out our faults. All the means by which we bespeak the
utmost violence. Threats are thrown out, and vengeance de-
ounced against all here. The town now swarms with Americans,
whose insensibility is scarce to be borne. Many of the Yankees
are meanly crying and carrying curiosity; such conduct will only insure
contempt; not a person from New York is permitted to pass in the
country, notwithstanding the great indulgence shown here; should
the troops be hastily withdrawn from this place, a scene of confu-
sion and distress will take place that words cannot describe.

The French Gentlemen, and there are several in this city,
execute the Ministry; they openly declare, that though pleased
with the advantages their Monarch has acquired, yet good
quality subjects they feel hurt at the humiliating state they see the Loyalists
placed in."—London Chron., Nov. 17, 1783.

Another New Yorker writes: "The last packet which arrived
here about a week since, brought the distressing confirmation of
a peace with America; by which I find the Loyalists in this
country are most shamefully and traitorously abandoned. . . Our fears
at present surpass all description. Never was there upon the face
of the earth a set of wretches in a more deplorable situation.
De-
prived of all hope of future comfort or safety, either for themselves
or their unhappy wives and children, many have lost their senses,
and are now in a state of perfect madness. Some have put a period
to their miserable existence by drowning, shooting, and hanging
themselves, leaving their unfortunate wives and helpless infants
destitute of bread to support them; and I am afraid many more
will follow the dreadful example."—London Chron., Jc 7-10, 1783.

As a humorous item of "Boston news" read, "We hear from New-
York, that the Independent Fever rages there to such a degree,
among the Tories and refugees, that it carries off great numbers
weekly; and that general Carleton, in order to prevent the infection
from spreading, has ordered many away to New-Scotland."—

A New Yorker writes: "Peace being now restored to the
country, our old inhabitants are beginning to come in and mix with us
again; and I think matters will terminate here much better than
many people were led to believe. Those that have come to town
seem well pleased, and wish for a speedy reconciliation with their
old friends."—London Chron., My 24-27, 1783.

The city vestry's second financial report (for the first, see Ap
31, 1783) extends from May 1782 to this date. The Rev. James Gautier.—See Henry B. Dawson's report on the city finances
during the Revolution, in Proc. Ed. of Aldermen, LXXXIV: 222.
See Ag 30.

Among taverns in New York during the British occupation
was that of one Ashley, at No. 2 Water St.—N. T. Merc., Ap 14,
Jl 14, 1783. The Marine Society held its meetings there.

Adm.-Gen. Oliver de Lancey issues an order of the British
commander-in-chief (Carleton) that the following extract from the
seventh article of the "Provisional Treaty between Great Britain
and the United States" shall be strictly observed:

"And his Britannic Majesty shall, with all convenient speed,
and without causing any Destruction, or carrying away any Ne-
groes, or other Property, of the American inhabitants, withdraw
all his Armies, Garrisons, and Fleets from the United States,
and from every Port, Place, and Harbour within the same; leaving in
all Fortifications the American Artillery that may be therein, and
also order and cause all the Archives, Records, Deeds, and Papers,
belonging to any of the said States, or their Citizens, which in
the Course of the War may have fallen into the Hands of his Officers,
to be forthwith restored and delivered to the proper States
and Persons to whom they belong."

The order also announces that three British officers and two
Americans have been appointed "to superintend all embarkations,
and see that the above stipulations are strictly observed.

CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776-1783
“Any Person claiming Property embarked, or to be embarked, Apr. will apply to any of these Gentlemen, who will call a Board to examine into the Merits of their Claims. . . Should any Doubts arise on examination, the Circumstances of the case are to be minutely down, so as to furnish proper Evidence to Commissioners, who may hereafter be appointed on both sides to adjust and settle all claims and controversies between the parties.

The Gentlemen will be enabled to examine every Transport previous to its sailing, to prevent any evasion of this Order.

The Refugees, and all Masters of Vessels, will be attentive that no person is permitted to embark as a Refugee, who has not resided Twelve Months within the British Lirines, without a special Passport from the Commandant. It is also recommended to the Refugees, to take Care no Person of bad Character is suffered to embark.

Another order, on April 28, directed "that all persons in possession of any Archives, Records, Deeds, or Papers, as above required, shall forthwith deliver them to the Secretary’s Office, at Headquarters, taking a Receipt for the same."—Ibid., My 51735; Man. Com. Coun. (1863), 730; ibid. (1870), 778, 761.

Announcement was published on Sept. 16 that the "Board of Claims" would sit until Sept. 30, and no longer.—Royal Gen., S 17, 1783.

Sir Guy Carleton issues a proclamation appointing a "Board of Commissioners for the settling and adjusting all matters of Debt, Case or Accounts, of the value of Ten Pounds, or upwards, contracted by any of the Inhabitants of this City, and its dependen- cies, before the first Day of November, 1785." They are to meet at the city hall on certain days, summoned parties and witnesses, inspect books, papers, etc., to elucidate the facts, and determine, in a summary way, between the parties, as they may judge consonant with justice and equity.—N. Y. Merc., Ap 21, 1783; Man. Com. Coun. (1863), 729.

Dr. James Beckman returns to his country-seat on East River, near the present 52d St.; he remained only two months, yielding possession to Gen. Carleton on June 16 (p. c.).—Man. Com. Coun. (1814), 554.

Cock Gaffs, For the Royal Patrimine of Cock Fighting. To be sold. Enquire of the Printer.—Royal Gen., Ap 16, 1783.

Lieut.-Gov. Andrew Elliot presides in the council, having received the seals and instructions. He takes the oaths of office.—Col. Coun. Min., 568.

The declaration by a congress of a "Cessation of Arms" (on Ap 18,) has been sent to Washington to the American army at Newburgh.—Writings of Washington (Ford ed.), XI: 233, Winsor: VI: 746; VII: 87.

"The People have flocked hither from the Country since the proclaiming of the Cessation of Arms [see Ap 8 and 14] without any Regard to the Authority assumed on the other Side of the Line—There are now upwards of 5000 in Town.

The Disolucion of the American Army is hourly expected to take Place. The Soldiers will consider their Terms as out & go off to their respective Homes—The Officers are obliged to be content to become Creditors for 5 years Pay at 6 per Cent.

"There appears to be a general Desire to construct the Peace as perfectly compleated so anxious are the People for a Return to the Employments of a State of Tranquility."—Wm. Smith’s Diary (p. 655).

An open letter to Robert Morris, subscribed "Lucius," appears in the Freeman’s Journal; it reads in part: "I have stated your conduct in publishing your letter of resignation, as so dashing an instance of depravity deserves. The mortal wound it gave to our credit, both at home and abroad; the dangerous commotions it tended to create in the nation, and the pleasure it held out to the enemy, to continue a war from which the desolation of our finances, and the dishonour of our public councils, as stated by you, gave the most flattering prospect of success; were consequences to be apprehended from such a publication, so palpable and glaring, that they could not possibly have escaped you . . ."

"How that august body to whom your resignation was originally addressed, could endure language of such impiety and reproach, is not to be comprehended. . ."

"Your friends and yourself had the art to excite great expecta- tions from your appointment to the superintendent of our finan- ces. Will you inform us how you have fulfilled our hopes. Tell us what ingenious plans of revenue you have produced; what loans your credit has obtained; what new resources you have opened; what savings you have made; and what debts you have discharged. This surely would have become you the vain boastings of the sacrificers you have made of property and domestic bliss, while in the bosom of your family, in full enjoyment of your mercantile connections, with splendid appointments, lucrative patronage, and unrivalled power."—Freeman’s Jour. (Phil.), Ap 23, 1783.

Under date of May 10, Smith says this letter intimates "Strong Suspicious of his [Morris’s] Designs to ruin the American Cause & it supposes a Fasty in the Congress in his Visions—He and Wash- ington are intimate.—The Latter is written by Dr. Arthur Lee who is connected with L4 Shelburne."—Wm. Smith’s Diary (MS.), VII.

The following letter, signed by "An American," is printed in a New London paper: "To all Printers of Public News-Papers. Tell it to the whole World, and let it be published in every newspaper throughout America, Europe, Asia and Africa, to the everlasting disgrace and infamy of the British king’s commanders at New York.

"That during the late war, it is said Eleven Thousand Six Hundred and Forty-Four American prisoners, have suffered death by their inhuman, cruel, savage and barbarous usage on board the filthy and malignant British prison ship called the Jersey, laying at New York. Britons on the verge of Heaven fall on your Isle, for the blood of these unfortunate victims!"—Conn. Gen. (New London), Ap 25, 1785.

No investigation has been made by the present author to ascer- tain whether this is the earliest publication of the foregoing letter. That it was reprinted in an almost endless chain appears probable (see, for example, Penn. Packet, Ap 29, 1785); indeed it seems possible that this very statement is the foundation upon which American historians in later years based their evidently exaggerated estimates of the numbers who perished on the "Jersey" prison-ship.

During the ceremonies of the Tammany Soc. attending the inter-ment of the remains of these martyrs at the Wallabout (Brook-lyn) in 1808 (p. xvi, My 26, passim), orations, pamphlets, newspaper articles, and banners repeated the tale. An inscription containing these figures was afterwards engraved over the ante-chamber of the vault. Valentine published in the Manual of 1851 (pp. 417-18) an article on the prison-ships, by H. Onderdonk, of Jamaica, L. I., containing the statement: "Even as early as 1783, a reckless newspaper writer estimated (on what authority it is not stated) that perhaps 10,644 American prisoners were on board the Jersey. Later conjecture has gradually passed into sober history, for a well-attested fact, as if 10,644 men could have died out of one ship in the space of three years, and been buried on the adjacent shore! The number that perished was doubtless fearfully great, and needed no exaggeration. Nevertheless, as late as 1860, a second appeal to congress (the first being in 1888) was published by the Society of Old Brooklynites "for the Erection of a Monument over the re- mains of 11,500 prisoners who died on board the British Prison Ships during the Revolutionary War." It contained the statement (p. 12): "It is estimated that between 11,000 and 12,000 prisoners perished on these vessels, it being claimed that the mortality on the Old Jersey alone amounted to five a day."

The statement is made in the present work (Vol. I, p. 158) that "about twelve thousand perished miserably" on these ships. Substantial credence was lent to the report of the large number who died, by the testimony of prisoners (see, for example, Aug 10, 1781; Je 11, Oct., and N 9, 1782), which shows that as many as eleven in one day died during their confinement on the "Jersey;" also by the statement published by Dandridge in Am. Prisoners of the Rev. (1808, p. 149): "It is well known that twenty hogheads of bones were washed into the sea, in 1808, from the shores of the Wallabout which had been buried under the auspices of the Tammany Society. . . These were but a small part of the remains of the victims of the prison ships. Many were, as we have seen, washed into the sea, and many more were interred on the shores of New York Harbor, before the prison ships were removed to the Wallabout."

The perusal of the official correspondence, regarding conditions on the prison-ships and the interchange of prisoners, printed in the
“Your Memorialist, Influenced by Sentiments of Loyalty to the King, and Attachment to the British Constitution, has sacrificed a handsome property in America... and at the most Eminent hazard of his Life, Co-operated with Sir Henry Clifton, Commander in Chief of the British Army in America, which will appear by his official letters to Lord Sackvjlle. But his Interest would not have been discovered before they were brought to a happy issue, which bid fair to put a fortunate end to the war in America. He was obliged to fly, and very narrowly, but fortunately, escaped from the Americans, and having joined the British Army in New York, the Commander in Chief was pleased to confer on him the Rank of Brigadier General, which was approved by the King...”

A Gentleman of Distinction in New York writes: “New York is filled with persons from different States. Some have come in about business, others to claim and get possession of their houses, in which they are much disappointed, as none of them will be given up till the army goes off, and that I believe will not be possible for some months. It is said General Carleton will first see the articles of the peace on which the different States seem averse to, especially that respecting the Refugees... General Carleton goes next week to meet General Washington and Governor Clinton of this State [see My 6], and no doubt will do every thing he can for us poor unfortunate Refugees; but I dread the time when the British troops leave us.”

A fleet of 75 vessels sails from New York for Nova Scotia, carrying in, including Commodore and public stores.—From Carleton’s letter to Washington of May 12, in Writings of Geo. Washington (Sparks ed.), VIII: 545; see also N.Y. Merc, Apr 28, and My 5, 1783.

Several vessels from different parts of the United States have lately arrived at New York; “that port being at this time open for the American flag.”—Penn. Packet, Apr 29, 1783. This report appears to have been somewhat premature.—See II. 17.

The following garrison order is issued by Brig-Gen. Birch, commandant of New York: “In order to prevent any Waste or Destruction in the Houses under the direction of the Ventry or Barrack Office, Notice is hereby given, that the present possessors of Houses under the above description, are on no account to quit them without giving previous notice to the Commandant, that an examination may be made into their state; and on removal, the keys are to be lodged at his Office, No. 61, Wall-street: Any person presuming to take possession of such houses, without permission from the Commandant, must expect the most disagreeable consequences.”—N.Y. Merc, My 5, 1783; Man. Com. Coun. (1863), 711; “Case of William Butler” in N.Y. City during the Am. Rev., 161-62. See My, and Jl 16.

In a memorial of this date to Lord North, Benedict Arnold gives an account of his treason, and mentions the sum of money he received (£6,000). In addition, he speaks of raising in New York the “American Legion” to be used against his former brother-officers in America. He mentions also Mrs. Arnold and his family, how they have been supported by various customs in the American colonies. This memorial to Lord North is an appeal to be placed on the British establishment, as his and Mrs. Arnold’s pensions would be greatly inadequate for the support of his numerous family. He says, in part:

May

Your Memorialist, Influenced by Sentiments of Loyalty to the King, and Attachment to the British Constitution, has sacrificed a handsome property in America... and at the most Eminent hazard of his Life, Co-operated with Sir Henry Clifton, Commander in Chief of the British Army in America, which will appear by his official letters to Lord Sackvjlle. This memorial to Lord North is an appeal to be placed on the British establishment, as his and Mrs. Arnold’s pensions would be greatly inadequate for the support of his numerous family. He says, in part:
1783 to announce our approach came on Board with an Invitation to May 6, to the next Day & to a Dinner at Orange Town.

*Sir Guy with his two Aid de Camps Majors Beckwith & Upham Captn Lutwyche & Col. Smith who had just come from Washing- ton went on a Shore— & Mr. Elliot Mf Secretary Morgan & myself in another. We landed about 10 o’Clock Tuesday 6th & met on the Shore Washington and two of his Aid de Camps, Col. Cobbe & Col. Humphreys & I think Mr. Trumbull of Secet'y— There was a Chariot in which the two Generals proceeded— Horses were offered to the Rest but Mr. Elliot & I walked with Col. Smith the other Aid de Camp.

*We met at Mr. Dewsint the House of Rendezvous Mr. Clinton Mf Scott Mf Duer Mf Benson and several others—An Hour was spent in Congratulating & seperate Chat in & before the Deur, when the two Generals took a Room & Mr. Morgan Called Mr. Elliot & myself in.

*There was soon collected a Number consisting of The Generals Mf Clinton the Govt Mf Scott—One of his Council Mf Albert [Egbert] Benson—Att* General Mf Trumbull Washingtons Secet'y Lt Govt Elliot Mf Morgan & My Self.

*when all seated Washington opened the Business addressing himself to Sir Guy Carleton and said it respected three Points

1. The Preservation of Property from being carried off and especially the Negroes 2. The Settlement of the Time for the Evacuation of Nework & 3. The extending the Governm’t of the State of Nework as far as might be convenient before the intire Evacuation took Place.

*He then proceeded upon the Suspected Cpt of the Ny. & delivered himself without animation with great slowness & a low Tone of Voice when he had inturnd upon his Points a little Sir Guy Carleton who heard without Interruption replied That he should proceed to the Evacuation with all possible Expedition but it must of Necessity take Time—That he had sent a Fleet already to Nova Scotia with about 5000 Souls—that to prevent the irreg’lar Embarkation of Property he had appointed Persons to inspect the Ships & as to Negroes to make a Registry that the Owners might eventually be paid for the Slaves who were intoldt to their Freedom by British Proclamations & Promises—

*Here Washington affected to be startled—already imbarred says he Sir Guy then observed, that no Interpretation could be put upon the Articles inconsistent with prior Engagem’t$ binding the National Honor which must be kept with all Colours, and he added that the only Mode was to pay for the Negroes in which Case Justice was done to all Parties the Slave and his Owner.

*Washington observed that the Point of expanding the Governm’t of Nework was not so immediately the Object of Congress tho’ it fell within his Trust as connected with the General Evacua- tion it was left to Mr. Clinton to add what related to the Object.

*Before this not a Word had been dropped by any [but] by the two generals.

*The Necessity of Order in West Chester & the Gratification of the Long Island Refugees by a Return to their Estates made up the Request that the Counties of West Chester and Suffolk if not a Part of Queens County might be left to the Govt of the State of New York.

*Sir Guy gave Hope as to West Chester—said he had already withheld the Supply of Provisions to De Lancyes Refugees & he believed he should evacuate the whole county in a short Time.

*But as to Long Island he saw too many Difficulties and left one to their Consideration the Prevention of Desertions—He doubted whether it was in their Power to remove that Objection.

*Mf Scott changed the Ground by intimating that it would be for the Consideration of Mf Clinton whether it was worth while for Mf Clinton to call a Council upon Proposals to be made by Sir Guy Carleton—This was strange as the Request came from Mf Clinton & must depend upon Sir Guy’s Consent & Mf Morgan interfered for Openings in the interior County to the Loyalists here there were several Speakers—Mr. Scott took up the vulgar Idea that the Articles were fulfilled on their Side by Congress & recom- mending tho’ the States did not comply & drop’d that they could not suffer those to stay among them who had waged war agst them.

*It was observed by Mf Morgan that ever since the Pacification Acts inconsistent with the Articles were passed—He men- tioned the Troops Act—Scott justified it but the Rest denied that the Articles were then known—I observed that Mf Apathor so late as the 10 April was summoned to traverse an Indictm’t—They replied that it was an executive Procedure upon an Act in 1779. Mf Clinton said there had been no Legislation since the Articles to stop these Things.

*Scotts Joaquish Indiscretion chaffed Mf Morgan. The latter insisted that no subordinate Power could settle the Interpretation of the Articles—Scott did not perceive the Drift of it, and talked of the Conduct of the General in Right of deciding—he supposed a Question as between France and Great Britain & thought West- minister Hall would adjudge upon the Treaty—In the Altercation I was appealed to by Benson & being in Pain for Fear of Indecorum I cut short the Disputes by observing—that verbal Conferences were not only useless but dangerous. It is a Matter of extreme Delicacy to expound Treaties which are to be satisfactory to both Parties or to be followed by War. I asked whether they would undertake to sign the Opinion that if the States refused what Con- gress recommended they had right so to do. Clinton replied by no Means & that he would be answerable for Nothing that would be said till he had consulted the Legislature—and here a sudden Stop was put to all further Conversation between the Disputants.

*Sir Guy then with liberal Professions of a Desire as much as possible to oblige said he should willingly attend to any Propositions that might be made—

*After a Pause Washington repeated that the intermediate Extension of the Govt of New York was only Subordinate to his General Trust of effecting the Evacuation.

*Sir Guy was very full in asserting that no Time could be fixed from the Contingencies attending it Winds Weather &c &c.

*Washington went to take a Seat three above the President and delivered himself without animation with great slowness & a low Tone of Voice when he had inturnd upon his Points a little Sir Guy Carleton who heard without Interruption replied That he should proceed to the Evacuation with all possible Expedition but it must of Necessity take Time—That he had sent a Fleet already to Nova Scotia with about 5000 Souls—that to prevent the irreg’lar Embarkation of Property he had appointed Persons to inspect the Ships & as to Negroes to make a Registry that the Owners might eventually be paid for the Slaves who were intoldt to their Freedom by British Proclamations & Promises—

*Here Washington affected to be startled—already imbarred says he Sir Guy then observed, that no Interpretation could be put upon the Articles inconsistent with prior Engagem’t$ binding the National Honor which must be kept with all Colours, and he added that the only Mode was to pay for the Negroes in which Case Justice was done to all Parties the Slave and his Owner.

*Washington observed that the Point of expanding the Governm’t of Nework was not so immediately the Object of Congress tho’ it fell within his Trust as connected with the General Evacua- tion it was left to Mr. Clinton to add what related to the Object.

*Before this not a Word had been dropped by any [but] by the two generals.

*The Necessity of Order in West Chester & the Gratification of the Long Island Refugees by a Return to their Estates made up the Request that the Counties of West Chester and Suffolk if not a Part of Queens County might be left to the Govt of the State of New York.

*Sir Guy gave Hope as to West Chester—said he had already withheld the Supply of Provisions to De Lancyes Refugees & he believed he should evacuate the whole county in a short Time.

*But as to Long Island he saw too many Difficulties and left one to their Consideration the Prevention of Desertions—He doubted whether it was in their Power to remove that Objection.

*Mf Scott changed the Ground by intimating that it would be for the Consideration of Mf Clinton whether it was worth while for Mf Clinton to call a Council upon Proposals to be made by Sir Guy Carleton—This was strange as the Request came from Mf Clinton & must depend upon Sir Guy’s Consent & Mf Morgan interfered for Openings in the interior County to the Loyalists here there were several Speakers—Mr. Scott took up the vulgar Idea that the Articles were fulfilled on their Side by Congress & recom- mending tho’ the States did not comply & drop’d that they could not suffer those to stay among them who had waged war agst them.

*It was observed by Mf Morgan that ever since the Pacification Acts inconsistent with the Articles were passed—He men- tioned the Troops Act—Scott justified it but the Rest denied that the Articles were then known—I observed that Mf Apathor so
did, from military life to "citizenship."—N. Y. Packet, N 13, 1783; The Institution and Proceedings of the Society of the Cincinnati (q. v.).

10 . . . (with the Proceedings of the Massachusetts State Society of the Cincinnati) . . . (Boston, 1812); James Thacher, Military Jour. (1823), 391; Kappe, Life of William von Steuben (chap. vii).—Mr. John McGilvery, regarding the opposition to this society, which soon developed, see Winsor, VI: 746; VII: 219; McMaster, Hist. of the People of the U. S., I: 167-76.

12 In answer to Washington's letter of May 6 (q. v.), Carleton writes that at present it is impossible to tell when the evacuation of this city can be completed. The quantity of shipping that will be sent to hire the number of vessels that will be forced to abandon New York cannot be guessed. Carleton also says that he has given an order to prevent the carrying away of any negroes or other property of the American inhabitants. He refers to proposals he made, on April 14, in a letter to the minister of foreign affairs,—the naming of American commissioners to assist those appointed by him to inspect all embarkations,—a proposal which Washington had already approved by making appointments.—Writings of Geo. Washington (Sparks ed.), VIII: 543; Man. Com. Coun. (1870), 786.

19 "The Provincial Secretary's Office is removed to the house of Mrs. Barclay, in Nassau-street, next the corner of John-street."—N. Y. Mercury, May 12, 1783.

20 Accounting for the blank space in this date, shows the debt of Trinity Corporation in 1778 and what has been paid off since that time. The original MS. is preserved by the N. Y. H. S.

23 Charles Roulabout advertises that he has opened a lively stable and coach house adjoining his inn, which is at No. 15 Broadway (the City Tavern, at the present 115 Broadway).—N. Y. Mercury, May 12, 1783. This numbering of Broadway had been changed before 1779, when, according to the first directory published, Mrs. Barham, a tavern-keeper, was at 18 Broadway, while John Cape was proprietor, in this later year, of the City Tavern, which is merely indicated as on Broadway. By 1791, another change had taken place in the numbering, for Alexander Macombe is listed as at No. 18 Broadway.—See Vol. I, p. 423. The Macombe house stood at the present 39-41 Broadway.

27 Coenties Marketplace (placed under May 28, 1783, q. v.) is advertised to become soon the starting-point of "stage-boats" connecting with a stage-line for Newark. It so appears in an advertisement of "Peter Stuyvesant, who for many years drove a Stage Wagon from Powles Hook, to Brown's Ferry."—N. Y. Merc., May 19, 1783.

30 The first two sloops from New York to trade with Albany since peace came about are permitted by the inhabitants of that city to sell their cargoes.—N. Y. Merc., Je 16, 1783.

32 Certain Loyalists meet at the home of Michael Grass, in the Out Ward (in Chatham St. near the Tea Water Pump), and sign their names "to form a settlement at Fort Frontenac, at the mouth of Lake Ontario, and head of the river St. Lawrence, in Canada, the only eligible place to which the future subject of the king's subjects to come over on the Indian and fur trade." The commander-in-chief gives them the "encouragement" they desire.—Penn. Packet, Jl 1, 1783; Man. Com. Coun. (1870), 788.

40 A news-letter from Fish-Kill states that "A correspondent observes that he has lately viewed the Churches and Houses in New York, and that all the Churches are, except the Episcopal, the Moravian, and the Methodists, converted into stores or barracks, and appear in a very deplorable condition; the fences which encompassed the burying-yards being destroyed, the pews in all, and the galleries in some of them pulled down, the windows broken and otherwise much abused." The letter is a plea that Gen. Carleton will order that these edifices and the streets be cleaned of dirt and filth before he leaves, "to prevent the curses of an injured people."—Penn. Packet, My 27, 1783.

44 The L'Govr. showed me yesterday M[rs.] Scott's Resolution of the Records—agreed a Council be called—I dined at Head Quarter & intimated before Dinner that until the Empire was actually seized the Books ought not to be given up. . . .

45 At the Council all agreed not to give up the Records."—Wm. Smith's Diary (MS.), VII.

46 Adj. Gen. De Lancey issues an order from headquarters that "All Persons desirous to leave New-York are to give in their names" at his office, before June 7, stating "the Place of their former residence, and where they wish to be removed to."—N. Y. Merc., Je 2, 1783. On June 7, the persons who had given their names to the adjutant-general, "for Passages from this Place," agreeable to this notice, were directed to apply to the gentlemen appointed in De Lancey's announcement of April 15 (q. v.) to examine their claims, who will attend for that purpose at the city hall every day except Sundays from 11 to 2 o'clock.—Ibid., Je 9, 1783.

48 News reaches Philadelphia "that an embarkation of 6000 men is taking place at New York. The British guards, with most of the troops that were under Cornwallis and Burgoyne, with the Hessian and other foreign troops, are going to England."—Penn. Packet, My 25, 1783.

54 To the Mill at the One Mile Stone in the Bowery Lane" is to be sold at auction at the Coffee House.—Royal Gaz., My 28, 1783. It was again advertised to be sold on June 19.—N. Y. Mercury, Je 9, 1783.

55 A wild beast "The most curious that has been in this city these many years," is on exhibition at the "sign of Rodney's engagement" below the Coffee-House.—N. Y. Mercury, Je 2, 1783. Lord Rodney's victory over the French fleet under Comte de Grasse, on April 12, 1782, is the event which was probably crudely depicted on this tavern sign.

56 The king's birthday is celebrated as usual, "with every demonstration of loyalty and joy." A royal salute is fired from Fort George, and by "his Majesty's ships" in the harbour. In the evening a feu de joie is fired from the lines, followed by an exhibition of fireworks from the fort.—Royal Gaz., Je 7, 1783. To prevent accidents by fire the inhabitants are requested not to illuminate their windows.—Ibid., Je 4, 1784.

57 By order of the commandant, "Permission is hereby granted to all Persons coming from any Part of the Country with five Stock for the use of the Markets, to kill and dispose of the same, provided the Stock is slaughtered at such Places as are set apart for that purpose.

59 Hucksters, or any other Persons who may be detected in forestalling any Provisions or Vegetables brought to this City for the Supply of the Markets, may depend on being treated with the utmost Rigour."—N. Y. Mercury, Je 16, 1783. See, further, 5. 9.

59 A new Map of the United States of America, laid down from the best Authority, agreeable to the Peace of 1783. It is "sold by the Printer."—N. Y. Mercury, Je 9, 1783. An earlier map of the United States, probably the first, 18 x 21", was published April 3, 1783, by John Hallis, Ludgate Street, London. A cartouche contains the full-length portraits of Washington and Franklin. A copy of this now very rare map is in the author's collection.

62 The Soldiers of the American Army that were infedered for the War were discharged last week.

63 Those for 3 Years are not, but daily desert & are not pursued.

63 Those who have Discharges have an Indorsement purporting that it is a Furlough for 4 Months—They rec'd some Pay to carry them Home but it is in Goods which they can't sell for half the money at which they are debited & the Men cry out all along the Road at this last Cheat.

69 I learn this from Cole P R. Livingston and Joseph Penny— the latter lives but 7 Miles from the Camp at Newburgh—He says the Horse of the Troop are sold & that they are now daily selling Wagons Boats &c.

69 I am left in Doubt as to Washington's Design in discharging his Soldiers—Penny says they have uniformly ever since the Peace sworn that there was Peace & should be Peace for that they would neither draw a Sword nor pull a Trigger any longer.

69 The Invention of the Furlough is to get rid of them quickly, for it implies that they are to have pay for the 4 Months—all swear they will never come back again nor ever reenlist."—Wm. Smith's Diary (MS.), VII.

69 The captains of the "City Volunteer Companies and Militia" are ordered to collect the arms issued to their companies, and give notice thereof "to Brigade-Major Amiel, at No. 5 Wall street."—Royal Gaz., Je 16, 1783.

71 Washington writes from Newburgh to Gov. Benjamin Harrison of Virginia, expressing his ideals and hopes for the United States as an independent power, while stating his intention to return to "domestic retirement."—Penn. Packet, Jl 15, 1783, citing Virginia Gaz., Jl 5, 1783.

72 Eghbert Benson and Daniel Parker, commissioners, assist in superintending the embarkation of 14 transports bound for Nova
The Iconography of Manhattan Island

1783. Scotia, having about 5,000 persons on board. Among these persons were at least 150 negroes, "who appeared to be the property of the citizens of the United States" (see My 12). The commissioners wrote to Washington the next day, asking whether it was necessary to write further remonstrance to Sir Guy Carleton against his permitting the slaving of American subjects to leave. On June 13, they wrote to Carleton that their extraordinary conduct had been such as would "induce a reflection on the Treaty of Peace."—From correspondence pub'd in the Daily Ady., Jv 24, 1794. See also Jv 18; and Winsor, VII: 203, 215; VIII: 137.

18 Sir Guy Carleton offers the same encouragement to Loyalists to settle on the island of Abaco, one of the Bahamas, as that given to the Loyalists who have gone or are going to Nova Scotia. They are again to change their names. They are again to be "sent" to the house of M' John Davis, on Commissary Leake's, at the North River.”—N. T. Merc., Jv 16, 1783. See Jv 5.

A line of stages between Elizabeth-Town and Philadelphia is put in operation by Grummam and Mercereau,—the first since peace was declared. The trip was made in one day. A stage from each city goes to Princeton, makes an exchange of passengers there, and returns.—Royal Gaz., Jv 14, 1783.

15 Sir Guy Carleton signs a return of British and German regiments for embarkation.—From the original in Emmet Coll., item No. 11064.

16 "After the arrival of the preliminary articles & before the definitive Treaty arrived, from the vindictive & persecuting disposition of the Americans to the refugees & other Loyalists, we had no hope of remaining in the States after the British troops should be withdrawn. They therefore made application to Sir Guy Carleton to be transported with their families & effects to Nova Scotia, on the same terms as the other refugees had gone there, that under the protection of his Majesty's Government, they might find an asylum from the tyranny & oppression of their Countrymen. They were accordingly sent to such parts of that province as they requested. In consequence of such removal many of the desert Estates became vacant, whereupon the Commander in chief was pleased to issue the following order

"Head Quarters New York June 16 1783 Orders The proprietors of houses or lands lately evacuated will apply to Lieut Genl Campbell for the possession of those on Long Island, to Brigadier General Birch for those on Staten island. These General officers will be pleased to cause all such Estates to be immediately delivered up to the Proprietors or their attorneys unless where they may see sufficient reasons for detaining them some time longer, which reasons they will report to the Commandeur in chief. In like manner, all Estates which shall hereafter be evacuated are to be surrendered up to the proprietors. O. L. De Lancy Adjutant General. —N. T. Merc., Jv 23, 1783.

"From the 16th of June to the day of evacuation of New York the property which had been from time to time vacated was restored to the proprietors. But many houses & stores absolutely necessary were detained from the Proprietors until the evacuation of the city."—From the "Case of William Butler," in N. Y. City during the Am. Rev., 159-61; Public Papers of Geo. Clinton, VIII: 203; Penn. Packet, Jv 21, 1783. See, however, Jv 10.

Gen. Carleton takes possession of the Dr. James Beekman country-seat, where he remained until the British evacuated the city.—Man. Com. Coun. (1854), 554.

18 From the letter of Nathaniel W. George Washington issues his last circular letter to the governors of the states, as follows: "The great object for which I had the honour to hold an appointment in the service of my country, being accomplished, I am now preparing to resign it into the hands of Congress, and return to that domestic retirement, which, it is well known, I left with the greatest reluctance . . . but, before I carry this resolution into effect, I think it a duty incumbent on me to make this my last official communication, to congratulate you on the glorious events which Heaven has been pleased to produce in our favour, to offer my sentiments respecting some important subjects, which appear to me to be intimately connected with the tranquility of the United States, to take my leave of your Excellency as a public character, and to give my final blessing to that country, in whose service I have spent the prime of my life . . . "

"The Citizens of America, placed in the most enviable condition, as the sole Lords and Proprietors of a vast Tract of Conti-
ties many of the Soldiers have received, and the gratuity of one year's full pay, which is promised to all, possibly their situation... will not be deemed less eligible than that of the Officers. Should a further reward, however, be judged equitable, I will venture to assert, no man will enjoy greater satisfaction than myself in seeing an exemption from taxes for a limited time... or any other mark of bounty or compensation to the brave defenders of their country's cause... It is necessary to say but a few words on the third topic which was proposed, and which regards particularly the defence of the Republic... The Militia of this country must be considered as the Palladium of our security, and the first effectual resort in case of hostility; it is essential, therefore, that the same system should pervade the whole; that the formation and discipline of the Militia of the Continent should be absolutely uniform; and that the same species of arms, accoutrements, and military apparatus, should be introduced in every part of the United States... I have thus freely disclosed what I wished to make known before I surrendered up my public trust to those who committed it to me... “It remains, then, to be my final and only request, that your Excellency will communicate these sentiments to your Legislature, at their next meeting; and that they may be considered as the legacy of one who has ardently wished on all occasions, to be useful to his country—and who even in the shade of retirement, will not fail to promote the Divine Benediction upon it...” —Royal Gazette, Extraordinary, July 12, 1783.

Commenting on Washington’s letter, Smith says: “It would seem as if Washington had resolved to avoid any Loss of Popularity but whether with a View to be useful in the Reunion or to set up for himself is the Question.” —Wm. Smith’s Diary (MS.), VII, under July 15. See also Winsor, VI: 746.

Smith writes that he is informed the “Fleet now going to Nova Scotia is to bring back Coal for the Garrison here... This don’t look like a speedy Evacuation.” —Wm. Smith’s Diary (MS.), VII. See also facsimile of an enumeration, signed by Guy Carleton on June 17, of the refugees embarked for Nova Scotia, in Man. Com. Coun. (1855), opp. p. 554.

Elias Boudinot writes from Philadelphia to Benjamin Franklin that the inhabitants of the United States are irritated to an alarming degree by the “cruelties, ravages, and barbarisms of the refugees and loyalists,” while the citizens of New York “are kept out of their city, and despised daily of their property, by the sending off their negroes by hundreds, in the face of the treaty” (see Je 13).—Life of Elias Boudinot (1856), I: 126.

A Letter from ‘The transport service alone, in withdrawing the troops from New-York, will cost this country near half a million of money.” —Penn. Packet, S 11, 1783.

In Philadelphia, about 1,000 American troops with fixed bayonets surround the house in which Congress is sitting, and demand a redress of grievances. Congress, thus “grossly insulted” by a majority of its members, adjourns to Princeton.—Journal of Cong., IV: 231. See Je 57, 59, 70.

A newspaper advertisement announces that, “By Permission,” there will be presented on this evening, “at the Theatre in New-York, A Tragedy, called the Grecian Daughter,... To which will be added, An Entertainment, called the Lying Valet.” Mr. and Mrs. Ryan are to be among the performers.—Royal Gazette, Je 21 and 24, 1783. Advertisements of performances appeared in almost every subsequent issue of the paper until Aug. 30. On that day, the announcement included this notice: “On account of the short stay that the Company make here, the Nights of Performance, until further notice, will be on Tuesday, Thursday, and Saturday Evenings.”

Mr. Ryan takes this method of returning his sincere thanks to those Ladies and Gentlemen who have hitherto favoured his attempts; humbly hopes for a continuance of their patronage, which will be gratefully acknowledged.” —Ibid., Je 25 to Ag 30, 1783. Ryan’s advertisements reappeared on Sept. 13, and continued until Oct. 25. From Oct. 11 to Oct. 25, his company performed alternately with the military players.—Ibid., S 17-O 25, 1783. The theatre was closed from that time until Aug. 12, 1785 (p. 4).

On motion of Lord North, the house of commons votes half-pay to loyalist officers.—Winsor, VII: 196.

Smith writes in his diary: “Reports from Philadelphia that the Congress are at Trenton. That 300 of the 5 Years Men of the Pennsylvania Line have entered the Town of Philast last week & beset the Congress & extorted Promises—that the Congress called for the Protection of the Militia but not getting it had written to Washington & retired from the Place of Inland. They dread a Discharge of War Pay as was lately the Case of those infested for the War.” —Wm. Smith’s Diary (MS.), VII.

“The Congress are at Prince Town & so is the French Minister & Moris the Financier—they fled in the Nights of Monday & Tuesday & evacuate the Govr. & People of Philadelphia”—Wm. Smith’s Diary (MS.), VII.

See N 2.

The household effects of the late Christopher Blundell are offered for sale. The house, also, is to be let. It is situated on the Battery, and is considered “the most eligible one for a tavern keeper on this island.” —N. T. Merc., Je 30, 1783. See also L. M. R. K., III: 949 (Coker’s house).

Loyalists who have enrolled to go to Port Roseway with the five companies now embarking, but who cannot go at this time, are to meet this evening “at Grant’s Tavern, at the Sign of Lord Cornwallis.” —N. T. Merc., Jul 5, 1783.

A Philadelphia news item reads: “The unnecessary delay on the part of the British to quit the city of New-York, has only served to exasperate the spirit and resentment of the people against the loyalists, which, instead of subsiding, seems to rise to a determination against their readmission among us; inomuch that most of those who had concluded to stay, now begin to think the experiment too dangerous to be tried, and have resolved to go off, which indeed is the most prudent step they can take.” —Penn. Packet (Phila.), Je 22, 1783; Man. Com. Coun. (1870), 794.

“American” in an open letter, published in the N. T. Packet (Fishkill) on this day, says in part: “How general Carleton will be able to reconcile the honor and justice of the British nation, so much arrogated to themselves, with the open acts of injustice so evidently practiced every day, is hard to determine. About the nineteenth of February, the general published in general orders, that all persons without the British lines, having property within, should send in their claims, &c. &c. &c. On the publication of the ratification of the preliminary articles of peace, many of the old citizens of New-York, who had fled from the city at the approach of the British, sold and disposed of their places in the country (thinking as all the world thought besides, that it was actually peace) and went to New-York, but to their utter disappointment, and to the astonishment even of the loyalists, those people were not permitted to go into their houses; the keys of all empty houses and such as should be evacuated, being ordered to the commandant’s office,—who out of his very great goodness condescended to let such houses, on the party paying, having them down three months rent. We need not enquire who pockets this three months rent, with all other rents within the British lines, unjustly detained from the rightful owners...” —Penn. Packet, Jul 12, 1783.

Another correspondent asserts: “A number of houses in New York being now empty, many of the former owners have applied for leave to repossess them, but have in general been refused.” —Ibid., Ag 21, 1783. See Ap 29.

Twenty-six “sail of vessels” are to start for Nova Scotia on this day. The Hessian and other foreign troops taken by Burgoyne have sailed for Canada. Another officer estimates that these troops are preparing, among these being the frigate “South Carolina,” accompanying nearly 1,000 men. It is expected the city will be clear of the British army in the course of August and September.—Penn. Packet, Jul 15, 1783. See also Winsor, VII: 213, and letter of Wm. S. Smith, in N. Y. City during the Rev. War, 141-42.

Lieut.-Gov. Andrew Elliot sails for England with his wife and family.—Penn. Packet, Jul 21, 1783; Man. Com. Coun. (1870), 797. More seats are to be placed in the room in the city hall used for divine service for the refugees and others who have no seats in the churches.—Royal Gazette, Jul 11, 1783.

A post-rider is to set out from New York for Fishkill, going 21 and returning through the towns of Bedford, Upper Salem, Van Gilsland Manor, North Castle, White Plains, etc. He is the first post-rider, since peace was concluded, to the Hudson River towns.—Royal Gazette, Jul 16, 1783.

Gen.Clinton is offended, writes Smith, “at the Non Delivery
THE ICONOGRAPHY OF MANHATTAN ISLAND

The Records to M' Scott—Intimates that this Act of the Council is an offence after the Treaty admitting the Independence for which the Articles provided no Indemnity calls the Reasons futile.—Wm. Smith's Diary (M.S.), VII.

"It comes out from one John Powers a Copper plate Printer that he has counterfeited Millions during the War at the Instance of Persons on the other Side of the Lines and chiefly in their Commissary Departments. And that within a Fortnight he had been sollicited to counterfeit Morris's Bills by a Person of Consequence on that Side who is one of those assembling at Black Sam's with the American Contos to superintend the Embarkation."—Wm. Smith's Diary (M.S.), VII.

It is not publicly known whether the Definitive Treaty was brought by the "Mercury" frigate, or not; but it is thought that some news of importance has been received, as the troops have been ordered some miles nearer the city.—Penn. Packet, July 21, 1783.

There is a review of "his Majesty's VIIth Regiment of Foot," on the Common near the city, by Brig.-Gen. Ahured Clark. They "performed their different Evolutions and Firing, with great Alertness and Precision."—N. T. Mercur, July 28, 1783.

Sir Guy Carleton is dismantling the fortifications at Kingsbridge.—Penn. Packet, Aug. 5, 1783.

It is reported from Boston that 100 transports are bound from England to New York, "in order to convoy the British troops, Negroes, Refugees, and other Tories, from thence to England, Nova-Scotia, and elsewhere, consisting in the lump, to upwards of 2,000 souls."—Salem (Mass.) Gaz., July 31, 1783.

Aug. 31.

Congress resolves that a bronze equestrian statue of Washington be erected "at the place where the residence of Congress shall be established." On report of a committee appointed to prepare a plan of it, Congress resolves "that the statue be of bronze: The general form to be represented in a Roman dress, holding a truncheon in his right hand, and his head encircled with a laurel wreath. The statue is to be supported by a marble pedestal, on which are to be represented, in baso relievo, the following principal events of the war, in which general Washington commanded in person, viz.

The evacuation of Boston—the capture of the Hessians at Trenton—the battle of Princeton—the action of Monmouth, and the surrender of York. On the upper part of the front of the pedestal, to be engraved as follows: The United States in Congress assembled, ordered this statue to be erected in the year of our Lord 1783, in honor of George Washington, the illustrious commander in chief of the armies of the United States of America, during the war which vindicated and secured their liberty, sovereignty and independence. But that a statue conformable to the above plan, be executed by the best artist in Europe, under the superintendence of the minister of the United States at the court of Versailles; and that money to defray the expense of the same, be furnished from the treasury of the United States.

"Resolved, That the secretary of Congress transmit to the minister of the United States at the court of Versailles, the best remembrance of General Washington that can be procured, for the purpose of having the above statue erected; together with the fullest description of the events, which are to be the subject of the baso relievo."—Jour. Cong., IV: 251-52.

At a meeting of Loyalists in Roulabeet's Tavern, it is proposed to leave a memorial there, addressed to the commander-in-chief (Sir Guy Carleton), to sign by those intending to settle in Nova Scotia.—Royal Gaz., Aug. 17, 1783. On Aug. 15, a committee, appointed at this meeting, presented the memorial to him. It is a protest against making large grants of the best lands in that province to favored groups of persons. It states that the enrolments are formed that 55 persons have joined in an application to Carleton for 275,000 acres in Nova Scotia, and sent agents to "survey the un-located lands, and determine the most certain spots, and direct such operations." That application, which has been "stoutly concealed," they fear has succeeded. They observe, further, "that the persons concerned (several of whom are said to be going to Britain) are most of them in easy circumstances, and with some exceptions, more distinguished by the repeated favours of government, than by either the greatness of their sufferings, or the importance of their services." They regard such grants, if carried into effect, "as amounting nearly to a total exclusion of themselves and families, who, if they become settlers, must either content themselves with barren or remote lands, or submit to be tenants to those, most of whom they consider as their superiors in nothing but deeper art, and keener policy." They ask that inquiry be made into their own "respective losses, services, situations, and sufferings," to ascertain if they are not equally entitled "to the favour and protection of government," with the former applicants.—N. T. Merc., Aug. 25, 1783; Man. Com. Gaz. (1783), 586. Gen. Carleton's answer was reassuring.—Ibid. Those who signed the memorial were requested to meet on Aug. 16 at Roulabeet's to receive the answer.—Royal Gaz., Aug. 16, 1783.

Notice is issued from the city hall (the "Main Guard") that all Loyalists within the British lines who desire "to emigrate from this Province" must give vacuation to the adjutant-general's office, on or before Aug. 21, and be ready to embark before the end of the month.—Royal Gaz., Aug. 16, 1783. Under date of Aug. 18, Smith wrote in his diary: "The Town is in general Distress by Orders for Emigrants, to report their Names by the 21st of this Month."—Wm. Smith's Diary (M.S.), VII.

Notice is published that draught and saddle horses, waggons, carts, harness, etc., belonging to the king's service, will be sold at auction every Wednesday "at the Waggon-Yard, at Brooklyn," and every Saturday "at the Waggon-Yard near Fort Knyphausen."—N. T. Merc., Aug 18, 1783.

The last issue found of The New-York Mercury or, General Advertiser (Nov. 21, Vol. 4) bears this date. John Ryan is now partner of William Lewis in its publication.—Brigham, in A. A. S. Proc. (1717), 459.

The bulls of the two prison hospital ships, "Perseverance" and "Bristol Packet," which lie at the Wallabout, are to be sold at the Merchants' Coffee-House.—Royal Gaz., Aug. 16, 1783; Man. Com. Gaz. (1783), 501.

For 100 dollars, Elia Boudaunot, the president of congress, says: "The June packet lately arrived, has brought me final orders for the evacuation of this place; be pleased sir, to inform Congress of this proof of the perseverance of the court of Great Britain, in the pacific system expressed by the provisional articles, and that I shall lose no time, as far as depends upon me, in fulfilling his Majesty's commands."

"But notwithstanding my orders are urgent to accelerate the total evacuation, the difficulty of assigning the precise period for this event is of late greatly increased . . ."

"The violence in the Americans, which broke out soon after the cessation of hostilities, encreased the number of their countrymen to look to me for escape from threatened destruction; but these terrors have of late been so considerably augmented, that almost all of them have thenceforward receive the safety both of their property and of their lives depend upon their being removed by me; which renders it impossible to say when the evacuation can be completed. Whether they have just ground to assert, that there is either no government within their limits for common protection, or that it secretly favours the committees in the sovereignty they assume, and are actually exercising, I shall not pretend to determine; but as the daily gazettes and publications furnish repeated proofs, not only of a disregard to the articles of peace, but of barbarous menaces from committees formed in various towns, cities and districts, and even at Philadelphia, the very place which the Congress had chosen for their residence, I should shew an indulgence to the feelings of humanity, as well as to the honour and interest of the nation I serve, to leave to the mouths of the loyalists, that are desirous to quit the country, a prey to the violence they conceive they have some much cause to apprehend."

"The Congress will hence discern how much it will depend on themselves and the subordinate legislatures, to facilitate the service I am commanded to perform, by abating the fears they will thereby diminish the number of the emigrants; but should these fears continue to spread; and multitudes of officers, and persons at large, at myself acquitted from every delay in the fulfilling my orders and the consequences which may result therefrom; and I cannot avoid adding, that it makes no small part of my concern, that the Congress have thought proper to suspend to this late hour, recommendations stipulated by the treaty, and in the punctual performance of which, the king and his ministers have expressed such confidence."—Freeman's Jour. (Phila.), 3, 10, 1783; Man. Com. Gaz.
A. LETTER FROM ALEXANDER HAMILTON TO MAYOR DUANE ADVISING THAT THE COMMON COUNCIL FORMALLY TENDER TO CONGRESS THE USE OF THE CITY HALL. SEE P. 1235.

"The meeting houses are in a most deplorable condition, ... Aug.

"Except theft and pillering, there is very little business carried on at present..."—Penn. Packet, S 18, 1783.

"At length the period of our leaving this place advances most certainly, and the next advice from England will fix the day for the final embarkation of the last troops from hence; four large storeships are arrived from England to take away the artillery and ordnance stores, as nothing will be left of that kind which is not truly American, and these are very few.

"This city is now fuller of inhabitants than at any period of my residence (though numbers embark every week for England, or other parts of the British dominions), occasioned by the families who flock here from all parts to take their departure, among which there are some who have not been proscribed by any of the provinces; their reasons therefore for quitting this continent are obtuse, that they see some storm gathering, and that the difficulties of the inhabitants of this western world are not yet over, though they have at length seen independence settled in peace."—London Chron., O 2-4, 1783.

Horse-racing on the highways near the city is forbidden, by order of the commandant, as it endangers the lives of "Passengers. Likewise, persons "going out with Fowling Pieces, to shoot near the hand of arms."—Proc. J. Ind. Hist., Vol. 1.

Forty-four refugee citizens of New York, including Samuel Sept. Lordon and Alex. Lamb, writing from "New Burgh," address an appeal to Gov. Clinton and the other members of the board, "constituted by Law for the temporary Government of the Southern District of the State," in which they beg that an ordinance be enacted and a committee appointed to distribute the hospital belonging to the late returning residents of the city, as provided by the Emigrant Society.—Proc. J. Ind. Hist., 2d ser., I: 42-44. For the terms of this ordinance, see a printed broadside in the Emiet Coll. (No. 10878), a facsimile of which was published in Man. Com. Coun. (1855), opp. p. 564, and ibid. (1856), opp. p. 540.

The Definitive Treaty of Peace, between the United States and Great Britain, is signed in Philadelphia, by David Hartley, M. P., for Great Britain, and John Adams, Benjamin Franklin, and John Jay for the United States. Its preamble recites the desire and disposition of "Prince George the Third" and the United States "to forget all past misunderstandings and differences that have unhappily interrupted the good correspondence and friendship which they mutually wish to restore; and to establish such a satisfactory and beneficial intercourse between the two countries, upon the ground of reciprocal advantages and mutual convenience, as may promote and secure to both perpetual peace and harmony." The fact is recited that the "foundation of peace and reconciliation" has already been laid by the provisional articles signed at Paris Nov. 30, 1782 (p. v.); and the substance of the provisional articles are embodied in the present treaty.—Published in Rippon's N. Y. Gen., N 46, 1783; also in the Acts Passed at the Second Session of the Congress (1789), 180-83; Important State Papers (1794), 61-67; Lamb, Hist. of the City of N. Y., II: 267. See also Winor, VIII: 87, 165.

The "Peace of Versailles" was separately signed, on Sept. 3, between Great Britain and France, and between Great Britain and Spain.—Winor, VIII: 89.

A private letter from New York states: "Robberies are so frequent, that it is unsafe to walk the streets in the night, or be in a crowd in the day."—Penn. Packet (Phil.), O 4, 1783.

On Oct. 4, it was stated: "The city of New-York has lately been much infested by robbers; insomuch that listen of them were at one time last week taken up.—Notwithstanding this, scarcely a night passes without a robbery."—The inhabitants have formed associations for a nightly watch."—Ibid, O 4, 1783.

There are between 12,000 and 15,000 refugees, men, women, and children, to be embarked at New York, Long Island, and Staten Island, for "Nova-Scotia, St. Johns, and Abaco." Among these "are many persons of fortune and landed estates, who leave nothing but their terra firma behind them. Many of them pretend that this is not fear of ill treatment, nor the departure of the army, that urges them to leave the country, so much as a conviction that the new republics must sink in a short time under their immense national debt, and the exorbitant taxes with which they will be loaded."—Penn. Packet, S 4, 1783. The fleet sailed on Sept. 15 (q. t.).

By order of the commandant, the market order of June 7 5.
1783. Chatham a new-created. It third the more December.

13 An officer of the British ship "Duc de Chartres" writes from Nova Scotia: "The great emigration of Loyalists from New York to this province is almost daily by new vessels, in the Bay of Fundy, and considerably augmented those of Annapolis Royal and St. John's River; they are so numer-ous at the last mentioned place as to build two towns [Carlton and Clinton]. . . Numbers of families are also gone to Halifax, but the majority are fixed at Port-Royal, where they have erected a large city [Shelburne] which contains nine thousand inhabitants, the more of those of Nova Scotia blacks toward containing about twelve hundred free Blacks, who have served during the war."—Man. Conn. Com. (1870), 814.

John Cape who, during the Revolution, kept a tavern with the French arms in Trenton, announces that he has returned and taken the noted "House and Stables formerly called Hall's, but during the war Roubalet's, Tavern."—N. T. Packet, O 22, 1776. See also L. M. R. K., III: 977, under "City Tavern." In the following year, Cape renamed the house the "State Arms of New York." Cape remained here until the spring of 1786, when Joseph Corré, a pastry cook and confectioner, became the proprietor.—See Mr 16, 1786.

Gov. Clinton writes from Posthouse to Gen. Washington, who was at Rocky Hill, near Princeton, N. J., expressing the fear that Carleton "may not give me timely Notice, as he promised to do in his first Letter, for the establishment of the Jurisdiction of the State over that District [the southern district] on his Departure, and Disorder will consequently take place, before Measures can be taken by the State to prevent it." He therefore asks "that the Troops on the Lines in Westchester County might have Orders to move to the Neighborhood of the City, the moment the British leave it," subject to his directions.—Public Papers of Gen. Clinton, VIII: 257. Washington replied on Oct. 13 that he had written to Gen. Knox, desiring him to confer with Clinton, "and make every necessary arrangement for taking possession of the city the moment the British quit it."—Writings of Gen. Washington (Sparks ed.), VIII: 439.

Congress adopts resolutions directing the disbandment of the army on and after Nov. 5, and setting apart the second Thursday in December (the 11th) as a day of public thanksgiving—Jour. Cong. (Way & Gideon ed.), IV: 298-99; Winsor, VII: 746.

Sir Guy Carleton, K; B: General and Commander in Chief of His Majesty's Forces, within the Colonies lying on the Atlantic Ocean from Nova Scotia to West Florida inclusive, orders an investigation made concerning the origin of the great fire of Sept. 21, 1776 (q. v.). Three British officers are appointed to take testimony.—From the original commission (MS.) in the N. Y. H. S: Report on Am. M.S.S. in Royal Inst. of Gt. Brit., IV: 416. The following is a condensed statement of the testimony taken at the hearings:

Dr. Mervin North, sup.-gen. of his majesty's hospitals in North America: That he saw a man on top of Trinity Church with a fire-brand, and that he believes the church was set on fire by him; also that an explosion occurred in one of the chimneys of the "Vaux-hall hospital."

By Major Mackenzie: That he saw a fire start next day in a house in Chatham Row, four or five houses east of Dr. Inglis's house, which was opposite St. Paul's Church; that he and others believed it was separately set on fire, and that the City was not set on fire by the king's troops.

By Mr. Chew, ass't commissary and sec. of Indian affairs: That he saw the first house in flames, a small one on the dock at Whitehall; then a high house in "Wincoop Street," two hundred yards away, which had the appearance of having been purposely set on fire, that he went on shore from his ship next morning and a sailor who accompanied him found two bundles of cedar matches under a warehouse; that a few days later he found other matches in a cooper shop in Smith Street concealed in a barrel of shavings; and saw several matches that had been discovered by different persons in different parts of the City; that Trinity Church was seen by him to be set on fire; that he had been informed that many of the pump handles were taken away and the pumps otherwise rendered useless, and the fire buckets hid or cut to pieces.

By Baltus Dath, tinman: That he had been appointed by Gen. Robertson (when the king's troops took possession of the City)
to take charge of the fire-engines and lamps of the city and the light-house at Sandy Hook (which position he still holds): that on the cry of fire "which first broke out at Whitehall, whether he immediately with his house or not," that he soon after was told a house was on fire near the North River, back of the rector's house which was near Trinity Church, half a mile from Whitehall; that failing to check the fire which was burning Trinity Church, the Lutheran Church and many other buildings, he "repaired to St. Paul's Church to attempt to save that which by great exertion was effectually," that at daylight he saw several people taken into custody for having matches concealed in their clothes, one of whom was rescued from the rage of the sailors and soldiers in Broadway near the Oswego Market; that from observation and experience he believes the City was purposely set on fire in different places.

By Major Adye: That an inquiry had been made a few days after the fire, but nothing appeared to show that the fire had been caused by the king's troops.

By Henry Law, captain of the fort: That from his observation of the fire starting in several places at the same time, and from the capture of men with matches, he never supposed the fire was accidental or that it had been set on fire by the king's troops; that a man he knew "was put to death and hung up by the heels for cutting of the dry wood in a grove," and that he found the socks of the American soldiers in the City that it would be burnt whenever the king's troops should take possession of it.

By Comfort Sands, a member of the provincial congress for New York: That they were on fire, and that he had been set on fire by direction of the major of the City of New York, and that the dry wood would have burnt the City.

By William Waddell, alderman: That he was directed by Gen. Howe immediately after the king's troops took possession "to see the pumps fire buckets & engines repaired," and that this was done before the fire began. "Many matches & other combustibles were discovered in the Stores on Cruger's Wharf," which he informed were prepared for the purpose of setting out fire-ships; "that some persons were taken up having matches about them which he supposed they had taken from the stores from mere motives of curiosity, without any design of doing mischief with them;" that he heard the day after the fire that "it began in a small house at Whitehall where it was said some soldiers or soldiers had carelessly left a fire.

By William Hervey, merchant: That he had been appointed by Gen. Robertson soon after the fire to examine the house; that he found in a house in Smith St., near Pitt's statue, a cartridge of powder under a straw bed, and a large train of powder leading from it down to the back door in the yard, and showed them to a neighbour.

By Andrew Kerr: That he saw Trinity Church take fire from the fire of the house of Mr. Shipman; that he had observed the top of Mr. Shipman's house in Smith Street; "that the fire had then progressed up Broad St. nearly to Beaver St.;" that it "was currently reported that several applications were made to Gen. Washington by the English to save the city, and that they had been overruled by the governor's house, and quite in vain; and that a party of sailors, who were set on fire at the steeple of the Church "to endeavor to save his books which had been deposited there upon the Episcopal clergy quitting the City upon the declaration of independence."

By Rev. Benjamin Moore: That he went upon the top of the rector's house near Trinity Church, and saw the flames of fire fall upon the roof of the church and the building take fire, that it would burn the rector's house, and quickly if not prevented. By Mr. Whitehall, the pastor, and before he went up the steeple of the Church "to endeavor to save his books which had been deposited there upon the Episcopal clergy quitting the City upon the declaration of independence."

By Gen. Carleton to investigate the causes of the fire were presented in 1802 to the N. Y. H. S. by Joseph W. Lawrence, of St. John, New Brunswick. See mention of the gift in Mag. of Am. Hist, (1890), XXIII: 590.

A vessel in New York harbour, flying the colours of the United States, is boarded "by the Canaille," who tear down the flag and carry it in triumph through the streets, "attended by a chosen band-itti of negroes, sailors, and loyal fey alond'smen."

-Man. Com. Coun. (1870), p. 17. On Oct. 27, Gen. Carleton and Admiral Dibbey issued a proclamation denouncing the outrage as a breach of the peace, and as having "a mischievous Tendency to prolong the Animosities, it is the design of the Provisional Articles to assuage and extinguish."

-Chief-Justice Smith drafted this proclamation, as he had done in many prior instances; his diary, of Oct. 25, contains the following note: "Sent Sir Guy Carleton yesterday Draft of a Proclamation by the Sen. & the Admiral of a late Insult lace of the American Colours. It implies that the Americans are Foreigners if they so please to interpret it. A Draft by Gen'l Mosgrave had erroneously called them a nation distinguished from the British which I observed to the Gen'1 supposed the Provisional to be definitive."

-Wm. Smith's Diary (MS.), VII.

Washington writes from Rocky Hill, N. J., to Knox regarding
THE ICONOGRAPHY OF MANHATTAN ISLAND

Nov.

1783: "arrangements for the Celebration of Peace," which he thinks should be deferred "until the British leave the City, and then to have it at that place, where all who choose to attend can find accommodation." — Writings of Geo. Washington (Ford ed.), IV, 178.

24: "Said orders the following notice, "To the Public:" At the commencement of the late war, the Subscriber left this City, and took Residence in Fishkill; where, during more than seven years, he furnished his fellow Citizens with the New-York Packet, although embarrassed by many and great Difficulties; which the Troubles of the Day occasionally. The happy Restoration of Peace to this City, has induced his Return to this City, where, he intends, to resume the publication of his Paper. . . . "He intends to publish Two Papers a Week; on Monday and Thursday; His First will be published on Thursday the Thirteenth of November next [q.v.]. Price Three Dollars per Annum, the Price before the War; Half to be paid at Entrance. . . . Subscription are now taking in, at his House, No. 5, Water-Street. He flatters himself, that no News-Paper, published in this City, will have a more general Circulation through the Country, than the New-York Packet. "Advertisements, Essays, &c. will be thankfully received; it is requested that they may be furnished in due Time. "He hopes that Gentlemen of Abilities and Leisure, will lend him their Assistance. Every thing that has a Tendency to improve the Taste of the Masses, promote Literature, political Speculation, Essays on Government, Improvement in Manufactures, Husbandry, Intelligence foreign and domestic, &c. will be gratefully received, and duly inserted." — N. T. Merc., N 3, 1783. See N 13.

27: Cornelius Bradford announces the opening on this day of "The Coffee-House.” — N. T. Merc., O 27, 1783. This was the Merchants' Coffee House. — See L. M. R. K., III: 979. Bradford had been proprietor of it before the Revolution beginning May 1, 1776 [q.v.]; but had retired after the British occupation of the City, and the Coffee House was for a few years in charge of James Strachan (see Ap 28, 1781). Bradford died on Nov. 9, 1786. In an account of his death, he was described as "a steady, patriotic during the late arduous contest for American liberty," and the Coffee House, "under his management, was kept with great dignity, both before and since the late war, and he revived its credit from that contempt into which it had fallen during the war." — N. T. Packet, N 10, 1786. Mrs. Bradford continued to keep the tavern, being there as late as Feb. 23, 1791 (q.v.). The fourth financial report (see Ag 26) made by the vestry includes the period from Aug. 21 to this date. It is printed in Proc., Bd. of Ald., LXXVI: 244-25. See N 24.

Nov. 1: An advertisement reads: "Robert Montgomery, Watch and Clock-Maker, and Engraver, Opposite the Coffee-House Bridge, informs his friends, and the public, that he intends carrying on his business, in all its various branches. His serving a regular apprenticeship, he has been enabled to give his attention to every Magazine, and the title The New-York Packet. And the American Advertiser.—Brigham, A. A. S. Proc. (1917), 1474; Early Newspapers, II: 426. See, further, O 24, 1783; N 11, 1784.

Washington writes from West Point in reply to Carleton's letter of Nov. 12 (q.v.): "To day I will see the governor of this State, and concert with him the necessary arrangements for taking possession of the City of New-York, and the other posts mentioned in your letter, at the times therein specified." — Writings of Geo. Washington (Sparks ed.), VIII: 497. (This letter is not found in the Ford ed.)

Washington and Clinton are expected in New York on Saturday, Nov. 22.—Penn. Packet (Philip), N 25, 1783.

Ephraim Smith, inspector of markets, cuts down and carries to his house the bell of the Fly Market, assisted by a party of soldiers, and threatens to tear down "the whole of the erections there." This is to deprive the Americans (who he calls "Damed Rebels") from enjoying this convenience. The commandant, on hearing of it, reprimands him and orders the restoration of the bell.—Penn. Packet, N 25, 1783; Man. Comm. Coun. (1807), 621.

Andrew Elliot, the British editor of the port, publishes a notice that, by order of the commandant, the business of his office will be finally closed on Nov. 20.—Royan Gaz., N 15, 1783.

Gov. Clinton issues a proclamation at Poughkeepsie, in view of the expected withdrawal of British forces from the southern district of this state, requiring the council, which was constituted under the
CHRONOLOGY: THE REVOLUTIONARY PERIOD: 1776–1783

1783
Nov 21. Act of Oct. 23, 1779, to meet at Guyon's Tavern, at East Chester, on Nov. 21, and requiring all citizens to yield due obedience to the laws of this state, and to preserve peace and good order. The council, as required by law, met on the 19th, is to "provide for the temporary evacuation of the southern parts of this State, whenever the enemy shall abandon or be dispossessed of the same, and until the Legislature can be convened."—Penn. Packet, N 25, 1783. See, further, N 21.

Gov. Clinton writes from Poughkeepsie to John Morin Scott appointing him to receive the public records at New York, and stating that it is Sir Guy Carleton's wish that the persons so appointed may be in New York on or before Nov. 22d, the day (later postponed) for the evacuation of the city.—Public Papers of Geo. Clinton, VIII: 281. Scott replied, on Nov. 19, that his right had been questioned to have the custody, not only of "the Records belonging to the Secretary's Office," but also "those belonging to the City and the other Counties of the Southern district."—Clarke, Geo. Col. Van Cortlandt had called upon him this morning, "and offered to deliver up the City Records" to him; but he had shown him Elliot's letter and the colonel had replied that he looked for Clinton's order "for the delivery of the papers."—Ibid., VIII: 386–87.

James Barclay advertises an auction sale, on this day, of a number of "private contents," etc., "at the Friend's Meeting" [see My 5, 1774], upward end of Queen-street.—Royal Gaz., N 15, 1783; L. M. R. K., III: 928.

James Hallett, coach-maker (who has been in business in New York since 1750, q.v.), presents his bill to Sir Guy Carleton just prior to the British evacuation of the city. This document was found by Geo. W. Houghton, ed. of The Hub, among the Carleton MSS., in the library of the Royal Institution of Great Britain, Albermarle St., London. Carleton's country-seat was at the present south-east corner of Varick and Charlton Sts.—Houghton, Coaches of Colonial N. Y. (1809), 28–29; Man. Com. Coun. (1852), 487. This was the Mortier house, "Richmond Hill."—L. M. R. K., III: 921.

15. The following garrison orders are issued at West Point: "The Delaware and Thames concluded, and the city of New-York to be evacuated on the 22d Instant. His Excellency the Commander in Chief proposes to celebrate the Peace at that Place, on Monday the First Day of December next, by a Display of the Fire-Works, and Illuminations, which were intended to have been exhibited at this Post, or such of them as have not been injured by Time, and can be removed."—N. Y. Packet, N 20, 1783: Ind. N. Y. Gaz., N 21, 1783.

The celebration actually occurred on Dec. 9 (q.v.).

"Provisions are very dear; the Americans bring in meat, cori, and vegetables, the first and last however but in small quantities, and which they sell at high prices only for ready money, as specie is universally preferred on every part of the continent."—From a N. Y. letter in London Chron., D 18-20, 1783.

Elbridge Gerry, in a letter to his sister, The Independent Journal, or, the General Advertiser, makes its appearance. Webster and McLean, the publishers, advertised the new sheet in Rivington's paper of Nov. 15, declaring that "Advertisements, Articles of Intelligence, &c. will be gratefully received at their Printing-Office, No. 32 Maiden-Lane."—Royal Gaz., N 15, 1783. See also Early Newspapers, II: 421. A copy of the first issue is preserved in the N. Y. Hist. Soc., further, D 25.

18. "It is requested of the gentlemen who have served in the American army, now in town, on the arrival of his excellency general Washington, to appear with their union cockades, in compliment to his excellency, and our great and good ally, Louis XVI."—Penn. Packet, N 25, 1783.

"It is too obvious ... that nothing chagrin the Britons more than the Union Cockades which appears in the hats of the American officers, in honour to our worthy Allies."—Salem Gaz., D 18, 1783.

At a meeting "of a large and respectable number of inhabitants (lately returned from a seven years' exile) at Mr. Cape's Tavern [see also 11,] Broad-Way," the following resolutions are adopted, Col. Henry Ranger being "Moderator:" That every person who remained in New York during "the late contest" be requested to leave the room, and not be admitted to any future meetings of this body; that each person do his utmost to prevent any confusion that may arise, and on the day when this city shall be evacuated by the troops of his Britannic Majesty," as required by Gov. Clinton's proclamation; and that certain named persons be a committee to meet at Simon's Tavern on the evening of Nov. 19, "to form a Badge of distinction, to be worn on the day of evacuation—appoint the time of the meeting, previous thereto, and agree as to the manner in which this body shall render his Excellency the Governor, on that day."—Rivington's N. Y. Gaz., N 22, 1783; Holt's Ind. N. Y. Gaz., N 22, 1783. See N 20.

Sir Guy Carleton writes to Gen. Washington: "His Majesty's troops will retire from Kingsbridge and McGowan's Pass on this Island, on the 23rd instant, as notified to your Excellency in my letter of the 12th (p. 452); and I shall resign the possession of Her Majesty's and the eastward on Long Island, the same day. Paulus Hook will be relinquished on the day following: but, though every exertion has been made with a view to evacuate this city at the same time, which it was my hope and intention to do, I now find it impracticable. Yet, notwithstanding the winds have been lately very unfavorable, if I have proper assurances that we shall retain a free and uninterrupted use of the Ship-Yard and Hallett's Wharf in New York, and the Brewery and Bakehouse on Long Island (which the admiral represents as indispensably necessary for the shipping and sick seamen), until we can be ready to take our final departure, I shall retire from this city and from Brooklyn on Tuesday next [Nov. 23] at noon, or as soon after as the wind shall permit, and hurry my munitions, etc., to the reservation above specified) Staten Island, with Dowen's, New Utrecht, and the circumference district on Long Island, for such time as may be found absolutely requisite for the troops, that may then remain unprovided with transports." Carleton warns Gen. Washington that he has learned of "a deliberate combination . . . to plunder this town whenever the king's troops shall be withdrawn."—Writings of Gen. Washington (Sparks ed.), VIII: 546.

Washington, however, states in his reply on Nov. 22 (writing at Harlem) that this latter intelligence does not appear to be well founded, and that arrangements have been made to prevent such outrage or disorder, unless the evacuation is so long delayed that "a much larger number of people shall be collected from the country, than have been assembled as yet for the purpose of going into town."—Ibid., (Ford ed.), Xi: 35.

The "Paquet Le Courier de L'Europe," after a stormy passage, arrives from Port L'Orient, having as passenger "Thatcher, Esq; Secretary to John Adams, Esq; Ambassador from the United States of America to the States General of Holland, charged, by the American Commissioners, with the Definitive Treaty, signed at Utrecht, (on the 5d of September,) and on the part of Great Britain, by Mr. Hartley; with which he, on Thursday morning [Nov. 20], sat off to deliver it to the Honourable General Mifflin, President of Congress."—Rivington's N. Y. Gaz. (Supplement), N 22, 1783. See also Holt's Ind. N. Y. Gaz., N 22, 1783.

On this ship also came "Hector St. John, Esq; appointed by the Courts of France to be Consul and Superintendee of the Paquets, now established between this City and Port L'Orient."—Rivington's N. Y. Gaz. (Supplement), N 22, 1783. See also the issues of this paper of Dec. 10, 17 and 20 for further announcements regarding the five ships of this packet line. Besides "Le Courier de L'Europe," they are "Le Courier de L'Amérique," "Le Courier de New York," "Le Courier de l'Orient," and "L'Allocateur." The design of the line was "to facilitate the communication between France and America, and the concerns of commerce between both countries."

At a meeting held this evening at Cape's Tavern the following resolutions are adopted, Col. Frederick Weissensfeil being in the chair:

I. Resolved, That the Badge of Distinction, to be worn at the Reception of the Governor, on his Entrance in this City, be a Union Cockade, of black and white Ribband, worn on the left Breast; and a Laurel in the Hat.

II. Resolved, That the Place of Meeting be at the Bully's Head Tavern, now kept by Mrs. Verien, on Saturday next, at 9 o'Clock, A.M.

III. Resolved, That if it appear eligible, his Excellency Governor Clinton, and his Excellency General Washington (should he accompany the Governor) shall be received by the Citizens, drawn up in the Form of a Square, and in that manner conducted to his Quarters.

IV. Resolved, That the Fidd and other Officers, who now
THE ICONOGRAPHY OF MANHATTAN ISLAND

1783 Serve, or heretofore have served, in the Continental Army, be Nov. 20 conducting his Excellency.

"V. Resolved, That Mr. Samuel Brooke [and twelve otheral...

"VI. Resolved, That the Committee do meet To-morrow, 11 o’Clock, A. M. at the Coffee-House: and that Captain Randall and Captain Dennis notify the Members thereof.

"VII. Resolved, That if the whole of the Committee should not be present, the attending Members be authorized to appoint others in their Place.

"VIII. Resolved, That Mr. James M’Kinney be requested to furnish the Laurel[s], and deposit them at the Bull’s Head.

"IX. Resolved, That Mr. Daniel Green be requested to carry the colours of the United States, on the occasion."—Ind. N. Y. Gaz., N 2, 1783. See N 21.

Loyalists who have signed for passage to the island of Abaco (see Je 16) are requested to go on board their vessels at "New-Slip," to be mustered, at noon on Nov. 21; as after that they will be "precluded from passages at government’s expense."—N. Y. Packet, N 20, 1783. Over 29,000 refugees left New York within a year (see O 6, 1782).—Van Tyne, The Loyalists (1902), 203.

Regarding the loyalists' claim of their right to indemnification for losses sustained during the war, see The Case and Conduct of the merchant Loyalists impartially stated and considered. Printed by Order of their Agents (London, 1783); also Historical View of the Commission for enquiring into the Losses, Services, and Claims of the American Loyalists at the close of the War, between Great Britain and her Colonies, in 1783; with an Account of the Compensation granted to them by Parliament in 1785 and 1788, by John Earlhley-Wilmot (London, 1815); and a transcript of papers relating to American Loyalists copied from originals in the British Pub. Rec. Office, and preserved in the MSS. Div. of the N. Y. P. L.

"Running Machines"—a line of "Stage Wagons"—are advertised to make a one-day run from Newark to Philadelphia. "Constant attendance is given by the boats at the Ferry Stairs, near the Exchange, at three o’clock in the afternoon, to bring passengers to Communipaw, where the Newark stage will be ready to receive them to any's tavv ravvan of the Newark side (Newark).—Ind. N. Y. Gaz., N 29, 1783.

LIEUT.-GOV. VAN Cortlandt recorded in his note-book his movements from Nov. 18 to 25, as follows: "I went from Peakskill Tuesday the 18th of Novrem. In Company with his Excellency Gover’l Clinton, Coll. Benson, and Coll. Campbell, Lodged that night with Genl Cortlandt at Croton River, proceeded & lodged Wednesday night [19th] at Edw. Covenoven’s [Tarrytown] where we met his Excellency Genl Washington & his aides, the next night [20th] Lodged with Mrs. Fred’t V Cortlandt at the Yarkers after having dined with Genl Lewis Morris. Fryday morning [21st] we rode In Company with the Commander In Chief as far as the widow Day’s at harlem, where we held a Council. Saturday [22d] I rode down to Mr. Stonyest man stay’d there until Tuesday [25th]. Then rode Frinheath into the City with the Commander."—May of Am. Hist., V: 134.

Gen. Washington and Gov. George Clinton arrive "at Haerlem, at Day’s tavern [on the present 126th St. near Eighth Ave.] 9 miles from the city of New York." They are attended "by a number of gentlemen of the army, members of the senate and assembly, and other officers of distinction. The continental troops are stationed at or near M’Gowan’s pass; our pickets are advanced to the Dove tavern, five miles from the city."—Penn. Packet, N 29, 1783.

A discharge of cannon announces the embarkation of Rear Admiral Diby.—Ibid.

The council, appointed as provided in the act of Oct. 23, 1779 (p. v.), and which meets at Harlem, passes a measure "for preserving peace and good order within the City and County of New York, and the Counties of Suffolk, Queen’s, King’s, and Richmond," and for apprehending and securing all offenders. It is made lawful for the commander-in-chief (Washington), or other officer commanding the troops of the United States, to issue orders to the troops to perform this service. This ordinance is to be published in the newspapers.—N. Y. Packet, N 24, 1783.

"At a Meeting of a Number of the Officers of the American Army, held at the Request of the exiled Inhabitants of the City of New-York, for the Purpose of adopting a Mode to receive his Excellency Governor Clinton, and his Excellency General Washington, on their Entrance in this City.

"It is proposed, that all the Officers of the Line and Staff, who are now, or may be, in Town, meet at Mr. Cape’s Tavern, at Nine o’Clock, To-Morrow Morning, and march in a Column to the Bull’s Head, in the Bowery Lane. None of his Brethren of their Excellencies, the Officers will be wheed by Platoons; and form a Column in the Rear of the American advanced Guard, and in Front of the Governor and General. The Citizens at the same Time, will march by Fives, on each flank of their Excellencies, and form a Column in the Rear.

Colonel Weissesfeld is requested to lead a Column of the American Officers."—Ind. N. Y. Gaz., N 22, 1783.

Some "staunch and avowed friends to the American cause, living in the vicinity of Chapel-street," on a supposition that Gen. Washington and Gov. Clinton were to make their "public entry" into the city (they had reached Harlem the preceding day, p. v.), hoist the American flag on their houses, "in compliment to those illustrious characters." In a short time this "procured them a visit from the humane and polite Captain William Cunningham (de Bourree General) at the head of a party of British Hannibals, in all the pomp of military parade. Monsieur le Bourreau, with his usual politeness, having pronounced some scores of double-headed Dauns, besides the gentler epithets of Rebel Bitches, &c. without number, in the true milisen cadence, proceeded with his party, and, at length, to tear down the obnoxious colours, and carried them in triumph to his Den, where it is said they were hoisted with the British colours over them."

Also, a "frouce" is reported to have happened at the Coffee House in consequence of a British officer having, unprovoked, grossly insulted an American officer. "The British son of Bellona received the discipline of the horsewhip, besides about half a dozen 'pieds de loup' and 'tauleaux de piquée,' which were given him by his friends in the usual manner of their party in the street."—Salem (Mass.) Gaz., D 12, 1783. See also N 25.

John Holt re-commences publication of his weekly newspaper (formerly the Journal—see Ag 29, 1776) in New York, after its career in Kingston and Poughkeepsie (see J 7, 1777; My 11, 1778). He now calls it The Independent New-York Gazette, and gives it a style of its own, with No. 1.—Brigham, A. S. S. Proc. (1917), 443; ibid. (1918), 90. In a letter headed "The Printer to his Customers," Holt says:

"Amidst a Variety of new Candidates for your Favour in the News-Paper Business—I trust my Countrymen will not be regardless of the Interest of an old Friend, who has spent the prime of his Life in their Service, and to the utmost of his Abilities, always acted with Consistency and Uniformity for the public Good:—For the Truth of this, he relies upon the Evidence of every one who was acquainted with his Publications;—they were all calculated to promote Virtue, Religion, useful Knowledge, or innocent Amusement.—When the Differences between Great-Britain and America first arose, he laboured as far as his abilities extended, to remove him entirely; and though the introduction of more tolerable Censorship became impracticable, which was not till after the British court had avowed the hostile attack at Lexington; there then remained no alternative, but resistance or slavery."

"After this, his Publications tended to animate his Countrymen to a vigorous Defence of their just Rights and Freedom." In Pursuit of this Object, he freely published the Sentiments of Freeman, though in Opposition to the Browns and Menaces of a powerful Body, Men of Power in high Stations, and though the weak Endeavours of an Individual may only be counted as a drop to the Ocean, yet to our united Efforts, Heaven has been pleased to grant the Success which we are now about to celebrate, and on which we desire to join our Countrymen in reciprocal Congratulations.

"We have only to desire the kind indulgence of our Readers for the Defects in this Paper, which at this Time appears under every Disadvantage—Hastily published, in a House not fitted for the Purpose, nor our printing Letter and Materials, yet come to Town, except a small Quantity, and that in Disorder; nor have our Correspondents had Time to get their Intelligence into a proper Channel of Conveyance. When these Impediments are removed, we hope to give our Customers as much Reason to be satisfied with our Publications as ever they have had formerly, nor shall we be less Assiduous to please."—Ind. N. Y. Gaz., N 22, 1783. For later changes in name and ownership, see Early Newspapers, II: 444 and D 15.
With the issue of this date (No. 747), Rivington changes the title of his newspaper (see D 13, 1777) to Rivington’s New-York Gazette and Universal Advertiser.—Early Newspapers, II: 428.

23. In further, D 31.

24. Rutger’s brewery, “On Brewer’s-hill,” and the dwelling-house adjoining, are destroyed by fire.—N. Y. Packet, N 24, 1783. Lieut. Von Knauff, now on boardship, describes the scene in his journal: “The city was all full of Rebels, although all the watches in the city were still occupied by the English. . . . In the night time between 11 and 13 o’clock a terrible fire occurred in New York. Then the ringing of alarm bells and the uproar made by the disgustedly driven sailors of our ship who had been in the city until late, made it quite a restless night. The fire continued until 3 in the morning, when we could see no more.”—Von Knauff’s Jour., 179.

25. In conformity with the notification given by Carleton to Washington on Nov. 19 (p. 25), he now writes to him: “I purpose to withdraw from this place to-morrow at noon, by which time I conclude your troops will be near the barrier. The guards from the redoubts and on the East River shall be first withdrawn; but an officer will be sent out to give information to your advanced guard when the troops move.”—_Writings of Geo. Washington_ (Sparks ed.), VIII: 547. For the “barrier,” see N 25.

26. A broadside bearing this date is circulated, stating that, “The Committee appointed to conduct the Order of receiving their Excellencies Governor Clinton and General Washington, Beg Leave to inform their Fellow-Citizens, that the Troops, under the Command of Major-General Knox, will take Possession of the City at the Hour agreed on, Tuesday next; as soon as this may be performed, he will request the Citizens who may be assembled on Horseback, in the Bowery-Green, the Lower End of the Broad-Way, to accompany him to meet their Excellencies Governor Clinton and General Washington, at the Bull’s Head, in the Bowery—the Citizens on Foot to assemble at or near the Tea-water-Pump at Fresh-water.

ORDER OF PROCESSION.

“A Party of Horse will precede their Excellencies and be on their flanks—after the General and Governor, will follow the Lieutenant-Governor and Members of the Council for the temporary Government of the Southern Parts of the State—The Gentlemen on Horse-back, eight in Front—those on Foot, in the Rear of the Horse, in like Manner. Their Excellencies, after passing down Queen-Street, and the Line of Troops up the Broadway, will halt at Cape’s Tavern.”

The rest of the broadside relates to good order during the ceremonies, patrols, night watch, etc.—See Pl. 49-50, Vol. V, where the document is reproduced from the unique original in the author’s collection; or see a facsimile in _Man. Com. Coun._ (1861), 474. See further, N 25.

27. “We are credibly informed that his excellency governor Clinton, will take his public entrance into this city to-morrow. He will certainly be received with every mark of distinction due so great and dignified a character.—The grateful citizens long sensible of his extraordinary virtues, will naturally extol as one man on his return, and anticipate the happy effects consequent on their being subjected to the government of so wise and judicious a legislator.

“It is expected that his excellency general Washington, will accompany the Governor Clinton. There is no doubt but that the strictest decency and decorum will be observed on the occasion by all ranks of people. They will naturally view him with that pleasing wonder, and heart-felt sincerity, which must expand the human mind on, the appearance of a hero returning crowned with laurels, (after a long absence) whose singular and inflexible probity, constantly commands universal esteem; and whose individual merit as a guardian and protector of public liberty, is unparalleled in history.”—From New York news in _Penn. Packet_, N 29, 1783.

28. The final report of the city vestry during the Revolution continues New York’s financial records (see Ap 30, 1782) from Nov. 1 down to this date, the eve of the evacuation of the city by the British. The report is in _Proc., Bd. of Aid_, LXXXVI: 225-26.

29. Last Tuesday evening, Nov. 25, the American troops marched from Haelem, to the Bowery Lane. They remained there near the present junction of the Bowery and Third Ave. until about one o’clock, when the British troops left the Posts in the Bowery, and the American troops marched into, and took Possession of the City, in the following Order, viz.

1. A Corps of Dragoons.

2. Advanced Guard of Light Infantry.

3. A Corps of Artillery.

5. Battalion of Massachusetts Troops.

6. Rear Guard.

“When the Troops had taken Possession of the City, the General and Governor made their Public Entry in the following Manner:

1. Their Excellencies the General and Governor, with their Suite, on Horseback.

2. The Lieutenant-Governor, and the Members of the Council, for the temporary Government of the Southern District, four abreast.

3. Major General Knox, and the Officers of the Army, eight abreast.

4. Citizens on Horseback, eight abreast.

5. The Speaker of the Assembly and Citizens, on Foot, eight abreast.

“This Their Excellencies the Governor and Commander in Chief, were escorted by a Body of West Chester Light Horse, under the command of Captain Delavan.

“The Procession proceeded down Queen [Pear] street, and through the Broadway, to Cape’s Tavern.

“The Governor gave a Public Dinner at France’s Tavern; at which the Commander in Chief and other General Officers were present.

“After Dinner, the following Toasts were drank by the Company:

1. The United States of America.

2. His most Christian Majesty.

3. The United Netherlands.

4. The King of Sweden.

5. The American Army.

6. The Fleet and Armies of France, which have served in America.

7. The Memory of those Heroes, who have fallen for our Freedom.

8. May our Country be grateful to her Military Children.

9. May Justice support what Courage has gained.

10. The Vindicators of the Rights of Mankind in every Quarter of the Globe.

11. May America be an Asylum to the persecuted of the Earth.

12. May a close Union of the States guard the Temple they have erected to Liberty.

13. May the Remembrance of this Day be a Lesson to Princes.

“The arrangement and whole conduct of this march, with the tranquillity which succeeded it, through the day and night, was admirable! and the grateful citizens will ever feel the most affective impressions, from that elegant and efficient disposition which prevailed through the whole event.”—Rivington’s _N. Y. Gaz._, N 26, 1783; Holt’s _Ind. N. Y. Gaz._, N 29, 1783. See also Winser, VI: 476.

30. John Austin Stevens, writing in 1855, gave the following account of the evacuation, which contains some interesting details: . . . On Monday the 24th the British Commander gave final notice that he would withdraw from New York at noon of the following day, at which time he presumed the American troops would be near the ‘barrier.’ This was a part of a fortified line across the island, originally made in 1779, and later strengthened by the British; it crossed the Bowery on the line of the present Grand Street. The American pickets were already stationed near the Dove Tavern, on the old post road within five miles of the city, near the present Sixty-fifth Street. The commander appointed to conduct the order of reception issued a notice the same day inviting the honorary escort to assemble on horseback at the Bowling Green, near the lower end of Broadway, where Major-Gen. Knox would request them to accompany him to meet the commander at the Bull’s Head on the Bowery; the citizens on foot to assemble at or near the Tea Water Pump.

“At eight o’clock the morning after memorable 25th November, the troops which had been stationed at McGowan’s Pass, the light infantry acting as main guard, were marched, to the Bowery Lane in the upper ward, and were then halted until one o’clock, when the British troops left their post at the barrier, and the Americans, consisting of a corps of dragoons, an advanced guard of light infantry, a corps of artillery, a battalion of light infantry,
THE ICONOGRAPHY OF MANHATTAN ISLAND

1783. A battalion of Massachusetts troops and the rear-guard, Major
Nov. 25 General Knox commanding, entered the city. Mrs. Lamb says the
troops under Knox marched from Harlem "to a point near the
Fresh-Water Pond, where they remained seated on the grass until
about one o'clock in the afternoon," and marching through the
Bowling Green, then through Queen, now Pearl Street, to its
junction with Wall Street, thence through Wall to the Broadway,
where the main body was drawn up in line in front of Cape's Tavern
(later the City Hotel, now 1895 the Boreale Building), while a detail
of infantry and artillery proceeded to Fort George at the Bowling
Green, where the last British colors were lowered from the flag
staff and the act of occupation was finally completed.

"The pagrant of the day was now opened. General Knox with
the honorary escort of citizens rode back from the Bowling Green
to the Bull's Head Tavern, which stood near the site of the late
Bowery, now Thalia Theatre. Here the citizens were gathered
about the old Tea Water Pump, which stood at the corner of
Orange (now Baxter) and Chatham Streets, and the General and
Governor with the civic procession made their public entry."—
Rep. of the Joint Com. on the Centennial Celeb. of the Evac. of N. Y.
by the British, with hist. introd. by John Austin Stevens (1889), 19.

It has been related that the column moved slowly and that, as
it passed the historic Beckman house on the shores of the East
River, "these officers, their staffs and a few civilians are accom-
mpanied by two children entertained in a drawing-room which
was made with leaves plucked from trees growing in the green-house."
—De Lancey, Memoirs of James William Beckman (The St.
Nicholas Soc. N. Y., 1877), 13.

A letter from New York, dated Nov. 26, stated that the British
"cut away the halylards from the flag staff in the fort, (formerly
Fort George) and likewise greased the ropes of that staff so as
not to have a ladder to fix a new rope. Invention prevented any delay;
for the glorious stripes were fixed in the sod, and a discharge of
thirteen fired. The city has been remarkably quiet."—Penn.
Packet, Dec. 2, 1783.

Commenting on this final act of the British, a newspaper con-
tributor said it was a demonstration of "their meanness of spirit
and insolence to conciliate the affections of the Americans;
now who have proved themselves their superiors in every virtue,
and who may without arrogance he denominated their Conquerors."
—Salem (Mass.) Gaz., Dec. 4, 1783.

Lieut. Anthony Glean, who was one of the officers invited by
Washington to march with him into the city on Nov. 25, 1783,
noticed, in 1890, that he joined him near Fort Washington, "and
marched with the main army into the city, filling and occupying
the different posts that the British evacuated. Gen. Washington halted
the army near the old tea-water pump, when the officers of the
revolution formed into a line, and marched through the British
army, then in the fields, (now the Park) which was on the eve of
embarking—while the American army proceeded down Pearl
street and the fort, all along to Trinity Church, (then burn') and there
again met those officers and fired a salute of 15 guns."—N. T.
Gaz., Nov. 26, 1783.

Capt. John Van Dyck, reviewing and criticizing the auto-
biographical statements of Lieut. Glean, wrote, in 1831: "I first
met a troop of American horse in front of our troops, commanded
by Captain John Stokes (a native of New York), half way up
Chatham-street to Pearl-street, from whence I went down Broadway
to Fort George, hearing or seeing no salute of 15 guns being fired at
Trinity Church." Referring to other features of Glean's biography,
Van Dyck says: "Instead of the flag staff standing on the Battery,
it stood on Fort George, on the north end, or bastion; and the fort
walls were about twenty feet above the battery. I have known
the flag staff to stand there for 66 years. I lived in the vicinity of
the Battery and Fort, and I never knew a flag staff on the Battery,
until the Corporation of New York had one put up at, or after,
the taking down of Fort George. [See also Vol. I. p. 423-35.]
"I was on Fort George, and within two feet of the flag staff.
The halyards were unreeled, the cleats were knocked off, the flag
staff was dashed, and a sailor boy (not a man) tried three times,
and not about three feet when he slipped down. Some persons
ran to Mr. Goflet's, iron monger, in Hanover square (now Pearl
street), and got a hand saw, hatchet, hammer, gimblets, and nails;
some sawed lengths across the board, one split the cleats, and some
bored, until they had plenty of them."
"The sailor boy tied the halyards around his waist, filled his
outside sailor jacket pockets full of the cleats, then began to
nail them on from the ground, on the right and left of the flag staff, as
he ascended the flag staff he nailed the cleats on, then he recived
the halyard and when the American flag was then hoisted on Fort
George, a salute was fired of 15 rounds immediately, and three
curts were given."—Com. Adv., Je 30, 1831.

Capt. Van Dyck also stated in this letter that "there was no
British flag on the staff to pull down," but this statement was con-
troverted by James Riker in a pamphlet entitled Evacuation Day
(1832), in which he presented the recollections of Capt. John Van
Andrus, who, when a young sailor, climbed the flagstaff, and tore
down the British flag on that occasion. Regarding the greasing of
the flagstaff at the fort, see also N. Y. 1792.

Another incident of the day was recorded in 1861 by Charles L.
Bushnell, in a note appended to A Narrative of the Life and Adven-
tures of Levi Hanford (1865), 72, as follows: "A gentleman, of this
city, now in the 88th year of his age, who was present at the evacua-
tion of New York by the British in 1783, informs me that he lived
at that time at the lower end of Murray Street, on the north side
of the street. Opposite his residence was a tavern kept by a Mr. Day.
An American flag had been hoisted from the tavern before twelve
o'clock, the time appointed for the Americans to enter the city, and
Cunningham, incensed at the premature display, came there to pull
it down. He was met at the door of the tavern by Mrs. Day, a stout
athletic woman, very loyal in her sentiments, who refused him
admittance, and upon his attempting to force his way into the house,
a scuffle ensued between them, in which she boxed his ears warmly,
made the powder fly from his hair, and caused him to beat a hasty
retreat, amid the jeers and laughter of some few spectators who were
present at the scene. My informant further says that Cunningham
was a very bad fighter if not a coward—"I am no coward," he
said. He wore his hair tied in a cue, with powdered bat- wings over his
ears. He wore light-colored knee-breeches, and his manner was that
of a coarse, insolent and impertuous fellow." See also N. 22.

Among the British who left New York at the end of the war, to
return to England, was this William Cunningham, the notorious
proctor marshal. For his later history, which is also interesting,
see also Notice of his return to England, in N. Y. Gaz., Aug. 10, 1791,
see Genius of Liberty (Morristown, N. J.), Jan. 15, 1801. Regarding
his record in New York, see Ag 4, 1774: S 16, 1776.

The Hon. William Smith, the historian of New York Province,
who had been in New York City since June, 1777 (see 3, 1777),
went to England with Sir Guy Carleton. There he remained until
appointed Chief-Justice of Canada, in 1786, a station which he
occupied until his death, Dec. 3, 1793.—From "Memoir" of Wil-
liam Smith, by his son, in N. Y. H. S. Collections (1859), IV: XIV;

For a compilation of documents relating to the evacuation
of New York by the British forces, commencing with the news of a
"general peace" on March 24, see Mass. Com. Com., (1875), 572-844.
See the general account of the acting of Trumbull's painting, with
background of his portrait of Washington which he painted for
the corporation of New York.—See descrip. of Pl. 51, I: 364; Mag.
Am. Hist. (1885), XI: 387; cfr. Trumbull's Biography (1841), 164;
Man. Com. Conn. (1870), 84.

A singular occurrence, worthy of note, is said to have marked
this day. In the news from Springfield (Mass.), published in the
Salem (Mass.) Gaz., Dec. 25, 1783, it was reported as "an
doubted fact, that Mr. James Rivington, printer at New York,
was, as soon as our troops entered the city, protected in person,
and property, by a guard, and that he will be allowed to reside
in the country, lor reasons best known to the great men at helm."
This has been explained as follows: Of all the mysteries that
occurred in the American Revolution, the employment of Riving-
ton, editor of the Royal Gazette, in the secret service of the
American commander is the most astounding.

"The time that this remarkable connection took place is of
course unknown. There is much probability that it may have com-
enced as early as the closing of the campaign of 1776, as it is
known that about that period, Robert Morris borrowed of a Quaker
five hundred guineas in gold for the secret service of Washington's
army, and that intelligence of vital and vast importance was ob-
tained from the disbursement of the Quaker loan.

"In 1783 this remarkable mystery was solved. When Wash-
ington entered New York a conqueror, on the evacuation by the
British forces, he said one morning to two of his officers: "Suppose,
gentlemen, we walk down to Rivington's bookstore; he is said to be a very pleasant kind of a fellow." Amazed, as the officers were, at the idea of visiting such a man, they of course prepared to accompany the Chief." Custis goes on to relate that, arrived there, Rivington took Washington into his private room, the door of which "closed very imperfectly and soon became ajar, when the officers distinctly heard the chinking of two heavy purses of gold as they were successively placed on the table."—Custis, Recollections of Washington, 293-94, 296-97.

James Duane, a member of the "Council for the Government of the Southern District of New York," who entered New York with Washington, Clinton, and his fellow-exiles, took possession of his dilapidated property. "He found his houses in King (now Pine) street, and at the corner of Water street and Fly market, almost entirely destroyed. His farm, as he calls it, consisting of about twenty acres, at what is now called Gramercie park and its vicinity, was in pretty good order, the house having been occupied by one of the British generals.

"The council took possession of the property of Trinity church, set aside an election of vestrymen that had been held just before the Americans regained New-York, and ordered a new election, in which Mr. Duane was chosen one of the church wardens, and other whigs vestrymen. This election was afterwards confirmed by act of Legislature, and the persons elected chose as rector of the church the Rev. Samuel Provoost, a whig who had left New-York when the British took possession, and who was afterwards the Bishop of this Diocese. The property was afterwards restored, and Mr. Duane continued to be elected church warden. . . ."—From Hon. Samuel W. Jones's "Memoir of James Duane," in Doc. Hist. N. Y. (4to ed.), IV: 650.

"The number of negro slaves taken away by the British from New York in 1783, was upwards of three thousand. The value of each is moderately estimated at 200 dollars, which gives 600,000 dollars for the whole." It was estimated in 1795 that, with 12 years' interest added, this would amount to $1,500,000.—N. J. State Gaz., S 15, 1795.
CHAPTER IV
PERIOD OF ADJUSTMENT AND RECONSTRUCTION
NEW YORK AS THE STATE AND FEDERAL CAPITAL
1783-1811
A BRIEF summary of the principal events of the Period of Adjustment and Reconstruction, from the evacuation of New York by the British troops (see N 25) to the completion and filing of the Commissioners' Map of the city on April 1, 1811, is contained in Vol. I, Chap. IV.

The Definitive Treaty (signed at Paris on Sept. 3, 1814) is published in New York, the text being taken from English newspapers which arrived in New York on Nov. 23.—Rivington's N. Y. Gaz., N 26, 1783. Cf. N 70, 1782.

The ninth session of the continental congress under the Confederation opens at Annapolis. It adjourned from day to day until Dec. 13, when a sufficient number of delegates were present to proceed to business.—Jour. of Cong., IV: 316.

An address, dated Nov. 22, is given to "His Excellency George Clinton, Esq., Governor of the State of New York, Commander in Chief of the Militia, and Admiral of the Navy," by the "Citizens of New York, who have returned from Exile, in Behalf of themselves and their suffering Brethren." It expresses the good will of the people, and their pledge "to support order and good government in the community," over which he has been elected to preside. A similar address, dated Nov. 22 (altered to 26),signed by a committee of 13 citizens, "at request of the Meeting" headed by Thomas Randall and Daniel Phoenix, is presented to Washington. These addresses and the replies of Clinton and Washington are published in Rivington's N. Y. Gaz., N 29, 1783; Hist. Mag., 2d ser., I: 43-46, 166-77; Man. Comm. Conv. (1870), 827-29. For facsimiles of the original address to Washington and his reply, see ibid. (1861), opp. p. 474, which shows the date of the address "22" altered to "26."

William A. Duer, who, as a boy, came to New York with relatives shortly after the close of the war, wrote in 1849 the following description of the city as it was at this time:

"The Battery District then extended ... up both sides of Broadway to Rector-street, with the exception of some half dozen houses left standing near the 'Lower,' or present 'Battery.'

"No visible attempts had been made since the fire to remove the ruins; ... The semi-circular front of old Trinity still reared its glistening head, ... But before reaching it, the gloom was checked by ... the sight of some remaining pickets of a stockade in the lane opposite Verlenstergen Hill, which once formed a portion of the old city wall, crossed Broadway diagonally, passed down the opposite street, and gave to it its name.

"... The old [City] Hall, before its conversion to the use of the federal government, stood upon open brick arches, under which you passed from street to street, in one direction, and, in another, along the same street in which we were travelling. Nearly opposite, was the modest dwelling of Alexander Hamilton, upon part of the site of the Mechanics' Bank. Beyond, at the intersection of Smith (now William) street, we beheld the effigies of a more widely celebrated, but not more illustrious man. There, erect upon its pedestal, was the statue of the elder Pitt, mutilated and defaced in resentment of his speech against the acknowledgement of our Independence.

"Our family party now wheeled to the left, and passing up Smith-street, till we came to the corner of King, now Prince-street, we took up our abode for the winter at the family mansion of the Philipse, then kept as a lodging-house ... but afterwards, before its fall, more renowned as the Bank Coffee House, kept by the inimitable host Niblo, so famous as a caterer for the public taste ..."

"On the next May-day [1784], ... we arrived at the upper extremity of Broadway, at the utmost limit of the City pavement, where we took possession of the house opposite St. Paul's Church, now [1849] occupied by the Chemical Bank. ... The fields were open to the north, as far as a line running eastwardly from Warren-street, where the prospect was bounded by ... the Bridewell, the Poorhouse, the Gail and the Gallows. Towards the west, however, there was nothing to obstruct the view of the North River, but two low houses at the corner of Vesey-street, and the College building, as yet unfurnished with wings, and unadorned with stucco. The 'fields,' as the area comprised in the Park was then called, were green, but neither inclosed nor planted, and the only trees in sight, besides the young, now old, ones in front of the College, were the striping growth that peered above the tea, and mead and cake gardens along the west side of the fields.

"Although the streets leading from Broadway to the river, had been laid out as high as Warren-street, yet they were but partially built upon, and that, for the most part, with houses of an inferior description. None above Dey-street had been regulated and paved; nor had the ridge, commenced near the Battery, and extending the length of the island, been dug through as far even as Cortland-street. Great Dock-street, or that part of Pearl, between Whitehall and Counties Slip, with the other streets in the immediate neighborhood of Fort George, within which the Colonial Government-house was situate, had long been considered the Court-end of the town; but, even before the revolution, Wall-street was regarded as a rival seat of fashion, to which it established an exclusive claim, and maintained it until superseded by Park Place, or Robinson-street, as it had previously been called; whose pretensions in that respect have, in their turn, become [1849] nearly obsolete. Little Dock-street, now [1849] merged in Water-street, and that part of the original Water-street which lay adjacent to the Albany Pier, were occupied by the river trade; while the remainder of Water-street, and such parts of Front-street as had already been recovered from the river, formed theemporium of foreign commerce. This, indeed, was the case as far up as the Coffee House Slip, and gradually extended to Maiden Lane, at the foot of which were the Vly Market, and the Brooklyn Ferry; whilst at the head of it stood the Oswego Market, fronting on Broadway. Above, on the East River, as far as Dover-street, the wharves were chiefly improved by our eastern brethren with their cargoes of tobacco, or occupied by our neighbors from Long Island, with their more substantial freight of oysters, clams, and fine white sand. Beyond Dover-street, the ship-yards commenced, extending, at first, no farther than to the 'New,' or, as it is now called, 'Pike' Slip.' (A foot-note adds: "The Ship-yards were gradually removed towards Corliss's Hook, and now [1840] extend beyond it.")

The Fresh-Water Pond, or Collect (see desc. of Pl. 18-a, I: 31), was lined, on its southern and eastern banks, "with fountains, pottery, breweries, tanneries, rope-walks, and other manufactures; all drawing their supplies of water from the pond. ... The ground between the Collect and Broadway rose gradually from its margin to the height of one hundred feet, and nothing can exceed so brilliancy and animation the prospect it presented on a fine winter day, when the icy surface was alive with skaters darting in every direction ...; while the hill side was covered with spectators, rising as in an amphitheatre, tier above tier," ...—Duer's New York As It Was during the Latter Part of the Last Century (1849), 6-13. St. John De Crèvecoeur, in his Lettres d'un Cultivateur Américain (Paris, 1878), said that the city lost 1,700 houses by the war.—Original letters in N. Y. H. S.; translation in Mag. Am. Hist., II: 748. For another account of the city and its affairs from 1781 to 1789, see "New York after the Revolution," by H. P. Johnston, in Mag. Am. Hist. (1893), XXIX: 305-31.
THE ICONOGRAPHY OF MANHATTAN ISLAND

Walter Rutherford returns to his home at the north-west corner of Broadway and Vesey St.—Rutherford, Family Records: and Events, 154. He described the location as "far up the street with an open square in front, and good air, as there are but few houses in the neighborhood." Here he lived until his death in 1804.—Hibbs, 109. See Pl. 86, Vol. I; Pl. 93, Vol. II.

The operation of Paulus Hook Ferry was resumed by Abraham Meier after the Revolution, during which it was suspended.—M. C.C. (1784-1813), I: 124. See May 1, 1774. On March 16, 1785, the common council allowed the widow of Abraham Meier $50 per annum for the term from Nov. 26, 1783, until May 1, 1785, and ordered a new grant of the ferry issued to her, at an annual rent of $50.—Hibbs, 151.

The fire engineers of the several fire engines and companies of New York represent to Gov. Clinton, in an address, the condition of the fire apparatus and their desire to conduct themselves so as to gain the applause of the citizens. A list of firemen is appended, showing that there were at this time in the city 14 engine companies, 32 hook-and-ladder companies, 16 foremen, and 253 firemen. See facsimile reproduction of the original address, in Man. Com. Coun. (1856), opp. p. 238; Hist. Mag., 2d ser., I: 45-46; Costello, Our Firemen, 42-43.

Washington, accompanied by a number of general and other officers, with a detachment of the army, "waits at the water side" to receive the minister of France. The latter, perhaps on account of bad weather, did not arrive.—Ind. N. Y. Gaz., N 29, 1783.

The citizens "who have lately returned from exile" give "an elegant Entertainment" at Cape's Tavern to Gov. Clinton and the council. Gen. Washington, the officers of the army, and about 300 gentlemen "graced the feast." After dinner the following toasts were drunk:

1. The United States.
2. His Most Christian Majesty.
3. The United Netherlands.
4. The King of Sweden.
5. The Protectors of the Rights of Mankind.
6. The American Ministers at Foreign Courts.
7. May an uninterrupted Commerce soon repair the ravages of war.
8. May the Trade of America center with those who have been foremost to defend her Liberties.
10. May the Spirit which produced our happy Constitution, be its continued Support.
11. May the Faction be chained in the regions of darkness.
12. May the Sun of American Liberty spread its influence to the end of the earth.

The evening was spent in good humour, hilarity and mirth, becoming the joyous occasion of their meeting.—Penn. Packet, D 12, 1783.

The council which governs the Southern District of New York State (see O 13, 1779) passes an ordinance to prevent extortion and other irregularities on the part of carmen.—Ind. N. Y. Gaz., D 6, 1783.

The post-office is opened by Deputy-postmaster William Bellow, "at No. 38, Smith-street, in the house formerly Judge Horsemanden's. He informs the public that "After next week, the Southern, Eastern, and Northern Posts, will all arrive...every Wednesday afternoon, and set out on Thursday, Ten o'Clock, A.M."—Holt's Ind. N. Y. Gaz., N 29, 1783; Stone, Hist. of N. T. City, Appendix IV, p. 19. See also Mr 17 and Ap 23, 1779.

Robert R. Livingston, writing to John Jay, says: "...we have been five days in town without the smallest disturbance." The shops of royalists "were opened the day after we came in, and Rivington himself goes on as usual [see N 25]...the race of Tories will not, after all, be totally extinct in America."—Corresp. and Pub. Papers of John Jay (ed. by H. P. Johnston, 1891), III: 98.

"The Asprea Frigate, and twenty sail of empty transports are lately arrived at Sandy Hook, the latter to carry to Europe the British troops, &c. at present on Staten and Long Islands."—Brinton, N 20, 1783.

A New Yorker, writing on Nov. 30 said: "Last night, at half past ten, we had a severe shock of an earthquake: I was writing in my parlour, when, in a moment, without any apparent signs, either in air (for it was quite clear and star-light), or of wind (for it was rather a calm preceding it), I was thrown off my seat, not forward; the birds in their cages, hanging against a brick wall, thrown off their perches; windows, glasses, chins, all shattered. It was repeated, not quite so violent, about half past two this morning. On the island it was felt at the Southern Port of Green, with considerable force. The cattle ran howling in the greatest distress imagineable: the birds left their roosts, and sought protection in flying about. It is an aweful piece of business."—London Chron., Ja 10-13, 1784.

Sir Guy Carleton, on board the "Ceres" off Staten Island, writes to Washington: "I hope we shall be able to embarrass the remainder of his Majesty's troops from Long Island and Staten Island, and take our final departure on the 4th instant."—Writings of Geo. Washington (Sparks ed.), VIII: 47; Emmet Coll., No. 7049. Washington replied on Dec. 2: "I...sincerely wish that your Excellency, with the troops under your orders, may have a safe and pleasant passage."—Ibid., VIII: 500.

Col. Timothy Pickering, quartermaster-general, writes to Gov. Clinton that he has viewed the barricades and other buildings erected in this state by the British, and has proposed to sell them; but that he finds in New York City that "the proprietors of some of the land on which such buildings stand are desirous of considering them as subject to their claims by way of compensation for the damages they have sustained from the British." While he thinks these demands "inadmissible," he does not think it "fair" to make but a small part of the numbers who have suffered by the enemy"; nevertheless, to prevent disputes, he asks the advice of the governor and of counsel.—From facsimile of Pickering's letter, in Man. Com. Coun. (1859), opp. p. 481. See, further, My 4, 1784.

A "very elegant Entertainment" is given at Cape's Tavern by Gov. Clinton to "his Excellency the Chevalier de la Ferrerne, Ambassador from his Most Christian Majesty to the United States." General Washington, the principal officers of this state and of the army, and over a hundred gentlemen were present, "who passed the day and evening, with great conviviality."—Man. Com. Coun. (1870), 812.

"In the evening the Grand Fire Works, in celebration of the Declaration of Peace, between Great Britain and the United States of North America, were exhibited at the Bowling Green, in the Broadway." A complete list of the exhibits, numbering about 115 features, was published in a report of the event. Balloons, rockets, set pieces, and figures of various kinds were shown in great variety. "These magnificent Fire Works infinitely exceeded every former exhibition in the United States: The prodigious concourse of spectators assembled on the occasion, expressed the universal astonishment and grateful gratification."—Man. Com. Coun. (1870), 533-35. This account published in the Manual was probably taken from Rivington's Ind. N. Y. Gaz., D 3, 1783, for the issue of Dec. 6 makes reference to it. The issue of Dec. 3 is missing from the files of the N. Y. L. P. and N. Y. H. S.; but see another account in Penn. Packet, D 12, 1783.

Washington writes from New York to the Hon. Thomas Mifflin, president of congress, that the evacuation of New York was postponed two days on account of bad weather. While the British troops left, on the 25th, and a detachment of the American army marched into the city, civil power was immediately restored, and "the most perfect regularity and good order have prevailed ever since."—Writings of Geo. Washington (Sparks ed.), VIII: 500.

Capt. James Duncan of the British navy, writing on Governor's Island, reports to Gov. Clinton that the remaining British troops are withdrawn from that island. Later in the morning, on board the "Centurion," off New York, he sent to Clinton a description List of the different buildings &c. on Governors Island. 

The Convalescent's Hospital "appears to be the principal building on the Gzt. "—Pub. Purposes.

James Hearn conducts an "Eating-House and Cookshop" in Maiden Lane "at the Sign of the Chequers, near the Fly Market," which he announces is to be called "Hearn's Porter House."—De-
parting from the usual tavern method, Heurn adverts that he has adopted a plan "whereby any person may eat of a variety of dishes for his dinner, if he pleases, or have a plate cut off one joint at a small expense."—Rivington's N. Y. Gaz., D 3, 1783.

"... the Whig members of the army in town assembled at Frances Tavern, to take a final leave of their illustrious, Gracious, and much loved Commander, General Washington. The passions of human nature were not more tenderly agitated than in this interesting and distressful scene. His Excellency having filled a glass of wine, thus addressed his brave fellow soldiers: 'With a heart full of love and gratitude, I bid you goodbye. No doubt most devotedly, you love your last atten-
days may be as prosperous and happy as your former ones have been grateful and honorable.'

"The words produced extreme sensibility on both sides, they were answered by warm expressions and fervent wishes, from the Gentlemen of the Army, whose truly patriotic feelings, it is not in our power to convey to the reader. Soon after this scene was closed, His Excellency the Governor, the Honourable, the Council and citizens of the first distinctions, waited on the General and in terms most affectionate took their leaves."

"The Corps of the Light Infantry was drawn up in a line, the Commander in Chief, about two o'clock, passed through them, on his way to Whitehall, where he embarked in his barge for Powles Hook. He has now retired to General Leisler's House, and make a short stay at Philadelphia, will thence proceed to Annapolis, where he will resign his Commission of General of the American Armies into the hands of the Continental Congress, from whom it was derived; immediately after which, his Excellency will set out for his seat, named Mount Vernon, in Virginia, emulating the example of his model, the virtuous Roman General, who, victorious, left the tented field, covered with honour, and withdrew from public life, autum cum dignitate."—Rivington's N. Y. Gaz., D 6, 1783; The Literary Diary of Ezra Stiles, III: 101; The Writings of Geo. Washington (Ford ed.), X: 348, 356; Winsor, VI: 747. See also L. M. R., title "Whitehall Ferry," III: 944; and disp of Pl. 167-9, III: 830.

The Salem (Mass.) Gaz., D 18, 1783, reports the event with the following additional paragraphs: "The respectable body convened on this important occasion, comprised the courageous soldier, the invaluable patriot, the sincere friend to the interests of society. Deeply impressed with a stedfast sensibility of his Excellency's amiable manners, and conspicuous virtues, an earnest anxiety to acknowledge them was minutely legible through the whole meeting, and expressed in the most legible terms, which reflect the highest honour on men vying with each other to express their veneration for so dignified a common-wealth, and its illustrious founders.—His Excellency the Governor, the attendant officers of state, and many citizens of repute, gave the most conspicuous proofs of their regard for the General's true merit, in a sincere and affectionate farewell."

James Thacker, M. D., enlarging upon the foregoing account of the farewell at Frances Tavern, said of Washington: "Having drank, he added, I cannot come to take my leave, but shall be obliged to you, if each of you will come and take me by the hand. General Knox being nearest, turned to him. Incapable of uttering, Washington, in tears, grasped his hand, embraced and kissed him. In the same affectionate manner he took leave of each succeeding officer. In every eye was the tear of dignified sensibility; but a word was articulated to interrupt the eloquent silence, and tenderness of the scene...

"—A Military Journal (1821), 422-23.

In a letter to Lafayette, Washington stated that on Dec. 5 the harbour of New York "was finally cleared of the British flag."—Writings of Geo. Washington (Ford ed.), X: 547.

We are informed that their Excellencies the Commanders in Chief of the British fleet and army, in America, with the last divi-
tion of troops on board, have left Staten-Island on their passage to

England. General Sir Guy Carleton, Dean Poynata, Esq; Postmaster-
General, Brook Watson, Esq; Commissary-General, William Smith, Esq; and a number of Gentlemen were passengers in the Ceres frigate, commanded by Captain Hawkins. In the Cyclops frigate, by Captain Christian, were Hugh Wallace and James Jauncey, Enquires, and many other Gentlemen.—Rivington's N. Y. Gaz., D 6, 1783. Cf. Penn. Packet, D 12, 1783.

Rev. John H. Livingston, D. D., after serving the Reformed Dutch Church in Poughkeepsie, Aug. 6, 1783, resumes his pastoral work in New York.—Eccles. Rev., VII: 4705; Demarest, Hist. of the Reformed Protestant Dutch Church, 97; Jour. Presby-

terian Hist. Soc. (1917-18), IX: 355-67. Services are resumed by him in the Dutch Church in Garden St.—Disway, The Earliest Churches of N. Y., 28-29. This church had not been occupied and damaged as the other churches had.—De Witt, Discourse, 41-42. The North Dutch Church, where he formerly presided, was not re-

opened for worship until Dec., 1784 (p. v.), and the Middle Dutch Church until July 4, 1790 (p. v). See also N 18, 1776; and Memoirs of Rev. John H. Livingston (1829). In 1810, Livingston became presi-
dent of Queen's (now Rutgers) College, at New Brunswick, N. J.:

Gov. Clinton issues a proclamation requiring the senate and as-
semly to meet at the Hall, on Tuesday, Jan. 6, 1784.—

Rivington's N. Y. Gaz., D 13, 1783.

In accordance with Washington's proclamation, issued at Pough-
keepsie on Nov. 16, this Thursday is celebrated as a "Day of Public Thanksgiving, for the final establishment of American inde-
pendence, and the long desired restoration of Civil Government, in the blessings of an Honourable Peace." Sermons are preached "at St. Paul's, by the Rev. Mr. Moore; at the Chapel, by the Rev. Dr. Rogers; and at the Old Dutch Church in Garden St., by the Rev. Dr. Livingston." The clergy of other congregations also were heard.—Rivington's N. Y. Gaz., D 13, 1783 (where the texts on which their sermons are based are printed): DeWitt's Discourse, 41-42.

See A Discourse [by Israel Eruv] delivered in New York before a Brigade of Continental Troops, and a number of citizens, in St. George's Chapel, Dec. 11, 1783, the day set apart by the U. S. in Congress, as a day of public thanksgiving, for the blessings of Inde-

wards a member of the council of safety.

Holt prints a page-long ordinance, presumably of recent date, which has been passed by the council that governs the Southern District of this state (see O 23, 1779), regarding the holding of elec-
tions within this district. It provides that the election which is to be held in New York County to choose senators and assemblymen shall be held on Dec. 29 next in the city hall.

The inhabitants voting for aldermen and other city officials shall hold their election on Dec. 15 at the following places:

In the East Ward, at the "Coffee-House"

"South Ward" "East City-Hall"

"West Ward" "House of John Francisic"

"Montgomery" "Market, in Peck's Slip"

"Out Ward" "Butl's-Head Tavern"

The act requires, further, that persons desiring to take the "Oaths of Office and Allegiance, prescribed by the Laws of this State," and that the act of March 27, 1778, to regulate elections, shall apply in regard to prohibiting Loyalists from voting or holding office, unless they have returned to their allegiance to the state in accordance with any proclamation issued by the state or Gen. Washington.—

Ind. Gaz., D 13, 1783. See, further, D 15.

The name of Holt's newspaper, recently called The Independent New-York Gazette (see N 22), changed, with its fourth issue, to
Washington surrenders his commission to congress at Annapolis. Dec. 23.

The first item of expense under the newly organized city government (see D 19) bears this date. It is entered in Journal A, 1783 to 1794, Chamberlain's Office, now preserved in the comptroller's record-room; and has been printed in the M. C. C. (1784-1831), XIX: 743 (Appendix C). See, further, D 26.

A New Yorker writes: "Ever since the British forces quitted this city, the government has paid a particular attention to the establishing a well regulated police, for the well governing of the city; and the repair of all the public edifices is the next grand object."

A Dutch frigate of 20 guns, La Bella, which brought over some families to settle in the town, the Congress will certainly fix this as the seat of American government."—London Chron., Ja 27-29, 1784.

Coenrad W. Ham publishes a notice that he is advised by the attorney-general that the act of the provincial legislature of April 3, 1775, "to prevent the entrance of unmerchantable flour, and the fals e treading of bread and flour casks," is in full force as a law of this state.—Ind. Gaz., D 27, 1784.

Webster and M'Lean change their paper from a weekly (see N 17) to a semi-weekly.—Early Newspapers, II: 441; Brigham, A. A. S. Proc. (1917), 441.

By order of the 'Aldermen and Common Council,' Thomas Randall, president of that body, publishes their resolution requiring the mayor Jan. 20, every one who intends to keep a public house or to sell liquors at retail, shall obtain a license. Agreeable to an act of March 8, 1773 (p. v.), Abraham P. Lott is appointed commissioner of excise.—Ind. Gaz., D 27, 1784. See, further, F 3, 1784.

The second entry in the city's Journal A (covering the chamberlain's accounts after the Revolution) is a payment "by Warrant from Alderman Randall President of the Common Council dated 26th Instant." The entry shows Randall to have been the first to hold this office in the city government as organized on Dec. 15 (p. v.). This and a few later entries have been printed in M. C. C. (1784-1831), XIX: 743 (Appendix C). They show frequent change in the office of president.

An essay signed "A Whig" strongly condemns Tories, particularly Rivington, of whom it states: "...he is a dealer in curiosities, and is himself a greater curiosity than is to be found among the Bijoustrice in his shop. ... The sudden transition of Mr. Rivington from his most excellent Majesty's printer, to being a republican printer, and several other circumstances, has given cause of suspicion to many, that he is still a printer to the British court, and a secret emissary."—Ind. Gaz., D 27, 1785.

With the issue of this date (No. 750), Rivington's newspaper was a weekly.—Ind. Gaz., D 27, 1785. See, further, Proc. (1791), 487.

A letter from New York, dated Jan. 1, 1784, states: "Yesterday [Dec. 31] Rivington, who has had the audacity to continue his obnoxious publications was waited on by General John Lamb, Colonel Willett, and Colonel Sears, and forbade the prosecution of any further business in this city; in consequence of which, he has discharged his hands, and obeyed the order. To the joy of everyone in the United States, Jenny Rivington's political existence terminated last Wednesday, the 31st ultimo."—Penn. Packet, Ja 15, 1784. See also N. Y. Jour. & Gaz., My 6, 1784.

J. F. D. Smyth, an English traveller who visited New York during the British occupation, wrote in a published account of his travels: "Amongst the multitude of elegant seats upon this island there are three or four uncommonly beautiful, viz. Governor Elliot's, Judge Jones's, 'Squire Morris's, and Mr. Bateman's."

"And opposite upon the Continent, just above Hell-gates, there is a villa, named Morrisania, which is inferior to no place in the world for the beauties, grandeur, and extent of perspective, and the elegance of its situation."—Smyth, A Tour in the U. S. (London, 1784), II: 376.

In this year, Gen. Steuben, having resigned his commission, returned to New York, "where he first rented a country house in the middle part of the island. It belonged to Mr. Provost, better known at the time as the 'ready-money Provost,' and was situated in the Fifty-seventh street, in Jones's Wood. It was called the 'Louvre' by its proprietor."—Kapp, Life of Steu-

ben (1899), 578. "Poverty soon compelled Steuben to give up his dismantled and deserted residence, and to surrender the 'Louvre.'"
1784—His old friend and aide-de-camp B. Walker, who had married in the meantime, and taken a house in Maiden Lane, . . . nearly opposite its junction with Liberty street, invited him to stay with him. When Walker afterwards removed to Courtland street, Steuben engaged rooms in the present Fulton street, at a Dr. Vache's, and took his dinners at the celebrated boarding-house of the Miss Dabney, in Wall street, near opposite Hanover. Having lived there a year or two, he went to the house of a Dr. Tillyory, at the south-east corner of Broadway and Wall street, till he finally, in 1791, took a house opposite Saint Paul's Church, the present [1859] 216 Broadway, which he occupied down to his removal to Steuben, in 1794.—Ibid., 380.

Soon after the revolution, David, Mr. Clarkson erected a residence in the south-east corner of Broadway between Leonard and Franklin streets—the first improvement in that block. He had married the daughter of the late proprietor, Madam Margaret Peyster, who used the pasture-land for its original purposes. This was a portion of the original Kalchhoek, south of the Van Cortlandt property. Clarkson's house was about 30 ft. wide and two storeys high; it stood 50 ft. back from the street, and was surrounded by a large garden extending along the present Leonard street to about the line of Elm St. Mr. Clarkson, after residing here some years, sold the whole property to Rufus King and John Lawrence for $35,000. Its extent was about 160 ft. on Broadway and 58 ft. deep. In 1808, King and Lawrence partitioned the lots between them. A map of the property, with the above description, is given in Man. Com. Cts. (1838), 597.

In this year, the Jewish burial-ground (New Bowery near Oliver St.) became the place of sepulture of the Congregation Shearith Israel.—Sanford, Superior Court Rep., IV: 102. See Ag 23, 1728.

Strong feeling is prevalent against the Society of the Cincinnati (see My 16, 1785), due to misgivings that the order may develop into an hereditary military nobility.—Winston, VII: 219; McMasters, Hist. of the People of the U. S., I: 167 et seq.

There appeared, in this year, from the press of Samuel Loudon A Letter from Phocion to the Considerate Citizens of New-York, On the Politicks of the Day. The author was Alexander Hamilton. "At the close of the Revolutionary war, the popular feeling against the Tories was so strong that it was next to impossible for them to obtain justice. At this time Hamilton rendered them great service, ... in the Letters of Phocion."—Ford, Bibliotheca Hamiltoniana (1886), 9. They replied to "Mentor" (Isaac Lydard).

There was published in Albany, in 1860, Names of Persons for whom Marriage Licenses were issued by the Secretary of the Province of New York, previous to 1784.

The common council publishes an ordinance requiring the inhabitants to provide themselves with fire-buckets, at the expense of the landlords. A fine of 40 shillings is to be levied for every chimney on fire; six shillings for neglecting to supply buckets, and ten shillings for delaying over 48 hours in returning them after a fire, either to the owner or to the city hall.—N. Y. Packet, Ja 1, 1784.

"John Francis, At the Sign of his Excellency General Washington," has removed from No. 59 to No. 2 Dock St.—N. Y. Packet, Ja 1, 1784. See Ag 22, 1785.

By order of the common council, there is published a section of the criminal law against storing more than 10 lbs. of gunpowder at one time in any house or other places.—N. Y. Packet, etc.—1784.

The New-York Gazetteer, and Country Journal is changed from a weekly (see D 3, 1783) to a tri-weekly.—Early Newspapers, III: 423; Brigham, A. A. S. Proc. (1917), 431. See Ja 17.

In obedience to the governor's proclamation (see Ind. Gaz., D 13, 1783), the senate and assembly convene in New York City. They continued to hold sessions here until April 2, 1785, when they adjourned to meet at Poughkeepsie on Jan. 1, 1788 (q. v.).—Assem. Jour. (1784), 31 ibid. (1785), 33 ibid. (1786), 33 ibid. (1787), 3 ibid. (1789), 3; Senate Jour. (1784), 31 ibid. (1785), 33 ibid. (1786), 61 ibid. (1787), 3 ibid. (1789).

Holt's paper (see D 13, 1785) becomes a semi-weekly instead of a daily.—Brigham, A. A. S. Proc. (1917), 440; Early Newspapers, II: 826.

Verdine Elsworth (see Je 6, 1767) announces that he has opened "a House of Private Lodgings, and a Livery-Stable," at No. 19, Maiden Lane.—Ind. Gaz., Ja 8, 1784. For Eleventh's activities prior to the Revolution, see Je 6, 1783, Addenda.

In a letter, dated "Jan* 12* 1783;" (error for 1784), from Col. Ben Walker to Gen. Steuben, it is said: "On my arrival here [on Jan. 14 I did not find the city so peacable as I wished—the violent party had stopped Rivington's press [see D 31, 1783] and I yet doubt if he will be able to support himself, or if he got a violent beating in the street."—Steuben Papers, Vol. X (MS, Jan. 15, 1784), in N. Y. H. S. His assailant appears to have been Nicholas Cruger, who claimed to have suffered during the war, when a prisoner in New York, by Rivington's references to him in his newspaper at that time.—Ind. Gaz., Ja 22, 1784.

The consistory of the Dutch Church resolves "to proceed at once to repair the North Church, and place it in a neat and proper condition."—De Witt's Discourse, 42.

The large ice-house near the river, "back of the Burnt Church" (Trinity), is offered for sale.—N. Y. Packet, Ja 15, 1784.

The following assize of bread is ordered by "the Aldermen and Common Council": "A loaf of Bread of superfine Flour, at $40. per cwt. to weigh 2 lb. 9 ounces, for One Shilling." The order is signed by "Daniel Phoines, Clerk."—N. Y. Packet, Ja 19, 1784.

The confiscated property of William Bayard is advertised for sale. It includes Hoboken, "Bacon's House," and Butler Ferry. The first of these is described as "That well-known and valuable place and farm called Hoboken, opposite to the City of New York, . . . containing 275 acres of salt meadow, about 245 acres of upland on the island, and 57 acres of mountain woodland . . . and an healthy and elegant situation, having the City of New York in full view." The second is "The place or farm known by the name of Weehawken,"—N. Y. Gazetteer, Ja 11, 1784. See also Ag 16.

Gov. Clinton having issued a proclamation on Dec. 9 last for convening the legislature in the city of New York on Jan. 6, several members met on that day; but, a sufficient number to proceed to business not appearing, the house adjourned from day to day until this day, when a quorum being present, the business of the first meeting of the seventh session began. Those representing the city and county of New York were Marinus Willet, John Lumb, Henry Rutgers, Isaac Sears, John Stagg, William Malcom, Robert Harpur, Peter Van Zandt, and Hugh Hughes. John Stagg was the only one of these absent. Gov. Clinton's message to the assembly contained the following clause: "While we survey the Ruins of this once flourishing City, and its Vicinity; While we Sympathize in the calamities which have reduced many of our virtuous Fellow-Citizens to Want and Distress; . . . how ought we to overflow with Love and Gratitude to our adorable Creator, thro' whose gracious Intervention, Bounds have been set, and probably forever, to such scenes of Horror and Devastation . . . our Ports so long withfolded from us, are at length open to all the World." A "Council of Appointment" is chosen at this meeting.—Votes and Proceedings of the Assembly, 1-10.

The executors of the will of Gerardus Haringhoven, Sr., announce the intended sale at public venue on April 15, of "That noted and valuable lot of land in the Out ward of the City of New York, fronting the Bowery road; containing in breadth in front and rear 75 feet and in length on each side 120 feet, on which is erected the Tea-Water Works, and two dwelling houses. The tea-water well is supplied by the prevailing Spring and the ground water, the Water and the emoluments arising from reading the same in the city are too well-known to need any encomiums."—N. Y. Gazetteer, Ja 23, 1784. For many years, the water from the Tea Water Pump at Park Row was considered the only good spring water for household purposes.—L. M. R. K., I: 976. The pump was again offered for sale on Ag 15, 1785, and F 9, 1793 (q. v.). For complaints against it, see Ag 19, 1784 and Ap 9, 1785.

"Whereas the traffick of White People, heretofore countenanced in this state, while under the arbitrary control of the British government, is contrary to the feelings of a number of respectable Citizens, and to the idea of liberty this country has so happily established: And whereas it is necessary to encourage emigration to this country, upon the most liberal plan, and that for the future number of Citizens of this state, have proposed to liberate a cargo of Servants, just arrived, by paving their passage, and repaying
The Massachusetts Bank is chartered.—McMaster, Hist. of Feb.
People of the U. S., II: 30 (note).

The assembly passes "An Act to establish the Rates of Wharfage and Cranage in the City of New-York" (Assess. Jour., 32); also "An Act to lay a Duty of Tonnage on Vessels, for defraying the Expense of the Light-House at Sandy-Hook."—Ibid., 33.

The common council meets "at the House of John Simmons Inhabiter,"—M. G. C. (1784-1821), I: 1. It continued to hold meetings at Simmons's house until March 25, when it met at the "State House" (city hall). On April 1, and thereafter, the place of meeting was referred to as the city hall.—Ibid., II: 18, 21.

Robert Benson submits to the board a commission, under the great seal of the state, appointing him clerk of the city and county of New York.—M. G. C. (1784-1821), I: 1. On Feb. 17, it was ordered by the common council that the late clerk, Augustus Van Cortlandt, deliver to him all the books, records, papers, seals, and other things pertaining to the office.—Ibid., II: 3.

The "Exigencies of the City" require that the arrears of rents and quit-rents, which many, are shall be collected as soon as possible. It is ordered by the common council that the treasurer make such collections without delay.—M. G. C. (1784-1821), I: 1. Many petitions came to the board asking for abatement of rents and quit-rents, for various reasons; a committee was appointed on Feb. 24 to consider these cases.—Ibid., II: 5-6. For report of this committee, see Mr 2.

Richard Smith is paid for labour and materials for the repairs to the city hall. The mayor's warrant for this payment is numbered "No. 6."—M. G. C. (1784-1821), I: 1.

Washington's birthday is for the first time celebrated, the 11th rather than the 22d of Feb. being the day so honoured at this time. —Hist. Mag. (1866), V: 134, citing N. Y. Gazetteer, II, and Ind. Gaz., F, 12, 1784; Penn. Packet, F, 17, 1784. For explanation of change of date, see F 11, 1752, the date of his birth.

Proposals are published for establishing a bank in New York City. The banks of Venice, Amsterdam, London, and Philadelphia are cited as examples. The last mentioned, "though in its infancy, has not only given great profits to its proprietors, but has supported and created a system of credit extremely advantageous and necessary to their trade and revenues." The name proposed for the bank is "the Bank of the State of New York," and the amount of capital, 750 shares at $1,000 a share. It is further proposed "That each subscriber shall pay one third part of his subscription in cash, on the day the directors may require it;" and "That for the other two thirds, landed security shall be given by mortgage, or conveyed in trust." The purpose is "that landed security be always pledged for the credit and support of the bank." Various other provisions for the government and operation of the bank are included in the proposals. Subscription books are opened for business, April 6, Wall St. by Stephen Sayre and John Stephens.—N. Y. Packet, F, 12, 1784. For further development of the plan, see F 23, 136; Mr 15; My 11; Je 7 and 9.

The mansio-house of the late John Beckman in Maiden Lane is advertised to be sold at auction between the 5th and 10th of April.—N. Y. Packet, F, 12, 1784.

The Massachusetts Bank is chartered.—McMaster, Hist. of Feb.
People of the U. S., II: 30 (note).
The assembly concurs in the senate's resolution that the governor be requested "to give Orders for applying the Pickets which surround the Fort and Battery, or such Part thereof, as in his Opinion, is not exposed to the Use of the Poor of this City."—Assem. Jour., 7th sess., 17. See also descrip. of Pl. 44, p. 348.

The common council appoints Isaac Stoutenburgh, Jr., a city surveyor.—M. C. C. (1784-1831), I: 2.

The Independent Gazette or the New York Journal Revived again becomes a weekly paper, (see p. 5). The last issue of the paper with this title was that of March 11, 1784,—Brigham, A. A. S. Proc. (1917), 440. See Mr. 18.

A large number of citizens and others apply by petition to the legislature (on Feb. 21 and 28), requesting that one of the Episcopal churches in New York may be allotted to them for worship and a minister support, for their benefit from church funds. These are persons who were in the pay of the British during the Revolution, refugees from other states who came to New York during the war and are liable to penalties if they return home, persons who held commissions under Gov. Clinton in the Revolution or were active in privateering against the U. S. foreigners and strangers not citizens of this state, members of other religious congregations, missionaries whose homes were inimical to the liberties and independence of the U. S. during the war, and "reputed Whigs." The original drafts, memoranda and copies of signatures of this petition are preserved by the N. Y. H. S.

The "Empress of China" sails from New York for Asiatic waters, the first American vessel to venture into those seas. She carried the flag which was adopted in 1777.—Ind. Gaz., Feb. 26, 1794; Progress of N. Y. in the 19th Century, by Stevens (1876), 45. She returned May 11, 1785 (p. 9. v.).

Gentlemen of New York are requested by a public notice to meet on Feb. 24 at the Merchant's Coffee House, to consider a plan for establishing a bank on liberal principles, the stock to consist of six per cent.—N. Y. Packet, F 23, 1784. G. F. 12, and see F 26.

Richard Varick, having produced a commission "under the Great Seal of the State" appointing him recorder of the city and county of New York, takes his seat in the common council.—M. C. C. (1784-1831), I: 4.

The "carmen" of the city, in a petition to the common council, state that they are informed that the board is "about to issue an ordinance" to prohibit the carmen from using "Cars with Iron-shod Wheels and directing that wooden wheels be used in their Place," for the reason that the former are more injurious to the Pavement than the latter." They explain why they believe the wooden wheels will injure the pavements more than iron-shod ones, and add that "none but Iron shod wheels are made use of in the Sea Port Towns of Europe and America." They ask that such wheels be continued in use here.—From the original petition (in metal file No. 7, city clerk's record-room), endorsed "Read Feb. 24 1794 & referred to the Committee appointed to revise the late Ordinances." See also M. C. C. (1784-1831), I: 4; but see Mr 28, 1787.

The common council orders that one of the rooms in the jail be prepared for the reception and employment of "laid and disorderly women."—M. C. C. (1784-1831), I: 5.

The principal merchants and citizens meet at the Coffee-House, and, with particular zeal, N. D'Dougall in the chair, agree to proposals for establishing a bank. A committee is appointed to receive subscriptions.—N. Y. Packet, Mr 11, 1784. This became the Bank of New York.—See My 1.

A humorous item in a newspaper of the day states that a gentleman, astonished to find that, "by a combination of parties, the expense of travelling in the Stages from Elizabeth Town, Newark, &c. to Philadelphia, is raised," intends to set up "an Eireal Convenance, from New York to that city, on the new invented system of Means. Montgolfer. . . ." This, it is added, may, with perfect propriety, be termed a "Flying Machine" (which is the name of the stage); yet, desirous of preserving as much antiquity as possible, will be called, "Packet's Horse Revived." This, he says, "will set out from the City Hall, on the second of April next;—"N. Y. Packet, F 26, 1784.

The following resolution, passed by the senate on Feb. 25, is adopted by the house: "Whereas on the late Invasion of the City of New-York by the troops of his Britannic Majesty, the Bells of the State House, Churches, and other public Buildings of the City of New-York, were taken down and removed to New-Jersey; and afterwards, the United States in Congress assembled, ordered the Said Bells to be removed to the public Works belonging to them at Carlisle, in Pennsylvania, to be cast into Field Pieces for the Use of their Armies. . . ." Hence it is represented to this Legislature, that no Use hath been made of the Said Bells. The Delegates of this State are further instructed to move the United States in Congress assembled, to give the necessary Orders, for causing the said Bells to be returned to this City, for the Use of the public Edifices to which they belong,—Assem. Jour., 7th sess., 1784.

The common council appoints a committee "to report an Estimate of the Losses this Corporation have sustained in consequence of the late War," and to prepare a petition to the legislature "praying that a part of the foretold Property within this City may be granted and applied to the use of this Corporation to enable them to defray the heavy Expenses incident to the City."—M. C. C. (1784-1831), I: 8.

The committee on arrears of rents reports on several petitions. The principal question involved in some of these cases is the amount of rent due the city for the war period. For example, John Lockhart shows that during the War he was compelled to pay the arrears of a Rent of a Corporation House at Pecks Slip to certain officers appointed by the British government in this house, after the property had been seized and carried off." The committee states "that arrears of Rent are due to the Corporation from many meritorious Persons who have taken an active & decided Part in the Causes of their Country & suffered all the Inconveniences of Exile and the loss of all their Property; that many other Persons well affected to the Cause of their Country (Lessees to this Corporation), who during the City in the year 1776 have from Poverty and other unavoidable misfortunes been obliged to return within the British Lines before the Peace took place and have been prevented from occupying their Habitations and deriving any advantage from their leased Estates because of their attachment to the American Cause, but upon Condition of their paying Rent to the Vestry or Mr. Smyth their Treasurer." In none of these cases, the board decides, would it be equitable to exact rents from the lessees.—M. C. C. (1784-1831), I: 8-11. No abatement was allowed, however, "to any Person or Persons whomsoever" who were grantees of the city, for rents which became due "previous to the first Day of May 1776 or subsequent to the 25th Day of November last."—Ibid., I: 14.

The engineer of the fire department recommends, among other things, that a certain number of men be allowed for each ladder and hook and ladder company, according to its size and situation. "Finding it Difficult to have the City Alarmed for the want of the Large Bells," he recommends "that Seven Speaking Trumpets be Provided & lodge at M^t Skates & that So many of the Watchmen be Sent off[1] through the Streets of the Different Wards, to Sound the Alarm whenever Necessity Shall Require it." "That Orders be sent to the Different Sext Johns of the Churches where Bells Now are, to be Rung immediately whenever Such alarms Shall be heard. "That the Teawater Men be put under Proper Orders & Regulations to Attend with their Carts & Bring Water as Long as Shall be Necessary."—From the original report, in a metal file labelled "Filed Papers 1790-1800," city clerk's record-room, No. 2: "A Law for the due Observation of the Lord's Day, called Sunday;" "A Law to prevent Strangers from being a Charge to this Corporation;" "A Law to appoint Surveyors for this City;" "A Law for the better preventing of Fire;" "A Law for Marking of Bread;" "A Law for Regulating Negro and Mulatto Slaves;" "A Law to regulate the Office of Gaugers of Liquors, and Packers of Beef and Pork;" "A Law for regulating the Laying of Vessels in the Docks and Slips of this City, and ascertaining the Rates to be paid for the same;" and "A Law to prevent Hawkers and Peddlars." The full text of these laws was printed in the N. Y. Packet from March 8 to 18 inclusive.

Anthony Van Dam, the first secretary of the Chamber of Commerce, writes from Bermuda to Henry Remson regarding "several nervously alterations that must be [when] the new building is public in rebuilding that part of the City destroyed by Fire in 1776." See Vol. I, p. 371. His letter, of over six large, closely-
THE ICONOGRAPHY OF MANHATTAN ISLAND

1764 written pages, gives particulars of conversations Van Dam has already had with friends on the subject. The following portions of this important topographical document, hitherto unpublished, are given in full from the original. Van Dam states:

"The object in view for the West Ward was to have a freer and more desirous access they to the City from Greenwich Road, so far as the Church Corporation could go to accomplish this design was to widen the Streets from the North River to Broadway. There are a few of the Church Leases unexpired that may in some measure defeat the purpose of the tenants. It is very refreshing to think that our Corporation or Legislature views these improvements as candidly as you and I, and there will be no difficulty in gratifying the desire for the supposed loss.

"To make you better acquainted with what is wished to be pursued, I have copied part of the Map of the City (upon a large scale) that I took an opportunity of showing you at my house in some of your visits before my departure. Where it is observable that Partition—Vesey—Barclay—Murray—Warren—and Chambers Streets were originally only 40 feet wide—All leases granted since 1736 in these directions have the streets 65 feet wide, where it is already and hereafter must be taken off, is shaded in the map with Green. In conversing with some of the Governors of the Colledge they appeared to consent to the alteration in a block where it interferes with their Land, contending that if an equal quantity was taken off each side of the street it would have been more just. I showed them that there was the like loss of ground to the Church in the two Streets leading from the broad way upon which they are bounded. Upon Murray's street they have granted leases near the River con- fining the street to its original breadth of 40 feet. But on Barclay street to the other, they admit of it to be 65 feet wide.

"If means are not pursued to continue Murrays Street the breadth proposed the object must be defeated that will otherwise give an air of grandeur to the Place.

"Neither Barlays—Robinsons—Murrays—or Chambers Streets are yet paved. When the Corporation thinks proper to order it to be performed, it will be the intention and of peculiar use to foot passengers that there are or 12 feet be allotted on each side for that purpose when 40 or 45 feet will remain for Carriages. The cart way in each street to be raised in the middle in the form of a very flat arch.

The use of this is to prevent Carts and Carriages from locking one another as they meet or pass. When Cans or gutters are in the middle to convey the water accidents often happen of the above described nature from neglect or carelessness of the drivers.

"Again the attention of the Corporation will lead to direct that the descent shall begin immediately on the broad way, that the draft of Carts or Carriages may be equal in all parts of these Streets leading from Greenwich Street, thereby avoiding that great evil so very discernable in those to the southward of them.

"It is observable that Crown Street—Cortlandt Street and Dye Street are very narrow, and their length of about 300 paces from the Broad way to the River. An addition can be made of 15 feet at an Easy purchase of a Strip of land that belongs to the widow Shaw, lying in the rear of the Lots between Cortlandt and Dye Streets formerly a row path. All the injury that can produce is to effect the two Corner Houses, built or to be built on the south side of that street. But in order to extinguish fires that may hereafter happen when Houses are erected on these Streets I have endeavored to prevent (and with some success) Houses being built in the direction of Church Street which you will observe in the map is shaded yellow. A Mr. Ward had purchased two Lots of the widow McAdam who discovered the reasonableness and great utility that would be derived to the publick readily assented to erect his building to an intended purpose, in an hope that he would be compensated for his loss of Land by the generous Public—I Labor my friend to have Church Street continued through the three blocks to Crown Street...it is an object well worth the public attention. The purchase of the Ground to be laid into an intended street will not come very high, and if there are not Funds, a small interest may be disposed.

"From Samuel Ellis's new buildings to the northward of the Market to Peter Meiers former front the street was originally only 40 feet wide. Trinity Church Vestryed to widen Greenwich Street at Ellis's Corner to 66 feet which is continued through their Lands. It is to be wished that the City Corporation would continue the Street to the southward, the same breadth, even to the flat rock Battery. To do which it will appear at first sight to effect in a high degree the landed estate of Peter Meiers's Family—John Thurman—Peter Rutgers—Samuel Ellis's and Nicholas Roome by continuing through their Property—but on a little reflection it is obvious to discernment that by closing the passage that formerly was occupied as a street nearer the River and placing the street in lieu thereof to commence at Abraham Meiers corner and extending it to the corner of the Range of the street back of Trinity Church, it will take but little more ground than was formerly allotted to go round to the Docks as it was called, and even if there be any lack of soil for what the proprietors surrender for the street, the City Corporation will doubtless extend their grants into the River to their utmost bounds to make a compensation.

"In laying out the water lots to be made Land, belonging to the Church and Colledge corporations to the southward of Chambers Street. It will appear upon the Records of the City Corporation that the water lots granted to those Corporations were similar to those that appear in a block of the Map to the westward of Skinner's distillery in which an useless street is described—And it was as absurd to lay down each lot with a Blevil. To remedy that inconvenience and disagreeable appearance, it was thought proper by the committees of the Colledge & Church corporations to make them more uniform and that they have adopted a more eligible plan as described in a block by red lines in the front of Cap Robert Dales buildings where the building lots on the west side of Greenwich Street and fronting Hudson's River only are out of Square. All the water lots to the southward of Roosevelt's Estate are unimproved to the extent of their Grants and therefore with facility may be regulated by the plan; where the desired alterations are designed the lots are marked with red lines.

"It is very remarkable that from Thames Street (at the bottom of which there is a spacious slip 100 feet wide & near 300 feet into the River) until the Battery—there is not a Cartway into the City—distant one from the other 1600 feet. If only one street should be thought proper to be opened for the accommodation of the Public, a lane, opposite to Verlatgesil will be the properst, because it is in the center and at equal distance from the other.

"The purchase of Mr. Lambert Moore's and that in the rear of his will be the most eligible to lay upon a Cartway. If it is alleged that the high Bank will prevent it. The answer is that the proprietors of the water lots will necessarily require all the Bank to fill up the water to be made land. Their Grants it is supposed restrains the proprietors to improve the lots as is usual in a certain time and that period it is supposed nearly expired. Besides which it may be also proper that the land opposite Mr. David Johnson's House and another Robinson's Street to the southward of Trinity Church should be widened.

"Prevent as much as in you lays the water lots to the westward of the Market on the North River from being rented on building loans [?]; they ought to be reserved for the Market Bosta, whether the market is continued where it is or that the broad way remains established.

"A reform is much required in Stone Street; it was anciently about 20 feet wide and latterly few or no reputable Inhabitant chose to reside in it—On the North side the lots in general extended to petticoat lane; if it is again rebuilt upon the same foundations of a narrow street no man that hath a desire to live in some degree desirable will erect a good habitation there. But it will rather be filled with Huts or buildings of little consequence. To remedy which, if each proprietor surrenders 25 feet of his front there then will be a loss of the two corner lots only, to compensate the proprietors of the said two lots. Those on the south side may be assessed to pay the value thereof. And it cannot be considered that those on the North side suffers any diminution by the surrender when it is so evident that their estates will be rather improved. For reputable Inhabitants of that Street when made 45 feet wide will covet to reside therein when it is open—airy—and admits the kind influence of the Sun. Were it possible to regulate the two southern streets that are parallel to this now described it would prove useful to the occupants. Petticoat lane is only mentioned; it must take its fate.

"While I am removed at so great a distance from your Metropolis, I cannot reflect with unconcern on the singular advantages that may be derived to the order and splendor of its buildings—every disagreeable object that can possibly be removed which may hurt the eye of the Citizen, or particularly of so many strangers that will naturally resort to your City is wished to be corrected. I have
pointed out such only as he effected with little ex pense from the
Situation of the Premises—Should wisdom predominate and they
are adopted shall think myself well recompensed for the little pains
I have taken to promote the design that must ultimately fall to the
share of you and your dependants.

"Be pleased to recollect that I pointed out to you a most lovely
situation capable of the highest Improvement to enlage the City.
I mean upon Mr. Rutger's and Mr. DeLancy's Land. It is the
most beautiful Site that can possibly be discribed upon the Island.
I hastily drew some rude lines upon one of Ratoz's maps left with
Mr. Pinzard. The proprietors of lots on Rutgers Ground may sur-
render them upon the plan that was laid down by Marschalls, which
is too much confined as to the breadth and direction of the streets.
You will discover that I have laid down a street from Peter Earls
to Byvens; some part takes in the River where it interferes the
City Corporation will demand a small rent, which the proprietors
in front may well pay. Or if they surrender some of their lots to be
laid into the streets where will be the impropriety of granting the
water lots to be made land in lieu thereof [?] I see none and where
the public are hemmited why not meet each other half way [?]"

From the original letter, in metal file No. 11, city clerk's record-
room.

Anthony Van Dam, the author of this survey and opinion, served as one of the port wardens of New York for ten years or
more.—[Col. Hist. MSS., Eng., 745, 785, 819, 825.]

He was one of the merchants transacting business in Dock
St. in 1775-6, his trade being principally confined to wines and
liquors.—"N. Y. City during the Am. Rev.," (1861). 35. The charter
of the Chamber of Commerce, dated March 13, 1770, shows him
then to be secretary of that body.—See Laws of N. Y. (1784),
Chap. 30. He was also a member of the general committee of one hun-
dred thousand dollars set up 1775—N. Y. Col. Docs., VIII: 106.

In 1786, his place of business was at No. 13 Nassau St.—City
Directory. He died in London in 1807.—Sabine, Loyalists of the
Am. Rev., II: 177.

Henry Rensselaer, to whom the letter was written, appears to
have been the Rensselaer of the fifth generation, known as "Henry
the Whig" before the Revolution, and "Henry the Patriot" after-
wards.—[Col. Hist. MSS., Eng., 745, 785, 819, 825.]

Hamm, Famous Families of N. Y., II: 77.

For report of the commissioners on laying out streets in the
burnt part of the city, see Mr 29, 1785. See also Je 9, 1784.

The following notice is published: "For Sale, that agreeably
situated Island, known by the name of Blackwell's Island, On the
East River, about four miles from this City. It is without exception
one of the most healthy situations in this state. It is remarkable
for the number of fish and fowl that is caught there in the different
seasons. There is on the premises, two small Dwelling Houses, a
Barn, Bake and Fowl House, Cyder Mill; a large Orchard, contain-
ing 450 of the best grafted fruit trees, such as Newton & golden
pippins, spitsburghs, peimsons, bow apples, pears, peaches,
plums, cherries, &c. There is a large stone oven, which is ready cleared to begin breaking immediately; and the subscriber
has a complete set of quarry tools, with all his farming utensils and
stock to dispose of at the same time. The Island abounds with
running springs of most excellent water. The above contains 107
acres, eight of which are salt meadow, and the whole has been
considerably improved with manure, and in good fence. Any per-
son inclining to purchase the whole or half of the said Island, may
be further informed by enquiring at Mr. Joseph Hallet's, No. 204,
Water Street, New York, or on the premises of James Blackwell.

—N. T. Packet, Mr 8, 1784.

"But apparently nothing came of this offer to sell the Island,
and the reason for offering it may be judged from a subsequent
notice in the newspapers of 1785 which states that James Black-
well is an insolvent debtor and all his estate was assigned to James
Hallett and Joseph Stringham as assignees, who requested all credit-
ors to produce their accounts before September 1, 1785, on which
date a settlement would be made and that on April 20, 1785, the
Southwest part of Blackwell's Island with two small houses, 'barn,
booth and cyder mill,' are sold to an agent of the stock and farming
utensils, household and kitchen furniture would be sold at public
vendue. On the same day Jacob Blackwell offered the north-east part of
the Island for sale, both parts comprising the whole Island."—N. Y.
H. S. Bull., July, 1921, citing N. T. Packet, Mr 10, 1785.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1784 £250." He further states "That in the late War while this City was in the Possession of the Enemy, the whole of the said Warf was taken away to ballast their Shipping and otherwise destroyed so entirely that nothing now remains but the vacant Beach on which it had been erected;" and that, "altof frequent Application was made for the Purpose to the British," he was "never able to procure from them any Consideration or Remission for his said Warf." He therefore asks that the quit-rents, due to the city on his grant of the water lot, be remitted.—From the original petition (in metal file No. 7, city clerk's record-room), endorsed "Read 16th March 1784 & referred to Ald. Broome Randall & Ivera."

An ordinance is passed "for the speedy and effectual cleansing of the City,"—M. C. C. (1784-1813), I. 16. The full text was published in the N. Y. Packet, Mar. 16. 1784. He was appointed one of the city surveyors, in place of Mr. Baucker.—M. C. C. (1784-1813), I. 15. This was the father of John McComb who, in 1802 (see Mr. 24, 1800), became one of the architects of the city hall. The elder McComb died in New Jersey in 1811 in his 77th year; so, doubtless, his experience contributed to the practical knowledge which his son displayed as master builder. See articles by Prof. John C. Van Dyke and Edward S. Wake in Rutgers College Publs., No. 14, which is entitled The One Hundredth Anniversary of the erection of Queen's Building, Rutgers College, June 23d, 1909 (pub. by the college, 1910). See also descrip. of Pl. 75, I: 460-67.

William Smith, late chief justice of New York, but at this time residing in England, presents a memorial to the commissioners "Applying for Assistance in settling his Debts & Services of the American Loyalists." It reads, in part:

"Being a Son of one of the Kings Judges and a Native of the Province of New York and many years in the profession of the Law, and ever since the year 1767 a member of His Majestys Council and having been constituted Chief Justice of the Supreme Court and one of the Council to the several Commissions issued since 1758 for laying and amending to that Country—I presume that it cannot be necessary to trouble your Board at this day with any Declaration of my Principles on [or] the History of my Conduct in the late Contest which has so unhappily terminated in the rent if not in the ruin of the British Empire—"

"If nevertheless witnesses should be desired upon the Question of my Fidelity to the Crown or my attachment to the general Interests of the Empire give me leave Gentlemen to refer you to Lord Dunmore Lieutenant General Tryon and Lieut. General Robertson who were Governors of the province and to Lord Carlisle, Mr. Edén and Govt. Johnston the Commissioners of 1778 and to Sir Henry Clinton and Sir Guy Carleton the Commanders in Chief.—To these I can add other respectable Characters of this Country some of whom are to your knowledge and others are able to show you by what Principles I have been actuated and to what Councils I recommended for preventing the War, and when it had commenced to Guard against the fatal separation it has effected. . . ."

"The annexed Estimate will shew, as much as, in the singularity of my Case, ought to be the subject of your Consideration. I must not tender to you as others do a Computation of the value of my whole Estate real and personal. The Usurpation did not proceed against me to Attainder nor against my property to Confiscation and in the prospect that my Countrymen will neither be so unjust nor entirely regardless of the Definite Treaty—I flatter myself that tho' at present excluded from my Funds and cast upon the Bounty of Great Britain for support this distress will continue only until the present ferment have had time to be composed.

"I am affected by two of their Laws—the one passed in June 1776 and the other in July 1782."

"Under the first I was expelled from the Interior Country into the British Lines for refusing an Oath to abjure the Kings Sovereignty and its sanctions are the double taxation of my Estate and upon being found in the Colony the perpetual Imprisonment of my person and confiscation of the parts of my real Estate for Life and the whole personally for ever—"

"The other Act prohibits me, as well as the other Loyalists that were within the British Lines from recovering any of our Debts.—"

"If these Laws are never to be repealed, my Condition is indeed to be deplored, but in the hope already suggested I cannot bring the whole of my real and personal Estate into Account for Compensa-

The legislature passes "An Act to remove Doubts which may have arisen respecting the Charter Rights of the Minister, Elders and Deacons of The Reformed Protestant Dutch Church of the City of New-York, in consequence of the late Invasion of this State." It recites the fact that the charter granted by King William III May 1, 1664, is confirmed by the Governor during the Revolutionary War. This act therefore declares that the charter and all the "estates, rights, powers, authorities, liberties, privileges, franchises, preeminences and immunities thereby granted and confirmed," which were held and enjoyed by the church on April 19, 1775, by virtue of the charter or by virtue of any act of the legislature of this state while this was a colony, shall continue in full force and efficacy, "notwithstanding anything to the contrary hereof, or of any part thereof," between April 18, 1775, and the date of this act (March 17, 1784). The ministers, elders and deacons who, because of their adherence to their country's cause, were compelled by the British army to leave the city, or those who have returned since the evacuation, shall be deemed to hold these offices, respectively, until others shall be appointed or elected in their stead, according to the charter. The charter contained a clause giving power to the minister, elders, and deacons to raise money "for repairing, amending and enlarging the church and steeple, belfrey, cemetery or church-yard," etc. As this power never was exercised, and the present minister, elders, and deacons are willing to surrender it, the act provides that it shall not hereafter be exercised, but shall be abrogated and repealed.—Laws of N. Y., 1802, ch. 105.

Elizabeh Holt changes the name of her paper (see F. 25) to The New-York Journal, and State Gazette.—Early Newspapers, II: 424; Brigham, A. A. S. Proc. (1917), 448. See F. 17, 1785.

The common council passes an ordinance "for paving the Streets and for preventing Nuisances within this City."—M. C. C. (1784-1813), I: 17. The full text was pub. in the N. Y. Packet, Apr. 3, 1785.

The surviving governors of King's College present a petition to the legislature, which states: "That the greater Part of the Governors of the said College have since the commencement of the late War died out or departed this State whereby a sufficient number of Governors cannot be convened for the carrying on of the Business of the said College agreeably to its Charter. . . ."

"That many Parts of the said Charter are inconsistent with that Liberty and that Civil and Religious Freedom which our present happy Constitution points out—and that an Alteration of that Charter in such points as well as an Extension of the Privileges of the said College so as to render it the Mother of an University to be established within this State would much tend to diffuse Knowledge and extend the usefulness of the said College within this State."

The petitioners add that they submit the charter to the legislature for revision, "so as to render it more adequate to these important Ends," and asking for confirmation to the college of "such Estate as was unquestionably appropriated to its use." The signers of this petition are Leonard Lispenard, Jno. Livingston, Win. Walton, Sam. Bayard Jr., Geo. Clinton, Rich. Morris, Jas. Duanos, Gerard Bancker, Egbert Benson, J. H. Livingston, Sam. Provoost, John Rodgers, and John Morin Scott.

James Duane, a state senator, promptly introduced a bill, entitled "An Act for establishing a University within this State."—Penn, King's College and the Early Days of Columbia College (1917). See, further, My 1.

The city cartmen are admitted as freemen.—M. C. C. (1784-1813), I: 19. This was perhaps due to the need of employing them in large numbers in cleaning and repairing the city. On March 30, forty-three others were admitted; on April 6, thirty-five; on April 15, thirty-five; on April 22, nine; on May 11, fifty-four, etc.—Ibid., I: 20, 21, 23-24, 17, 31, 33, 43, etc.

The legislature passes an act appropriating "Governor's of New York Island" for the use of the governor until the legislature shall otherwise order. The governor is to have charge of Fort Orange, and other fortifications, and public works and buildings within the city erected for military purposes on lands belonging to the state, and shall give orders to secure and preserve them. The commissioners of fortitude are to assign to the governor any one of the forlorned houses which he may select for his residence, except those assigned to the use of the secretary. The house of William
Axcell, on the west side of Broadway in the West Ward, now vested in the state by his attender, is appropriated for the use of the secretary for the period of two years from April 30th. It shall be his residence, and the place of deposit for the archives and records of the state.—Laws of N. Y., 7th sess., chap. 12. The Axcell house was the second one above Vesey St. See Pls. 63–b, Vol. I; 59, 105, 198, Vol. III.

30 The ministers, elders, and deacons of the “United Presbyterian Congregation” (the Brick Church), represented by John Rodgers, petition the common council for a remission of rents, now in arrears, due to the city under the grant from the city of February, 1766, whereby the congregation acquired the lot of ground in the North Ward on which to erect a new church, subject to an annual rent of £60. The church was built and the payments to the city kept up with difficulty “untill some short time before the War.” The petition recites the abandonment of their property during the war, and its use by the enemy; the loss of their parsonage house in the fire of 1776, and the present poverty of members of the congregation, formerly in affluent circumstances. The congregation now has “no real property from which they can raise an Annual Revenue, nor have they one Shilling at Interest, so that the repair of their Churches, and the Support of the Gospel among them, must wholly depend on private Subscriptions and Voluntary Contributions.” They are “the more Encouraged in this application, as they are informed that the Corporation of Trinity Church, now hold, and for which they are held a test of their Earning Ground, under the Grant of this Corporation, without being subject to the payment of any Rent; and that the Corporation of the low Dutch reformed Church hold a Piece of Ground in Montgomery Ward by a Grant of a later date than that made to your Petitioners at least three times as large as that held by them, subject to the Annual Rent of Seventy pounds.”—From the original MSS. in metal file No. 7, city clerk’s record-room, and M. C. C. (1784–1818), I: 20–21.

Apr. The common council pays for appraising pickets for fuel for the poor.—M. C. C. (1784–1813), I: 22.

The executors and administrators of Alexander Golden, late surveyor-general of the colony of New York, are empowered by an act of the legislature to deliver to the surveyor-general of the state all the papers, books, maps and records appertaining to the office.—Laws of N. Y. (Gaine ed., 1784), chap. 14.

6 The legislature passes a law allowing all religious denominations to be incorporated, thus placing all churches upon an equal footing.—Laws of N. Y. (1784), chap. 18. This act afforded relief from the lugubrious state of affairs, which had so long been sustained, for want of charters, under the oppressions of the provincial government. In May, the Presbyterian congregation met, and, agreeable to the provisions of the act, became a body corporate under the style of “The First Presbyterian Church in the City of New York.”—Miller, Memoir of the Rev. John Rodgers (1813), 248.

A law is passed by the legislature authorizing Isaac Stubbenberg to sell forfeited estates in New York City or King’s County to the amount of $20,000, in order to raise money for the “public Exigencies.”—Laws of N. Y., 7th sess., chap. 20 (printed by Eliz. Holt, 1784). See also the Confiscation Act of Oct. 23, 1779. For the sale of the lots of De Lancey’s Bowery estate, 1774–7, see Jones, Hist. of N. Y. during the Am. Rev., II: 540–59.

4 The British Government signs the Definitive Treaty (see S. 3; 1725; J 14, 1784).—Winзор, VII: 163.

The villa occupied by Stephen N. Bayard, just above the two-mile stone and fronting the Bowery Lane, is advertised for rent.—N. Y. Packet, Apr 12, 1784. For an account of this estate, see L. M. R., III: 948; Man. Com. Coun. (1864), 611.

The New York legislature passes “An Act to remove Doubts concerning the Corporation of the Chamber of Commerce, and confirm the Rights and Privileges thereof.” This changes the name of the institution to “Chamber of Commerce of the State of New York,” and confirms to it all the powers and privileges enjoyed under its royal charter. The law also provides that the chamber shall meet “in the great-room of the building, commonly called the Exchange, situates at the lower end of the street called Broad-street.”—Laws of N. Y. (1784), chap. 14. It is ordered by the common council that the lower part of the exchange be used as a public market-place; and that necessary repairs be made to the bridge at the exchange.—M. C. C. (1784–1813), I: 24. See My 14, JI 28.

The common council grants a petition of Adolph Waldron for a continuance of his lease of the ferry from N. Y. to Brooklyn, which he hired on May 1, 1776, but which he was compelled to abandon during the war while serving as captain of a troop of light horse which he raised. He expresses willingness to bear the loss of the ferry by accepting part of the proceeds of it in the form of two shares in the ferry-house, etc. These included 9 negroes (valued at $62:10:0, 15 horses, 5 “Riding Chairs with Harness,” 1 sleigh, 1 stage wagon, 9 boats with sails and oars (valued at $280), 2 mohc cows, wine, porter, gin, 5 spinning wheels, various kitchen utensils (including “1 Large Oyster Roaster”), various tools, etc. He expresses willingness to bear the cost of repairs on the old ferry-boats, amounting in all to $631:4.—From original MSS. in metal file No. 7, city clerk’s record-room, and M. C. C. (1784–1818), I: 26.

The common council orders the issuance of a warrant on the city to pay John Simmons $611:14 for “his Act for Expenditures attending the Corporation meeting at his House during the last Winter.”—M. C. C. (1784–1811), I: 27. At this time, taverns were still used by the city, as in the early English colonial period, for public business, for committee and other meetings of the common council, and for special entertainments, as instanced by the taverns of Walter Heyer, and of John Simmons.—Ibid., I: 276, 385.

The legislature passes “An Act for making such Alterations in the Charter of the Corporation of Trinity Church as to render it more conformable to the Constitution of the State.”—Laws of N. Y. (1784), chap. 33. The corporate name was not changed until March 19, 1788 (q.u.).

The act of 1693 “for settling a Ministry,” and several other similar acts of later years, including the act of 1700 “against Jesuits and Popish Priests” are repealed.—Laws of N. Y., chap. 38.

Father Farmer, a Jesuit who ministered to a Roman Catholic congregation in Wall St. secretly, before the Revolution (see 1776), now came boldly to New York to look after the remnant of his flock, and found eighteen communicants. Mass was celebrated in hired halls and in the embassies of the French and Spanish legations in 1784 and 1785. Regarding the further activities of Catholics, see Eccles. Rec., III: 1490–51.

The first meeting of the Chamber of Commerce under its revived charter (see Ap 15) is held. John Alsop is elected president, Isaac Sears, vice-president, John Bromes, treasurer, and John Blake, secretary. The charter is a long one and an elaborate statement of the rights and Privileges of the Chamber were, in consequence of the War, suspended from the Third of May One Thousand Seven hundred and Seventy-five to the Sixth of July One thousand Seven hundred and Seventy-nine [error for Je 21, 1779, q.u.]. When a number of the Members Assumed the Exercises of the Powers contained in their Charter, under the Patronage of the British Commanders—and the Influence of the British Government in having been Manifestly directed to Aid the British in Subjugating these States—A number of the Members and other Citizens, on their return to this City, taking into Consideration the State of the Chamber and being advised by Council that the Charter of the said Chamber had been forfeited and lost by reason of the Misuser and Nonuser of the same, They thought it most advisable to petition the Legislature for a Confirmation of the said Charter.”—Bishop, A Chron. of 150 Years. The Chamber of Commerce of the State of N. Y., 1768–1818, 19–40.

The butchers and neighbours of the Fly Market being “desires of covering the Slip at the lower end of said Market & extending the said Market over the said Slip to the Bridge across the same to make Room for the Country People who bring Produce thereto,” a committee of the common council is appointed Apr. 22, chap. 154, chapter 33, “Chambers and direct the addition to be made on the said market.”—M. C. C. (1784–1813), I: 29. The committee reported on May 12 (q.u.).
1784. The common council appoints a committee "for altering and Apr. laying out & keeping in Repair the public buildings in the Harlem Div. of the Out Ward."—M. C. C. (1784-1831), I: 29.

22 The vestry minutes of Trinity Church, beginning with this month, are printed with the words: "At a Meeting of the Corporation of Trinity Church of the City of New York (conformable to the amended charter, doubtless), instead of "At a Meeting of the Rector, Church Wardens and Vestrymen, etc."—Trin. Min. (M.S.).

26 "Resolved That the Committee on Leases be empowered to hire a Dwelling house for the Rector [Rev. Samuel Provost] for the ensuing year at such Rent as they can agree for."—Trin. Min. (M.S.).

30 The Rev. John H. Livingston, D.D., Henry Remsen, and others, in a petition to the common council, state that they "have procured a person, of whose capacity they are sufficiently satisfied, to open a grammar school for the instruction of youths in the English, Latin, and Greek languages;" that "at present, there is not any convenient building, or room to be procured in this city for the purpose of such a School." They ask the common council for the use of "the late library-room in the State-house," for a school-room, "until a university be established, or so long as the same may be spared from other public uses."—From original petition (in metal file No. 7, city clerk's record-room), endorsed "read April 36th, 1784 granted during the pleasure of the Corporation;" M. C. C. (1784-1831), I: 50. See Mr 16, 1785.

Thomas Arden and others residing near the slaughter-house, in a petition to the common council, complain of it as a great nuisance, and ask that it be removed. Richard Dean, in another petition, offers proposals "for erecting a Slaughter House on his Estate near the Wallabout, in New York River," with every convenience for keeping it perpetually sweet and clean, for the lower parts of the Building will be cleansed twice a day by the Tides, and the upper he will convey Warm Water to from his Distillery by means he will institute for the purpose." He also says he will provide a yard for cattle, and employ a man to keep the building clean. He adds that "the Cattle can be bought, and without passing thro' any part of the Town, by the Greenwich Road, and can be landed at his Dock from New Jersey, which may probably be an Encouragement for more Cattle to be brought from that Quarter, than has hitherto been done, arising from the want of a Conveniency of this Kind." He asks for the exclusive right to keep a slaughter-house for 31 years. See further action on My 12.

A city ordinance is passed to regulate the public markets and to prevent the forestalling of provisions. Every day except Sunday is appointed a public market day, from sunrise to sunset. The public markets are to be held at such places as the common council shall from time to time appoint.—N. Y. Packet, My 3, 1784; M. C. C. (1784-1831), I: 50.

May 1 The legislature passes "An Act for granting certain privileges to the college heretofore called Kings College, for altering the name and charter thereof, and erecting an university within this State." All the rights, powers, etc. heretofore vested in the corporation of Kings College are vested in "the Regents of the University of the State of New York." Regents are named, and another one shall be appointed by the clergy of the various religious denominations of the State. These Regents are to choose a chancellor, vice-chancellor, treasurer, and secretary, from their own number. The powers and property vested in the regents are defined. Their powers in the matter of founding schools and colleges in any part of the state are stated. Religious bodies are permitted to institute professorships, and power is conferred on the regents to grant degrees, "as well in divinity, philosophy, civil and municipal laws, as in every other art, science and faculty whatsoever as are or may be conferred by all or any of the universities in Europe."—Laws of N. Y. (1784), chap. 51; Fine, King's College and the Early Days of Columbia College (1917), 17-20. See further, Ap 13, 1787. For fuller history of the Regents, see N. T. Times, Mr 2, 1913 (Part V, p. 14). See My 14, 1787: "That the college within the city of New York heretofore called Kings College, be forever hereafter called and known by the name of Columbia College." Nothing is said in this about changing the device or the words in the college seal.—Laws of N. Y. (1784), chap. 51; Fine, King's College and the Early Days of Columbia College (1917), 17-20. See further, Ap 13, 1787.

3 Alexander MacDougal, president of the Bank of New York (see F 26), advertises for the subscribers to this bank to pay in the first half of their subscriptions on June first to William Seton, the cashier, at No. 67 St. George's Square.—N. T. jour., My 6, 1784.

Congresses directs that the commissary of military stores or the person in charge of the public stores at Carlisle, Pa., deliver to the order of the corporation of the city of New York, the bells which have been taken from the churches and other public edifices in the said city, if any such bells remain in his possession."—Jour. of Cong. (pub. 1823), IV: 395. See Mr 2.

4 "The Post-Office is removed from No. 38, Smith-street [see N 28, 1783]. to No. 4, Queen-street."—N. T. Packet, My 3, 1784. See Mr 13, 1785.

At a meeting of the Whig Society in the long-room in the Coffee House, it is resolved that an ordinance should be passed for removing from this state "certain Charsacters of influence, who have uniformly manifested an inveterate opposition to the liberties of the people." It was agreed that such removal would not be repugnant to the treaty of peace with Gt. Britain.—N. T. Packet, My 3, 1784.

The legislature passes an act to appoint commissioners to settle and adjust any differences which may arise between the proprietors of certain lots in the city of New York, the buildings whereof were burnt in the year 1776, and for altering the streets which heretofore were laid out adjoining to such lots.—Laws N. Y. (1784), chap. 56; ibid. (1786), chap. 20; M. C. C. (1784-1831), I: 126. See My 14. The legislature passes "An Act to prevent the bringing in and spreading of infectious distempers in this State." It designates "Bedloe's Island as a place of quarantine, or such other place and for such time as the governor, or in his absence the mayor, of New York, may direct.—Laws of N. Y. (1784), chap. 57 (1 Greenleaf, 175-176, 144).

At a meeting of the "Regents of the University of the State of New York" (see My 1), Gov. Clinton is elected chancellor; Lieut-Gov. Van Cortlandt, vice-chancellor; Brockholst Livingston, treasurer; and Robert Harpur, secretary. The treasurer and secretary are instructed to 'demand and receive from the late Treasurer and Clerk of the late corporation of the College called King's College, and from any other person or persons, all records, books, papers, and papers or copies of whatever kind," lately belonging to the said late Corporation. Committees are also appointed to supervise the repair of the college building (see O 14), to report by-laws, to devise a proper seal, to take measures for the recovery of moneys due the college, and to engage instructors "for the term of twelve months."—Hist. of Columbia Univ. 1754-1904, 61. See My 23.

The city is in debt on its bonds to the extent of $18,271. For detailed summary of these obligations, see Man. Com. Coun. (1839), 511.

Congress commissions Franklin, Adams, and Jefferson to make treaties of commerce with European powers. Franklin reached Philadelphia, on his return, on Sept. 14, 1785.—Wmsgr. VII: 233. Regarding Adams and Jefferson, see F 25 and Mr 16, 1785, respectively.

The legislature passes an act providing for the appointment of seven commissioners to dispose, at private sale or public vendue, of all the heretofore unsold confiscated estates.—Laws of N. Y., 72d sess., chap. 64 (printed by Ehz. Holt, 1784).

The legislature also enacts a law "to preserve the freedom and independence of this State." As there are persons "holding principles inimical to the Constitution," and citizens of this state "entertaining sentiments hostile to its independence," who have "taken an active part in the late war in opposition to the present government," it is deemed "improper and dangerous that such persons should be suffered to hold ... any such office or place
De Witt Clinton is admitted to the junior class at Columbia College. He is the first student to enter the institution under its new name.—Hist. of Columbia Univ., 1754-1904, 62. He graduated on April 11, 1786 (q.v.). The college had been closed to students since April 6, 1776 (q.v.), when it was converted into a barracks for troops. During the war it was also used as a hospital (see Je 4, 1784). 17

The vestry of Trinity Church resolves "That the Committee of Repairs do forthwith employ Workmen to pull down the remaining Part of the Tower of Trinity Church, and to enclose Trinity and Saint Pauls Burying Grounds."—Trin. Min. (Ms.). See Je 15. See also descripts. of Pl. 49, Vol. I, and A. Pl. 8, Vol. III.

The vestry further resolves 18 "That such Persons as have Leases yet unexpired, or Lots not now found in the Burying Ground [see S 17, 1781] be allowed to chuse in Lieu of them any other Lots of equal Dimensions of the Church Estate, except those fronting the Broad Ways—and for which this Corporation will grant them Leases for the term yet unexpired at the same Rent as those they now have."—Ibid. The resolutions of this important vestry meeting were published in full in N. T. Jour., Je 17, 1784 (which is preserved in archives of Am. Institute, N. Y.).

The following announcement is published: "The heirs and other representatives of Annie Bogardus, widow, deceased, are requested to attend at Cape's Tavern, on Saturday next, at 4 o'clock in the afternoon, on business of high importance, relative to the lands called Dominie's Hook, in this city, which formerly belonged to New York, May 19, 1784."—N. T. Packin, My 20, 1784; Nash, Annu. Jams Bogardus (1896), 71. See also F 21 and Mr 18, 1788.

Philip Minthorne, in a petition to the common council, states 21 that "in the Year 1776 he left this City on the Approach of the British Troops, & retired with his family into the Jersies;" that "when he so left this City he was a regularly appointed Weigh Master, that his scales stood in the street at the Back of the Stables of Cape's Tavern;" and "that these scales were removed during his Absence into the Jersies to the Forge Yard at the North River, where they now stand." He asks that he be again appointed a weigh-master, "with permission to erect his scales on the Ground [where] they formerly stood."—From original petition (in metal file No. 7, city clerk's record-room), endorsed "read May 21st 1784 & the prayer granted." This petition is typical of several from returning refugees and soldiers, seeking reinstatement in their former employments, or seeking release from the payment of quit-rents on grants of land made to them just prior to the war.

The committee on docks and slips reports that Old Slip is in a ruinous condition, and likely to become an intolerable nuisance. They recommend "that a block about eight feet in width thrown across the slip about fifty feet below the bridge, and the intermediate Space filled in" would largely remedy the fault, and that, to make this effective, the street fronting the slip should be paved "with a gradual Descent from the Corner of Duke Street down to the aforesaid Block." A committee is appointed to execute these plans.—M. C. (1784-1831), 37-38.

The common council contributes £50 toward digging down Cortlandt Street, so that the descent is easy, and that water from Broadway may be led into the North River.—M. C. (1784-1831), I: 37.

Marinus Willet, sheriff of the city and county of New York, protests to the common council against the insecurity of the "Goal."—M. C. (1784-1831), I: 39.

A letter of this date from New York was published in a Baltimore newspaper, describing a "mob" that, some time before, had met in the Fields at New York and passed resolutions that "every tyr or person suspected of Toryism should be banished from the state." On their way to the city hall, they met a couple of British officers, whom they placed on a cart and carried about "to the no small joy of the benovent and humane whigs, as well as of every lover of peace and good order." The "two Microscans" were rescued by the governor, who "went attended by some of the Council and others of the lower class of people," and the mob was thus "deprived of the unspeakable pleasure of seeing a taring and feathering match." This much of the account is evidently written in a semi-jocular vein. The two men thus handled by the "mob" were Capt. Henry Shelby and one Capt. James Kirkpatrick, a gentleman of leisure who is now here on public business." The letter, which evidently was a political squib, was reprinted in a New York paper a month
THE ICONOGRAPHY OF MANHATTAN ISLAND

May 1

1784. later "to show with what rancorous malignity certain characters in this city propagate slander and falsehood."—N. Y. Gazette, Je 25 1784 (in N. J. H. S.).

The common council orders that a "middle road" be laid out between the Post Road and the South Road, through the Common Lawn, M. C. C. (1784-1813), I: 145, 199. This was long afterward called the Middle Road, although occasionally mentioned in the records and elsewhere as Manhattan Avenue, a designation never formally adopted. See L. M. R. K., III: 1005.

21. Col. Matthew Clarkson is authorized by the Regents to go to France and the United Netherlands to solicit benefactions for the University. This is a continuation of the request to "purchase such philosophical apparatus for the College [Columbia] as Dr. Franklin, Mr. Adams and Mr. Jefferson, Ministers of the United States, should advise."—Hist. of Columbia Univ., 1754-1904, 65.

The common council gives Aaron Gillet sole charge of the city watch. He is required to "make strict inquiry into the Character & Conduct of all the Watchmen and . . . discharge such as shall not produce the most satisfactory proofs of their sobriety diligence and integrity and employ in their stead Citizens of established good Characters." He is to "direct the Watch to make their Rounds in silence."—M. C. C. (1784-1813), I: 40.

27. "It being represented that great Numbers of dead Bodies have been interred in the Burying Ground adjoining Trinity Church during these Years that Grave can easily and with little fatigue be made without obstructions from Coffins or human Bones that therefore many dead Bodies are placed within three feet of the Surface of the Earth whereby the health of the inhabitants of this City is evidently endangered, Therefore

Resolved That no Funerals be permitted in future in the burying Ground of Trinity Church except where families have used particular burial places for this some time past and except in the different vaults already built."—Trin. Min. (M.S.).

The vestry also orders that "That Mr. [William] Elsworth the Fire Engine of this City be permitted to build a house for a fire engine on such Part of Saint Pauls Burying Ground as the Committee of the Repairs shall think proper."—Ibid. See S. 2.

June 2

Simeon King announces to "his friends and the public that he has opened a Tavern at the sign of the Indian King, No. 110, Water-street, the noted place formerly called the Royal Punch House [see Jl 1, 1780]; he has a pump which affords a constant supply of the best water in the city, and equal in flavour to the Te-water pump . . ."—N. Y. Gazette, Je 3, 1784.

6. The vestry of Trinity Church, because of its enormous debt (about $18,000), and the expenditures due to the destruction by fire of Trinity Church, the rector's house, the charity school-house, and the fences of the burying grounds, decides "that a number of lots of ground, belonging to this Corporation, situate to the southward of Chamber-street, be forthwith sold at public auction, in fee." The committee on leases, after examination of the various lots, is to report which should be sold and which leased. The members give notice of the days on which they will consider applications for the lots.—N. T. Jour., Je 17, 1784 (in the archives of the Am. Institute, N. Y.).

9. The Bank of New York is opened in the old Walton house, at 67 St. George's (Franklin) Square.—N. Y. Packet, Je 7, 1784. The house was known also as 156 Queen St., and subsequently as 316 Pearl St. In 1787, the bank moved to No. 11 Hanover Square, and in 1796 purchased the house and lot at the north-east corner of William and Wall Sts. In the following year the house was destroyed and a bank building erected.—Domett, Hist. of the Bank of New York, 1754-1884. The bank was incorporated in 1791.—Laws of N. Y. (1791), chap. 37. See also, descript. of Pl. 72-b, I: 458.

The commissioners appointed by the act of May 4 to lay out the city in the burnt district recommend that Cortlandt and Crown Sts. be widened, and that Greenwich St. be continued southerly to the common lawn. They are able to a plan proposed by Anthony Van Dam. The common council orders that the city street survey be taken out, and regulate the streets accordingly.—M. C. C. (1784-1813), I: 45-46, 47. For Van Dam's plan, see Mr 3.

The committee appointed on May 12 in connection with the removal of the slaughter-house reports that it is intolerable to the neighbourhood, and may be prejudicial to health; that it ought to be removed "to some place near the Water & that they would recommend Corlear's Hook;" that, if Mr. Bayard will undertake it, he ought to be given the remainder of his lease without charge, granted to it the city, and the revenue from the slaughter-house collected for the use of the city. This is agreed to by the common council.—M. C. C. (1784-1813), I: 44. See, for further action, JI 1 and 21.

From this date to Oct. 27, John McComb received in various payments £1,085 for repairs to the bridgetow.—M. C. C. (1784-1813), I: 46, 51, 56, 61, 64. On Nov. 14, he was paid £1,000 toward finishing the building, and on Dec. 8, he received £50 more.—Ibid., I: 99, 106. He was paid £150, on March 16, 1785, for more repairs to the bridgetow, and on Sept. 23, £1876 for the same purpose.—Ibid., I: 125, 170. See Ag 13.

A proposal of Elias Burger is agreed to by the common council, to "lay a Block across Beekman Slip—Six feet at the Bottom & five feet at the Top, Timber joo, filling up with Stone complete, Workmanship & all Charges included at twenty Shillings per foot."—M. C. C. (1784-1813), I: 47-48. On Aug. 26, Burger was paid £100 for this work.—Ibid., I: 67.

Stephen Dolbeer announces that he has "Revived" the Blue Bell Tavern at Fort Washington, "where he hopes for the continuance of his former customers."—N. Y. Packet, Je 10, 1784. The tavern stood on the Post Road, at about the present 181st St. The L. M. R. K., III: 977, locates it on the west side of the Post Road, disproving the statement of O 12, 1753 (p. 2), but erroneously states that it is shown on Pl. 87-b, vol. III.

The walls of the burned Trinity Church, which have been a menace to the locality, are being thrown down. The church is to be rebuilt as soon as possible.—Ind. Jour., Je 16, 1784. This was done, however, until 1788 (p. 2). See also descript. of Pl. 49, I: 352.

Mayor Duane reports to the common council a plan for the future Management of the Alms House and the Bridewell or House of Employment, which he and the commissioners of the bridewell have agreed upon. The report recites that, as a result of the war, the number of the poor maintained at public expense has greatly increased, and that the annual tax to be assessed for their sustenance has become burdensome and in danger of being oppressive. Also, since the evacuation of this district by the British, "the tranquility of the Inhabitants hath been disturbed by an idle and profligate Banditti who continue to rob and steal . . . and by other abandoned Yrants and Prostitutes whom the ordinary Process of Justice hath not awed nor reclaimed." It is conceived that only the discharge of the "Bridewell House of Employment," rigorously administered, will be effectual to correct and restrain those shameful enormities. But the "Alms House and Bridewell or House of Employment are at present in the immediate Government of the Mayor Recorder & Aldermen (the former in conjunction with the Vestrymen and the latter in conjunction with the Assistants or Common Council Mee);" and these magistrates are unnumbered with, and are intrusted with the public affairs of affairs (the dispensation of justice, regulating the police, and managing the revenues) that they cannot extend the degree of care to "either of the said Institutions" that their importance and the public good demand. The mayor and commissioners of the bridewell therefore submit a plan of management to remedy these conditions, and this is approved.—M. C. C. (1784-1813), I: 48-50.

The Mutual Hook and Ladder Company (volunteers) is organized. It went out of existence in September, 1856. The six volumes of its original MS. records are preserved in the city clerk's library, room 357, Municipal Bd'g.

The alteration of "the street called Golden Hill or John Street" will cause damages for which two petitioners ask compensation, but the common council decides that no relief can be given.—M. C. C. (1784-1813), I: 52.

The common council agrees that the city will purchase of Mr. Bayard the materials of the slaughter-house; and it is ordered that the commissioners of forerunners of the Southern District be applied to "for a Piece of Ground of about three acres said to be in possession of John Delaney to be used as a Penn for the Slaughter House but if he refuses it the city shall purchase a lot in that locality and the revenue from the slaughter-house collected for the use of the city. This is agreed to by the common council.—M. C. C. (1784-1813), I: 52.

The repaired Brick Presbyterian Church on Beekman St.
which was used by the British as a hospital for prisoners, is re-
opened for services. The repairs cost $1,300. Since Evacuation
Day, the congregation have worshipped alternately in St. Paul's
and St. George's (Episcopal) churches.—Knapp, A Hist. of the
Brick Pres. Church, 76.

30 Christopher Miller petitions the common council, in behalf of
himself and others, for the use of "the room over the Exchange
for the instruction of their sons in the Manual Exercise & Military
Evolution," having procured "a very capable and expert person
to teach them."—From the original MS. in metal file No. 7, city
clerk's record-room. Granted.—M. C. C. (1784-1831), I: 54. This
room became in 1790 (q. v., F 1) the first meeting-place of the
U. S. Supreme Court. See S 1.

"A bill of Daniel Phileas, of this date, for: '1 Ensign...£4.20.6.'
Is introduced, for the bill of the corporation, bears the endorsement
'Accét for a Flag—filed 21st March 1783.'—From the original
bill in file No. 9, city clerk's record-room.

July

There is published, by order of the mayor, a notice, dated June
1, that "The public Slaughter-House...has been presented by
the Grand Jury as a dangerous nuisance, is ordered to be removed
to Carrhor's, to be rebuilt over the water." The notice calls
for proposals for leasing it, the new buildings to be built at
the expense of the lessee.—N. T. Packet, Jl 1, 1784. See Jl 21.

The annual meeting of the Society of the Cincinnati is held at
Cape's Tavern. Toasts are drunk. The following officers are elected
for the ensuing year: Alexander MacDouglall, president; Gov.
Clinton, vice-president; Philip van Cortlandt, treasurer; Nicholas
Franklin, assistant-treasurer; James Fairlie, secretary.—N. T. Packet,
Jl 8, 1784.

21 Roger Morris having been attained, the commissioners of for-
feiture sell his property "in the Out Ward of the City of New York
on the Heights commonly called Haerlem Heights containing One
Hundred and fifteen Acres," to John Berian and Isaac Ledyard for
£2,250. The deed was recorded on Aug. 13, 1792.—Liber Deeds,
XLVIII: 451-52. The Roger Morris house had been erected in
1765 (q. v., My 13). See My 23, 1785.

Peter Maverick advises that he takes in Engraving at No. 3,
Crown-street, next to the old Quaker-Meeting.—N. T. Packet,
Jl 12, 1784. Cf. N. T. Gazetteer, Jl 11, 1785. See Mr 16,
1786.

20 A committee of the congregation of the "Wall St. Church"
is formed to solicit contributions for "rebuilding or repairing the old
Presbyterian Church."—Proc. of the Trustees (Session Book) of
the First Presby. Church. The whole of the interior had been
destroyed during the war, and nothing but the walls and the prin-
cipal timbers of the roof were left.—Miller, Memoir of Rev. John
Rogers (1813), 249. The work of rebuilding thus commenced was
completed in 1793, Jl 10, 1784.

31 James Blanchard having offered to undertake "the removal
or building of the Slaughter House at Corlears House," the common
council appoints a committee to treat with him. The proposed
terms included a provision that he pay Mr. Bayard the apraised
value "for the materials of the old House to be made use of by
Mr. Blanchard as he shall think proper."—M. C. C. (1784-1831),

It having been suggested "that a Continuation of a certain
Street in the West Ward called Lombard Street until it falls into
Crown Street would conduces much to the convenience Health &
Safety of that part of the City," the common council orders that
the committee which has been appointed to direct the digging out
of Cortlandt Street "suggest the matter to the Commissioners for
regulating the Streets in such Parts where the Buildings have been
destroyed by fire during the Late War."—M. C. C. (1784-1831),
I: 60.

The common council agrees to defy the expense of a building
a "Breast Work" across the slip at Dee St., as in the case of Old
Slip and Beekman's Slip.—M. C. C. (1784-1831), I: 60, 67.

Beekman is appointed city surveyor.—M. C. C. (1784-
1831), I: 59.

27 The New-York Gazetteer, and Country Journal (see Jl 5) be-
comes a semi-weekly.—Brigham, A. A. S. Proc. (1917), 431. See
D 7.

28 The common council orders "that when the proprietors of the
lots in Cortlandts Street commence paving the said Street that
the following rule he observed, viz: That street be highest in
the middle and that there be two Kennels or gutters, for carrying off
the water, on each side near the front of the lots."—M. C. C.
(July (1784-1831), I: 62.

For "tagging &c at the Exchange," the common council author-
izes payment of £47216; and for carpenter's work and materials at
the exchange bridge and exchange, £40175.—M. C. C. (1784-
1831), I: 62.

29 Rev. John Christopher Kunze, "late senior minister of the
Lutheran Churches in Philadelphia and Professor of Oriental
Languages in the University, who is appointed the Lutheran
Minister of the Trinity and Christ Churches in this city," arrives
in New-York.—N. T. Packet, Ag 2, 1784. The two churches had
been united, on Jan. 6, under the name of "The United German
Lutheran Churches in the City of New York." All services were
held at the Christ Church (corner of Frankfort and William Sts.)
because the Lutheran Trinity Church, burned on Secuery, had never
been rebuilt.—Kretzmann, The Oldest Lutheran Church in Am.,
30. It seems that when the old church on Broadway and Rector St. was burned, its walls being of stone, were left standing,
and the building, though never used thereafter by the congregation,
was rented for business purposes (see My 30, 1791 and S 6, 1792).
See also Mr 22, 1790.

Trinity reverts the pay of two assistant ministers, Uzal Ogden
and Rev. Benjamin Moore, at £200 each per annum, at the same
time appointing a committee to raise this sum by subscription.
—Trin. Min. (MS.) in N. Y. H. S.

Lafayette arrives in New York from Havre in the packet ship
"Cuirier." The next day, "he was invited to a splendid entertain-
ment, where the officers seated in their tent which had been long
cast aside, but were now resumed in honour of the occasion..."
He passed a few days in New York, and departed for
Philadelphia.—A Complete Hist. of the Marquis de Lafayette, by
an officer in the late army (1826), 156-57. Lafayette came to America
to see Gen. Washington and to greet his companions in arms after
the declaration of peace. "He was received everywhere by the people with cordial demonstrations of friendship and attachment.
Having spent some happy days amid the delightful surroundings of
Mont Vernon, whither he was conducted by General Washington,
who had gone to Richmond to meet him, he revisited Williamsburg,
Yorktown, and other points of interest in the Virginia campaign;
he stopped at Baltimore, Philadelphia, and Boston upon his journey
through the Middle States and New England; and he sailed for
France from New York on the 24th of January, 1784.—Chama-
magne Tower, Jr., The Marquis de Lafayette in the Am. Revolu-
tion, II: 467-68, citing "Voyage aux Etats-Unis en 1784," in Mémoires,

September corporation offers a large number of lots for sale. These
are in Broadway, Partition, Vesey, Greenwich, Barclay, Robinson,
and Rector Sts.—N. T. Packet, Ag 14, 1784.

A committee is appointed "to confer with the commissioners of
the bride-well [see My 14] relative to the employing of Persons
(confined therein) in levelling &c the Ground about the new
buildings in this City."—M. C. C. (1784-1831), I: 61. Vacants
housed in the bride-well were frequently employed for similar work
during the years following.—Ibid., I: 175, 317, 341, 476. For
another kind of employment, see D 3, 1788.

The first of several parcels of land in the Bowery estate of
James de Lancey is sold under the New York act of confiscation.
Other parcels were sold throughout 1784, '85, and '86, the total
receipts being $2,314,193.75. The commissioners of forfeitures were
Isaac Stentonbusch and Philip van Cortlandt. This estate, formerly
in the "Outerward," comprised one-third of what became the 7th,
the middle of the 10th, nearly all of the 11th, the whole of the 13th,
and nearly a fourth of the 17th, Wards of the city, with a water-
front of over a mile on the East River. The mansion-house was a
large, double, brick edifice, with extensive grounds and a drive
leading to it under large trees. It "fronted the Bowery, and stood
back nearly on the line of First [the present Christie] Street, and
behind De Lancey and Rivington Streets." On the 1st St. stood Mr.
De Lancey's racing stable, and in 2d St. a padock for the horses,
and near it a private track to train them. "Orchard Street is so
named from the large orchards on that part of the farm. Evert
By ravick held the part at Corlears House or 'Crown Point.'

on a long lease for ship-yards, etc., and on Little Division, now
Montgomery Street, was Degraves' Rope-walk.—Jones, Hist. of
N. Y., II: 540-59, with map opp. p. 556. See also map of the
De Lancey property, in colours, in MS. Div., N. Y. P. L.
The name of some of the streets on the map have been changed. 'Fisher' is now Bayard St.; 'Pump' is now Walker St.; 'Eagle' is now Hester St.; 'Bullock' is now Broome St.; 'De Lancey's Square,' or 'The Great Square,' as it was often called, which extended from Grand to Broome, and from Third to Essex, was, unfortunately for the future of the City, cut up into lots by the commissioners and sold, money, not health and beauty, being then desired. 'First' is now Christie St.; 'Second' is now Forsyth; 'Third' is now Eldridge St. No streets were laid out through the blocks where Allen and Ludlow Streets now are. From Arundel Street to the East River no streets were laid out, all being farm or meadow land.

On the highest part of Grand Street was 'Mount Pitt,' about two acres, the town-house and gardens of Judge Jones... built by him on land given to... the judge's wife [Anne], by her brother, James de Lancey, in 1765... It was sold in 1785... under the Act of May 12th, 1784, by the Commissioners of Portu-
ture, to Morgan Lewis, for £790, or $4,422 dollars. The house was removed to an adjoining street, and remained till late in this [the 19th] century. The name was given in honour of William Pitt, afterwards Lord Chatham, of whom Judge Jones was a great admiral, and is still perpetuated in the street now called Pitt Street."—Ibid., 544-45.

The De Lancey estate included a 30-acre farm at Bloomingdale. This was sold under the same act, on Oct. 19, 1784, to John So-
merindjcke, and became known as the Somerindjcke Farm. It ex-
tended from the south-west angle of Central Park to the North River.—Ibid., 544. See also 27, 1785.

In the archives of the N. Y. H. S. is a manuscript entitled "Abstract of Name of all the Part of the City of New York in the Southern District [New York City] who have been in delinquents in their payments, and distinguishing the particular property on which the deficiency of payment arises."—MS. filed with "New York MSS., 1761-1800." The Mayor, in the judicious charge which he delivered to the grand jury, at the late quarter sessions, recommended to their attention the risk and disorder which prevailed in the South ward of this city. The jury then "went to each house and made a minute inquiry into the number of inhabitants, the manner in which they get livelihood, and such other circumstances as occurred from the appearance of the place." The result was "a presentation of the evident necessity there was for proper steps being taken to suppress the numerous receptacles for the vicious and abandoned, in that part of the ward which passes under the denomination of Canars-town. Bridewell is fitting up as a school for the reformation of manners."—N. Y. Gazetter, Ag 17, 1784.

On Sept. 30, the sheriff demolished several of these houses, an indictment having been preferred against them "as forming a public nuisance." The news of this report comes with the fate of Tip Toeb, ibid., 1784. See also ibid., Aug 26, 1785.

A newspaper correspondent "recommends to the attention of the magistrates a nuisance generally complained of in this dry, warm season. A number of people assembled round the pond [Fresh Water] from whence the tea-water is raised, and wash their dirty linen..."—N. Y. Packet, Ag 19, 1784. See also ibid., O 25, 1784, and De Voe, Market Book, 267. See, further, Ag 25, 1785.

A three-story brick house at No. 1 Hanover Square, formerly occupied by the late Henry Cruger, is advertised for sale. The lot is about 25 feet wide, and extends 150 feet "to the Sloat, on which is a commodious Brick Store."—Ind. Jour., Ag 25, 1784.

The common council receives a proposal of Henry Rutgers for opening a road through his land along the East River to the new slaughter-house at Colker's Hook.—M. C. C. (1784-1813), I: 65-66.

The common council decides that the extensive repairs which the markets required, "by Reason of the Ruinous Condition in which they were found on the Evacuation of this City by the British Troops," should not be paid for out of the market fees.—M. C. C. (1784-1813), I: 67.

In accordance with the city ordinance of March 16, 1784 (9. 0.), Mayor's Duties (authority from the common council "the Mayoralty & the Mayors Court Seats," altered as there specified. The board examines and approves them, and ordains that they "be adopted as the public Seats of this City & that the old Seals be broken by the Clerk in presence of M. Mayor." They are accordingly broken.—M. C. C. (1784-1813), I: 69-70. The bill of Andrew Bilings, for £1516; for making the new seals, is approved for payment.—Ibid.,

It 69. The original bill, dated Aug. 30, shows the following items: "For making and Engraving the Great Seal of the Corporation," £7944; ditto; " Seal of the Mayor's Court," £100. From the original bill, preserved in file No. 6, city clerk's record-room. See also Pine, Seal and Flag of the City of N. T., 58-59.

Impressions of the new city seal, and the seal of mayoralty, are shown in ibid., Pl. 4, and fully described, pp. 59-62. The same seals, from the Paudling collection in the N. Y. H. S., are also reproduced in "The Mayor's Great Arrectory of N. Y. City and State," Pl. 26, and men-
tioned on pp. 63 and 65.

The common council passes an ordinance for regulating the public slaughter-houses within this city, and providing that after Sept. 10 no one shall slaughter near cattle at any other place than "the public Slaughter House lately erected at Corlcat's-hook." The law regulates the fees to be charged by the keepers for the use of the said slaughter-house, pen, penfold, and the tackle and furniture thereto belonging."—N. Y. Packet, S 6, 1784.

Thomas Turner petitions the common council for the use of the room in the exchange for teaching dancing and fencing, but is in-
formed that the room has been disposed of for other purposes.—M. C. C. (1784-1813), I: 69. See Jo 30.

John Mc Comb, presented Sept 7, 1782. "For Building an Inginue House at the rear of the Burying Ground, Belonging to St. Paul Church" (see My 27).—From the original bill in metal file No. 6, city clerk's record-room. It was paid Oct. 27—M. C. C. (1784-1813), I: 97.

"To Be Sold At Public Auction, on Friday, 10th of September, at Twelve o'clock, at the Coffee-house, That spacious, well-built House, situated in Great Dock-street, well known as Francis's Tavern...." The premises are extensive and admirably well contrived for a Hotel or Tavern, the cellar is capacious and good; the upper Rooms large, convenient for company, and the attic story well adapted to the uses of a numerous family; its vicinity to the New-
Market, and the probability that new and elegant houses will soon be built in that direction, must considerably add to the value of the Estate. Though so famed and well contrived as a Tavern, it has the peculiar advantage that it may be readily converted into two separate houses, at a very moderate expense. Further particular-
s may be known prior to the day of sale, on the premises, or of Viner Van Zandt, No. 200, Water-Street.—N. Y. Gazetere, and Country Jour., S 3, 1784 (in N. J. Hist. Soc.). See Ap 4, 1785.

John van Allen exclusively is permitted by the common council to "occupy the Ferry across the North River from the Corporation Wharf to Hoboken;" in "acknowledgment of their Right," he is to pay the city 20 shillings per annum.—M. C. C. (1784-1813), I: 70. See also "Hoboken Ferry" in L. M. R. K., III: 942.

The inhabitants of Chatham St. and Tryon Row petition the common council to "the building lately erected for the execution of Criminals may not be placed near their Houses." It is ordered that the building be removed and placed "between & on a Range with the Alms House & Goal."—M. C. C. (1784-1813), I: 71. The building in which the gallows stood is described as "a gaudily painted Chinese pagoda."—N. Y. City in 1789, p. 16.

It is ordered by the common council "that five respectful Ad-
dressses from this Corporation be presented with the freedom of this City in Cold Boxes, one to his Excellency, the Governor, one to his Excellency General Washington—one to the hon'ble John Jay Esq one to the hon'ble the Marquis Delfafayette, & one to Major General Baron Steuben."—M. C. C. (1784-1813), I: 73-74. See 14 and 20, O 2 and 8, and D 2.

Inhabitants in the vicinity of Old Slip are permitted by the common council to make, at their own expense, a public walk of flag-stones, eight or ten feet wide, in the middle of the street lead-
ing to the slip from the south side of Dock St., and extending to the north side of Water St.—M. C. C. (1784-1813), I: 75.

Payment is made for 2,825 loads of dirt for filling the Old Slip.—M. C. C. (1784-1813), I: 75.
town, the clergy of all denominations, "and a very numerous assem-
blage."—N. T. Packer, S 16, 1784. M. C. C. (1784-1831), I: 73-
17

17

Oct.
8

Resolves That the Committee of repairs be requested to
employ workmen to finish immediately the Cupola on the Tower
of St. Paul's Church."—Trin. Min. MS. For the completion of the
steeples, see Oct. 1794.

1196 THE ICONOGRAPHY OF MANHATTAN ISLAND

1784 urgent petition on July 20, 1785 (p. v.), and was granted some money Oct. on account. For a proposal to revive the project of supplying the city with water, see Mr 24, 1785.

27 Thomas Ivers and others petition the assembly to be relieved from paying rent for houses in New York during the period of the British occupation; granted — Assembly Jour., 37-38.

Nov. 1785. John Bailey, in a bill of this date, charges the corporation $30 for "making the Iron Work and hanging the fire Bell," and for "one smaller D." The bill was audited April 5, 1786,—From the original bill in metal file No. 6, city clerk's record-room.

8 The Black Friars Society is founded for charitable and social purposes, and holds its meetings at the "Friary," No. 56 Pine St. —Smith, N. T. City in 1789, 116.

13 The state senate concurs with the assembly in a resolution "that the delegates from this State to Congress be instructed to inform that honorable body, that if Congress should think proper to remove to this city, this State will endeavour to make their residence agreeable; and that proper accommodations for transacting the general business, and for the entertainment of the members can be easily provided."—Assemb. Jour., 44, 50.

14 Bishop Seabury is consecrated at Aberdeen, by three Scottish bishops, as first bishop of America.—Wilson, Mem. Hist. IV: 625. The Episcopal character of Bishop Seabury was later questioned by Dr. Provost of Trinity Church.—Dis, A Hist. of the Parish of Trinity Church, II: 104-5. See Mr 5, 1785.

17 Evert Bancker, Jr., is paid by Trinity Corporation 16s. for "making a plan of the Church lots Between the Broadway and Churchstreet, and Veasey & Barclay Street and a representation of the Vineyard and the Commons for Mr Blecker."—From the original receipted bill in N. Y. H. S.

18 The legislature passes an act for the establishment of a custom-house at New York.—Laws of N. Y. (1784), chap. 6. It was established at the lower end of Wall St.—N. T. Packet, D 30, 1784. For earlier locations, see Mr 13, 1774; Jl 14, 1753; My 1, 1769; and for later locations, see Mr 10, 1790; S 1, 1798; My 11, 1799; S 16, 1825; D 2, 1816; My, 1834; My 1, 1842; S 30, 1863. See also L. M. R. K., III: 974.

22 The assembly adopts the following resolution: "Whereas all lands vested in the King of Great Britain, while it [N. Y. Statel was a Colony, is now vested in the people of this State. And whereas it is the wish of the people of this State, to vest and dispose of the lands belonging to the City and County of New York, formerly called and known by the name of the King's Farm, and the King's Garden is now the property of the State, which was by law sequestered for the use and benefit of the Governors of the late Colony, for the time being; and the said Governors respectively were prohibited from leasing or granting the said lands for a longer period than their respective continuance in office. Therefore, Resolved, That a Committee be appointed to examine the laws and records of this State, concerning the premises, and to make report thereon."—Assemb. Jour., 46.

25 The first anniversary of Evacuation Day is celebrated. "In the morning the bells of the different churches rung bobs, double bobs, and bob major's. The Thirteen Stripes were triumphantly displayed on the grazy Flag-staff at Fort-George. . . . An elegant Entertainment was prepared at the City Tavern. In the evening the houses of the Whigs were most beautifully illuminated. . . ."—N. T. Gazette, N 26, 1784 (in N. J. H. S.).

26 The legislature passes a law to amend the act of May 1 (p. v.) which established the "Regents of the University of the State of New York." This names 13 additional Regents, fixes nine as a quorum, authorizes the clergy of each denomination to choose one of their number as a Regent, and advances $4,552 for the use of Columbia College.—Laws of N. T., 8th sess., chap. 15. For further changes in the law, see Ap 13, 1787.

29 The legislature passes a resolution "That the Monument by the United States in Congress assembled ordered to be erected to the Memory of General Montgomery [see A. J. 25, 1776], be erected in the City of New York; laid on the ground at such particular Place as the Mayor, Aldermen and Commonalty of the said City in Common Council shall convene appointed."—From MS. copy in city clerk's record-room; Assembly Jour., 8th sess., 76; and Votes and Pro-ceedings of the Senate, Nov. 26. See also 21st Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1916), 641-51, and Mr 21, 1787.

The legislature passes "An Act to compel the Payment of the Arrears of Taxes, for enforcing the Payment of Fines and America- nisation debts. It was printed (pp. folio) in New York by Hols, the state printer. One of these handbills is preserved in N. Y. P. L. "Agricola," writing to the proprietor of the Packet, recalls "a plan for embellishing and planting the Fields, which was proposed about fifteen years ago." He suggests that Mr. Loudon start a subscription "to plant and fence in next spring that triangular spot. He also suggests that it be named "Washington's Mail," and "in the middle a handsome obelisk should be erected, with a sun dial on one side, and whatever other inscription the public might think proper on the other". He adds: "Every well-polic'd and governed town should be kept clean, . . . have public foun- tains of good and wholesome water, and several public walks."

—Loudon's N. T. Packet, N 29, 1784.

Dec. The North Dutch Church is again opened for service. "On account of the impoverishing influence of the war, and the expenses that were otherwise necessarily incurred, the Middle Church was suffered to remain in its condition, laid waste for the present."—De Witt, Discourse, 42. See 1788. For the opening of the Middle Dutch Church, see Jl 4, 1790.

2 The common council resolves "that certain Lots belonging to this Corporation situate near the Corporation Wharf at North River be sold at publick Vendue to the highest Bidder."—M. C. C. (1784-1831), I: 105-4, 105. Eight of these lots "near the bear [Hudson] Market" were sold on February 24, 1785, for $4,573.

—Ibid., I: 118, 123-4.

2 The title of The New York Gazetteer, and Country Journal (see Jl 27) is shortened to The New-York Gazetteer; the paper is made an eight-page quarto, with page numbers, and a new volume numbering is adopted.—Brigham, A. A. S. Proc. (1917), 431; Early Newspapers, II: 423. See Mr 5, 1785.

3 The "Marquis de la Fayette" (see Ag 4) arrives in New York from Trenton with Monsieur de Caravan (a Knight of Malta and captain of dragoons), who arrives in the City and makes his residence at the residence of Count de Montgomerie, "La Friary," No. 56 Pine St. Lafayette and De Caravan, after a tour of the United States, are returning to France.—Ind. Jour., D 18, 1784. See also D 21.

A committee reports to the Regents that the annual income of Columbia College is about $6,000. It recommends the establish- ment of various professorships in the four faculties of arts, medic- ine, law, and divinity, and the appointment of a president, a secretary, and a librarian.—Hist. of Columbia Univ., 1754-1904, 63-64. The president was chosen on My 21, 1787 (p. v.).

The commissioners of forfeiture convey to Mariais Willet 15 property on Willet St, bounded south by Grand, and north by Bullock (Broome) St., extending half way through the block to Sheriff St.—Liber Deeds, CXII: 563. It was in possession of Willet in 1789; although, on July 1, 1790, when advertised for rent, it was described as "The House and Lot at Corlear's Hook called Cedar-Grove, and lately occupied by Col. Willett."—Am. Minerva, Jl 1, 1796. See also L. M. R. K., III: 1002 (Gillett St.).

In a letter to the editor, Mr. Loudon, a "Citizen" writes the following "retrospective view of the city and the circumstances attending it for this nine years past." He observes, among other things: "It is well known that our fears and apprehensions of oppression, and our struggles against the torrent of tyranny began in 1774, and before; our minds were distracted between hope and despair, embarrassments accumulated, and the contemplation of our future situation and that of our posterity, engrossed all our attention; and of course, as is always the case, the lesser objects gave way to the grander; . . . the city itself was neglected. . . . Some confusion took place, and from this period the police of the city was neglected. . . . At the approach of the British army in 1776, almost every friend of his country left the city.
The troops of the King of England possessed themselves of the city, and were well inclined to do every ill; the proficacy of their manners and the nature of the warfare, emboldened them to the commission of every crime, abuse, cruelty, rapine and murder. In a few months the most elegant part of the city was laid in ashes and all what was formerly an ornament now appeared as a pile of ruins. Dirt, filth, and stench filled the houses and streets; there was daily exercised a shameful and wanton abuse of the houses and property of the eulogized, which was meanly and spitefully increased. The quays, wharfs and streets were suffered to go to ruin for eight long years, the morals of the remaining youth, and the manners of the grown-up, were made worse if not ruined by an inexcusable with the desecrated youth of that army; the city revenue was dissipated, and turned to private account, the places of worship and other public edifices, were converted into goals and hospitals; the dead were not suffered to rest in their graves, the burying yards were laid open, and public roads made through them. Close on the eve of an approaching winter, with an heterogeneous set of inhabitants, composed of almost ruined exiles, disbanded soldiers, mixed foreigners, disaffected Tories, and the refusal of a British army, we took possession of a ruined city. Under these circumstances, much was to be done, much was expected, and not only the eyes of our sister-states were turned towards us, but those of Europe were fixed upon us. The ground was to be tread with caution; many, important and various were the objects; almost unanswerable were the difficulties, unfortunated by example, death, disease and ruin, the neglect of laws and politics were necessary to guide the deliberations; charters were to be changed, laws altered and assimilated to our new constitution, and made consistent with the fundamental principles of our new Empire, without infringing the rights of the citizens; good order and regularity were to take the place of anarchy and confusion, the city was to be cleansed of its filth, lighted, and made habitable with rubbish and ruins repaired, the port and ferries regulated; all this and much more was to be done, without a shilling revenue, or scarcely means to procure it. Let not man of observation and candor go through the city, view it in its present situation, and compare it with what it was when we took possession of it, and when he considers the slender means hitherto in the city's power, he will pay that tribute of applause the magistrates so richly deserve; let him visit the market, and be pleased at the good order maintained; let him visit the goal, poor-house and bierwell, and be perfectly satisfied with the neatness and internal economy."—Loudon's N. Y. Packet, D 16, 1784.

Lafayette embarks on the "Nymph's" barge at the Whitehall street foot of the battery as the battery by Gov. Clinton, General Green, Webb, and Lamb, the consul of France, Col. Fisher, many other brother officers, "and a vast concourse of citizens." As the barge passed the Battery, he was saluted with thirteen guns. Some little time after he stepped aboard, the frigate salute the American flag with a Continental salute, which was returned by the artillery of the fort.—Ind. Jour., D 22, 1784.

Aaron Burr has removed from No. 3 Wall St. to a white house (No. 10) at the corner of Nassau and Little Queen Sts. —N. Y. Gazette, D 21, 1784.

Arguments in favour of New York, "as a place most happily suited to the reception of Congress," are published in The Ind. Jour. of this date.

Congress, in session at Trenton, after debating the subject of the site of buildings for use of the federal government, stands adjourned to meet in the City of New York on Jan. 11 next, where the sessions are to be held "until the buildings aforesaid shall be ready for their reception."—Jour. of Cong. (ed. of 1801), 3: 18-23; descrip. of Frontispiece I, III: 538. See F 11, 1785.

The mayor informs the common council that congress has resolved (C. D 24) to meet in New York on January 11; he refers also to an invitation given to congress by the legislature (see N 13), and indicates the propriety of offering congress "such Parts of the City Hall or other public buildings belonging to this Corporation as they should deem necessary & best suited for their accommodation." It is resolved to make such offer, and that the mayor be requested to communicate this resolution to the president of congress.—Jour. of Cong. (ed. of 1823), 1: 167-68; descrip. of Frontispiece I, III: 538. See J 14, 1785

Emery and Newman, from London, advertise that they "have taken a store at No. 16, on the Dock, near the Fly-market, where they propose forthwith to establish a Shot Manufactory. Also the Plumbing Business." Among the articles mentioned for sale are: "Water Pipes, with ornamented cisterns;" "Water Closets for ships, and from top to bottom of a house, with pipes for conveying water," also "Leaden pumps," etc.—N. Y. Gazetteer, D 28, 1784.

"Mt. Pleasant," formerly called "Vauxhall," (see J 14, O 25, D 27, 1775), is advertised for sale. A picture of it is shown. It is a three-story house, with the longest assembly-room in the city. The garden contains more than 20 lots of ground.—N. Y. Packet, D 30, 1784. It was this house which was occupied by Maj. James of the Royal Regiment of Artillery when it was attacked and its contents destroyed by the Sons of Liberty on Nov. 1, 1765 (q.v.). See J 11, 1789.

1785

Luigi Castiglioni, an Italian traveler, who was in New York from 1785 to 1787, later published an account in Italian of his visit to the United States, which contained the following statements with reference to this city: "In the Hall of Congress are the portraits of Louis XVI and of the Queen, his wife, which were presented by the King to the United States."

"...Every house has a number; the streets are paved with stones, and have their names upon the angles, and are lighted up at night."

For the convenience of merchants there is a coffee-house, which serves instead of an exchanging place; and in it they take all the gazettes of the country, London and Paris, and carefully register the vessels that enter or leave the port."

"The inhabitants are about twenty-two thousand, and although in the new Legislature there is no distinction, they may nevertheless be divided into four classes. ..." These are described, the first being those possessed of "manners."—From "Viaggio negli Stati Uniti dell'America Settentrionale fatto negli anni 1785, 1786, e 1787" of D. Luigi Castiglioni (1790), I: 175-83. Portions of this work were published, in translation, in the N. Y. Gaz. & Gen. Adt., D 8, 1829, and the editor made the following interesting observation regarding the portraits of Louis XVI and his queen: "These paintings, executed, we understand, by Wurtmuller, a painter of merited distinction continued to ornament the Senate Chamber in the Capital [after its removal to Washington] till the British troops fired the building during the late war [of 1812]. The portrait of Marie Antoinette was entirely consumed, but that of Louis XVI was but partially injured. It was removed into a lumber-room in the General Post Office, and afterwards disappeared, it is said, rather mysteriously. These portraits were full length, and executed in a most masterly style."

About this year, the Dyckman house, at the corner of Broadway and 304th St., was built. It was presented to the city in 1915. For a history and description of the house, see 21st Ann. Rep., Am. Scenic & Hist. Pres. Soc. (1916), 197-201 and also 22d Ann. Rep. (1917), 459-84.

In this year, Alexander Anderson made a small sketch of Lippard's Meadows from a point in Broadway which was afterwards the site of the St. Nicholas Hotel. The original, which was reproduced and described in Man. Com. Quin. (1856), opp. p. 442, is now in the author's collection.

In the spring of this year, an "Associate Presbyterian Church," commonly called the "Seeders' Church," the first of the name, was formed by the Rev. Thomas Beveridge.—Greenleaf, Hist. of the Churches of N. Y., 212. See 1787.

In this year, Christopher Colles memorialized the legislature on the subject of the establishment of a canal to connect the Mohawk with the Hudson. This was the beginning of the enterprise which culminated in the opening of the Erie Canal in 1825.—Progress of N. Y. in a Century, by Stevens (1876), 51.

At this time, Robert Fulton was a miniature painter, residing at the corner of Walnut and Second Sts., Philadelphia.—City Directory, Phila., 1785.

Between 1772 and 1785, Trinity Corporation granted at least
The Iconography of Manhattan Island

Samuel Ellis, of No. 1 Greenwich St., "at the North River, near the Bear Market," advertises for sale "that pleasant situated Island, called Oyster [now Ellis] Island, lying in York Bay, near Perth Amboy. Loudon's N. Y. Packet, 13, 24, 1785."

A summary of references in the Chronology and elsewhere to this island yields the following information respecting its history and various names. Its aboriginal name, as given by Schoolcraft, was "Kiaokh," or Gull Island. Schoolcraft's names and interpretations, however, are not always trustworthy. A court record of Dec. 6, 1856 (q. v., and Pl. 7, Vol. 3), calls it "Oyster Island."

There were three so-called "Oyster Islands,"—Bedloe's, Ellis, and a small island near them, now a submerged rock.—See Ap 20, 1676, Addenda, Vol. IV, and cross-references there cited.

In the first statute to define the territory of New York County, passed Nov. 1, 1683 (Col. Laws N. Y., I: 121), the island which we know as Ellis Island was not included: "The City & County of New York, to the Southward of Manhattan Island, Mannings [Blackwell's] Island, and the two Barne [Raudell's and Ward's] Islands, the City to bee called as it is, New York, and the Islands above specified the County thereof."

Soon after, this island was known as Dyre's Island. William Dyre and Mary, his wife, by deed dated April 21, 1686, conveyed to Thomas Lloyd certain lands "without the North Gate of the City of New York," and in the deed referred to the county of New York, and the certain island Sattuate and lying in Hudson's River to the Westward of Manhattan or Tyre Island and North of bedloe's Island Commonly called or Knowne by the name of Dyre's Island or Oyster Island."

During the Revolution, it bore the name "Bucking Island."—See O 19, 1776, and all New-York, to contain the whole of Mannings Island, Mannings Island, the two Barne Islands [Raudell's and Ward's] and the three Oyster Islands [vide supra] Manhattan Island to be called the City of New York and the rest of the Islands the county.

During the Revolution, it bore the name "Bucking Island."—See O 19, 1776, and all New-York, to contain the whole of Mannings Island, Mannings Island, the two Barne Islands [Raudell's and Ward's] and the three Oyster Islands [vide supra] Manhattan Island to be called the City of New York and the rest of the Islands the county.

The meaning of this name has not been discovered during the present researches, nor has the name been found in the text of contemporary letters and journals. It was used, however, not only on contemporary maps, but also long after the name Ellis Island became familiar. It appears thus in the Revised Statutes of the State of New York, chap. 2 (2d ed., 1869), V: 310, whereby New York City is defined as follows: "The County of New York shall contain the islands called Manhattan's Island, Great Barn & Ward's Island, Little Barn [Raudell's Island], Manning's [Blackwell's] Island, Nutten [Governor's] Island, Bedloe's Island, Bucking [Ellis] Island, and the Oyster Islands [probably error for Island, there being only three Oyster Islands of record, two of these being Bedloes and Ellis Islands,—vide supra]; and all the lands within the following river bounds: the East River from the point on the Island, beginning at the Duay Creek... to the East River or Sound... then across the North river so as to include Nutten Island, Bedloe's Island, Bucking Island, and the Oyster Island, to the West bounds of the state..."

For further references to these boundaries, see Hoffman's "Treatise upon the Estate and Rights of the Corporation of the City of New York" (1853), Appendix, pp. xvi-xvii.

Although the island belonged to Samuel Ellis prior to 1785, as appears by the advertisement first mentioned, in which he offers it for sale, its ownership from 1686, when William Dyre conveyed it to Thomas Lloyd (vide supra), to 1785, when owned by Ellis, has not been successfully traced in the present research.

The earliest mention found of Samuel Ellis is in a copy of a "Pole List for an Election for Assembly," dated Feb., 1761, printed in Wilson's "Mem. Hist. of N. Y., II: 519. No wills or letters of administration appear of record either here or in New Jersey, to aid in preparing his genealogy or his title to Ellis Island prior to 1785. In 1785, he was a butcher of Manhattan.—DeVoe, Market Book, 315-16. At the time of his death, in 1794, he still owned the island. His will, dated July 4, 1794, probated July 12, 1794, and recorded June 23, 1870, in the Liber N, N. Y. (q. v.), contains the following provisions (selected), transcribed from an exemplified copy recorded March 12, 1873, in Liber Wills, D: 131, in Hackensack, Bergen Co., N. J.: "Item. I do give and bequeath unto Catherine Westervelt, the..."
The name of Ellis 1 is found on Simeon de Witt’s map of the State of New York (1802); on the “Atlas of New York” of 1828, on David H. Burr’s map of 1830, etc.

In spite of the state law prohibiting the return of Tories, several have entered the city. Last week, one Peter Totten, who had been an officer in the militia under the British, and had retired to Nova Scotia, was seized in the streets “by a spirited citizen,” and released only on condition that he leave town in five hours. He consented, but, before the Sunday, the people of the State, which was perpetual imprisonment.—N. Y. Jour., Jan. 20, 1783.

Christopher Colles advertises a course of evening lectures in physics at “the Court Room, in the State House.”—Loudon’s N. Y. Packet, Jan. 24, 1783.

The “Civil Officers under Congress” are published, as follows: Gouverneur Morris, secretary of congress; Benjamin Banks, assistant; John Jay, minister for foreign affairs; Henry Remsen, Jnr., deputy, Joseph Carleton, secretary in the department of war; James Milligan, comptroller of the treasury; Michael Hillegas, treasurer; Joseph Nourse, register, and John D. Mercier, auditor of accounts; Rev. Mr. Jons and Rev. Mr. Provoost, chaplains; John Dunlap, printer; Robert Patton, messenger; Matthew Harrison, private secretary to the president.—N. Y. Jour., Jan. 27, 1783.

Benjamin Benson petitions the common council for a lease of “about 15 or 20 acres of the Common Lands North of the Saw Kill”—M. C. C. (1784-1831), I: 112.

The Chamber of Commerce holds a banquet in the Merchant’s Coffee House in honour of Washington and the members of congress.—N. Y. Packet, Feb. 7, 1785.

Several tenements and lots in Bowery-Lane are advertised for sale, including: “1. Eight Lots of Ground, at the south corner of St. Nicholas-street, wherein stand the muff-mill and the tenements occupied by Oliver Hobbs and Hermann Chapell, together with the house in which Mr. Hobbs lives.”

“2. Ten Lots of Ground with the improvements north of where the windmill lately stood; occupied by Mr. Wilmot.”—N. Y. Jour., Feb. 3, 1785 (in archives of Am. Institute, New York).

An “Air Balloon, thirty feet high, to which will be affixed a gallery and boat,” is being constructed at an academy in New York. The expense, amounting to about $500, will be met by subscriptions.—N. J. Gaz., Feb. 21.

It is resolved by congress, in session at New York, “That Joseph Carr, secretary in the war-office, and he is hereby directed to remove the books and papers belonging to that office, to this city, as soon as the measure can be effected.”

“That the post-master-general be directed to remove on or before the 21st of March next; and that the officers of the several departments of the treasury now at Philadelphia, be directed to remove on or before the first of May next, the books and papers of their respective offices to this city.”—Jour. of Congress (1801 ed.), Xi: 33.

Trinity vestry takes into consideration “the late alarming proceedings of the House of Assembly of this State respecting the title of this Corporation to the Church Farm and Trinity Church burying ground formerly called the Kings farm and Garden.” A resolution is passed “That the Minutes of the House of Assembly of the 7th instant relative to the title of the Church Estate be referred to a Committee and that they be directed to prepare a Remonstrance to the House the House of Assembly against the dangerous Procedure of the Legislative Authority passing an opinion, in cases of property, which by the Constitution of this State, can only be cognizable in a Court of Law, and praying to Shew Cause why the same should not appear on their minutes.”—Trin. Min. (MS).

See Feb. 24.

Richard Henry Lee writes from New York to Patrick Henry, governor of Virginia: “... Both countries [Great Britain and the United States] have been in blame [since the restoration of peace], and transgressions against the terms of peace were on each side coeval, so that whilst we charged them with removing the slaves from New York, they pointed to the violence with which their friends were every where treated, with the detention of their debts, and with actions here brought against those who possessed houses in this city whilst it was in their power by the fortune of war. ...”—Letters of Richard Henry Lee, II: 323.

The name of The New-York Journal, and State Gazette (see Feb. 18, 1784) is changed to The New-York Journal, and the General Advertiser.—Early Newspapers, III: 444; Brigham, A. A. S. Proc. (1847), 115. See Mr. 3.

Extracts from the proceedings of the “Society for promoting the transmission of Slaves to the negroes organized at New York in 1783, to inform the public regarding the text of its constitution, the names of officers (elected on Feb. 10), etc. John Jay is president.—N. Y. Gazettes, F 18, 1785 (in N. J. H. S.). The first quarterly meeting was scheduled for May 12.—N. Y. Gazettes, May 10, 1785 (bound in same volume). See also The Picture of N. Y. (1807), 113.

William Morton and Samuel Hoerner change their paper (see Apr., 1783) from a semi-weekly to a daily. They alter the title to The New York Morning Post, and Daily Advertiser.—Brigham, A. A. S. Proc. (1847), 404. This was the first daily newspaper in New York. For the first New York paper established as a daily, see Mr. 1.

The corporation of Trinity Church presents a petition to the senate, asking to be permitted to be heard in opposition to the reports of a committee of the whole, which, on Jan. 7, 1785, had that the title to the land formerly known as the King’s Farm and Garden “was of right, before the revolution, vested in the King of Great Britain, and now belongs to, and is of right vested in, the people of this state.” At the same time the corporation presents a memorial and remonstrance to the assembly, stating briefly Trinity’s title to this land, the ground of the objection being that the assembly committee made its report without consulting the trustees of Trinity corporation on the subject.—Loudon’s N. Y. Packet, F 28, 1785. An unsigned tract of 34 pages in reply to the remonstrance was published the same year. It is entitled Some Remarks on the Memorial, etc., and is addressed to the assembly. It is reprinted in full in the N. Y. H. S. Collections (1870), 341-72.

John Adams is appointed minister to England.—Winsor, VII: 25.

Francis Childs begins the publication of The New-York Daily.
1875
THE ICONOGRAPHY OF MANHATTAN ISLAND

1785
Mr 1
3
From this date until June 23 (p. v.), Eleazer Oswald published
The New-York Gazetteer, and the General Advertiser (see F 17, 1785)
for Elizabeth Holt.—Early Newspapers, II: 424; Brigham, A. A.
S. Proc. (1717), 448.
4
Burying the dead in vaults beneath either of the Presbyterian
churches (the Wall St. Church and the Brick Church) is forbidden
by the church authorities of this denomination.—Proc. of the
Trustees, First Presbyterian Church.
5
The New-York Gazetteer, and the Country Journal.—Early Newspapers, II: 423;
Brigham, A. A. S. Proc. (1717), 431-32. See Ag 14, 1786.
10
Jefferson is appointed minister to France.—Winson, VIII: 233,
and authorities there cited. Windsor says (p. 235) that "Jefferson's
career in France was characteristic. He lost no opportunity to
inculcate his principles of free trade. . . . His activities as a whole,
as outlined by Winson, indicate a purpose to establish international
good will on a basis of practical reciprocity in physical benefits.
Among the specific things mentioned, "He conferred with the
political mentors of the coming French Revolution, and wrote to
Jay to induce the shipment of American flour for the starving
Parisians."
11
The county vestry passes a resolution that "Mr Duane one of the Church
Wardens be authorized to purchase at Mr John Leake's
large dwelling house and lot of ground at the Corner of Nassau and
Ferry Streets for the use of this Corporation. . . ."—Trin. Min.
(M.S.).
12
"This also resolves that 'The Committee of repairs be directed to
examine the Cisterns and Belfry of St Paul's Chappel and that
they cause such repairs to be made as they shall think necessary.'
—Trin. Min. (M.S.).
13
On May 15, the committee reported that the cisterns on the roof of St. Paul's
"should be boarded or shingled in the same manner as the rest of the roof."—Ibid.
14
The schools in the city hall (see Ap 30, 1784) "greatly disturb
Congress," and the common council orders that Mr. Riggs and
Mr. Grams remove their school immediately.—M. C. C. (1784-
1785), 172.
15
Samuel Ogden, in a petition to the common council, states that
"the late War hath totally ruined, The Fire Enigne, and Water
Works, which were erected for the purpose of Supplying this City
with Water" (see Ap 17, 1776). He offers, at the expense of himself
and his associates, to "erect and Establish a Fire Enigne, at or near
the Place where the former one was Built, which shall supply the
Resident with 44,000 Gallons of Water per day," and to conduct
the water in pipes through the streets, at such compensation as may
be agreed upon.—From original petition (in metal file No. 8, city
clerk's record-room), endorsed "read April 5th 1785 xc committed
to Ald. Breane Ald. Nichol Mr Phoease" see also M. C. C. (1784-
1785), I: 129. The committee made a report on Feb. 6, 1786 (p. v.).
17
"The Chappel of Assembly was transferred to New York, and with it
the chaplain and his entire chapel furnishings. On the 27th of
March, 1785, Barbé Marbois wrote: . . . 'The establishment of the
Legation chapel at New York will give the Catholics of that
city all the spiritual aid that they can desire.' "—Shea, Life
19
Mr. Jay, the secretary for foreign affairs, having accepted for
his use as an office "the Room above the Common Council Chamber,
instead of the said Chamber," the board directs that it be
fitted up agreeable to his directions.—M. C. C. (1784-1785), I: 127.
It appears doubtful whether Mr. Jay occupied quarters in the city
hall.—See the New York directories, and extracts from his journal,
20
The commissioners for laying out the streets in the burnt part
of the city report to the common council their proposed plan of
alterations. It is approved by the board so far as it relates to the
regulation of Broadway, New Street, and Verleitngen Street with
its continuation to the North River. This decision was repeated on
May 20, 1785.—M. C. C. (1784-1785), I: 126-27, 142. See also
Mr. 1784.
21
The ferries from Whitehall to Staten Island and Elizabethtown
Point having been put up separately for sale at public vendue,
Gosen Ryerson is awarded the ferry to Staten Island for three years
at £20 a year with stated conditions; the one to Elizabethtown
Point goes to Thomas Twiply for the same term at $60 per
annum.—M. C. C. (1784-1785), I: 125-26; see also L. M. R. K., Mar.
III: 947-44 Pl. 174, Vol. III.
A ship intended for the London trade, named the "Governor
Chilton," the property of John Franklin, is launched at the ship-
yards on the East River.—N. J. Gaz. (Trenton), Ap 18, 1785.
On recommendation of a congressional committee, to which had
been referred a memorial of "Samuel Frauncis," congress resolves:
"That the secretary of Congress take a lease from Samuel Frauncis
for his house, now occupied by the public, for the term of two years,
the rate of eight hundred and twelve dollars, and one half of a
dollor a year. [Cf. Ap 23.]
"That a warrant be drawn in favor of the said Samuel Frauncis,
for the sum of sixteen hundred and twenty-five dollars, on account
of the said rent, and to discharge a mortgage on said house.
"That in consideration of the singular services of the said
Samuel Frauncis, and of his advances to the American prisoners,
the sum of two thousand dollars be paid to the said Samuel Frauncis,
on account of the loan office certificates in his hands, and that
they be delivered up and cancelled."—Jour. of Cong. (printed by
Dunlap, 1785), IX: 107. See, further, Ag 25, 1785; Mr 14, 1786.
Frauncis himself had not yet returned to New York as a tavern-
keeper.—See My 8, 1788. See also descrip, of Pl. 167-b, III: 530.
A committee advises the Regents to publish a plan of the tuition
requirements of Columbia College and the Columbian Institution:
"explanatory of their Institution, representing the losses of Colum-
bia College and the deranged state of its funds, and requesting the
aid of the public by voluntary subscriptions to carry their plan into
full execution." It also recommends an application to the legislature
for a grant of aid "by a tax on marriage licenses or any other mode
they may think proper."—Hist. of Columbia Unis. 1754-1904,
64-65. The plan of tuition and discipline was published as The
Statutes of Columbia College in N. Y. (1785).
The legislature passes an act granting to Isaac Van Wyck and
others the sole right of running a stage between New York and
Albany on the east side of the Hudson River. Two stages are to be
provided, for passengers and baggage, each stage to proceed at least
once every week from the respective cities.—Laws of N. Y. (1785),
chap. 31. See Ap 17.
It is ordered by the common council that the ground in the rear
of the bridal house be used for a garden for the bridalweel and alm-
house, and that the stables and other buildings there be removed.
The legislature passes "An Act to appoint the place of holding
the Supreme Court of Judicature of this State, in future, and to
provide for the tenure thereof, and for the criminal and civil
proceedings therein mentioned." Certain times are designated when terms of court are to
be held in New York and Albany respectively. The clerk's office is to be held in New York, and a deputy clerk is to be appointed for
Albany. Court documents are to be removed every six months to
New York.—Laws of N. Y. (1785), chap. 61.
29
The reorganization of the University of Montgomerie Ward and the
Out Ward petition that several sunken lots in "the Me-
dows," which are filled with standing water, may be raised, as they
are a menace to health. The owners are required to fill these lots,
and cause the streets in front of them to be paved.
The common council also orders that the aldermen and assis-
tants of these wards be a committee to regulate Roosevelt, James,
Catherine, and Rutgers Sts.—M. C. C. (1784-1785), I: 133-35.
The common council appoints a committee to estimate the
expense of widening Greenwich St., "to the Southw* of Mr Mc-
sier's . . . to the flat Rock at the Battery."—M. C. C. (1784-
1785), I: 133. An expense of £5,000 was reported on April 20.
Ibid., I: 134.
Isaac van Wyck, Talmage Hall, and John Kennedy advertise that
they, in addition to the Boston stage (see O 15, 1784), they have
"erected Gentile Stage Wagons" to run twice a week from New-
York to Albany (see Ap 4). "They will leave Cape's tavern, New-
York, and Lewis's in Albany, Monday and Thursday Mornings,
precisely at five o'clock, and return Wednesdays and Saturdays.
"They believe their exertions to repair the roads, the "elegance of
their wagons and horses, and the pains taken to establish good
house of entertainment, with the very moderate price of four
pence . . . per mile, for each passenger who shall be allowed to
carry 14 lb. of baggage, will induce the public to give every encour-
gement possible to their undertaking."—N. Y. Packet, Ap 17,
1785. See, further, Je 21.
Chronology: The Reconstruction Period: 1783-1812

Richard Henry Lee writes from New York to George Washington: "... War or peace in Europe, hangs yet in doubtfull balance; both parties arming with assiduity, and nothing determined upon. Mr. John Adams, is sent plenipotentiary to the court of London, and Mr. Jefferson is the minister at Versailles, Dr. Franklin having leave, at his own request, to retire." —Letters of Richard Henry Lee, III: 349.

20° The committee of the common council having reported on July 13 that "a Powder Magazine can conveniently & safely be placed on the Corporation Ground at Inchlam Bergh to the West of the middle Road & to the north of the Farm of the late Benjamin Nicoll Esty," it is ordered that it be erected there, and a committee is appointed to report a plan for the building.—M. C. C. (1784-1817), I: 153, 159. By November the building was ready for use.—See O 5 and 14, D 14 and 21.

21° "Samuel Fraunces, late of the City of New York, innkeeper, but at present of the County of Monmouth, New Jersey, farmer, and Elizabeth his wife," sell Fraunces Tavern to "George Powers, butcher, of Brooklyn," for £1,900.—Liber Deeds, X: 414.

The later transfers of the property were as follows: George Powers sold it to Dr. Nicholas Romayne, April 30, 1795, for £2,200.—Ibid., XLI: 144. Dr. Romayne in turn sold it to John S. Moore, June 24, 1820, for £6,250.—Ibid., LXI: 68. He kept it only a short time, selling it June 22, 1801, to Thomas Gardner, for £7,000.—Ibid., LXI: 439. It was then described as bounded "north by Pearl street, formally Dock street." In the division of the estate of Thomas Gardner, May 31, 1823, it was transmitted to the corpus of St. Malvina Kettelkats, and Mrs. Jane McCarthy. In the division of estate it fell to the latter, who afterward married Count de Dion.—Pelletreau, Early N. Y. Houses, 112-13; L. M. R. K., III: 978; Historic Buildings now standing in N. Y. erected prior to 1800, 20. See, further, Ja 6, 1789.

22° A newspaper of the day remarks, in a humorous article, "We hear the Town of Rockaway [Long Island] was illuminated a few evenings ago, on receiving the news that the Seat of Government was to be removed to that place next session." —Daily Adv., Ap 26, 1789.

23° A letter is read in the common council from Mr. St. John, "Consul of his most Christian Majesty the King of France & Navarre," requesting that the Roman Catholics of the city may be permitted to meet in the exchange until their church can be finished. It is ordered that he be informed that the exchange was injured during the war, and cannot sustain any great weight. The assembly lately conceived they were in so much danger in two instances "when a concourse of people were collected" that they removed to another place for security. It is believed "these facts will probably render the Exchange ineligible to the Roman Catholic community." "The Empress of China," Mr. St. John concludes, "will be requested to represent the same to his most Christian Majesty's Consul."—M. C. C. (1784-1817), I: 137.

A leading historian of the Catholic Church relates the following sequel of this incident: "The one to whom the Catholics of the great city owe most is Hector St. John de Crèvecoeur, Consul-General of France. . . . In their name he applied in April 1785, to the city authorities for the use of the Exchange on Broad Street, a building then entirely unoccupied; but the Common Council refused to permit the Catholics to assemble there on Sunday. St. John de Crèvecoeur presented the act as an indignity to himself and the Catholic body. Roused by him, the Catholics of New York resolved to secure ground and erect a church. A law had been passed for the incorporation of religious societies, and, under its provisions, St. John de Crèvecoeur, Joseph Silvester, James Stewart, and Henry Duffin were incorporated on the 10th of June, 1785, as 'The Trustees of the Roman Catholic Church in the City of New York.' There was some difficulty in obtaining a site, but during the summer Father Whelan, guided, it is said, by Mr. Silva's judgment, bought a lease of five lots on Barclay Street extending to Church Street. A carpenter's shop standing on this ground became a temporary church building for the Catholic body on New York Island. In August, Trinity Church, which owned the fee, encouraged the little flock of Catholics by agreeing to sell them the reversion on easy terms, and more than fulfilled the promise."—Shea, Life and Times of the Most Rev. John Carroll (1888), 266-67; Catholic Encyclopedia, XII: 21 (title "New York"). See, further, O 5, 1785.

Nicholas Ray, of London, in a letter to the corporation of the city, offers "his Services in purchasing the Iron Work and other materials necessary to repair the ruins wrought by the two great fires that occurred in New York during the war. The common council passes a resolution that thanks him sent him "for his benevolent Intentions," but that "the deranged State of the Corporation Revenues in consequence of the heavy debt contracted by their predecessors in office previous to the late War is such as to prevent their acceptance of his kind offer."—M. C. C. (1784-1817), I: 136.

The common council directs the chamberlain to study the proposals "for sinking & build[ing] a Pier in the North River opposite the Lots lately sold near the Bear Market."—M. C. C. (1784-1817), I: 138. Daniel Phoenix, acting for the corporation, advertised on May 23 for bids for "sinking the blocks and building the bridges, to complete the Basin, near the Corporation Dock, at the North River."—N. Y. Packet, May 22, 1785. Elias Burgess contracted to build the wharf and bulkhead for £400, and the common council accepted the proposal.—M. C. C. (1784-1817), I: 146. See D 28.

The common council orders that a public pound be kept by Richard Varian at the Bulls Head Tavern in the Out Ward.—M. C. C. (1784-1817), I: 137.

Wm. Dodge receives £300 for work at the Bridgewater fence, and Embree and Shoutwell (see F 14, 1789) £1,912 16s. for sundries at the Bridewell.—M. C. C. (1784-1817), I: 178.

Anthony Post is paid £60 for repairs to the city hall.—M. C. C. (1784-1817), I: 138. This is one of many payments for this purpose at this period, due to its poor condition (see S 22, 1784), as well as its expected occupation by congress (see D 22 and 24, 1784). More in detail, a letter from Thomas Gom cuy to the board of the city of Washington, was reply to the board's address of Dec. 23, 1784 (q. v.). It is entered in full in the minutes, with the order that the address and answer be published.—M. C. C. (1784-1817), I: 139-40. Washington's letter is preserved in the N. Y. Hist. Soc., but remains the property of the city.—See N. Y. H. Quart. Bull., II: 38 (JI, 1917). See also Addresses of the City of N. Y. to Gen. Washington, with his Replies. The McCrady登陆 in New York that Bishop Seabury of Connecticut, "the first personage consecrated for the government of the Episcopal Church in North America," is on his way from London to New London, his residence, after having been consecrated Nov. 14, 1784 (q. v.)."—Loudon's N. Y. Packet, My 5, 1785. Regarding the validity of his consecration by the Bishops of Scotland, see ibid., O 31, 1785. The first ordination conducted by him in the state of New York was that of John Lowe, a Virginian, on Nov. 3, in St. George's Church, Hempstead, L. I.—Ibid., N 10, 1785.

Capt. Andrew Moodie reports to Gov. Clinton the number of pieces of ordnance remaining at Fort Washington, Fort Tryon, the "baruer gate," and Fort George. For facsimile of his returns, see Man. Com. Coun. (1858), opp. p. 480.

Shea, Life and Times of Mr. John Carroll (1888), p. 271.

Shea, Life and Times of Mr. John Carroll (1888), p. 271.

Shea, Life and Times of Mr. John Carroll (1888), p. 271.

Shea, Life and Times of Mr. John Carroll (1888), p. 271.
Joseph Corre announces that at the "Confectionary and New York Hotel," 52 Smith (William) St., he supplies "anything in the Confectionary way." He also has "genteel rooms" for lodgers. Besides serving "Ice Creams" every day, he deals in pickled oysters, portable soups, etc.—N. T. Packet, May 30, 1875.

The work of rebuilding the Wall Street Presbyterian Church is completed at an expense of between $6,000 and $7,000.—Miller, Memoir of Rev. John Rodgers (1813), 249. The interior finishing and roof cost $5,000; the cupola, columns, rear and fences cost $500.—Proc. of the Trustees (Session Book).

Henry Kennedy announces that he has taken "the well-known Mead House, the sign of the two friendly brothers, late in the occupation of Mrs. Montanye, situated in Great-George's Street, between Murray and Warren streets." He has supplied himself with an abundance of mead and cakes, which "cannot fail to prove inviting to the Fair Sex; who, as a further inducement, will again be pleased to point out to themselves the very eligible and romantic situation of the Gardens."—N. T. Packet, Je 6, 1785. It was at No. 317 Great George St., near the bridewell.—Ibid., D 26, 1785. John Amory, and later John Kirk, had been innkeepers here after Mrs. Montangep.—See S. 17 and O 23, 1781. See, further, F 6, 1786.

An act of incorporation is secured for the Trustees of the Roman Catholic Church in the City of New York: this was accomplished through the efforts of the French consul, Hector St. John de Crevecœur. An unexpired lease of lots at the south-east corner of Barclay and Church Sts. was bought from Trinity corporation on which to build a church.—Catholic Encyclopedia, XI: 21 (title "New York."). See also Ap 30 and O 5.

A subscription is soon to open for erecting an organ in St. Paul's Church.—N. Y. Packet, May 13, 1785.

A petition of "Isaac Sears of this City Merch." is read in the common council, "setting forth that he, by certain Indentures of Lease & Release duly made & executed by Thomas Arden & Mary his Wife Dated the 21st & 39th Days of Feb' 1770 became & still stands seized in fee simple of the Parts & Shares divided & undivided of the said Thomas Arden in all that certain Piece of Ground situate in the City of New York bounded Westerly in front by the Broad Way Southwesterly by the Green commonly called the fields Easterly by the Ground belonging to this Corporation & occupied with the Poor House & Northwesterly by other Ground of the said Corporation of which Piece of Land John Harris the Elder was seized at the time of his Death—That the said Petitioner & the said Petitioner is willing to release the same to this Corporation on their ordering him to be paid the said purchase Money of eighty Pounds with lawful Interest.

"Whereupon it was agreed by the Board to accept of Mr. Sears's Offer & Ordered that the Clerk prepare a Deed accordingly."—M. C. (1784-1813), I: 145. The release was delivered Oct. 19, 1785 (q. 7.).

The commissioners of the almhouse present to the common council a plan "for enclosing the Ground commonly called the fields," and it is resolved that they may proceed with the execution of the design.—M. C. (1784-1813), I: 144. Such enclosure may be said to mark the beginning of "the Park."—Man. Com. Com. (1805), 545, 660. See also descrip. of Pl. 54-b, I: 416. See, further, Ag 24, 1818.

The common council having received petitions for leases of the Common Lands, it is ordered that one of the city surveyors lay out the vacant lands belonging to the city, between the Point and Bloomingdale Roads, into lots of about five acres, numbered, and leaving a middle Road between the said two Roads.—M. C. (1824-1831), I: 145; Black, Municipal Ownership of Land, 25-26. See also D 21.

There is advertised to be held "in the Garden of the Academy in Broad-street," on June 23, "A most elegant Exhibition Of the Small Italian Shades, Where a variety of Scenes . . . will be exhibited. . . ."

"An addition of a Fort, which will answer the salute of several vessels passing by. The engagement of the ships shall last until one of them is entirely dismantled and sunk; after which the Conquerer shall re-enter the harbour, and be saluted by the Fort. The Sea shall be represented in motion."
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

June

21

The large Chinese Shades shall exhibit a great variety of scenes of the most pleasing aspect; and in some of them the actors will vault a prodigious height up and down.

22

Then will be a grand Illumination, upon Pyramids, to prevent any kind of accident by fire.

23

A Grand Band of Music will perform in the Garden, during the whole time; and the Dancing Room opened. . . .—N. T. Packet, June 23, 1785 (N. J. Hist., S. 31).

July

2

The first convention of the Protestant Episcopal Church in the state of New York is held in New York City.—Wilson, Mem. Hist. of N. Y., IV: 624; Div. A Hist. of the Parish Church, III: 103.

9

The proprietors of the stage-wagons that ply between New York and Albany (see Ap 17) advertise to make the journey in two days, the whole time, and with all the conveniences of home journalism. They mention several stopping-places for the run. The fare is reduced from four to three pence per mile "during the continuance of good roads."—N. T. Packet, Je 23, 1785. This schedule was altered, Aug. 23, to run the stages three times a week; that is, to leave each terminal on Monday, Wednesday, and Friday, and return Tuesday, Thursday, and Saturday.—Ibid., Ag 25, 1785. Again, on Oct. 3, for "the ease of the Passengers," the trip from New York to Albany was to be performed in three days, leaving Monday and Thursday; and the four-cent-per-mile charge, "agreeable to Act of Assembly," was restored.—Ibid., O 13, 1785.

10

Elizabeth Holt resigns the proprietorship of The New-York Journal, and the General Advertiser to Eleazer Oswald (see Mr 7) and Andrew Burnet. The new publishers change the name of the paper to The New-York Gazette, or the Weekly Register.—Early Newspapers, II: 442; Brigham, A. A. S. Proc. (1917), 448. See Ja 18, 1787.

15

Notice is published that, after July 1, the "tea-water men" will supply water at "six-pence per hhd."—N. T. Gauette, Je 28, 1785 (in N. J. H. S.).

17

The standard of the American dollar (to contain 373 64/100 grains of silver) is established as the unit of United States currency.—Winso, VII: 70. For a history of coins and currency in New York, see Wilson, Mem. Hist. IV, chap. 10; Crosby, Early Coins of Am. (1875), 286. See also Chronology, IV: 572-73.

21

The French church steeple is struck by lightning.—N. T. Packet, Jl 14, 1785; M. G. C. (1784-1813), I: 152.

24

Edward Meeks submits a bill to Trinity Corporation amounting to £32,914, for the cost of an iron fence which he has set up around the churchyard. The items include "Iron Bars and pikes for fifty four pannels," also "52 Tolps."—From the original bill in N. J. H. S.

30

Christopher Colles, in a petition to the common council, urges prompt settlement of demands which he has made upon the board, "on account of a matter which he flatters himself will be of considerable importance to the public in general, & to the City in particular, as well as private advantage to himself." He states that his distresses are of such a poignant nature, as compel him to request some, (the small), yet present assistance.—From original petition (in metal file No. 8, in city clerk's record-room), endorsed "read & filed 10th Aug. 1785 £100 to be advanced to Mr Colles," M. G. C. (1784-1813), I: 160. See N 23.

Aug.

10

The president of congress, at the request of that body, having been paid on July 20 to the mayor that the debates of congress are frequently interrupted by the passing of carriages, and that congress desires to order that chains be provided for preventing such interruptions during their daily sessions, the common council expresses its willingness that chains be drawn across the streets from the north-east, south-east, and south-west corners of the city hall.—M. G. C. (1784-1813), I: 157; Letters of RichardHenry Lee, II: 376.

13

The commissioners of forfeiture, on attaining of James De Launay for the letting of ground between 6th Ave. and Hudson River, to John Somerdyke.—Book of Forfeited Estates, 78. This property became known as the Somerdyke Farm. Cf. descrip. of Pl. 36-b, I: 279. See also Ag 16, 1784.

15

The common council orders that the vacant ground back of the barracks be used for the burial of the dead from the almshouse and bridewell.—M. G. C. (1784-1813), I: 158.

16

Morgan Lewis purchases "Mount Pitt" from the commissioner of forfeitures, the original owner, Thomas Jones, having been attainted.—Liber Deed, XXXIII: 36. Lewis advertised it for sale on Feb. 24, 1786 (q. v.). See also descript. of Pl. 62, I: 439; L. M. R. K., III: 951; and 1767.

An item of New York news states: "A Correspondent, says he has hopes, to flatter himself and all the friends of the Drama, that we shall once more have the benefit of that pleasing amusement in this city, and that foreigners of distinction among them may no longer complain of our want of public entertainment; he is surprised at the indifference of the Tory gentry, who it seems in order to ingratiate themselves with some of the citizens are using their influence, however inconsiderable it may be, to prevent any performances of that kind, but it is to be hoped, that those gentlemen, who have shared all the perils of the war, and bravely danger in its most grisly forms, and by their valorous conduct have acquired the most distinguished character be deprived of partaking of the enjoyments which that innocent and rational amusement affords."—Penn. Jour., Ag 13, 1785. See Ag 12.

A description of the frequenters of the Battery walk, on a Sunday evening, is published.—N. T. Jour., Ag 11, 1785.

12

The John Street Theatre is opened "by Messieurs Hallam and Allen, after a long absence from a country, where former residence and attachment have entitled them to the distinction of citizenship. The entertainment of the evening, which received unbounded bursts of applause from a most polite and numerous assembly of both sexes, was an admirable collection of moral characters, happily selected (by the judicious taste of the managers) from the most graceful and accomplished works that have been produced, and were displayed in a manner that bestowed the highest honour on the several authors; and to the reflecting mind gave the finest lessons of instruction, pleasingly blended with amusement."—Penn. Jour., Ag 17, 1785.

The entertainments thus begun, announced as a course of lectures commencing with a prologue and ending with a pantomime, were given by only a small part of the American Company.—Ireland, Acc. of the N. Y. Stage, I: 62, where the date of reopening is given erroneously as Aug. 24. Having been encouraged by the public, the regularly installed managers, Hallam and Henry, brought the main body of their performers to New York in the autumn and began a season of legitimate drama on Nov. 21, 1785 (q. v.). See also Ag 24 and S 20.

15

"Veitinis," in a letter to the press, observes "that it is a general complaint that in this great city and its environs there is not any spot where its inhabitants can take exercise for health and amusement. . . . The size and consequence that this town must one day arrive at, ought strongly to impress the necessity of attending to this object. In this view the Battery naturally presents itself as a subject capable of vast improvement; were the margin of this ground laid out with judgment, planted with a row of trees, and furnished with seats, from which we could command one of the finest harbours of the world. There is also another space of ground, which calls loudly for the hand of improvement—now a public nuisance, from which the inhabitants are infested during the summer season, with continual clouds of stinking dust. The ground I mean is the Fields.—This place laid out with judgment and taste, would become a blessing to the inhabitants of New York, and an ornament to the city." He describes the methods in vogue in Great Britain and Ireland for obtaining plans for public improvements.—N. T. Packet, Ag 15, 1785.

The city treasurer, Daniel Phoenix, having submitted a "Representation" relative to an allowance for his services, the common council orders "that five Per Cent be allowed the Treasurer, for the whole time of his being in Office, in full Compensation for his ordinary as well as extraordinary Services relative to the ordinary Revenues of this Corporation."—M. G. C. (1784-1813), I: 161-64. The original "Representation," thus briefly alluded to in the minutes, is a review of "what was formerly the practice with respect to the County business." It states:

"The Chamberlain had until His Direction the Care and Collection of duties between the Corporation and Revenues only. The Taxes were paid into the Hands of the Church Wardens who were Chosen Annually by the freeholders, and were properly Church officers, appointed in consequence of an Act of Assembly Granting a Support to the Ministry in this City. The whole of the Taxes were paid into their Hands, and they had the Laying out of the money appropriated to the Support of the Poor House, which was the most considerable part of the Tax.—The Water & Lamps & Roads was paid into the
Hand of the City Treasurer by those Gentlemen. No Specific Salary or Commission was Assigned them for this Business, they derived their Emolument from the profits made on the Supplies, and Surely no person Can say they derived to benefit from their appointment that they did not consider the Extent of their profits. The money for Watch & Lamps was paid out of the City Treasury by an order of Common Council, and on this the Treasurer had a Commission. I am well informed from a Gent. who was a Member of the Board in Mr. Crugers day That he was allowed 5 p. on that money for which I could produce the Testimony of Gent. of unexceptionable Character.

At present all public Monies are paid into the City Treasury, and are Subject to the order of Com Council. The Business of this office is increased beyond any former time, and the Disorder State of the Corporation affairs, on the Evacuation of this City, has rendered it Still more Arduous, So that the person Executing this office Must of Necessity devote a Very Considerable time thereon, in order to do Justice to his appointment. The amount[2] of Corporation Revenue in a Common Year is about £8,500. Of this it may be supposed to fall Short by Remissions & Losses £1,500, which will reduce it to £6,500. This Sum at 5 p[2] is £132-10- for which a Set of Books are to be Kept—Accounts to the amount of near 450 to be drawn out and the amount of revenue above mentioned to be Collected from many different persons,—An allowance Sufficiently Sufficient to Compensate a Clerk.

Besides this there is the business of the Taxes—The Accounts are to be Kept with the Collectors of the several wards & Districts—Settlements to be made under the Inspection of a Committee of this Board—and the Sums appropriated to be Carried to the Credit of Each Respective Account, can it be in reason Supposed that all this Business can be done without a Boarding Accountant? The office of Treasurer is an appointment of Great Trust and under its present Circumstances rendered more Important. It has been the practice of the Corporation to appoint persons of Respectability & Credit, who only Can give Such Security as will Justify the appointment, but is it worth the attention of any person to undertake all this Business for so Inconsiderable a Sum As the Allowance for Corporation business is So Small it remains with the Board to make Such allowance out of the Publick monies as Will make it worth the Labour and Attention it requires. It appears from an Act of Assembly which has been mentioned that an allowance was formerly made of 6d in the pound to County Treasurers, and it Can be proved that John II Cruger was allowed 5 p[2] on the Publick monies paid into his hands by the Churchwardens—As to this The office of Com. Coun. in the City Corporation is performed by the old Books that he was allowed the Same Sum of 5 p[2] on the Taxes of this City—

"Can any Gent[2] then Consider it Unreasonable that a Adequate Compensation should be made for those Services at the present day—The board have Thought it Necessary to advance the price of Cartmen and others in their Laws for regulating the prices of their Services, and Does not the Circumstances that Induced them to make those advances in their Case, Exist with respect to the Treasurer." He adds, in closing, an allowance "of 2 p[2]." From the original MS., in city clerk's record-room.

The "old Magazine in the Fort," which measures 28 by 48 feet, is found to be "perfectly safe & convenient & that by a little airing will be very dry."—M. C. G. (1784-1814), I: 162. It is evidently intended for temporary use while the new one at "Jucklan Bergh" is being built.—See ibid., I: 157, 159.

A item of New York news reads: "On Friday last [Ag 19] Messrs Hallam and Allen, the gentlemen who for some time past have entertained the town with their agreeable, humourous, and moral lectures [see Ag 12] paid into the hands of the commissioners of the United States, One Hundred Dollars towards the maintenance and support of its indigent inhabitants. When the talents and labours of the ingenious are employed, as well to reform the manners as to the humanitarian purpose of softening the rigours of misfortune, and feeding the poor and needy, they certainly deserve not only encouragement, but applause."—Penn. Jour., Ag 27, 1785. For the attitude of the common council toward such donations, see O 14.

"A Citizen" addressed the following op-ed to the city officials: "It is remarked by the citizens, that the Tea Water, with which this city is supplied, grows worse every day, so that the common pump water, used only to scrub houses, etc. with, is now preferred in cooking to our Tea Water. The reason is very obvious,—let any one view the pond, which is the spring and source of that pump, and you will find it to be a very sink and common sewer. It's like a latrine every day with whites, and blacks, washing their clothes blankets and things too nauseous to mention; all their suddens and filth are emptied into this pond, besides dead dogs, cats, etc. thrown in daily, and no doubt, many buckets from that quarter of the town. The pond being so very near the pump has no distance to filter through the earth, and, it is more than probable, runs through a considerable canal under ground directly to the pump. Two watchmen would be sufficient, with proper letters and penalties to prevent any person from washing or throwing any filth in this pond. A very trifle of a tax would pay them, and in 6 or 9 months our water would be as good as it was before the war."—N. Y. Jour., Ag 25, 1785.

John Francis advertises that "he has taken the house No. 3 in Great Dock-street, near the Exchange, nearly opposite to the War-Office, where he desires to have a Boarding House. The house is built for the purpose to the extent of the true American."—N. Y. Packet, Ag 25, 1785. He moved from here into the well-known Fraunces Tavern, in 1789 (q. v., My 27).

Congress passes a resolution of appreciation for the "early, unsolicited, and continued labours of Mr. Thomas Paine, in explaining and enforcing the principles of the late revolution by ingenious and timely publications upon the nature of liberty and civil government." They would be sufficient, with proper letters and penalties to prevent any person from washing or throwing any filth in this pond. A very trifle of a tax would pay them, and in 6 or 9 months our water would be as good as it was before the war."—Acts Passed at the First Cong. (Phila., Francis Childs, 1795), 430. See also Ja 9, 1776.

A section of the city called "Canvas Town" (see Ag 17, 1784) comes into unpleasant notoriety, as the resort of disagreeable people and a centre of crime. For instances of this character, see N. Y. Gazetteer, Ag 26, 1783; N. Y. Jour., S 21, 1786; Daily Adv., D 4, 1790. Its situation, however, appears under that of Broad St.—N. Y. Gazetteer, Ag 16, 1786. It is thus described: "Canvas Town.—The place so called was made after the great fire in 1776. It lay toward East river, and from Broad street to Whitehall street. It was so called from the temporary construction of the houses, and their being generally covered with canvas instead of roofs. Very few and desolate persons were generally their tenants, and gave them their notoriety and fame."—Man. Com. Coun. (1796), 179, citing Watson's Annals, 172. See also S 21, 1776; Ji 3, 1797.

John Fitch-edicts the attention of congress to a model of his steamboat. His letter is accompanied by favourable recommendations from several prominent men. His application was referred to a committee, which never reported upon it.—Westcott, Life of John Fitch, 126-29. See Ji 27, 1786.

Listed in the account of the financial condition of the city's expenditures and receipts, covering the period of one year and eight months from Dec. 26, 1782, shows total expenditures of £25,184, the largest items being £7,517 for repairs to public buildings, etc. and other contingent charges, £5,027 for the maintenance of the poorhouse, £4,500 for the watch and lamps departments, £3,470 for finishing and supporting the prisons of the bridelaw, and £1,824 for interest on bonds due before the war. The total receipts are £24,452, of which £9,341 have been received from a tax of £10,000. Quit rents and ground rentals, including arrears during the war, have yielded £7,376. Lots at the North river and Peck Slip have been sold for £5,171. The excise has brought in £2,000; the docks and slips, £368; ferries, £915, and house rent, £410. For these and other particulars, see Man. Com. Coun. (1859), 511-12.

Vandewater's Tavern (see Mr 14, 1759), opposite the Brick Meeting, in Nassau St., was frequently noticed in the news after the Revolution.—See N. T. Packet, S 1, 1785; N 6, 1786; S 7, 1787; Ji 4, 1788. In 1789, it became known as Aarson's Tavern.—See Daily Adv., Ap 27, My 12, 1789; N. Y. Packet, O 6, 1789; Ja 19, and Ap 22, 1790; Ja 6, 1791. See also Smith, N. Y. in 1789, 120-21.

Henry Remsen, being interested in the undivided real estate of his father, Hendrick Remsen, deceased, which is situated in the Dock Ward "between the Long Bridge and the Albany Pier," and part of which "was occupied by the Enemy as a Coal Yard" during
The war, petitions the common council for a rebate of quit rent paid to the city. He still holds the house and has been informed by the common council that an Act to exempt all the Citizens who have been in exile during the war, from the payment of quit rents upon such part or proportion of their real property," from which neither they nor their agents have received rents, profits, or income during that period.—From the original petition in box No. 6, in city clerk's record-room.

The common council grants permission to "the Neighborhood of the Corporation Dock at the North River to erect at their own expense a Bulkhead on the South side of and projecting into the Slip opposite Vesey Street Tea Feet; to begin opposite the North West Corner of the Market & to run out in an exact Line, as far as the first Bridge of the said Dock or therafter."—M. C. C. (1784-1781), I: 106.

The common council granted permission to erect a "New Dock Street Theatre."—Theatrical Progress, I: 1786.

The New-York Daily Advertiser (see Mr T) is changed to The Daily Advertiser, Political, Commercial, and Historical.—Early Newspapers, II: 417. See O 27.

Notice is published of a new line of stages, "to start the 7th instant, from the Morning Star on Staten Island, opposite Bergen-Point, every morning at four o'clock, (Sundays excepted) . . ." The route is from Paulus Hook to Philadelphia. "The Staten-Island side of the same every day at the White-Hall Dock, to convey those passengers to the Morning Star, who prefer going by water. . . ."—T. N. Gazetteer, 20, 1785 (in N. J. H. S.).

"The project of erecting a [Roman Catholic] church at New York [see Ap 30] was advancing by the energy of St. John de Crevecouer and the patronage of Don Diego de Garduqui. Father Whelan and the trustees of the congregation undertook the erection of the edifice with courage, adapting a plan beyond their actual means, but hopefully looking forward to future progress. It was to be a handsome brick structure, with a square tower, forty-eight feet front by eighty-one in depth. They addressed petitions for aid to the Kings of France and Spain, the latter forwarded through Don Diego de Garduqui, who furthermore consented to lay the cornerstone. This ceremony took place on the 5th of October, 1785 . . . . The Spanish minister, in conformity with the desire of the congregation named the church St. Peter's. They were not, however, able to proceed with the work at once, but continued collecting funds for the purpose in New York and Europe." Meanwhile, as has already been noted (see Ap 30), a carpenter's shop which stood on the leasehold property which they had acquired on Broadway Street, was fitted up as a temporary chapel—Shea, Life and Times of the Mayor of New York, I: 1785, O 10, 1785: Eccl. Rec., VII: 1451; L. M. R. K., III: 916. See further, My 26, 1786.

Thomas Pool, in a petition to the common council, states that "he proposes for a few weeks to exhibit feats of horsemanship," and, as he cannot procure "any place convenient for the purpose but the bowling green," he asks for the use of it. He adds that he has been in his country's service during the war, and suffered great hardships and cruel imprisonments in the provost in this City, where he was confined in irons in a dungeon 235 days without bed or fire, and daily tormented by the Provost-marshal—the consequence of which was that he was deprived of the use of his limbs sixteen months."—From the original petition, in file No. 8, city clerk's record-room.

The petition was rejected.—M. C. C. (1784-1781), I: 173. Pool was probably the first American to give public performances of this character, having first exhibited in Philadelphia on Aug. 29, 1785, for fuller account of which see Greenwood's The Circus (1909), 66 et seq. See also S 27, 1786.

Several proprietors of lands on Mulberry St. and in that vicinity state in a petition to the common council that improvements begun and erected on streets never properly regulated; that "this Street is situated at the Foot of a very high Hill (the summit of which overlooks the Houses on the North East Side of the Street) and will . . . require to be raised several Feet before any considerable Improvements can be reasonably expected in that Part of the City." They propose that the street be so regulated "as to give the Water a gradual Descent from the House of Mr Thomas Arden, so as to carry it by Roosevelt Street into the East River." They also ask that they understand that their wishes have been here consideration by the common council, who plan to fill up Mulberry Street by digging down Mott Street, which is just above and parallel to it. Among the signers of this petition are Margaret Livingston, William Moore, Abraham Brevort, and Peter Schermerhorn.—From the original petition (in metal file No. 8, city clerk's record-room), endorsed "read 18th May 1786." See M. C. C. (1784-1811), I: 206.

Samuel Kip. In a bill of this date, charges the city £712 for "Landing & Carting" through his farm 57,711 brick, 2,500 pantile (curved tile for roofing), and 100 loads of stone.—From the original bill (in metal file No. 12, city clerk's record-room), endorsed "read 25th May 1786." See M. C. C. (1784-1811), I: 206.

The city treasurer is ordered to pay Thomas White and other contractors the sum of £2012 for apprehended & convey 103 Vagrants to Bridewell @ each.—M. C. C. (1784-1811), I: 176. On Nov. 6, 1786 (q. g.), the price paid for each vagrant was lowered. They were to be transported by the City Varsity passenger boat "that one day or after the other, a Vagrant shall be repaired by the Corporation to cause twenty shillings, or as far as the Company shall direct upon imprisonment and any other Penalties; That among these a Play House (Theatre) however regulated must be numbered, while under no restraint it may prove a fruitful source of Dissipation, Immorality and Vice."—M. C. C. (1784-1811), I: 176. See N 21, D 26.

James Parker announces that the "New-York and Philadelphia Stages" will hereafter pass through Bordentown to Perth Amboy instead of stopping at the route from Bordentown, including Trenton, Princeton, Kingston (one wagon going by way of "Cranbury"), and New Brunswick. At Perth Amboy, passengers and goods will be taken from Parker's wharf and storehouse "on board a commodious boat."—T. N. Packet, 13, 1785.

A company of players, who had opened the playhouse without obtaining a license, present £50 to one of the commissioners of the almshouse for the use of the poor. The common council orders that the money be returned, as their playing without license "is a thing unprecedented and offensive." They further resolve "that while so great a part of this City still lies in Ruins and many of the citizens continue to be pressed with the Distress brought on them in consequence of the late war there is a loud Call to Industry and Economy, and it would in a peculiar manner be unjustifiable in this Corporation to countenance or assist an act of this kind; That among these a Play House (Theatre) however regulated must be numbered, while under no restraint it may prove a fruitful source of Dissipation, Immorality and Vice."—M. C. C. (1784-1811), I: 176.

John Stagg is paid £500 "towards the Powder Magazine erecting at Enclenhamb."—M. C. C. (1784-1811), I: 175. On Oct. 16, James Blackwell was paid £50 for stone used there.—Ibid., I: 181. See Ap 20.

In a petition to the common council, Gozea Ryvers, Thomas Quigley, and others, state that they pay the city "a large sum of Money, for the benefit of The Ferys; from Wite Hall, To Staten Island; and from Moors Corner, To Elizabeth Town," expecting them to be kept in repair; but that the "Docks, and Ferry Stairs, are so much Injur'd;" by the late storms, that Horses, Can't be taken off from Wite Hall, only at high, or near highwater. They contend that they themselves are obliged "to keep good boats, and give good attention," and ask the same consideration from the city. They further represent that "The late slaughter-house, at Moors Corner is a great Obstruction, to the Ferry," and that it has become a "nuissance," by next spring.—From the original petition (in metal file No. 8, in city clerk's record-room), endorsed "Aldm Wool & Mr Van Dyck to repair Stairs at Moors Dock;" and see M. C. C. (1784-1811), I: 185.

The clerk of the common council produces to the board a "Release executed by Isaac Sears Esq' & Sarah his Wife to this Corporation of a Part of the Ground whereon the Bridewell is
The Crop of the King of Great Britain, the Board attended by the Sheriff & Clerk with the Marshalls & Constables waited on His Excellency the Governor with the Compliments of the City on the Occasion. —M. C. G. (1784-1811), I: 187.

Adams demands that the British surrender the frontier posts of the U. S., which the British held while seeking payment of debts due her. —N. Y. Visitor, VII: 274.

In a letter written at New York on this day, David Ramsay, after giving a general account of conditions in the colonies, says: "I have made some inquiry into the State of the College here & I hear a very good account of it. . . . The teachers are able & attentive & the College is under the government of the Gentlemen of the city whose sons are pupils & who will for their own sake take good care of the institution." —From MS. in Coll. of autograph letters, etc., 1650-1783, in Columbia University Library.

David Franks advertises that "The New-York Directory" will be "put to press in a few Days," and gives a list of its contents. The price will be "about Six Shillings," four to be paid on subscribing and the balance on delivery. —N. Y. Gazetteer, D 6, 1785, and J 3.
"New York, the capital of the State, enjoys one of the most beautiful locations in the world.... The town is irregularly built: nevertheless there are beautiful streets and sidewalks. The promenade at the quay offers the double advantage of a brilliant perspective and a place for fresh air. There is a town hall, where formerly the Congress met; it is not a remarkable building. The houses are built of brick. There are three Dutch Reformed churches, four Presbyterian, three Episcopal, one Episcopal, one Lutheran, a Calvinist church, a Roman church, an assembly of Quakers, two Ahebaptists, and one synagogue...."

Sometime during this year, a memorial signed by most of the leading citizens of New York was addressed to the legislature protesting against the "Evils which threaten our City and State." The "Theatre, lately opened in this City," was condemned as an evil "that has an unfriendly aspect on the Virtue of our Citizens;—especially on that Frugality and Oeconomy which are so essential to the Prosperity and Honor of our Country if not to the existence of us hard earned privileges which it is considered by many worthy Persons of all religious Denominations, as highly injurious to the interests of true Piety wherever it is countenanced." The large number of taverns is also condemned.—Emmett Coll., item 11187. See J 4 16 and 21. The legislature seems to have taken no action unfavourable to the theatre, for performances continued to be given.

In this year, in Massachusetts, the machinations of demagogues and malcontents, who argued that all property which joint resistance had protected in the Revolution was equally the subject of division, found a leader in Daniel Shays, who headed a rebellion in the Connecticut Valley.—Winson, VIII: 229-30. See F 24, 1787.

Before the revolution, and even sometime afterwards, William street was the great mart for dry goods sales, and chiefly from Maine land up to Pearl street. This is so. A "Mr. Griffiths" ads to have a public ball every fortnight "in his Dancing-School, the City Assembly Room, in the Broadway."—N. T. Packet, J 3, 1786.

The Chamber of Commerce receives a memorial asking its aid for a project to open "an intercourse with the interior parts of the United States, by an artificial inland navigation, along the Mohawk River and Wood Creek to Lake Champlain," and answers that its members entertain the "highest ideas of the Utility of the scheme, wishing it may meet with every possible success, but in their incorporated capacity, owing to the looseness of their funds, 'is out of their power to lend him [the memorialist, probably Christopher Colles].—See N 23, 1785] any aid." This appears to be the first suggestion for the Erie Canal.—Bishop, A Chron. of 150 Years. The Chamber of Commerce of the State of N. Y., 1768-1868, 42.

1786

The advertisement continued until Feb. 10, 1786. This was the first directory of New York City. See, further, F 14, 1786. Peter Lacour advertisement "a School of Drawing, for Architecture, Portraits, Ornaments, Landscapes," etc.—N. T. Gazetteer, D 6, 1785. Cf. O 11, 1791. Lacour's drawing of Federal Hall, showing Washington's inauguration, which was engraved and printed by Amos Doolittle, is reproduced as Frontispiece I, Vol. III. The City Surveyors presented to the Board a Plan of the Ground belonging to this Corporation at Inclham Bergh in which the same is subdivided into Lots." It is ordered that the plan be referred to a committee for examination and that they give their opinion of the manner in which the lots may be disposed of for the best advantage of the corporation.—M. C. (C. A.) Feb. 2, 1786. "That the centre Road shall be 100 feet wide instead of 66 feet in the same is laid down," and "That a part of the Lots laid out on the new Map be sold in fee simple if a reasonable Price can be obtained." It was decided to procure a law for this purpose.—Ibid., I: 199.

The common council orders "that the Keeper of the public Magazine do immediately remove all the Gun Powder (except 50 Casks) from the old into the New Magazine."—M. C. (C. A.) (1784—1811), I: 191. This appears to mark the completion of the new building.—See Ap. 20.

A news item reads: "A correspondent observes, that the infatuation which possesses many of the people of this state, for Theatrical Exhibitions, is truly alarming. Some were led to imagine that the friends of the drama, were principally confined to this City; but alas! the delusion has spread to the remotest part of the United States; and, it is told! the honest, sober Dutchmen of Albany, who were once disdained by industry and a laudable parsimony, are now plunging into that very species of luxury and folly, which stamps upon the metropolis, an indelible stigma.

But, it is still more observable, and wonderful to relate, that even the Fathers of that ancient city, have sanctioned the establishment of a Public Theatre, by granting their permission to the Players.—It would be doing injustice to our Magistrates, not to mention here, that though it was not in their power to prohibit, yet they have never extended their authority so far, as publicly to license the opening of the Theatre; and if common fame can be credited none of them have countenanced the Comedian, by attending their exhibitions.—An example worthy the imitation of all ranks.

"When we find this daring vice encouraged in the first, and patronized in the second city of the state; and rearing its ensigns in each corner thereof, is it not High Time for the considerate inhabitants, to step forth and oppose the increasing evil, with firmness and resolution, 'tis be it too late."—N. T. Packet, D 26, 1785. In 1786 (p. 52), one of the New Yorkers was prosecuted to the legislature against the theatrical performances.

The festival of St. John the Evangelist is celebrated by the members of the Mason's Society "at the house of Brother Cape" (City Tavern, 216 Broadway).—N. T. Packet, D 26, 1785.

A payment of £200 is made "for Building a pier or Basin at the North River" (see Ap 90); and £1000 for "stone and wood for the Dock at the North River."—M. C. (MS.), VIII: 376.

1786

In this year, a census was taken under a provision of the "Articles of Confederation," which had reference to an equalization of the expenses of the late war, "in proportion to the whole number of whites and free citizens and inhabitants of every age, sex and condition, including those bound to servitude for a term of years, and three-fifths of all other persons not comprehended in the foregoing description, except Indians not paying taxes." This census was to have been taken triennially, but was suspended by the decennial census of the federal government, which began in 1790 under the provisions of the Constitution of 1789. This census of 1786 shows the population of the city was 23,416.—Statutes of Population of the City and Co. of N. Y., Dec. No. 11, Bd. of Supervisors, 1866, pp. 14-15. The number of houses in the city in this year was 3,340.—Am. Mag., Mr. 1788. See also Ap 30.

Although the following description refers to New York as it was after 1790 (as appears by the mention of the "town hall where formerly the Congress met"), it is placed here because many of the facts mentioned (with the notable exception of the error in population, "about 25,000") are applicable to this earlier year.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1786 "Those persons who have Goats, that keep about the fort garden, are desired to take notice, that unless they are taken care of, and prevented from destroying the fruit trees, disagreeable consequences will attend them." —Daily Ady., Jà 3, 1786.

3 G. Furman offers "Gentle Boarding and Lodging" at the "Sign of the American", No. 111, at the head of Queen St.—N. T. Packet, Jà 5, 1786.

6 The vestry of Trinity Church passes a resolution to grant "a good lot of ground to each of the Presbyterian Congregations in this City for the use of their respective senior pastors for the time being." This is for erecting their dwelling-houses.—Trin. Min. (S. F.). On Oct. 2, Trinity granted to "the Corporation of the Scotch Presbyterians in the City of New York," a lot and a half on the old "Church Farm," situated on the north side of Robinson St., near Broadway, for the use of the ministers.—From a copy of the deed (6pp. folio) filed with the Richard Varick papers (in bundle in box U-V) in N. Y. H. S. This land, now Nos. 5 and 5 Park Place, was never put to this use, but the income from the property was applied toward the payment of Dr. Rodgers' salary. —Knapp, Hist. of the Brick Church, So.

16 "Resolved that the Treasurer be directed to pay the Sum of £20 into the hands of Messrs John and Thomas Stagg to be by them laid out in improving that part of the Church Estate near the Bear Market." —Trin. Min. (M.S.).

16 Both houses of the legislature convene at the "Exchanges," and an address is presented jointly by Gov. Clinton, who has summed them by proclamation.—N. T. Packet, Jà 19, 1786.

17 A card appearing in a newspaper reads: "The Citizens are cautioned against signing a petition for the suppression of Public Virtue and Morality [see 1786], as a counter one will be offered them, in which they may be assured the fallacy of every argument in favour of the Theatre will be refuted, and the impropriety of the Drama clearly evinced." —N. T. Packet, Jà 16, 1786. See Jà 21.

At this period, the theatre was the subject of much controversy, some defending it, others bitterly denouncing it as an evil. "Nothing is more destructive of good morals," one writer asserts, "than idling away time at Plays; for then, through pleasure vice more easily gains possession of the mind." He reminds his readers that "even in Greece, where, the Stage is patronized, unlicensed play-actors are considered as rogues and vagabonds." —N. T. Packet, Jà 23, 1786.

21 John Henry publishes the following announcement: "A Report having prevailed, that the Subscriber is author of several pieces which have lately appeared in favor of the Theatre, he begs leave thus publicly to disavow not only being so, but also every knowledge of the person or persons representing that character." "Yet still he flatters himself, the chastity and morality of the entertainments presented there; the truly respectable audiences that nightly give sanction to them; the promises made the American Company when they left the city in February 1775; their known attachment and affection for their gracious patrons; the number of years they have passed in their service; with the idea of depriving seventy-two innocent persons, employed about the Theatre, of their daily bread, will at length remove the veil of prejudice, and the Drama appear amply capable of its proper, its original designation." —N. T. Packet, Jà 26, 1786.

25 Geo. Lindsay, desiring to erect a house in Crown (Liberty) St., and being "at a loss to know which way he is to place the Front of his House," because the common council has not determined "the Plan of the Streets in that Quarter," petitions that the board "speedily determine the Plan of the Streets on the North River." —From the original petition in metal file No. 8, city clerk's record-room. The petition came before the board on Jà 30, and was referred to the committee on Greenwich St.—M. C. G. (1784-1781), I: 194-95.

28 Mr. Lamon, the Proprietor of the Intelligence-Office, advertises that his office, at "No. 22 Water-street, opposite the Coffee-house," will also be used as a "Land-Office, for the Sale of Estates." He believes "that an office for the general reception and sale of estates, would greatly add to the convenience of those who may want to dispose of their property, either by barter or sale." —Daily Ady., Jà 28, 1786.

30 A letter from Chancellor Robert R. Livingston "containing proposals to contract with this Board for conveying fresh Water into this City" is read in common council and referred to a committee.—M. C. G. (1784-1811), I: 194. At the same meeting, a claim of Josiah Hornblower against the corporation for £12, "for coming at the request of the [common council] to survey & give his Opinion on the Reservoir & Engine of the Water Works erected by the Crooks previous to the new one at 1784 and 1785 is filed. —From the original bill in file No. 12, city clerk's record-room.

A deed or indenture conveys to Nicholas Fish that portion of the James deLancy estate on which the mansion stands, comprising the block bounded by the Bowery Lane, Rivington, Christie, and Delancy Sts. It was acknowledged Oct. 2, 1794, by the commissioners of forfeiture, Isaac Stoughton and Philip van Cortlandt; and, signed by Mayor Varick, was recorded April 9, 1796. It is now in the author's collection.—See descrip. of Pl. 36-a, I: 277; also Ap 27, 1791.

Reports upon the proposals of Samuel Ogden (see Mr 24, 1785) and Chancellor Livingston (see Jà 30, 1786) to supply the city with water in common council, but consideration is deferred.—M. C. G. (1784-1781), I: 197. Stagg (1783-1781), I: 259. Jacob de la Montagne's address is No. 8 Great St George St., cor. of Robinson St., advertises that the "well known and beautifully situated House and Gardens, No. 317, Great George-street, formerly kept by the Widow de la Montagne, but at present in the occupation of Mr Henry Kennedy" (see Jà 6, 1785), is for rent.—N. T. Packet, F 6, 1786. See history of this tavern under Ap 5, 1754.

14 The New-York Directory is "Just Published," and is to be sold by Shepard Klockol. At his Book-Store, opposite the Coffee-house, and by "Mr. David Francis (The Compiler), No. 66, Broadway." This newspaper advertisement also contains the same note of thanks to the public for encouragement received as appears in the directory itself. In it Frankie refers to this directory as "the first of the kind ever attempted in this city," and states that "he shall continue the honour of annually publishing the same." —New-York Directory, F 14, 1786. See also Vol. I, p. 737 where, however, the erroneous statement is made that the N. Y. Historical Soc. owns the only known copy of the 1786 edition of the directory. It should read the 1782 edition. No copy of the 1788 directory is known to exist.

15 Besides the alphabetical list of the inhabitants, the directory contains a complete index of names alphabetically arranged in English, Dutch and in N. Y. currency; a list of the members of congress; the names and addresses of government department heads; the commissioners of claims against the U. S.; the members of the state senate and assembly; the chancery officers, judges, justices of the peace; officers of the city and county of N. Y.; commissioners of forfeiture; lawyers, and notaries; officers of the Grand Lodge of Masons of the State; officers and directors of the Bank of N. Y., and rules of the bank; the bank discounts on gold coin; the names of Columbia College professors, days of examination, etc.; officers of the Societé for promoting the manumission of slaves; members of the Gold and Silversmiths' Soc.; of the Soc. of the Cincinnati of N. Y. State; officers and members of the St. Andrew's Soc.; of the Gen. Soc. of Mechanics and Tradesmen; of the Soc. of Peruke-makers, etc.; the arrivals and departures of mails at the N. Y. post-office; names omitted from the directory; Mr. Frank's address to the public, and his page advertisement as conveyer and accountant.

In the list of gold- and silversmiths, the name of Myer Myers appears as "Chairman." See also the reference to him under 1746 where, however, the date 1776 is an error for 1786, as the date when he was president of this society.

Several cheap reproductions have been published of the original directory, which is now excessively scarce.

Chancellor Livingston and his associate, John Laurence, appear before the common council to discuss their plan for supplying the
city with water (see F 6). The board resolves to advertise for proposal to be delivered at the clerk's office on or before April 20—

15 M. C. G. (1784-1811), I: 199, 199-200.

An advertisement, signed by Robert Benson, city clerk, which appeared in the papers is dated Feb. 15, and read as follows:

"Whereas the Corporation of the city, have long had it in contemplation, to supply the inhabitants with water, by means of pipes or aqueducts, and an attempt was made for that purpose, which was rendered unsuccessful: And whereas proposals have been lately offered for carrying on the said design by private companies, and the funds of the corporation not enabling them to erect the necessary works on the public account, and being impressed by a desire to forward such supply of Water, which they consider not only as a great convenience to the citizens, but as a security to the public health, have therefore given notice, that the privilege of supplying the city with water will be granted to such person or companies as will engage in the undertaking on the most reasonable terms; and all persons have now an opportunity of leaving their proposals, sealed, at the office of the clerk of this city, in Maiden-lane on or before the 15th day of April next, to be then taken into consideration."—N. Y. Jour., F 23, 1786. The sealed proposals were presented to the board on April 19 (p. 5) by the clerk.

"A committee of the common council is appointed to report what Alterations are necessary to the Law for regulating Streets in the burnt parts of the City."—M. C. G. (1784-1811), I: 199. They reported on March 22 the draft of a memorial to the legislature and of a bill for the purpose, and these were approved by the board for presentation.

The committee which was appointed to report the best means for disposing of the Common Lands in the Out Ward, report the following opinion: "1st. That the center Road shall be 100 feet wide instead of 66 feet as the same is laid down. 2nd. That a part of the Lots laid out on the new Map be sold in fee simple if a reasonable price can be obtained. 3rd. That an Advertisement of such intended Sales be published. 4th. That the Claims of individuals on the Common Lands of the Corporation be amicably adjusted. …" The common council agrees.—M. C. G. (1784-1811), I: 199.

The list of freemen appointed on this day by the common council shows the names of 259 men. They consist of five engineers, two hook-and-ladder companies, and engine men attached to fifteen engines.—M. C. G. (1784-1811), I: 204.

A commissioner of excise is appointed by the common council.—M. C. G. (1784-1811), I: 204.

"Whereas many persons in this city, who have been greatly hurt in their circumstances, and families reduced to distress, by getting into the bands of persons, who have made a practice for some time past to draw money at extraordinary usury, have been already redressed; and whereas there is reason to believe, that many other persons are still labouring under similar circumstances, notice is hereby given, that any person or persons who may be so situated, may be redressed by applying at No. 35 King-street."—Daily Advert., F 23, 1786.

25 Morgan Lewis (see Ag 2, 1789) advertises for sale "Mount Pitt, the place on which the subscriber now lives, situated near Corlear's Hook, at the distance of one mile from the city-hall, of the city of New-York; an handsome and convenient dwelling house, an out kitchen, containing several rooms; adjacent is a large stable, a new carriage house and a complete ice-house, which compose the principal buildings. There are about eleven acres of land, a collection of between three and four hundred bearing fruit trees, and an handsome garden well fenced in. The place being well known requires no further description."—Daily Advert., F 24, 1786. The place was not sold until Feb. 3, 1792 (p. v.).

In a long letter to the press, "Roccius" proposes the abolition of taverns, which now number more than 500 in the city and suburbs.—Daily Advert., F 23, 1786.

Mar. 10 Cape's, in Broadway.—N. Y. Packet, Mr 16, 1786. Corre was succeeded in May, 1788, by Edward Bardin.—ibid., Mr 31, 1788;

Gov. Clinton submits to the legislature a petition of Samuel Francis (Francis), accompanying his message, and recommends "his peculiar case" to their attention, on being "convinced of the truth of many of the facts therein stated."—Jour. of the Senate (1786), 44. The text of this petition is not recorded; but on May 5, an act was passed (Laws of 1786, chap. 68) appropriating $500 to Samuel Francis for the support of New York prisoners and for sundry services during the late war."—Messengers from the Governors, II: 239. See also Ap 4, 1786.

Peter Maverick, "ever willing to serve the public, respectfully informs them, that he carries on the engraving, sealinking and copper plate printing, at No. 3, Crown-street, where ladies may have their tea-table plate engraved, in the most elegant manner and in the newest fashion, resembling the flat chafing, as neat as in Europe."—N. Y. Packet, Mr 16, 1786. Stauffer says this advertisement refers to Peter Rushton Maverick, a native New Yorker, and thinks the notice "plainly indicates that, like other early American engravers, the engraving of silver-plate and book plates formed the major part of his business." Most of Maverick's plate illustrations are "poor in execution," although his book plates are fairly good.—Stauffer, Am. Engravers on Copper and Steel, L 177. A list of his engravings may be found in ibid., II: 371-72. In 1788, Peter R. Maverick represented the engravers of New York City in the Federal Corporation.—Fishing, Am. Engravers on Copper and Steel, 28. He lived in the city continuously until his death in 1811.—Duval, Hist. of Arts of Design, L: 187.

The house formerly occupied by Mrs. Wright for the exhibition of her famous wax-works (see Je 3 and Ag 5, 1781), at 100 Queen St., is still used for similar exhibitions.—Daily Advert., Mr 17, 1786. Among the figures shown, "as large as life," is "a portrait" of Gen. Washington.—Ibid., My 16, 1788. Possibly this was the bas-relief by Mrs. Wright, reproduced, for the first time, in the N. Y. Times, F 22, 1925. See Ap 26, 1786.

A bill is pending in the New Jersey legislature to make "Powel's-Hook," a free port, that it may charge import duties even on goods brought from New York.—N. Y. Packet, Mr 23, 1786.

The aldermen and assistant of the South Ward are required to report to the common council what repairs are necessary to the Fire Engine House near the Fort.—M. C. G. (1784-1811), I: 208.

On a petition to the common council, bearing this date, the inhabitants of the East Ward ask for improvement in the street at the coffee house. They state that "The Coffee House at present kept by Mr. Cornelius Bradford is the usual place of resort for your Memorialists and the Merchants of this City in general to meet at daily and transact Business." The street, for want of proper regulation, has become slythy, and they ask relief "by sending the Water over the street instead of leading it into the Common shore and to remove the Platform in a line with the East front of the said Coffee House and run on towards the water."—From original petition (in metal file No. 10, city clerk's record-room), endorsed "read March 29th 1786 & referred;" and see M. C. G. (1784-1811), I: 209. The petition carries 116 signatures including the names of Alexander Hamilton and many other distinguished citizens of the time. The petition desired action was taken by the common council.

A payment of £361:8 is made "for Ironmongery to repair & alter the Court-room."—M. C. G. (1784-1811), I: 210.

The legislature passes "An Act to regulate the Militia." The city of New York is to raise one regiment of artillery.—Laws of N. Y. (1786), chap. 25. The first brigade, first division, was formed in New York as a "Brigade of Artillery," composed of the first and second Regiments and a battalion.—"From Military History of the Eighth Regiment," by Capt. J. O. Johnston, in Grand Opening of the New Armory (1890), 10. For the names of the successive commanders for the next decade, see ibid., 10.

7 New York bids fair to out vie the sister States in becoming the seat of Arts. Today we are informed of the arrival of Mr. [Joseph] Wright Jr. from Philadelphia, a gentleman of abilities in Painting, and Son to the celebrated modeller and patriotess Mrs. Wright of London, from this place (see Je 3 and Ag 5, 1771)—as he means to follow his profession as a Limner here, we are tempted to believe, every encouragement will be given to his Genius."—Daily Advert., Ap 7, 1786. Regarding Mrs. Wright, see Ap 17; N. Y. Gazetteer, My 19, 1786; Daily Advert., N 2, 1786. Cf. 1787.

The proprietors of the "Albany Stage Waggon" advertise to make the run from New York to Albany in two days, starting at Corre's Tavern (City Tavern) on lower Broadway. The same charge is made for carrying 150 lbs. of baggage as a passenger. They are not permitted, under their contract with the postmaster-general, to carry letters independent of the mail.—N. Y. Packet, Ap 10, 1786.
THE ICONOGRAPHY OF MANHATTAN ISLAND

The first commencement of Columbia College is held in St. Paul's Chapel, and is attended by the national congress and the state legislature as well as by the educational authorities. De Witt Clinton is among the eight graduates who receive the B. A. degree. —N. Y. Hist. Mag. Vol. 13, 1876.

The legislature passes "An Act for emitting the Sum of Two Hundred Thousand Pounds in Bills of Credit, for the Purposes therein mentioned." This is occasioned "by the late calamitous war," the inhabitants of the state labouring under great difficulties "for want of a sufficient circulating medium." These bills of credit are to be delivered by the state treasurer to the loan officers of the several counties in specified sums. New York County is to receive $15,000. The loan officers are to loan the bills on the security of mortgages on real estate, at 5% per annum, for 14 years, after the third Tuesday in June, 1876, in sums not exceeding $500, nor less than $20 to any one person. —Laws of N. Y. (1876), chap. 40. On Oct. 4, 1871, loan officers' books of mortgages, minutes, accounts, etc. were examined and approved by the common council of N. Y. City. —M. C. (1873-1874), I: 679.

The clerk of the common council reports that he has received "three sealed Packets said to contain Proposals for erecting Works to supply this City with Water" (see F i5). The aldermen and assistants state that they have conferred with the inhabitants in the several wards, and "that it appeared to be the opinion of a Majority of the Persons they had confered with that the Corporation ought not to grant the Privilege of supplying the City with Water to Individuals; but that the same ought if possible to be undertaken by the Corporation." The board therefore resolves "that the said Proposals remain unopened with the Clerk until . . . further order . . . or that they be returned, at the option of the Persons who presented the same." Meanwhile, the aldermen and assistants are requested "to set on foot in their respective Wards, Representations to this Board in Writing and subscribed by the Citizens in order more fully to ascertain their Sense. Whether the Corporation ought to grant to Individuals the Privilege of supplying the City with Water Or whether the same ought to be undertaken by the Corporation and that the Monies necessary for the same be raised by a Tax." —M. C. (1784-1813), I: 217-14. We find no other reference to these proposals, so the project appears to have been dropped at this time.

It was revived by the citizens in 1789 (q. v. Jt. 29).

Steps are taken to transform the Bowling Green into a small park. For its earlier history, see L. M. R. K., III: 968; Man. Com. Cons. (1859), 633-8; ibid. (1862), 536-7. In earlier times the lane was called "Main" (Bell's "Parade") (Pls. 26, 27, 274, Vol. 1); see also My 4, 1665; Jt. 29, 1677, S. 8, 1684.

On April 3, 1786, Chancellor Livingston wrote to "The Worshipful James Duane, Esq., Mayor," as follows: "Mr. Stevens who had the charge of the bowling green having left town is disposed to deliver it up to the City and I would wish to take it up without the direction of your worshipful board, I beg the favor of you to signify to them that it would give me pleasure to keep it in repair as it is very ornamental to this part of the town & might be rendered more so by planting trees around on the outside & shrubs within, if the corporation will do the first I will take the last upon myself. The fence is now broke so that the hogs are daily destroying it but as the iron lies about the place it might be repaired without much expense one of the lamps is also wanting. I would submit whether it would not be expedient to take down the pedestal which is far from being ornamental & contracts the appearance of the green." From the original letter in city clerk's record-room. It is endorsed: "read & filed 19 April, 1786, & granted." The action taken by the common council, as recorded in the minutes on April 19, was to grant Livingston "the Direction and Use of the Bowling Green" for two years, to pay the expense of sowing grass seed and having it "well laid down as a Green." —M. C. (1784-1813), I: 212-15.

The board had under consideration at the same time a petition from Daniel Ludlow who stated "That the Green, or Ellipses at the South End of this borough, is so much decayed during the late war, that instead of being an ornament of the City, with its advantage, some timely aid will soon become a Nuisance to the Neighbourhood." He was willing "at his own expense to Manure the Ground & sow the same with proper Grass Seed and have it well laid down as a Green," and asked the board's permission to take it under his management, and, as compensation, have the use of it for two years. Apr. 19.

The keeper of the bridewell having been forbidden "to draw his Seine for the taking Fish at Paulus Hook on the Jersey Shore," and the inhabitants of the bridewell and almshouse being "likely to be deprived of the Advantage of being fed with Fish during the Season at a very cheap Rate," a committee of the common council is appointed "to confer with Mr. Smith the Tenant in possession at Paulus Hook on the Subject." —M. C. (1784-1813), I: 212.

The common council resolves that the "Magistrates" (that is, the aldermen) shall "in Rotation have the Charge of the City Watch." —M. C. (1784-1813), I: 213.

Firemen are appointed by the common council for an additional engine, No. 16, and it is ordered "that the Engineer direct a House to be built at the New Dutch Church for the reception of the 4th Engine." —M. C. (1784-1813), I: 214.

In 1785 a "Anell", "the Firemen's Watch," was put into a British packet. He has been "appointed by that government to enquire into the value of the estates of those loyalists which have been already confiscated and sold." —N. Y. Packet, Ap 20, 1876. See also My 12.

The legislature passes "An Act for the more effectual Prevention of Fires in the City of New York." It is designed to remove the dangers arising from storing pitch, tar, etc. in houses, and from discharging guns, fire-works, etc. —Laws of N. Y. (1786), chap. 43 (Greenleaf, I: 271).

John Ryckman, a brickmaker, who "lives at Inclingborough adjoining to the commounable Lands," states in a petition to the common council that he "hath heretofore been indulged with liberty of digging Clay and making Bricks on such Lands . . . upon the principal of your petitioneer's rendering them cheaper and better in quality, than such as were imported, to this City." He represents that "if he could now be indulged with the taking Clay from such commounable Lands, contiguous to his place of residence, he would erect a Brick-yard in his own Lott, fill up every spot he may be indulged to dig Clay from, and carry on his business, as heretofore done, for the mutual advantage of himself and the City at large." —From original petition in city clerk's record-room. The same petition appeared in the minutes of June 9, 1786. —M. C. (1784-1813), I: 46.

The legislature passes "An Act to promote Literature." Authors are given the sole right for 14 years of printing and publishing their books and pamphlets, with an additional 14 years if still living. —Laws of N. Y. (1786), chap. 54.

Look and see that my" books, etc. in the hands of M. B. D., and a number of others. May 18, in a petition to the common council, state that these streets, "for want of proper regulation have become utterly impassable for Carts or Carriages," and that they are ready to remedy this situation as soon as the Board gives directions. —From the original petition in metal file No. 7, city clerk's record-room.

Stone St. and Petticost Lane, "heretofore the abode of dirt and diseases," are to be widened and thrown into one. The destruction of part of the city has thus opened the door to improvement. It is "detennined to leave Broadway as it is with one side yards higher than the other, and a pavement less inviting than a tavern sign, promising no entertainment to man or horse." —Daily Adv., My 2, 1786.

Alexanders Macomb purchases two vacant lots at Nos. 29 and 41 Broadway—Likely Dec. XXVI: 6. Here he erected a large and handsome residence, which was completed by Oct. 10, 1787. —M. C. (1784-1813), I: 327. This house was the residence of Pres. Washington early in 1790 (see F 22, 1790), and until he left the city on the removal of the seat of government to Philadelphia. —Diary of Washington (ed. by Lossing), 86-87; Mag. of Am. Hist., XXVII: 107. This large double building was opened as a hotel in 1832 by Mr. Bunker, who called it Bunker's Mansion House. —Hassanwell, Reminiscences of an Octogenarian, 121. See L. M. R. K., III: 977; Pl. 174, Vol. III. The house is shown on Pl. 55, Vol. I and Pl. 98, Vol. III.

The common council orders that a committee be appointed "to
1786
examine the Bridge near MT Lispenards, represented to be much out of
order."—M. C. (1784-1831), I: 216. See S. 12.
Bradford's Coffee House (see Mr 11, 1784) is the appointed
meeting-place of the corporation of the N. Y. Hospital.—N. Y. Packet, My 11, 1786. For an account of the various societies, etc.,
which met here at different times, see Bayles, Old Taverns of N. Y.,
320 et seq., and 403. On Feb. 23, 1791, the Merchants' Coffee
House, on the site of the present building, was occupied by Mrs.
Bradford (see O 25, 1785), was advertised for sale.—Daily Ad. F 28, 1793. Mrs.
Bradford, the widow of Cornelius, who died on Nov. 9, 1786 (N. Y.
Packet, N 10, 1786), kept this tavern from the time of his death until
this time.—Bayles, 322, 402-30. It changed hands before 1800,
as we find an ad. of Edward Bardin on June 12, 1798, stating that he
opened "the Old Coffee House" (formerly occupied by John Byrne)
on the day of his arrival.—Je 12, 1798; Bayles, Old Taverns, 403.
See, further, D 18, 1804.
Nicholas Hoffman & Sons, 12 Little Dock St., advertise "black
and white wampum, pipes and shells" for sale.—N. Y. Packet, My 11, 1786.
The British commissioner, John Anstey (see Ap 20), publishes the
purpose of his mission. He was named under "an act for
appointing commissioners further to enquire into the losses and
services of all such persons who have suffered in their rights, prop-
erties and possessions, during the late unhappy dissensions in
America, in consequence of their loyalty to His Majesty, and at-
tachment to the British government." The "Office of Claims," in
Broad St., "is open for the sole purpose of liquidating the amount in
which the loss or waste of this subject of the property in the
possession of the British government may be upheld in all cases, and confined to
its proper objects, and compensation adequately and impartially
administered to the several claimants in just proportions according
to their pretensions, as the proofs thereof shall be found to require."
The cases to be given first attention in the inquiry are those of:
Brig.-Gen. Oliver Delancey, Isaac Low, Hugh Wallice, Alexander
Wallace, Col. Beverly Robinson, Col. Roger Morris, Robert
The Office of Richard Varick, Esq. Recorder of this City, and
Attorney and Counsellor at Law, is removed from No. 46, Great
Dock-Street, to No. 52, Wall-Street, nearly opposite to Pitt's
Statue."—N. Y. Jour., My 13, 1786.
An act of the legislature having been passed on April 4, to enable
the common council of the city to raise money by taxation for
the support of the poor, etc., it is ordered that $6,000 be so raised
for various objects by a tax on the estates of all the freeholders and
inhabitants of the city; also that $4,000 be raised by an additional
tax on estates of freeholders and inhabitants south of a line across
the island just north of the property of Leonard Lispenard, of
Mount Morris, of John Vesey, and of Abraham Cannon.—M. C. (1784-1831), I: 216-17.
An advertisement states that St. Peter's (Roman Catholic)
Church is to be built by contract. "Any Master Carpenter or
Mason, willing to undertake the building of said Church, may see
the proposals and plan by applying to Lynch and Stoughton, No. 9
Princess street."—Daily Ad. My 26, 1786. The church was con-
secrated on Nov. 4 (q. v.).
Jacob Watson, Robt Murray, Comfort Sands, William Beck-
man, and others, complain in a petition to the common council of
the "want of a Market House in the Out Ward of this City; Peck's
Market Slip being ill-supplied—and the Fly Market too distant
to depend on for a daily supply." They ask permission "to erect a
Market House, upon the Bulk Head, at Catharine Slip," at their
own expense.—From original petition (in metal file No. 8, city
clerk's record-room), endorsed "read May 31st 1786," and referred
to a committee "to regulate Catharine Street & fix on the situation
for the Market;" M. C. (1784-1831), I: 220. The committee
to whom the petition was referred reported on June 15 that they
had directed that the market be built in a certain place at Catharine
slip. See Jl 28.
Inhabitants at Whitehall Slip petition that part of this slip
may be filled up "similar to the old & other slips;" also, inhabitants
of Vesey St. petition that the slip fronting that street may be filled
up. These petitions are referred to the alderman and assistants of
the respective wards where the slips are situated, to determine the
expediency and expense of the measure.—M. C. (1784-1831), I:
220-21. On July 12, on the committee's recommendation, it
was decided to build a bulkhead across the Vesey St. Slip, 70 feet
in front of Greenwich St.—Ibid., I: 230.
John Batinn announces that he has opened "a Porter-House and
Tavern, at the sign of the Blue Bell, in Slate-Lane."—Inds.
Jour. or Gen. Ady, My 31, 1786.
Hon. Alexander McDougall, a major-general in the U. S. army
during the Revolution, and lately one of the senators for the South-
era District of New York, died at his home on Nassau St. His funeral
was a notable one; minute guns were fired during the procession. —
N. Y. Jour., Je 15, 1786.
Inhabitants at Burlings Slip petition that the east side of this
slip may be wharfed out equal to the west side, and the street paved.
The petition is referred to the committee which is considering the
petitions for and against filling up a part of the slip.—M.
C. (1784-1831), I: 282.
The market-house at Catharine Slip (see My 31) is erected and
ready for the accommodation of butchers and country folk. It is
ordered by the common council that it be established as a public
market-place, subject to the rules and regulations of the other
market-places.—M. C. (1784-1831), I: 225-26; L. M. R. K.,
The alderman and assistant of the West Ward are made a
committee to regulate the unregulated streets in the vicinity of the
college.—M. C. (1784-1831), I: 226.
The common council orders that Wall and Water Streets be
regulated in the vicinity of the Coffee House; also that a sewer be
built to the river; that a new "Coffee House Bridge" be placed in
the middle of that part of the street between the front of the
army, fronting the Coffee House," and that "the present Coffee
House Bridge" be removed.—M. C. (1784-1831), I: 226-28, 245-46.
Regarding this bridge, see L. M. R. K., III: 988.
The common council adopts a plan for celebrating the tenth
anniversary of the Fourth of July.—M. C. (1784-1831), I: 228.
The full programme for the celebration of the day, as ordered by
the common council on June 28 (q. v.), is published.—N. Y.
Gazette, Ji 4; see also ibid., Ji 7, 1786 (in N. J. H. S.). In addition
to the usual features of the celebration, there is a "well designed
and pleasing representation of transparent paintings, adapted to
the occasion, in front of the theatre in John-street."—N. Y. Packet, Ji 6, 1786.
This exhibition is referred to by Selhamer as the first "theatrical
He evidently means the first celebra-
tion of it by a theatre. For the first professional performance of
a play written by an American, see Ap 16, 1787.
John Corre's account for entertainment furnished to "The
Humbt the Corporation of the City of New York" on the Fourth
of July, 1786, amounting to £1534:16, contains charges of £57
for 150 gallons of punch; £2110 for 150 bottles of wine; £40
for claret and crackers, and £40 for "wine glasses, tumblers, decan-
ters, Bowls, plates, Windows, Bottles and pewter mugs Broken and
missing."—From the original bill in metal file No. 12, city clerk's
record-room. The bill was paid.—M. C. (1784-1831), I: 244.
A balloon is to be raised at No. 50 Bowery Lane.—De Voe's
Newspaper Index (Jl S.), at N. Y. H. S., citing the N. Y. Gazette
or Daily Ev. Post, Ji 7, 1786 (in N. J. Hist. Soc.).
On account of there being a sunken hulk of a vessel in Beck-
man's Slip which cannot be removed, William Malcolm, who has
petitioned the common council for permission to add to his wharf, is
allowed "to extend the street to the width of twenty feet at his
own expense," and is given power to obtain the city's grant of a
strip of land 4 ft. 3 in. wide, to make his lot the same width as the lot
on the north side of Water St.—M. C. (1784-1831), I: 251.
A committee of the common council, which had been appointed
to regulate the streets in the West Ward, reports that it has pro-
cured plans of the city surveyors for the regulation of Greenwich,
Barclay, and Murray Sts. A description of this plan or survey,
annexed to the report, is entered in full in the minutes.—M. C.
(1784-1831), I: 235-36. Regarding Barclay St., see further, My 25,
1786 (q. v.).
The trial trip of John Fitch's steamboat occurs on the Delaware
River.—Bullock, "The Miracle of the First Steamboat," in Jour.
Am. Hist., III: 36. Fitch thus described the boat: "It is, in several
parts, similar to the late improved steam-engines in Europe, though
there are some alterations—our cylinder is to be horizontal, and the
steam to work with equal force at each end. . . It is expected,
that the engine, which is a 12 inch cylinder, will move with a clear
steam-power."
**THE ICONOGRAPHY OF MANHATTAN ISLAND**

1786 force of 11 or 12 cwt. after the frictions are deduced; this force is to act against a wheel of 18 inches diameter. The piston is to move 27 three feet, and each vibration of the piston gives the axis 40 about 40 evolutions. Each evolution of the axis moves 12 or 15 paddles or paddles, which, work perpendicularly, and in the in the stroke of the paddle of a canoe.) As 6 of the paddles are raised from the water, 6 more are entered, and the two sets of paddles make their strokes of about 11 feet in each evolution. The cranks of the axis act upon the paddles about 3 of their length from the lower end, on which part of the far the whole force of the axis is applied. Our engine is placed in the boat, and is attached to the stern rudder and both the action and reaction turn the wheel the same way."—

*Columbian Mag.* (Dec., 1786), 174, which also contains view. This was "the first boat successfully propelled by steam in America."—

Preble, *Chron. Hist. of the Origin and Development of Steam Navigat*ion, 23. See, further, Mr. 1787.

31 Peter Maverick, in a bill of this date, charges the city $12 for engraving the "State Arms" on each one of a set of measures,—a gallon, a half-gallon, a quart, a pint, a half-pint, and a gill measure.—From the original bill (in metal file No. 12, city clerk's record-room), endorsed "read and fill the 5 Sept 1786;" *M. C. G.* (1784—

1813), 1: 247.

Aug. 1 In a petition to the common council, asking that the charge for repairing a public drain at the foot of Wall St. may be borne by the public owners of the newly subdivided street; that for many years past there has been a Drain erected & maintained at the Public-Expense, for the purpose of conveying the Water from Wall Street and the adjoining parts of Queen Street, through what was formerly called the Meal Market & latterly the Coffee House Bridge.—From the original petition in city clerk's record-room. It was introduced on Aug. 14, and referred to the committee "for dis- cussing the Improvements in the Street at the Coffee House."—

*M. C. G.* (1784—1813), 1: 240. See Jc 28.

3 A fencing-school has been opened by a Mr. Bridge from Paris at the house of Mr. Weisseneis on the Corporation Dock.—*N. Y. Packet*, Aug. 3, 1786.

4 A gentlemen recently arrived in New York expresses astonish- ment at the absence of dress among both men and women. It seems to be the belief the "scarcity of money, stagnation of trade," etc.—*N. Y. Gazetteer*, Aug. 4, 1786.

8 On a report by "the board of treasury," congress passes an ordinance prescribing the U. S. standard of value for coinage, the money unit (as decided by congress, July 6, 1785, q.v.) being the dollar. It is ordered also that this board report the draft of an ordinance for the establishment of a mint.—*Jour. of Congress*. This board, composed of Samuel Osgood and Arthur Lee, produced, on Sept. 20, "An ordinance for the establishment of the mint of the United States of America; and for regulating the value and alloy of coin."—See broadly, in N. Y. P. L.

14 "A Petition of Christopher Colles [see N 23, 1785] praying payment of the ballance by him claimed for the Water Works previous to the late War" is read in common council and referred to a committee.—*M. C. G.* (1784—1813), 1: 239. Colles petitioned again on Dec. 5, 1787 (q. v.). For other claims on account of the pre-Revolutionary water works, see S 5, 1786, and Ja 17, 1787.

The semi-weekly heretofore published as the *New-York Gazetteer*, and the Country Journal (see Mr 8, 1783), is changed to a daily with the title, *New-York Gazetteer; or Daily Evening Post*, *Bingham*. A. A. S. Proc. (1917), 312. See D 18.

23 The common council approves a report for the regulation of Mulberry St.—*M. C. G.* (1784—1813), 1: 242—43. This street is shown laid out and named as far as the "Bend" on Pl. 41, Vol. I (1767), being called Rundert St. from the Bend northward to the present Broome St. The entire length of the street was designated Mulberry St. by ordinance in 1797.—*ibid.*, III: 372. It was con- tinued to Art St. (Astor Place) in 1805 (*ibid.*, IV: 113); and opened to Great Jones St. in 1809 (*ibid.*, V: 570). It was finally opened to Bleeker St., its present terminus, in 1825 (*ibid.*, XIV: 464—65). See also 1789, 1810, 1852.

The common council agrees to a plan for regulating Broadway opposite the houses of John Jay and others; also Verlating Bergh and Charles C. (see D 18).

The estate of Abraham Meister is paid $69,126 for materials supplied to Christopher Colles in 1774 and 1775, for the water-works.—*M. C. G.* (1784—1813), 1: 244; see also the original bill in metal file No. 12, city clerk's record-room.

We are informed . . . that Mr. Peale, the portrait Painter, from Philadelphia, will be in this city in a few days, to take the likeness of his Excellency the President of Congress, and some other public characters, in order to add to his gallery of pictures."—

The population of the county of New York, as attested by Lewis A. Scott, secretary of state, on this date, was 4,450 males under sixteen; 5,742 males above sixteen and under sixty; 199 males above sixty; 4,260 females under sixteen; 6,746 females above six- teen; 856 male negro slaves; 1,207 female negro slaves, and four Indians, who paid 28s. for a sett of 23,614. The population of the state was 238,857. The number of white males in the state was greater than white females; but in New York County, the white females were slightly in excess of the white males.—From NYS. census schedule, attested copy, in N. Y. H. S.; *Ind. Jour.*, D 30, 1786.

In this month, the first issue of *The Columbian Magazine* was published in Philadelphia. Evans says of it (see No. 1765). "This was the most ambitious project in magazine publication yet attempted in this country. It was modelled upon the Gentleman's Magazine, and London Magazine, and was established by Mathew Carey, Thomas Sheldon, William Spottwood, Charles Cist, and James Trenchard. Carey withdrew from the conduct of the magazine in December, 1786 . . . . Its subsequent history, to Dec. 1801, when it was discontinued, is given in *Bibliography* VII: 15. It comprised 9 vols.—*Ford, Check-List of 18th Cent. Am. Magazines*, 8. Among the engraved portraits, maps, and other plates which it contains is the portrait of Washington by Trenchard (Hart 839).

Isaac Roosevelt petitions the common council for "an addi- tional Grant of the soil under water 200 feet into the East River front of a Water Lot at Hunters Key." The grant is ordered to be made.—*M. C. G.* (1784—1813), 1: 246. This is one of many such grants made after the Revolution, leading to the filling in and ex- tension of the shore of the lower part of Manhattan Island.

"An Act of Sharpe & Curtenius for certain Iron Work furnished M'r Colles for the Water Works previous to the late War" (see F 1775) is presented to the common council and referred to a committee.—*M. C. G.* (1784—1813), 1: 247. They petitioned again on June 20, 1787 (q. v.).

There is advertised for sale "That well known valuable Free- hold Estate, called Hors's Hook, situated only seven miles from this city." It is stated that "For many years past the Old Mansion has been used as a Tavern. . . . The salubrity of the air, the extensive and pleasing prospects, commanding a view of Harlem, the East river and Hell-gate, forcibly recommend Hors's Hook to those seeking comfort and retirement. The lot com- prises about 30 acres . . . On the estate a ferry has long been established to Hallet's Cove, Long Island."—*N. Y. Packet*, S 11, 1786. This was the site of the Gracie residence.—See views in *Man. Com. Coun.* (1859), 484; *Mag. of Am. Hist.* (1789, p. 60—91).

The common council finds that the health and convenience of the inhabitants require that a bulkhead be built across Whitehall Slip to prevent the river from where the old one stood, and that the street be raised high enough to carry the water over the proposed new bulkhead.—*M. C. G.* (1784—1813), 1: 248.

The common council orders "that the Ald & Assistant of the Out Ward direct the Bridge at M'r Liseparnds to be rebuilt (if necessary) of Stone."—*M. C. G.* (1784—1813), 1: 249. This bridge ran across the drain which relieved Liseparnds's swampy meadows of their surplus waters, and it was built after April 6, 1773 (q. v.). See also L. M. R. K., III: 926; *Man. Com. Coun.* (1856), 442.

Isaac Meade is compensated for injury done to his lot by the late Regulation of Greenwich Street."—*M. C. G.* (1784—1813), 1: 249, 251—52.

The common council from Virginia, Delaware, Pennsylvania, New Jersey, and New York make a report to the legislatures of those states concerning the Annalscope Convention, which was called to enlarge the powers of congress over trade.—From original in Emmet Coll., No. 9402. "From the Annalscope Convention of 1786 came the Philadelphia Convention of May, 1787, and from
The Philadelphia Convention of 1787 came the Constitution under which we live.—McMaster, *Hist. of the People of the U. S.*, I: 217.

20 The common council orders that all hogs, goats, and pigs found running at large shall be confiscated by the city for the use of the poor.—*M. C. C. (1784-1831)*, I: 250-51.

26 Thomas Pool (see O 6, 1785), the "first American who ever Exhibited the following Feats of Horsemanship, On the continent . . . .," advertises a performance for "This Afternoon, on the Hill, near the Jews Burial Ground."—*Daily Adv.*, S 27, 1786. See also Ag 13, 1788. On Oct. 21, Pool introduced "a specimen of the Coross and Jostlar at New Market." Greenwood explains this by the following quotation from an announcement, during the previous summer of the "Maidenhed Races" at the course in the Bowery Lane: "No crossing, jostling, nor any kind of foul Play, will be countenanced; which detected, the Rider will be pronounced distanced."—*The Circus* (1790), 75.

Oct.

Trinity corporation conveys two lots of land on the north side of Robinson St., near Broadway, to the Scots Presbyterian Church. A copy of the original deed is in the N. Y. H. S.

7 John Stagg, in a bill bearing this date, charges the city $616.09 for "building an Arched Bridge at Bestevaar Kellety [sic] L. M. R. K, I: 926; under "Minetta Street" from October 7th to Nov. 14. inclusive. The items are for labour and carting. From the original bill (in metal file No. 12, city clerk's record-room). He was paid Dec. 13.—*M. C. C. (1784-1831)*, I: 267.

18 The warrant for $474.00 issued to pay Marine Willet for "numbering the Inhabitants in the City."—*M. C. C. (1784-1831)*, I: 259.

"Payment is made for building a "Brestwork a Cross the Whitehall Slip."—*M. C. C. (1784-1831)*, I: 259.

A company of light infantry, under the command of Capt. John Stagg, Jr., has been enrolled, and is to meet at Marinier's Tavern, corner of John and Nassau Sts.—*N. Y. Packet*, O 26, 1786. This was the first company in the state to appear "as a body in consequence of the militia law, enacted at the last meeting of our Legislature."—*Ibid.*, N 7, 1786. See Ap 4.

29 The Rev. Samuel Provoost, D. D., rector of St. Paul's Church, preaches a farewell sermon prior to going to England to be consecrated the first Bishop of the Episcopal Church in New York State.—*N. Y. Packet*, N 2, 1786. The report of his expected consecration was published in *The Daily Adv.*, F 6, and *N. Y. Jour.*, F 8, 1787. He was consecrated at Lambeth Palace on Feb. 9, 1787.—*Ind. Jour.*, Ap 11, 1787.

Nov.

Garret Abel, an elder of the North Dutch Church, completes, by order of the consistory, a report on the "State of the Revenues Income and Estate belonging to the Corporation of the Dutch Reformed Church in New York at the Present Periods." It covers expenses since the War (1784 to Nov., 1786) for repairing the North Church, school-house, parsonage-house, burying ground, etc.; and a list of the real estate owned by this corporation in 1786, with valuations.—See the original in box of MSS. relating to churches in New York City, in N. Y. H. S.

Inhabitants of the Out Ward petition the common council for a grant of a piece of ground between the Post and Bloomingdale Roads, near the 3-mile stone, on which to erect a school-house. Referred to committee.—*M. C. C. (1784-1831)*, I: 260. The need of a school-house in this locality had previously led Trinity corporation to seek a similar grant, but without results. See Ja 22 and D 12, 1771; Ja 31 and Je 26, 1772. See, further, Mr. 12, 1788.

16, the Catholic Church [St. Peter's], situated between St. Paul's and the College, will be consecrated this day, and ... the service will begin at 11 o'clock."—*Ind. Jour. or the Gen. Adv.*, N 4, 1786. The consecration, however, is postponed until further progress is made in the building. Instead, as this is the anniversary of St. Carlos (the name of the king of and the heir apparent to the Spanish throne), a solemn mass is held there by Rev. Mr. Niegut, rector of the Roman Catholic congregation. The Spanish minister, with his son and suite, and others of distinction, are present.—*Ibid.*, N 8, 1786. The following account of the event is given by Shea:

St. Peter's Church "was so far advanced that, in compliance to Charles IV, of Spain, his feast-day, November 30th, dedicated to St. Carlos, the Cathedral and Camera were sufficiently completed to receive the mass. Don Diego de Gardoqui and his suite, as well as all Spanish residents of the city, were invited to attend, a place of honor being assigned to them. A high mass was celebrated by the chaplains of the French and Spanish legations, the blessing of the church having been previously performed in private by the rector. . . ."—*Life and Times of the Most Rev. John Carroll*, 284.

This edifice was demolished in 1876, the present St. Peter's Church being commenced in that year on the same site.—See O 6, 1786.

This being the anniversary of St. Carlos ("the name of his Catholic Majesty and the Prince of Asturias"), it is also celebrated by the Spanish minister, Don Diego de Gardoqui, at his house, by an "elegant dinner" which he gives to the president, secretary, and members of congress, the ministers of foreign affairs, of war, and of finance, and to the foreign ministers, consuls, etc. Thirty tables are drunk.—*Daily Adv.*, N 6, 1786.

It is ordered that "the allowance in future for conveying Vagrants to Bridewell be 2/6 p't Head."—*M. C. C. (1784-1831)*, I: 261. For the earlier rate, see O 6, 1785.

The Society for Promoting the Manumission of Slaves agrees to a plan for establishing a school for instructing the children of free negroes.—*N. Y. Jour.*, N 23, 1786. The school-house was built in Cliff St. between Beekman and Ferry Sts., in the rear of St. George's churchyard.—*Picture of N. Y.* (1807), 113.

"The Court of Appeals have met agreeable to the Resolve of Congress, and are now sitting in this city, in the Room over the Exchange."—*Daily Adv.*, N 13, 1786.

Samuel Zellers and others, cookey bakers, in a petition to the common council, state that they have "had the privilege of vending "Biscuit, Kusk, Gingerbread and Cakes" in the streets, and that these articles have been "chiefly purchased by Country people, Boatmen, and other transient persons;" but that in consequence of the disorderly behavior of Boys and others . . . employed in selling these articles about the Streets and at the public Markets, the petitioners are deprived of the privilege." They ask that it be restored on condition that they will be responsible for the conduct of their agents.—From original petition (in metal file No. 7, city clerk's record-room), endorsed "cannot be granted."

Trinity vestry passes a unanimous resolution "That measures be forthwith taken for the rebuilding Trinity Church . . . .;" that three Commissioners be appointed to manage and superintend the work and that they prepare a plan of the building . . . .; also "that Subscriptions be Solicited from the Members of the Congregation for the above purpose."—*Trin. Min. (M.S.).*

Elias Burger is paid $1362.12 for "Sinking a wharf at Pecks Slip" and "Building a Dock at Beekmans Slip." Daniel Phoenix is paid $3693.10 for disbursements at these slips.—*M. C. C. (1784-1831)*, I: 265. Various contractors and dealers were paid on subsequent dates for materials and labour there.—*Ibid.*, I: 270, 271, etc.

An ordinance is passed "requiring the Inhabitants to cause the Snow in the several Streets of this City to be levelled."—*M. C. C. (1784-1831)*, I: 268.

Next Tuesday Evening at six o'clock, Mr. [Noah] Webster, will begin a short course of lectures, at Mr. Hallett's Dancing Room, in Little Queen Street. The course will open with a lecture upon Education which was read, last spring, in the City Hall . . . . Tickets at 4 shillings."—*Daily Adv.*, D 16, 1786.

The New York Gazette; or Daily Evening Post (see Ag 14) becomes semi-weekly, with the title The New-York Gazetteer; and Public Advertiser.—*Brigham, A. A. S. Proc.* (1917), 452. See Ag 16, 1787.

The following advertisement appears: "Hearst's Hackney Coach. On Tuesday next the 26 instant the subscriber proposes to place a neat coach with able horses and a very sober careful driver, at Mr Bradford's Coffee House. This carriage will be distinguished by the letters I. H. in a cypher, and No. 1, on the door. It shall attend in the street from 9 o'clock in the morning till 9 o'clock, at night or earlier and later as occasion may require. James Hearst."—*Ind. Jour.*, D 20, 1786. De Voe states in his manuscript index to newspapers that this was the first hackney-coach, and it is so referred to in the present work, I: 373. This is an error. An earlier mention of a hackney-coach in New York was that of John Clapp, which made its appearance in 1696 (?).—*Ibid.*, I: 270.

The "Bridge at Bloomingdale" is repaired, with other parts of the highway in this section.—*M. C. C. (1784-1831)*, I: 270.
— In this year, the Associate Presbyterian congregation, formed in 1785 (p. 657), erected a plain frame building, 70 by 24 feet, on the east side of Nassau St., between Fulton and John Sts. In 1824, they moved to the Second Baptist Church, and in 1825, to a new church on the corner of Grand and Mercer Sts. In 1854, they moved to Grand and Crosby Sts., and in 1867 occupied the Fourth Presbyterian Church at the northeast corner of 34th St. and Sixth Ave.—Smith, N. T. in 1799, 155-76; Greenleaf, Hist. of the Churches (1846), 212-13; L. M. K. R., III: 930.

— In this year, the Holland Lodge of Masons was formed in New York, using the Dutch tongue in its proceedings—Van Rensselaer, Hist. of the City of N. Y., II: 148.

The following description, published in 1835, presents various features of Manhattan, from Corlear's Hook to the Battery, as they existed during and after the Revolution:

... Corlear's Hook, at low-water mark, had a hard pebbly shore, at high-water mark, a sandy Beach. From the Hook westwardly, at a distance of about 250 yards, a reef of rocks extended from the shore into the river, named by the Dutch 'Het Quade Punte,' or the bad point. Between this point and Rutgers' point of rocks, and nearly opposite to the Biddie Rock, Evert Byvanck had built a stone dock against the river, opposite to his dwelling house. Between Rutgers' Point and Cheeseinan's shipyard and dock there was a cove, connected with a low piece of marshy ground, which lay in front of the house of the late Col. Rutgers. From Cheeseinan's Dock to Beekman's Dock, (on the west side of the present Market-slip,) the shore was sandy. Between these docks the British established their ship and navy-yard in 1777, where the same remained until 1783. Between Beekman's Dock and the Dock of Blaze Moore, on the west side of the present Catherine Market, the shore also lay unimproved.

From Catherine-street eastwardly towards Harlaem, there were very few enclosures of land during the war: nearly all the land on the Island lay in common. The house of Hendrick Rutgers (the father of the Colenel) was occupied as a Hessian Hospital during the war, and hundreds of their dead were buried on his farm.

Between Pearland-street and Cherry-street, the Fresh Water Pond was situated, which covered between two and three acres. This place was filled up after the war.

“... We resume the river boundary by remarking, that the southern side of Cherry-street, from the Dock of Beekman before mentioned to James slip, was at low-water mark; and that from Moore's Dock, on the west side of Catherine Market, there were no improvements on the south side of Cherry-street worthy of notice. From the west side of James-slip to Peck-slip, along Water-street, on the north side of the street, there were many buildings. Hamilton's distillery yard joined the street. Peck-slip extended to the south side of Water-street. Peck-slip Market stood between Pearl and Water streets. Between Peck-slip and Beekman's slip, and Water-street market-bury, t, and between the latter slips Crane-wharf was situated, having a large crane over the river. Beekman-slip extended to the south side of Water-street. From Beekman-slip to Burling-slip, the north side of Water-street was also built up, and there were a few stores on the south side. Burling-slip also extended to the south side of Water-street. From Burling-slip to Fly Market-slip, the north side of Front-street was built up. Between Burling-slip and Fletcher-street the British kept their provision yard and stores during the war. Fly Market-slip also extended to the south side of Water-street, and a small Fish Market was erected over the north part of the slip against Water-street, and the Meat or Butchers' Market extended from Water to Pearl-street. The Fly Market ferry stairs joined Front-street on the east side of the slip. The market boats occupied the slip between the stairs and the fish market. Theodore Defreest occupied the corner of Front-street, near the slip.

“We have seen a British ship of the line winter in Fly Market-slip, against Lefferts' wharf. This place was frequently occupied by ships of war in winter.

... From Fly Market-slip to Murray's wharf at the Coffee-House-street, Front-street was built up on the northerly side. Coffee-House street extended to the south side of Front-street, having a bridge over a sewer to Water-street. This bridge lay near the old Coffee-House and Rivington's Printing-Office. The place was frequented every day by merchants, officers and news-mongers. ...
The Committees of both Houses of Congress, appointed to take charge of the ceremonies of the formal reception of the President, have agreed to the following order thereon, viz.:

That a chair be placed in the Senate-Chamber for the President, to the right of the President's chair, and that the Senate take their seats on that side of the chamber on which the Vice-President's chair shall be placed. That a chair be placed in the Senate-Chamber for the Speaker of the House of Representatives, to the left of the President's chair—and that the Representatives take their seats on that side of the chamber which the Speaker's chair shall be placed.

That the Committees attend the President on his return to the Senate-Chamber, and that he be there received by the Vice-President, Senators and Representatives rising, and by the Vice-President candidate to his chair.

That after the President shall be seated in his chair, the Vice-President, Senators and Representatives shall convene to choose the Vice-President, and the Senate shall adjourn to the House of Representatives, and that the Speaker of the House of Representatives be placed in the Senate-Chamber, and that the Senate take their seats on that side of the chamber which the Speaker's chair shall be placed.

That the Speaker shall be received by the President, the Vice-President, and the Senate, and that the Speaker shall be seated in his chair, and that the Senate take their seats on that side of the chamber which the Speaker's chair shall be placed.

That the President shall proceed to the gallery to take the Oath, be seated by the Vice-President, and be followed by the Speaker of the House, and that the Speaker shall be seated in his chair, and that the Senate and Representatives shall return to the Senate-Chamber, and that the President and Vice-President shall return to the Senate-Chamber.

That the Senate and House of Representatives shall adjourn to the Senate-Chamber, and that the Senate and Representatives shall adjourn to the gallery to take the Oath, be seated by the Vice-President, and be followed by the Speaker of the House, and that the Speaker shall be seated in his chair, and that the Senate and Representatives shall return to the Senate-Chamber, and that the President and Vice-President shall return to the Senate-Chamber.

That the Senate and House of Representatives shall adjourn to the Senate-Chamber, and that the Senate and Representatives shall adjourn to the gallery to take the Oath, be seated by the Vice-President, and be followed by the Speaker of the House, and that the Speaker shall be seated in his chair, and that the Senate and Representatives shall return to the Senate-Chamber, and that the President and Vice-President shall return to the Senate-Chamber.

That the Senate and House of Representatives shall adjourn to the Senate-Chamber, and that the Senate and Representatives shall adjourn to the gallery to take the Oath, be seated by the Vice-President, and be followed by the Speaker of the House, and that the Speaker shall be seated in his chair, and that the Senate and Representatives shall return to the Senate-Chamber, and that the President and Vice-President shall return to the Senate-Chamber.

That the Senate and House of Representatives shall adjourn to the Senate-Chamber, and that the Senate and Representatives shall adjourn to the gallery to take the Oath, be seated by the Vice-President, and be followed by the Speaker of the House, and that the Speaker shall be seated in his chair, and that the Senate and Representatives shall return to the Senate-Chamber, and that the President and Vice-President shall return to the Senate-Chamber.

April 20th, 1789.

New-York City Lottery.

Scheme of a Lottery, for the purpose of raising Seven Thousand Five Hundred Pounds, agreeable to an Act of the Legislature of the State of New-York, passed 6th February, 1790.

Subject to a deduction of 15 per cent.

The object of this Lottery being to raise a part of the sum advanced by the Corporation for repairing and enlarging the CITY HALL, for the accommodation of CONGRESS, which does so much honor to the Architec, as well as credit to the City. The Managers pretend, that their Fellow-Citizens will cheerfully concur in promoting the sale of Tickets, especially, as the facsimile of this Lottery will be given from a Facsimile, which must otherwise be sold to reimburse the Corporation.

The above Scheme is calculated in a manner very beneficial to Adventurers, there being two Blanks to a Price.

The Lottery is intended to commence drawing on the 7th Monday in August next, or sooner if filled, of which timely notice will be given. A list of the fortunate Numbers will be published at the expiration of the drawing.

Tickets are to be sold by the Subscribers, who are appointed Managers by the Corporation.

BROADSIDE ANNOUNCING THE PLANS OF CONGRESS FOR THE INAUGURATION OF PRESIDENT WASHINGTON. SEE P. 1242.

BROADSIDE ANNOUNCING LOTTERY "SCHEME" TO PAY FOR ALTERING CITY HALL FOR THE USE OF CONGRESS. SEE MARCH 4, 1790 (P. 1263).
Matthew Carey, Phila., appears. It ran for 12 volumes, ending Jan.
Dec. 1792.—Ford, Check-List of 18th Cen. Am. Magazines, 8,
— citing Sabin's Dict. of Books relating to Am., I: 145; and Carey's
Autobiography.

17 Persons residing at the Fresh Water Pond having encroached upon
a hay, have thrown down and dirt and into it (see fig. 85, 1785),
a committee of the common council is appointed to investigate.

18 Isaac Meade is paid $250.00 "for Sleds for transportation the fire
Engines in the Snow."—M. C. C. (1784-1831), I: 274.

19 With this issue, The New-York Journal, or the Weekly Register
(see Je 23, 1785) changes its title to The New-York Journal and
Weekly Register.—Whiting, A. A. S. Proc. (1871), 448. See N. I.

20 The legislature passes "An Act concerning the Rights of the
Citizens of this State." This is a bill of rights, more properly part of
the constitution. It provides, among other things: No authority
shall be exercised unless derived from the people. No citizen may
be imprisoned but upon indictment or by process of law. Justice
shall be not sold, denied, or delayed. Fines shall be reasonable,
Excessive bail, and cruel and unusual punishments, ought not to be
imposed. Freedom of speech in the legislature shall not be ques-
tioned.—Laws of N. Y. (1787), chap. 1.

21 The Society for the Relief of Distressed Debtors is formed.
Its object is "To administer to the comfort of prisoners, by provid-
ing food, fuel, clothing, and other necessaries of life; and To
provide the same for debtors as well as for debtors in small sums,
and were of meritorious conduct, by discharging their debts." See A
Sketch of the Origin and Progress of the Humane Society of the City
of New-York. Together with the Act of Incorporation and By-Laws
(pub. by order of the society, 1814), preserved with MSS. relating
to the society in N. Y. P. L. In accordance with a memorial from
this society (see D. 12, 1788), the legislature passed an act in 1788
which authorized them, in cases for debtors in small sums, to be
released after 30 days. In 1791, the society secured the passage of
a law forbidding the introduction of liquor into jail. In 1801,
the society appointed a counsellor to represent prisoners. About 1802,
the society's application, the city gave it $600 and a lot on Tryon
St., where it erected a soup-house, the scope of the society's work
having been extended to furnish soup to a reduced price to the poor
of the city. In 1803, the name of the society was changed to the
"Humane Society of the City of New-York." In 1814, it was incor-
porated. One of its principal objects was to discourage street

22 The legislature passes an act vesting in the aldermen of the city of
New York the power of justices of the peace.—Laws of N. Y. (1787),
chap. 8.

Mayor Duane, as clerk of the markets, exhibits to the common
23 council a sworn account of the net proceeds received by him in this
capacity during the past year, amounting to $783148.—M. C. C.
(1784-1831), I: 277; De Vos, Market Book, 319.

The city treasurer reports to the mayor that when the American
forces took possession of the city, the upper barracks "were found
in a very ruinous condition, roofed and guttered, and many families
daily coming to houses or places to shelter them, It was agreed to let
out those Rooms at a Small rent to those who would agree to put
them in repair." In consequence of this order, he states, he has "given
permission to a number of persons who have produced Recommendations from the different Magistrates to
Occupy Rooms Reserving in some a Rent of 40/ and others 60/,
and with the Condition to put them in repair." He finds, however,
that few tenants have complied with the conditions, and he pro-
poses that the rooms be rented at auction to some person with the
condition of putting them in good repair.—From original "Report," in
the city clerk's record-room, endorsed "read Feb. 14, 1787.

See also M. C. C. (1784-1831), I: 278-79.

24 Mangel Mathews and others petition the common council that the
Bowery Road be regulated. The petition is referred to the alder-
man and assistant of the Out Ward.—M. C. C. (1784-1831), I: 279.

Since the first of March last, 364 tavern licenses have been
issued, and the fees, at thirty shillings each, amount to $426.—

25 Congress approves the ideas of a Constitutional Convention.—
Winthrop, V, 21. See the convention meet on May 24 (p. v.).

John Jay writes to John Adams: "... This State in their
present session has greatly moderated their severities to the to-
a law having been passed to restore a very great majority of those
resident here to the rights of citizens. I hope all discriminations
inconsistent with the treaty of peace will gradually be abolished, as
resentment gives place to reason and good faith. ..."—Corresp.

26 Gov. Clinton issues at New York a proclamation, printed by
Loudon, offering rewards for the capture of Daniel Shays and the
other principals in Shays's Rebellion in Massachusetts (see 1786).

The common council orders that the wretches in the huddled
27 who are able to work out of doors be employed to collect dirt from
the streets and "spread it on the Commons in front of the Alms
House to maintain the Ground & prepare it for sowing Grass Seed."
—M. C. C. (1784-1831), I: 281.

28 Samuel "Lowned" (Loudon) is paid by the city $78 for print-
ing.—M. C. C. (1784-1831), I: 282. His services covered by this
payment, are from 1793 to 1786.—See his original bill in city clerk's
record-room.

A committee of the assembly makes a report on the subject of
29 copper coinage. It describes the various sorts of such coin in cir-
culation in this state.—Assemb. Jour. (1789), 78.

30 Mar.

The legislature passes "An Act for granting and securing to
31 John Fitch the sole Right and Advantage of making and employing,
for a limited Time, the Steam-Boat by him lately Invented."—
Laws of N. Y. (1787), chap. 57. Fitch received similar privileges from
Delaware, Pennsylvania, New Jersey, and Virginia.—Bullock,
et seq. See also Wentworth, Life of John Fitch. This act was repealed
on Mr 27, 1792 (p. v.).

32 An act is passed "for the better extinguishing of Fires in the
City of New York." It concerns the appointment of not more than
300 firemen, their exemption from certain other civic duties, the
regulations governing them, etc.; also the duties of the sheriff and
his deputies in looking after the safety of goods at fires, the recovery
of fire-buckets, etc.—Laws of N. Y. (1787), chap. 58 (Greenleaf, 1:
412). On Feb. 18, 1792 (p. v.), the maximum number was increased
to 450.

The legislature passes "An Act for the better regulating the
33 public Roads in the City and County of New York." The common
council is empowered as a board of commissioners to carry the law
into effect. Among the provisions of this law is the following:
"That it shall and may be lawful to and for the said commissioners,
to cause to be made, built and erected, such and so many cause-
ways and bridges, and at such places as they shall think necessary,
and to cause ditches from such public roads or highways to be made
and cut through any person's land, where they shall judge proper,
for conveying the water from, and keeping the same roads and
highways dry and in good order. ..."—Laws of N. Y. (1787),
chap. 61.

The legislation enacts "that the mayor, recorder and aldermen
34 ... of the city of New York, or the major part of them, of whom
the mayor or recorder always to be one, shall be ... the su-
pervisors of the city and county of New York."—Laws of N. Y. (1787),
chap. 61. Such officers throughout the state had the work of
auditing accounts, fixing the amount of money to be raised in the
county each year, and levying the same equally.—Ibid. (1788),
chap. 65.

A majority of the proprietors of lots in Wall St. petition the
common council that the street may be regulated and paved at their
expense, similar to Water St. west of the Coffee-House, and "that
the Pitts Statue, which greatly obstructs the street may be removed."

The aldermen and assistants of the East, Dock, and North Wards
are made a committee to regulate the street, and to report their
opinion regarding the removal of the statue, and also the measures
proper to take regarding "a Statue of Genl Montgomery said to be
in this City."—M. C. C. (1784-1831), I: 283. This reference is prob-
bly to the Montgomery monument, see N. 26, 1784 and Ap
5, 1785.

It is suggested to the common council that a bill be brought into
the assembly for the sale of the lands at the fort and Battery.
A committee is appointed to inquire into the rights of the city re-
garding these lands.—M. C. C. (1784-1831), I: 285. On March 28,
the draft of a petition to the legislature was approved.—Ibid., I:
287. The text of this petition is not entered in the minutes, but see
Mr 28.

The common council, in a petition to the legislature (see Mr
21), recites: "That your Petitioners are informed that a bill for
the Purpose of selling the Fort & Battery in this City is now before
the Honourable the House of Assembly, to be passed into a Law.

That your Petitioners beg leave to suggest to the Legislature,
that the Charter of Governor Dongan to the then Mayor, Aldermen
and Commonalty of the City of New York gives and grants to
them and their Successors all the Waste, Vacant, unpatented
and un-appropriated Lands lying and being within the City of New
York, extending and reaching in, by and thro' all Parts of the
city.

That also, in the said Charter of Governor Dongan, there is a
Reservation among other things of the Fort, called therein 'Fort
James' and of all the Liberties, Boundaries, Extents and Privileges
thereof; and in the Charter of George the Second, to the said
Mayor, Aldermen and Commonalty, there is also a Reservation of
the Fort, called therein 'Fort George' and of 'the Ground, full
Boundaries and Extent thereof, or thereto belonging,'—Yet your
Petitioners consider that they are included (by virtue of the said
Charter of Governor Dongan) to a considerable Part of the Ground
on which the said Battery is built and circumjacent the Fort, and
which is not comprehended within the said Reservations. . . .

"That your Petitioners, anxious for the Ornament of this City,
the Convenience, the Health and the Quiet of the Inhabitants,
persuade themselves that the Legislature will not pass the aforesaid
Bill, if they know thereon that in consideration of that part of the
said Fort or Battery, that the same will not be built upon
or improved in a manner suitable to a Situation so elegant and
proper for publick Purposes, but become a great Nuissance to the
Inhabitants of this City." They close the petition by asking to be
heard in case the Legislature is inclined "to carry the Bill into
effect."—From the original in the city clerk's record-room. It is
evertheless endorsed "Read & approved the 16th of April 1787." See
Ap 16, regarding the action taken by the legislature.

A large number of cartmen, in a petition of this date to the
common council, state that an ordinance was passed "some time
since" of 1784 which made certain parts of the streets lying
within the vicinity of the carts used in said City should not be bound with
Iron, as the pavements of the Streets received injury therefrom; and that they
have since then provided "wheels of a certain breadth without
being shod." They find "a great expense accruing by reason of
their being obliged to have new ones very often;" and that the
streets are just as much injured by them. They ask that a law be
passed "to allow the Cartmen to have the Wheels of their carts
bound with Iron; that the width be three and a half Inches, and
the nails sunk even to the tire."—From the original petition in metal
file No. 7, city clerk's record-room. The petition is referred to a
committee.—M. C. C. (1784-1811), I: 288. It was not granted.

Ibid., I: 255.

The same days before the common council a concurrent resolu-
tion of the senate and assembly, dated Nov. 26, 1784 (p. v.),
providing "That the Monument by the United States in Congress
Assembled ordered to be erected to the Memory of Major General
Montgomerie be erected in the City of New York at such particular
Place as the Mayor Aldermen and Commonalty of the said City
shall appoint." The board selects "the front of St. Paul's Church
... to be the most proper place," and a committee is appointed
to consult the wardens and vestrymen, and with their
approval, to direct that the monument be erected there.—M. C. C.
(1784-1813), I: 289-90. There is a rare, contemporary engraving
of the monument in the author's collection. See, further, My 16
and 23, Je 18, and N 22. For text of the inscription, see Jl 8, 1818.

Bishops White and Provost return to New York from England,
on this Easter Day, having been consecrated in Lambeth Chapel
on Feb. 9. The Protestant Episcopal Church in New York is now
duly organized as a separate establishment, apart from the Church
first bishop. He officiates in St. Paul's Chapel, where he was
formerly rector.—Wilson, Mem. Hist. of N. T., IV: 626; Dix,
A History of the Parish of Trinity Church, II: 113, 114; N. Y. Packet,
Apr. 16, 1787.

The tomb of John Simmons, at Nassau and Wall Sts., was for
several years the regular meeting-place of the standing committee
of the Society for Promoting the Manumission of Slaves.—N. Y.
Packet, Apr 10, O 27, 1798; F 18, Aug 12, 1790.

A "Paper Hanging Manufactory" is advertised: "A large and
elegant assortment of Paper Hangings, with Festoon Borders is Apr.
now finished for sale, at Gerardus Duyckinck's, jun. Store, No. 50.
Little-Dock-street, or at John Colle's at the Manufactory in the

The legislature passes "An Act to institute an University
within this State, and for other purposes therein mentioned." This
consolidates into one law the acts of May 1 and Nov. 26, 1784 (p. v.),
and certain amendments and alterations which have been
requested. Twenty-two citizens are named as "Regents of the
University of the State of New-York," and they are authorized
to inspect, and report upon, all the colleges, academies, and
schools in the state, to appoint presidents of colleges and academies
wherever vacancies exist for more than one year, to confer degrees
above Master of Arts, and to incorporate academies. The charter
granted to King's College on Oct. 31, 1754 (p. v.), is confirmed in all
esential respects except that the name of the institution is changed
to Columbia College, and it is made non-sectarian. Its government
is transferred from the Regents to 24 trustees.—Laws of N. T.,
10th sess., chap. 82. See also Pine, King's College (1797).

The legislature passes "An Act for regulating the Buildings
of Streets, Wharfs and Slipps, in the City of New York." The aim
of this act is to establish uniformity, "for the accommodation of
habitations, shipping and transportation." It provides, among
other things, that the common council shall be commissioned to
lay out all buildings that may narrow or encroach upon any street;
and may make regulations for building sewers, etc., and for paving,
altering, mending, and cleaning the streets.—Laws of N. T. (1787),
chap. 88.

The assembly resolves: "That the Attorney-General be directed
to inquire into the nature of the claim of the Corporation of the
city of New-York, to Fort George, and the land lying thereunto,
[see Mr 21, 28], and that he make a report of the facts to the Legis-
lateure at the next meeting; and that the Commissioners of the
Land-Office be also directed, . . . to cause a survey of the said
premises to be made, laying out the lands which upon such enquiry
shall appear to be the property of this State, into such lots and in
such manner as, in their opinion, will be the most proper and benefi-
cial disposition of the said premises."

—Assembly Jour., 16th session, 165. The senate concurred in this
resolution on April 18.—Jour. of the Senate. The attorney-general's
report was read in the assembly on March 12, 1788 (p. v.). See also

A newspaper advertisement reads: "Theatre. This Evening.
(Newer [before] Performed) Being the 16th of April Will Be Per-
formed, A Comedy of 5 Acts, written by a Citizen of the United
States, Called The Contrast, To which will be added the English

"The Contrast" was written by Royal Tyler, a native of Massachusetts
who was later the Chief Justice of Vermont.—Dusplau, Hist. of the Am.
Theatre (1833), I: 135, 174-40; Ireland, Recs. of the N. Y. Stage, I: 76.
Selhamer says of it: "Royal Tyler's comedy, the 'Con-
trast,' although it was not the first American play actually pro-
duced, as has generally been claimed for it, was the first to
meet with a favorable reception. After its initial performance at
the John Street Theatre, New York, in 1787, it was presented five
times in rapid succession . . . This was unusual at that time,
only the most popular pieces warranting so many repetitions in a
season . . . According to the prologue . . . which was not
from Major Tyler's pen, but was ascribed to a young gentleman of
New York, the dramatist's theme was the fashions or follies of the
gay circles of that city. This shows the usefulness of prologues.
For in the play itself there is no fidelity of the distinctively New York
character of the comedy." For a detailed account of the play and
its author, see Selhamer's Hist. of the Am. Theatre, II: 215, 225-59,
and for an eye-witness's criticism of the first performance, see

M. Wattles, the proprietor of a line of stages, announces that
"An Elegant Coach, And four excellent Horses" will run daily
"from Hall's, No. 49, Cortland-street," to Kingsbridge.—N. Y. Jour.,
Ap 16, 1787.

The following notice appears in one of the daily papers: The
members of St. Tammany's Society in the City of New York are
requested to meet at their wigwam, held at Mr. Talmage Hall's,
No. 49 Cortlandt Street, on the first day of May next
Chronology: The Reconstruction Period: 1783-1812

Samuel Loudon advertises the publication of "Des Barria's drafts" of certain "mercator charts," which are for sale at his office. Among these are charts of the "Harbour of New-York," and of "New-York and Long-Island Sound." These, he states, are "the most accurate and elegant charts which was ever published in any country."—N. Y. Post, May 1, 1817. See also Pls. 44 and 45a, Vol. I, and their descriptions, I: 346-53.

The "Empress of China," of which John Green is captain, arrives in port after a passage of four months and eighteen days from Canton.—Corresp. and Jour. of S. B. Webb, III: 77-78.

There are at this time in the bridewell 33 men and 20 women.

"It is considered by the Board that no person committed to the Bridewell by a Justice ought to be discharged, but by order of the Board of Justices. And that if at any time the Commissioners should conceive the Commitment of a Person improper the Commissioners should suggest the Matter to the Justice in order that what is right may be done."—M. C. (1784-1811), I: 281.

The common council appoints two commissioners, Nathaniel Hazard and Theodore Casion Goerck, "for the direction & management of the Real Property belonging to this Corporation," and appoints a committee to prepare instructions for their guidance.—M. C. (1784-1811), I: 293.

The committee on details began work on July 24, and made its report on Aug. 6.—Records, op. cit., I: 129, 178; Winsor, VII: 241.

The Constitution was signed in the convention on the 17th of July.—Ibid., VII: 245. It was published in Philadelphia on Sept. 19.—Ibid., VII: 246, 256.

The common council orders "that Aldr Bayard direct the Road Master to put Rails along the Road on the side Hill [McGowan's Pass] above Harlem to prevent accidents to Horses & Carriages And also that Mr Aldr direct the sides of the Arch in the Middle Road [Broadway] to be raised on a level with the said Road."—M. C. (1784-1811), I: 295. This is the first reference in the city records to the stone arch or bridge across Broadway at the present Canal St.—See L. M. R. K., III: 236. As suggested by Valentine, it was probably built during the Revolution as a military work.—Columbia Com. Comm. (1863), 604. The fact that it was altered in 1789 probably indicates that it had been built some time before. For a discussion of the subject, see descript. of Pl. 3, b, III: 358-59. See also Ap 16, 1772; No 23, 1775. For execution of the order, showing conclusively that this is the bridge referred to, see My 24, Je 8, 1787; Je 11, 1793.

James Watson is paid £52 for the storage of the monument to Geo. Montgomery (see Ap 3), "out of the Money allowed by the Legislature for erecting the Monument."—M. C. (1784-1811), I: 296. See, further, My 23.

William Samuel Johnson is unanimously elected president of Columbia College. He was the son of the first president of King's College.—Hist. of Columbia Univ., 1724-1904, 70.

Mr. Duane, one of the Trinity church wardens, reports to the vestry that at the request of the Corporation of the City [Ap 28] the Committee had given permission for the Monument of Geo. Montgomery to be erected under the Portico of St Pauls Chapel in front of the great Window."—Trin. Min. (MS.). This entry, and that of Ap 3, p. v, seem to prove that the monument was not designed for this location, to which, however, it is admirably suited. See, further, Je 18.

The vestry also resolves "That the Committee of Repairs examine the ruins of the Rectors House and Charity School house and that they give such orders respecting them as they may deem necessary."—Ibid.

A bulletin is printed by McLean exhibiting a list of the several lots belonging to Trinity corporation which, by a resolution of the city on May 22, are to be sold at auction on June 28, "at the Coffee-house." One of these bulletins is preserved, in the collection of broadsides, in the N. Y. P. L. See also Ind. Jour., My 30, 1787.

A bill of this date is presented to the common council, beginning: "The Corporation of New York D'o' And thompson Juner For Mason Work Dua by order of Alderman Bayard at the New Bridge on the New Road [see My 10] and at the Dene in Mulberry Street." A statement of Thompson's charges in detail for work and materials at each place is given, the amount at the bridge being £8:17:2. The account is verified by Nicholas Bayard, who writes

May 1

An estimate by Daniel Phoenix, city treasurer, of the expenses of the city and county of New York for the year ending on this day shows total payments of £10,970.4. The wages of the city watch, consisting of a captain and 28 men, at £124 per week, amounted to £1,588. They are supported from £500. The only other items in the estimate are expenses for the poorhouse (£4,800, the largest item), the department of street lamps (£1,333:16), the bridge, wells and pumps, roads, new jail (supporting prisoners), and the general election.—Man. Com. Coun. (1839), 597.

"St. Tammany's Day (the Tudor St. of America)" is celebrated by the Tammany Society (see Ap 30) at Tammany Hall's tavern (49 Cortlandt St.). Thirteen patriotic toasts are drunk. One of the newspapers reports that "A correspondent observer, that in establishing the St. Tammany's Day, do honor to the promoters, and makes not the least doubt but it will be the most respectable Society in the city, in the course of a little time."—N. Y. Post, May 1 and 4, 1787. The St. Tammany Day, Old Style, was the reputed anniversary of Tammany's birth. There is no record of a Tammany celebration in New York in 1785. The society, however, was revived and reorganized in 1787 (p. v, Mr 9).

An estimate by Daniel Phoenix, city treasurer, of the expenses of the city and county of New York for the year ending on this day shows total payments of £10,970.4. The wages of the city watch, consisting of a captain and 28 men, at £124 per week, amounted to £1,588. They are supported from £500. The only other items in the estimate are expenses for the poorhouse (£4,800, the largest item), the department of street lamps (£1,333:16), the bridge, wells and pumps, roads, new jail (supporting prisoners), and the general election.—Man. Com. Coun. (1839), 597.

"St. Tammany's Day (the Tudor St. of America)" is celebrated by the Tammany Society (see Ap 30) at Tammany Hall's tavern (49 Cortlandt St.). Thirteen patriotic toasts are drunk. One of the newspapers reports that "A correspondent observer, that in establishing the St. Tammany's Day, do honor to the promoters, and makes not the least doubt but it will be the most respectable Society in the city, in the course of a little time."—N. Y. Post, May 1 and 4, 1787. The St. Tammany Day, Old Style, was the reputed anniversary of Tammany's birth. There is no record of a Tammany celebration in New York in 1785. The society, however, was revived and reorganized in 1787 (p. v, Mr 9).

An estimate by Daniel Phoenix, city treasurer, of the expenses of the city and county of New York for the year ending on this day shows total payments of £10,970.4. The wages of the city watch, consisting of a captain and 28 men, at £124 per week, amounted to £1,588. They are supported from £500. The only other items in the estimate are expenses for the poorhouse (£4,800, the largest item), the department of street lamps (£1,333:16), the bridge, wells and pumps, roads, new jail (supporting prisoners), and the general election.—Man. Com. Coun. (1839), 597.

"St. Tammany's Day (the Tudor St. of America)" is celebrated by the Tammany Society (see Ap 30) at Tammany Hall's tavern (49 Cortlandt St.). Thirteen patriotic toasts are drunk. One of the newspapers reports that "A correspondent observer, that in establishing the St. Tammany's Day, do honor to the promoters, and makes not the least doubt but it will be the most respectable Society in the city, in the course of a little time."—N. Y. Post, May 1 and 4, 1787. The St. Tammany Day, Old Style, was the reputed anniversary of Tammany's birth. There is no record of a Tammany celebration in New York in 1785. The society, however, was revived and reorganized in 1787 (p. v, Mr 9).
Below: "I certify the above work done by Order of the Board."—

From original bill in metal file No. 9 in city clerk's record-room. On
February 13, 1788, the common council ordered payment made amounting
to $417, at which time the original bill, as shown by endorsement,
was audited and filed.—M. C. C. (1784-1811), I: 332. See also descrip. of Pl. 83-b, III: 555. See, further, Je 8.

June

A petition from bakers of the city complains that they have
been paid lately for bread "in Coppers and Jersey Money," which
they are unable to use in buying flour.—From original petition
in metal file No. 7, city clerk's record-room. No action on this
petition appears to the minutes. See, further, Ji 21, 1789.

The common council orders "that Mr. Recorder issue his
Warr 1 on the Treasurer . . . to pay Van Gelder & Dally (out
of the Road Fund) the sum of $24:7r—for Lime, And to Aric
Smith the Sum of $10:0— for Stone at the Bridge across Great
George Street [Broadway] near Ald. Bayards."—M. C. C. (1784-
1811), I: 297.

The original bill of Van Gelder & Dally, filed in the city clerk's
record-room, shows purchases of lime on May 21 and 23 by "Mr. Thompson.
It is attested by Abr. Van Gelder, who certifies that
the "Above Articells was Deliverd by Mr. Tomson for the
Corporation." It was audited on June 8.

Smith's original bill, also preserving among the city clerk's filed
papers, "New York 20 May 1783," and reads: "This Is to Certify that Capt. Ory Smith has delivered forty Lodes of Buldzen
[building] Stone For the Corporation at the Bridge Near Nikcles
Bayard's Errt at 5/qr Lode With the Carten [carting] . . . $10:0-0
'To Nickles Bayard Errt And' Thompson Jun'

Audited June 8th 1787 Tea pounds
'Written 18 Mr 8, 1787—Liber Deeds, XLV. by
Jo Young — Auditors'.

On the reverse of this is the endorsement:

"I hereby Certify that the within Acct 2 of Stone was delivered in
Consequence of An Order of this Corporation to have the Arch in
the New Road, raised at each side
Nicholas Bayard.

N. York June 1, 1787
[signed] "Ory Smith"
It also bears the clerk's filing record: "Acct for Stone & Lime at the
Bridge across Great George Street
Filed June 8th 1787"
See also descrip. of Pl. 83-b, III: 555; and My 16 and 24.

The corps of artillery of the city, under the command of Col. S.
Bauman, parades to the race-course, and executes maneuvers
there.—N. Y. Jour., Je 21, 1787.

A number of citizens form the Mutual Assurance Co., to
insure houses in New York against loss by fire. John Piatard is
secretary, with office at No. 57 King (Pine) St.—N. Y. Packet,
Je 22, 1787. Previous unsuccessful attempts or proposals to found
fire insurance companies were made in 1779 (v. Ap 3), 1784, and
1785.—Progress of N. Y. in a Century, by Stevens (1920), 61-89.
The constitutions and by-laws of the company and an interesting
cut of an engine in action were published in a small octavo hand-
book in 1787, having the title The Deed of Settlement of the Mutual
Insurance Company, for insuring Houses from loss by Fire in New
York, a copy of which is in the author's collection. The company
was incorporated Mr 23, 1798.—Laws of N. Y. (1798), chap. 49.
The "Act to Incorporate" was published as a handbook the same
year; a copy of this is in the N. Y. P. L. The charter was altered in
1809.—See N. Y. Evet. Post, D 12, 1815. The name then became the
Mutual Insurance Co. of the City of New York, which in 1845
was changed to the Knickerbocker Fire Insurance Co.—Smith, The

At a meeting of Trinity vestry, Mr. Dunse produces "a design
made by Col Le Enfant [sic] to ornament that part of the great
Window of St. Paul's Chapel which will be obscured by the Monu-
ment of General Montgomery [see My 23] which the board highly
approve of and request the favour of Col Le Enfant [sic] to super-
intend the execution of it and the putting up of it."—Trin. Min.
(1787), p. 186. See further, June 1878, Pl. 87-c, III: 275, 1788.

At this meeting of the vestry, Mr. Crawford of the committee of
repairs, reports that he has sold the bricks which were part of the
walls of the charity school for $10, the purchaser to pull down the
walls and remove the bricks.—Ibid.

The vestry also passes the following resolutions: "Resolved
That the Committee of repairs be directed to order the repairs of
the Steepel of St. Georges Chapel and that they cause a neat
and cheap fence to be put around the Chapel."—Ibid.

"Resolved That the Committee of repairs be authorised to sell
the Stones of the Rector's house either at public auction or at
Private Sale as they may think proper."—Ibid.

John Altop, Thomas Ellison, Alexander Macomb, William
Denning, Dom. Lyuch, and Walter Livingston present a petition
to the common council, stating that they "are proprietors of several
water lots in the West Ward of the City of New-York lying between
the Battery & Rosevelt's Slip, which have begun to Wharf & Make
the Street at high water mark which is known by the name of first
or greenwich street; which said wharfs will be useless, unless
the whole of the Street be made." They ask the board to give direc-
tions "that the whole of the Street from the Battery to Rosevelts
Slip at high water mark be made." They also state that they are
informed that the board designs "to widen Greenwich or first Street
to 60 feet," while their grants provide that it is to be 40
ft. broad. They ask that, as the board widens the street, their
grants may be extended "as much farther into the River."—From
the original petition in metal file No. 7, city clerk's record-room.

The record in the minutes on this date shows that the petitions
are "proprietors of Lots in the Broad Way & bounded on the
River," and that they say that Messees may be taken for
conveying Augustus Van Cortland to which the Common Council
has granted Lots to the end that Greenwich Street may be continued on & con-

"—M. C. C. (1784-1813), I: 295. The com-

"Memorial to whom the subject was referred reported on Aug. 1
that the petition ought to be granted.—Ibid., I: 310. The lots on
Broadway belonging to Alexander Macomb were acquired by
him May 8, 1787.—Liber Deeds, XLV. by

Two Memorials of Peter T. Curtensius the one praying pay-
ment of a Bond 2d the Corporation & the other praying the settle-
ment on an Acct 2d the Corporation for Iron Work furnished
Christopher Colles for the use of the Water Works previous to the
late War [see S 5, 1788], were respectively read & referred to
Aldo Nelson & Hazzard & Mr. Tea Lyck.—M. C. C. (1784-1813),
I: 310.

Copper peace having depreciated from 14 to 20 to a shilling,
inspectors petition that their fees may be increased.—M. C. C.
(1784-1813), I: 299. See Ji 21, 1789.

The office of the Boston and Albany stage line has moved to
Hall's, No. 49 Cortlandt-street, leading from Oswago Market to
Powles-Hook ferry, being the first brick house on the left hand from
Broad-Way. Stages start for these cities on Mondays and Thurs-
days. A Hackney will always be ready to convey Ladies and Gentle-
men to any part of the town they may please to direct."—

N. Y. Jour., Je 21, 1787.

"Frederick Gantz informs the public that he has erected A New
Tea Water Pump, In Magazine-street near the Fresh Water
Pump, has it now completely finished, and delivering water.
He will work with the citizens that have had a fair trial and better
himself they will find it equal to any water on this island."—Daily
Adv., Je 30, 1787. See Ag 15, 1788.

The keeper of the bridewell is given $20 by the common council
in recognition of his Assiduity & good management in employing
the Vagrants, . . . during the fishing Season in taking such
Quarters of Shad for the Use of the Bridewell & Alms Hs as to
create a great saving . . . —M. C. C. (1784-1813), I: 302.

An engraved certificate was given to the appointed firemen
of the city at this time. Under the motto "Voluntary aid" is
the scene of a burning house, with fire-engines in operation. See
facsimile of one of these in Man. Com. Counc. (1835), opp. p. 120.

The arrangements planned by the common council for cele-
brating Independence Day include the display of colours on the
city hall; the ringing of bells at certain hours; congratulations by
the common council, at noon, to the governor and the "President
of the United States" (i. e., of congress) at their residences, and
on the return of the common council, a collation in which they are to
participate at "Mr. Heyer's Tavern near the City Hall."—M. C. C.
(1784-1813), I: 301. The programme was carried out with the
addition of several interesting events, notably the use of the battery
by the beating of drums and ringing of bells. At sunrise, the
artillery, grenadiers, and light infantry, of Gen. Malcom's brigade,

1787. June 18

1920.
The distance, was his 1788. some
the triangular self-
John Commodore
Lansing vacant only new

itself is
nearly the inscription perpetuating a curious and ingenious Art of Dancing on the Slack Wire.” He is assisted by Mrs. Breon, a singer. Breon concludes his performance “with various Feats of the Dexterity of Hand.”

On the 9th, Cutler recorded in his diary the following description of the interior of the “Congress Chamber” in the city hall: “... Congress Chamber is up the eastern stairs; it is nearly square. On the southern side, the floor is raised several feet, which is ascended by steps and enclosed by balusters. In the centre, is a large chair, raised still higher, lined with red damask silk; and over it a curious canopy, fringed with silk, and two large flowing damask curtains descending from the sides of the canopy to the floor, partly curled with silk cords. This is the seat of the President of Congress. And the appearance at the other end of the Chamber is superb. On the floor of the Chamber, at the right and left, from the President’s chair, are two rows of chairs extended to the opposite side of the room, with a small bureau-table before each chair. The chairs and tables are mahogany, richly carved, the arms and bottoms covered with red morocco leather. On each side of the President’s chair, within the balusters, are chairs and tables, similar to those of the members, for the use of the Secretary and his clerks. In the midst of the floor, is a vacant space, in form of a broad aisle. The curtains of the windows are red damask, richly ornamented with emblems of the East and West, no teams for the General Washington, at full length, well executed. At the opposite end are some of the portraits of General Officers that fell in the late war. On the side opposite the President, are the portraits of the King and Queen of France, as large as life. These were drawn by the King’s own portrait-painter, and presented by His Majesty to Congress. The drapery of the pictures infinitely exceeds anything of the kind I ever saw before. They are dressed in their robes; and life and animation are imitated to perfection. When the damask curtains which cover them were drawn, their eyes were fixed upon us with a vivacity that bespoke life itself; and their majestic countenances seemed to chastise our insolence in approaching them with so little reverence.”

John MacKeny and Joseph G. J. Bend are ordained deacons of the Episcopal Church in St. George’s Chapel. The ceremony of Episcopal ordination is new in America. The Protestant Episcopal Church is now completely organized in the United States as a self-perpetuating body. —Daily Adv., Jl 17, 1787.

Commodore John Paul Jones who is making a short, and, as it poole of a visit to America, is in New York, and addresses an official letter to John Jay, secretary of state (then termed secretary of foreign affairs), taking up the question of prize-money due him, and explaining the reason for his coming to the United States at this time. He writes that it is his intention to return to once to Denmark by the way of Paris, and adds: “It would be highly flattering to me if I could carry a letter with me from Congress to his most Christian majesty [King Louis of France], thanking him for the squadron he did us the honour to support under our flag.” He also calls attention to the letter of recommendation that he had from the court of France May 1780, and the sword presented to him by the King of France, “an honour which his majesty never conferred on any other foreign officer.” —Sherrone, Life and Character of the Chevalier John Paul Jones (Washington, 1825), 381-82.

As the New York law prescribes “that every boat-boat and shallops from N. Jersey, of more than 12 tons, shall be regularly entered and cleared out at the Customs House, in the same manner as if they had arrived from any other foreign port,” the assembly of New Jersey, to counteract this law, has laid a tax of 5½ a month on the light-house at Sandy Hook, in New Jersey, which is owned by “the corporation of New York.” —Daily Adv., Jl 14, 1787.

John Breon, from Dublin, gives a performance at Corre’s City Tavern (115 Broadway), which consists of “the curious and ingenious Art of Dancing on the Slack Wire.”

The fire-engine house in Hanover Sq., referred to as a “Pile of Buildings Situated in the Centre of that Spot,” limits the view and interrupts the free circulation of air. The inhabitants of the locality petition the common council that it be removed, and a new one erected on an unoccupied piece of city property fronting Old Slip. —M. C. C. (1784-1811), 1: 307. The original petition is filed in the city clerk’s record-room. The proposal was reported unfavourably, but it was determined that the house ought to be repaired. —Ibid., 1: 308-9. Being found unrepairable, the common council ordered, on Sept. 12, that a new house be built.—Ibid., 1: 347. On Dec. 5, a warrant for £25, to pay for this, was issued. —Ibid., 1: 348.

New York is described in letters of this date, in part as follows: The buildings “are grand, from four to six stories high, and the sides of the street within the posts are laid principally with freestone, sufficiently wide for three persons to walk abreast. The buildings in Hanover Square, and part of Dock Street exceed any part of the city for grandeur. The streets are kept in fine order, pavements are hard and paved with more than one horse, or with iron-shod wheels, are allowed to pass the streets. The pavements gradually descend from the houses to the center of the streets, where the gutters are for carrying off the water. In this street (Broadway) the gentry ride every morning and afternoon in their carriages, which are generally very grand, and are principally coaches, chariots, and phaetons. The common people ride in open chairs. I did not see more than two or three chaises in the city. The common is considerably large, in a triangular form, and surrounded with buildings. On the northern side of the Square are three very elegant large public buildings, which make a fine appearance at a distance, all built of freestone, with a handsome fence inclosing a courtyard in front. But, when you come near them, you can not fail of being extremely disgusted at the wretched taste and improprity of erecting buildings of this sort. These are appropriated in the most airy and pleasant part of the city, and by which a vast concourse of people are constantly passing. The first is the Prison, four stories high, and a beautiful cupola on top. Near by it is what I at first took to be a beautiful summer-house, raised from the ground. It is in a square form, the sides ornamented with cherubs and flowers in marble, and the beauty of the Chinese taste; the whole very handsomely painted. I was surprised to see so elegant a summer-house so near this building, which I found by the iron-grates to be a prison, but, on inspection, found it was a Gallows, accommodated for turning off six criminals at a time. The next Public Building is the Alms-house, and the third, which is very long and high, is Bridewell. The buildings themselves would be very ornamental to this common, were it not for their odious contents. At the southern end of the city...
THE ICONOGRAPHY OF MANHATTAN ISLAND

Christopher Colles, "engineer," in a petition to the common council, states that "he proposes to open an Evening Academy this winter for the purpose of instructing young Gentlemen in Gunneroy, Drawing, & many other mathematical branches;" he requests the board "to admit him to hold said Academy in the Exchange."

From original petition (in metal file No. 8, city clerk's record-room), endorsed "read Aug 22d 1787 & granted." See also M. C. C. (1784-1831), I: 25, 314; and Daily Ado, S 27, 1787. Regarding his electrical experiments, see ibid., 13, 20, 1789.

The city has but one walk, where the women can enjoy air and exercise, which is the Battery. This, however, is deserted because of the spectacle of naked swimmers who frequent the place.—N. Y. Jour., Ag 30, 1787.

This day being appointed for the parade and review of all the uniformed corps of militia in New York (see N. Y. Gaz., Ag 30), about 600 men, under command of Lieut. Col. Bauman, parade at the "burnt church [Trinity]," and march down Wall St., and up Queen St. to the "race-ground [in Bowery Lane—see S 27, 1786]" where they perform "a variety of evolutions." The corps is reviewed by the governor. In the evening there was a display of fireworks "fronting the fort."—N. Y. Jour., S 6, 1787.

Commodore John Paul Jones writes to George Washington in Philadelphia that he is still delayed in New York by congress, and is so unable to embark in the packet for France, "that is to sail today," that he will have to wait another day. "It is a personal matter, saying: Your determination to 'place my Bust with your own confers on me a greater Honor than I ever before received—An Honor which I shall ever be ambitious to merit. . . . I shall leave you, Sir, to imagine my extreme sensibility on this occasion for I feel, it would be impossible for me to commun-icate it in words."—De Kom's Life of Paul Jones, II: 255-69. The bust here referred to, by Houdon, is probably the one now in the Metropolitan Museum of Art, the gift of John L. Cadwalader.

The common council passes "A Law to prevent the erecting or suspending of Signs to project into the Streets of this City."—M. C. C. (1784-1831), I: 318. The federal convention in Philadelphia completes the work of drafting the Constitution. On the following day, Washington, who was the deputy from Virginia, and the president of the convention, wrote to the president of congress, which was sitting at New York, a letter reviewing the principles which actuated the framers, and submitting a copy of the Constitution "to the consideration of the United States, in Congress assembled." The letter and Constitution were published in the Pennsylvania Packet, May 28, 1787. See also The Records of the Federal Convention of 1787, ed. by Max Farrand (1917); Winor, PH 245, 246, 256. For the celebration held in New York on its ratification by enough states to make it operative, see Jl 23, 1788.

The committee of the common council to whom was referred a petition of Daniel Niven (or Nevins) and others, regarding alleged encroachments on the river and streets by certain public buildings, submitted a report, "that the said petitioners have not been furnished with a copy of the Publick," among the facts presented to support this opinion, it is stated that the subject of the complaint is "some Buildings [which are] now erecting at the lower end of Corlantld Street . . . by which the Street or Passage along the South Side of the Slip there, is greatly contracted and rendered very Inconvenient to Passengers in Crossong the North River, and that the said encroachments are on Publick property." The committee's report discuses the title to the property, including a grant in 1701 of a piece of land along the strand to Peter Jansen Mesier, and a grant in 1766 of a water lot to Abraham Mesier. They find "that the said Corlantld Street was originally forty feet in Breadth, but that the Owners of the Ground there have given up five feet to the North and South Sides thereof to make the said Street fifty feet." The house complained of is being built by Abraham Bussing on the ground conveyed to Peter Mesier, and not on that conveyed to Abraham Mesier. Bussing has an indisputable right to erect his house in the manner he has done, under the directions of John McComb, city surveyor, "on a Parallel line with the other Houses on the South side of the said Street." The report passes in ordinance to "alter & amend" Queen St. from the Fly Market to Kings St.; Water St. from the Fly Market to Wall St.; First or Front St. from the Old Slip to the Fly Market, and Wall St. from the city hall to Queen St.—M. C. C. (1784-1831), I: 316.

1787  on the point of the Island, where North and East Rivers meet, is an old fort, now much out of repair, and which is soon to be removed, for the purpose of erecting houses in a part of the city so convenient for doing business. This fort is built on a prodigious mound of earth raised for that purpose, which is kept up by the walls next the harbor and forty feet in high, and seems to be well situated for commanding the entrance into both rivers; but forts where there is a passage by them are now found to be of very little use. Around this part is the Wall, where a vast concourse of gentlemen and ladies are constantly walking a little before sunset and in the evening. On the part of the Wall next the water, which is of considerable extent, is surrounded by most beautiful glass (brought with freestone from the water), on which they walk. This is a cool and most delightful walk in an evening, having the sea open as far as Staten Island and Redhook, but in the day-time it greatly wants the shade of trees.

. . . On the northern part of the city is a large hospital, built with free-stone, with two extended wings. . . The markets in this city are kept in the finest order. . . The principal is the Fly market, in Water Street; the next is Oswego market, in Broadway. Bakers' market and Merchants' Hall market are also large.

"There is perhaps no city or town of any considerable magnitude where such perfect order is preserved as in New York. . . This is the center of mercantile trade. . . The shipping in this district is exceedingly numerous." He takes an active part in the French and British packet. There is a play-house, but the actors do not perform in the summer, but there are constant exhibitions from rope-dancers, mountebanks, jugglers, and show-men."—Life, Journals and Correspondence of Rev. Manasseh Cutler, L.L.D. (Cincinnati, 1888), I: 306-9.

Aug. Students-at-law are granted the use of the court-room once a week.—M. C. C. (1784-1831), I: 308.

6 The common council appoints a committee to determine whether the barracks in the rear of the almshouse cannot be appropriated for the sick of the almshouse.—M. C. C. (1784-1831), I: 311-12. The committee finds "that five Tenements thereof ought to be appropriated & put in Repair for that Use;" but this report is rejected. Instead, four contracts are appropriated for the purpose.—Ibid. 314. The work was completed and paid for by Dec. 2.—See O 11; and L. M. R. K., III: 924.

5 The vestry of Trinity Church resolves that the fence of St. George's Chapel be completed.—Trin. Min. (MS.).

6 At a meeting of Trinity vestry, a petition from Mrs. Edye Williams is read, in which she asks Trinity corporation to take over the "Vaughall" property (see L. M. R. K., III: 923), which formerly was leased by Samuel Francis, "under whom she claims;" and also that this corporation will "remit her the ground rent due thereon and to grant her an Annuity during the remainder of her life."—Trin. Min. (MS.). A committee of the vestry having been required, on Aug. 8, to see Mrs. Williams, reported on Oct. 29 that they had "informed her of the Intentions of the Corporation to re-extend the Vaught Estate, and to allow her an Annuity of forty Pounds,; and that she had informed them that, "to the best of her Knowledge," the estate was "clear of Encumbrances and that the Lease was burnt at Peaks Kill in the Year 1777. . . ."—Ibid. See, further, Ap 21, 1790.

3 Two Canels lately imported from Madeira, in the Brigantine Olive-Branch, may be seen at the stables of Mr. Stephens, adjoining the snuff and tobacco manufactory of William Maxwell, Esq. in Wall street.—Daily Ado, Ag 14, 1787.

The last issue located of The New York Gazetteer and Public Advertiser (see D 18, 1786) bears this date.—Brigham, A. A. S. Proc. (1917), 432.

2 Fitch's second steamboat (for the first, see Jl 27, 1786), which is an improvement in every way over its predecessor, has its trial trip on the Delaware River. The experiment is witnessed by all the members of the federal convention except Gen. Washington.—Bullock, "The Miracle of the First Steamboat" in Jour. Am. Hist., I: 36 et seq. Fitch successfully tested other boats in July, 1788, and April, 1790.—Ibid; Preble, China Hist. of Origin and Development of Steam Navigation, N 29, 31-3. See Je 5, 1790.

1 The canal passes through the city to "alter & amend" Queen St. from the Fly Market to Kings St.; Water St. from the Fly Market to Wall St.; First or Front St. from the Old Slip to the Fly Market, and Wall St. from the city hall to Queen St.—M. C. C. (1784-1831), I: 316.
The price of these prints, in a neat oval frame (the inner framed gilt) is two dollars each, or one dollar for the print only, and a large selection will be made to those who purchase to sell again—Apply to Charles W. Peale, at the corner of Third and Lombard Street, Philadelphia.

"The printers in the several states, who are desirous of encouraging the fine arts in America, are requested to publish this as an article of intelligence; which will oblige the numerous friends of the General."—Daily Advertiser, S 24, 1787. This print is now very rare.

The conclave of the common council is appointed "to direct the decayed Brick work of the City Hall to be repaired, & the street in the rear to be paved & to devise and direct measures for making the Roof tight."—M. C. G. (1784-1811), I: 327.

On this Sunday, the company of grenadiers and light infantry of Col. Varick's regiment "paraded at the Burnt Church in the Broadway" (Trinity), then marched to the Baptist Church to hear a sermon by Rev. Mr. Gano.—Daily Advertiser, O 9, 1787.

A committee of the common council is appointed "to direct the Breadth of the Area in front of the new Buildings of Messrs[. Alexander] Macomber & others in the Broadway."—M. G. C. (1784-1811), I: 327. They reported on Oct. 11 that they had "directed the Area in front of the New Houses in the Broadway should extend six feet further than the extent of the Railroad be six & half feet from the front of the Houses and that Street when paved should have a Walk on each side for Foot Passengers of fifteen feet."—Ibid., I: 328. Pres. Washington occupied this residence in 1790 (p. 17, F 21).

The continental congress, sitting in New York, resolves "that a medal of gold be struck and presented to the chevalier John Paul Jones in commemoration of the valour and brilliant services of that officer, in command of a squadron of French and American ships, under the flag and commission of the United States, off the coast of Great Britain in the late war." At the same time it was voted that the King of France should be informed by letter that "the United States in Congress assembled have bestowed upon the chevalier John Paul Jones this medal as well in consideration of the distinguished services of his majesty's armed forces as also an enabling Congress to confer upon that officer as from a sense of his merit." This letter was duly prepared on the same day by the secretary of foreign affairs (John Jay), and in accord with the orders of congress was delivered to Jones to convey to the king of France.—Sherburne, Life of Paul Jones, 284-85.; Jour. of the Am. Congress from 1774 to 1783 (Washington, 1833). IV: 11.

The name of The Daily Advertiser: Political, Historical, and Commercial (see O 27, 1785) becomes merely The Daily Advertiser.—Early Newpapers, II: 417; Bringham, A. A. S. Proc. (1917), 397. See Jl 2, 1789.

The common council passes "A Law to compel the filling up and making of Greenwich Street from Cortlandt Street to the Battery." It states that commissioners for regulating the burnt part of the city have laid out Greenwich St. "to be continued from Cortlandt Street to the Battery of the Width of 66 feet," but that some of the proprietors there have failed to fill up the street in front of their lots.—M. C. G. (1784-1811), I: 333.

The first number of "The Federalist" is published in New York, in the Independent Journal. The subsequent numbers were published in all the newspapers of the city. Hamilton, Madison, and Jay were the authors, writing over the nom-de-plume "Publius." These political essays were issued in book form in 1788 by J. and A. McLean, the publishers of the Independent Journal. For bibliographical references to early editions of the combined papers, see note in the catalogue of the John Carter Brown Collection, Part III, Vol. II, p. 273, item 13945 and Sabin, VI: 376-79.

Trinity vestry orders "that the Committee of Repairs be requested to bring in an Estimate for rebuilding Trinity Church, and to report a Plan to this Body."—Trinity Church, I: 1185, 1788.

The vestry also orders "that the Committee of Repairs be requested to have a Stair Case erected on the South Side of St. Paul's in Front, and to make such Alterations in the Gallery on that Side as well as where the Charity Scholars sit, as they may judge proper in Order to accommodate the Members of that Church with Pews in the most convenient Manner."—Ibid.

The committee of repairs is also ordered "to plant out forest Trees" around the churchyard.—Ibid.

The sextons are directed "not to dig any Graves less than six feet in Depth, unless when interrapted by Coffins in the Way."—Ibid.

A contract is made "for altering & repairing a part of the Barracks for an Hospital for the sick of the Alms House."—M. C. G. (1784-1811), I: 335. Payment was made for this work on N 12 and 14.—Ibid., I: 338, 343.

Commodore John Paul Jones, having completed the business that called him to the United States, leaves New York for France by the way of England. He has delayed his departure for several weeks, so as to go on an American instead of a French ship, because, as he wrote to Mr. Jefferson in Paris, of "an account having arrived here that the English fleet is out and was seen steering to the westward, and that a British squadron is cruising in the North Sea." It appears that for some unknown reason he feared lest he might fall into the hands of the English.—Sherburne, Life of Paul Jones, 287-88.

Christopher Beekman, having taken the tavern at 49 Cortland St, formerly kept by Talmage Hall (see My 19), advertises that he "has agreed with the proprietors of the Albany and Boston stages, to make his house the public Stage-house." He "keeps a house of entertainment, and accommodates gentlemen with boarding and lodging." He also has here "a large convenient Assembly Room, which he proposes to let during the winter season, or longer if required."

An additional notice states that the "Northern and Eastern Line of Stages" start from this house, which is "near the Oswego-market," and also from Mr. Lewis's Tavern in Albany, on Mondays and Thursdays, "precisely at four o'clock in the morning." During the autumn and winter, three days will be allowed for the run either way. The fare will be four pence a mile.—Daily Advertiser, N 13, 1787. See Ja 6, 1789.

The common council orders that the recorder institute suits against persons who have made encroachments on the Fresh Water Pond.—M. C. G. (1784-1811), I: 337.

Henry King and Company appear before the common council to request that a committee meet the proprietors of the ground adjoining the barraks, "to ascertain the Line between the Corporation & their Property Also and to lay out a Street between them." The aldermen and assistants of the West and North Wards are appointed for the purpose.—M. C. G. (1784-1811), I: 337-38.

The proposed street became Chambers St. For the location of the buildings, see pl. 42, VI: 11.

Robert Crommelin petitions the common council for permission "to carry a Pier 100 feet into the East River in front of his Wharf commonly called the Crane Wharf." The subject is referred to the alderman and assistant of Montgomery Ward.—M. C. G. (1784-1811), I: 338. The petition was granted.—Ibid., I: 341-42.

Three unchained prisoners are "sent from the new Prison" (see the bridewell).—Daily Advertiser, N 29, 1787.

Thomas Greenleaf changes his paper (see Ja 18) from a weekly
Remarks on John Fitch's Reply to Mr. James Rumsey's pamphlet, by Joseph Barnes, formerly assistant and now attorney in fact to Mr. James Rumsey (Phila., 1783). Regarding Fitch and Rumsey see also Dickinson, Robert Fulton, Engineer and Artist, 137-52. See also F 26, 1789.

From June 16, 1784, to this date, the commissioners of forfeiture executed 359 conveyances of the property of 26 loyalists in the city and county of New York. The amount realized was nearly $200,000. James De Lancey's property alone, consisting of farms, and houses and lots, brought to the state about $120,000. This was the largest sum realized from a single individual in the district.

Flick, Loyism in N. T. during the Am. Rev. (1902), 133-54, and authorities there cited.

1788

In this year, the Rev. William Gordon, of Massachusetts, published, in London, in 4 vols., The History of the Rise, Progress, and Establishment of the Independence of the United States of America. It was reprinted in New York in 1789, in 3 vols.; and again in 1794. "Gordon was the earliest to work in an historical spirit among the original records of the Revolution that had not been made public during the progress of the war."—Winson, VIII. 471. He began in 1777 (see 1776) his collections of data from American documentary sources, and, having secured in 1784 the consent of congress, began then to examine public manuscript records, including Washington's papers at Mt. Vernon.—Ibid., VIII. 470.

In this year, the first edition of The Federalist, in book form, appeared, from the press of J. and A. McLean, New York. It bore the title of The Federalist, well known as a review of the Constitution, as agreed upon by the Federal Convention, September 17, 1787.—Ford, Bibliotheca Hamiltoriana, 12. See O 27, 1787.

There was published in this year, from the press of Sam. and John Loudon, "Printers to the State," a pamphlet entitled An Address to the People of the State of New York, On the Subject of the Constitution, Agreed upon at Philadelphia, the 17th of September, 1787. The anonymous author, who signed the pamphlet "A Citizen of New York," was John Jay—Evans, 21175. Of the three authors of The Federalist—Hamilton, Jay, and Madison—Jay was the only one to issue a separate pamphlet on the subject. It was highly praised by Washington.

The consistory of the Dutch Church adopts measures "to repair and place in complete order the Middle Dutch Church." This was accomplished "at a considerably large expense."—De Witt's Discourse, 42. It was reopened on July 4, 1790 (p. v.).

The second Reformed Dutch Church at Harlem, between 124th and 125th Sts., west of First Ave., "having been ruined during the war, another was begun in 1788, and in 1791 the Rev. John F. Jackson was called as pastor."—Riker, Hist. of Harlem, 459n. See descript. of Pls. 59, 60, 79, Vol. 1; and Pl. 86, Vol. III.

The English luxury displays its follies, it is New York. You will here find the most brilliant silks, gauzes, hats, and borrowed hair. Equipages are rare; but they are elegant. The men have more simplicity in their dress, they disdain gawgs, but they take their revenge in the luxury of the table...

While everywhere in Europe the villages and towns are falling to ruin, rather than augmenting, new edifices are here rising on all sides. New York was in great part consumed by fire in the time of the war. The vestiges of this terrible conflagration disappear; the activity which reigns everywhere, announces a rising prosperity: they enlarge in every quarter, and extend their streets. Elegant buildings, in the English style, take place of those sharp-roofed sloping houses of the Dutch. You find some still standing in the Dutch style; they afford some pleasure to the European observers; they trace to him the origin of this colony, and the manner of those who inhabit it, whilst they call to his mind the ancient Belgo State.

I walk out by the side of the North River; what a rapid change in the space of six weeks! The river is forced back 200 feet and, by a simple mechanism, they have constructed a kind of encasement, composed of large trunks of trees crossing each other at convenient distances, and fastened together by strong beams. They conduct this floating dyke to the place where it is to be fixed, and where there is often forty feet of water. Arrived at its destination, it is sunk with an enormous weight of stone. On all sides
houses are rising, and streets extending: I see nothing but busy
— workmen building and repairing.

"At the same time they are erecting a building for Congress. They are likewise repairing the hospital: this building is in a bad condition; not a sick person could be lodged in it at the end of the war; it was a building almost abandoned: they have restored the administration of it to the Quakers, from whom it had been taken away during the war; and it is being repaired, and the reparations are executing with the greatest vigour. This building is vast; it is of brick, and perfectly well situated on the bank of the North River. It enjoys every advantage; air the most salubrious, that may be renewed at pleasure; water in abundance; pleasant and extensive walks for the sick; making the hospital a preferable prospect, out of the town, yet sufficiently near it."—Nea Travels in the U. S. A., performed in 1788,

Jan. 17

The committee meets at Poughkeepsie (see Ja 6, 1784) to begin its eleventh session. On March 23, it adjourned to convene in the Court-House in the city of Albany," at its next session.— Assemb. Jour. (1785), 3, 144; Senate Jour., 3, 178. The Albany session opened on D 8 (g.7).

4

An open letter bearing this date to "the Worshipful the Mayor" gives advice regarding building plans for the city's development. The writer ("A Citizen") describes the conditions of the period, particularly with reference to extending the city "into the water." He believes that "the Island of New-York contains a sufficient quantity of ground for much larger buildings than will ever have been erected upon it," and therefore no necessity for extending it upon made ground. He argues as follows: "That houses placed upon the natural soil may be built of firmer materials, and will be more durable than those built on made ground. That houses standing on wharves have no advantage over those on the bank, which the latter would not have enjoyed, if no houses had been placed in front of them. That if no houses had been erected on made ground, the town must have extended farther along the East River than it now does, and of course that more lots would have enjoyed the benefit arising from a front on the water, . . . That wells cannot be dug on wharves: that those who live on them must therefore be very ill supplied with fresh water. . . . That houses on wharves, for want of proper foundations, can seldom be built of brick or stone, and covered with tile. That even when these materials are used, the houses are slight, and without parties walls. That houses on wharves, therefore, are more subject to fire. . . . That the Small lots and narrow Streets on the wharves spread this calamity. That every street laid out upon the water, puts another Street farther from it. That every new grant of a water lot is therefore an injury done to the property of those who live in the interior parts of the town. . . . But if the government had the power to express conditions to erect no buildings on them, the whole town would have been surrounded on three sides by a key, extending so far into the water as to answer the purposes of commerce. . . . That these wharves being much less extensive than those which are now erected, the harbor would, in a great measure, have retained its natural size, which would have prevented that encrease in the rapidity of the tide which these encroachments have occasioned. . . . "This city occupies about three hundred and fifty acres of ground. One hundred of which consist of lots taken from the water. The wharves erected for this purpose, with the repairs expended upon them, would be cheaply estimated at $600,000, one third of which sum would have been sufficient for all the purposes of commerce, and the construction of one million of dollars . . . . hind from the imprudence of the Corporation, in granting water lots without annexing any restriction thereto, been absolutely thrown away, or what is much worse, expended to the most ruinous purposes—a sum that will appear infinitely larger, if we consider that the greatest part of it has been drawn from a commercial stock, and add to our calculations the profits that would have resulted from it to commerce. . . . The North river is still for the most part in its native state; it is essential to the health, strength & beauty of this city that it should remain so. . . . There is a considerable space between the houses that front the Broad-way and the river, and this space will be still more enlarged by the wharves which the proprietors of the river have all built for their own convenience. This will afford room for the erection of batteries in times of danger—the height of the houses on the bank, and the breadth of the streets, will render them little liable to danger from the fire of an enemy. . . . All these advantages will be lost by extending the houses into the river. . . . "Put a stop, then, to your improvements, (as they are absurdly called) upon the North River. . . . Lay out no new streets, and let Greenwich-street terminate at Trinity Church. The lots to the south of this are in the hands of opulent Citizens. Let them extend their gardens across the street. . . ." Few among them are so tasteless, as to permit the sight of wretched houses, smoky chimneys, and dirty streets, to shut out a view of one of the finest rivers in the world, and the beautiful shores that limit its western extent."—Daily Adv., Ja 9, 1788.

A committee of Trinity vestry is appointed "to solicit Subscriptions for rebuilding Trinity Church," with the assistance of "the Right Reverend Rector and the Clergy of the Church."— Trin. Min. (MS).

"The Committee on the Case of Christopher Colles [see D 5, 1785] reported verbally the Information which they had been able to obtain on the Subject of his Claim on the Corporation for Monies due him for his Services in superintending the erection of the Works for supplying this City with Water previous to the late War. "Whereupon the Board agreed in Opinion that some Ballance probably was due to Mr Colles on account of the above Service. But that as the Books of the late Treasurer in which those Accounts were entered were at present out of the Power of this Board; the Sum actually due remained uncertain until further Information on the Subject could be obtained. "Ordered that the same Committee with the addition of Aldn Gilbert report from the best Information they can procure, the Sum which in their Opinion this Board ought reasonably to allow Mr Colles in full discharge of all his Demands against this Corporation on Account of the said Water Works."—M. C. C. (1784-1811), I: 344-45. See Ja 16.

16

The Application is to be made to the legislature for £1,000,177 to pay the outstanding accounts for erecting the monument to Gen. Montgomery.—M. C. C. (1784-1811), I: 348.

The committee on the case of Christopher Colles (see Ja 12) recommends that he be paid £1,500. Colles having expressed his willingness to accept this sum, the common council orders the treasurer to make payment "on Condition that he [Colles] execute to this Board a Release against all Demands which he may have against this Corporation for or on account of his Services in Superintending & managing the erection of the Works begun previous to the late War for supply® this City with Water."—M. C. C. (1784-1813), I: 348. A revival of the project to supply the city with water was being agitated on Jan. 29 (g.6).

Daniel Phoenix, city treasurer, prepares a budget for the city and county of New York, for the year 1788, amounting to £1,270,000. As in the previous year (see May 1, 1787), the largest item is for the support and repair of the pothouse, £48,500, a reduction, however, for this object of £100. The watch consists now of one captain and 30 men, and it is proposed to add 15 men to the force, thus raising the expense of the department to £285,332. The other items of expense are the same as in the previous year. A tax of £1,000,000 is reduced to £75,150, by insolvents and the cost of collecting.—Man. Com. Coun. (1879), 597.

A petition to the common council is being circulated in the city for signatures. This states: "That as the present mode of furnishing this City and shipping with water, is in many respects subject to many inconveniences, we do hereby declare our approbation of a design for supplying the same by means of water-works and conduit pipes, and will (as soon as the same shall be completed) be satisfied to pay our respective proportion of a tax for the purpose, provided the same does not exceed twenty-six shillings for each house per annum, at an average. May it therefore please your honors to take the premises into consideration, and to adopt such measures for effecting the same as you shall judge most expedient, for the advantage, convenience and safety of the City."—

"Calculation

"Supposing 3500 houses in the city at 265 is

£160

Of which

1000 houses rated at 45s. per ann. £2250
1000 ditto 26 1500
1200 ditto 10/ 26 610

£4160."
The Society for the Relief of Distressed Debtors, which was organized a year ago (see Jan. 26), has been enabled, "by the charitable contributions of sundry persons," to afford relief to 125 debtors. - *Daily Adv.*, Ja 30, 1788.

"Bellevue" is offered for sale, or to let. It is described as a "beautiful Country Seat...situated on the banks of the East River, about three miles from the city." Terms are obtainable of John Murray in Queen St. - *Daily Adv.*, Ja 29, 1788. It was again advertised in Feb. 12, and Ap 25, 1789.

Ecclesiastics and others occupying stores on the Albany Packet are paying high rents, for the convenience of having the privilege of vessels discharging their cargoes at their doors," complain in a petition to the common council that lumber and shingle boats occupy the wharves in front of their stores for weeks at a time, thereby compelling them to pay carriage (evidently on goods arriving on boats which have to discharge their cargoes at a distance), and also exposing their stores to the danger of fire, because the shingle boats "have no other convenience for their fires and cooking than amidst their Shingles on the Decks of their Vessels," within a few yards of the stores. They ask that a law be passed "that no lumber or Shingle Boats shall be admitted to come farther into the Slip than the Ell from the Peir." - From the original petition (in metal file No. 7, city clerk's record-room), ed. Feb. 9, 1788, a copy is referred to the Alm. & Assist. of the Dock & the Alm & Assist. of the East Wd." See also M. C. C. (1784-1811), I: 351. Accompanying the original petition is the report of the committee, dated F 20, in which they state that "it is Dangerous for Shingle Boats to Lie in Coenties Slip above the Ell, or in any other part of this City amongst the Buildings," and they recommend "that a Law be passed to prevent the like danger in future." See also M. C. C. (1784-1811), I: 352. A proposed ordinance intended to remedy the evil failed to pass. - *Ibid.*, I: 762-63.

The proprietors of a new line of stages advertise the fare between Bowles-Hook and Philadelphia to be "three Spanish milled dollars, and all way passengers four pence per mile, 150 lb. of baggage to be the same as a passenger; Printers papers and letters will be conveyed gratis..." The stages leave Bowles-Hook at 7 o'clock P. M. every day for Philadelphia, except Saturday." - *N. Y. Packet*, F 22, 1788.

The vestry of Trinity Church orders "that the Seal of the Corporation be affixed to a Petition to the Legislature for changing the Name of the Corporation to that of "The Rector and Inhabitants of New-York in Communion of the Protestant Episcopal Church in the State of New-York." - *Trin. Min. (MS).* The former title was "The Rector and Inhabitants of the City of New-York, in Communion of the Church of England, as by Law Established." The petition explains that, as the Protestant Episcopal Church has now become completely organized, it is improper to retain a name expressive of a connection and dependence which no longer exists. The petition is granted. - *Assemb. Jour. (11th sess.),* 89. A law to the desired effect was passed Mar. 10 (q.t.).

In order to "leave sufficient Harbour" and "a free Passage" for the ferry boats at the ferry stables, during the continuance of the lease of the ferry to Elizabeth Mesier (that is, the "Bowls Hook ferry at Cortland Slip"), the common council orders that not more than three river sloops be permitted to lie on the north side of the ferry stables and two sloops on the south side. - *M. C. C. (1784-1811),* I: 535.

The legislature passes "An Act for punishing Treasons and Felonies, and for the better regulating the Proceedings in Cases of Felony." The privilege called "benefit of clergy," heretofore allowed in criminal cases, is abolished. Numerous crimes are made punishable with death. - *Laws of N. Y.* (1788), chap. 37.

The legislature passes "An Act concerning Slaves." Among its provisions are the following: Slaves shall continue to be slaves unless manumitted. Any person selling a slave brought into this state after June 1, 1785, shall forfeit $100, and the slave shall be free. The children of women slaves shall follow the condition of the mother. - *Laws of N. Y.* (1788), chap. 40.

This law appears to have been inadequate. There is preserved in the Emmet Coll., in the N. Y. Pub. Library, a manuscript petition, signed by 101 names, asking for the law's revision. Its date appears to be 1798. This asks that it be made "the duty of Civil Officers, not only when in the immediate execution of their Office, but at all times to see the law duly respected and enforced," and asks for an increased penalty for violations; also "the better regulating of Taverns, tippling Houses, and the suppression of Brothels, all which have been encreased to a number truly alarming, and are fruitful sources of Idleness and Vice"; the petitioners are persuaded "that the Evil will continue more or less to exist, while the encomium arising from the granting of Licenses is a perquisite annexed to the Office, which is a powerful incentive to grants of licenses than may be good for Society, or the benefit of individuals;" they therefore ask the legislature to consider "whether in all cases, the revenue, which might arise from that quarter, had not better be paid into the Public Treasury; and the Officer have a salary equivalent, independent of any perquisite being annexed to it." - *Emmet Coll.*, 11640.

"A Petition of a great number of Inhabitants of this City suggesting the inconveniences which arise from the present Mode of supplying this City with Water & praying this Board to adopt such Measures for supplying it with Water by means of Pipes agreeable to a Plan or proposal set on foot by Christopher Colles & such other Plan as to the Board shall appear most expedient" (see Ja 29) is read on common order and referred to a committee "to consider of the Subject & to report such Measures as they conceive most proper to be pursued on the Occasion by the Corporation for the Advantage Convenience & Safety of this City." - *M. C. C. (1784-1811),* I: 354-55. This matter was again dropped, as it had been in 1786 (q.t.). - *Ibid.*, Ja 8, 1789.

The common council orders that the engineer erect an engine-house on the ground adjoining the North Dutch Church. - *M. C. C. (1784-1811),* I: 356. This house was paid for (f311) on July 2. - *Ibid.*, I: 383.

"Payment is made to Andrew Thompson, Jr., for paving in front of several Lots on Golden Hill in a new Regulation of that Street [John St.] in 1785." - *M. C. C. (1784-1811),* I: 356.

The following extracts are taken from a contemporary description of New York: "The City-hall is a brick building, more strong than elegant. It is three stories in height, with wings at each end, and fronts Broad-street, which affords an extensive prospect. The first floor is an open walk, except two small apartments for the door-keeper and city watch. In the second story of the Eastern wing, is the Assembly chamber, now occupied by Congress, and adorned with paintings: The portrait of the great Columbus, belonging to the Assembly of this State; a painting valuable only for its antiquity and the character of the man — The likeness of the King and Queen of France, as large as the life, executed in a masterly manner, and presented to Congress by his most Christian Majesty; equally valuable for the richness of the paintings, the dignity of the personages whom they represent, and as pledges of royal friendship — The likeness of General Washington, presented by a gentleman in England: a likeness dear to every American, and destined to grace the walls of every Council chamber in the new world."

"The Western wing contains a room for the Council or Senate, now occupied by the Secretary of Congress, and another for the Mayor's Court. In the body of the house is a spacious hall for the Supreme Judicial Court." - *Ibid.*

"This city is esteemed the most eligible station for commerce in the United States. It almost necessarily commands the trade of one half New-Jersey, most of that of Connecticut and part of that of Massachusetts; besides the whole fertile interior country, which is penetrated by one of the largest rivers in America, navigable 170 miles. This city imports most of the goods commanded between a line 30 miles East of Connecticut river, and 20 miles West of the Hudson, which is 150 miles, and between the ocean and the confines of Canada, about 250 miles; a considerable portion of which is the best peopled of any part of the United States, and the whole territory contains at least half a million people, or one-sixth of the inhabitants of the Union. Besides, some of the other States are partly supplied with New-York commodities, such as the common commodity flour, Pennsylvania and Maryland have rivalled it — the superfine flour of those States commanding a higher price than New-York." - *Ibid.*
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1788

"In the manufacture likewise of iron, paper, cabinet works, &c. Pennsylvania exceeds not only New-York, but all her sister States."

in times of peace, however, New York will command more commercial business than any town in the United States. In time of war, it will be insecure, without a marine force; but a small number of ships will be able to defend it from the most formidable attacks by sea.

"The change of inhabitants effected by the revolution was considerable, and had some effect upon the general character of the citizens. Notwithstanding, in point of sociality and hospitality, New-York is hardly exceeded by any town in the United States. The principal families, by associating in their public amusements, with the middling class of well bred citizens, render their rank subservient to the happiness of society, and prevent that party spirit, which an affectation of superiority in certain families in Philadelphia, has produced in that city—a spirit which disturbs or destroys their public amusements, and which has given the citizens, too generally, perhaps, the reputation of inhospitable.

"Several causes however, have operated to diminish the sociality of the citizens of New-York—particularly the change of inhabitants, and the loss of property, during the ravages of war—and the unfavorable state of business since the establishment of peace. These causes have had their influence in all parts of America; and perhaps as little influence in New-York as in any other town."

"The charge of neglecting reading and the improvements of the mind might be just in Smith's time [1759], but if it just, it did not lie solely against the inhabitants of this city. That the Americans were formerly and may be still behind the citizens of London in their attention to literature and the arts, will be acknowledged—nor is it surprising. Yet no person acquainted with the well bred American ladies, can charge them generally with ignorance: and there are great numbers in New-York, whose minds are highly improved and whose conversation is as inviting as their personal charms.

"Nor are the schools in this city in such a deplorable situation, as they were formerly. There are many which are kept by reputable and able men; and Columbia College affords a very favorable prospect.

"It must not, however be concealed, that Smith's description of the state of education is now but too just, with respect to the country at large. There are several good academies in the country, but many parts are either unfurnished with schools, or the schools which they have are kept by low ignorant men, and are consequently worse than none. This remark may be extended to a large proportion of the United States.

"An enquiry, who would wish to acquaint himself with the true state of the people of New-York, their manners, and government, would naturally ask the citizens for their societies for the encouragement of sciences, arts, manufacturers, &c. For the patrons of literature? Their well regulated Academies? For their Female Academy for instructing young ladies in geography, history, belles lettres, &c. Such enquiries might be made with propriety.

"The practice of physic, it is presumed, is on a better footing than when Smith wrote his history. That it is capable of many improvements, in all parts of America, will hardly be denied by the faculty themselves. There are however many very eminent physicians and surgeons in New-York; and it is only to be regretted that there arises a necessity of going abroad for knowledge which ought to be had at home.

"All free governments abound with lawyers. Where men have the privilege of thinking and acting for themselves, they will involve themselves in debt, and quarrel with their neighbors. In proportion to the debts and disputes of the people, lawyers will multiply. Of these Americas furnishes a plentiful growth, and New-York has its share. In this State, the practice of law is conformable to the English mode, and is perhaps better regulated than in the other States. The several degrees in the profession—the number of critical examinations that candidates are obliged to pass thro', before they can be admitted as Counsellors in the higher courts together with the time of study required by the rules of admission, render an access to the first honors of the bar so exclusive, and so difficult, as to keep from the profession the people of most importance in the science of law. New-York can boast of many men, eminent in a very liberal profession, and which has hitherto furnished America with some of her most able legislators. It is however to be feared that a too rigid adherence to the forms of legal process in England, Mar. has sometimes perplexed the road to justice, and prevented valuable improvements in the practice, not only of this, but of most of the States.

"On a general view of this city, as described thirty years ago, and in its present state, the comparison is flattering to the present age; particularly the improvements in taste, elegance of manners and that easy unaffected civility and politeness which form the happiness of social intercourse..."

"The following account of the number of dwelling-houses in the principal towns of the United States is given mostly from theEditor's lists, by association in the years 1755 and 1766. The round number nearest the actual number is given, merely to assist the memory. [The cities mentioned below are selected.]

Boston, 12,000
New York, 13,500
Philadelphia and suburbs, 4,300
Baltimore, 1,500
Charleston, 1,500"—Am. Mag., Mr., 1788, pp. 229-29.

The legislature passes an act for the better regulating of inns and taverns in the city of New York, stipulating that no permits shall be granted to retail strong or spirits liquors for the purpose of keeping an inn or tavern, unless it shall appear "that an inn or tavern at the place, at which such permit is applied for is necessary for the accommodation of travellers."—Laws of N. Y. (1788), chap. 48.

The treasurer of the city is ordered to pay, out of the excises, the sum of $800 annually for four years to the society of the hospital.—Laws of N. Y., chap. 48 (Webster). At the expiration of this law, the legislature again came to the aid of the society (see Ap. 14, 1792).

The legislature passes the following act: "Whereas the levelling and altering of Wall-Street in the City of New York renders it inconvenient that the remains of the Statue [see N 30, 1777] of the late Earl of Chatham, ... which now Stands in the Said Street, Should continue there. Therefore, ... it is hereby enacted, that it Shall be lawful for the Corporation of the City of New York, to cause the Said Statue to be removed to Some convenient place, where the Same may be preserved, until the further order of the legislature."—Laws of N. Y. (1788), chap. 57. See Jl. 16.

The legislature passes "An Act for the better Settlement and Relief of the Poor." It provides, among other things, that the common council shall nominate and appoint twelve or more freeholders and inhabitants to be overseers of the poor, and to be known as "The commissioners for the almshouse and hospital of the City of New York."—Laws of N. Y. (1788), chap. 62.

The legislature passes "An Act for dividing the State into Counties." The boundaries of the county of New York are defined as follows: "to contain the islands, called Manhattans Island, Great Barn Island, Little Barn Island, Mannings Island, Nutten Island, Bedows Island, Bucking Island, and the Oyster Islands, and all the land under the water within the following bounds: beginning at Spuyten Duyvel Creek where the same empties itself into Hudson's river, on the West Chester side thereof, at low water mark wherever the same now is or hereafter may be, and so running along the said creek at low water mark as aforesaid, on the West Chester side thereof, unto the East River or Sound, and from thence to cross river to Nassau Island, to low water mark there aforesaid, including Great Barn Island, Little Barn Island, and Mannings Island, and from thence along Nassau Island shore, at low water mark as aforesaid, unto the south side of Red Hook, and from thence across the North river, so as to include Nutten Island, Bedows Island, Bucking Island, and the Oyster Islands, to low water mark on the west side of Hudson's river, or so far as the bounds of this State extend there, and so up along the west side of Hudson's river, at low water mark, or along the limits of this State, until it comes directly opposite the first mentioned Creek, and thence to the place where the said boundaries first began."—Laws of N. Y. (1788), chap. 61.

An act of the legislature authorises the common council to pass regulations for making, mending, and maintaining fences in New York.—Laws of N. Y. (1788), chap. 65.

Agreeable to the petition of Trinity vestry of Feb. 20 (v.), the legislature authorises the desired change in this corporation's name.—Laws of N. Y. (1788), chap. 66.
The report of Ebright Benson, the attorney-general, dated Feb. 25, regarding the claim of the city of New York to Fort George and adjacent lands (see Ap 16, 1787), is read in the assembly. It is a review of the whole question of title, beginning with the Dogan Charter of April 27, 1686, the patent on “Catherine Charter of Jan. 15, 1737,” and the charter given to the city all the waste, vacant, unpatented and unappropriated lands on Manhattan Island, extending to low-water mark, excepting the Fort and the “liberties” thereof, and these were reserved to the king. The legislature of the colony confirmed these charters. On Nov. 21, 1734, the common council expressed no objection to a clause in a bill creating a legislature for erecting a battery on Long Rock. “Said to this Corporation the undoubtedly right they have to the soil from high-water mark to low-water mark, from White-Hall to Elders Corner.” This bill became a law on Nov. 28, 1734. The attorney-general further pointed out that there was no evidence of any claim or possession on the part of the city of the soil below low-water mark or above high-water mark between those places. Such lands the state now claims—that is, Fort George and the adjoining lands—it being understood that a jury can legally determine where the lines of high and low-water marks are.

It is therefore resolved by the assembly: “That the Surveyor-General do make a survey of the grounds reserved to the crown in the charter to the Corporation of the city of New York, as Fort George, and the government lands, into full boundaries and bounds thereof, and also of the streets and lanes immediately adjacent thereto, and also of the soil heretofore under the water, and wherein the battery now is, and between White-Hall Slip and the place heretofore called Elders corner, and lay before this House at the next meeting of the Legislature, a map of such survey to be formed on a scale of twenty feet to an inch; That the Attorney-General and Surveyor-General do endeavour from such proofs as they shall be enabled to discover, to ascertain as nearly as may be, the lines of high and low water mark between the said places, at the time when the last Charter was granted to the said city, and that such lines be also delineated on such map;” also “That the Commissioners of the Land-Office, shall direct the Surveyor-General to survey the Island commonly called Nutten-Island and the Alms of the Mayor and Aldermen of the City of New York, to lay out the same into lots not exceeding two acres each, with such lanes or streets as the Commissioners shall think proper; and shall direct the Surveyor-General to sell the said lots in such manner as he is required to sell unappropriated lands, by the act for the speedy sale of unappropriated lands, passed the fifth day of May, in the year 1786; and that on such sales no public securities, other than those signed by the Treasurer or Auditor of this State, shall be received in payment; Provided that it shall be in the discretion of the Commissioners, to direct such parts of the said Island as they shall deem proper to be reserved for fortifications, to remain unsold.”—Assemb. Jour., 11th sess., 125-27. See also Mr 20, and Col. Baumann’s report of Je 16, 1788.

The common council grants to Trinity corporation a triangular piece of ground, bounded by Bowery in the front, the junction of the Post and Bloomingdale Roads, for a school-house, church, parsonage-house, and burial-ground, agreeable to the intention of the board on Dec. 12, 1771 (see Jl 22, 1771); and a committee is appointed to consider and report the terms on which the grant ought to be made.—M. C. C. (1784-1831), I: 357-58. See further, Ag 20.

“...To be sold or let. That very pleasant seat, late the property of Roger Morris, Esq., situated on Harlem-Heights, containing upwards of 130 acres of meadow and arable land; the mansion house and out buildings are perhaps not exceeded in this State, for elegance and spaciousness, and the prospect from the house is the most commanding on the island; the garden contains a large collection of the best fruit trees. For terms apply to Michael Joy, Haym Schwartz, or Mr. James J. Bogart, No. 43, Behrman-street.”—N. T. Packet, Mr 18, 1788. The house was advertised again the next year.—Daily Adv., Mr 17, 1789. See also Mr 12, 1790.

The body of Maria Farmer is interred in Trinity Church, her funeral being conducted, in accordance with her will, after the ancient Dutch custom. “The followers, after being liberally supplied with spiced wine, pipes, and tobacco, moved in Procession to the church, where Mr. Farmer was the grand-daughter of Jacob Leisler.—See Mr 12, 1784.

Again it is announced that Trinity corporation is to sell numerous lots at auction.—Daily Adv., Mr 18, 1788. These lots were situated in Chambers and Read Sts., and other places, within the

“Dominies Hook Patent,” in the West Ward. The heirs of Anneke Bogardus, and those holding rights under them, published a notice, the day before the sale, of their intention to support their claim to the lots.—Ibid., Mr 18, 1788. See also Anneke Jan, Bogardus & Her Farm, by N. Y. Hist. Society, 1879; or ibid., in Harper’s New Monthly Mag., 1885, pp. 336-39.

The legislature passes an act “to extend the Powers of the Commissioners of the Land-Office to the Cases therein mentioned.” It provides, in part (see Mr 12), “That the commissioners of the land-office shall direct the surveyor-general to survey the Island belonging to Nutten-Island, or Governor’s-Island, and to lay out the same into lots not exceeding two acres each, with such lanes or streets as the commissioners shall deem proper, and shall direct the surveyor-general to sell the said lots in such manner as he is required to sell unappropriated lands. ...” (under an act of May 1, 1786). It shall be in the discretion of the commissioners to direct that such parts of the island as they deem proper shall be reserved for fortifications, and remain unsoiled.—Laws of N. Y. (1788), chap. 89 (Greenleaf, III: 196). It is not known that any portion of it was so disposed of. See Mr 31, 1790.

The legislature passes “An Act relating to the forfeited Estates.” It provides that the office of commissioner of forfeitures shall cease or Sept. 1 next, and that the real estate forfeited to the people of the state shall thereafter be disposed of by the surveyor general.

Laws of N. Y. (1788), chap. 90.

The vestry of Trinity Church passes a resolution “...that this Corporation will join with the Trustees of Columbia College, and the Corporation of the Dutch Church in the City of New York, in the Appointment of Morgan Lewis and Brockholst Livingston Esquires to solicit and transact the Business of this Corporation & the said other Corporations respecting their Lands in the District of Country called Vermont; ...”—Trin. Min. (M.S.). For a history of the lands here referred to, see F 6 and 26, 1767; Mr 30, 1790; Apr 4, 1774.

The common council authorizes the treasurer to lease Bedloe’s Island “for three years on the most advantageous Terms in his power, reserving the Use of the pest House & the privilege of Fish- ing & Hunting in the Government’s-Island & the La-Hunter。”—M. C. C. (1784-1831), I: 359. On April 70, the treasurer reported that he had rented it at £1000 a year.—Ibid., 356.

The lease of the house occupied by “the Widow Baker,” opposite the fish market, is offered for sale by Jonathan Lawrence. The house is described as “...one of the principal stands in this city.”—N. T. Packet, Apr 4, 1788.

The purchase of the Garden and Farm, at Ranalegh, in the Out Ward ... belonging to the estate of Anthony A. Rutgers, deceased,” are offered for sale.—Daily Adv., Apr 5, 1788. See L. M. R. K., III: 927; also Mr 5, 1794.

Petitions are under consideration by the common council for filling up part of Dye, Cortlandt, and Crown Slips; also for filling at Burling’s, and Gluck’s, and to form “Ships’ and Carpenters’ slips.”—N. T. Packet, Apr 13, 1788.

The called “Doctors’ Riot” occurs.—N. T. Packet, Apr 13, 1788. The following appears to be an accurate account of the event from a contemporary source: “...During the last winter, some students of physic, and other persons, had dug up from several of the cemeteries in this city, a number of dead bodies for dissection. This practice had been conducted in so indecent a manner, that it raised a considerable clamor among the people. The interments not only of strangers, and the blacks, had been disturbed; but the corps of some respectable persons were removed. These circumstances most sensibly agitated the feelings of the friends of the deceased, and brought up the passions of the populace to a fever pitch.”

On Sunday the 13th inst. a number of boys, we are informed, who were playing in the rear of the Hospital, perceived a limb which was imprudently hung out of a window to dry; they immediately informed some persons—a multitude soon collected—entered the Hospital; and, in their fury destroyed a number of anatomical preparations; some of which, we are told, were imported from foreign countries—one or two fresh subjects that were interred the same evening. Several young doctors narrowly escaped the fury of the people; and would inevitably have suffered very severely, had not his Honor the Mayor, the Sheriff, and some other persons interfered, & rescued them; by lodging them in goal.
"On Monday morning a number of people collected, and were determined to search the houses of the suspected physicians. His Excellency the governor, His Honor the Chancellor, and His Worship the Mayor, finding that the passions of the people were irritated, went among them, and endeavored to dissuade them from committing unnecessary depredations. They addressed the people pathetically and promised them every satisfaction, which the laws of the country and their respect upon mutual consideration. After examining the houses of the suspected doctors, retired to their homes. But in the afternoon the affair assumed a different aspect. A mob . . . went to the goal, and demanded the doctors who were there imprisoned. The Magistrates finding that the mild language of persuasion was of no avail were obliged to order thegendarmes to suppress the riot, to maintain the dignity of government, and protect the goal. A small party of about 18 armed men assembled at 3 o'clock, and marched thither—the mob permitted them to pass through, with no other insult than a few volleys of stones, dirt, &c. Another party of about 12 men, about an hour afterwards, made a similar attempt, but having no orders to resist, the mob surrounded them, seized and destroyed their arms. . . . they then endeavored to force the goal, but were repulsed. . . . They then destroyed the windows of that building with stones, and tore down part of the fence.—At dusk another party of armed citizens marched to the relief of the goal; and as they approached it, the mob huzzaing, began a heavy fire with stones, brick-batts, &c. Several of this party were much hurt, and in their own defence were obliged to fire upon which three of the gendarmes were killed, and a number wounded. The mob shortly after dispersed.

"On Tuesday morning the militia of General Malcom's brigade, and Col. Bauman's regiment of artillery were ordered out. . . . But happily the mob did not again collect, and the peace of the city is once more restored."—Ibid., Ap. 25, 1788.

14 Wm. A. Duer, an eye-witness of the "Doctors' riot," later said that Baron von Steuben accompanied Gov. George Clinton, Mayor James Duane, Recorder Richard Varick, and other officials to the scene of the doctors' riot. While passing along Chatham Row on their way to the jail, "the Governor declared his determination to resort to the most vigorous and decisive measures for quelling the riot. The Baron, in the benevolence of his heart, remonstrated with the Governor against ordering the militia to fire; when in the midst of his harangue he was struck in the forehead by a brick-batt, which, according to the Governor's account, not only knocked the good Baron down, but overset his humanity and brought his compassion, with his body, to the ground; which he so sooner touched him that he cried out lustily, fire! Governor, fire! I saw the poor Baron brought bleeding into my father's house, and after he had retired to have bled out, he was called back. . . ."

16 The common council orders that the injuries done to the jail in the doctors' riot be repaired, and that a military guard of one officer and 15 men be stationed there.—M. G. C. (1784-1831), I: 365-64.

Col. John May, while in New York, visits "the Congress Chamber." Of this he observes: "The greatest curiosity I saw was pictures of their majesties the King and Queen of France [see 1783].—their appearance truly elegant and noble. No painting can excel these. The frames that contain the pictures are magnificent—twelve feet high from six, wide, and the plate of glass is not high enough to receive their crowns (perhaps a pæase of their doom). From thence I went to St. Paul's Church. . . . From thence went to see a pile of new buildings, nearly completed, belonging to a Mr. McComb [Macomb], by far the finest buildings my eyes ever beheld, and I believe they excel any on the continent [sic]. In one of the entries I traveled up five flights of stairs the cot could give. Gun had come from reliable effect upon my knowledge. . . .":—Jour. and Letters of Col. John May, of Boston (1873), 20-21. The Macomb residence, on Broadway, became, in 1799 (p. v, F 3), the residence of President Washington.

By reason of the increase in the number of houses in the neighborhood of the old powder magazine, "it becomes dangerous to the safety of the City. This had therefore required by the common council "to remove all the Gun Powder from the old to the new Magazine & that no Gun powder be deposited in the old Magazine in future;—M. G. C. (1784-1831), I: 365. It is also ordered that the new magazine (at Inclenberg) be leased at auction for the term of three years.—Ibid., I: 366. On May 26, the city treasurer advertised that the "new Powder Magazine, near Macomb" was to be "sold at Public Auction" on June 3.—N. T. Daily Adv., May 26, 1788.

James Hardie, "who is at present employed by a number of very respectable Citizens to instruct their Children in the Greek and Latin languages," states in a petition to the common council that, "in order to excite a laudable emulation amongst the young Gentlemen committed to his care, & to satisfy Parents & Guardians with respect to the progress made in his school, [he] would wish to examine his scholars in public." He explains that a room to which he "proposes to remove" is neither central nor commodious for the purpose; he therefore asks and uses the use of the City Hall next, or on such other day as the Common Council should judge would interfere with public business. —From the original petition (in metal file No. 7, city clerk's record-room); endorsed "read April 30th 1788—Mr. Hardie has permission to use the Exchange for the purpose within mentioned;" M. G. C. (1784-1831), I: 365.

Trinity vestry directs the committee on repairs to put the Ne-groes burying-ground "into such Fence as they may think proper."—Trin. Min. (MS.).

17 Samuel Fraunces announces that he has removed to this city, and "once more resumed his former occupation. He has rented the house, No. 16, Nassau-Street, corner of John street, lately occupied by William Macauken of "Daily Adv., May 8, 1788. Fraunces continued here until May 1789, when he became steward of President Washington's household (see My 4, 1789). John Bat-tin then took over this tavern.—N. T. Packet, May 30, 1789; Daily Adv., D 30, 1789. For later proprietors, see Herald, N 19, 1796; N. T. Gaz. & Gen. Adv., O 13, 1806; see also Bayles, Old Taverns, 447-49.

The congregations of the old First Presbyterian Church and of the new Brick Church, which were under the united jurisdiction of the trustees of the former, owned at this time the following real and personal property: The church and its furniture, with the burial-ground, situated in Wall St.; the church and its furniture, with the burial-ground situated "in the fields," held by lease from the city at a rental of $215 per annum; a lot in Robinson St., given to them by the corporation of Trinity Church for the use of the senior clergyman; and a lot in Bayard's farm.—From inventory in Proc. of the Trustees (MS.), Vol. II.

"Jacob Astor," at No. 81 Queen St., advertises that he "has just imported an elegant assortment of Piano Fortes, which he will sell on reasonable terms. He also buys and sells for Cash, all kinds of Insurance."—N. T. Packet, May 8, 1788. On the occasion of this announcement he mentions; "I. J. Jacob Astor," and the address was described as "next door but one to the Friends Meeting house."—Ibid., O 28, 1788.

John Harrission and Stephen Purdy, Jr., begin the publication of a weekly paper called The Impartial Gazetteer, and Saturday Evening's Post. This was of quarto size.—Brigham, A. A. S. Proc. (1917), 440; Early Newspapers, II: 420. See Ap. 9.

Complaint being made that "the pitching of the Arch of the Street called the Broad Way latey regulated & now paving" is unsatisfactory to the neighbourhood, the common council orders "the three City Surveyors" examine it and see that the work is done "in manner most agreeable to the Neighborhood & the public Convenience."—M. C. O. (1784-1815), I: 372. Two of the surveyors reported on May 23; that the found the "northeast arch of the street too high by at least half a foot, and that they had regulated it to be "only eighteen Inches higher in the middle of the Street than at the Kernel towards the Houses on each side." It is to be paved accordingly.—Ibid., I: 374.

Gerard Bancker, treasurer, publishes a notice, under the proviso contained in the act of May 12, 1784, (p. ii) "for the speedy sale of the confiscated and forfeited estates within this state," that all demands against the forfeited estates of William Axtell, Robert Bayard, William Bayard, and others (about 500 loyalists), must be made within the next four months.—N. T. Jour., My 22, 1788.

John Russell begins the publication of a semi-weekly paper called The New York Museum. The last issue located is that of Aug. 15, 1788.—Brigham, A. A. S. Proc. (1917), 469.

The regulation of hackney coaches becomes a subject of municip-
1788

pal. concern. The common council appoints a committee to prepare a suitable ordinance.—M. C. C. (1784-1831), I: 374. See, further, F. F. 23.

The common council orders that Auchmity St. be regulated.—M. C. C. (1784-1831), I: 376. On June 26, surveyors offered a plan, and the clerk was ordered to prepare an ordinance, for paging and regulating this street, which in a marginal note is called "Rector Street."—Ibid, I: 381. The ordinance was presented and passed on July 9, the Governor, King St., the Mayors, Cherry Street, Murray Street, the jail, powder House, seawater pump, Hester Street. See O 6, 1789.

Daniel Ludlow being willing "to hire the Bowling Green & ornament it with Trees & keep it in good Fence," the common council orders that the treasurer inquire on what conditions it can be leased, and ask him "to make an Offer to the present Occupant, and should the pensioner, or shall the terms preferred by the public seem inclined to sell that Island, together with Fort George and the town battery. A part of the ground upon which Fort George stands may be sold in order to improve the rest, and in my opinion, the surplus would amount to more account to the state than the sale of the Island. The sale of the Island would injure the state; the sale of the Fort would not only benefit it, but would add beauty, health and strength to the city if rightly attended to. . . ."

kind nature in the formation of this post has (in my humble opinion) formed Governors Island, the South West point on New York-Island, together with the fresh water pond, for some grand and future good; all these seem subordinate to another and cooperate to form that project under consideration, and to which I may add a fourth, but the public have already parted with the Island to Corlears Hook; here I cannot help observing a piece of negligence, that there has not been reserved for this growing city, a public common at least half a mile square and a public wood of the same dimension, within the vicinity of it. . . . povertiy will feel the remissness of it and be obliged to purchase these conveniences at a dear rate, together with Governors Island, should we now spit it away for a trifling consideration. . . . A regular fortification on that Island I think will sooner or later become necessary, and which should be so constructed to command both the bay and the harbour, and large enough to contain five hundred men, conveniently lodged in casemates at a time of an invasion, besides two water batteries, one to be covered by a redoubt, the other with a ravelin and covered way, communicating with the main fort, and this is all the fortification I think necessary upon the Island. Now if we go upon the true principle of fortification, it will appear upon approved maxims, that no building of any kind whatever is admitted within musket shot of a fortress, this being the case, little or none of the Island can be spared for sale, besides respect must be had that in a fortress which contains a garrison, there must be ground reserved sufficient for a hospital, burying ground, and other necessities to supply the garrison, and a place to exercise the troops upon; however, should the legislature think it necessary that a part of the Island should be sold, I would then recommend that part to be sold which lies east of the line I have drawn across the Island in my map. But if I am allowed to extend my idea, this state of the United States will have to purchase the same ground again for the marine department, because from the nature and situation of this post, New-York must and will become the ground source of a navy should ever there be a fabric of that kind take place in the United States. . . .—Daily Ado, Ap 2, 1794.

Joseph Corre, who for two years has been proprietor of the City Tavern at 115 Broadway, thanks the public for past favours, and "wishes their continuance at No. 28 Wall Street, at the State Arms, opposite the Coffee House."—Daily Ado., Je 10, 1788. Corre had been a pastrycook with a shop in Hanover Square, in 1779, and later had moved to 52 Smith (William St.) where he maintained "The Confectionary & New York Hotel."—N. T. Packet, My 30, 1783. Here, in addition to dinners or suppers and "ice-cream every day," he undertook to supply captains of vessels with pickled oysters, "portable" (portable) soup, preserved milk, etc. In 1795, he opened Columbia Garden at State and Pearl Sts. (See My 5, 1794), which he maintained for upwards of ten years.

The vestry of Trinity Church resolves "That the Corporation will begin the Rebuilding of Trinity Church upon the Plan proposed by Doctor Bard & delineated by Mr Robinson subject to such Alterations as this Board may hereafter think proper."—Trin. Min. (MS.). In Vol. l, p. 414, an error was made in dating this resolution "June 11, 1779"; it was correctly given, however, on p. 418, Vol. I (q. v.).

The common council orders that a contract be entered into with James Morrell and others who bid $55 for filling in the White Hall Slip.—M. C. C. (1784-1831), I: 379.

Joshua Hornblower is paid $42 "for attending & examining & making Report of the fire at the Warehouse for the West India Dock, to be erected in 1775."—M. C. C. (1784-1831), I: 380. Hornblower's petition had been under consideration since Jan. 30, 1786 (q. v.).

A constitutional convention assemble at Poughkeepsie to deliberate and decide on the form of federal government recommended by the general convention at Philadelphia, Sept. 17, 1787. The debates were taken down in shorthand, and pub. by Francis Childs, New York, 1788; see reprint, Poughkeepsie, 1865.

The commissioners for rebuilding Trinity Church advertise for proposals for removing the ruins of the church, by taking down the walls as low as the sills of the windows all around; taking down the walls of the chance to a level with the ground; cleaning the stones and piling them within the walls; and removing all useless rubbish.—Daily Ado., Je 18, 1788. Parts of the walls had been pulled down in 1784 (q. u.). See also, JI 8, Ag 7, and D 17, 1788.

The common council orders that the recorder prosecute persons guilty "of any Intrusions on the Common Lands by digging & carrying off Clay or Stones;" also to commence suits for the recovery of lands illegally possessed.—M. C. C. (1784-1831), I: 380.

The common council, after considering a report on necessary improvements to the Fly Market, resolves "that the Sewer be continued to the South side of front Street—that a Bullhead be laid across the Slip at the South Side of front Street & that proper Blocks or Wings be laid in the Slip to extend 64 feet beyond the South side of front Street for the purpose of supporting a Market which may be erected at the Expense of the Neighborhood." The committee is authorised to have the work executed by contract, provided it does not cost more than $500.—M. C. C. (1784-1831), I: 381. See D 31.

The common council orders "that the Stable, in the God Yard, which is become offensive to the prisoners be removed from its present Situation to the Alms House Stable."—M. C. C. (1784-1831), I: 381. See, further, S 29, 1795.

In accordance with a common council order of June 26, ordinaries are passed this month to regulate Lumber, Authenity (Recor- tor), and Oliver Pasty Streets in the West Ward, and to pave Greenwich Street and the intermediate slips from Cortlandt to Barclay Street.—M. C. C. (1784-1831), I: 381, 384, 387.

Samuel B. Webb, writing from New York to Miss Catharine Hoeghoun (whom he afterwards married), states:—This morning at 9 o'clock an Express arrived from Virginia with the important news of that State having adopted the proposed Constitution; at the dawning of the day all the Bells of the City began and rung for four hours, at the Sun's rising we were Saluted with Ten Twenty-four pounders which made noise sufficient to awaken the most drowsy, in short the whole day has been devoted to amusements.—Correspondence and Journals of S. B. Webb, III: 110. See also JI 25.

1228 THE ICONOGRAPF OF MANHATTAN ISLAND

June 10

1788
The common council directs that the treasurer dispose at auction of "the Ferries across the North River to Hoboken & other places to the Northward," the boats to have "the Right in Common with every other landing at any part of the Corporation Wharfs or slips north of Cortlandt Slip."—M. C. C. (1784-1831), I: 382. See, further, Jl 9.

An ordinance is passed "to alter & amend Queen Street from King's street Wall Street"—M. C. C., 1784-1831, I: 383; and it is resolved that an ordinance be prepared to regulate and pave William Street—ibid., I: 385.

The commissioners for rebuilding Trinity Church advertise for proposals for digging a trench for a new foundation, taking up the old foundation from the surface of the ground downward, cleaning the stones, laying a new foundation, and carrying up the walls as high as the foundations. The ground plan can be seen at Mr. Cruger's, No. 5, Stone St.—Daily Adv., Jl 6, 1788. See Je 18.

The trustees of the First Presbyterian Church inquire into the expense of enclosing "the New Church Yard" (of the Brick Church) with "a Substantial paled Fence."—Proc. of the Trustees (MS.), Vol. II. On Nov. 11, the committee of repairs reported that the fence had been completed.—ibid.

As a result of the order of June 26, prohibiting the digging and carrying away of clay from the Common Lands, John Campbell, a potter, complains to the common council that, unless he is permitted "to procure Clay there his Manufacturing of Pastilles must cease." A committee is appointed to make inquiries and report.—M. C. C. (1784-1831), I: 384.

The tavern-keeper, paid £10 18s: 5d for the use of his house and rooms.—M. C. C. (1784-1831), I: 384. The tavern stood at the n. w. cor. of Nassau and Wall Sts.

The treasurer has "disposed of several Ferries across the North River," on leases, at specified terms, the ferries being "Hoboken," "Weehawken," "Bulls Ferry," and "Fort Lee."—M. C. C. (1784-1831), I: 385. See also "Hoboken Ferry" in L. M. R., III: 194.

An open letter, addressed to the "Mayor and Corporation" of the city, and signed "Civis," protests against the proposal to have streets paved at the expense of the proprietors of houses. Some of the streets need paving; but, on the other hand, "most of the proprietors of houses in this city are Whigs," who "were refugees in the country, during the war," and who "came back very poor," many being obliged "to borrow money to repair their houses." To them the proposed improvement would be a great hardship.—N. T. Jour., Jl 14, 1788.

H. Ivers advertises cables for sale "at Ivers' Rope-walk at the head of Muhly Street, the first lefthand turn above The Tea Water Pump."—The N. T. Jour. and Daily Patriotic Reg., Jl 15. The rope walk is shown on Fl. 64, V. 1.

"In pursuance of the Late of this State entitled "An Act authorizing the Corporation of the City of New York to remove the Statue therein mentioned" (see Mr 7), the common council appoints a committee "to remove the remains of Pitts Statue from Wall Street" and "deposit the same in some safe place [see Ag 3, 1811] until the further Order of this Board."—M. C. C. (1784-1831), I: 386. Payment of £400 for this was made to George Goiman on Nov. 10.—Ibid., I: 418. Stevens, in his Progress of N. T. in a Century, 14-15, erroneously gives 1787 as the date of removal.

The common council orders that Mr. Bancker and Mr. Goerck "be directed to make an exact survey of the Water Lots from Coelaers Hook to White Hall."—M. C. C. (1784-1831), I: 386.

The federal ship "Hamilton" is launched "amidst the acclamations of a large concourse of citizens"—N. T. Packet, Jl 18.

A gentleman, who was present at the fall of the federal ship, when she was launched, in which fall she bilged, and the right arm of Col. Hamilton (the head of the ship) holding the constitution, broken off, exclaimed, ... gentlemen, there is certainly room for amendments."—N. T. Jour., Jl 24, 1788. This refers to the debates in the Convention at Poughkeepsie regarding necessary amendments to the Federal Constitution.

The order of procession for the parade which is to take place on July 23 in honour of the Constitution of the United States is published in the newspapers. At eight o'clock in the morning, ten guns will be fired, and the procession will form in the Park and march "Down Broadway to great Dock-street, thence through Hanover-square, Queen, Chatham, Division and Arundel-streets; and from thence through Bullock-street to Bayard's house."

All trades and professions are to be represented in the parade, with a band of music near the head of the line. Forresters in frocks, carrying axes, "Columbus in his ancient dress, on horseback," and the Federal ship "Hamilton," are among the leading features announced. Richard Pratt is chairman of the committee of arrangements, and is to wear "a blue coat, red sash, and white feather tipped with black." His 13 assistants "will each be clad in a uniform white coat with blue cap and sash, wear a white feather tipped with blue, and carry a speaking trumpet." The question of ratifying the Federal Constitution is still under debate at Poughkeepsie.—N. T. Packet, Jl 22, 1788. Numbers of "The Federalist" (see O 27, 1787) are appearing regularly in the Packet.

The parade is held in honour of the Constitution of the United States. It is an expression of "the animated joy of the citizens of New York, Federal Constitution ratified by a sufficient number of states to make it operative," to demonstrate that the pleasure "had pervaded all ranks and degrees of the community." The object of exultation was not the ratifying by any one particular state, but "the already present existence of an era in the history of man, great, glorious and unparalleled, which opens a variety of new sources of happiness, and unbounded prospects of national prosperity." The costumes and implements of many mechanical trades were featured. Banners elaborately painted bore symbols and mottoes appropriate to the several trades and the celebration. During the procession, the cabinet-makers, on a platform drawn by horses, constructed a cradle and table. The blacksmitbsh, likewise, forged an anchor; and the sailmakers made sails. A printing-press complete, with caudex and other typographical implements, and with compositors and pressmen at work, struck off hundreds of copies of a song and ode, which were distributed among the multitude by Mr. A. M'Lean. These were published in the N. T. Packet, Jl 25, and Ag 5, 1788. There is a copy of this broadside in the N. Y. H. S. It is entitled Ode for the Federal Procession Upon the Adoption of the New Government. Composed by Mr. L. **, and is printed within an ornamental border having the arms of the City of New York, at the top. Regarding the butchers' display, see De Voe's Market Book, 316-17. The painted banner carried by the Society of Pewterers is now owned by the N. Y. Hist. Soc.

The "Federal Ship Hamilton," moving near the centre of the procession, was "A Frigate of thirty-two guns, twenty-seven feet keel, and ten feet beam, with galleries and everything complete and in proportion, both in hull and rigging; manned with upwards of thirty seamen and marines, in their different uniforms; Commanded by Commodore Nicholson, and drawn by ten horses." The interesting evolutions and salutes of this vessel, at the Fields, along Broadway, opposite the fort (where the president and members of congress reviewed the parade), and at other points in the line of march, were graphically described to the newspaper's reporter.—ibid., Ag 5, 1788. The ship made a fine appearance, sailing with flowing sheets, and full sails, down Broadway, the canvas waves dancing against her sides, the wheels of the carriage concealed.—N. T. Jour., Jl 24, 1788.

The procession followed the line of march already announced (see Jl 22), "to the parade des fetes champêtres, where two buffaloes and a mutton had been roasted whole, for their regale, together with hams, &c. &c. These were served upon ten extensive tables, which were prepared for the purpose, and which projected, in direct angles, from one common centre, where was situated, a little elevated, the seat of Congress and civil and legislative magistrates, strangers of distinction, &c. who had a complete view of the ten seats; the seats were all carpeted with canas, which, in some measure, screened the guests from the rain, which, unluckily fell at different periods of the day.—ibid. For view of this table, as sketched by David Grim at "Bunker Hill," see Man. Com. Cen. (1850), opp. p. 570.

"In the evening a very ingenious transparent piece of painting, representing general Washington, to the life, was exhibited by Mr. Wright, in Maiden Lane, which attracted the attention and admiration of many citizens, particularly the fair.

"There was also exhibited, at the corner of Wall-street, enclosed in a circle of about two feet in diameter, thirteen stars, ten of which were brilliant [that being the number of states which had ratified the Constitution; one (designed for New-York) half illuminated; and two almost obscure, with the initials of North-Carolina and Rhode-Island."—ibid.
In the evening also, the printers, booksellers and book-binders of the city, who had attended the procession, "assembled at the house of Mr. [Corrobus]" [sic], went to the meeting, and spent the evening in "good humor, harmony and social glee." Toasts were drunk "to the Day;" "to Congress;" and "to His Excellency Benjamin Franklin, the venerable Printer;" to Washington, Hamilton, Knox; to the liberty of the press; and to "a speedy adoption of the new Constitution."—N. Y. Packet, Jl 25, 1788.

William A. Duer stated in 1849: "all similar celebrations since attempted have proved but feeble imitations" of it. He described the procession in detail, mentioning many citizens who participated.

On July 30, John Randolph, writing to his father on July 30 about the celebration held on that day, said: "You have doubtless... received Accounts of the Adoption of the new Constitution, proceeded by the Federal Green Bakers Hill, where there were ten tables set for more than [than] five thousand people to dine—two ozen were roasted while and several cows and sheep. I'll assure my dear Sir it put me in mind of the great Preparations which were made, in Don Quixote, for the wedding of Camach in the rich and the fair Quateria—there were ten tables set out to represent the ten States which had acceded to the Constitution, all of which were lettered together end like the sticks of a Fan; where they joined, were seated all the Congress with the president in the middle. The procession was very beautiful and well conducted. Every trade and profession had a Colour emblematical of it. the chief of the Bakers were drawn on a stage on which they were seen mixing their bread; the apprentices all in white followed with ready baked cakes. The Coopers followed making barrels and the apprentices follow with a keg under the arm of each. next came the Brewers bringing hogheads of beer along with a little backus astride a Cask holding a large goblet in his hand—It would require to much time for me to tell you all the different occupations but to the honor of New York it be spoken that among 8000 people who were said to have dined together on the green there was not a single Drunken Man or girl to be seen."—From original letter in Emmet Coll., No. 958.

The convention of the state of New York, at Poughkeepsie, votes unanimously in favour of adopting the report of the committee of-the-whole, ratifying the federal constitution, but proposing various amendments. On July 26, the engrossed declaration of rights, on which the ratification was based, passed again, by a divided vote, and it was ordered be signed and signed. The Journal of the Convention was published by Nicholas Power, at Poughkeepsie, "a few rods East from the Court-house."—See copy in the N. Y. P. L. The resolution in its final form appeared in the N. Y. Packet, Ag 1, 1788. See also Windsor, VII, 250, 259.

At about 9 o'clock in the evening there arrived "the joyful tidings of the adoption of the New Constitution, at Poughkeepsie, on Friday, July 25... The bells in the City were immediately set a ringing, and from the Fort and the Federal Ship Hamilton, were fired several salutes. The Merchants at the Coffee House testified their joy by repeated huzzas; and a large body of citizens, headed by a number of the first characters, went to the houses of the members of the Convention, and gave three cheers, as a testimonial of their approbation of the glorious Event brought about by their united, unalienated, and comitative exertions.—In short, a general joy ran through the whole city..."—Supplement extraordinary to the Independent Journal, July 28, 1788 (broadside in N. Y. Pub. Library); N. Y. Packet, Jl 29, Ag 1, 1788.

Samuel B. Webb, writing on July 27 to Miss Hogeboom, said: "... The Mail brought us the pleasing intelligence of our Convention having adopted the New Constitution.—It was received with unusual marks of Joy; every class of Citizens turned out, Bells rang—Cannon fired, fireworks were displayed and the Federal Ship (which is now posted in the Bow-Way near Bowling Green) was handsomely illuminated, the whole night was spent in loud acclamations of Joy, and continued until past 8 o'clock this morning—indeed I was afraid that Sunday would not bring them to their usual steadiness. The whole however passed over without anything improper taking place, until about ten o'clock. Mr. Greenleaf, the Printer, has insulted the City at large by several impertinent publications,—and during the time of their moving round in a body, they stop'd at the house where he keeps his printing press—they broke into the house & I am told destroyed his Types; he fled,—This is the only instance in which the least unjustifiable act has been committed & I trust we shall hear no more of it..."—Corresp. and Jour. of S. B. Webb, III: 112-3.

In a letter from New York on July 30, John Randolph wrote to his father: "On Saturday the 27th [error for 26th] Inst. news arrived of the Constitution's being adopted [by New York State], a party of Federalists as they call themselves went to the house of Mr. Greenleaf printer of the patriotic Register and after tearing broken his windows and thrown away his Types much to their discredit went to the Governor's where they gave three hisses [and] beat the rogue's march around the house they proceeded to the houses of the Federals (as they call them) and gave three cheers."—From original in Emmet Coll., No. 958.

The last issue of the N. Y. Journal and Daily Patriotic Register (see N. Y. 1787) appears as a daily. Greenleaf's weekly paper is continued under the title The N. Y. Journal and Patriotic Register.—Brigham, A. A. S. Proc. (1917), 449. See also issue of July 31. On Aug. 7, the editor, Thomas Greenleaf, gave the reasons for the change. Certain paragraphs were printed in the Register of the 24th of July, to which objection was taken by some of the public; a handbill, burelusing the citizens, was circulated, and it was falsely stated that the Register had been taken from Greenleaf's shop. These induced a mob, late on the evening of the 26th, to break into his house and shop, plunder a quantity of types, and leave the office in a ruinous condition.—Ibid, Ag 7, 1788. See My 4, 1790.

It is ordered by the common council that the treasurer and the commissioners of the almshouse and bridewell be authorised to negotiate a loan at the bank "of as much Money as may from time to time be required to defray the Expenditures of the Alms House & Bridewell until the collection of the Tax to be raised for their support shall render it unnecessary, not to exceed the whole Sum of £700."—M. C. C. (1784-1831), II 387.

The commissioners appointed to appraise that part of Aug. Street between city hall and Queen Street prepare a list, hearing 2 this date, showing each proprietor's name, the width of his lots, and the levy proposed for paving in front of his property. The owners and lot widths are as follows:

Civil Liberty the Glory of Man.

Original Address

to the

Sons of Liberty.

The rights, which occur in Political as well as Civil life, are indelibly recorded in the divine works of Creation, and confirmed by the all-seeing Eye of the Great Spirit, by whom Providence we exist, and have become a Great Free People.

Be it therefore remembered, that in consequence of encroachments on our inherent rights, by usurpation from foreign hands, it has become indispensably necessary and for Independence, to resist and to Early obtained by ourselves and our brethren, in the glorious and even conspicious Way of the Revolution, in an arming of every tenantry disturbed. ...

In order therefore to maintain the necessary virtue of those powers, any agency or foreign aid, etc. will be a great National Institution, founded on the basis of American Liberty as the rallying point of freemen, indispensable necessary to be established for the preservation and perpetuity of those blessings which through Divine Providence we now enjoy, and have pledged ourselves to transmit unimpaired down to our latest posterity.

The preceding brief outlines exclusive of a series of
moral causes, being seriously and deeply reflected on,
by a few genuine Sons of Liberty, whose Patrotic
Virtue, Fortitude, and Perseverance, eventually,
after years of opposition surmounted all difficulties.
Resolved to establish the contemplated Institution,
and to call it Tammany Society or Columbian
Order.

New York, 4th March 1799.
Year of Discovery 297th.
Year of Independence 13th.
and of the Institution 1st.

Chairman of the meeting.

**Corporation of New York**

The total assessment is $767,419—From original report in city clerk's record-room. See also M. C. G. (1784-1811), I: 390.

4. The common council passes an ordinance for paving "front or first Street" from Old Slip to Fly Market Slip; Water St. from Wall St. to the Fly Market, and King St. "from the Cellar Door of Henry Waddington Store to the East River."—M. C. G. (1784-1811), I: 389.

5. The commissioners for rebuilding Trinity Church advertise for proposals for carpenters' work and materials; for "bringing under cover, inclosing and finishing the outside of Trinity Church, complete, including the porch, in front, the columns and arch within the Church;" also, for "building the Steeple, on a base of twenty-four feet square;" and for "cutting the stone that may be wanted for the above building." A plan of the church may be seen at Mr. Rogers', No. 35 Queen St.—Daily Adv., Ag 7, 13, 1788.

6. In a petition of this date to the common council, the freeholders and leaseholders in estates in and near King George Street state that "upwards of two years ago" this street "was surveyed in order that the same might be levelled and paved;" that part of it has been dug out, and other parts "remain totally neglected," so that the street is "impassable with a Carriage." They ask that the street be dug out and finished without delay, so that they will have "a convenient passage from the head of Queen Street directly through William Street, a place of considerable trade."—From original petition (in metal file No. 8, city clerk's record-room), endorsed "read Aug 20th 1788." It is referred to the alderman and assistant of Monticore Wards.—M. C. G. (1784-1811), I: 391.

7. John Harrison and Stephen Purdy, Jr. shorten the title of their paper (see My 17) to The Impartial Gazetteer.—Brigham, A. A. S. Proc. (1797), 440; Early Newspapers, II: 410. The title was changed to the Sentinel, Sept. 17, 1788.

8. A work entitled Mercantile Laws of the State of New York is advertised as published on this day; price, three shillings.—Daily Adv., Ag 13, 1788.

9. Mr. Pool, the equestrian performer, advertises that he will exhibit on this day his feats of horsemanship "On the hill just above the Ship Yards," where he has erected a Menage, at a very considerable expense, with seats convenient for . . . Ladies and Gentlemen." His full programme is published. Tickets are sold "for the Box" and "the Pitt." A Band of Music will "entertain the spectators between the feats."—Ind. Jour., Ag 15, 1788. See also O 5, 1787; S 37, 1786. Pool's appearance in New York in 1788 was unknown to Greenwood, author of The Circus (1909), 79.

10. Casinner Gereck and Evert Bancker make a plan of the Bowery Rd. from Division St. to Stuyvesant Rd. This is filed in the bureau of topography, borough president's office, as Map No. 116.

11. James Smith advertises that, on Aug. 21, there will be sold at auction at the Coffee House "All that very valuable Building, called the New Tea Water Pump [see Je 30, 1787], with the whole Pump and every necessary apparatus thereto belonging, together with the Lot of Ground whereon the same now stands, containing in front, 50 feet 8 inches, in rear, 45 feet, 6 inches, and in length on the North, 70 feet, and on the South, 120 feet."

"The goodness of this water, its inexhaustible supply, and contiguity to this city, are probable premises of resulting advantage to a purchaser."—Daily Adv., Ag 15, 1788.

12. The name of The Impartial Gazetteer (see Ag 9) is enlarged to The Impartial Gazetteer, and Saturday Evening Post. The last issue with this title was that of Sept. 13—Brigham, A. A. S. Proc. (1917), 440; Early Newspapers, III: 430.

13. The vestry of Trinity Church requests "Dr. Johnston" (Hon. Wm. Samuel Johnson, L.L.D., president of Columbia College) "to prepare an Inscription for a Corner Stone to be placed by the Bishop in the foundation of Trinity Church." The commissioners appointed to build the church are directed to arrange for the ceremony of laying the corner-stone, giving $10 as a Compliment to the Masons."—Trin. Min. (MS.).

"A pole from the south-east, "attended by a sudden swell of the sea," drives the water over the wharves and into the streets and cellars. Parts of the facing of the Battery are blown away, "a considerable extent of solid stone work, seven feet in thickness," being totally demolished.—Daily Adv., Ag 20, 1788.

14. The common council orders an advertisement published for proposals for removing the leaky copper roof of the city hall, and covering the building with cedar shingles.—M. C. G. (1784-1811), I: 391-92, 117, 122-23; and see Ag 27; Daily Adv., S 3, 1788.

15. The common council appoints a committee to treat with a committee of Trinity corporation "on the Subject of the Triangular piece of Ground at the junction of the Post & blossoming Dale Roads" (see Mr 12).—M. C. G. (1784-1811), I: 392. See, further, Je 17, 1788.

"Payment of $15 on account is made "towards filling up the White Hall Slip;""—Ind. Jour., Ag 23, 1786; and see Sm 16 for filling up Vesey Slip.—M. C. G. (1784-1814), I: 393.

17. A committee of the common council is appointed to attend to "new Roofing the City Hall."—M. C. G. (1784-1811), I: 394.

18. The lowest bid, $17, for the work of James Robison, was accepted.—Ibid., I: 397. See Ag 20.

19. The common council advances to Van Zandt & Janeway $100 "towards purchasing Materials for repairing the City Hall."—Ibid., I: 397.

20. A report of the Society for the Relief of Distressed Debtors is held at the tavern of John Simmons, and adopts resolutions to earnestly request the clergy of the city to preach charity sermons, for promoting the work of the society, whose funds are "totaal exhausted." They represent that there are several debtors in prison who have "no other Subsistence" than that derived from the society, and that a quantity of fire wood will be necessary during the ensuing winter for the prisoners, which "might be purchased at present, at a very low Rate."—N. Y. Jour., Ja 1, 1789.

After repeated discussion regarding the place where congress should meet under the Constitution (Philadelphia, Lancaster, Baltimore, Wilmington, and Annapolis having been considered at various times since July 28), the following resolution is finally agreed to: "That the first Wednesday in January next be the day for appointing electors in the several states, which, before the said day, shall have ratified the said Constitution; that the first Wednesday in February next be the day for the electors to assemble in their respective states, and vote for a president; and that the first Wednesday in March next be the time, and the present seat of Congress [New York City] the place for commencing the proceedings under the said Constitution."—Jour. of Cong. (ed. of 1821), IV: 867; Winsor, VII: 267. See also broadside in N. Y. P. L. (Krell 9592). Congress had been sitting in New York since 1785 (p. 9).
...tion. It is thereupon resolved "that the whole of the City Hall Government...and that this Board will proceed to lay before the Town a notice of putting the same in proper order & repairing." A committee is appointed "to consult the Delegates of this State in Congress" and others, and report "what Alterations & Repairs are necessary." The same committee is also directed "to examine the Exchange & report what Repairs it will require to render it convenient for the accommodation of the Courts of Justice & Meeting of the Corporation of this City."—M. C. C. (1784-1831), I: 398-99. For the report of this committee, see S 30 and O 7.

A petition of John Byvanck and others that Burling's Slip "may be filled up & Front Street continued across it" is referred to a committee of the common council.—M. C. C. (1784-1831), I: 399. The committee on the McAdam petition reported on Oct. 25, and thereupon Mc' John Stagg together with Rev. Bancker & Casimir T Corrick City Surveyors were appointed to survey that part of the Broadway which hath lately been regulated & paved & to report to the Board such Plan...for the better regulation of the said Street as they may conceive most effectual for removing the Difficulties complained of."—Ibid., I: 412-13. See, further, O 27.

The name of The Improvis Gazette and Saturday Evening Post (see Ag 1791) was changed to The New-York Weekly Museum.—Brigham, A. S. A. Proc. (1917), 507; Early Newspapers, II: 420. See My 7, 1791.

The ship "America," intended for the India trade, is launched at the ship-yards. The builder is Ebenzer Young.—N.-T. Packet, S 23, 1788.

Elias Buete, Jr., is paid $100 on account "towards building the Wharf in Fly Market Slip."—M. C. C. (1784-1831), I: 403.

The meeting of the common council at the city hall on this day is the last held there, owing doubtless to the alterations in the building for the accommodation of congress.—See M. C. C. (1784-1831), I: 403, 404 et seq. The place of meeting was changed, evidently, to Simons' tavern, pending the necessary repairs at the exchange. Simons was paid, on Dec. 31, $171.14 "for the Use of his Room fire, Candles &c."—Ibid., I: 424.

The brigade commanded by Gen. Malcom is inspected by the adjutant-general. It then marched to the vacant grounds of Ald. Bayard, and was reviewed by Maj.-Gen. Barlow de Steuben, who was so well pleased with its military appearance and behaviour, and particularly with the evolutions and manoeuvres, which were performed "with great promptitude and exactness by the legonary troops under the command of Colonel Lewis," that, after the review, he addressed the commanding officers of the different corps, saying (in part): "... Whilst the militia of New-York continue to be animated by the patriotic sentiments which have led you to these exertions, they will prove a perpetual nursery of good soldiers and virtuous citizens."—Daily Adv., O 1, 1788.

The committee appointed Sept. 17 to connection with alterations to the city hall for the accommodation of the general government reports that it has procured a plan, executed by Major L'Enfant, for the necessary additions, alterations, and repairs, which they recommend to the common council. A number of citizens having "by voluntary Subscriptions engaged to advance the Monies necessary for the said Buildings & Repairs in expectation of being reimbursed by a Grant from the Legislature or a Tax on the Citizens," and they having nominated five commissioners—Robert Watts, Alexander McComb (Macomb), Major L'Enfant, James Nicholson, and William Maxwell,—"to purchase the Materials & superintend the said Business," the common council approves of the proceedings, "So that no Charge be made on this Corporation for any part of the Expenses,"—M. C. C. (1784-1831), I: 404. See also descrip. of Front St. I: 353.

The alterations at the city hall are begun.—N. Y. Packet, Mr 6, 1789.

The committee of the common council which was appointed on Sept. 17 to determine what repairs and alterations were needed in the city hall for the accommodation of congress, and in the exchange for the accommodation of the Courts of Justice & Meeting of the Corporation of this City, now makes its report regarding the exchange (the details of which are not entered in the Minutes), and the board orders that the committee "direct the repairs necessary to be made in the most economical & expeditious manner."—M. C. C. (1784-1831), I: 407. On Oct. 14, $100 was paid, on account, for these repairs, and on Nov. 19, another $100 was advanced.—Ibid., I: 418. For description of the finished "Federal Edifice," see Je 7, 1789.

The common council orders that the hay scales at the end of the Bear Market, which have been obstructing the street, be removed into the passage leading behind the market.—M. C. C. (1784-1831), I: 408; De Voe, Market Book, 310-21. The Bear Market is shown on a Bancker plan in N. Y. P. L. (box R-W, folders V & W).

The street is also ordered that a room be provided "in the Vicinity of the City Hall for the accommodation of the City Watch until the Repairs making to the City Hall are completed."—M. C. C. (1784-1831), I: 408.

The programme of military review for the day comprehends an inspection of Col. Bauman's regiment of artillery in the fort by the adjutant-general, and a review by the governor in the Fields of the troop of horse under command of Capt. Stake, a brigade company of artillery under Capt. Van Dyke, and two companies of light infantry under Capts. Stagg and Swartwout. The regiment of artillery will display fireworks at the fort in the evening.—Daily Adv., O 9, 1788.

A petition from various citizens is read in the common council, showing "That being informed that the Courts of Justice for this Country, and other meetings, were about to remove to the Exchange in the South Ward," they "are anxious to accommodate them as far as lies in their power. That pursuant to this Intention, and apprehensive that the Market, now held under that Building, may at certain Seasons of the Year, be offensive to those Honorable Bodies," they "are anxious this evil should be obviated. That for this purpose they respectfully oppose that a Market place should be built on the Long Bridge in the same Ward. That its dimensions should be one hundred and thirty three feet in length, and twenty feet in breadth." They are willing to build it at their own expense. They observe "that the place designated by them is much superior for such a Market to any in the City.—That it is necessary for the Albany and other Trade.—That the site from the situation of the place, is at all times most favorable for the Beregut, Staten Island, and other places near those situations.—That its vicinity to different ferries render it exceedingly commodious to passengers, necessary to travellers, and convenient to all...That to erect a Market in any of the Streets now unoccupied will darken, obstruct and injure the City: But that the Long Bridge which is already taken up by Oyster Men and others only tends to increase the Dirt, without benefiting any of the other Villages." They therefore ask that they may be allowed to build the market at the Long Bridge.—From the original petition, in record-room, city clerk's office, with endorsement showing that the committee to whom it was referred reported favourably. On Oct. 17, the common council agreed to permit the petitioners to erect, at their own expense, a market-house in the street leading from the exchange to the river.

—M. C. C. (1784-1831), I: 409, 410; L. M. R. K. III: 925. This was the fourth and last public market-place established in Broad St.—De Voe, Market Book, 370.

The public whippers, Joseph Shelley, receives £15 a year, payable quarterly.—M. C. C. (1784-1831), I: 411, 414.

A number of the officers of the "late American army," and several gentlemen of distinction, dine together at the Coffee-House, "in commemoration of the two great events that took place in the late war—the surrender of Saratoga, the 17th October, 1777, and that at York-Town, on the 19th October, 1781."—Daily Adv., O 22, 1788. Those who expected to attend the dinner had previously been requested "to give in their names at the Coffee-House Bar."—Ibid., O 16, 1788.

The committee is appointed "to direct the Bridewell to be more effectually secured so as to prevent escapes."—M. C. C. (1784-1831), I: 414.

It is said "that the alterations and additions now making to the city hall will, when completed, render it the most elegant and commodious building for a legislative body in the United States. The readiness with which the citizens entered into..."
THE FIRST Regiment of militia, commanded by Maj. Henry Rutgers, receives a new standard, on which the arms of the state are painted, and is reviewed by Maj.-Gen. Malcolm.—N. T. Packet, O 28, 1788.

Trinity vestry passes a resolution requesting the bishop to present the thanks of the corporation "to Mr. L'Enfant [see Feb 18, 1787] for his great Attention & Services respecting the Monument of General Montgomery which has been erected at St. Paul's Church under his direction, in a Manner that reflects Honor upon his Taste, and has given universal Satisfaction."—Trin. Min. (MS).

The commissioners appointed to survey that part of Broadway which has lately been regulated and paved (between Rector St. and "Verlettinbergh Hill") report a profile of the existing surface of the roadway. The common council passes a resolution making specified amendments in the grade; and orders that John Stagg be employed "to take up and Repave the Broadway and Verlettinbergh Hill, . . ." See S 17.

The recorder then moves, according to notice given, "that John McComb [Sr.] be removed from his Office [as city surveyor]." The latter had been improper for some time. He was actually exercising the Trade of a Mason, employed in Building Houses for Individuals should be longer employed in regulating the Public Streets and

"Secondly. That in divers Instances he has discovered a want of Capacity to execute that office."—M. C. G. (1784–1781), I: 413–14. On Nov 19, it was ordered that McComb be furnished with a copy of the charges and notice of hearing, in reply to his petition that he might be heard.—Ibid., I: 415.

The last entries on the records of the congress of the Confederation are of this date.—Winor, VII: 267.

In commemoration of the fifth anniversary of the evacuation of New York by the British, "the Artillery, Light Horse, Grenadiers and Infantry of Gen. Malcom's brigade under command of Major Christie" parade at noon, and exhibit "many beautiful and soldierly manoeuvres."—Daily Advertiser, N 26, 1788.

After the parade by a detachment of the Legion, and the discharge of a salute from the fort, some of the officers and citizens repaired to the City Tavern where they spent the day, drinking many "patrician and sentimental toasts." Other officers and citizens celebrate the day at Will Bradford's, and there are "several other entertainments at different hotels in the city, in honor of the day."—N. T. Packet, N 28, 1788.

The common council passes a resolution "that the Commissioners provide the necessary Tools & erect Two Forges for the manufacturing of Nails by the Vagrant & other Prisoners from time to time confined in Bridewell."—M. C. G. (1784–1781), I: 419. For a later employment of the bridewell inmates, see MY 18, 1812.

A standing committee of the common council is appointed to report "where more Lamps are necessary & wherever it can be done, that instead of Posts the Lamps be fixed to the Houses."—M. C. G. (1784–1781), I: 419. See, further, Mr 29, 1791.

The common council decides to borrow on the city's credit $16,000 from the Bank of New York "to be applied towards the Repairs & additions making to the City Hall for the Accommodation of Congress;" and it is ordered that a promissory note for that sum be made out, payable in twelve months, and that it be sealed with the city seal, and signed by the recorder.—M. C. G. (1784–1781), I: 420. See, further, Ju 7, 1799.

A balance of $10,410.16 is paid to Elias Burger, Jr., "on Contract for building Wharf at the Fly Market."—M. C. G. (1784–1781), I: 420.

The twelfth session of the state legislature begins at Albany (see J 1). The senate and assembly meet there until July 16, 1789, when they left New York City as their next meeting place.—Assembly, J 2 (1788–89), 31; ibid. (1789), 27; Senate, J 5 (1788), 13; ibid. (1789). They met in New York on Jan. 11, 1790 (9-6).

An estimate, amounting to $10,410.16, of the money required to defray the city expenses for the coming year is approved by the common council, and a petition to the legislature for permission to raise the money by tax is adopted. The board also requests that the time of collection of taxes be altered from the winter to the summer.—M. C. G. (1784–1781), I: 421. See J 15, 1790.

The inhabitants of "Lumber Street" petition the common council for a well and pump and some lamps in that street. The petition is referred to the standing committee on lamps.—M. C. G. (1784–1781), I: 421. The original of this petition (preserved in metal file No. 7, city clerk's record-room) shows the street designated as "Lombard Street." The petition argues that in its "obscure position" the street is rendered extremely dark and dangerous by the lack of lamps, and the entire city is endangered by the lack of a well, "since, should a fire happen in their Quarter (which consists of wooden Buildings), it might . . . . easily extend itself." The committee writes a favourable endorsement on the petition.

On Dec. 31, freemen complained to the common council "that most of the public lamps at the time of the late fire at the House of Mr. Burling in Beekmans Street about 1 O'Clock at Night were gone out," and an inquiry was ordered. At the same time, the inhabitants of Herman St. asked that their street might be provided "with some of the public Lamps."—Ibid., I: 422.

Members of the association "for the relief of distressed Debtors confined in the Goal" (see J 26, 1787) address a memorial to the legislature, in which they say that from Jan. 2, 1787, to Dec. 3, 1788, there have been 1,162 commitments to the goal for debt, 716 of which have been for amounts of less than $20, and that they are "deprived of the comfort of their families, prevented from the opportunity of obtaining the means of subsistence by their own industry, subjected to the danger arising from putrid and contagious disorders . . . , and liable to become useless if not penurious members of society . . . acquiring habits of intemperance . . . ." The memorialists contend that society is greatly injured by confining debtors who owe small sums, because their labour is worth so much more than their debts; and they ask for a remedy through legislation.—From the memorial, in, Man. Com. Coun. (1869), 386–93.

The vestry of Trinity Church orders "that the Commissioners appointed to rebuild Trinity Church be directed to proceed towards completing the same until the Funds they are now possessed of, be exhausted . . . ."—Trin. Min. (MS.). See F 12, 1789.

A meeting of the N. Y. Society Library members is held at the Coffee House, and trustees elected. Later, new conditions for membership were published.—N. Y. Morning Post, J 3, 1792 (in Antiquarian Soc. library, Worcester).

The sum already subscribed "for the building intended for the accommodation of Congress" is funded $45,000. The room for the senate is nearly completed. The whole building will cost nearly $15,000, and will be 16 feet long.—Mass. Centinel (Boston), D 24, 1788.

The common council limits the size of a butcher's stall in the Fly Market to eight feet in length and three feet, six inches in width. The entire market floor is laid out by measure, with the exact location of passages, stalls, and cutting-blocks.—M. C. G. (1784–1781), I: 421.

The value of articles produced by the State of New York for export during the fiscal year 1788 was estimated to be $770,000, the exports being valued at about $1,000,000 (N. Y. currency). The value of the exports from the city, for 1788, exclusive of articles of foreign manufacture, and other articles in the coastwise trade, is:

- Wheat, 322,000 bushels at 8/  $256,800
- Indian corn, 183,000 at 3/6 .  $30,025
- Rye, 102,000 at 2/6 .  $2,150
- etc.—N. Y. Packet, Mr 18, 1789.

There is also published a comparative statement of the value of goods exported from the port of New York between July 5, 1765, and July 5, 1766, amounting to £772,145; those shipped from Philadelphia from April 5, 1765, to April 5, 1766, amounting to £492,616; and those exported from New York, from Jan. 1, 1788, to Jan. 1, 1789, amounting to £698,101.—Ibid., Mr 15, 1789.

During the year 1788, 972 sea-going vessels arrived at New York, compared with 893 at Philadelphia.—Literary Diary of Ewa Stiles, III: 341.
At this time, on the south side of Crown Street (the present Liberty Street), stood Livingston's sugar-house, adjoining the Middle Dutch Church, east of Nassau Street. “Built of stone, with five stories and a loft, pierced with three small windows on each floor on front, and five on the side, this structure remained for many years a monument to the sufferings of the American prisoners who had been inhumanely packed within its walls by the British.”—Smith, The City of N. T. in the Year of Washington’s Inauguration, 1789 (N. Y., 1830), 36-37. The Rhinelander sugar-house, which had been erected by Bernart Cuyler in 1765, at the corner of the present Rose and Duane Streets, resembled it.—Ibid., 37; see also Mem. Hist., II, 454-457.

The race-course, where the parades of the military companies were held, was “in the vicinity of the present junction of Division and Water Streets.”—Ibid., 105.

The principal wharves in the city were Albany Pier, on the east side of Coenties Slip; Exchange Slip, at the foot of Broad Street; Coenties Slip, Old Slip, Burling Slip; Beekman Slip, near the present end of Fulton St.; Peck Slip; New Slip, now called James Slip; Oliver Slip, and Catherine Slip.—Ibid., 106.

The ferries across the Hudson were: Paulus Hook (Jersey City) ferry, from the foot of Cortlandt St.; Hobuck ferry, from the foot of Vesey St.; Weehawken, Bull’s, and Fort Lee ferries. Another ran from the foot of Whitehall St. to Elizabethtown. Those to Brooklyn were from the foot of the Fly Market stairs, and from Peck Slip.—Ibid., 106.

The important taverns were: The City Tavern, kept by Edward Bardin; one at 49 Cortlandt St., kept by the wife of Samuel Franklin; one at 28 Nassau St., owned by Capt. John Stauffer; No. 3 Great Dock (Pearl St.), opened by John Francis, Aug., 1785, when he moved in May, 1789, to the building on the south-east corner of Broad and Pearl Streets; John Simmons’ Tavern, on the north-west corner of Wall and Nassau Streets (not the south-west corner, as stated by Smith); the tavern of Aaron Aarons, on the corner of Nassau and Spruce Streets; the tavern of Jonathan Perowne, at 28 Nassau St.; the complete list, of which an extract is given, is: “Hale, No. 3 Great Dock (Pearl St.); opened by John Francis, Aug., 1785, whose wife, in 1789, operated a hostelry in East Broadway. Those to Brooklyn were from the foot of the Fly Market stairs, and from Peck Slip.—Ibid., 106.

There were 22 churches in the city representing the following 13 denominations: Reformed Dutch, Protestant Episcopal, French Huguenot, Quaker, Lutheran, Jewish, Presbyterian, Baptist, Moravian, German Reformed, Methodist, Roman Catholic, and Independent Congregational.—Ibid., 125. This year the Methodists erected a second church, of stone, on Second (Forsyth) Street near the corner of Division St.—Ibid., 163. The new meeting-house of the Independent Congregational Church stood at the upper end of Water Street. For on the west side, a little below Leonard St.—Ibid., 164; Gereck-Manging map of 1803, Pl. 70, Vol. I. About 1788, the Presbyterian congregation built a lot on Nassau St., opposite the Middle Dutch Church, and erected a two-storey brick schoolhouse, measuring 52 by 90 feet.—Knapp’s Hist. of the Brick Church, 90, 203.

The desk, pure Sheraton in style, and some other American furniture used by Washington in 1789-1790 are now preserved in the city hall.—Lockwood, Colonial Furniture in Am., (1901), 171.

For a view of the bridge, in the Park, in 1789 (drawn by J. Anderson), see Man. Com. Coun. (1855), 486.

For a view of federal hall and the Verplanck mansion, Wall St., 1789 (drawn by David Grim), see ibid. (1856), 37.

Isaah Thomas issues the first number of The Massachusetts Magazine in Boston. It ran through eight volumes.—Ford, Check-List of Am. Magazines, 9.

A meeting of the “Society for the Encouragement of American Manufactures” is called for this evening at Rawson’s Tavern (No. 82 Water St.), for the election of officers, etc.—N. Y. T. Jour., Jan 3, 1789. Later, they agreed to raise a fund by subscription for establishing manufactures in New York. —Ibid., P. 6, 16, 26, 26, 1789. The constitution was decided on March 18 to publish the constitution proposed for the society, which was to be known as the “New York Manufactures Society.”—Ibid., Mr, 20, 1789.

The Soc. of Mechanics and Tradesmen (see N 17, 1785), according to a notice dated Dec. 25, 1788 (see N. Y. Daily Gaz., Dec 30, 1788; Daily Ado., etc.), holds a business meeting and dinner at “the House of Mr. Samuel Franklin, Corner of John and Nassau Streets”.

A directory of the members of congress, compiled from the city directories of 1789 and 1790, and arranged by states, was published by Valentine, in the Man. Com. Coun. (1866), 551 et seq.

In this year, the jeweler firm of William and John Mott, of 240 Water St., issued a business “token” resembling a coin, the first to be issued by the merchants of New York.—Buschel, An Historical Account of the First Three Business Tokens Issued in the city of New York (1859), 8; Man. Com. Coun. (1859), 596-598, with illustration on p. 597. Similar tokens were issued by other firms in 1794, 1795, and later years.—Ibid.

Cornelius Tiebout, a New Yorker by birth, has the distinction of being “the first American-born professional engraver to produce really meritorious work.” He was engraving maps, and relief portraits for New York publishers in 1789-90, and fairly good line portraits by 1791. Tiebout had been apprenticed to John Burger, a silversmith of New York, and it was in that business that he first learned to engrave upon metal. In 1793, he went to London to seek instruction among abler masters than he could find in his native country, but he returned to New York in 1796, and continued his profession there. His name disappears from the New York directories in 1790—Stauffer, Am. Engravers on Copper and Steel, I, 271-72; Dunlap, Hist. of Arts of Design, II, 155. The long list of Tiebout’s plates includes two plans of New York, the Bowling Green Washington (Pl. 52, Vol. I), a view of Columbia College (Pl. 53-a, Vol. I), an east view of Trinity Church (Pl. 53-b, Vol. I), a view of Richmond Hill (Pl. 53-a, Vol. I), and a view of the City Hall (Pl. 53-c, Vol. I), in op. cit., II, 592-93. More of his engravings, mostly of biblical subjects, are listed in Fielding, Am. Engravers on Copper and Steel, 271-84.

In this year, William Rollinson, an Englishman living in New York, was employed to chase the arms of the United States upon a set of gilt buttons for the coat which was worn by Washington on the day of his inauguration. Rollinson worked for silvermist until 1791, when he made his first attempt at copperplate engraving. This essay was a small profile portrait of Washington done in the stippling manner. In 1812, he invented a machine to rule wave lines for engraving margins to bank notes. His name appears in the New York directories as an engraver from 1791 to 1842.—Stauffer, Am. Engravers on Copper and Steel, I, 235-256; Dunlap, Hist. of Arts of Design, I, 187-90. Among Rollinson’s engravings are a view of the New York customs-house (Pl. 65, Vol. I), a view of New York from Long Island (Pl. 74, Vol. I), and a three-quarter length portrait of Alexander Hamilton, painted by Archibald Robertson. There is a complete list of his plates in Stauffer, op. cit., II, 447-51.

In this year, John Dickey arrived in America. He was one of the first sculptors to work in the United States, between this date and 1820, he lived and practiced his profession in New York. The original figure of Justice on the New York City hall, and the one on the old state house at Albany, were of his design and execution.—Dunlap, Hist. of Arts of Design, I, 390-91.

In this year, Christopher Colles published A Survey of the Roads of the United States of America (Pl. 51-6, Vol. V), showing, among other things, Broadway and the Bowery Road to Kingsbridge and New Rochelle, as well as the location of the mile-stones, principal public buildings, residences, etc., on the route. It consists of title-page and 83 plates, engraved by Cornelius Tiebout. Each plate shows 12 miles of the roads between New York and Stratford, Poughkeepsie, Albany, Newburgh, Kingston, Cranberry, Frankfort, Allentown, Philadelphia, Mount Holly, Annanaks, etc. A perfect (?) copy was sold with the William Loring Andrews collection at The Anderson Galleries, April 18-19, 1921, including plates 45°, 46° and 47°; no copies being known of plates 34-39, the conclusion is they were never published.—See descrip. in catalogue of the sale (item No. 94). Regarding the mile-stones, see descrip. of Pl. 79, I: 473.

The plans of lots on Golden Hill, at John and William Sts., bearing dates of 1773, 1775, 1781, and 1789, are preserved in the Banker Coll, in the N. Y. P. L.
The toasts were patriotic. One of them was: "A cowbell pair of breeches, a porcine saddle, and a hard trottinghorse to all the enemies of freedom!"—Annals of the Gen. Soc. of Mechanics and Tradesmen (1825), 1: 14–15. Bayles is in error in placing this meeting at 49 Cornfield St—See his Old Taverns of N. Y., 2: 341. It is argued that the event refers to it as an "entertainment." The remnants of the feast were sent to the new jail. This brought the following note: "The prisoners confined in goal for small debts return their most grateful thanks to the Society of Mechanics, for their donations of bread, beef and cheese. Their benevolence gave a temporary relief to many persons now in want and formerly were destitute and comfortable circumstances...."—N. Y. Courier, Jan. 15, 1789.

7 Inhabitants of New York, including John Jay, who "have lent their Credit for discharging Monies out of the Bank of New York to be applied towards the additions & Alterations to the City Hall for the accommodation of Congress," for which they have given promissory notes to the amount of their respective subscriptions, petition the common council that the city apply to the legislature for their "Indemnification." The draft of this petition is agreed to, it proposes not only to allow a warrant to reimburse them, but also provides "for raising Monies to the amount of £1,000 for discharging the said Notes & for completing the said Building."—M. C. G. (1784–1813), 1: 425.

At the same time, the common council notes £1,000 more on the city's credit "towards the Repairs and Additions."—Ibid., 1: 425.

Later advances were as follows: Jan. 10, £5,000 (ibid., I: 425); Feb. 25, £1,000 (p. 431); March 11, £2,000 (p. 434); April 1, £5,000: 3,110 (p. 438); April 11, £2,000 (p. 443). On April 27, the board decided that they could not extend the city's credit further for this purpose.—Ibid., 1: 448. See later references on Je 10 and 18.

The common council has "no objection to the appropriation of the uppermost Room in the East South part of the City Hall to the use of the Society Library provided the same shall not be necessary for the accommodation of the Gen'l Gov't of the United States."—M. C. G. (1784–1813), 1: 425.

James Culbertson is paid £225 "for the use of his Cellar to store the old Copper from the Roof of the City Hall."—M. C. G. (1784–1813), 1: 425.

Mr. Goerck, one of the city surveyors, produces before the common council a "book containing Surveyor's of the Water Lots, from Corliss Hook to the Battery, in the East River." It is referred to a committee.—M. C. G. (1784–1813), 1: 425. The committee reported on April 13 that "in their Opinion the said Map is correct & well executed." It was approved by the board, and "the Board is in favor of it."—Ibid., 1: 429.

Benjamin Wyncoop, Levi Hollingsworth, and G. Turner, corresponding committee of the Russian Society of Philadelphia, write to the common council of New York City that Mr. Rumsey has invented "an Engine far superior to any other for supplying Towns with Water," that he has applied to the legislature for a patent, and that "whenever the Legislature shall grant his Request the Russian Congress have formed proposals for supplying this City with Water by Contract." They suggest to the corporation "the propriety of making the necessary Arrangements for forwarding or even compleating the Object of such Contract in the course of the ensuing Summer." This letter was read in common council on Jan. 30, and it was resolved that "Mr. Rumsey's invention ought to meet with every due encouragement & that it is the Wish of this Board to enter into a Contract for supplying this City with Water But that the State of the Finances of this Corporation will not admit of their entering in such Contract in the course of next Summer. They however will be happy to receive Proposals to the end that they may be enabled to take the same into consideration & make the necessary Arrangements for such a Measure as soon as possible."—M. C. G. (1784–1813), 1: 426.

The common council appoints a committee "to consider of & report the best Mode for disposing of the common Lands."—M. C. G. (1784–1813), 1: 427. For the report, see April 3.

Feb. 6

12 Federal Hall is nicknamed "Terror Trap" by persons "who are ill-natured."—N. Y. Daily Gaz., F 19, 1789.

Trinity Church advertises for building stone, to be delivered in the spring, presumably for the rebuilding of this church (see D 17, 1788).—N. Y. Daily Gaz., Mr 28, 1789.

The legislature passes "An Act for the Relief of Debtors, with respect to the Impromiment of their Persons." Prisoners shall not be confined longer than thirty days for debts, or more than two years for exceeding £100. This provision was altered in the next session of the legislature.—Laws of N. Y. (1789), chap. 24 (Greenleaf, II: 231).

The charter of the Society Library, issued Nov. 9, 1772, and suspended during the war, is reissued.—Laws N. Y. (1789), chap. 26 (Greenleaf, II: 260).

The common council appoints a committee to inquire and report regarding a proper place "for the Reception of the Fire Engines, & the Ladders, Hooks, Buckets & which were formerly kept in the City Hall."—M. C. G. (1784–1831), I: 431. See My 13.

The New York legislature passes "An Act securing to James Rumsey [see D 16, 1787] the sole right and advantage of making and employing for a limited time, the several mechanical improvements by him lately invented."—Laws of N. Y. (1789), chap. 32.

A number of merchants have called a meeting of citizens, for this evening at the Merchants' Coffee House, to nominate a merchant to represent the New York City district in congress. It is stated that "it is not probable that any gentleman of that class will be returned from any of the other districts."—N. Y. Jour, F 26, 1789.

The legislature passes an act amending and repealing parts of the provincial ferry act of 1732. New ferry rates are established. The inhabitants of Brooklyn are permitted "to transport their own Goods, in their own Boats, from the Island of Nassau to the City of New-York, and from the City of New-York to the Island of Nassau, with the paying any Ferraige for the same." This act in no way disturbs New York City's privilege originally acquired.—Laws of N. Y. (1789), chap. 37 (Great ed., 1789, II: 459). Cf. N. J., 1777; O 14, 1735.

Alexander Hamilton, in a letter dated simply "Tuesday," but evidently written on Tuesday, March 3, 1789, urges the mayor to convene the common council on this day, to pass an act for appropriating the City Hall, to the use of Congress, to publish such act in the paper, etc.—See Pl. 52, Vol. V, reproduced from the original in the collection of J. Pierpont Morgan, Esq., formerly in the collection of the late John D. Crimmins.

Such action is taken, the common council passing the following resolution: "Whereas this Board did on the 17th Day of September last [p. 6.] Resolve that the whole of the City Hall of this City be appropriated for the accommodation of the General Government of the United States And whereas the said Building has been improved & repaired for the purpose Resolved that Mr Recorder be requested on behalf of this Board to communicate to the Congress of the United States the Substance of the said Resolution of the 17th September last in such manner as he shall deem most respectful & proper."—M. C. G. (1784–1813), I: 432.

At the following notice was published in the Daily Advertiser, March 4, and the N. Y. Jour, March 5: "The Corporation of this city having appropriated the City Hall for the accommodation of the Congress of the United States, and the same having been elegantly improved and repaired for that purpose, the Common Council have resolved that the Recorder communicate the same to the Congress of the United States accordingly." See also Vol. I, p. 377.

At sunset, the guns of the 4th of July were fired bid farewell to the old Confederation.—N. Y. Jour, Mr 5, 1789.

The Federal Constitution becomes effective.—Winsor, VIII: 267.

This is the "First Wednesday in March," appointed by congress on Sept. 13 last for establishing the new regime. At daybreak, at noon, and at six in the evening, the guns of the battery were again fired, and the bells of the city were rung, to usher in the new era,—"the Fourth of March, 1789, on which the operations of the new general government were to commence."—N. Y. Jour, Mr 5, 1789.

The federal hall and other parts of the city are decorated with flags.—N. Y. Weekly Museum, Mr 7, 1789.

Both houses of congress meet at the federal hall, the alterations in the building, begun on Oct. 6th last, being almost completed.—N. Y. Packet, Mr 6, 1789. The right senators are present, however, congress adjourns until a quorum arrives.—Annals of Cong. (Gales ed., 1834), I: column 16.

The proceedings of congress, beginning with the first session
THE ICONOGRAPHY OF MANHATTAN ISLAND

Mar. 4, 1789, (under the Constitution) on this day, were published as separate journals for the two branches of congress, one entitled the Journal of the First Session of the Senate, and published in New York, N. Y. (1791); the other entitled the Journal of the House of Representatives, published by Francis Childs and John Swaine, N. Y. (1789). The daily proceedings of the congress of the Confederation appeared in the Journal of the United States in Congress Assembled, printed by John Dunlap (Phil.).

The following address, signed by Wm. Mooney, chairman, is drawn up at a meeting of some of the founders of the Tammany Society: "The vicissitudes which occur in Political as well as in Civil life, are indubitably recorded in the Annals of Human affairs, and confirmed by the all seeing Eye of the Great Spirit; by whose Providence we exist, and have become a Great & Free People."

"Be it therefore remembered, that in consequence of encroachments on our inherent rights, by avowedly from Foreign lands, it has become imperiously apparent that our Independence, so recently and so dearly obtained by our Fathers and our Brothers, in the Glorious but cruel sanguinary War of the Revolution, is in danger of being temporarily disturbed.—In order therefore to counteract the machinations of those Slaves, and Agents of foreign Despoties,—A Great National Institution, founded on the basis of American Liberty as the allaying point of Freemason, is indispensably necessary to be established, for the preservation and perpetuity of those blessings which through Divine Providence we now enjoy, and have pledged ourselves to transmit unimpaired down to our latest posterity. The preceding brief outlines exclusive of a series of minor causes, being seriously and deeply reflected on, by a few genuine Sons of Liberty, whose Patriotic Virtue, Fortitude and Firmness, metaphorically, as well as literally, surmounted all difficulties; Resolved to establish the contemplated Institution, and to call it Tammany Society or Columbian Order.—From bound photostats (made from originals in Tammany Hall) in MSS. Div., N. Y. P. L.

There had been a Tammany Society in New York in 1787 (q. v., Ap 30 and My 1), but the organization makes its reappearances from 1789 as the year of its establishment. The birthday of its patron was celebrated on May 12 (q. v.), and its constitution was adopted on Aug. 10 (q. v.), of this year.

To Gov. Clinton writes to Washington, inviting him to reside with him after his arrival in New York.—Smith, N. T. in 1789, 224. To this Washington replied on March 25: "I shall make it a point to take him lodgings or rooms in a tavern until some house can be provided. Because it would be wrong, in my real judgment, to impose such a burden on any private family, as must unavoidably be occasioned by my company; and because I think it would be generally expected, that, being supported by the public at large, I should not be burdensome to individuals." He adds that his reception in New York will be most congenial to his feelings if it is "a quiet, unostentatious, mode of ceremonial, be it ever so much such as would avoid all the public attention, and at the same time be calculated to improve the public mind in a regular way, and to promote the public peace and prosperity."

The Writings of Washington (Ford ed.), XI: 357. See also My 30.

As a quorum is not yet present for the congress to transact business, it is agreed that a circular be written to the absent members, requesting their immediate attendance.—Annals of Congress (Gales ed.), I: column 16.

The committee appointed on Dec. 10, 1788 (M. C. G., 1784-1831, I: 421), to ascertain how the Brooklyn ferry can be disposed of so as best to promote public convenience and the city's revenue, makes its report to the common council. It is decided to rent the ferry-house and other buildings at Brooklyn independently.—Ibid., I: 455. At the next meeting, March 18, it was further resolved to license six persons to operate a large and a small boat each, the large one to carry heavy freight and passengers and the small one to carry light freight and passengers. Four of the large and four of the small boats were to "ply to & from the Ferry Market Slip in this City and the Corporation Ferry Stairs at Brooklyn, and two of the large and two of the small boats were to "ply to & from the Stairs at Pecks Slip & the Corporation Ferry Stairs at Brooklyn."

The boats, masts, and sails, were to be of such Form & Dimensions as the Water of the Port of New York shall allow and each boat was to be "constantly worked and managed by two sober & discreet able bodied & experienced Water Men." Each boat was to be furnished with "four good Oars & two Boat Hooks." The boats were "all numbered," and "the Name of the Owner and the number of each Boat" were to be "painted on the inside of the Stern of the Boat easily to be seen." Ferry rates were already established. Horned cattle were not to be "taken off or landed by any of the said Boats at any Place in this City to the West Ward of Cleveland Slip in this city, but for the use of the Public Fire Engines, ferry-boats plying to and from the Ferry Market Slip was to pay to the city treasurer £7 per month; and each one licensed to ply to and from Peck's Slip £5 per month. Anyone in default ten days after the time appointed, or contravening any of the laws or ordinances relating to ferries, was to forfeit his license.—Ibid., I: 455. See also the Daily Advertiser, Mar. 24, 1789; further, Ap 1, 1789.

"When no additional members appearing it was then agreed that another circular should be written to eight of the nearest absent members, particularly desiring their attendance, in order to form a quorum."—Annals of Congress (Gales ed.), I: column 16.

The recent enlargement of the Ferry Market proving insufficient, the common council appoints a committee to report a plan for a suitable addition, and directs the ways and means committee to carry it into effect.—M. C. G. (1784-1831), I: 436.

The common council directs the clerk to advertise for proposals for "keeping the Ferries from this City to Pullos Hook & Hoback" for the term of three years from May 1, 1789.—M. C. G. (1784-1831), I: 436-457. On April 15 John Holdorn's offer of £50 per annum for the former, and John Stevens' offer of £10 per annum for the latter, being the highest bids, the board appointed a committee to confer with them to find out if they would offer more if the term were lengthened.—Ibid., I: 444. April 27, Holdorn offered £80 for six years; but the first proposal of £50 for three years was finally accepted.—Ibid., I: 448.

The common council appoints a committee "to treat with Mr. Verplanck of the Port about purchasing for the City Hall a boat for the space that side thereof."—M. C. G. (1784-1831), I: 437. See Pl. 57, Vol. I. On Sept. 24, the board ordered that the treasurer pay the "ball" due to Mr. Verplanck for the boat last purchased of him..."—Ibid., I: 486. Cf. Sept. 16.

Samuel Webb writes from New York to E. Van Renselaer: "It gives me great pleasure to find the good people of Columbia are in opinion with us, respecting a change in the Administration, and I have 't a doubt if the Northern Counties exert themselves we shall have the pleasure of bearing Judge Yates announced our Governor... you well know the art and cunning of Clinton and his party, and that they are using every possible exertion for his reelection—we must work double tides to defeat them, in this quarter we have nothing to fear, he is most heartily despised, except by a few Sympaths, whom he has put in Office and their dependents,—whose price of Office has been Obedience to their Chief—there is a series of letters now publishing in Childs' daily paper, which are worthy your attention, they have taken up his line of conduct from a period, previous to the commencement of the late War, and will be brot down to the present time, & as those letters will contain a manner of it with other facts, they will have a just influence, wherever they are read."

"Congress have not yet made a quorum, to open the Votes for President and Vice president, but 'tis daily expected they will be able to proceed on that necessary & important business.—The City is gay and lively, a vast number of strangers with us, and next week or the week after the Theatre will open."—From original in Emert's Col. No. 972. For the election, see above, No. 6.

In anticipation of Washington's being elected president of the United States, and because he "may be expected in a few weeks," brigade orders are issued for the parade to prepare to receive him "with every possible demonstration of military respect and honor."

In a report to the common council, the "Commissioners appointed to superintend the Building for the accommodation of Congress" state that "their funds are again exhausted and the Building unfinished. They ask that the board "will lodge with the Bank Security for the further Sum of Two thousand pounds in order to enable them to proceed." The report is signed by Alex. Macomb, P. C. L'Enfant, and James Nicholson.—From the original MS. with "Proven," 1789, p. 690, the city clerk's record-book. The report is not entered in the M. C. C. See, however, Je 18.

Federal hall is thus described: "The southern front, towards Broad street, is composed of a plain arched basement, which likewise bounds the east and west sides of the building, and forms a flagged walk for the recreation and convenience of the citizens."

"Over the basement are Tuscan columns, supporting Doric
pillars, which form a grand balcony with a handsome entablature of stars, &c.

"The attic story is composed of ornamented figures, festoons and trophies, crowned by a pediment, on which is a large eagle, surrounded with a glory, appears bursting from a cloud, and carrying on its wings the arms of the United States. A small, though elegant, spire, finishes this division of the edifice.

"After entering the building through any part of the arched walk, we come into the first hall, flagged with marble, judiciously laid out, and communicating with several rooms, which we suppose are intended for offices. Passing through the first, we come to a second spacious hall or aera [sic], which runs up through to the roof, and is roofed by a glass cupola, throwing a strong light down on the lobby, which is on the first floor, running quite round this centre aera, and communicating with the senate chamber, saloon, audience, and anti-chambers.

"The senate-chamber is about 40 feet square and 15 in height, with convenient fire-places, and is neatly wainscotted; the ceiling [sic] plain, except a sun and thirteen stars in the center. The saloon, audience chamber, &c. are all equally well contrived, as are the stairs, which lead to them and to the two galleries, erected in the representatives' apartment, for spectators.

"The representatives' apartment, which is the master piece of the whole, and most entitl. [sic] to the name of federal hall, is an oblong room, the ends somewhat octagonal, all 70 by 30 feet. This room is composed of two stories, a basement story, and a story above. The basement contains four fire places with oval windows placed between each. The principal has 6 large windows, 3 to the east and 3 to the west, with semicircular pediments. Several Ionic columns and pilasters, fluted and otherwise decorated, are properly arranged throughout this room. On the south side, the two galleries, one over the other, for spectators, have a fine effect, and at the north end is the President's chair, with a very large table, projecting into the center of the room, around which are the seats for the 59 representatives. On the wainscot of the north end are several trophies, and other emblematical fancy figures, together with the arms of the United States; but as they are not yet completed, it is not in our power to give an adequate description of them.

"The whole composition is most admirably contrived for the purpose for which it is intended. It is an object which indicates, that something more considerable would have been executed, had not the artist been confined to such narrow limits. The style is bold, simple and regular; the parts large, distinct, and the transitions sudden, and strongly marked; and we think the whole has an air of grandeur."—N. Y. Jour., Mr. 26, citing the Daily Gazette. Cf. Description in C. Mag., June 1789 (p. v.). For the landmark history of this edifice, see "Our History in Words," in L. M. R. K., III: 973. See also PIs. 32-b and 37, Vol. I.

"Complaint is made of the neglected condition of "the street which leads from Powles-Hook ferry into Broadway" (Cortlandt St.), which is called "the key to the city." It contains filth and rubbish, and pigs going at large are a nuisance. Some people "advocate the burning of the pigs, by saying that they keep the streets clean." The opinion of the majority is that, as the pigs only serve to scatter the dirt already collected in heaps, the law should be strictly executed."—N. Y. Jour., Mr. 26, 1789. See also L. M. R. K. III: 942.

Washington writes from Mount Vernon to James Madison: "I have been favored with your Letter of the 19th; by which it appears the quorum of Congress was hardly to be expected until the beginning of the past week—As this delay must be very injurious to the attending Members, and every day continuance of it (before the Government is in operation) will be more sensibly felt;—I am resolved, no interruption shall proceed from me that can well be avoided (after notice of the Election is announced); and therefore take the liberty of requesting the favor of you to engage Lodging for me previous to my arrival.—Col" Humphreys, I presume, will be of my party; and Mr Lear who has already lived three years with me as a private Secretary, will accompany, or precede me in the stage.

"On the subject of lodgings I will frankly declare, I mean to go into one but hired ones.—If these cannot be had tolerably convenient (I am not very particular) I would take rooms in the most decent Tavern, till a house can be provided for the more permanent reception of the President.—I have already declined a very polite and pressing offer from the Governor [Clinton—see Mr 10], to lodge at

his house till a place could be prepared for me; after which should any other of a similar nature be made, there would be no propriety in the acceptance.

"But as you are fully acquainted with my sentiments on this subject, I shall only add, that as I mean to avoid private families on the one hand, so on another, I am not desirous of being placed early in a situation for entertaining. Therefore hired (private) lodgings would not only be more agreeable to my own wishes, but, possibly, more consistent with the dictates of sound policy.—For, as it is my wish & intention to conform to the public desire and expectation, with respect to the style proper for the Chief Magistrate to live in, it might be well to know (as far as the nature of the case will admit) what these are before he enters upon the request of Congress to Mr Osgood to fit up for the President's use the house, No. 3 Cherry Street, which had been used by former Presidents of Congress. This house had been built in 1770 [?v.] by Walter Franklin, an old merchant in the city, and upon his death had passed into the possession of Mr. Samuel Osgood, who was appointed Post-Master-General in September, 1789. It stood on the north side of Cherry Street several doors east of the present Market Square which received its name in March, 1817 [?v.] in honor of Benjamin Franklin, its former appellation having been St. George's Square. The house was square, five windows wide, and three stories high, but was neither very spacious nor conveniently situated. ... The Franklin house was in after years used as a music store and by the Franklin Bank, and was demolished in the summer of 1856, at which time the chair now used by the President of the New York Historical Society was constructed from its materials.—Smith, N. Y. City in 1789 (1889), 224-25. See also L. M. R. K., III: 949. At No. 1 Cherry St. was the house of Ephraim Brasher, silversmith.—City Directory, 1789. A letter, referring to the preparation of the mansion for Washington's occupancy, written by Sally Franklin (then a young girl, who became Mrs. Will. T. Robinson), presents a delightful picture of the social life of the time.—In Lippincott's Mag. (1889), XLIII: 741.

"Regarding the social regulations established by President and Mrs. Washington, and the receptions and other entertainments held during their residence in New York, see also Smith, op. cit., 376-44; "Washington in N. Y. in 1789," by Constance Cary Harrison, in Cent. Mag. (1889), XXXVII (N. S. XV): 850. And see 1789-90.

Gov. George Clinton is re-elected governor.—Hammond, Hist. of Political Parties in the State of N. Y., I: 41. It was not until June 4, however, that the result of the election was definitely announced.—See Mr 26.

The common council, on examining the applications for "keeping Ferry Boats across the East River" (see Mr 11), decides to license Henry Dawson, Gilbert van Master, John Hicks, and Jacob Wilkins, Jr., to keep two boats each, to ply between the Fly Market and Brooklyn. No one having applied to keep the ferry from Peck's ship, the board orders that the advertisement for applicants be continued in the newspapers.—M. C. C. (1874-84), I: 439.

John Pentard, secretary of the N. Y. Manufacturing Society, advertises for a manager to oversee "the different branches of the linen and cotton manufactures that may be established, take charge of the raw and manufactured articles, superintend the labourers, and fulfill the orders of the Directors."—N. Y. Daily Gen., Apr. 6, 1789.

The common council agrees to the proposal of the committee appointed on Jan. 30 (p. v.) "to report a Plan for disposing of the
Mr. Benson, of the house of representatives, who was appointed to confer with a committee of the senate "upon the subject of arrangements for the reception of the President, and Vice-president," makes the following report:

"That Mr. Osgood, the proprietor of the house lately occupied by the President of Congress, he requested to put the same, and the furniture therein, in proper condition for the residence and use of the President of the United States, and otherwise, at the expense of the United States, to provide for his temporary accommodation."

"That it will be most eligible in the first instance, that a committee of three Members from the Senate, and five from the House of Representatives, to be appointed by the Houses respectively, attend to receive the President, at such place as he shall embark at from New-Jersey for this city, and conduct him without form, to the house lately occupied by the President of Congress, and that at such time there, as in this city, shall dignify, it shall be most convenient for him, be formally received by both houses."

"That a Committee of two members from the Senate, and three members from the House of Representatives, to be appointed by the Houses respectively, wait on the Vice-President of the United States, as soon as he shall come to this city, and in the name of the Congress of the United States, congratulate him on his arrival."—Jour. of the U. S., April 15, 1789.

The common council orders that the clerk prepare an ordinance "to amend the Law 'for regulating the paving & keeping in Repair the public Streets' so as that no Stoop platform or Step extend beyond Six feet, or Bow Window beyond twenty Inches into any Street."—M. C. (1784-1813), I: 445. Published on April 20, this ordinance contained the following provisions:

That all streets within twenty-two feet wide and upwards, which shall hereafter be new paved, shall be paved agreeable to the following regulations, viz.

"That the foot path or walk on each side of such street shall be of the breadth of one fifth part of the width of the whole street, and be laid or paved with brick or flat stone, and secured with a beam or cut stope along the outside thereof."

The law provided that the remaining three-fifths of the street shall be properly arched, paved, and kept in repair by the householders on the street.

"That no cellar light hereafter to be built in any street shall be extended from any house more than the fifteenth part of the width of such street. That no canopy, awning, shed, porch, portico, celler-door, platform, stoop, or step hereafter to be built or extended in any street, shall extend beyond the tenth part of the width of such street, and that no stope, porch or platform, other than with the backs, or railing, shall hereafter be built in any street of this city, under penalty of twenty shillings for each instance."—Daily Adv., April 20, 1789; Smith, N. T. in 1789, 8."

The Vice-President, John Adams arrives in the city at four o'clock, amidst the acclamations of all ranks of citizens. He is met at Kingsbridge, and a cavalcade is formed there to escort him into the city.—Daily Adv., Ap 21, 1789.

"From the Connecticut line to Kingsbridge, he was attended by the Light Horse of Westchester County, under the command of Major Pintard. At Kingsbridge he was met by Gen. Malcom, with the officers of his brigade, and the City Troop of Horse, commanded by Captain Stakes. Also by Officers of distinction—many members of Congress—and a large number of Citizens in carriages and on horseback. On passing the Fort, a federal salute was fired. His Excellency alighted at the house of the Hon. John Jay Esq. A Committee of both Houses of Congress, especially appointed for that purpose, attended to congratulate his Excellency on his arrival."—Gaz. of the U. S., Ap 22; N. Y. Weekly Mercury, Ap 25, 1789.

The diary of the Moravian congregation in New York contains the following record: "Doctor Livingston, the Low Dutch minister called here to acquaint Bro. Birkley [Moravian pastor], that it was the intention of all denominations to meet in their churches or places of worship on the day when the President moves from his house to Federal Hall to take the oath and to be inaugurated into his dignity; that in every place, on that solemn day, there be a prayer in a solemn manner offered up to the Lord in behalf of this nation and also of the President and Vice President at 9 o'clock in the morning."—Penn. Mag. of Hist. and Bio., XIII: 245.

"In the afternoon at 4 o'clock, the Vice-President, his Excel-
1 Ensign & Penant
13 Shirts
13 Caps
13 Handkerchiefs.

—From the original MS. in metal file No. 16, city clerk's record-room. Artists who have pictured Washington's arrival and departure in this vessel do show the coat and sash; these were probably not used on ceremonious occasions.

It is thought advisable to dispense with illuminations on the evening of the arrival of the president, and the citizens are notified that there are to be none. The following is the proposed order of procession, from the place of landing:—1. The Troop of Horse. 2. The Artillery, and the residue of the Legion. 3. The Military Officers, in uniform, who are off duty. 4. The President's Guard. 5. The President, the Governor and their Suites. 6. The principal Officers of State. 7. The Mayor and Corporation. 8. The Clergy. 9. The Citizens.”—Daily Adv., Ap 23, 1789.

Contrary to this notification, the common council passes a different resolution! Whereas this Board have reason to believe that a very great proportion of the Citizens are earnestly desirous to illuminate their Houses on the Evening of the arrival of the President of the United States, as a Testimony of their Joy on that interesting Event; and that Preparations are already made for that purpose. It is therefore recommended to the Citizens to illuminate their Houses from the Hour of seven to nine; ... And ... that the Bells of the several Churches and other public Buildings commence ringing on the Presidents landing and continue for half an Hour.”—M. C. C. (1784-1785), i: 446. At the same time, they issue a warrant to pay Gen. Malcolm $16 “to procure Gun powder for the Militia on the Presidents arrival in this City.”—Ibid.

"The Eagle in the front of the Federal State House is now displayed; the general appearance of this front is truly august."—Gns. of the U.S., Ap 23, 1789. See F. 6.

President Washington left Mount Vernon two days after being notified of his election (see Ap 14), came North to take up his duties as the chief magistrate of the United States. He passed through Alexandria, Baltimore, Chester, Philadelphia, and Trenton to Elizabeth Town Point, and was everywhere welcomed with public rejoicing and festivity.—Avery, Hist. of the U. S., VII: 18-19.

On the 23d he is conveyed to New York from Elizabeth Town, "amidst the joyful acclamations of every party and every description of citizens." One newspaper account of the event states:—"On this great occasion, the hand of industry was suspended, and the various pleasures of the capital, were concentrated to a single enjoyment. ..." The President was received at Elizabeth-Town, by a deputation of three Senators, five Representatives, and the Congress of the United States [see Baker, Washington after the Rev., 128], and three officers of the State and Corporation [Chancellor Robt. R. Livingston, Adj.-Gen. Nicholas Fish, Recorder Richard Varick]; with whom he embarked in the barge, built for the purpose ... , and rowed by thirteen pilots of this harbour, dressed in white uniforms; Thomas Randall, Esq. acting as coxswain.

"No language can paint the beautiful display made on his excellency's approach to the city. The shores were crowded with a vast concourse of citizens, waiting with exulting anxiety his arrival—His Catholic Majesty's Sloop of War the Galviston, (Mr. Dohrmann's) ship North Carolina, and the other vessels in port, were dressed and decorated in the most superb manner.—His excellency's barge was accompanied by the barge of the Hon. Gen. Knox, and a great number of vessels and boats from Jersey and New-York, in his train.—As he passed the Galviston, he received a salute of thirteen guns, and was welcomed by an equal number from the battery.

"The whole water scene was animated and moving beyond description. The grand gale formed an object the most interesting imaginable.

"On his excellency's arrival at the stairs, prepared and ornamented, at Murray's wharf [foot of Wall St.], for his landing; he was received and congratulated by his excellency, the Governor of the State [Geo. Clinton], and the officers of the State and Corporation, and the following procession formed. First Col. Lewis, accompanied by 2 officers, and followed by the troop of dragons, commanded by Capt. Stakes—The German grenadiers, headed by Capt. Scriba—Music—Infantry of the brigade, under the command of captains Swartwout and Steedoff—Grenadiers, under Capt.

The President was received at the wharf, where the populace were densely massed, and the gates of the City Hall were raised, and the little cannon fired to announce his arrival. The procession then advanced up Broadway, and halted at the foot of Chatham, where a salute was fired from the barge. The President then ascended the steps of the City Hall, and was received by the Mayor and corporation; and at an appropriate time, the President, accompanied by the Mayor, proceeded to his residence, the residence of Governor George Clinton. The street was thronged with citizens, who witnessed the great display made on the occasion. The President was received at the wharf, where the populace were densely massed, and the gates of the City Hall were raised, and the little cannon fired to announce his arrival. The procession then advanced up Broadway, and halted at the foot of Chatham, where a salute was fired from the barge. The President then ascended the steps of the City Hall, and was received by the Mayor and corporation; and at an appropriate time, the President, accompanied by the Mayor, proceeded to his residence, the residence of Governor George Clinton. The street was thronged with citizens, who witnessed the great display made on the occasion.
THE ICONOGRAPHY OF MANHATTAN ISLAND.

April 23, 1789—Col. Bauman, at the head of the regiment of artillery—

to the pressing crowds, who seemed to be incapable of being satisfied by gazing at this man of the people—you will see the particulars of the procession from the wharf to the house appointed for his residence in the New Papers. The streets were lined with the inhabitants as thick as the people could stand, and it required all the exertions of a numerous train of city officers with their staves, to make a passage for the company. The houses were filled with gentlemen & ladies, the whole distance, being about half a mile, and the windows to the highest stories, were illuminated by the sparkling eyes of innumerable companies of ladies, who seemed to vie with each other to show their joy on this great occasion.

"It was half an hour before we could finish our commission and convey the President to the house prepared for his residence. As soon as this was done, notwithstanding his great fatigue of both body & mind, he had to receive all the gentlemen & officers to a very large amount, who wished to show their respect in the most affectionate manner. When this was finished & the people dispersed, we went undressed, and dined with his excellency governor clinton, who had provided an elegant dinner for the purpose."

"This ended our commission. The evening, tho' very wet was spent by all ranks in visiting the city, street after street, being illuminated in a superb manner,—I cannot help stating now how highly we were entertained. The weather being completely finished & we had repaired to the governors before it began to rain. When the president was on the wharf an officer came up & addressing the president said, he had honor to command his guard and it was ready to obey his orders. The president answered that as to the present arrangement, he should proceed as was directed but that after that was over, he hoped he would give him time to make his arrangements. At this point of the proceedings all the fellow citizens (turning to the crowd) was all the guard he wanted."

"Bowen, Hist. of the Centennial of the inauguration of Geo. Washington, 28-30, citing the original letter in the possession of Boudinot's grand nephew, Mr. E. Boudinot Colt, of Short Hills, N. J. The letter is also reproduced in the same history (by Clarence Winthrop Bowen), as first published in The Gentleman's Mag., Ap. 1889. See also Eliot Coll. Note 4."

Dr. James Lloyd Cogswell, one of the spectators who witnessed Washington's arrival, wrote a description of the event, saying:

"The Genl's barge had an awning hung around with red morren curtains, festooned. It was attended by the New Haven and Rhode Island packets, and a number of boats and barges decorated in the most beautiful manner. From the battery to the coffee house, where the Genl landed, the ships, docks, and houses were crowded with people as thick as they could stand. The guns of the battery were fired as soon as the general passed, and all the people upon the battery gave three huzzas. The cheers were continued along from the battery unto the place of landing, as the barge passed. I was on board Captain woolsey's ship, which lies in the dock, and had the honor of being one of the first who saw the successive motion of the hats from the battery to the coffee house. was like the rolling motion of the sea, or a field of grain waving with the wind when the sun is frequently intercepted with a cloud."

"A pair of elegant stairs, with the sides covered and carpeted, were erected to land the General safe on the dock."

"Immediately upon his landing, thirteen guns were fired from the dock, and the whole city rung with repeated huzzas. The procession immediately formed and proceeded from the Coffee House. The General walked... at the right of Governor clinton. The General was dressed in blue, with buff-colored underclothes. The procession moved very slow and with great solemnity. The windows, stoops, and streets were crowded... Notwithstanding all the exertion of the guard to keep the crowd off, they were so wedged in by Embree's corner [Pearl St.] that they could not move for some time. The General was obliged to wipe his eyes several times before he got into queen street.

"It is now half after nine o'clock. I walked up queen [Pearl] and Wall streets and round by the new buildings back through Hanover square. Every house is illuminated except those of the Quakers. The appearance is brilliant beyond description. Sir jno. house [Sir John Temple's, 188 Queen St.] makes a grand appearance."
played in the arrangement of candles; some are in the form of a pyramid—some in one shape, and some in another. A great number of figures and curious mottos are to be seen. Among the rest, one at Mr. Scriba's large brick house, at the corner of the Fly Market and Queen street, took my attention; in one window was a building, adorned by beautiful columns, with the names of the respective States upon them, supporting it; on a window in the right was written in an oval, neatly decorated, "Vivant our illustrious President George Washington;"—"Hist. Mag. (1860), 1st. ser., IV: 244.

His Excellency Don Diego de Gardoi, the diplomatic representative of Spain, who witnessed the events of the day, requested the Spanish minister of state, Count Florida Blanca, on April 24, a descriptive letter, saying in part:

"When his Excellency found himself at a proper distance from his Catholic Majesty's man-of-war, the Galveston, commanded by the Lieutenant of the Navy Don Adrian Trasonco, who had taken his station at the confluence of the North and East Rivers, where he [Washington] had to pass, the above-mentioned officer saluted him with fifteen cannon-shots, five vivas for the king, and other honors—the first shot being so powerful in its detonation that it surprised the immense pageant by land and sea, meriting not only the general applause and hand-clapping of all, but also five more cheers instead of the customary three cheers.

The foot to the mansion designed for his residence, through the drawn-up lines of State troops, who presented arms and lowered the standards as he passed them.

"After reaching the house a levee was held. When this terminated, the Governor ordered a company of infantry with his officers to guard the house; the moment General Washington noticed them, he begged them to retire, being in need of no other guard than his own fellow-citizens.

"On that night the citizens proposed to illuminate their houses with fire-works, but the heavy rain which began toward evening and lasted all night disappointed their intentions, as also the magnificent illuminations projected by the ministers of Spain and France."—Translation from the original in the Spanish Archives, pub. in The Hist. of the Centennial Celebration of the Inauguration of Geo. Washington, p. 33.

Comte de Moustier wrote, on June 9, to the minister of foreign affairs at Paris, a brief dispatch, stating in part:

"I proceeded in a coach toward the place where the President had landed, . . . I arrived near to General Washington, whom I recognized only by his gestures of satisfaction at seeing me; and, what was undoubtedly a greater compliment, I was summoned at the moment when Washington had ordered him to the humble house which had been provided as his residence. There he received homage from those who had escorted him, and from a great number of other people who had come to the house . . . Each shook his hand, according to the general habit, which begins to die out among the people of higher rank, and from which the President excuses himself, so that he now only shakes hands with those who offer theirs, instead of advancing as he has always done before. There was also a great provision of wine and punch, which the President himself offered to me; but I reminded him how I had objected, in Mount Vernon, to that usage."

—Ibid., 34, as translated from the French archives.

Miss Eliza Morton (afterwards Mrs. Josiah Quincy) saw Washington's arrival by looking from a shop window on the wharf where he was received. She stated in her recollections, written in 1821: "Carpets were spread to the carriage prepared for him; but he preferred walking through the crowded streets, and was attended by Governor Clintons and many other officers and gentlemen. He frequently bowed to the multitude, and took off his hat to the ladies at the windows, who waved their handkerchiefs, and threw flowers before him, and shed tears of joy and congratulation. The whole city was one scene of triumphant rejoicing. His name, in every figure of decoration, appeared on the fronts of the houses; and the streets which he passed through to the Governor's mansion were ornamented with flags, silk banners of various colors, wreaths of flowers, and branches of evergreen. Never did anyone enjoy such a triumph as Washington, who indeed read his fame in a nation's eye."—Memor of the Life of Eliza S. M. Quincy

Gen. Samuel B. Webb wrote: " . . . in all my life, I never saw such unsought joy in every countenance.—Correspondence and Journals (Ford ed.), III: 128.

"Many persons who were in the crowd, on Thursday [Apr 23], were heard to say, that they should now die contented—nothing being wanted to complete their happiness, previous to this auspicious period, but the sight of the Saviour of their Country."

"Some persons, advanced in years, who hardly expected to see the illustrious President of the Republic with the face of a God in Heaven, were in the concourse on Thursday, and could hardly restrain their impatience, at being in a measure deprived of the high gratification, by the eagerness of the multitudes of children and young people, who probably might long enjoy the blessing."—Ga. of the U. S, Ap 25, 1789.

"By a curious coincidence, the 23rd of April 1789—the day upon which Washington made this triumphal entry into New York City—was observed in Great Britain as a day of thanksgiving for the recovery of his mind by George III, whose obstinate folly had resulted in the independence of the nation over which Washington was to preside."—Smith's N. Y. City in 1789, 224.

"From this date until April 27, the senate and house of representatives arranged the plans for the inauguration of Washington.—Annals of Cong., Vol. I; Mag. of Am. Hist. (1883), XXI: 450-51.

The senate and house of representatives wait on President Washington "to congratulate him on his safe arrival at the seat of government."—Penn. Packet, My 5, 1789.

The Chamber of Commerce meets at "the Coffee-House," at about half past eleven o'clock, and proceeds "to the house of his Excellency the President of the United States, headed by John Broome, Theophylact Beach, and John Murray, Esquires." They "were conducted into the audience room, and upon his Excellency's entering, Mr. Broome, the President of the Chamber, addressed him to the following effect:—That he had the honor in the name of that Corporation, to congratulate His Excellency upon his safe arrival in this city, under the dignified Character of President of the United States, and also to inform him that the members of the chamber felt a singular pleasure in having a gentleman of his distinguished talents appointed to preside over the Union; and farther assured him that it would be their uniform endeavour by every constitutional exertion in their power, to render his Excellence administration prosperous and his nation happy."

"To which his Excellency replied to the following effect. That he was greatly obliged to the gentlemen of the Chamber for the mark of their politeness and respect, and that he should be happy at all times, as far as lay with him, to promote the interest of commerce."

"After his Excellency's reply he was introduced by the President of the Chamber to every member present."—N. Y. Daily Gaz., Ap 27, 1789; Penn. Packet, Ap 30, 1789.

Congress decides that the oath shall be administered to Washington "in the outer gallery adjoining the Senate Chamber," instead of in "the Representatives' Chamber," which had been agreed upon on April 25.—Annals of Cong., I: 107.

Mayor Duane, at the request of the common council, having prepared an address to be presented by the corporation to Pres. Washington, it is submitted by him to the board, and approved. The following is the text in full:

"To the President of the United States

"Sir,

The Mayor Aldermen & Commonalty of the City of New York beg leave to offer you our most respectful and affective Congratulations on your safe arrival in this Metropolis; and at the same time to express the general Joy of our fellow Citizens of every Order on this auspicious Event.

"In thus presenting ourselves before you we experience all the Emotions which naturally arise, from a high veneration for your Character, an exalted Sense of your Services, and a perfect conviction that a Trust the most momentous which could be conferred by a free People has been committed to a Citizen who has given unequivocal Proofs of his possessing all the good and great Qualities requisite to it's successful Discharge.

"With peculiar Pleasure Sir, we recall to mind that illustrious display of Wisdom Virtue and Valour which distinguished your military Command: With equal Pleasure we recollect the exemplary Abnegation which marked your Behaviour from the head of a Victorious Army to the Shade of private Life. Permit us to add that we contemplate with pious gratitude that unparalleled coincidence of circumstances, which has constrained you, by Motives that Patriotism
THE ICONOGRAPHY OF MANHATTAN ISLAND

1789. 

April 27th.

Long in the habit of revering you as the Father of our Country, we rejoice at the happiness of being once more placed under your Protection; we consider the Unanimity, which prevailed in your Appointment, as a presage that our national Government will be firmly established in the Hearts of all the People and receive their united and zealous support, and we are fully persuaded that, under the Divine Favour, it's operation will be productive of the most extensive Benefits and Blessings, and render the Union as respectably in Peace as, under your Aspirits, it was triumphant in War.

"To our most fervent Wishes for your personal Happiness and for the Success of your Administration we should not do Justice, to the Sentiments of our fellow Citizens, if we did not add the strongest Assurances of their inviolable Attachment to you and of their earnest Disposition to render you all the Support which can flow from the most cordial Respect, Gratitude and Confidence.

"Signed in behalf of the Corporation

"Jas. Duane Mayor."

The common council appoints a committee to "wait on the President to know when and where he will be pleased to receive the said Address."—M. C. C. (1784-1811), I: 447-48. For its presentation, and Washington's reply, see May 30.

"The council resolves not to lend the city's credit further for the expenses of altering the city hall (see Dec. 3, 1788; Jan. 7, 1789); and the commissioners for superintending these improvements are requested "to govern themselves accordingly."—M. C. C. (1784-1811), I: 448.

"Trinity corporation petitions the common council for a grant of what is "from High, to low Water mark & thence 100 feet into the River, opposite to their Land between Chambers Street & the next adjacent Street to the Northward" (Rede St.). The petition was granted on May 13, at a quit-rent of one shilling per foot front, to commence at the expiration of 21 years.—M. C. C. (1784-1811), I: 448, 451. This, however, was reconsidered, and on May 25 it was ordered that the quit-rents commence at the expiration of 48 years.—Ibid., I: 452.

28. William Maclay records in his journal: "This day I ought to note with some extraordinary mark. I had dressed and was about to set out, when General Washington, the greatest man in the world, paid me a visit. I met him at the foot of the stairs: Mr. [Henry] Wynkoop just came in. We asked him to take a seat. He [Washington] excused himself on account of the number of his visits. We accompanied him to the door. He made us complain bowing—one before he mounted and the other as he went away on horseback."—Maclay's Jour. (1890).

"The Committees of both Houses of Congress, appointed to take order for conducting the ceremonial of the formal reception, &c. of the President of the United States, on Thursday next [April 30], are named to the following order therein, viz.

"The General Webb, Colonel Smith-Lieutenant-Colonel Fish, Lieut. Col. Franks, Major L'Enfant, Major Bleecker, and Mr John R. Livingston, are requested to serve as Assistants on the occasion.

"That a chair be placed in the Senate-Chamber for the President of the United States. That a chair be placed in the Senate-Chamber for the Vice-President, to the right of the President's chair; and that the Senators take their seats on that side of the chamber on which the Vice-President's chair shall be placed. That a chair be placed in the Senate-Chamber for the Speaker of the House of Representatives, to the left of the President's chair—and that the Representatives take their seats on that side of the chamber on which the Speaker's chair shall be placed.

"That seats be provided in the Senate-Chamber sufficient to accommodate the late President of Congress, the Governor of the Western territory, the five persons being the heads of the three great departments, the Minister Plenipotentiary of France, the Encargado de negocios of Spain, the Chaplains of Congress, the persons in the suite of the President; and also to accommodate the following Public Officers of the State, viz. The Governor, the Lieutenant-Governor, the Chancellor, the Chief Justice and other Judges of the Supreme Court, and the Mayor of the city. That one of the Assistants wait on these gentlemen, and inform them that seats are provided for their accommodation, and also to signify to them that no precedence of seats is intimated, and that no salutation is expected from them on their entrance into, or their departure from the Senate-Chamber.

"That the members of both Houses assemble in their respective Chambers precisely at twelve o'clock and that the Representatives present, by the Speaker, and other Officers, proceed to the Senate-Chamber, there to be received by the Vice-President and Senators rising.

"That the Committees attend the President from his residence to the Senate-Chamber, and that he be there received by the Vice-President, the Senators and Representatives rising, and be by the Vice-President conducted to his chair.

"That after the President, and attended by their Clerk and other Assistants, proceed to the Senate-Chamber, there to be seated in his Chair, and the Vice-President, Senators and Representatives shall be again seated, the Vice-President shall announce to the President, that the members of both Houses will attend him to be present at his taking the Oath of Office required by the Constitution. To the end that the Oath of Office may be administered to the President in the most public manner, and that the greatest number of the people of the United States, and without distinction, may be witnesses to the solemnity, that therefore the Oath be administered in the outer Gallery adjoining to the State-Chamber.

"That when the President shall proceed to the gallery to take the Oath, he be attended by the Vice-President, and be followed by the Chancellor of the State, and pass through the middle door, that the Senators pass through the door on the left, and the Representatives, preceded by the Speaker, pass through the door on the right, and such of the persons who shall have been admitted into the Senate-Chamber and may be desirous to go into the gallery, are then also to pass through the door on the right. That when the President shall have taken the Oath, and returned into the Senate-Chamber, attended by the Vice-President, and shall be seated in his Chair, that the Senators and the Representatives also return into the Senate-Chamber, and that the Vice-President and they resume their respective seats.

"Both Houses having resolved to accompany the President after he shall have taken the Oath, to St. Paul's Chapel, to hear divine service, to be performed by the Chaplain of Congress, that the following order of procession be observed, viz. The door-keeper and Senior-Member of the House of Representatives, the Speaker of the House, The Representatives. The Speaker. The President with the Vice-President at his left hand. The Senators. The Secretary of the Senate. The door-keeper, and messenger of the Senate.

"That a pew be reserved for the President—Vice-President—Speaker of the House of Representatives, and the Committees; and that pew be also reserved sufficient for the reception of the Senators and Representatives.

"That after divine service shall be performed, the President be received at the door of the Church, by the Committees, and by them attended in carriages to his residence.

"That it be intimated to the Assistants to take proper precautions for keeping the avenues to the Hall open, and that for much of the day during the waiting, a Fire-engine be stationed at the foot of the House, and in the name of the Committees request his aid, by an order of recommendation to the Civil Officers, or militia of the city, to attend and serve on the occasion, as he shall judge most proper."

Major L'Enfant declines the appointment as one of the assistants.—N. Y. Daily Gaz., May 1, 1789.

Washington is inaugurated president.—Winson, VII: 267, 326. In anticipation of the event, spectators came from far and near, and the city was crowded.

"We shall remain here, even if we have to sleep in tents, as so many will have to do," wrote Miss Bertha Ingersoll to Miss [Sally] McKeen; 'Mr. Williamson had promised to engage us rooms at Francia's, but that was jumped long ago, as was every other decent public house; and now while we are waiting at Mrs. Vandervoort's, in Maiden Lane, till after dinner, two of our beans are running about town, determined to obtain the best places for us to stay at which can be opened for love, money, or the most persuasive speeches.' Another young woman, after recounting the Vice-President's Besetting Sins and various difficulties in finding agreeable accommodations in the metropolis, adds in a postscript, 'I have seen him! and though I had been entirely ignorant that he was arrived in the city, I should have known at a glance that it was General Washington: I never saw a human being that looked so great and noble as he does. I could fall down..."
The first newspaper report of the event referred to it as "the ceremony of the introduction of his Excellency George Washington, to the Presidency of the United States." It stated, in part: "The scene was extremely solemn and impressive. . . ."

"At nine o'clock A.M. the clergy of different denominations assembled their congregations in their respective places of worship, and offered up prayers for the safety of the President.

"About twelve o'clock the procession moved from the house of the President to Cherry Street, through Dock street, and Broad street, to Federal Hall [at Wall and Nassau Sts.], in the following order:

[Col. [Morgan] Lewis supported by two officers
Capt. Stakes with troop of Horse, Artillery.
Major Van Horns.
Grenadiers, under Capt. Harsin.
German Grenadiers, under Capt. Scriba
Major Bicker,
The Infantry of the Brigade
Major Christye,
Sheriff [Robt. Boyd]

"Then followed the multitude of citizens.

"When they came within a short distance of the Hall, the troop formed in line on both sides of the way, and his excellency passing through the ranks, was conducted into the building, and in the Senate chamber introduced to both houses of Congress immediately afterwards, accompanied by the two houses, he went into the gallery fronting Broad street, where, in the presence of an immense concourse of citizens, he took the oath prescribed by the constitution, which was administered to him by the Hon. R. R. Livingston, Esq; Chancellor of the state of New-York.

"Immediately after he had taken the oath, the Chancellor proclaimed him President of the United States. —Was answered by the discharge of 13 guns, and by loud repeated shouts; on this the President bowed to the people, and bowed for some time, to appear in good humor with their acclamations. His Excellency with the two Houses, then retired to the Senate Chamber, where he made the following speech. [The inaugural address is printed in full."

"His Excellency, accompanied by the Vice President, the Speaker of the House of Representatives, and both Houses of Congress then met, where divine service was performed by the Rev. Dr. Provoost, Bishop of the Episcopal Church in this State, and Chaplain to Congress [the Senate].

"The religious solemnity being ended, the President was escorted to his house, and the citizens retired to their homes. . . ."

"The account in the N. Y. Packet, May 4, mentioned the following additional features: In the first procession, from "the Federal State-House" to "the President's house," and back to the State-House, there were "Gentlemen in coaches" preceding the "Citizens on foot." The sheriff was on horseback. The president "joined the procession in his carriage and four." The balcony or outer gallery in front of the State-House was "decorated with a canopy and curtains of red interwoven with white." See also the French minister's account in The Ilist of the Centennial Celebration of the Inaug. of Geo. Washington, 48.

"The principal companies were Captain Stakes's troop of horse, equipped in the style of Lee's famous partisan legion; Captain Scriba's German Grenadiers, with blue coats, yellow waistcoats and breeches, black gaiters, and towering cone-shaped caps, faced with bear-skin; Captain Harssin's New York Grenadiers, composed, in imitation of the guard of the great Frederick, of only the tallest and finest-looking young men of the city, dressed in blue coats with red facings and gold braid, cocked hats, white feathers, and white waistcoats and breeches, and black spatterdashes, buttoned close to the shoe to the knee; and the Scotch Infantry, in full highland costume, with bagpipes." —Griswold, The Republican Court, 139.

When Washington went to St. Paul's Chapel for the religious service, from federal hall, the flag (one of the flags) carried in the procession was provided by and is still in the possession of the Marine Society of N. Y.—See letter of Bishop Manning in N. Y. Times, Ag. 4, 1824.

The accounts written by spectators were most graphic. Gen. Wm. Maclay, of Pennsylvania, who kept a private journal of his activities and interests while in New York, from 1789 to 1791, recorded very intimate observations and impressions of the ceremonies connected with the inauguration. The crowd was already great when he entered the city hall at about ten o'clock. The senate met, and the vice-president (John Adams) "rose in the most solemn manner." (Maclay states that Adams was often "at loss for expressions,"—because, as he supposed, he was "wrapped up in the contemplation of his own importance,"—at which times he "suffers an unmeaning kind of vacant look to escape from") Adams said: "Gentlemen, I wish for the direction of the Senate. The President will, I suppose, address the Congress. How shall I behave? How shall we receive it? Shall it be standing or sitting?"

Three cheers, and repeated. The ways of the English parliament on such occasions were discussed quite thoroughly. While this was in progress, "Repeated accounts came [that] the Speaker and Representatives were at the door. Confusion ensued; the members left their seats. . . ."

Then, "The Speaker was introduced, followed by the Representatives. Here we sat an hour and ten minutes before the President arrived—this delay was owing to Lee, Izard, and Dalton, who had stayed with us while the Speaker came in, instead of going to attend the President. The President advanced between the Senate and Representatives, bowing to each. He was placed in the chair by the Vice-President; the Senate with their president on the right, the Speaker and the Representatives on his left. The Vice-President rose and addressed a short sentence to him. The import of it was that he should now take the office of President. He seemed to have forgotten half what he was to say, for he made a dead pause before he uttered a word of the oration. He finished with a formal bow, and the President was conducted out of the middle window into the gallery, and the oath was administered by the Chancellor. Notice that the business was done was communicated to the crowd by proclamation, etc., who gave three cheers, and repeated it on the President's bowing to them.

"Having seen the company returned into the Senate chamber, the President took the chair and the Senators and Representatives sat. He rose, and all rose also, and addressed them. [For address, see The Daily Adv., May 1, and other newspapers above cited.] This great man was agitated and embarrassed more than ever he was by the leveled cannon or pointed musket. He trembled, and several times he might scarce make out to read, though it must be supposed he had often read it before. He put part of the fingers of his left hand into the side of what I think the tailor calls the fall of the breeches, changing the paper into his left hand. After some time he then did the same with some of the fingers of his right hand. When he came to the words all the world, he made a flourish with his right hand, which left rather an ungainly impression. I sincerely, for my part, wished all set ceremony in the hands of the dancing-masters, and that this first of men had read off his address in the plainest manner, without ever taking his eyes from the paper, for I felt hurt that he was not first in everything. He was dressed in deep brown, with metal buttons, with an eagle on them, white stockings, a bag, and sword. . . .—Maclay's jour., 7-9.

Rudolph Van Doblen, who represented The Netherlands at New York, stated among other things, in his report, on May 4th to the Recorder of the States-General that "His Excellency was dressed in plain brown clothes which had been presented to him by the mill at Hartford, Connecticut." One of the newspapers of the time stated that "The President on the day of his inauguration
appealed dressed in a complete suit of homespun clothes, but the cloth was of so fine a fabric and so handsomely finished that it was universally mistaken for a foreign manufactured superfine cloth."

—N. Y. Jour., May 3, 1789.

Don Diego de Garodqui, the Spanish Chargé d’Affaires, in his report to Count Florida Blanca, the minister of state, on May 1st, wrote, among other things, that Washington "... was introduced by the two committees of Congress in the Senate-chamber, and was received by the Vice-President, standing in front of his chair, which was placed to the right of the President's seat. He was also received by the Senators who occupied one of two rows of chairs next to the one of the Vice-President; the other row was occupied by the Ministers of Spain and France, the late President of Congress, the Ministers of State, War, and Exchequer, the chaplain of Congress, the escort of the President, the Governor and Lieutenant-Governor of the State, the Chancellor, Chief-Judge, and other judges of the Supreme Court, and the mayor. The speaker of the House of Representatives sat on another chair by the side of the President, and the Representatives obtained places on the same side."

Shortly after the President had taken his seat, all those present arose, and the President, escorted by the Vice-President, and followed by the Chancellor of the State, and others that chose to follow, proceeded to the gallery... where the Chancellor gave the oath... after which he proclaimed, in a loud voice, "Long live George Washington, the President of the United States!"

He also described the elaborate decorations in front of his own house, which was situated next to the fort. "The front of the house was occupied by two spacious galleries adorned with statues, natural size,imitating marble, representing the most peculiar attributes of Spain, viz., Justice, Integrity, Wisdom, Sobriety, Friendship, and Generosity."

The Comte de Moustier, the plenipotentiary of France, dispatched his report to his home government on June 5th, stating, in part, that when the procession had reached "the Congress palace," the President, "holding his hat in hand, bowed to the public right and left; and, although there was an innumerable mass of people, everybody was uncovered and preserved a respectful silence."

Regarding the administration of the oath, he said:

"Three doors communicating with this balcony were opened. The President passed by the middle one, followed by the Vice-President and the Chancellor... The Senators went out by the right, and the Representatives by the left. On an embroidered cover a Bible was brought, upon which the President placed his hand and repeated the following words after the Chancellor:"

'I solemnly swear to discharge with fidelity the functions of President of the United States, and to do all in my power to preserve, protect, and defend the Constitution of the United States of America. Thereupon the Chancellor, making a sign with his hat to the people, exclaimed, 'Long live George Washington, President of the United States!' Three hurras, the customary acclamation of the people, followed; the President saluted the public profoundly, and re-entered with the Senators and Representatives.

"Everybody appeared to be equally imbued with respect and veneration for the illustrious chief of the republic, and no one perceived that the city was without police. The simplest citizen seemed to be filled with pride for the virtues of the man who was to govern them. Tears of joy were seen to flow in the Senate-chamber, at church, and even in the streets, and never has sovereignty reigned more completely in the hearts of his subjects than did Washington in those of his fellow-citizens. Nature, that has conferred on him the art of governing, seems to have endowed his figure, which has nothing in common with the other Americans. He has the soul, look, and figure of a hero united in him. Born to command, he never seems embarrassed with the homage rendered him, and he has the advantage of mingling great dignity with great simplicity of manner."

"After having taken upon himself the robes of office of the first magistrate of a great republic, he betook himself on foot and without escort to the Chancellor's house to witness the fire-works which had been in process of preparation for several weeks..."

---Ibid., citing the original in the French archives.

Miss Eliza Morton, then fifteen years of age, who in 1797 married Josiah Quincy, afterward president of Harvard University (see N. Y. Jour. of Am. Hist., Mr., 1895), wrote, in 1821, her recollections of the inauguration thus:
